x **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 31, 2013

or

.. **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

Commission file number: 000-51237

FREIGHTCAR AMERICA, INC.

(Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization)	25-1837219 (I.R.S. Employer Identification No.)
Two North Riverside Plaza, Suite 1300, Chicago, Illinois (Address of principal executive offices)	60606 (Zip Code)
(800) 458-2235 (Registrant's telephone number, including area code)	

Securities registered pursuant to Section 12(b) of the Act:

Title of class	Name of Each Exchange on Which Registered
Common stock, par value \$0.01 per share	Nasdaq Global Market
Securities registered pursuant to Section 12(g) of the Act: None	

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment of this Form 10-K.

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.:

Edgar Filing: FreightCar America, Inc. - Form 10-K

Large accelerated filer Accelerated filer x
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the
Act). YES NO x

The aggregate market value of the registrant's common stock held by non-affiliates of the registrant as of June 30, 2013 was \$197.3 million, based on the closing price of \$16.99 per share on the Nasdaq Global Market.

As of March 5, 2014, there were 12,055,978 shares of the registrant's common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Documents

Portions of the registrant's definitive Proxy Statement for the 2014 annual meeting of stockholders to be filed pursuant to Regulation 14A within 120 days of the end of the registrant's fiscal year ended December 31, 2013.

PART I

Item 1. Business.

OVERVIEW

We and our predecessors have been manufacturing railcars since 1901. We are the leading manufacturer of aluminum-bodied railcars in North America, based on the number of railcars delivered. We have historically specialized in the production of coal cars, which represented 68% of our deliveries of railcars in 2013 and 91% of our deliveries of railcars in 2012. Our BethGon® railcar has been the leading aluminum-bodied coal car sold in North America for over 20 years. Over the last 25 years, we believe we have built and introduced more types of coal cars than all other manufacturers in North America combined. The balance of our production consisted of a broad spectrum of railcar types that transport non-liquid commodities and products.

Our railcar manufacturing facilities are located in Cherokee, Alabama (Shoals), Danville, Illinois and Roanoke, Virginia. The Shoals facility, our new state-of-the-art production facility, was designed to efficiently build a wide variety of railcar types. Based on our backlog for coal car orders as of December 31, 2013 our Danville facility is idle but remains available to resume operations if more coal car production capacity is needed. The Shoals facility is an important part of our long-term growth strategy as we continue to expand our railcar product and service offerings outside of our traditional coal car market. While our Danville and Roanoke facilities will continue to support our coal car products, the Shoals facility will allow us to produce a broader variety of railcars in a cost-effective and efficient manner. In addition, the facility layout, automated production equipment, proximity to key suppliers and new supply agreements will increase our flexibility and make us more competitive in the marketplace.

We also refurbish and rebuild railcars and sell forged, cast and fabricated parts for all of the railcars we produce, as well as those manufactured by others. FreightCar Rail Services, LLC (FCRS) provides railcar repair and maintenance and inspections for all types of freight railcars. FCRS has repair and maintenance and inspection facilities in Grand Island, Nebraska and Hastings, Nebraska and services freight cars and unit coal trains utilizing key rail corridors in the Midwest and Western regions of the United States. As part of our strategic initiative to improve the contribution of our services business to our results of operations, we evaluated the long-term profitability of each of our railcar maintenance and repair shops during the fourth quarter of 2013. As a result of this analysis we decided to close our underperforming maintenance and repair shop in Clinton, Indiana. We also lease freight cars through our JAIX Leasing Company subsidiary.

Our primary customers are railroads, financial institutions and shippers, which represented 84%, 4% and 2%, respectively, of our total sales attributable to each type of customer for the year ended December 31, 2013. In the year ended December 31, 2013, we delivered 3,821 railcars, including 2,589 coal cars. Our total backlog of firm orders for railcars increased from 2,881 railcars as of December 31, 2012 to 6,826 railcars as of December 31, 2013. Our backlog as of December 31, 2013 includes a variety of railcar types and 45% of our backlog at December 31, 2013 consisted of orders for non-coal cars. The estimated sales value of the backlog is \$198 million and \$492 million, respectively, as of December 31, 2012 and 2013. We offer railcar leasing and refurbishment alternatives to our customers, an approach designed to enhance our position as a full service provider to the railcar industry. Although we continually look for opportunities to package our leased assets for sale to our leasing company partners, these leased assets may not be converted to sales, and may remain revenue producing assets into the foreseeable future.

Our Internet website is www.freightcaramerica.com. We make available, free of charge, on or through our website items related to corporate governance, including, among other things, our corporate governance guidelines, charters of various committees of the Board of Directors and our code of business conduct and ethics. Our annual reports on

Edgar Filing: FreightCar America, Inc. - Form 10-K

Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, and amendments thereto, are available on our website and on the SEC's website at www.sec.gov. Any stockholder of our company may also obtain copies of these documents, free of charge, by sending a request in writing to Investor Relations at FreightCar America, Inc., Two North Riverside Plaza, Suite 1300, Chicago, Illinois 60606.

Table of Contents

OUR PRODUCTS AND SERVICES

We design and manufacture aluminum-bodied and steel-bodied railcars that transport a variety of different non-liquid products. The types of railcars listed below include the major types of railcars that we are capable of manufacturing; however, some of the types of railcars listed below have not been ordered by any of our customers or manufactured by us in a number of years. We refurbish and rebuild railcars and sell forged, cast and fabricated parts for all of the railcars we produce, as well as those manufactured by others. We also provide general railcar repair and maintenance and inspections for all types of freight-carrying railcars. Many of our railcars are produced using a patented one-piece center sill, the main longitudinal structural component of the railcar. The one-piece center sill provides a higher carrying capacity, but weighs significantly less than traditional multiple-piece center sills. In addition to railcars designed for use in North America, we have manufactured railcars for export to Latin America and the Middle East. Railroads outside of North America are constructed with a variety of track gauges that are sized differently than in North America, which requires us, in some cases, to alter our manufacturing specifications accordingly.

Any of the railcar types listed below may be further developed to meet the characteristics of the materials being transported and customer specifications.

Stainless Steel and Hybrid Stainless Steel/Aluminum Coal Cars. We manufacture a series of stainless steel and hybrid stainless steel and aluminum AutoFlood and BethGon coal cars designed to serve the Eastern railroads. These coal cars are designed to withstand the rigors of Eastern coal transportation service. They offer a unique balance of maximized payload, light weight, efficient unloading and long service life.

Aluminum Coal Cars. The BethGon[®] is the leader in the aluminum-bodied coal gondola railcar segment. Since we introduced the steel BethGon railcar in the late 1970s and the aluminum BethGon railcar in 1986, the BethGon railcar has become the most widely used coal car in North America. Our current BethGon II features lighter weight, higher capacity and increased durability suitable for long-haul coal carrying railcar service. We have received several patents on the features of the BethGon II and continue to explore ways to increase the BethGon II's capacity and reliability.

Our aluminum bodied open-top hopper railcar, the AutoFlood[®], is a five-pocket coal car equipped with a bottom discharge gate mechanism. We began manufacturing AutoFlood railcars in 1984, and introduced the AutoFlood II and AutoFlood III designs in 1996 and 2002, respectively. Both the AutoFlood II and AutoFlood III design incorporate the automatic rapid discharge system, the MegaFlo[®] door system, a patented mechanism that uses an over-center locking design, enabling the cargo door to close with tension rather than by compression. Further, AutoFlood railcars can be equipped with rotary couplers to permit rotary unloading.

VersaFlood Series. Our VersaFlood[®] series open-top hopper railcars includes steel, stainless steel or hybrid steel and aluminum-bodied designs equipped with three-pocket (transverse gate) or two-pocket (longitudinal gate) discharge door systems with independent or fully automatic door operation. The VersaFlood[®] product series offers versatile design options for transportation of aggregates, sand or minerals.

Dynastack Series. Our domestic intermodal doublestack railcar product offerings include a stand-alone 40 foot well car, the DynaStack[®] articulated, 5-unit, 40 foot and the DynaStack[®] 3-unit, 53 foot well cars for transportation of

international and domestic containers.

Other Railcar Types. Our portfolio of railcar types also includes: aluminum-bodied flat-bottom gondola railcars and steel or stainless steel-bodied triple hopper railcars for coal and coke service; Small Cube Covered Hopper railcars primarily used to transport cement, sand, roofing granules and fly ash; 52 and 66 Mill Gondola railcars used to transport steel products and scrap; Slab and Coil steel railcars designed specifically for transportation of steel slabs and coil steel products, respectively; Flat railcars, Bulkhead Flat railcars and Centerbeam Flat railcars designed to transport a variety of products, including machinery and equipment, steel and structural steel components (including pipe), forest products and other bulky industrial products; a Woodchip Gondola railcar designed to haul woodchips and municipal waste or other high-volume, low-density commodities; and a variety of non-coal carrying open top hopper railcars designed to carry ballast, iron ore, taconite pellets, petroleum coke and other bulk commodities; the AVC Aluminum Vehicle Carrier design used to transport commercial and light vehicles (automobiles and trucks) from assembly plants and ports to rail distribution centers; and the Articulated Bulk Container railcar designed to carry dense bulk products such as waste products in 20 foot containers.

Table of Contents

We have added 11 new or redesigned products to our portfolio in the last five years, including mill gondolas, slab and coil steel railcars, triple hoppers and hybrid aluminum/stainless steel railcars, ore cars, ballast cars, aggregate cars (with independent or fully automatic transverse or longitudinal door systems), coil gondolas, intermodal flats (including the 3-unit, 53-foot well cars) and non-intermodal flat cars (including ribbon rail and bulkhead flats). Focused product development activity continues in areas where we can leverage our technical knowledge base and capabilities to realize market opportunities.

With operations in Indiana and Nebraska, we service freight cars and unit coal trains utilizing key rail corridors in the Midwest and Western regions of the United States. Separately, we also sell forged, cast and fabricated replacement parts for all of the railcars we produce, as well as those manufactured by others.

MANUFACTURING

We have railcar production facilities in Cherokee, Alabama, Danville, Illinois and Roanoke, Virginia. Our facilities are each certified or approved for certification by the Association of American Railroads (the AAR), which sets railcar manufacturing industry standards for quality control. We will continue to adjust salaried and hourly labor personnel levels at our facilities to coincide with production requirements. Our Shoals manufacturing facility delivered its first railcars during the fourth quarter of 2013. The build-out and ramp-up of the Shoals facility will be completed by mid-2014. This facility will provide a solid platform from which to pursue a broad range of non-coal car business including intermodal well cars, non-intermodal flat cars and various open-top hopper, covered hopper and gondola cars.

Our manufacturing process involves four basic steps: fabrication, assembly, finishing and inspection. Each of our facilities has numerous checkpoints at which we inspect products to maintain quality control, a process that our operations management continuously monitors. In our fabrication processes, we employ standard metal working tools, many of which are computer controlled. Each assembly line typically involves 15 to 20 manufacturing positions, depending on the complexity of the particular railcar design. We use mechanical fastening in the fitting and assembly of our aluminum-bodied railcar parts, while we typically use welding for the assembly of our steel-bodied railcars. For aluminum-bodied railcars, we begin the finishing process by cleaning the railcar's surface and then applying the decals. In the case of steel-bodied railcars, we begin the finishing process by blasting the surface area of the railcar, painting it and then applying decals. Once we have completed the finishing process, our employees, along with representatives of the customer purchasing the particular railcars, inspect all railcars for adherence to specifications.

CUSTOMERS

We have strong long-term relationships with many large purchasers of railcars. Long-term customer relationships are particularly important in the railcar industry, given the limited number of buyers of railcars.

Our customer base consists mostly of North American railroads, financial institutions and shippers. We believe that our customers' preference for reliable, high-quality products, the relatively high cost for customers to switch manufacturers, our technological leadership in developing and enhancing innovative products and the competitive pricing of our railcars have helped us maintain our long-standing relationships with our customers.

In 2013, revenue from three customers, Norfolk Southern Railway Company, CSX Transportation Inc. and Canadian National Railway Company, accounted for approximately 45%, 12% and 6%, respectively, of total revenue. In 2013, sales to our top five customers accounted for approximately 70% of total revenue. Our railcar sales to customers outside the United States were \$21.4 million in 2013. While we maintain strong relationships with our customers and we serve over 70 active customers, many customers do not purchase railcars every year since railcar fleets are not

necessarily replenished or augmented every year. The size and frequency of railcar orders often results in a small number of customers representing a significant portion of our sales in a given year.

SALES AND MARKETING

Our direct sales group is organized geographically and consists of regional sales managers and contract administrators, a manager of customer service and support staff. The regional sales managers are responsible for managing customer relationships. Our contract administrators are responsible for preparing proposals and other inside sales activities. Our manager of customer service is responsible for after-sale follow-up and in-field product performance reviews.

