FOREST OIL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(1) BASIS OF PRESENTATION

The Condensed Consolidated Financial Statements included herein are unaudited and include the accounts of Forest Oil Corporation and its consolidated subsidiaries (collectively, "Forest" or the "Company"). In the opinion of management, all adjustments, consisting of normal recurring accruals, have been made which are necessary for a fair presentation of the financial position of Forest at September 30, 2010 and the results of its operations, its cash flows, and changes in shareholders' equity for the periods presented. Interim results are not necessarily indicative of expected annual results because of the impact of fluctuations in prices received for liquids (oil, condensate, and natural gas liquids) and natural gas and other factors.

In the course of preparing the Condensed Consolidated Financial Statements, management makes various assumptions, judgments, and estimates to determine the reported amounts of assets, liabilities, revenues, and expenses, and in the disclosures of commitments and contingencies. Changes in these assumptions, judgments, and estimates will occur as a result of the passage of time and the occurrence of future events and, accordingly, actual results could differ from amounts previously established.

The more significant areas requiring the use of assumptions, judgments, and estimates relate to volumes of oil and gas reserves used in calculating depletion, the amount of future net revenues used in computing the ceiling test limitations, and the amount of future capital costs and abandonment obligations used in such calculations, determining impairments of investments in unproved properties, valuing deferred tax assets and goodwill, and estimating fair values of financial instruments, including derivative instruments.

Certain amounts in the prior year financial statements have been reclassified to conform to the 2010 financial statement presentation.

For a more complete understanding of Forest's operations, financial position, and accounting policies, reference is made to the consolidated financial statements of Forest, and related notes thereto, filed with Forest's Annual Report on Form 10-K for the year ended December 31, 2009, previously filed with the Securities and Exchange Commission ("SEC").

(2) EARNINGS (LOSS) PER SHARE AND COMPREHENSIVE EARNINGS (LOSS)

Earnings (Loss) per Share

Basic earnings (loss) per share is computed using the two-class method by dividing net earnings (loss) attributable to common stock by the weighted average number of common shares outstanding during each period. Under the treasury stock method, diluted earnings (loss) per share is computed by dividing net earnings (loss) adjusted for the effects of certain contracts that provide the issuer or holder with a choice between settlement methods by the weighted average number of common shares outstanding adjusted for the dilutive effect, if any, of potential common shares (e.g. stock options, unvested restricted stock grants, unvested phantom stock units that may be settled in shares, and unvested performance units). No potential common shares shall be included in the computation of any diluted per share amount when a net loss exists.

The two-class method of computing earnings per share is required for those entities that have participating securities or multiple classes of common stock. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating

FOREST OIL CORPORATION

(Unaudited)

(2) EARNINGS (LOSS) PER SHARE AND COMPREHENSIVE EARNINGS (LOSS) (Continued)

security according to dividends declared (or accumulated) and participation rights in undistributed earnings. Holders of restricted stock issued under Forest's stock incentive plans have the right to receive non-forfeitable cash dividends, participating on an equal basis with common stock. Holders of phantom stock units issued to directors under Forest's stock incentive plans also have the right to receive non-forfeitable cash dividends, participating on an equal basis with common stock, while phantom stock units issued to employees do not participate in dividends. Stock options issued under Forest's stock incentive plans do not participate in dividends. Performance units issued under Forest's stock incentive plans do not participate in dividends in their current form. Holders of performance units participate in dividends paid during the performance units' vesting period only after the performance units vest with common shares being earned by the holders of the performance units. Performance units may vest with no common shares being earned, depending on Forest's shareholder return over the performance units' vesting period in relation to the shareholder returns of specified peers. See Note 3 for more information on the performance units. In summary, restricted stock issued to employees and directors and phantom stock units issued to directors are participating securities and earnings are allocated to both common stock and these participating securities under the two-class method. However, these participating securities do not have a contractual obligation to share in Forest's losses. Therefore, in periods of net loss, none of the loss is allocated to these participating securities.

Unvested restricted stock grants were not included in the calculation of diluted earnings per share for the three months ended September 30, 2010 and 2009 and the nine months ended September 30, 2010 as their inclusion would have an antidilutive effect. Stock options, unvested restricted stock grants, and unvested phantom stock units that may be settled in shares were not included in the calculation of diluted loss per share for the nine months ended September 30, 2009 as their inclusion would have an antidilutive effect.

FOREST OIL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

(2) EARNINGS (LOSS) PER SHARE AND COMPREHENSIVE EARNINGS (LOSS) (Continued)

The following sets forth the calculation of basic and diluted earnings (loss) per share for the periods presented.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In Thousands, Except Per Share Amounts)			
Net earnings (loss)	\$ 68,911	172,311	211,327	(968,321)
Net earnings attributable to participating securities	(1,427)	(3,384)	(4,116)	
Net earnings (loss) attributable to common stock for basic earnings per share	67,484	168,927	207,211	(968,321)
Adjustment for liability-classified stock-based compensation awards	74	(21)	250	
Net earnings (loss) for diluted earnings per share	\$ 67,558	168,906	207,461	(968,321)
Weighted average common shares outstanding during the period for basic earnings per share	110,992	110,054	110,691	102,366
Dilutive effects of potential common shares	786	168	699	
Weighted average common shares outstanding during the period, including the effects of dilutive potential common shares, for diluted earnings per share	111,778	110,222	111,390	102,366
Basic earnings (loss) per common share	\$.61	1.53	1.87	(9.46)
Diluted earnings (loss) per common share	\$.60	1.53	1.86	(9.46)

Comprehensive Earnings (Loss)

Comprehensive earnings (loss) is a term used to refer to net earnings (loss) plus other comprehensive income (loss). Other comprehensive income (loss) is comprised of revenues, expenses, gains, and losses that under generally accepted accounting principles are reported as separate components of shareholders' equity instead of net earnings (loss). Items included in Forest's other comprehensive income (loss) for the three and nine months ended September 30, 2010 and 2009 are foreign currency gains and losses related to the translation of the assets and liabilities of Forest's Canadian operations and changes in unfunded postretirement benefits.

Unamortized stock-based compensation costs	\$ 464	39,151	8,112 ⁽³⁾	47,727
Weighted average amortization period remaining	.7 year	2.1 years	2.0 years	2.0 years
Three months ended September 30, 2009:				
Total stock-based compensation costs	\$ 196	6,938	972	8,106
Less: stock-based compensation costs capitalized	(70)	(2,664)	(470)	(3,204)
Stock-based compensation costs expensed	\$ 126	4,274	502	4,902
Nine months ended September 30, 2009:				
Total stock-based compensation costs	\$ 533	19,586	1,273	21,392
Less: stock-based compensation costs capitalized	(222)	(7,751)	(623)	(8,596)
Stock-based compensation costs expensed	\$ 311	11,835	650	12,796

(1) Includes performance units.

Table of Contents

FOREST OIL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

(3) STOCK-BASED COMPENSATION (Continued)

(2) The Company also maintains an employee stock purchase plan (which is not included in the table) under which \$.1 million and \$.4 million of compensation cost was recognized for the three and nine months ended September 30, 2010, respectively, and \$.1 million and \$.5 million of compensation cost was recognized for the three and nine months ended September 30, 2009, respectively.

(3) Based on the closing price of the Company's common stock on September 30, 2010.

Stock Options

The following table summarizes stock option activity in the Company's stock-based compensation plans for the nine months ended September 30, 2010.

	Number of Options	Weighted Average Exercise Price	Aggregate Intrinsic Value (In Thousands) ⁽¹⁾	Number of Options Exercisable
Outstanding at January 1, 2010	1,818,419	\$ 21.26	\$ 7,387	1,722,216
Granted				
Exercised	(223,082)	19.35	1,674	
Cancelled	(27,752)	35.30		
Outstanding at September 30, 2010	1,567,585	\$ 21.29	\$ 15,672	1,523,122

(1) The intrinsic value of a stock option is the amount by which the current market value of the underlying stock exceeds the exercise price of the option.

Restricted Stock and Phantom Stock Units

The following table summarizes the restricted stock and phantom stock unit activity in the Company's stock-based compensation plans for the nine months ended September 30, 2010.

	Restricted Stock ⁽¹⁾			Phantom Stock Units ⁽²⁾		
	Number of Shares	Weighted Average Grant Date Fair Value	Vest Date Fair Value (In Thousands)	Number of Units	Weighted Average Grant Date Fair Value	Vest Date Fair Value (In Thousands) ⁽³⁾

Edgar Filing: FOREST OIL CORP - Form 10-Q

(1)

Includes performance units that were awarded to Forest's officers on May 21, 2010. There were 264,500 performance units awarded, with a grant date fair value of \$31.63 each. Under the terms of the award agreements, each performance unit represents a contractual right to receive one share of Forest's common stock; provided that the actual number of shares that may be deliverable under an award will range from 0% to 200% of the number of performance units awarded, depending on Forest's relative total shareholder return in comparison to an identified peer group during the thirty-six month performance period ending on March 31, 2013.

(3) STOCK-BASED COMPENSATION (Continued)

(2) Of the unvested units of phantom stock at September 30, 2010, 260,985 units can be settled in cash, shares of common stock, or a combination of both, while the remaining 239,617 units can only be settled in cash. The phantom stock units have been accounted for as a liability within the Condensed Consolidated Financial Statements.

(3) Of the 65,140 phantom stock units that vested during the nine months ended September 30, 2010, 63,750 units were settled in shares of common stock and 1,390 units were settled in cash.

