CREDIT RATINGS

The Notes have been assigned ratings of B by S&P and B3 by Moody's. Credit ratings are intended to provide investors with an independent measure of credit quality of any issue of securities.

S&P and Moody's provide credit ratings of debt securities for commercial entities. A credit rating generally provides an indication of the risk that the borrower will not fulfill its full obligations in a timely manner with respect to both interest and principal commitments.

S&P's credit ratings are on a long-term rating scale that ranges from AAA to D, which represents the range from highest to lowest quality of such securities rated. S&P has assigned the Issuer a corporate credit rating of B and a credit rating of B on the Notes. According to S&P, this rating generally means the relevant issuer currently has the capacity to meet its financial commitments, but that adverse business, financial, or economic conditions will likely impair the relevant issuer's capacity or willingness to meet its financial commitments. S&P adds that an issuer or obligation rated B should be able to withstand a mild level of stress and still meet its financial obligations. The ratings from AAA to D may be modified by the addition of a plus (+) or a minus (-) sign to show relative standing within the major rating categories. In addition, S&P may add a rating outlook of positive, negative or stable which assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years).

Moody's credit ratings are on a long-term debt rating scale that ranges from Aaa to C, which represents the range from highest to lowest quality of such securities rated. Moody's has assigned the Issuer a corporate family credit rating of B3 and a credit rating of B3 on the Notes. According to Moody's, this rating generally means that the obligations are considered speculative and are subject to high credit risk. Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from AA through C. The modifier 1 indicates that the security ranks in the higher end of its generic rating category, the modifier 2 indicates a mid-range ranking and the modifier 3 indicates a ranking in the lower end of the generic rating category.

The credit ratings accorded to the Notes by S&P and Moody's are not recommendations to purchase, hold or sell the Notes in as much as such ratings do not comment as to market price or suitability for a particular investor. There is no assurance that any rating will remain in effect for any given period of time or that any rating will not be revised or withdrawn entirely by a rating agency in the future if in its judgment circumstances so warrant.