Table of Contents**RESEARCH AND DEVELOPMENT**

We utilize the latest engineering methods, tools and processes to ensure that new products and processes meet our customers' requirements and are delivered in a timely manner. We develop and introduce new railcar designs as a result of a combination of customer feedback and close observation of developing market trends. We work closely with our customers to better understand their expectations and design railcars that meet their needs. New product designs are tested and validated for compliance with AAR standards prior to introduction. This comprehensive approach provides the criteria and direction that ensure we are developing the products that our customers desire and perform as expected. Costs associated with research and development are expensed as incurred and totaled \$0.4 million, \$0.4 million and \$2.0 million for the years ended December 31, 2013, 2012 and 2011, respectively.

BACKLOG

We define backlog as the value of those products or services which our customers have committed in writing to purchase from us or lease from us when built, but which have not yet been recognized as sales. Our contracts may include cancellation clauses under which customers are required, upon cancellation of the contract, to reimburse us for costs incurred in reliance on an order and to compensate us for lost profits. However, customer orders may be subject to customer requests for delays in railcar deliveries, inspection rights and other customary industry terms and conditions, which could prevent or delay backlog from being converted into sales.

The following table depicts our reported railcar backlog in number of railcars and estimated future sales value attributable to such backlog, for the periods shown.

	Year Ended December 31,		
	2013	2012	2011
Railcar backlog at start of period	2,881	8,303	2,054
Railcars delivered	(3,821)	(8,325)	(6,188)
Railcar orders	7,766	2,903	12,437
Railcar backlog at end of period	6,826	2,881	8,303
Estimated revenue from backlog at end of period (in thousands) ⁽¹⁾	\$ 492,018	\$ 197,597	\$ 559,824

- (1) Estimated revenue from backlog reflects the total revenue attributable to the backlog reported at the end of the particular period as if such backlog were converted to actual sales. Estimated revenue from backlog does not reflect potential price increases and decreases under customer contracts that provide for variable pricing based on changes in the cost of raw materials. Although we continually look for opportunities to package our leased assets for sale to our leasing company partners, these leased assets may not be converted to sales.

Although our reported backlog is typically converted to sales within one year, our reported backlog may not be converted to sales in any particular period, if at all, and the actual sales from these contracts may not equal our reported backlog estimates. See Item 1A. Risk Factors Risks Related to Our Business The level of our reported backlog may not necessarily indicate what our future sales will be and our actual sales may fall short of the estimated sales value attributed to our backlog. In addition, due to the large size of railcar orders and variations in the mix of railcars, the size of our reported backlog at the end of any given period may fluctuate significantly. See Item 1A. Risk

Factors Risks Related to the Railcar Industry The variable purchase patterns of our customers and the timing of completion, delivery and customer acceptance of the railcar may cause our revenues and income from operations to vary substantially each quarter, which will result in significant fluctuations in our quarterly results.

Table of Contents

SUPPLIERS AND MATERIALS

The cost of raw materials and components represents a substantial majority of the manufacturing costs of most of our railcar product lines. As a result, the management of raw materials and components purchasing is critical to our profitability. We enjoy generally strong relationships with our suppliers, which helps to ensure access to supplies when railcar demand is high.

Our primary aluminum suppliers are Sapa Extrusions and Constellium (formerly Alcan Inc.). Aluminum prices generally are fixed at the time a railcar order is accepted, mitigating the effect of future fluctuations in prices. Our primary stainless steel supplier is Crompton International.

Our primary component suppliers include Amsted Industries, Inc. which supplies us with truck components, brake components, couplers and bearings and Summit Railroad products, Inc. which supplies us with axles and wheels. Roll Form Group, a division of Samuel, Son & Co., Limited, is the sole supplier of our roll-formed center sills, which were used in 68% and 98% of our new railcars produced in 2013 and 2012, respectively. A center sill is the primary structural component of a railcar. In addition, during 2013, we entered into an agreement with International Truck and Engine Investments Corporation, an affiliate of Navistar, Inc., pursuant to which it has contracted to supply us with various fabricated parts, components and subassemblies as well as providing truck and wheel and axle assembly services and blast and paint finishing services. Other suppliers provide brake systems, castings, bearings, fabrications and various other components. The railcar industry is subject to supply constraints for some of the key railcar components. See Item 1A. Risk Factors Risks Related to the Railcar Industry Limitations on the supply of railcar components could adversely affect our business because they may limit the number of railcars we can manufacture.

Except as described above, there are usually at least two suppliers for each of our raw materials and specialty components. No single supplier accounted for more than 11% and 22% of our total purchases in 2013 and 2012, respectively. Our top ten suppliers accounted for 60% and 67% of our total purchases in 2013 and 2012, respectively.

COMPETITION

We operate in a highly competitive marketplace. Competition is based on price, delivery timing, product design, reputation for product quality and customer service and support.

We have four principal competitors in the North American railcar market that primarily manufacture railcars for third-party customers, which are Trinity Industries, Inc., The Greenbrier Companies, Inc., American Railcar Industries, Inc. and National Steel Car Limited.

Competition in the North American market from railcar manufacturers located outside of North America is limited by, among other factors, high shipping costs and familiarity with the North American market.

INTELLECTUAL PROPERTY

We have several U.S. and international patents and pending applications, registered trademarks, copyrights and trade names. Key patents include our one-piece center sill, our MegaFlo door system and our top chord and side stake for coal cars. The protection of our intellectual property is important to our business.

EMPLOYEES

As of December 31, 2013, we had 819 employees, of whom 181 were salaried and 638 were hourly wage earners, and approximately 138, or 17%, of our employees were members of unions. As of December 31, 2012, we had 918 employees, of whom 182 were salaried and 736 were hourly wage earners, and approximately 380, or 41%, of our employees were members of unions. See Item 1A. Risk Factors Risks Related to Our Business Labor disputes could disrupt our operations and divert the attention of our management and may have a material adverse effect on our operations and profitability.

Table of Contents

REGULATION

The Federal Railroad Administration, or FRA, administers and enforces U.S. federal laws and regulations relating to railroad safety. These regulations govern equipment and safety compliance standards for freight railcars and other rail equipment used in interstate commerce. The AAR promulgates a wide variety of rules and regulations governing safety and design of equipment, relationships among railroads with respect to freight railcars in interchange and other matters. The AAR also certifies freight railcar manufacturers and component manufacturers that provide equipment for use on railroads in the United States as well as providers of railcar repair and maintenance services. New products must generally undergo AAR testing and approval processes. As a result of these regulations, we must maintain certifications with the AAR as a freight railcar manufacturer and provider of railcar repair and maintenance services, and products that we sell must meet AAR and FRA standards.

We are also subject to oversight in other jurisdictions by foreign regulatory agencies and to the extent that we expand our business internationally, we will increasingly be subject to the regulations of other non-U.S. jurisdictions.

ENVIRONMENTAL MATTERS

We are subject to comprehensive federal, state, local and international environmental laws and regulations relating to the release or discharge of materials into the environment, the management, use, processing, handling, storage, transport or disposal of hazardous materials, or otherwise relating to the protection of human health and the environment. These laws and regulations not only expose us to liability for our own negligent acts, but also may expose us to liability for the conduct of others or for our actions that were in compliance with all applicable laws at the time these actions were taken. In addition, these laws may require significant expenditures to achieve compliance, and are frequently modified or revised to impose new obligations. Civil and criminal fines and penalties may be imposed for non-compliance with these environmental laws and regulations. Our operations that involve hazardous materials also raise potential risks of liability under the common law.

Environmental operating permits are, or may be, required for our operations under these laws and regulations. These operating permits are subject to modification, renewal and revocation. We regularly monitor and review our operations, procedures and policies for compliance with these laws and regulations. Despite these compliance efforts, risk of environmental liability is inherent in the operation of our businesses, as it is with other companies engaged in similar businesses. We believe that our operations and facilities are in substantial compliance with applicable laws and regulations and that any noncompliance is not likely to have a material adverse effect on our operations or financial condition.

Future events, such as changes in or modified interpretations of existing laws and regulations or enforcement policies, or further investigation or evaluation of the potential health hazards of products or business activities, may give rise to additional compliance and other costs that could have a material adverse effect on our financial condition and operations. In addition, we have in the past conducted investigation and remediation activities at properties that we own to address historic contamination. To date, such costs have not been material. Although we believe we have satisfactorily addressed all known material contamination through our remediation activities, there can be no assurance that these activities have addressed all historic contamination. The discovery of historic contamination or the release of hazardous substances into the environment could require us in the future to incur investigative or remedial costs or other liabilities that could be material or that could interfere with the operation of our business.

In addition to environmental laws, the transportation of commodities by railcar raises potential risks in the event of a derailment or other accident. Generally, liability under existing law in the United States for a derailment or other accident depends on the negligence of the party, such as the railroad, the shipper or the manufacturer of the railcar or

its components. However, for the shipment of certain hazardous commodities, strict liability concepts may apply.

Item 1A. Risk Factors.

The factors described below are the principal risks that could materially adversely affect our operating results and financial condition. Other factors may exist that we do not consider significant based on information that is currently available. In addition, new risks may emerge at any time, and we cannot predict those risks or estimate the extent to which they may affect us.

Table of Contents

RISKS RELATED TO THE RAILCAR INDUSTRY

We operate in a highly cyclical industry, and our industry and markets are influenced by factors that are beyond our control, including U.S. and international economic conditions. Such factors could adversely affect demand for our railcar offerings.

Historically, the North American railcar market has been highly cyclical and we expect it to continue to be highly cyclical. During the previous industry cycle, industry-wide railcar deliveries declined from a peak of 74,729 railcars in 2006 to a low of 16,535 railcars in 2010. During this period, our railcar production declined from approximately 18,764 railcars in 2006 to 2,229 railcars in 2010. Our industry and the markets for which we supply railcars are influenced by factors that are beyond our control, including U.S. and international economic conditions. Downturns in economic conditions could result in lower sales volumes, lower prices for railcars and a loss of profits. The cyclicity of the markets in which we operate may adversely affect our operating results and cash flow. In addition, fluctuations in the demand for our railcars may cause comparisons of our sales and operating results between different fiscal years to be less meaningful as indicators of our future performance.

We operate in a highly competitive industry and we may be unable to compete successfully against other railcar manufacturers.

We operate in a competitive marketplace and face substantial competition from established competitors in the railcar industry in North America. We have four principal competitors that primarily manufacture railcars for third-party customers. Some of these manufacturers have greater financial and technological resources than us, and they may increase their participation in the railcar segments in which we compete. In addition to price, competition is based on delivery timing, product performance and technological innovation, quality, customer service and other factors. In particular, technological innovation by any of our existing competitors, or new competitors entering any of the markets in which we do business, could put us at a competitive disadvantage and impair our ability to compete successfully against other railcar manufacturers or retain our market share in our established markets. Increased competition for the sales of our railcar products could result in price reductions, reduced margins and loss of market share, which could negatively affect our prospects, business, financial condition and results of operations.

We depend upon a small number of customers that represent a large percentage of our sales. The loss of any single customer, or a reduction in sales to any such customer, could have a material adverse effect on our business, financial condition and results of operations.

Since railcars are typically sold pursuant to large, periodic orders, a limited number of customers typically represent a significant percentage of our railcar sales in any given year. Over the last five years, our top five customers in each year based on sales accounted for, in the aggregate, approximately 72% of our total sales for the five-year period. In 2013, sales to our top three customers accounted for approximately 45%, 12% and 6%, respectively, of our total sales. In 2012, sales to our top three customers accounted for approximately 28%, 22% and 14%, respectively, of our total sales. Although we have long-standing relationships with many of our major customers, the loss of any significant portion of our sales to any major customer, the loss of a single major customer or a material adverse change in the financial condition of any one of our major customers could have a material adverse effect on our business, financial condition and results of operations.

The variable purchase patterns of our customers and the timing of completion, delivery and customer acceptance of orders may cause our revenues and income from operations to vary substantially each quarter, which will result in significant fluctuations in our quarterly results.

Most of our individual customers do not make purchases every year, since they do not need to replace, replenish or increase their railcar fleets on a yearly basis. Many of our customers place orders for products on an as-needed basis, sometimes only once every few years. As a result, the order levels for railcars, the mix of railcar types ordered and the railcars ordered by any particular customer have varied significantly from quarterly period to quarterly period in the past and may continue to vary significantly in the future. Therefore, our results of operations in any particular quarterly period may be significantly affected by the number of railcars delivered and product mix of railcars delivered in any given quarterly period. Additionally, because we record the sale of a new and rebuilt railcar at the time (1) we complete production, (2) the railcar is accepted by the customer following inspection, (3) the risk for any damage or loss with respect to the railcar passes to the customer, and (4) title to the railcar transfers to the customer, and not when the order is taken, the timing of the completion, delivery and acceptance of significant customer orders will have a considerable effect on fluctuations in our quarterly results. As a result of these quarterly fluctuations, we believe that comparisons of our sales and operating results between quarterly periods may not be meaningful and, as such, these comparisons should not be relied upon as indicators of our future performance.