(4) DEBT

The components of debt are as follows:

	September 30, 2010				December 31, 2009			
	Principal	Unamortized Premium (Discount)	Other ⁽¹⁾	Total	Principal	Unamortized Premium (Discount)	Other ⁽¹⁾	Total
	(In Thousands)

8½% Senior Notes due 2014	600,000	(19,677)		580,323	600,000	(24,029)		575,971
7¾% Senior Notes due 2014 ⁽⁴⁾					150,000	(1,035)	7,713	156,678
7¼% Senior Notes due 2019	1,000,000	492		1,000,492	1,000,000	534		1,000,534
Total long-term debt	1,885,012	(17,570)	1,011	1,868,453	2,035,112	(21,949)	9,351	2,022,514
Less: current portion of long-term debt ⁽⁴⁾					(150,000)	1,035	(7,713)	(156,678)
Long-term portion of long-term debt	\$ 1,885,012	(17,570)	1,011	1,868,453	1,885,112	(20,914)	1,638	1,865,836

(1) Represents the unamortized portion of gains realized upon termination of interest rate swaps in 2002 and 2003 that were accounted for as fair value hedges. The gains are being amortized as a reduction of interest expense over the terms of the notes.

(2) Due December 2011.

(3) In May 2010, the Company repurchased \$.1 million in principal amount of the 7% senior subordinated notes due 2013 at par.

(4) In December 2009, the Company irrevocably called the 7¾% senior notes due 2014 and redeemed these notes in January 2010 at 101.292% of par and a net gain of \$4.6 million was recognized upon redemption. The net gain was recognized due to the write-off of unamortized deferred gains on the termination of interest rate swaps.

Bank Credit Facilities

As of September 30, 2010, the Company had syndicated bank revolving credit agreements with total lender commitments of \$1.8 billion. The credit agreements consist of a \$1.65 billion U.S. credit facility through a syndicate of banks led by JPMorgan Chase Bank, N.A. (the "U.S. Credit Facility") and a \$150 million Canadian credit facility through a syndicate of banks led by JPMorgan Chase Bank, N.A., Toronto Branch (the "Canadian Credit Facility," and together with the U.S. Credit Facility, the "Credit Facilities"). The Credit Facilities will mature in June 2012. At September 30, 2010, there were no outstanding borrowings under the Credit Facilities.

Table of Contents

FOREST OIL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

(4) DEBT (Continued)

Forest's availability under the Credit Facilities is governed by a borrowing base (the "Global Borrowing Base"). As of September 30, 2010, the borrowing base under the Credit Facilities was \$1.3 billion, which Forest has allocated \$1.155 billion to the U.S. Credit Facility and \$145 million to the Canadian Credit Facility. The determination of the Global Borrowing Base is made by the lenders in their sole discretion, on a semi-annual basis, taking into consideration the estimated value of Forest's oil and gas properties based on pricing models determined by the lenders at such time, in accordance with the lenders' customary practices for oil and gas loans. The available borrowing amount under the Credit Facilities could increase or decrease based on such redetermination. In October 2010, the lenders reaffirmed the borrowing base at \$1.3 billion and the next redetermination is expected to occur in the second quarter of 2011. In addition to the semi-annual redeterminations, Forest and the lenders each have discretion at any time, but not more often than once during a calendar year, to have the Global Borrowing Base redetermined. The Global Borrowing Base is also subject to automatic adjustments if certain events occur.

(5) PROPERTY AND EQUIPMENT

Full Cost Method of Accounting

The Company uses the full cost method of accounting for oil and gas properties. Separate cost centers are maintained for each country in which the Company has operations. During the periods presented, the Company's primary oil and gas operations were conducted in the United States and Canada. All costs incurred in the acquisition, exploration, and development of properties (including costs of surrendered and abandoned leaseholds, delay lease rentals, dry holes, and overhead related to exploration and development activities) and the fair value of estimated future costs of site restoration, dismantlement, and abandonment activities are capitalized. During the three months ended September 30, 2010 and 2009, Forest capitalized \$12.0 million and \$11.4 million of general and administrative costs (including stock-based compensation), respectively. During the nine months ended September 30, 2010 and 2009, Forest capitalized \$34.6 million and \$33.5 million of general and administrative costs (including stock-based compensation), respectively. Interest costs related to significant unproved properties that are under development are also capitalized to oil and gas properties. During the three months ended September 30, 2010 and 2009, the Company capitalized \$3.0 million and \$2.5 million, respectively, of interest costs attributed to unproved properties. During the nine months ended September 30, 2010 and 2009, the Company capitalized \$8.9 million and \$9.3 million, respectively, of interest costs attributed to unproved properties.

Investments in unproved properties, including capitalized interest costs, are not depleted pending determination of the existence of proved reserves. Unproved properties are assessed periodically to ascertain whether impairment has occurred. Unproved properties whose costs are individually significant are assessed individually by considering the primary lease terms of the properties, the holding period of the properties, geographic and geologic data obtained relating to the properties, and estimated discounted future net cash flows from the properties. Estimated discounted future net cash flows are based on discounted future net revenues associated with probable and possible reserves, risk adjusted as appropriate. Where it is not practicable to assess individually the amount of impairment of properties for which costs are not individually significant, such properties are grouped for purposes of

Table of Contents

FOREST OIL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

(5) PROPERTY AND EQUIPMENT (Continued)

assessing impairment. The amount of impairment assessed is added to the costs to be amortized, or is reported as a period expense, as appropriate.

The Company performs a ceiling test each quarter on a country-by-country basis. The full cost ceiling test is a limitation on capitalized costs prescribed by SEC Regulation S-X Rule 4-10. The ceiling test is not a fair value based measurement. Rather, it is a standardized mathematical calculation. The ceiling test provides that capitalized costs less related accumulated depletion and deferred income taxes for each cost center may not exceed the sum of (1) the present value of future net revenue from estimated production of proved oil and gas reserves using current prices (as discussed below), excluding the future cash outflows associated with settling asset retirement obligations that have been accrued on the balance sheet, at a discount factor of 10%; plus (2) the cost of properties not being amortized, if any; plus (3) the lower of cost or estimated fair value of unproved properties included in the costs being amortized, if any; less (4) income tax effects related to differences in the book and tax basis of oil and gas properties. Should the net capitalized costs for a cost center exceed the sum of the components noted above, a ceiling test write-down would be recognized to the extent of the excess capitalized costs. The September 30, 2010 ceiling test, which did not result in a write-down, was based on the average of the first-day-of-the-month prices during the twelve-month period prior to September 30, 2010 pursuant to the SEC's "Modernization of Oil and Gas Reporting" rule, which was effective beginning with December 31, 2009 reporting. The March 31, 2009 ceiling test, which was based on the March 31, 2009 spot prices, resulted in non-cash write-downs of oil and gas property costs of \$1.4 billion in the United States cost center and \$199.0 million in the Canada cost center.

Gain or loss is not recognized on the sale of oil and gas properties unless the sale significantly alters the relationship between capitalized costs and estimated proved oil and gas reserves attributable to a cost center.

Depletion of proved oil and gas properties is computed on the units-of-production method, whereby capitalized costs, as adjusted for future development costs and asset retirement obligations, are amortized over the total estimated proved reserves. The Company uses its quarter-end reserves estimates to calculate depletion for the current quarter.

(6) ASSET RETIREMENT OBLIGATIONS

Forest records the fair value of a liability for an asset retirement obligation in the period in which it is incurred with a corresponding increase in the carrying amount of the related long-lived asset. Subsequent to initial measurement, the asset retirement obligation is required to be accreted each period to its present value. Capitalized costs are depleted as a component of the full cost pool using the units-of-production method. Forest's asset retirement obligations consist of costs related to the plugging of wells, the removal of facilities and equipment, and site restoration on oil and gas properties.

Table of Contents

Commodity	\$	19,105
Interest rate		
Total liabilities	\$	19,105

(1)

Edgar Filing: FOREST OIL CORP - Form 10-Q

The authoritative accounting guidance regarding fair value measurements for assets and liabilities measured at fair value establishes a three-tier fair value hierarchy, which prioritizes the inputs used to measure fair value. These tiers consist of: Level 1, defined as unadjusted quoted prices in active markets for identical assets or liabilities; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs for use when little or no market data exists, therefore

Table of Contents**FOREST OIL CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(Unaudited)****(7) FAIR VALUE MEASUREMENTS (Continued)**

requiring an entity to develop its own assumptions. The Company uses the income approach to value financial instruments under the Level 2 hierarchy.

- (2) The Company's derivative assets and liabilities include commodity and interest rate derivatives (see Note 8 for more information on these instruments). The Company utilizes present value techniques and option-pricing models for valuing its derivatives. Inputs to these valuation techniques include published forward prices, volatilities, and credit risk considerations, including the incorporation of published interest rates and credit spreads. All of the significant inputs are observable, either directly or indirectly; therefore, the Company's derivative instruments are included within the Level 2 fair value hierarchy.

The following table presents a reconciliation of the beginning and ending balances of the Company's assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the nine months ended September 30, 2009. The Company did not have assets or liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) at any time during 2010.

\$	(657)	(1,670)
----	-------	---------

- (1) The Company's debt securities are comprised of a zero coupon senior subordinated note due from Pacific Energy Resources, Ltd. ("PERL") in 2014 at a principal amount at stated maturity of \$60.8 million (the "PERL Note") that was received as a portion of the total consideration for the sale of the Company's Alaska assets in 2007. In March 2009, PERL filed voluntary petitions for reorganization under Chapter 11 of the U.S. Bankruptcy Code. The Company used its own assumptions as to what market participants would assume regarding future cash flows and risk-adjusted discount rates in valuing the PERL Note, which is currently valued at zero and has been since March 31, 2009.