Table of Contents

Our ability to sell new railcars may be limited by other factors, including the availability and price of used railcars offered for sale and new or used railcars offered for lease by leasing companies and others.

Our customers may consider alternatives to the purchase of new railcars, including the purchase of used railcars, refurbishment of existing railcars or the lease of new or used railcars. Our competitors may also be able to offer railcar leases at favorable lease rates, negatively impacting our ability to sell new railcars, which may result in price reductions, reduced margins and loss of market share. These additional competitive factors could negatively affect our prospects, business, financial condition and results of operations.

The potential cost volatility of the raw materials that we use to manufacture railcars, especially aluminum and steel, and delivery delays associated with these raw materials may adversely affect our financial condition and results of operations.

The production of railcars and our operations require substantial amounts of aluminum and steel. The cost of aluminum, steel and all other materials (including scrap metal) used in the production of our railcars represents a significant majority of our direct manufacturing costs. Our business is subject to the risk of price increases and periodic delays in the delivery of aluminum, steel and other materials, all of which are beyond our control. Any fluctuations in the price or availability of aluminum or steel, or any other material used in the production of our railcars, may have a material adverse effect on our business, results of operations or financial condition. In addition, if any of our suppliers were unable to continue its business or were to seek bankruptcy relief, the availability or price of the materials we use could be adversely affected. Deliveries of our materials may also fluctuate depending on supply and demand for the material or governmental regulation relating to the material, including regulation relating to the importation of the material.

Limitations on the supply of railcar components could adversely affect our business because they may limit the number of railcars we can manufacture.

We rely upon third-party suppliers for various components for our railcars. In the future, suppliers of railcar components may be unable to meet the short-term or longer-term demand of our industry for certain railcar components. In the event that any of our suppliers of railcar components were to stop or reduce their production, go out of business, refuse to continue their business relationships with us, become subject to work stoppages or ration their supply of components, our business could be disrupted. We have in the past experienced challenges sourcing certain railcar components to meet our production requirements. In addition, our ability to increase our railcar production to expand our business and/or meet any increase in demand, with new or additional manufacturing capabilities, depends on our ability to obtain an adequate supply of these railcar components. While we believe that we could secure alternative sources for these components, we may incur substantial delays and significant expense in doing so, the quality and reliability of these alternative sources may not be the same and our operating results may be significantly affected. In an effort to secure a supply of components, we have developed foreign sources that require deposits on some occasions. In the event of a material adverse business condition, such deposits may be forfeited. In addition, if one of our competitors entered into a preferred supply arrangement with, or was otherwise favored by, a particular supplier, we would be at a competitive disadvantage, which could negatively affect our operating results. Furthermore, alternative suppliers might charge significantly higher prices for railcar components than we currently pay. Such circumstances could have a material adverse impact on our customer relationships, financial condition and results of operations.

RISKS RELATED TO OUR BUSINESS

We rely significantly on the sales of our coal cars. Future demand for coal could decrease, which could adversely affect our business, financial condition and results of operations.

Historically, coal cars have been our primary railcar type, representing 49% and 83% of our sales revenues in 2013 and 2012, respectively, and 68% and 91% of the total railcars that we delivered in 2013 and 2012, respectively. Fluctuations in the price of coal relative to other energy sources may cause utility companies, which are significant users of our coal car products, to select an alternative energy source to coal, thereby reducing the demand for coal cars. For example, if utility companies increased the use of natural gas instead of coal as an energy source, demand for certain of our coal car products could decrease and our operating results could be negatively affected.

Table of Contents

The U.S. federal and state governments may adopt new legislation and/or regulations, or judicial or administrative interpretations of existing laws and regulations that materially adversely affect the coal industry and/or our customers ability to use coal or to continue to use coal at present rates. Such legislation or proposed legislation and/or regulations may include proposals for more stringent protections of the environment that would further regulate and tax the coal industry. This legislation could significantly reduce demand for coal, adversely affect the demand for our coal cars and have a material adverse effect on our financial condition and results of operations.

Lack of acceptance of our new railcar offerings by our customers could adversely affect our business.

Our growth strategy depends in part on our continued development and sale of new railcar designs and design changes to existing railcars to penetrate railcar markets in which we currently do not compete and to expand or maintain our market share in the railcar markets in which we currently compete. We have dedicated significant resources to the development, manufacturing and marketing of new railcar designs. We typically make decisions to develop and market new railcars and railcars with modified designs without firm indications of customer acceptance. New or modified railcar designs may require customers to alter their existing business methods or threaten to displace existing equipment in which our customers may have a substantial capital investment. Many railcar purchasers prefer to maintain a standardized fleet of railcars and railcar purchasers with established railcar fleets are generally resistant to railcar design changes. Therefore, any new or modified railcar designs that we develop may not gain widespread acceptance in the marketplace and any such products may not be able to compete successfully with existing railcar designs or new railcar designs that may be introduced by our competitors.

To the extent we expand our sales of products and services internationally, we will increase our exposure to international economic and political risks.

Conducting business outside the United States, for example through our sales to other countries, subjects us to various risks, including changing economic, legal and political conditions, work stoppages, currency fluctuations, terrorist activities directed at U.S. companies, armed conflicts and unexpected changes in the United States and the laws of other countries relating to tariffs, trade restrictions, transportation regulations, foreign investments and taxation. If we fail to obtain and maintain certifications of our railcars and railcar parts in the various countries where we may operate, we may be unable to market and sell our railcars in those countries.

In addition, more stringent rules relating to labor or the environment, adverse tax consequences and price exchange controls could limit our operations and make the distribution of our products internationally more difficult. Furthermore, any material changes in the quotas, regulations or duties on imports imposed by the U.S. government and agencies or on exports by non-U.S. governments and their respective agencies could affect our ability to export the railcars that we manufacture in the United States. The uncertainty of the legal environment could limit our ability to enforce our rights effectively.

The level of our reported backlog may not necessarily indicate what our future sales will be and our actual sales may fall short of the estimated sales value attributed to our backlog.

We define backlog as the sales value of products or services to which our customers have committed in writing to purchase from us or lease from us when built, that have not yet been recognized as revenue. In this annual report on Form 10-K, we have disclosed our backlog, or the number of railcars for which we have purchase orders or firm operating leases for railcars to be built, in various periods and the estimated sales value (in dollars) that would be attributable to this backlog once the backlog is converted to actual sales. We consider backlog to be an indicator of future sales of railcars. However, our reported backlog may not be converted into sales in any particular period, if at all, and the actual sales (including any compensation for lost profits and reimbursement for costs) from such contracts

may not equal our reported estimates of backlog value. For example, we rely on third-party suppliers for castings, wheels and components for our railcars and if these third parties were to stop or reduce their supply of heavy castings, wheels and other components, our actual sales could fall short of the estimated sales value attributed to our backlog. Also, customer orders may be subject to cancellation, inspection rights and other customary industry terms, and delivery dates may be subject to delay, thereby extending the date on which we will deliver the associated railcars and realize revenues attributable to such railcar backlog.

Table of Contents

Our warranties may expose us to potentially significant claims, which may damage our reputation and adversely affect our business, financial condition and results of operations.

We warrant that new railcars produced by us will be free from defects in material and workmanship under normal use and service identified for a period of up to five years from the time of sale. Accordingly, we may be subject to a risk of product liability or warranty claims in the event that the failure of any of our products results in property damage, personal injury or death, or does not conform to our customers' specifications. Although we currently maintain product liability insurance coverage, product liability claims, if made, may exceed our insurance coverage limits or insurance may not continue to be available on commercially acceptable terms, if at all. These types of product liability and warranty claims may result in costly product recalls, significant repair costs and damage to our reputation, all of which could adversely affect our results of operations.

Our Shoals facility or any other business that we may acquire in the future may fail to perform to expectations or we may be unable to successfully integrate any such acquired business with our existing business.

Our Shoals facility or any other business that we may acquire in the future may not strengthen our competitive position or achieve our desired goals. In addition, the integration of any acquired business, including the continuing integration of the Shoals-based business, may disrupt our ongoing operations, divert management from day-to-day responsibilities, increase our expenses and reduce our cash available for operations and other uses. There can be no assurance that we will be able to effectively manage the integration of our Shoals-based business or any other acquired business, or be able to attract, retain and motivate key personnel for the business.

If we lose key personnel, our operations and ability to manage the day-to-day aspects of our business may be adversely affected.

We believe our success depends to a significant degree upon the continued contributions of our executive officers and key employees, both individually and as a group. Our future performance will substantially depend on our ability to retain and motivate them. If we lose key personnel or are unable to recruit qualified personnel, our ability to manage the day-to-day aspects of our business may be adversely affected.

The loss of the services of one or more members of our senior management team could have a material adverse effect on our business, financial condition and results of operations. Because our senior management team has many years of experience in the railcar industry and other manufacturing and capital equipment industries, it could be difficult to replace any of them without adversely affecting our business operations. Our future success will also depend in part upon our continuing ability to attract and retain highly qualified personnel. We do not currently maintain key person life insurance.

Shortages of skilled labor may adversely impact our operations.

We depend on skilled labor in the manufacture and repair of railcars. Some of our facilities are located in areas where demand for skilled laborers often exceeds supply. Shortages of some types of skilled laborers may restrict our ability to maintain or increase production rates and could cause our labor costs to increase.

An increase in health care costs could adversely affect our results of operations.

We provide postretirement health care benefits for approximately 37 of our active employees and 720 of our retired employees. As of December 31, 2013, we have an unfunded \$63.3 million accrual for our projected retiree health care costs, a substantial portion of which relates to a settlement with the union representing employees at our and our

predecessors Johnstown manufacturing facilities. The terms of that settlement agreement (the 2005 Settlement Agreement) required us to pay until November 30, 2012 certain monthly amounts toward the cost of retiree health care coverage. We engaged in voluntary negotiations for two years in an effort to reach a consensual agreement related to the expired 2005 Settlement Agreement but no agreements were reached. We terminated, effective November 1, 2013, our contributions for medical coverage and life insurance benefits to affected retirees and are seeking declaratory relief to confirm our rights under the Employee Retirement Income Security Act of 1974, as amended, to reduce or terminate retiree medical coverage and life insurance benefits pursuant to the plans that were the subject of the 2005 Settlement Agreement. On July 9, 2013, the union and certain retiree defendants filed suit in the United States District Court for the Western District of Pennsylvania regarding the same dispute (see Note 11 to the Consolidated Financial Statements). The outcome of the pending litigation and the impact on our postretirement

Table of Contents

benefit plan obligation cannot be determined at this time. Our recorded postretirement benefit plan obligation assumes for accounting purposes a continuation of those monthly payments as per the expired 2005 Settlement Agreement indefinitely after November 1, 2013. However, the Company's postretirement benefit plan obligation could significantly increase or decrease as a result of the litigation or if the parties agree to an alternative settlement agreement.

Labor disputes could disrupt our operations and divert the attention of our management and may have a material adverse effect on our operations and profitability.

As of December 31, 2013, we had a collective bargaining agreement with a union representing approximately 17% of our total active labor force, which expires on March 31, 2017. An additional collective bargaining agreement at a currently idled facility expires on October 31, 2018. Disputes with the unions representing our employees could result in strikes or other labor protests which could disrupt our operations and divert the attention of management from operating our business. If we were to experience a strike or work stoppage, it could be difficult for us to find a sufficient number of employees with the necessary skills to replace these employees. Any such labor disputes could have a material adverse effect on our financial condition, results of operations or cash flows.

We rely upon a single supplier to supply us with all of our roll-formed center sills for our railcars, and any disruption of our relationship with this supplier could adversely affect our business.

We rely upon a single supplier to manufacture all of our roll-formed center sills for our railcars, which are based upon our proprietary and patented process. A center sill is the primary longitudinal structural component of a railcar, which helps the railcar withstand the weight of the cargo and the force of being pulled during transport. Our center sill is formed into its final shape without heating by passing steel plate through a series of rollers. Of the new railcars that we produced in 2013 and 2012, 68% and 98%, respectively, were manufactured using this roll-formed center sill. Although we have a good relationship with our supplier and have not experienced any significant delays, manufacturing shortages or failures to meet our quality requirements and production specifications in the past, our supplier could stop production of our roll-formed center sills, go out of business, refuse to continue its business relationship with us or become subject to work stoppages. While we believe that we could secure alternative manufacturing sources, our present supplier is currently the only manufacturer of our roll-formed center sills for our railcars. We may incur substantial delays and significant expense in finding an alternative source, our results of operations may be significantly affected and the quality and reliability of these alternative sources may not be the same. Moreover, alternative suppliers might charge significantly higher prices for our roll-formed center sills than we currently pay.

Equipment failures, delays in deliveries or extensive damage to our facilities could lead to production or service curtailments or shutdowns.

We have railcar production facilities in Cherokee, Alabama, Danville, Illinois and Roanoke, Virginia and maintenance and repair facilities in Grand Island, Nebraska and Hastings, Nebraska. An interruption in railcar production capabilities or maintenance and repair capabilities at these facilities, as a result of equipment failure or other factors, could reduce or prevent our production, service or repair of railcars. A halt of production at any of our manufacturing facilities could severely affect delivery times to our customers. Any significant delay in deliveries to our customers could result in the termination of contracts, cause us to lose future sales and negatively affect our reputation among our customers and in the railcar industry and our results of operations. Our facilities are also subject to the risk of catastrophic loss due to unanticipated events, such as fires, explosions, floods or weather conditions. We may experience plant shutdowns or periods of reduced production as a result of equipment failures, delays in deliveries or extensive damage to any of our facilities, which could have a material adverse effect on our business, results of

operations or financial condition.

We might fail to adequately protect our intellectual property, which may result in our loss of market share, or third parties might assert that our intellectual property infringes on their intellectual property, which would be costly to defend and divert the attention of our management.

The protection of our intellectual property is important to our business. We rely on a combination of trademarks, copyrights, patents and trade secrets to protect our intellectual property. However, these protections might be inadequate. For example, we have patents for portions of our railcar designs that are important to our market leadership in the coal car segment. Our pending or future trademark, copyright and patent applications might not be approved or, if allowed, might not be sufficiently broad. Conversely, third parties might assert that our technologies

Table of Contents

or other intellectual property infringe on their proprietary rights. In either case, litigation may result, which could result in substantial costs and diversion of our management team's efforts. Regardless of whether we are ultimately successful in any litigation, such litigation could adversely affect our business, results of operations and financial condition.

Our information technology and other systems are subject to cybersecurity risk, including the misappropriation of customer information and other breaches of information security. Security breaches and other disruptions could compromise our information, expose us to liability and harm our reputation and business.

In the ordinary course of our business, we collect and store sensitive data on our networks, including intellectual property, our proprietary business information and that of our customers, suppliers and business partners and personally identifiable information and other personal information of our customers and employees. While we continually work to safeguard our systems and to mitigate potential security risks, our information and processes are exposed to increasing global information security threats and more sophisticated and targeted computer crime, which may result in our data being subject to a security breach, a system failure, a computer virus, malicious software or unauthorized or fraudulent use by our employees or other third parties. Any compromise of our data security and access to or public disclosure or loss of personal or confidential business information could result in legal claims or proceedings with third parties, liability or regulatory penalties under the laws that protect the privacy of personal information, disruption of our operations, damage to our reputation, loss of business or remediation costs, any of which could have a material adverse effect on our prospects, business, financial condition and results of operations.

We are subject to a variety of environmental laws and regulations and the cost of complying with environmental requirements or any failure by us to comply with such requirements may have a material adverse effect on our business, financial condition and results of operations.

We are subject to a variety of federal, state and local environmental laws and regulations, including those governing air quality and the handling, disposal and remediation of waste products, fuel products and hazardous substances. Although we believe that we are in material compliance with all of the various regulations and permits applicable to our business, we may not at all times be in compliance with such requirements. The cost of complying with environmental requirements may also increase substantially in future years. If we violate or fail to comply with these regulations, we could be fined or otherwise sanctioned by regulators. In addition, these requirements are complex, change frequently and may become more stringent over time, which could have a material adverse effect on our business. We have in the past conducted investigation and remediation activities at properties that we own to address historic contamination. However, there can be no assurance that these remediation activities have addressed all historic contamination. Environmental liabilities that we incur, including those relating to the off-site disposal of our wastes, if not covered by adequate insurance or indemnification, will increase our costs and have a negative impact on our profitability.

The agreement governing our revolving credit facility contains various covenants that, among other things, limit our discretion in operating our business and provide for certain minimum financial requirements.

The agreement governing our revolving credit facility contains various covenants that, among other things, limit our management's discretion by restricting our ability to incur additional debt, enter into certain transactions with affiliates, make investments and other restricted payments and create liens. Our failure to comply with these financial covenants and other covenants under our revolving credit facility could lead to an event of default under the agreement governing any other indebtedness that we may have outstanding at the time, permitting the lenders to accelerate all borrowings under such agreement and to foreclose on any collateral. In addition, any such events may make it more

difficult or costly for us to borrow additional funds in the future. Our failure to raise capital if and when needed could have a material adverse effect on our results of operations and financial condition.

The market price of our securities may fluctuate significantly, which may make it difficult for stockholders to sell shares of our common stock when desired or at attractive prices.

Since our initial public offering in April 2005 until December 31, 2013, the trading price of our common stock ranged from a low of \$12.82 per share to a high of \$78.34 per share. The price for our common stock may fluctuate in response to a number of events and factors, such as quarterly variations in operating results and our reported

Table of Contents

backlog, the cyclical nature of the railcar market, announcements of new products by us or our competitors, changes in financial estimates and recommendations by securities analysts, the operating and stock price performance of other companies that investors may deem comparable to us, and news reports relating to trends in our markets or general economic conditions. Additionally, volatility or a lack of positive performance in our stock price may adversely affect our ability to retain key employees, all of whom have been granted stock options or other stock awards.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

The following table presents information on our leased and owned operating properties as of December 31, 2013:

Use	Location	Size	Leased or	Lease
			Owned	Expiration Date
Corporate headquarters	Chicago, Illinois	15,540 square feet	Leased	March 31, 2022
Railcar assembly and component manufacturing	Danville, Illinois	308,665 square feet on 36.5 acres of land	Owned	
Railcar assembly and component manufacturing	Roanoke, Virginia	383,709 square feet on 15.5 acres of land	Leased	December 31, 2024
Railcar assembly and component manufacturing	Cherokee, Alabama	543,399 square feet	Leased	December 31, 2021
Railcar maintenance, repair and parts warehouse	Grand Island, Nebraska	132,067 square feet on 448 acres of land	Owned	
Railcar maintenance and repair	Hastings, Nebraska	35,107 square feet on 13.4 acres of land with an additional 7.5 acres of land leased	Owned/ Leased	December 31, 2018
Railcar maintenance and repair	Clinton, Indiana	30,873 square feet on 56.3 acres of land	Owned	
Short line railroad	Grand Island, Nebraska	5 miles of main line plus 2.77 miles of sidings for a total of 7.77 miles	Owned	
Administrative	Johnstown, Pennsylvania	29,500 square feet on 1.02 acres of land	Owned	
Parts warehouse	Johnstown, Pennsylvania	86,000 square feet	Leased	December 31, 2016

In addition to the properties listed above, we also have various leased or owned railroad easements or rights of way which we use in our railcar repair and maintenance business. Based on our backlog for coal car orders as of December 31, 2013 our Danville facility is idle but remains available to resume operations if more coal car production

capacity is needed. As part of our strategic initiative to improve the contribution of our services business to our results of operations, we evaluated the long-term profitability of each of our railcar maintenance and repair shops during the fourth quarter of 2013. As a result of this analysis, we decided to close our underperforming maintenance and repair shop in Clinton, Indiana.

Table of Contents

Item 3. Legal Proceedings.

On July 8, 2013, we filed a Complaint for Declaratory Judgment (the **Complaint**) in the United States District Court for the Northern District of Illinois, Eastern Division (the **Court**). The case names as defendants the United Steel, Paper & Forestry, Rubber, Manufacturing, Energy, Allied Industrial & Services Workers International Union, AFL-CIO, CLC (the **USW**), as well as approximately 650 individual Retiree Defendants (as defined in the Complaint), and was assigned Case No. 1:13-cv-4889.

As described in the Complaint, pursuant to a settlement agreement (the **2005 Settlement Agreement**) among the Company, the USW and the Retiree Defendants, we agreed to make certain levels of contributions to medical coverage for the Retiree Defendants and to continue to provide life insurance benefits at their amount at that time under certain of our employee welfare benefit plans. The 2005 Settlement Agreement expressly provided that, as of November 30, 2012, we could cease making these contributions. In June 2011, the Company and the USW began discussing the possibility of an extension beyond November 30, 2012 for our contributions to retiree medical coverage and life insurance benefits at a reduced amount and on other mutually acceptable terms. We engaged in voluntary negotiations for two years with the USW and counsel for the Retiree Defendants in an effort to reach a consensual agreement regarding such medical and life insurance benefits, but the parties were unable to reach a final agreement. We terminated, effective November 1, 2013, our contributions for medical coverage provided to the Retiree Defendants and the provision of life insurance benefits and are seeking declaratory relief to confirm our rights under the Employee Retirement Income Security Act of 1974, as amended, to reduce or terminate retiree medical coverage and life insurance benefits pursuant to the plans that were the subject of the 2005 Settlement Agreement.

On July 9, 2013, the USW and certain Retiree Defendants (collectively, the **Pennsylvania Plaintiffs**) filed a putative class action in the United States District Court for the Western District of Pennsylvania (the **Pennsylvania Court**), captioned as Zanghi, et al. v. FreightCar America, Inc., et al., Case No. 3:13-cv-146. The complaint filed with the Pennsylvania Court alleges that we do not have the right to terminate welfare benefits previously provided to the Retiree Defendants and requests, among other relief, entry of a judgment finding that the Retiree Defendants have a vested right to specified welfare benefits.

On July 26, 2013, the Pennsylvania Plaintiffs filed with the Illinois Court a Motion to Dismiss Pursuant to Fed. R. Civ. P. 12(b) or in the Alternative, to Transfer Pursuant to 28 U.S.C. 1404(a), as well as a Motion to Stay and/or Prevent Plaintiff from Obtaining Defaults against the Retiree Defendants. On August 5, 2013, we filed with the Pennsylvania Court a Motion to Dismiss Pursuant to Fed. R. Civ. P. 12(b) or in the Alternative, to Transfer Pursuant to 28 U.S.C. 1404(a). On January 14, 2014, the Pennsylvania Court denied our motion to dismiss, and on January 16, 2014, the Illinois Court transferred our case to the Pennsylvania Court. On January 31, 2014, we filed a motion to consolidate both cases before the Pennsylvania Court. The Pennsylvania Court has not yet ruled on this motion.

On September 5, 2013, the Pennsylvania Plaintiffs filed a Plaintiffs **Motion for Temporary Restraining Order and Preliminary Injunction** (the **TRO Motion**) with the Pennsylvania Court. In the TRO Motion, the plaintiffs requested that the Pennsylvania Court enter an injunction requiring us to continue to make monthly contributions at the same rate established by the 2005 Settlement Agreement until the parties **dispute** is fully adjudicated on the merits. The Pennsylvania Court has not yet ruled on the TRO Motion.

On February 18, 2014, the Pennsylvania Plaintiffs filed a motion with the Pennsylvania Court seeking summary judgment as to our liability. We have filed a procedural motion in opposition to the summary judgment motion. The Pennsylvania Court has not yet ruled as to whether the summary judgment motion may proceed at this juncture in the case.

We have recorded postretirement benefit plan obligations, a substantial portion of which relate to the dispute now before the Illinois Court and the Pennsylvania Court (see Note 11 to the Consolidated Financial Statements).

On September 29, 2008, Bral Corporation, a supplier of certain railcar parts to us, filed a complaint against us in the U.S. District Court for the Western District of Pennsylvania (the Pennsylvania Lawsuit). The complaint alleged that we breached an exclusive supply agreement with Bral by purchasing parts from CMN Components, Inc.

Table of Contents

(CMN) and sought damages in an unspecified amount, attorneys' fees and other legal costs. On December 14, 2007, Bral sued CMN in the U.S. District Court for the Northern District of Illinois, alleging among other things that CMN interfered in the business relationship between Bral and us (the Illinois Lawsuit) and seeking damages in an unspecified amount, attorneys' fees and other legal costs. On October 22, 2008, we entered into an Assignment of Claims Agreement with CMN under which CMN assigned to us its counterclaims against Bral in the Illinois Lawsuit and we agreed to defend and indemnify CMN against Bral's claims in that lawsuit. On March 4, 2013, Bral Corporation and the Company agreed to settle the Illinois Lawsuit and the Pennsylvania Lawsuit. The settlement resulted in a \$3.9 million reduction in litigation reserves, which favorably impacted our results of operations for the year ended December 31, 2013.

In addition to the foregoing, we are involved in certain other pending and threatened legal proceedings, including commercial disputes and workers' compensation and employee matters arising out of the conduct of our business. While the ultimate outcome of these other legal proceedings cannot be determined at this time, it is the opinion of management that the resolution of these other actions will not have a material adverse effect on our financial condition, results of operations or cash flows.

Item 4. Mine Safety Disclosures.