- (2) The Company's investment in PERL common stock, which the Company also received as a portion of the total consideration for the sale of the Company's Alaska assets in 2007, was transferred from Level 1 to Level 3 in the first quarter of 2009 when PERL's common stock was suspended from trading for failure to meet the continued stock exchange listing requirements. The Company used its own assumptions as to what market participants would

Table of Contents

FOREST OIL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

(7) FAIR VALUE MEASUREMENTS (Continued)

assume regarding future cash flows and risk-adjusted discount rates in valuing the PERL common stock, which is currently valued at zero and has been since March 31, 2009.

(3) The Company's policy is to recognize transfers in and/or out of fair value hierarchy levels as of the beginning of the reporting period in which the event or change in circumstances caused the transfer.

The table below sets forth losses (realized and unrealized) included in earnings related to the Company's assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the nine months ended September 30, 2009, which are reported in the Condensed Consolidated Statements of Operations under "Other, net." The Company did not record any gains or losses (realized and unrealized) related to assets or liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during 2010 or the three months ended September 30, 2009.

	Nine Months Ended September 30, 2009	
	Equity Securities	Debt Securities
	(In Thousands)	
Total losses included in earnings for the period	\$ 657	1,670
Change in unrealized losses relating to assets still held at end of period	\$ 657	1,670

The fair values and carrying amounts of the Company's financial instruments are summarized below for the periods presented.

	September 30, 2010		December 31, 2009	
	Carrying Amount	Fair Value ⁽¹⁾	Carrying Amount	Fair Value ⁽¹⁾
	(In Thousands)			
Assets:				
Cash and cash equivalents	\$ 251,599	251,599	467,221	467,221
Derivative instruments	116,035	116,035	36,199	36,199
Liabilities:				
Derivative instruments	19,105	19,105	42,184	42,184
8% senior notes due 2011	287,626	300,818	289,221	296,400
7% senior subordinated notes due 2013	12	12	110	112
8 ¹ / ₂ % senior notes due 2014	580,323	657,000	575,971	630,000
7 ³ / ₄ % senior notes due 2014			156,678	151,938
7 ¹ / ₄ % senior notes due 2019	1,000,492	1,030,000	1,000,534	992,500

(1) The Company used various assumptions and methods in estimating the fair values of its financial instruments. The carrying amount of cash and cash equivalents approximated fair value due to the short original maturities (three months or less) and high liquidity of the cash equivalents. The fair values of the senior notes and senior subordinated notes were estimated based on quoted market prices. The methods used to determine the fair values of the derivative instruments are discussed above. See also Note 8 to the Condensed Consolidated Financial Statements for more information on the derivative instruments.

(8) DERIVATIVE INSTRUMENTS

Commodity Derivatives

Forest periodically enters into derivative instruments such as swap, basis swap, and collar agreements as an attempt to moderate the effects of wide fluctuations in commodity prices on the Company's cash flow and to manage the exposure to commodity price risk. Forest's commodity derivative instruments generally serve as effective economic hedges of commodity price exposure; however, the Company has elected not to designate its derivatives as hedging instruments. As such, the Company recognizes all changes in fair value of its derivative instruments as unrealized gains or losses on derivative instruments in the Condensed Consolidated Statement of Operations.

The table below sets forth Forest's outstanding commodity swaps and costless collars as of September 30, 2010.

Remaining Swap Term	Natural Gas (NYMEX HH)		Oil (NYMEX WTI)		NGLs (OPIS Refined Products)	
	Bbtu Per Day	Weighted Average Hedged Price per MMBtu	Barrels Per Day	Weighted Average Hedged Price per Bbl	Barrels Per Day	Weighted Average Hedged Price per Bbl
Swaps:						
October 2010 - December 2010	210	\$ 6.20	3,000	\$ 76.06		\$
Calendar 2011	90	5.86			3,000	36.75
Collars:						
October 2010 - December 2010			2,000	60.00/98.50 ⁽¹⁾		
Calendar 2011			3,000	75.00/91.87 ⁽¹⁾⁽²⁾		

(1) Represents weighted average hedged floor and ceiling price per Bbl.

(2) Subsequent to September 30, 2010, in connection with receiving a premium hedged price on a gas swap, Forest lowered the hedged ceiling price on one of its existing Calendar 2011 oil collars that covered 1,000 barrels per day from \$95.00 to \$90.00 per Bbl.

In connection with several gas swaps entered into during the nine months ended September 30, 2010, Forest granted option instruments (several commodity swaptions and one call option) to the gas swap counterparties in exchange for Forest receiving premium hedged prices on the gas swaps. As of October 29, 2010, none of the options have been exercised by the counterparties. The table below sets forth the outstanding options as of September 30, 2010.

Instrument	Option Expiration	Underlying Swap Term	Natural Gas (NYMEX HH)		Oil (NYMEX WTI)	
			Underlying Swap Bbtu Per Day	Underlying Swap Weighted Average Hedged Price per MMBtu	Underlying Swap Barrels Per Day	Underlying Swap Hedged Price per Bbl
Gas Swaptions	December 2010	Calendar 2011	50	\$ 5.80		\$

Edgar Filing: FOREST OIL CORP - Form 10-Q

Oil Swaption	December 2011	Calendar 2012	1,000	90.00
		Monthly in		
Oil Call Option	Monthly in 2011	2011	1,000	90.00

Subsequent to September 30, 2010, through October 29, 2010, Forest entered into two additional gas swaps covering 25 Bbtu per day for Calendar 2011 for a weighted average hedged price of \$5.03

Table of Contents

FOREST OIL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(8) DERIVATIVE INSTRUMENTS (Continued)

per MMBtu. In connection with these swaps, the counterparties were granted the following oil swaptions.

Commodity Options

Option Expiration	Underlying Swap Term	Oil (NYMEX WTI)	
		Underlying Swap Barrels Per Day	Underlying Swap Hedged Price per Bbl
December 2010	Calendar 2011	1,000	\$ 85.00
December 2011	Calendar 2012	1,000	90.00

Forest also uses basis swaps in connection with natural gas swaps in order to fix the price differential between the NYMEX Henry Hub price and the index price at which a portion of its natural gas production is sold. The table below sets forth Forest's outstanding basis swaps as of September 30, 2010.

Basis Swaps

Remaining Swap Term	Index	Bbtu Per Day	Weighted Average Hedged Price Differential per MMBtu
October 2010 - December 2010	Centerpoint	30	\$ (.95)
October 2010 - December 2010	Houston Ship Channel	50	(.29)
October 2010 - December 2010	Mid Continent	60	(1.04)
October 2010 - December 2010	NGPL TXOK	40	(.44)

Interest Rate Derivatives

Forest periodically enters into interest rate derivative agreements in an attempt to manage the mix of fixed and floating interest rates within its debt portfolio. The Company has elected not to designate its derivatives as hedging instruments. As such, the Company recognizes all changes in fair value of its derivative instruments as unrealized gains or losses on derivative instruments in the Condensed Consolidated Statement of Operations. The table below sets forth Forest's outstanding fixed-to-floating interest rate swaps as of September 30, 2010.

Remaining Swap Term	Interest Rate Swaps		Weighted Average Fixed Rate
	Notional Amount (In Thousands)	Weighted Average Floating Rate	
October 2010 - February 2014	\$ 500,000	1 month LIBOR + 5.89%	8.50%

Fair Value and Gains and Losses

The table below summarizes the location and fair value amounts of Forest's derivative instruments reported in the Condensed Consolidated Balance Sheets as of the dates indicated. These derivative instruments are not designated as hedging instruments for accounting purposes. For financial reporting purposes, Forest does not offset asset and liability fair value amounts recognized for derivative

Edgar Filing: FOREST OIL CORP - Form 10-Q

Due to the volatility of natural gas and liquids prices, the estimated fair values of Forest's commodity derivative instruments are subject to large fluctuations from period to period. Forest has

Table of Contents

FOREST OIL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

(8) DERIVATIVE INSTRUMENTS (Continued)

experienced the effects of these commodity price fluctuations in both the current period and prior periods and expects that volatility in commodity prices will continue.

Credit Risk

Forest executes with each of its derivative counterparties an International Swap and Derivatives Association, Inc. ("ISDA") Master Agreement, which is a standard industry form contract containing general terms and conditions applicable to many types of derivative transactions. Additionally, Forest executes, with each of its derivative counterparties, a Schedule, which modifies the terms and conditions of the ISDA Master Agreement according to the parties' requirements and the specific types of derivatives to be traded. All but one of the counterparties is a lender, or an affiliate of a lender, under the Credit Facilities, which provide that any security granted by Forest under the Credit Facilities shall also extend to and be available to those lenders that are counterparties to derivative transactions with Forest. None of these counterparties require collateral beyond that already pledged under the Credit Facilities. The remaining counterparty, a purchaser of Forest's natural gas production, generally is a net debtor to Forest and as a result of these purchases does not require collateral under the ISDA Master Agreement and Schedule it has executed with Forest. Forest is currently evaluating the impact, if any, that the recently enacted Dodd-Frank Wall Street Reform and Consumer Protection Act will have on the existing derivative transactions under the Company's currently outstanding ISDA Master Agreements and Schedules, as well as Forest's ability to enter into such transactions and agreements in the future.

The ISDA Master Agreements and Schedules contain cross-default provisions whereby a default under the Credit Facilities will also cause a default under the derivative agreements. Such events of default include non-payment, breach of warranty, non-performance of financial covenants, default on other indebtedness, certain pension plan events, certain adverse judgments, change of control, a failure of the liens securing the Credit Facilities, and an event of default under the Canadian Facility. In addition, bankruptcy and insolvency events with respect to Forest or certain of its subsidiaries will result in an automatic acceleration of the indebtedness under the Credit Facilities. None of these events of default are specifically credit-related, but some could arise if there were a general deterioration of Forest's credit. The ISDA Master Agreements and Schedules contain a further credit-related termination event that would occur if Forest were to merge with another entity and the creditworthiness of the resulting entity was materially weaker than that of Forest.

The vast majority of Forest's derivative counterparties are all financial institutions that are engaged in similar activities and have similar economic characteristics that, in general, could cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. Forest does not require the posting of collateral for its benefit under its derivative agreements. However, Forest's ISDA Master Agreements contain netting provisions whereby if on any date amounts would otherwise be payable by each party to the other, then on such date the party that owes the larger amount will pay the excess of that amount over the smaller amount owed by the other party, thus satisfying each party's obligations. These provisions apply to all derivative transactions with the particular counterparty. If all counterparties failed, Forest would be exposed to a risk of loss equal to this net amount owed to Forest, the fair value of which was \$98.1 million at September 30, 2010. If Forest suffered an event of default, each counterparty could demand immediate payment, subject to

Table of Contents

FOREST OIL CORPORATION

(8) DERIVATIVE INSTRUMENTS (Continued)

notification periods, of the net obligations due to it under the derivative agreements. At September 30, 2010, Forest owed a net derivative liability to two counterparties, the fair value of which was \$1.2 million.

(9) INCOME TAXES

A reconciliation of income tax computed by applying the United States statutory federal income tax rate is as follows:

(11) GEOGRAPHICAL SEGMENTS

At September 30, 2010, Forest conducted operations in one industry segment, oil and gas exploration and production, and had three reportable geographical business segments: United States, Canada, and International. Forest's remaining activities were not significant and therefore were not reported as a separate segment, but have been included as a reconciling item in the information below. The segments were determined based upon the geographical location of operations in each business segment. The segment data presented below was prepared on the same basis as the Condensed Consolidated Financial Statements.

	Oil and Gas Exploration and Production							
	Three Months Ended September 30, 2010				Nine Months Ended September 30, 2010

(12) CONDENSED CONSOLIDATING FINANCIAL INFORMATION

The Company's 8% senior notes due 2011, 8¹/₂% senior notes due 2014, and 7¹/₄% senior notes due 2019 have been fully and unconditionally guaranteed by Forest Oil Permian Corporation, a wholly-owned subsidiary of the Company (the "Subsidiary Guarantor"). The Company's remaining subsidiaries (the "Non-Guarantor Subsidiaries") have not provided guarantees. Based on this distinction, the following presents condensed consolidating financial information as of September 30, 2010 and December 31, 2009 and for the nine months ended September 30, 2010 and 2009 on an issuer (parent company), guarantor subsidiary, non-guarantor subsidiaries, eliminating entries, and consolidated basis. Elimination entries presented are necessary to combine the entities.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

Forest Oil Corporation is an independent oil and gas company engaged in the acquisition, exploration, development, and production of natural gas and liquids primarily in North America. Forest was incorporated in New York in 1924, as the successor to a company formed in 1916, and has been a publicly held company since 1969. Unless the context otherwise indicates, references in this quarterly report on Form 10-Q to "Forest," "we," "ours," "us," or like terms refer to Forest Oil Corporation and its subsidiaries.

We currently conduct our operations in three geographical segments: the United States, Canada, and International. Our core operational areas are the Texas Panhandle area, the East Texas / North Louisiana area, and the Canadian Deep Basin area in Alberta and British Columbia. Our total estimated proved reserves as of December 31, 2009 were approximately 2,121 Bcfe. At December 31, 2009, approximately 83% of our estimated proved oil and natural gas reserves were in the United States, approximately 15% were in Canada, and approximately 2% were in Italy. Approximately 80% of our estimated proved reserves were natural gas as of December 31, 2009. See Note 11 to the Condensed Consolidated Financial Statements for additional information about our geographical segments.

The following discussion and analysis should be read in conjunction with Forest's Condensed Consolidated Financial Statements and Notes thereto, the information under the headings "Forward-Looking Statements" and "Risk Factors" below, and the information included or incorporated by reference in Forest's 2009 Annual Report on Form 10-K under the headings "Risk Factors," and "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies, Estimates, Judgments, and Assumptions."

Third Quarter and Year-to-Date 2010 Summary

Forest's third quarter and year-to-date 2010 highlights and other significant items were as follows:

Oil and gas production decreased 4% to 457 MMcfe per day in the third quarter of 2010 as compared to 476 MMcfe per day in the third quarter of 2009. The decrease was due to the sale of approximately \$1 billion of non-core oil and gas properties since the third quarter of 2009 representing 72 MMcfe of oil and gas production per day. The loss of the production associated with these property sales since the third quarter of last year was substantially offset by production increases from ongoing drilling operations in our core development areas. Oil and gas production also decreased 13% in the first nine months of 2010 as compared to the first nine months of 2009 primarily due to the asset sales discussed above, offset by production increases from ongoing drilling operations in our core areas.

Oil and gas sales increased 19% in the third quarter of 2010 to \$210 million from \$177 million in the corresponding period in 2009 and 16% in the first nine months of 2010 to \$640 million from \$553 million in the corresponding period in 2009. The increase in each period was due to increases in the average realized oil and gas prices.

Lease operating expenses were 10% lower on a per-unit basis in the third quarter of 2010 as compared to the third quarter of 2009 and were 11% lower on a per-unit basis in the first nine months of 2010 as compared to the same period in 2009. The decrease in each period was attributable to cost reduction initiatives and the sale of non-core oil and gas properties in late 2009 that had higher per-unit operating costs as compared to the properties we retained.

Table of Contents**RESULTS OF OPERATIONS**

Forest reported net earnings of \$69 million in the third quarter of 2010, or \$.60 per diluted share, compared to net earnings of \$172 million, or \$1.53 per diluted share, in the third quarter 2009. The decrease in net earnings in the third quarter 2010 compared to the third quarter 2009 was primarily due to a \$164 million reduction of a valuation allowance on a portion of our deferred tax assets during the third quarter 2009. Earnings before income taxes increased \$98 million between the two quarterly periods due to increased commodity prices and an increase in net realized and unrealized gains on commodity derivative instruments. Forest reported net earnings of \$211 million in the first nine months of 2010, or \$1.86 per diluted share, compared to a net loss of \$968 million, or \$9.46 per diluted share, in the first nine months of 2009. The increase in net earnings in the first nine months of 2010 is primarily due to a \$1.6 billion non-cash ceiling test write-down recorded in the first quarter 2009, which was caused by the significant decline in spot natural gas prices at March 31, 2009, as well as due to increased commodity prices and an increase in net realized and unrealized gains on commodity derivative instruments.

Forest's earnings before interest expense; income taxes; depletion, depreciation, and amortization expense; and certain other items ("Adjusted EBITDA"), were \$176 million and \$193 million for the quarters ended September 30, 2010 and 2009, respectively, and were \$528 million and \$586 million for the first nine months of 2010 and 2009, respectively. The decrease in Adjusted EBITDA in the 2010 periods as compared to the 2009 periods is primarily driven by decreases in realized gains on derivative instruments somewhat offset by increases in revenues and lower production expense, each as discussed below. Adjusted EBITDA is not considered a performance measure under U.S. Generally Accepted Accounting Principles ("GAAP") and reference should be made to "Reconciliation of Non-GAAP Measures" at the end of this Item 2 for further explanation of this performance measure, as well as a reconciliation to the most directly comparable GAAP measure. Discussion of the components of the changes in our quarterly and year-to-date results follows.

Oil and Gas Production and Revenues

Oil and gas production volumes, revenues, and average sales prices by product and location for the three and nine months ended September 30, 2010 and 2009 are set forth in the tables below.

	Three Months Ended September 30,							
	2010				2009

Totals	\$ 4.13	72.25	33.98	5.25	3.15	51.38	22.92	3.94

Net oil and gas production in the third quarter 2010 decreased 4% to 457 MMcfe per day from 476 MMcfe per day in the third quarter 2009. Net oil and gas production in the first nine months of 2010 decreased 13% to 446 MMcfe per day from 515 MMcfe per day in the first nine months of 2009. The decrease in oil and gas production for the comparable three and nine month periods was due to non-core oil and gas property divestitures that occurred primarily in late 2009. Oil and gas revenues were \$210 million in the third quarter 2010, a 19% increase as compared to \$177 million in the third quarter 2009. Oil and gas revenues were \$640 million in the first nine months of 2010, a 16% increase as compared to \$553 million in the first nine months of 2009. The increase in oil and gas revenues between the comparable three and nine month periods was primarily due to a 23% and 33% increase in average realized sales prices, respectively, partially offset by the decrease in production discussed above.

Oil and Gas Production Expense

The table below sets forth the detail of oil and gas production expense for the three and nine months ended September 30, 2010 and 2009.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
(In Thousands, Except Per Mcfe Data)				
Production expense:				
Lease operating expenses	\$ 30,177	34,938	87,701	114,205
Production and property taxes	13,376	10,873	37,291	34,359
Transportation and processing costs	6,210	5,352	17,089	15,918
Production expense	\$ 49,763	51,163	142,081	164,482

Production expense per Mcfe:

Edgar Filing: FOREST OIL CORP - Form 10-Q

Lease operating expenses	\$.72	.80	.72	.81
Production and property taxes		.32	.25	.31	.24
Transportation and processing costs		.15	.12	.14	.11
Production expense per Mcfe	\$	1.18	1.17	1.17	1.17

Edgar Filing: FOREST OIL CORP - Form 10-Q

Table of Contents

Lease operating expenses in the third quarter 2010 were \$30 million, or \$.72 per Mcfe, compared to \$35 million, or \$.80 per Mcfe, in the third quarter 2009. Lease operating expenses in the first nine months of 2010 were \$88 million, or \$.72 per Mcfe, compared to \$114 million, or \$.81 per Mcfe, in the first nine months of 2009. The \$5 million and \$27 million decrease in lease operating expense between the comparable three and nine month periods, respectively, was primarily due to the non-core oil and gas property divestitures that occurred during late 2009. Lease operating expenses on a per-Mcfe basis also decreased between the periods presented due to cost reduction initiatives and the sale of non-core oil and gas properties in late 2009 that had higher average per-unit operating costs as compared to the properties we retained.