Not applicable

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.**

Our common stock has been quoted on the Nasdaq Global Market under the symbol RAIL since April 6, 2005. Prior to that time, there was no public market for our common stock. As of February 28, 2014, there were approximately 79 holders of record of our common stock, which does not include persons whose shares of common stock are held by a bank, brokerage house or clearing agency. The following table sets forth quarterly high and low closing prices of our common stock since January 1, 2012, as reported on the Nasdaq Global Market.

	Common stock price		Dividend Declared
	High	Low	
2013			
Fourth quarter	\$ 26.72	\$ 20.49	\$ 0.06
Third quarter	\$ 21.47	\$ 16.53	\$ 0.06
Second quarter	\$ 21.98	\$ 16.94	\$ 0.06
First quarter	\$ 24.95	\$ 20.97	\$ 0.06
2012			
Fourth quarter	\$ 22.89	\$ 17.80	\$ 0.06
Third quarter	\$ 22.25	\$ 17.79	\$ 0.06
Second quarter	\$ 22.97	\$ 19.24	\$ 0.06
First quarter	\$ 29.25	\$ 20.25	\$ 0.06

Dividend Policy

The declaration and payment of future dividends will be at the discretion of our board of directors and will depend on, among other things, general economic and business conditions, our strategic plans, our financial results, contractual and legal restrictions on the payment of dividends by us and our subsidiaries and such other factors as our board of directors considers to be relevant. The ability of our board of directors to declare a dividend on our common stock is limited by Delaware law. On February 11, 2014, our board of directors declared a cash dividend of \$0.06 per share of our common stock, payable on February 28, 2014, to shareholders of record at the close of business on February 21, 2014.

Table of Contents**Performance Graph**

The following performance graph and related information shall not be deemed soliciting material or to be filed with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, except to the extent that the Company specifically incorporates it by reference into such filing.

The following graph illustrates the cumulative total stockholder return on our common stock during the period from January 1, 2009 through December 31, 2013 and compares it with the cumulative total return on the NASDAQ Composite Index and DJ Transportation Index. The comparison assumes \$100 was invested on January 1, 2009 in our common stock and in each of the foregoing indices and assumes reinvestment of dividends, if any. The performance shown is not necessarily indicative of future performance.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW

You should read the following discussion in conjunction with our consolidated financial statements and related notes included elsewhere in this annual report on Form 10-K. This discussion contains forward-looking statements that are based on management's current expectations, estimates and projections about our business and operations. Our actual results may differ materially from those currently anticipated and expressed in such forward-looking statements. See Forward-Looking Statements.

We believe we are the leading manufacturer of aluminum-bodied railcars and coal cars in North America, based on the number of railcars delivered. Our railcar manufacturing facilities are located in Cherokee, Alabama, Danville, Illinois and Roanoke, Virginia. Based on our backlog for coal car orders as of December 31, 2013 our Danville facility is idle but remains available to resume operations if more coal car production capacity is needed. The Shoals facility, our new state-of-the-art production facility, was designed to efficiently build a wide variety of railcar types. The Shoals facility is an important part of our long-term growth strategy as we continue to expand our railcar product and service offerings outside of our traditional coal car market. While our Danville and Roanoke facilities will continue to support our coal car products, the Shoals facility will allow us to produce a broader variety of railcars in a cost-effective and efficient manner. In addition, the facility layout, automated production equipment, proximity to key suppliers and new supply agreements will increase our flexibility and make us more competitive in the marketplace. Our Shoals facility delivered its first railcars during the fourth quarter of 2013 and production will continue to ramp up during 2014.

We refurbish and rebuild railcars and sell forged, cast and fabricated parts for all of the railcars we produce, as well as those manufactured by others. We provide railcar repair and maintenance and inspections for all types of freight railcars through our FCRS subsidiary. FCRS has repair and maintenance and inspection facilities in Grand Island, Nebraska and Hastings, Nebraska and services freight cars and unit coal trains utilizing key rail corridors in the Midwest and Western regions of the United States. As part of our strategic initiative to improve the contribution of our services business to our results of operations, we evaluated the long-term profitability of each of our railcar maintenance and repair shops during the fourth quarter of 2013. As a result of this analysis, we decided to close our underperforming maintenance and repair shop in Clinton, Indiana.

We also lease freight cars through our JAIX Leasing Company subsidiary. As of December 31, 2013, the value of leased railcars (including inventory on lease and railcars available for lease) was \$53.1 million.

Railcar deliveries totaled 3,821 units, consisting of 992 new railcars, 99 used railcars, 2,530 rebuilt railcars and 200 railcars leased, for the year ended December 31, 2013, compared to 8,325 units, consisting of 5,487 new railcars, 441 used railcars, 1,400 rebuilt railcars and 997 leased railcars, delivered in the same period of 2012. Our total backlog of firm orders for railcars increased by 3,945 railcars, from 2,881 railcars as of December 31, 2012 to 6,826 railcars as of December 31, 2013. Our primary customers are railroads, financial institutions and shippers.

We have two reportable segments, Manufacturing and Services. Our Manufacturing segment includes new railcar manufacturing, used railcar sales, railcar leasing and major railcar rebuilds. Our Services segment includes general railcar repair and maintenance, inspections, parts sales and railcar fleet management services. Corporate includes administrative activities and all other non-operating activity.

The North American railcar market is highly cyclical and the trends in the railcar industry are closely related to the overall level of economic activity. We expect the railroads, operating lessors and shippers to continue to evaluate

freight demand for dry bulk commodities and containerized freight and to continue to repair, maintain and upgrade their fleets to maximize the productivity of their railcar equipment.

FINANCIAL STATEMENT PRESENTATION

Revenues

Our Manufacturing segment revenues are generated primarily from sales of the railcars that we manufacture. Our Manufacturing segment sales depend on industry demand for new railcars, which is driven by overall economic conditions and the demand for railcar transportation of various products, such as coal, steel products, minerals, cement, motor vehicles, forest products and agricultural commodities. Our Manufacturing segment sales are also

Table of Contents

affected by competitive market pressures that impact our market share, the prices for our railcars and by the types of railcars sold. Our Manufacturing segment revenues also include revenues from major railcar rebuilds and lease rental payments received with respect to railcars under operating leases. Our Services segment revenue sources include parts sales, revenues related to the general maintenance and repair and inspections of railcars.

We generally manufacture railcars under firm orders from our customers. We recognize revenue, when (1) we complete the individual railcars, (2) the railcars are accepted by the customer following inspection, (3) the risk of any damage or other loss with respect to the railcars passes to the customer and (4) title to the railcars transfers to the customer. Deliveries include new and used cars sold, cars built and contracted under operating leases and rebuilt cars. We value used railcars received at their estimated fair market value. The variable purchase patterns of our customers and the timing of completion, delivery and customer acceptance of railcars may cause our revenues and income from operations to vary substantially each quarter, which will result in significant fluctuations in our quarterly results.

Cost of sales

Our cost of sales includes the cost of raw materials such as aluminum and steel, as well as the cost of finished railcar components, such as castings, wheels, truck components and couplers, and other specialty components. Our cost of sales also includes labor, utilities, freight, manufacturing depreciation and other operating costs. Factors that have affected our cost of sales include the recent volatility in railcar deliveries, the cost of steel and aluminum, and our efforts to continually reduce manufacturing costs at our manufacturing facilities. A portion of the contracts covering our backlog at December 31, 2013 are fixed-rate contracts. Therefore, if material costs were to increase, we may not be able to pass on these increased costs to our customers.

Operating (loss) income

Operating income (loss) represents revenues less cost of sales, gain on sale of railcars available for lease, selling, general and administrative expenses, and restructuring and impairment charges.

RESULTS OF OPERATIONS

Year Ended December 31, 2013 compared to Year Ended December 31, 2012

Revenues

Our consolidated revenues for the year ended December 31, 2013 were \$290.4 million compared to \$677.4 million for the year ended December 31, 2012. Manufacturing segment revenues for the year ended December 31, 2013 were \$253.8 million compared to \$644.0 million for the year ended December 31, 2012. The decrease in Manufacturing segment revenues for 2013 compared to 2012 reflects significantly fewer railcars delivered and a greater number of lower revenue per car rebuilt railcars. Our Manufacturing segment delivered 3,821 units, consisting of 992 new railcars, 99 used railcars, 2,530 rebuilt railcars and 200 leased railcars, for the year ended December 31, 2013, compared to 8,325 units, consisting of 5,487 new railcars, 441 used railcars, 1,400 rebuilt railcars and 997 leased railcars, for the year ended December 31, 2012. Services segment revenues for the year ended December 31, 2013 were \$36.6 million compared to \$33.4 million for the year ended December 31, 2012. The increase in Services segment revenues for 2013 compared to 2012 reflects higher parts sales revenue and higher repair volumes.

Gross Profit

Our consolidated gross profit for the year ended December 31, 2013 was \$13.2 million compared to \$65.0 million for the year ended December 31, 2012, representing a decrease of \$51.8 million. The decrease in our consolidated gross profit for the year ended December 31, 2013 compared to the year ended December 31, 2012 reflects a decrease in gross profit from our Manufacturing segment of \$52.7 million, which was partially offset by an increase in gross profit from our Services segment of \$0.6 million. The decrease in gross profit for our Manufacturing segment for the year ended December 31, 2013 compared to the year ended December 31, 2012 reflects the significant decrease in deliveries and \$9.5 million related to under-absorption of overhead costs due to low start-up volumes and costs associated with ramping up the labor force at our Shoals facility and the carrying costs associated with our idled Danville facility during 2013. Gross profit for our Manufacturing segment for the year ended December 31, 2013 included a \$1.7 million charge for projected costs in excess of selling price related to an order to

Table of Contents

be delivered in 2014. Customer lead times on this order required us to source key components from higher-priced suppliers in order to meet the customer's delivery requirements. Manufacturing segment gross profit for the year ended December 31, 2013 was also negatively impacted by production inefficiencies and higher operating costs. The increase in gross profit for our Services segment for the year ended December 31, 2013 compared to the year ended December 31, 2012 reflects higher parts sales and an increase in higher-margin program repairs. Our consolidated gross margin rate was 4.6% for the year ended December 31, 2013 compared to 9.6% for the year ended December 31, 2012.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the year ended December 31, 2013 were \$27.5 million compared to \$32.7 million for the year ended December 31, 2012, representing a decrease of \$5.2 million, or 16%. The decrease reflects a decrease in our Bral litigation reserve of \$3.9 million, decreases in incentive compensation of \$3.6 million and a decrease in consulting costs of \$2.2 million, which were partially offset by increases in salaries of \$1.6 million, Shoals start-up costs of \$1.3 million, legal fees of \$0.9 million relating to the postemployment benefit plan dispute and increases in stock compensation of \$0.6 million. Manufacturing segment selling, general and administrative expenses were \$7.3 million for the year ended December 31, 2013 compared to \$6.4 million for the year ended December 31, 2012. Services segment selling, general and administrative expenses were \$3.8 million for the year ended December 31, 2013 compared to \$3.9 million for the year ended December 31, 2012. Corporate selling, general and administrative expenses for the year ended December 31, 2013 were \$16.4 million compared to \$22.4 million for the year ended December 31, 2012 reflecting the reduction in the litigation reserve and decreases in incentive compensation and consulting costs, which were partially offset by higher legal fees related to the postemployment benefit plan dispute. Corporate selling, general and administrative expenses for the year ended December 31, 2013 included \$1.3 million related to the start-up of our Shoals facility.

Gain on Sale of Railcars Available for Lease

Gain on sale of railcars available for lease for the year ended December 31, 2013 was \$0.6 million and represented the gain on sale of leased railcars with a net book value of \$6.2 million. Gain on sale of railcars available for lease for the year ended December 31, 2012 was \$1.0 million and represented the gain on sale of leased railcars with a net book value of \$10.4 million.

Restructuring and Impairment Charges

Restructuring and impairment charges were \$10.5 million for the year ended December 31, 2013 and consisted of the items described below. There were no restructuring and impairment charges for the year ended December 31, 2012.

Although we are committed to maintaining our status as a market leader in coal car manufacturing and do not have plans to permanently close our Danville manufacturing facility, the current industry outlook for the all-aluminum coal car market remains soft. Based on our backlog for coal car orders as of December 31, 2013 and given the soft current industry outlook, we are unable to predict when our Danville manufacturing facility will resume operations and therefore we tested the long-lived assets at the Danville facility for impairment as of December 31, 2013. The carrying values of property, plant and equipment at the Danville facility were reduced to their estimated fair market values, resulting in a non-cash impairment charge of \$7.6 million for the year ended December 31, 2013.