Production and property taxes, which primarily consist of severance taxes paid on the value of the oil and gas produced, generally fluctuate proportionately to our oil and gas revenues. As a percentage of oil and natural gas revenue, production and property taxes were 6.4% and 6.1% for the three months ended September 30, 2010 and 2009, respectively, and 5.8% and 6.2% for the nine months ended September 30, 2010 and 2009, respectively. Normal fluctuations occur in the percentage between periods based upon the timing of approval of incentive tax credits in Texas, changes in tax rates, and changes in the assessed values of property and equipment for purposes of ad valorem taxes.

Transportation and processing costs in the third quarter 2010 were \$6 million, or \$.15 per Mcfe, compared to \$5 million, or \$.12 per Mcfe, in the third quarter 2009. Transportation and processing costs in the first nine months of 2010 were \$17 million, or \$.14 per Mcfe, compared to \$16 million, or \$.11 per Mcfe, in the first nine months of 2009. Transportation and processing costs increased between comparable periods primarily due to higher transportation costs in Canada.

General and Administrative Expense

The following table summarizes the components of general and administrative expense incurred during the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In Thousands)			
Stock-based compensation costs	\$ 8,312	8,241	24,801	21,876
Other general and administrative costs	21,686	20,512	64,316	60,661
General and administrative costs capitalized	(11,991)	(11,437)	(34,576)	(33,487)
General and administrative expense	\$ 18,007	17,316	54,541	49,050

General and administrative expense in the third quarter 2010 was \$18 million compared to \$17 million in the third quarter 2009. General and administrative expense in the first nine months of 2010 was \$55 million compared to \$49 million in the first nine months of 2009. The increase in general and administrative expense between the nine month periods was primarily due to higher employee incentive compensation costs, including stock-based incentive compensation. The percentage of general and administrative costs capitalized under the full cost method of accounting was relatively consistent between each of the periods presented, ranging from 39% to 41%.

Depreciation, Depletion, and Amortization

Depreciation, depletion, and amortization expense ("DD&A") in the third quarter 2010 was \$65 million, or \$1.54 per Mcfe, compared to \$65 million, or \$1.49 per Mcfe, in the third quarter 2009. For the nine months ended September 30, 2010, DD&A was \$179 million, or \$1.47 per Mcfe, compared to \$238 million, or \$1.69 per Mcfe, for the first nine months of 2009. The decrease of \$.22

Table of Contents

per Mcfe between the nine-month periods was primarily due to a \$1.6 billion non-cash ceiling test write-down recorded in the first quarter 2009.

Ceiling Test Write-Down of Oil and Gas Properties

In the first quarter 2009, Forest recorded a \$1.6 billion ceiling test write-down related to its United States and Canadian cost centers pursuant to the ceiling test limitation prescribed by the Securities and Exchange Commission ("SEC") for companies using the full cost method of accounting. The write-down was primarily a result of a significant decline in natural gas prices in the first quarter of 2009. The March 31, 2009 spot price for natural gas was \$3.63 per MMBtu compared to \$5.71 at December 31, 2008. We have not incurred a ceiling test write-down since March 31, 2009. Our ceiling test calculations have been calculated based on the twelve month average natural gas and oil prices since December 31, 2009.

Interest Expense

The following table summarizes interest expense incurred during the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In Thousands)			
Interest costs	\$ 40,107	45,153	121,169	131,685
Interest costs capitalized	(3,019)	(2,500)	(8,929)	(9,312)
Interest expense	\$ 37,088	42,653	112,240	122,373

Interest expense in the third quarter 2010 totaled \$37 million compared to \$43 million in the third quarter 2009. Interest expense was \$112 million and \$122 million for the nine months ended September 30, 2010 and 2009, respectively. Although our outstanding debt decreased to \$1.9 billion as of September 30, 2010 from \$2.5 billion as of September 30, 2009, interest expense did not decrease proportionately given the fact that the majority of the debt reduction was attributable to a reduction of borrowings under our bank credit facilities (which had a variable interest rate that averaged less than 2% in the first nine months of 2009).

In order to effectively reduce the concentration of fixed-rate debt anticipated after the completion of our 2009 oil and gas property divestiture program and the related reduction in outstanding debt, Forest entered into fixed-to-floating interest rate swaps under which it has swapped, as of September 30, 2010, \$500 million in notional amount at an 8.5% fixed rate for an equal notional amount at a weighted-average rate equal to the 1-month LIBOR plus approximately 5.9%. Forest recognized realized gains under its interest rate swaps of \$3 million and \$9 million during the three and nine months ended September 30, 2010, respectively, and \$3 million during both the three and nine months ended September 30, 2009, respectively. These gains are recorded as realized gains on derivatives rather than as a reduction to interest expense since Forest has not elected to use hedge accounting. See Note 8 to the Condensed Consolidated Financial Statements for more information on our interest rate derivatives.

Realized and Unrealized Gains and Losses on Derivative Instruments

The table below sets forth realized and unrealized gains and losses on derivatives recognized under "Costs, expenses, and other" in our Condensed Consolidated Statements of Operations for the periods

Edgar Filing: FOREST OIL CORP - Form 10-Q

Table of Contents

indicated. See Note 7 and Note 8 to the Condensed Consolidated Financial Statements for more information on our derivative instruments.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009

Gas	(30,453)	91,976	(78,198)	107,906
NGLs	1,929		1,929	
Interest	(7,869)	(8,619)	(27,000)	(3,256)
Subtotal unrealized (gains) losses on derivatives, net	(29,091)	79,238	(102,839)	132,216
Realized and unrealized gains on derivatives, net	\$ (59,156)	(5,665)	(177,398)	(112,212)

Other, Net

The table below sets forth the components of "Other, net" in our Condensed Consolidated Statements of Operations for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In Thousands)			
Unrealized foreign currency exchange gains, net	\$ (9,244)	(9,723)	(5,290)	(15,609)
Unrealized losses on other investments, net				2,327
Accretion of asset retirement obligations	1,693	2,014	5,441	6,195
Gain on debt extinguishment, net			(4,576)	
Other, net	1,155	5,649	4,584	12,184
	\$ (6,396)	(2,060)	159	5,097

Foreign Currency Exchange

Unrealized foreign currency exchange gains and losses relate to outstanding intercompany indebtedness and advances, which are denominated in U.S. dollars, between Forest Oil Corporation and our wholly-owned Canadian subsidiary.

Unrealized Loss on Other Investments

Unrealized losses on other investments relate to fair value adjustments to the shares of Pacific Energy Resources, Ltd. ("PERL") common stock and the zero coupon senior subordinated note from PERL due 2014, which were received as a portion of the total consideration for the sale of our Alaska assets in August 2007. See Note 7 to the Condensed Consolidated Financial Statements for more information on these investments.

Table of Contents*Accretion of Asset Retirement Obligations*

Accretion of asset retirement obligations is the expense recognized to increase the carrying amount of the liability associated with our asset retirement obligations as a result of the passage of time. See Note 6 to the Condensed Consolidated Financial Statements for more information on our asset retirement obligations.

Gain on Debt Extinguishment

The net gain on debt extinguishment for the nine months ended September 30, 2010 includes the net gain related to the January 2010 redemption of all \$150 million of our 7³/₄% senior notes due 2014 at 101.292% of par. The net gain was recognized due to the write-off of unamortized deferred gains on the termination of interest rate swaps. This gain is offset by the loss on debt extinguishment related to the write-off of the unamortized discount associated with the \$.1 million of 7% senior subordinated notes due 2013 that were repurchased during the second quarter of 2010 at par. See Note 4 to the Condensed Consolidated Financial Statements for more information on our debt.

Current and Deferred Income Tax

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In Thousands, Except Percentages)			
Current income tax	\$ (16,814)		(12,089)	1,505
Deferred income tax	54,247	(163,851)	129,991	(521,706)
Total income tax	\$ 37,433	(163,851)	117,902	(520,201)
Effective tax rate	35%	(1,937)%	36%	35%

Our combined U.S. and Canadian effective tax rate should generally approximate 35% to 36% of pre-tax income but will fluctuate based on the percentage of pre-tax income generated in the U.S. versus Canada. Our effective income tax rate was 35% and 36% for the three and nine months ended September 30, 2010, respectively, and (1,937)% and 35% for the three and nine months ended September 30, 2009, respectively. The significant variance in our effective tax rate for the three months ended September 30, 2009 was due to the valuation allowance placed on a portion of our deferred tax assets in the United States during that period. See Note 9 to the Condensed Consolidated Financial Statements for a reconciliation of our income taxes at the statutory U.S. federal rate to income taxes at our effective rate for each period presented. The current income tax credit of \$16.8 million and \$12.1 million for the three and nine months ended September 30, 2010 is due to a \$17.0 million reduction in our 2009 federal income tax liability recorded in the third quarter of 2010.

LIQUIDITY AND CAPITAL RESOURCES

Our exploration, development, and acquisition activities require us to make significant operating and capital expenditures. Historically, we have used cash flow from operations and our bank credit facilities as our primary sources of liquidity. To fund large and other exceptional transactions, such as acquisitions and debt refinancing transactions, we have looked to the private and public capital markets as another source of financing and, as market conditions have permitted, we have engaged in asset monetization transactions.

Changes in the market prices for oil and natural gas directly impact our level of cash flow generated from operations. For the nine months ended September 30, 2010, natural gas accounted for approximately 75% of our total oil and gas production and, as a result, our operations and cash flow are more sensitive to fluctuations in the market price for natural gas than to fluctuations in the market

Table of Contents

price for oil. We employ a commodity hedging strategy as an attempt to moderate the effects of wide fluctuations in commodity prices on our cash flow. As of October 29, 2010, we had hedged, via commodity swaps and collar instruments, approximately 86 Bcfe of our total 2010 production and 55 Bcfe, excluding outstanding swaptions and call options, of our total 2011 production. We expect that this level of hedging will provide a measure of certainty of the cash flow that we will receive for a portion of our production in 2010 and 2011. For further information concerning our derivative contracts, see Item 3 "Quantitative and Qualitative Disclosures about Market Risk Commodity Price Risk" below.

The other primary source of liquidity is our combined U.S. and Canadian credit facilities, which had an aggregate borrowing base of \$1.3 billion as of September 30, 2010. These facilities are used to fund daily operations and to fund acquisitions and refinance debt, as needed and if available. The credit facilities are secured by a portion of our assets and mature in June 2012. See "*Bank Credit Facilities*" below for further details. We had no amounts drawn on our credit facilities as of September 30, 2010 and October 29, 2010.

The public and private capital markets have historically served as our primary source of financing to fund large acquisitions and other exceptional transactions. In the past, we have issued debt and equity in both the public and private capital markets. For example, in February 2009, we issued \$600 million principal amount of 8¹/₂% senior notes due 2014 in a private offering for net proceeds of \$560 million and in May 2009, we issued approximately 14 million shares of common stock for net proceeds of \$256 million. Our ability to access the debt and equity capital markets on economic terms is affected by general economic conditions, the domestic and global financial markets, the credit ratings assigned to our debt by independent credit rating agencies, our operational and financial performance, the value and performance of our equity and debt securities, prevailing commodity prices, and other macroeconomic factors outside of our control.

We also have engaged in asset dispositions as a means of generating additional cash to fund expenditures and enhance our financial flexibility. For example, during 2009, we sold certain non-strategic assets for approximately \$1.1 billion, a portion of which proceeds were used to pay off the outstanding balances under our credit facilities in 2009 and redeem our 7³/₄% senior notes due 2014 in January 2010. During the first nine months of 2010 we have sold additional non-strategic assets for total proceeds of \$156 million.

We believe that our current cash and cash equivalents, cash flows provided by operating activities, and \$1.3 billion of funds available under our credit facilities will be sufficient to fund our normal recurring operating needs, anticipated capital expenditures, and our contractual obligations, including the redemption of our \$285 million principal amount of senior notes that are due in December 2011. However, if our revenue and cash flow decrease in the future as a result of a deterioration in domestic and global economic conditions or a significant decline in commodity prices, we may elect to reduce our planned capital expenditures. We believe that this financial flexibility to adjust our spending levels will provide us with sufficient liquidity to meet our financial obligations should economic conditions deteriorate.

Bank Credit Facilities

Our bank credit facilities consist of a \$1.65 billion U.S. credit facility (the "U.S. Facility") with a syndicate of banks led by JPMorgan Chase Bank, N.A., and a \$150 million Canadian credit facility (the "Canadian Facility," and together with the U.S. Facility, the "Credit Facilities") with a syndicate of banks led by JPMorgan Chase Bank, N.A., Toronto Branch. The Credit Facilities will mature in June 2012.

Our availability under the Credit Facilities is governed by a borrowing base (the "Global Borrowing Base"), which was \$1.3 billion as of September 30, 2010. We currently have allocated

Table of Contents

\$1.155 billion to the borrowing base under the U.S. Facility and \$145 million to the borrowing base under the Canadian Facility. The determination of the Global Borrowing Base is made by the lenders in their sole discretion, on a semi-annual basis, taking into consideration the estimated value of our oil and gas properties based on pricing models determined by the lenders at such time, in accordance with the lenders' customary practices for oil and gas loans. The available borrowing amount under the Credit Facilities could increase or decrease based on such redetermination. In October 2010, the lenders reaffirmed the borrowing base at \$1.3 billion and the next redetermination is expected to occur in the second quarter of 2011. In addition to the semi-annual redeterminations, Forest and the lenders each have discretion at any time, but not more often than once during a calendar year, to have the Global Borrowing Base redetermined. The Global Borrowing Base is also subject to automatic adjustments if certain events occur.

As of September 30, 2010 and October 29, 2010, there were no outstanding borrowings under our Credit Facilities. We had used the Credit Facilities for approximately \$2 million in letters of credit at September 30, 2010.

From time to time, we engage in other transactions with a number of the lenders under the Credit Facilities. Such lenders or their affiliates may serve as underwriters or initial purchasers of our debt and equity securities, act as agent or directly purchase our production, or serve as counterparties to our commodity and interest rate derivative agreements. As of October 29, 2010, our primary derivative counterparties are lenders and their affiliates, with six such lenders accounting for approximately 78 Bcfe, or 91% of our 2010 hedged production and approximately 40 Bcfe, or 73% of our 2011 hedged production, excluding outstanding swaptions and call options. Our obligations under our existing derivative agreements with our lenders are secured by the security documents executed by the parties under our Credit Facilities. See Part 3 "Quantitative and Qualitative Disclosures about Market Risk Commodity Price Risk," below for additional details concerning our derivative arrangements.

Historical Cash Flow

Net cash provided by operating activities, net cash used by investing activities, and net cash used by financing activities for the nine months ended September 30, 2010 and 2009 were as follows:

	Nine Months Ended September 30,	
	2010	2009
	(In Thousands)	
Net cash provided by operating activities	\$ 398,307	473,573
Net cash used by investing activities	(474,918)	(396,760)
Net cash used by financing activities	(138,675)	(73,281)

Net cash provided by operating activities is primarily affected by production volumes, commodity prices, the effects of settlements of our derivative contracts, and changes in working capital. The decrease in net cash provided by operating activities in the nine months ended September 30, 2010 compared to the same period of 2009 was primarily due to lower realized gains on our derivative contracts and an increased investment in net operating assets (i.e., working capital) offset somewhat by higher average realized prices for oil and gas. Adjusted discretionary cash flow, which is a non-GAAP liquidity measure that management uses to evaluate cash flow from operations before changes in working capital, was \$417 million and \$466 million for the nine months ended September 30, 2010 and 2009, respectively. The decrease in adjusted discretionary cash flow between the nine-month periods was primarily driven by a decrease in realized gains on oil and gas derivative instruments of \$173 million offset by an increase in oil and gas revenues of \$86 million and a decrease in production and interest expenses of \$22 million and \$10 million, respectively. Reference should be made to "Reconciliation of Non-GAAP Measures" at the end of this Item 2 for further explanation of this

Edgar Filing: FOREST OIL CORP - Form 10-Q

Table of Contents

non-GAAP liquidity measure, as well as a reconciliation to the most directly comparable GAAP measure.

Net cash used by investing activities is primarily comprised of expenditures for the exploration and development of oil and gas properties and leasehold acquisition costs net of proceeds from the dispositions of oil and gas properties and other capital assets. The increase in net cash used by investing activities in the nine months ended September 30, 2010 compared to the same period of 2009 was primarily due to increased exploration, development, and leasehold acquisition costs during the nine months ended September 30, 2010 as compared to the same period of 2009. The major components of cash used by investing activities for the nine months ended September 30, 2010 and 2009 were as follows:

	Nine Months Ended September 30,	
	2010	2009
	(In Thousands)	
Exploration, development, and leasehold acquisition costs ⁽¹⁾	\$ (612,453)	(512,266)
Proceeds from sale of assets	156,177	145,691
Acquisition of other fixed assets	(19,831)	(30,185)
Other, net	1,189	
Net cash (used) by investing activities	\$ (474,918)	(396,760)

(1) Cash paid for exploration, development, and leasehold acquisition costs as reflected in the Condensed Consolidated Statements of Cash Flows differs from the reported capital expenditures in the "Capital Expenditures" table below due to the timing of when the capital expenditures are incurred and when the actual cash payment is made.

Net cash used by financing activities in the nine months ended September 30, 2010 included the redemption of the 7³/₄% senior notes for \$152 million. Net cash used by financing activities in the nine months ended September 30, 2009 included net repayments of bank borrowings of \$850 million, partially offset by net proceeds of \$560 million for the issuance of the 8¹/₂% senior notes and net proceeds of \$256 million for the issuance of common stock.

Capital Expenditures

Expenditures for property exploration, development, and leasehold acquisition costs were as follows:

	Nine Months Ended September 30,	
	2010	2009
	(In Thousands)	
Exploration, development, and leasehold acquisition costs:		
Direct costs:		
Exploration and development	\$ 510,625	376,030
Leasehold acquisition costs	104,605	13,106
Overhead capitalized	34,576	33,487
Interest capitalized	8,929	9,312
Total capital expenditures⁽¹⁾	\$ 658,735	431,935

(1) Total capital expenditures include cash expenditures, accrued expenditures, and non-cash capital expenditures including stock-based compensation capitalized under the full cost method of accounting. Total capital expenditures also include estimated discounted asset retirement obligations of \$(2.4) million and \$2.2 million for the nine months

ended September 30, 2010 and 2009, respectively.