As part of our strategic initiative to improve the contribution of our Services business to our results of operations, we evaluated the long-term profitability of each of our railcar maintenance and repair shops during the fourth quarter of 2013. As a result of this analysis we decided to close our underperforming maintenance and repair shop in Clinton,

Indiana. We evaluated the long-lived assets at our Clinton maintenance and repair shop for impairment and reduced the carrying values of property, plant and equipment to their estimated fair market values, resulting in a non-cash impairment charge of \$1.5 million for the year ended December 31, 2013. We also recorded a non-cash impairment charge of \$0.1 million related to customer intangibles and recorded other charges of \$0.1 million related to the Clinton closure during the fourth quarter of 2013.

We revised our Corporate management reporting structure as part of the leadership transition following the retirement of our previous President and Chief Executive Officer during the fourth quarter of 2013, resulting in severance charges of \$1.1 million being recorded during the fourth quarter of 2013.

Table of Contents**Operating (Loss) Income**

Our consolidated operating loss for the year ended December 31, 2013 was \$24.1 million compared to operating income of \$33.2 million for the year ended December 31, 2012. Operating loss for the Manufacturing segment was \$3.4 million for the year ended December 31, 2013 compared to operating income of \$58.3 million for the year ended December 31, 2012, reflecting the significant decrease in deliveries, \$9.5 million related to the start-up of the Shoals facility and the carrying costs associated with our idled Danville facility and non-cash fixed asset impairment charges of \$7.6 million for our idled Danville facility. Our Manufacturing segment operating loss for the year ended December 31, 2013 also included a \$1.7 million charge for projected costs in excess of selling price related to an order to be delivered in 2014. Manufacturing segment operating loss for the year ended December 31, 2013 was also impacted by production inefficiencies and higher operating costs. Services segment operating income was \$1.2 million for the year ended December 31, 2013 compared to \$2.1 million for the year ended December 31, 2012, primarily as a result of the non-cash impairment charges of \$1.6 million related to our closed Clinton maintenance and repair shop. Corporate costs were \$21.9 million for the year ended December 31, 2013 compared to \$27.2 million for the year ended December 31, 2012. The decrease in Corporate costs was primarily due to the reduction in the litigation reserve and decreases in incentive compensation and consulting costs, which were partially offset by higher legal fees relating to the postemployment benefit plan dispute. Corporate costs for the year ended December 31, 2013 included \$1.3 million related to the start-up of our Shoals facility and \$1.6 million related to corporate severance.

Interest Expense and Deferred Financing Costs

Interest expense and the amortization of deferred financing costs were \$0.8 million for the year ended December 31, 2013 compared to \$0.4 million for the year ended December 31, 2012. In addition to commitment fees on our revolving credit facility, letter of credit fees and amortization of deferred financing costs, 2013 results included non-cash imputed interest on a customer advance for leased railcars delivered for which revenue cannot be recognized until all contingencies have been resolved.

Income Taxes

The income tax benefit was \$5.5 million for the year ended December 31, 2013 compared to an income tax provision of \$13.8 million for the year ended December 31, 2012. The effective tax rates for the years ended December 31, 2013 and 2012, were 22.3% and 41.9%, respectively. The addition of our Shoals facility changed the mix of projected income from states in which we operate, resulting in changes in our estimated state tax apportionment and effective state tax rates. The income tax benefit for the year ended December 31, 2013 included a provision of \$2.2 million resulting from applying these changes in effective state tax rates on our deferred tax balances. Additionally, projected taxable income in certain states in which we operate may not be sufficient to realize the full value of net operating loss carryforwards. As a result, the income tax benefit for the year ended December 31, 2013 also included the recognition of a valuation allowance of \$2.3 million against deferred tax assets related to net operating loss carryforwards in certain states in which we operate. The effective tax rate for the year ended December 31, 2012 was higher than the statutory U.S. federal income tax rate of 35% primarily due the state tax provision based on a 5.4% blended state tax rate and a provision of \$1.4 million resulting from applying changes in state tax rates on our deferred tax balances, which was partially offset by a \$0.6 million benefit for tax-deductible goodwill. The changes in state tax rates resulted from changes in our estimated state tax apportionment and the expected timing of our utilization of state net operating loss carryforwards.

Net (Loss) Income Attributable to FreightCar America

Edgar Filing: FreightCar America, Inc. - Form 10-K

As a result of the foregoing, net loss attributable to FreightCar America was \$19.3 million for the year ended December 31, 2013 compared to net income of \$19.1 million for the year ended December 31, 2012. For 2013, our basic and diluted net loss per share were both \$1.61, on basic and diluted shares outstanding of 11,954,238. For 2012, our basic and diluted net income per share were both \$1.60, on basic and diluted shares outstanding of 11,932,926 and 11,969,367, respectively.

Table of Contents

Year Ended December 31, 2012 compared to Year Ended December 31, 2011

Revenues

Our consolidated revenues for the year ended December 31, 2012 were \$677.4 million compared to \$487.0 million for the year ended December 31, 2011. Manufacturing segment revenues for the year ended December 31, 2012 were \$644.0 million compared to \$453.1 million for the year ended December 31, 2011. The increase in Manufacturing segment revenues for 2012 compared to 2011 reflects a higher number of railcars delivered and higher average revenue per railcar. Our Manufacturing segment delivered 8,325 units, consisting of 5,487 new railcars, 441 used railcars, 1,400 rebuilt railcars and 997 railcars leased, for the year ended December 31, 2012, compared to 6,188 units, consisting of 5,745 new railcars, 79 used railcars sold and 364 leased railcars for the year ended December 31, 2011. Services segment revenues for the year ended December 31, 2012 were \$33.4 million compared to \$33.9 million for the year ended December 31, 2011. The slight decrease in Services segment revenues for 2012 compared to 2011 reflects lower repair volumes and an unfavorable repair and parts sales mix.

Gross Profit

Our consolidated gross profit for the year ended December 31, 2012 was \$65.0 million compared to \$31.9 million for the year ended December 31, 2011, representing an increase of \$33.1 million. The increase in our consolidated gross profit for the year ended December 31, 2012 compared to the year ended December 31, 2011 reflects an increase in gross profit from our Manufacturing segment of \$34.0 million, which was partially offset by a decrease in gross profit from our Services segment of \$0.8 million. The increase in gross profit for our Manufacturing segment for the year ended December 31, 2012 compared to the year ended December 31, 2011 is due to a higher number of railcars delivered and higher revenue per railcar during 2012, which were partially offset by unfavorable production variances related to production line changeover costs. The decrease in gross profit for our Services segment for the year ended December 31, 2012 compared to the year ended December 31, 2011 reflects lower parts sales volume, an unfavorable parts sales mix, an unfavorable repair work mix and increased operating costs in our repair business. Our consolidated gross margin rate was 9.6% for the year ended December 31, 2012 compared to 6.6% for the year ended December 31, 2011.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the year ended December 31, 2012 were \$32.7 million compared to \$28.7 million for the year ended December 31, 2011, representing an increase of \$4.0 million, or 14%. The increase reflects increases in compensation of \$2.6 million, external services costs of \$2.9 million and legal fees of \$0.5 million, which were partially offset by a decrease in product development costs of \$1.6 million. Manufacturing segment selling, general and administrative expenses were \$6.4 million for the year ended December 31, 2012 compared to \$6.0 million for the year ended December 31, 2011. Services segment selling, general and administrative expenses were \$3.9 million for the year ended December 31, 2012 compared to \$3.2 million for the year ended December 31, 2011. Corporate selling, general and administrative expenses for the year ended December 31, 2012 were \$22.4 million compared to \$19.5 million for the year ended December 31, 2011.

Gain on Sale of Railcars Available for Lease

Gain on sale of railcars available for lease for the year ended December 31, 2012 was \$1.0 million and represented the gain on sale of leased railcars with a net book value of \$10.4 million. Gain on sale of railcars available for lease for the year ended December 31, 2011 was \$2.2 million and represented the gain on sale of leased railcars with a net book value of \$9.2 million.

Operating Income (Loss)

Our consolidated operating income for the year ended December 31, 2012 was \$33.2 million, compared to \$5.5 million for the year ended December 31, 2011. Operating income for the Manufacturing segment was \$58.3 million for the year ended December 31, 2012 compared to \$25.9 million for the year ended December 31, 2011. The increase in operating income for our Manufacturing segment for the year ended December 31, 2012 compared to the year ended December 31, 2011 was due to a higher number of railcars delivered and higher revenue per railcar during 2012, which were partially offset by unfavorable production variances related to production line changeover costs and lower sales of railcars available for lease. Services segment operating income was \$2.1 million for the year ended December 31, 2012 compared to \$3.7 million for the year ended December 31, 2011. The decrease in

Table of Contents

operating income for our Services segment for the year ended December 31, 2012 compared to the year ended December 31, 2011 reflects lower parts sales volume, an unfavorable parts sales mix, an unfavorable repair work mix and increased operating costs in our repair business. Corporate costs were \$27.2 million for the year ended December 31, 2012 compared to \$24.1 million for the year ended December 31, 2011. The increase in Corporate costs was primarily due to increases in compensation and external services.

Interest Expense and Deferred Financing Costs

Interest expense (consisting of commitment fees on our revolving credit facility and letter of credit fees) and the amortization of deferred financing costs for the year ended December 31, 2012 were \$0.4 million compared to \$0.2 million for the year ended December 31, 2011. Increases in interest expense for 2012 resulted primarily from letter of credit fees.

Income Taxes

The income tax provision was \$13.8 million for the year ended December 31, 2012, compared to \$0.4 million for the year ended December 31, 2011. The effective tax rates for the years ended December 31, 2012 and 2011, were 41.9% and 6.7%, respectively. The effective tax rate for the year ended December 31, 2012 was higher than the statutory U.S. federal income tax rate of 35% primarily due the state tax provision based on a 5.4% blended state tax rate and a provision of \$1.4 million resulting from applying changes in state tax rates on our deferred tax balances partially offset by a \$0.6 million benefit for tax deductible goodwill. The changes in state tax rates resulted from changes in our estimated state tax apportionment and the expected timing of our utilization of state net operating loss carryforwards. The effective tax rate for the year ended December 31, 2011 was lower than the statutory U.S. federal income tax rate of 35% primarily due to a \$0.6 million benefit for tax-deductible goodwill and a benefit of \$1.7 million resulting from applying a change in statutory state tax rates and a change in the estimated state tax apportionment on our deferred tax balances.

Net Income (Loss) Attributable to FreightCar America

As a result of the foregoing, net income attributable to FreightCar America was \$19.1 million for the year ended December 31, 2012, reflecting an increase of \$14.2 million from \$4.9 million for the year ended December 31, 2011. For 2012, our basic and diluted net income per share were both \$1.60, on basic and diluted shares outstanding of 11,932,926 and 11,969,367, respectively. For 2011, our basic and diluted net income per share were both \$0.41, on basic and diluted shares outstanding of 11,916,292 and 11,962,196, respectively.

LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity for the years ended December 31, 2013 and 2012, were our cash provided by operations, cash and cash equivalent balances on hand, our securities held to maturity and our revolving credit facilities.

We entered into a new \$50.0 million senior secured revolving credit facility (the Revolving Credit Facility) pursuant to a Credit Agreement dated as of July 26, 2013 (the Credit Agreement) by and among us and certain of our subsidiaries, as borrowers, and Bank of America, N.A., as lender, and cancelled our previous credit facility. The Revolving Credit Facility can be used for general corporate purposes, including working capital. As of December 31, 2013, we had no borrowings under the Revolving Credit Facility. The Credit Facility Agreement also contains a sub-facility for letters of credit not to exceed the lesser of \$30.0 million and the amount of the senior secured revolving credit facility at such time. As of December 31, 2013, we had \$4.6 million in outstanding letters of credit

under the Revolving Credit Facility and therefore had \$45.4 million available for borrowing under the Revolving Credit Facility. The Credit Agreement has a term ending on July 26, 2016 and revolving loans outstanding thereunder will bear interest at a rate of LIBOR plus an applicable margin of 1.50% or at a base rate, as selected by us. Base rate loans will bear interest at the highest of (a) the federal funds rate plus 0.50%, (b) the prime rate or (c) LIBOR plus 1.00%. We are required to pay a non-utilization fee of between 0.10% and 0.30% on the unused portion of the revolving loan commitment depending on our quarterly average balance of unrestricted cash and our consolidated leverage ratio. Borrowings under the Revolving Credit Facility are secured by a first priority perfected security interest in substantially all of our and our subsidiaries' assets excluding railcars held by our railcar leasing subsidiary, JAIX. We also have pledged all of the equity interests in our direct and indirect domestic subsidiaries as security for the Revolving Credit Facility. The Credit Agreement has both affirmative and negative covenants, including, without limitation, a covenant requiring a minimum consolidated net liquidity of \$35.0 million and limitations on indebtedness, liens and investments. The Credit Agreement also provides for customary events of default.