Table of Contents

FORWARD-LOOKING STATEMENTS

The information in this Quarterly Report on Form 10-Q includes "forward- looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are statements other than statements of historical or present facts, that address activities, events, outcomes, and other matters that Forest plans, expects, intends, assumes, believes, budgets, predicts, forecasts, projects, estimates, or anticipates (and other similar expressions) will, should, or may occur in the future. Generally, the words "expects," "anticipates," "targets," "goals," "projects," "intends," "plans," "believes," "seeks," "estimates," "may," "will," "could," "should," "future," "potential," "continue," variations of such words, and similar expressions identify forward-looking statements. These forward-looking statements are based on our current expectations and assumptions about future events and are based on currently available information as to the outcome and timing of future events.

These forward-looking statements appear in a number of places in this report and include statements with respect to, among other things:

estimates of our oil and natural gas reserves;

estimates of our future oil and natural gas production, including estimates of any increases or decreases in our production;

our future financial condition and results of operations;

our future revenues, cash flows, and expenses;

our access to capital and our anticipated liquidity;

our future business strategy and other plans and objectives for future operations;

our outlook on oil and gas prices;

the amount, nature, and timing of future capital expenditures, including future development costs;

our ability to access the capital markets to fund capital and other expenditures;

our assessment of our counterparty risk and the ability of our counterparties to perform their future obligations; and

the impact of federal, state, and local political, legislative, regulatory, and environmental developments in the United States and certain foreign locations where we conduct business operations.

We believe the expectations and forecasts reflected in our forward-looking statements are reasonable, but we can give no assurance that they will prove to be correct. We caution you that these forward-looking statements can be affected by inaccurate assumptions and are subject to all of the risks and uncertainties, most of which are difficult to predict and many of which are beyond our control, incident to the exploration for and development, production, and sale of oil and gas. When considering forward-looking statements, you should keep in mind the risk factors and other cautionary statements described under the heading "Risk Factors" included or incorporated in Part I of our 2009 Annual Report on Form 10-K, as well as the risks described in Part II, Item 1A, "Risk Factors," in our Form 10-Q for the quarter ended June 30, 2010, and in this Form 10-Q.

Edgar Filing: FOREST OIL CORP - Form 10-Q

Should one or more of the risks or uncertainties described above or elsewhere in this Form 10-Q occur, or should underlying assumptions prove incorrect, our actual results and plans could differ materially from those expressed in any forward-looking statements.

Table of Contents

We caution you not to place undue reliance on these forward-looking statements, which speak only as of the date of this report, and we undertake no obligation to update this information to reflect events or circumstances after the filing of this report with the SEC, except as required by law. All forward-looking statements, expressed or implied, included in this Form 10-Q and attributable to Forest are expressly qualified in their entirety by this cautionary statement. This cautionary statement should also be considered in connection with any subsequent written or oral forward-looking statements that we may make or persons acting on our behalf may issue.

RECONCILIATION OF NON-GAAP MEASURES

Adjusted EBITDA

In addition to reporting net earnings as defined under GAAP, Forest also presents adjusted earnings before interest, income taxes, depreciation, depletion, and amortization ("Adjusted EBITDA"), which is a non-GAAP performance measure. Adjusted EBITDA consists of net earnings (loss) before interest expense, income taxes, depreciation, depletion, and amortization, as well as other items such as ceiling test write-downs of oil and gas properties, unrealized losses (gains) on derivative instruments, unrealized and realized foreign currency exchange losses (gains), unrealized losses on other investments, accretion of asset retirement obligations, and other items presented in the table below. Adjusted EBITDA does not represent and should not be considered an alternative to GAAP measurements, such as net earnings (loss) (its most comparable GAAP financial measure), and Forest's calculations thereof may not be comparable to similarly titled measures reported by other companies. By eliminating interest, income taxes, depreciation, depletion, amortization, and other items, Forest believes the result is a useful measure across time in evaluating its fundamental core operating performance. Management also uses Adjusted EBITDA to manage its business, including in preparing its annual operating budget and financial projections. Forest believes that Adjusted EBITDA is also useful to investors because similar measures are frequently used by securities analysts, investors, and other interested parties in their evaluation of companies in similar industries. As indicated, Adjusted EBITDA does not include interest expense on borrowed money or depletion and depreciation expense on capital assets or the payment of income taxes, which are necessary elements of Forest's operations. Because Adjusted EBITDA does not account for these and other expenses, its utility as a measure of Forest's operating performance has material limitations. Because of these limitations, Forest's management does not view Adjusted EBITDA in isolation and also uses other measurements, such as net earnings (loss) and revenues to measure operating performance. The following table provides a

Edgar Filing: FOREST OIL CORP - Form 10-Q

Table of Contents

reconciliation of net earnings (loss), the most directly comparable GAAP measure, to Adjusted EBITDA for the periods presented.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In Thousands)			
Net earnings (loss)	\$ 68,911	172,311	211,327	(968,321)
Income tax expense (benefit)	37,433	(163,851)	117,902	(520,201)
Unrealized (gains) losses on derivative instruments, net	(29,091)	79,238	(102,839)	132,216
Unrealized foreign currency exchange gains, net	(9,244)	(9,723)	(5,290)	(15,609)
Unrealized losses on other investments, net				2,327
Interest expense	37,088	42,653	112,240	122,373
Gain on debt extinguishment, net			(4,576)	
Accretion of asset retirement obligations	1,693	2,014	5,441	6,195
Ceiling test write-down of oil and gas properties				1,575,843
Depreciation, depletion, and amortization	64,737	65,275	179,495	237,964
Stock-based compensation	4,658	4,764	14,389	12,948
Adjusted EBITDA	\$ 176,185	192,681	528,089	585,735

Adjusted Discretionary Cash Flow

In addition to reporting cash provided by operating activities as defined under GAAP, Forest also presents adjusted discretionary cash flow, which is a non-GAAP liquidity measure. Adjusted discretionary cash flow consists of cash provided by operating activities before changes in working capital items. Management uses adjusted discretionary cash flow as a measure of liquidity and believes it provides useful information to investors because it assesses cash flow from operations for each period before changes in working capital, which fluctuates due to the timing of collections of receivables and the settlements of liabilities. This measure does not represent the residual cash flow available for discretionary expenditures, since Forest has mandatory debt service requirements and other non-discretionary expenditures that are not deducted from the measure. The following table provides a reconciliation of cash provided by operating activities, the most directly comparable GAAP measure, to adjusted discretionary cash flow for the periods presented.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In Thousands)			
Net cash provided by operating activities	\$ 152,348	185,651	398,307	473,573
Changes in working capital:				
Accounts receivable	(18,445)	(4,982)	(24,345)	(66,143)
Other current assets	12,818	(5,147)	(1,539)	(20,622)
Accounts payable and accrued liabilities	19,546	(7,909)	66,123	106,567
Accrued interest and other current liabilities	(8,486)	(16,091)	(4,870)	(27,317)
2009 current income tax credit ⁽¹⁾	(16,984)		(16,984)	
Adjusted discretionary cash flow	\$ 140,797	151,522	416,692	466,058

(1) The current income tax credit of \$17.0 million for the three and nine months ended September 30, 2010 is due to a \$17.0 million reduction in our 2009 federal income tax liability recorded in the third quarter of 2010.

Table of Contents**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to market risk, including the effects of adverse changes in commodity prices, interest rates, and foreign currency exchange rates as discussed below.

Commodity Price Risk

We produce and sell natural gas, crude oil, and natural gas liquids for our own account in the United States and Canada. As a result, our financial results are affected when prices for these commodities fluctuate. Such effects can be significant. In order to reduce the impact of fluctuations in commodity prices, or to protect the economics of property acquisitions, we make use of a commodity hedging strategy. Under our hedging strategy, we enter into commodity swaps, collars, basis swaps, and other derivative instruments with counterparties who, in general, are participants in our credit facilities. These arrangements, which are typically based on prices available in the financial markets at the time the contracts are entered into, are settled in cash and do not require physical deliveries of hydrocarbons.

Swaps

In a typical commodity swap agreement, we receive the difference between a fixed price per unit of production and a price based on an agreed upon published, third-party index if the index price is lower than the fixed price. If the index price is higher, we pay the difference. By entering into swap agreements, we effectively fix the price that we will receive in the future for the hedged production. Our current swaps are settled in cash on a monthly basis. As of September 30, 2010, we had entered into the following swaps:

	Commodity Swaps							NGLs (OPIS Refined Products)		
	Natural Gas (NYMEX HH)			Oil (NYMEX WTI)						
	Weighted Average Hedged			Weighted Average Hedged			Weighted Average Hedged			
	Bbtu per Day	Price per MMBtu	Fair Value (In Thousands)	Barrels per Day	Price per Bbl	Fair Value (In Thousands)	Barrels per Day	Price per Bbl	Fair Value (In Thousands)	
Remaining Swap Term										
Oct 2010 - Dec 2010	210	\$ 6.20	\$ 43,425	3,000	\$ 76.06	\$ (1,414)				
Calendar 2011	90	5.86	46,044				3,000	36.75	(1,929)	

Subsequent to September 30, 2010, through October 29, 2010, Forest entered into additional gas swaps. See "Commodity Swaptions" below for further information on these swaps.