Table of Contents

The Revolving Credit Facility replaces our prior revolving credit facility pursuant to a Loan and Security Agreement dated as of July 29, 2010 among FreightCar and certain of its subsidiaries, as borrowers, and Fifth Third Bank, as lender (the Prior Credit Agreement), which was terminated and cancelled effective July 26, 2013 and otherwise would have matured on July 29, 2013. As of December 31, 2012, we had no borrowings or outstanding letters of credit under the Prior Credit Agreement.

Our restricted cash and restricted certificates of deposit balance was \$7.8 million as of December 31, 2013 and \$14.7 million as of December 31, 2012, and consisted of cash and certificates of deposit used to collateralize standby letters of credit with respect to performance guarantees and to support our workers compensation insurance claims. The decrease in restricted cash balances as of December 31, 2013 compared to December 31, 2012 was a result of decreases in standby letters of credit with respect to performance guarantees and our corresponding obligation to collateralize them. The standby letters of credit outstanding as of December 31, 2013 are scheduled to expire at various dates through October 1, 2018. We expect to establish restricted cash balances and restricted certificates of deposit in future periods to minimize bank fees related to standby letters of credit.

As of December 31, 2013, the value of leased railcars (including inventory on lease and railcars available for lease) was \$53.1 million. We may continue to offer railcars for lease to certain customers and pursue opportunities to sell leased railcars in our portfolio.

Based on our current level of operations and known changes in planned volume based on our backlog, we believe that our proceeds from operating cash flows, our marketable securities and our cash balances, together with amounts available under our revolving credit facility, will be sufficient to meet our expected liquidity needs. Our long-term liquidity is contingent upon future operating performance and our ability to continue to meet financial covenants under our revolving credit facility and any other indebtedness. We may also require additional capital in the future to fund working capital as demand for railcars increases, organic growth opportunities, including new plant and equipment and development of railcars, joint ventures, international expansion and acquisitions, and these capital requirements could be substantial.

Our long-term liquidity needs also depend to a significant extent on our obligations related to our pension and welfare benefit plans. We provide pension and retiree welfare benefits to certain salaried and hourly employees upon their retirement. Benefits under our pension plans are now frozen and will not be impacted by increases due to future service. The most significant assumptions used in determining our net periodic benefit costs are the discount rate used on our pension and postretirement welfare obligations and expected return on pension plan assets. As of December 31, 2013, our benefit obligation under our defined benefit pension plans and our postretirement benefit plan was \$56.3 million and \$63.3 million, respectively, which exceeded the fair value of plan assets by \$0.8 million and \$63.3 million, respectively. We made contributions of \$0.2 million to our defined benefit pension plans during 2013. As disclosed in Note 12 to the consolidated financial statements, we expect to make contributions of \$0.3 million to our defined benefit pension plans in 2014. The Pension Protection Act of 2006 provides for changes to the method of valuing pension plan assets and liabilities for funding purposes as well as minimum funding levels. Our defined benefit pension plans are in compliance with the minimum funding levels established in the Pension Protection Act. Funding levels will be affected by future contributions, investment returns on plan assets, growth in plan liabilities and interest rates. Assuming that the plans are fully funded as that term is defined in the Pension Protection Act, we will be required to fund the ongoing growth in plan liabilities on an annual basis.

We made payments to our postretirement benefit plan of \$3.2 million during 2013. A substantial portion of our postretirement benefit plan obligation relates to an expired settlement agreement with the union representing employees at the Company's and its predecessors' Johnstown manufacturing facilities. The terms of that settlement agreement (the 2005 Settlement Agreement) required us to pay until November 30, 2012 certain monthly amounts

toward the cost of retiree health care coverage. We engaged in voluntary negotiations for two years in an effort to reach a consensual agreement related to the expired 2005 Settlement Agreement but no agreements were reached. We terminated, effective November 1, 2013, our contributions for medical coverage and life insurance benefits to affected retirees and are seeking declaratory relief to confirm our rights under the Employee Retirement Income Security Act of 1974, as amended, to reduce or terminate retiree medical coverage and life insurance benefits pursuant to the plans that were the subject of the 2005 Settlement Agreement. On July 9, 2013, the union and certain retiree defendants filed suit in the United States District Court for the Western District of Pennsylvania regarding the same dispute (see Note 15 to the Consolidated Financial Statements). The outcome of the pending litigation and the

Table of Contents

impact on our postretirement benefit plan obligation cannot be determined at this time. The Company's postretirement benefit plan obligation could significantly increase or decrease as a result of the litigation or if the parties agree to an alternative settlement agreement. We anticipate funding pension plan contributions and postretirement benefit plan payments with cash from operations and available cash.

Based upon our operating performance, capital requirements and obligations under our pension and welfare benefit plans, we may, from time to time, be required to raise additional funds through additional offerings of our common stock and through long-term borrowings. There can be no assurance that long-term debt, if needed, will be available on terms attractive to us, or at all. Furthermore, any additional equity financing may be dilutive to stockholders and debt financing, if available, may involve restrictive covenants. Our failure to raise capital if and when needed could have a material adverse effect on our results of operations and financial condition.

Contractual Obligations

The following table summarizes our contractual obligations as of December 31, 2013, and the effect that these obligations would be expected to have on our liquidity and cash flow in future periods:

Contractual Obligations	Total	Payments Due by Period			
		1 Year	2-3 Years	4-5 Years	After 5 Years
Operating leases	\$ 82,721	\$ 10,305	\$ 19,104	\$ 17,625	\$ 35,687
Material and component purchases	25,745	166	15,987	9,592	
Total	\$ 108,466	\$ 10,471	\$ 35,091	\$ 27,217	\$ 35,687

Material and component purchases consist of non-cancelable agreements with suppliers to purchase materials used in the manufacturing process. The estimated amounts above may vary based on the actual quantities and price.

The above table excludes \$3.7 million related to a reserve for uncertain tax benefits and accrued interest and penalties at December 31, 2013 because the timing of the payout of these amounts cannot be determined.

We are a party to letter agreements regarding terms of employment with our President and Chief Executive Officer, Vice President, Finance, Chief Financial Officer and Treasurer, General Counsel and Corporate Secretary and an employment agreement with our Senior Vice President, Human Resources. See Item 11. Executive Compensation.

We are also required to make minimum contributions to our pension and postretirement welfare plans as discussed above.

Cash Flows

The following table summarizes our net cash provided by or used in operating activities, investing activities and financing activities for the years ended December 31, 2013, 2012 and 2011:

(Amounts in thousands)

	2013	2012	2011
Net cash provided by (used in):			
Operating activities	\$ 32,243	\$ 53,002	\$ 29,969
Investing activities	(619)	(53,425)	10,193
Financing activities	15,373	(2,938)	(72)
Total	\$ 46,997	\$ (3,361)	\$ 40,090

Table of Contents

Operating Activities. Our net cash provided by or used in operating activities reflects net income or loss adjusted for non-cash charges and changes in operating assets and liabilities. Cash flows from operating activities are affected by several factors, including fluctuations in business volume, contract terms for billings and collections, the timing of collections on our contract receivables, processing of bi-weekly payroll and associated taxes, and payments to our suppliers. As some of our customers accept delivery of new railcars in train-set quantities of up to 120 to 135 railcars, variations in our sales lead to significant fluctuations in our operating profits and cash from operating activities. We do not usually experience business credit issues, although a payment may be delayed pending completion of closing documentation.

Our net cash provided by operating activities for the year ended December 31, 2013 was \$32.2 million compared to \$53.0 million for the year ended December 31, 2012. Our net cash provided by operating activities for the year ended December 31, 2013 included a customer deposit of \$89.3 million for railcars to be delivered in 2014, which was partially offset by changes in working capital and additions to the lease fleet. Our net cash provided by operating activities for the year ended December 31, 2012 primarily included net income from operations and changes in working capital. Our net cash provided by operating activities for the year ended December 31, 2011 included increases in account and contractual payables and customer deposits of \$15.4 million and \$14.4 million, respectively, and other working capital changes. The increase in account and contractual payables for the year ended December 31, 2011 primarily represents purchases of materials to support increased production levels.

Investing Activities. Net cash used in investing activities for the year ended December 31, 2013 was \$0.6 million compared to net cash used in investing activities of \$53.4 million for the year ended December 31, 2012. Net cash used in investing activities for the year ended December 31, 2013 included purchases of property plant and equipment of \$17.3 million, which were partially offset by maturities of securities (net of purchases) of \$3.0 million, changes in restricted cash and restricted certificates of deposit of \$6.9 million related to decreases in collateralization obligations with respect to letters of credit for performance guarantees and proceeds from the sale of railcars available for lease of \$6.7 million.

Net cash used in investing activities for the year ended December 31, 2012 included the purchase of securities of \$42.0 million, restricted cash deposits for collateralization of letters of credit of \$12.9 million and purchases of property, plant and equipment of \$9.1 million, which were partially offset by proceeds from the sale of railcars available for lease of \$10.5 million. The most significant investing activities for the year ended December 31, 2011 were the sale of railcars available for lease for \$11.7 million, which was partially offset by purchases of property, plant and equipment of \$1.8 million.

Financing Activities. Net cash provided by financing activities for the year ended December 31, 2013 was \$15.4 million compared to net cash used in financing activities of \$2.9 million for the year ended December 31, 2012. Net cash provided by financing activities for the year months ended December 31, 2013 included proceeds of a \$19.4 million customer advance for leased railcars delivered for which, in accordance with ASC 840, *Leases*, revenue cannot be recognized until all contingencies have been resolved, which was partially offset by advance repayments of \$0.9 million. Financing activities for each of the years ended December 31, 2013 and 2012, included \$2.9 million of cash dividends paid to our stockholders.

Capital Expenditures

Our capital expenditures were \$17.3 million for the year ended December 31, 2013 compared to \$9.1 million for the year ended December 31, 2012. Capital expenditures for 2013 were primarily purchases of equipment for our Shoals facility, which delivered its first railcars during the fourth quarter of 2013. Capital expenditures for 2012 were primarily cash outlays to enhance our capability to more efficiently produce a more diverse railcar product line in our

existing facilities. The first non-coal railcars manufactured using these enhanced capabilities were delivered in the fourth quarter of 2012.

Excluding unforeseen expenditures, management expects that total capital expenditures will be approximately \$10.0 million for 2014, including capital expenditures for our Shoals facility.

CRITICAL ACCOUNTING POLICIES

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States. The preparation of our financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of sales and expenses during the reporting period. Significant estimates include long-lived assets, goodwill, pension and postretirement benefit assumptions, the valuation reserve on net deferred tax assets, warranty accrual and contingencies and litigation. Actual results could differ from those estimates.

Table of Contents

Our critical accounting policies include the following:

Long-lived assets

We evaluate long-lived assets, including property, plant and equipment, under the provisions of ASC 360, *Property, Plant and Equipment*, which addresses financial accounting and reporting for the impairment of long-lived assets and for long-lived assets to be disposed of. For assets to be held or used, we group a long-lived asset or assets with other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. An impairment loss for an asset group reduces only the carrying amounts of a long-lived asset or assets of the group being evaluated. Our estimates of future cash flows used to test the recoverability of a long-lived asset group include only the future cash flows that are directly associated with and that are expected to arise as a direct result of the use and eventual disposition of the asset group. Our future cash flow estimates exclude interest charges.

We test long-lived assets for recoverability whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. These changes in circumstances may include a significant decrease in the market price of an asset group, a significant adverse change in the manner in or extent to which an asset group is used, a current year operating loss combined with a history of operating losses or a current expectation that, more likely than not, a long-lived asset group will be sold or otherwise disposed of significantly before the end of its previously estimated useful life. If indicators of impairment are present, we then determine if the carrying value of the asset group is recoverable by comparing the carrying value of the asset group to total undiscounted future cash flows of the asset group. If the carrying value of the asset group is not recoverable, an impairment loss is measured based on the excess of the carrying amount of asset group over the estimated fair value of the asset group.

Based on our backlog for coal car orders as of December 31, 2013 and given the soft current industry outlook, we are unable to predict when our Danville manufacturing facility will resume operations and therefore we tested the long-lived assets at our Danville facility for impairment as of December 31, 2013. The carrying values of property, plant and equipment at the Danville facility were reduced to their estimated fair market values, resulting in a pre-tax impairment charge of \$7.6 million for the year ended December 31, 2013. Fair market values were estimated using the market approach for items in which there is an active secondary market where recent sales of comparable assets exist. The market approach establishes value through analysis of recent sales of comparable property. An analysis is made of the differences between the comparable properties and the subject property, and the sales prices are correspondingly adjusted to arrive at indications of the subject property's value. In instances where market data was available but deemed too incomplete to apply a complete market approach, the market relationship data available was used to adjust the cost approach analysis. In instances where market data was unavailable the cost approach analysis was used. The cost approach recognizes that a prudent investor would not ordinarily pay more for an asset than the cost to replace it new. The first step is to estimate the reproduction/replacement cost new of an asset using current materials, prices and labor. The cost new is then reduced by the amount of depreciation resulting from physical deterioration, functional obsolescence and economic/external obsolescence that are inherent in the asset. The resulting depreciated replacement cost is an indication of the fair value of an asset providing all elements of depreciation are addressed.