Collars

We also enter into collar agreements with third parties. A collar agreement is similar to a swap agreement, except that we receive the difference between the floor price and the index price only if the index price is below the floor price and we pay the difference between the ceiling price and the index

Edgar Filing: FOREST OIL CORP - Form 10-Q

Table of Contents

price only if the index price is above the ceiling price. As of September 30, 2010, we had entered into the following collars:

Oil Collars (NYMEX WTI)			
Remaining Collar Term	Barrels Per Day	Weighted Average Hedged Floor and Ceiling Price per Bbl	Fair Value (In Thousands)
October 2010 - December 2010	2,000	\$ 60.00/98.50	\$ (19)
Calendar 2011	3,000	75.00/91.87 ⁽¹⁾	(1,117)

(1) Subsequent to September 30, 2010, in connection with receiving a premium hedged price on a gas swap, we lowered the hedged ceiling price on one of our existing Calendar 2011 oil collars that covered 1,000 barrels per day from \$95.00 to \$90.00 per Bbl.

Commodity Swaptions

In connection with several gas swaps entered into during the nine months ended September 30, 2010, we granted option instruments (several commodity swaptions and one call option) to the gas swap counterparties in exchange for us receiving premium hedged prices on the gas swaps. As of October 29, 2010, none of the options have been exercised by the counterparties. The table below sets forth the outstanding options as of September 30, 2010:

Commodity Options									
Natural Gas (NYMEX HH)									
Underlying Swap Weighted Average									
Underlying Hedged Fair Underlying Underlying									
Swap Price Value Swap Swap									
Hedged per (In Hedged Hedged									
Price MMBtu Thousands) Barrels Price per									
Fair Value (In Fair Value									
Swap Hedged Fair Value									
Term Per Day MMBtu Thousands) Per Day Bbl Thousands)									
Instrument	Option Expiration	Underlying Swap Term	Underlying Swap Per Day	Hedged Price per MMBtu	Fair Value (In Thousands)	Underlying Swap Barrels Per Day	Underlying Swap Hedged Price per Bbl	Fair Value (In Thousands)	
Gas Swaptions	December 2010	Calendar 2011	50	\$ 5.80	\$ (248)				
Oil Swaption	December 2011	Calendar 2012				1,000	90.00	(3,182)	
Oil Call Option	Monthly in 2011	Monthly in 2011				1,000	90.00	(2,425)	

Subsequent to September 30, 2010, through October 29, 2010, we entered into two additional gas swaps covering 25 Bbtu per day for Calendar 2011 for a weighted average hedged price of \$5.03 per MMBtu. In connection with these swaps, the counterparties were granted the following oil swaptions:

Commodity Options			
Oil (NYMEX WTI)			
Underlying Swap Hedged			
Underlying Swap Price per Bbl			
Option Expiration	Underlying Swap Term	Underlying Swap Barrels Per Day	Underlying Swap Hedged Price per Bbl
December 2010	Calendar 2011	1,000	\$ 85.00
December 2011	Calendar 2012	1,000	90.00

Table of Contents*Basis Swaps*

We also use basis swaps in connection with natural gas swaps in order to fix the price differential between the NYMEX Henry Hub price and the index price at which a portion of our natural gas production is sold. As of September 30, 2010, we had entered into the following basis swaps:

Remaining Swap Term		Index	Bbtu Per Day	Weighted Average Hedged Price Differential per MMBtu	Fair Value (In Thousands)
October 2010	December 2010	Centerpoint	30	\$ (.95)	\$ (1,989)
October 2010	December 2010	Houston Ship Channel	50	(.29)	(1,299)
October 2010	December 2010	Mid Continent	60	(1.04)	(4,308)
October 2010	December 2010	NGPL TXOK	40	(.44)	(1,089)

The estimated fair value of all our commodity derivative instruments based on various inputs, including published forward prices, at September 30, 2010 was a net asset of approximately \$70.5 million.

Interest Rate Risk

We periodically enter into interest rate derivative agreements in an attempt to manage the mix of fixed and floating interest rates within our debt portfolio. As of September 30, 2010, we had entered into the following interest rate swaps:

Remaining Swap Term		Notional Amount (In Thousands)	Weighted Average Floating Rate	Weighted Average Fixed Rate	Fair Value (In Thousands)
October 2010	February 2014	\$ 500,000	1 month LIBOR + 5.89%	8.50%	\$ 26,480

The estimated fair value of all our interest rate derivative instruments was a net asset of approximately \$26.5 million as of September 30, 2010.

Derivative Fair Value Reconciliation

The table below sets forth the changes that occurred in the fair values of our open derivative contracts during the nine months ended September 30, 2010, beginning with the fair value of our derivative contracts on December 31, 2009. It has been our experience that commodity prices are subject to large fluctuations, and we expect this volatility to continue. Due to the volatility of oil and natural gas prices, the estimated fair values of our commodity derivative instruments are subject to large fluctuations from period to period. Actual gains and losses recognized related to our commodity derivative instruments will likely differ from those estimated at September 30, 2010 and will depend

Table of Contents

exclusively on the price of the commodities on the specified settlement dates provided by the derivative contracts.

	Fair Value of Derivative Contracts		
	Commodity	Interest Rate	Total
(In Thousands)			
As of December 31, 2009	\$ (5,389)	(596)	(5,985)
Premiums received		(984)	(984)
Net increase in fair value	140,655	37,803	178,458
Net contract gains realized	(64,816)	(9,743)	(74,559)
As of September 30, 2010	\$ 70,450	26,480	96,930

Interest Rates on Borrowings

The following table presents principal amounts and related interest rates by year of maturity for Forest's debt obligations at September 30, 2010.

	2011	2013	2014	2019	Total
(Dollar Amounts in Thousands)					
Long-term debt:					
Fixed rate debt	\$ 285,000	12	600,000	1,000,000	1,885,012
Coupon interest rate	8.00%	7.00%	8.50%	7.25%	7.76%
Effective interest rate ⁽¹⁾	7.25%	7.49%	9.47%	7.24%	7.95%

(1) The effective interest rates on the senior notes differ from the coupon interest rates due to the amortization of related discounts or premiums on the notes. The effective interest rate on the 8% senior notes due 2011 is further reduced from the coupon rate as a result of amortization of deferred gains related to interest rate swaps terminated in 2002.

Foreign Currency Exchange Risk

We conduct business in several foreign currencies and thus are subject to foreign currency exchange rate risk on cash flows related to sales, expenses, financing, and investing transactions. We have not entered into any foreign currency forward contracts or other similar financial instruments to manage this risk. Expenditures incurred relative to the foreign concessions held by Forest outside of North America have been primarily United States dollar-denominated, as have cash proceeds related to property sales and farmout arrangements. Substantially all of our Canadian revenues and costs are denominated in Canadian dollars. While the value of the Canadian dollar does fluctuate in relation to the U.S. dollar, we believe that any currency risk associated with our Canadian operations would not have a material impact on our results of operations.

Item 4. CONTROLS AND PROCEDURES*Evaluation of Disclosure Controls and Procedures*

We have established disclosure controls and procedures to ensure that material information relating to Forest and its consolidated subsidiaries is made known to the Officers who certify Forest's financial reports and the Board of Directors.

Our Chief Executive Officer, H. Craig Clark, and our Chief Financial Officer, Michael N. Kennedy, evaluated the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of the end of the quarterly period ended September 30, 2010 (the "Evaluation Date"). Based on this evaluation, they believe that as of the Evaluation Date our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports

Table of Contents

we file or submit under the Exchange Act (i) is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms; and (ii) is accumulated and communicated to Forest's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Changes in Internal Control over Financial Reporting

There has not been any change in our internal control over financial reporting that occurred during our quarterly period ended September 30, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1A. RISK FACTORS**

The following risk factor updates the Risk Factors included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2009 ("Annual Report"). Except as set forth below, and under Part II, Item 1A, "Risk Factors," in our Form 10-Q for the quarter ended June 30, 2010, there have been no material changes to the risks described in Part I, Item 1A, of the Annual Report.

We may face liabilities related to the pending bankruptcy of Pacific Energy Resources, Ltd.

In August 2007, we closed on the sale of our oil and gas assets in Alaska (the "Alaska Assets") to Pacific Energy Resources, Ltd ("PERL"). In March 2009, PERL filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code. PERL requested, and the bankruptcy court has approved, abandonment of PERL's interests in certain of the Alaska Assets. The remaining working interest owners in the Alaska Assets previously made the assertion that, in its role as assignor of the Alaska Assets, Forest should be held liable for any contractual obligations of PERL with respect to the Alaska Assets, including obligations related to operating costs and for costs associated with the final plugging and decommissioning of wells and production facilities. More recently, PERL has asserted during its bankruptcy case that the Alaska Assets were worth less than what PERL paid for them in August 2007, and that Forest may face liability under creditors' rights laws or other laws in connection with the transaction. Forest disagrees with both the working interest owners' assertion and PERL's assertion and, to the extent necessary, will vigorously oppose any efforts to hold Forest liable for PERL's unsatisfied obligations or for the sale of the Alaska Assets to PERL. We cannot predict, however, whether we would be successful in avoiding all such liabilities.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS*Unregistered Sales of Equity Securities*

There were no sales of unregistered equity securities during the period covered by this report.

Issuer Purchases of Equity Securities

The table below sets forth information regarding repurchases of our common stock during the third quarter 2010. The shares repurchased represent shares of our common stock that employees elected to surrender to Forest to satisfy their tax withholding obligations upon the vesting of shares of restricted stock and phantom stock units that are settled in shares. Forest does not consider this a share buyback program.

Period	Total # of Shares Purchased	Average Price Paid Per Share	Total # of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum # (or Approximate Dollar Value) of Shares that May Yet be Purchased Under the Plans or Programs
July 2010	4,716	\$ 28.57		
August 2010	8,638	27.73		
September 2010	3,500	29.29		
Third Quarter Total	16,854	\$ 28.29