Due to management's decision to close the Clinton maintenance and repair shop, we also evaluated the recoverability of its long-lived assets and as a result reduced the carrying values of property, plant and equipment to their estimated fair market values, resulting in a pre-tax charge of \$1.5 million for the year ended December 31, 2013. The estimated fair market values represent estimated salvage values of buildings, equipment and rail at the facility and the estimated sales value for the associated land.

We did not perform an impairment any analysis of long-lived assets during 2012 or 2011 because we did not identify any impairment indicators that we believe would have required long-lived assets at our facilities to be tested for recoverability during 2012 or 2011.

Table of Contents

Impairment of goodwill and intangible assets

We have recorded on our balance sheet both goodwill and intangible assets, which consist of patents and customer related intangibles. We assess the carrying value of goodwill for impairment as required by ASC 350, *Intangibles Goodwill and Other*, annually or more frequently whenever events occur and circumstances change indicating potential impairment. During our annual goodwill impairment assessment as of August 1, 2013, management estimated the value of our reporting units that carry goodwill using the income approach which indicates the fair value of a business based on the present value of the cash flows that the business can be expected to generate in the future and the market approach, which uses the price at which shares of similar companies are exchanged to estimate the fair value of a company's equity. Within the income approach, the discounted cash flow method was used, and within the market approach, the guideline company method was used. Fair value based on the income approach was given a 60% weighting and fair value based on the market approach was given a 40% weighting. During our annual goodwill impairment assessment for 2012 and 2011, management estimated the value of our reporting units using the discounted cash flow method.

Management determined that there are three reporting units for the purposes of testing goodwill: Manufacturing, Repairs and Maintenance and Parts. For each reporting unit with goodwill (Manufacturing with \$21.5 million and Repairs and Maintenance with \$0.6 million as of December 31, 2013), we concluded that the estimated fair value of each reporting unit's net assets exceeded the carrying value as of the dates of our impairment tests for 2013, 2012 and 2011. Additional steps, including an allocation of the estimated fair value to our assets and liabilities, would be necessary to determine the amount, if any, of goodwill impairment if the fair value of our net assets were less than their carrying value.

The discounted cash flow method involves management making estimates with respect to a variety of factors that will significantly impact the future performance of the business, including:

future railcar volume projections based on an industry-specific outlook for railcar demand;

estimated margins on railcar sales and maintenance and repair services;

estimated growth rate for selling, general and administrative costs;

future effective tax rate for our Company; and

weighted-average cost of capital (WACC) used to discount future performance of our Company.

Because these estimates form a basis for the determination of whether or not an impairment charge should be recorded, these estimates are considered to be critical accounting estimates.

We use industry data to estimate volume projections in our discounted cash flow method. We believe that this independent industry data is the best indicator of expected future performance assuming that we maintain a consistent market share, which management believes is supportable based on historical performance. Our estimated margins used in the discounted cash flow method are based primarily on historical margins. Management estimated a WACC

of 15% for our August 1, 2013 goodwill impairment valuation analyses for our Manufacturing reporting unit and 14% for our Repair and Maintenance reporting unit.

In addition to estimating the fair value of the net assets of our Manufacturing reporting unit using the discounted cash flow method in the base case scenario, we also estimated the fair value of the net assets in our Manufacturing reporting unit using the discounted cash flow method for alternate scenarios, including the impact of an increase in the selling, general and administrative cost growth rate by 50 basis points, a decrease in revenue or terminal growth rate by 50 basis points, a change in tax rate by 50 basis points or the impact of a 50 basis point increase in the WACC used in the discounted cash flow method. We compared the estimated fair value of the net assets in our Manufacturing reporting unit using the discounted cash flow method in the base case scenario to the alternate scenarios. Each of these alternate scenarios reduced the estimated fair value of the net assets in our Manufacturing reporting unit using the discounted cash flow method compared to the estimated fair value of the net assets in our Manufacturing reporting unit in the base case. However, in all scenarios, the estimated fair value of the net assets in our Manufacturing reporting unit exceeded the carrying value.

In addition to estimating the fair value of the net assets of our Repair and Maintenance reporting unit using the discounted cash flow method in the base case scenario, we also estimated the fair value of the net assets in our Repair and Maintenance reporting unit using the discounted cash flow method for alternate scenarios, including the impact of an increase in the selling, general and administrative cost growth rate by 50 basis points, a decrease in revenue or terminal growth rate by 50 basis points, a change in tax rate by 50 basis points or the impact of a 50 basis

Table of Contents

point increase in the WACC used in the discounted cash flow method. We compared the estimated fair value of the net assets in our Repair and Maintenance reporting unit using the discounted cash flow method in the base case scenario to the alternate scenarios. Each of these alternate scenarios reduced the estimated fair value of the net assets in our Repair and Maintenance reporting unit using the discounted cash flow method compared to the estimated fair value of the net assets in our Repair and Maintenance reporting unit in the base case. However, in all scenarios, the estimated fair value of the net assets in our Repair and Maintenance reporting unit exceeded the carrying value.

The guideline company method values a business by comparing the subject company to similar publicly traded companies. The application of the guideline company method consists of several steps including:

identifying the most similar publicly traded companies to the reporting unit;

reviewing financial and supplemental data, such as market prices and business descriptions for the selected companies;

calculating valuation multiples for the selected publicly traded guideline companies;

performing comparative analysis to select valuation multiples and then applying them to the financial data of the reporting unit to arrive at a preliminary indication of the value of the reporting units invested capital on a marketable, minority basis;

applying a control premium to the indicated equity values on a marketable, minority basis to arrive at the indicated value of common equity on a marketable, controlling basis; and

where appropriate making adjustments to add the appropriate balances related to cash and short-term investments, excess working capital and the benefits of net operating loss carryforwards.

Pensions and postretirement benefits

We provide pension and retiree welfare benefits to certain salaried and hourly employees upon their retirement. The most significant assumptions used in determining our net periodic benefit costs are the expected return on pension plan assets and the discount rate used to calculate the present value of our pension and postretirement welfare plan liabilities.

In 2013, we assumed that the expected long-term rate of return on pension plan assets on a plan by plan basis would range from 5.76% to 6.99%. As permitted under ASC 715 the assumed long-term rate of return on assets is applied to a calculated value of plan assets, which recognizes changes in the fair value of plan assets in a systematic manner over five years. This produces the expected return on plan assets that is included in our net periodic benefit cost. The difference between this expected return and the actual return on plan assets is deferred. The net deferral of past asset gains (losses) affects the calculated value of plan assets and, ultimately, future net periodic benefit cost. We review the expected return on plan assets annually and would revise it if conditions should warrant. A change of one hundred basis points in the expected long-term rate of return on plan assets would have the following effect:

	1% Increase	1% Decrease
	(in thousands)	
Effect on net periodic benefit cost	\$ (508)	\$ 508

At the end of each year, we determine the discount rate to be used to calculate the present value of our pension and postretirement welfare plan liabilities. The discount rate is an estimate of the current interest rate at which our pension liabilities could be effectively settled at the end of the year. In estimating this rate, we look to rates of return on high-quality, fixed-income investments that receive one of the two highest ratings given by a recognized ratings agency. At December 31, 2013, we determined this rate on our postretirement welfare plan to be 4.75%, an increase of 0.80% from the 3.95% rate used at December 31, 2012. At December 31, 2013, we determined this rate on our pension plans on a plan by plan basis with results ranging from 4.67% to 4.96%. A change of one hundred basis points in the discount rate would have the following effect:

Table of Contents

	1% Increase	1% Decrease
	(in thousands)	
Effect on net periodic benefit cost	\$ 117	\$ (229)

For the years ended December 31, 2013, 2012 and 2011, we recognized consolidated pre-tax pension cost of \$(0.5) million, \$(0.04) and \$(0.3) million, respectively. We currently expect to make contributions of \$0.3 million to our pension plans during 2014. However, we may elect to adjust the level of contributions based on a number of factors, including performance of pension investments and changes in interest rates. The Pension Protection Act of 2006 provided for changes to the method of valuing pension plan assets and liabilities for funding purposes as well as requiring minimum funding levels. Our defined benefit pension plans are in compliance with minimum funding levels established in the Pension Protection Act. Funding levels will be affected by future contributions, investment returns on plan assets, growth in plan liabilities and interest rates. Once the plan is fully funded as that term is defined within the Pension Protection Act, we will be required to fund the ongoing growth in plan liabilities on an annual basis. We anticipate funding pension contributions with cash from operations.

For the years ended December 31, 2013, 2012 and 2011, we recognized a consolidated pre-tax postretirement welfare benefit cost of \$3.6 million, \$3.7 million and \$3.8 million, respectively. A substantial portion of our postretirement benefit plan obligation relates to an expired settlement agreement with the union representing employees at the Company's and its predecessors' Johnstown manufacturing facilities. The terms of that settlement agreement (the 2005 Settlement Agreement) required us to pay until November 30, 2012 certain monthly amounts toward the cost of retiree health care coverage. We engaged in voluntary negotiations for two years in an effort to reach a consensual agreement related to the expired 2005 Settlement Agreement but no agreements were reached. The Company terminated, effective November 1, 2013, our contributions for medical coverage and life insurance benefits to affected retirees. On July 8, 2013, we filed a complaint seeking declaratory relief from the United States District Court for the Northern District of Illinois to confirm our right to reduce or terminate retiree medical coverage and life insurance benefits pursuant to our plans that were the subject of the 2005 Settlement Agreement and, on July 9, 2013, the union and certain retiree defendants filed suit in the United States District Court for the Western District of Pennsylvania regarding the same dispute (see Note 15 to the Consolidated Financial Statements). The outcome of the pending litigation and the impact on our postretirement benefit plan obligation cannot be determined at this time. The Company's postretirement benefit plan obligation could significantly increase or decrease as a result of the litigation or if the parties agree to an alternative settlement agreement.

Income taxes

We account for income taxes under the asset and liability method prescribed by ASC 740, *Income Taxes*. We provide for deferred income taxes based on differences between the book and tax bases of our assets and liabilities and for items that are reported for financial statement purposes in periods different from those for income tax reporting purposes. The deferred tax liability or asset amounts are based upon the enacted tax rates expected to apply to taxable income in the periods in which the deferred tax liability or asset is expected to be settled or realized.

Our income tax expense, deferred tax assets and liabilities and reserves for unrecognized tax benefits reflect our best assessment of estimated future taxes to be paid. Management judgment is required in developing our provision for income taxes, including the determination of deferred tax assets, liabilities and any valuation allowances recorded against the deferred tax assets. We record net deferred tax assets to the extent we believe these assets will more likely than not be realized. In evaluating whether it is more likely than not that our net deferred tax assets will be realized, we consider both positive and negative evidence including the reversal of existing taxable temporary differences, taxable income in prior carryback years if carryback is permitted under the tax law and such taxable income has not previously been used for carryback, future taxable income exclusive of reversing temporary differences and carryforwards based on near-term and longer-term projections of operating results and the length of the carryforward

period. We evaluate the realizability of our net deferred tax assets and assess the valuation allowance on a quarterly basis, adjusting the amount of such allowance, if necessary. Failure to achieve forecasted taxable income might affect the ultimate realization of the net deferred tax assets. Factors that may affect our ability to achieve sufficient forecasted taxable income include, but are not limited to, increased competition, a decline in sales or margins and loss of market share.

Table of Contents

At December 31, 2013, we had total net deferred tax assets of \$30.8 million. The railcar market has an established history of cyclicity based on significant swings in customer demand. Industry projections forecast this trend to continue. Although realization of our net deferred tax assets is not certain, management has concluded that, based on the positive and negative evidence considered, we will more likely than not realize the full benefit of the deferred tax assets except for our deferred tax assets in certain states in which we operate. At December 31, 2013, we had a valuation allowance of \$6.6 million against the tax benefit of net operating loss carryforwards in certain states in which we operate.

Product warranties

We warrant that new railcars produced by us will be free from defects in material and workmanship in normal use identified for a period of up to five years from the time of sale. With respect to parts and materials manufactured by others and incorporated by us in our products, such parts and materials are covered only by the warranty provided by the original manufacturer. We establish a warranty reserve at the time of sale to account for future warranty charges. The warranty reserve consists of two categories: assigned claims and unassigned claims. The unassigned warranty reserve is calculated based on historical warranty costs for the specific railcar types adjusted for estimated material price changes and other factors. Once a warranty claim is filed for railcars under warranty, the estimated cost to correct the defect is moved from the unassigned reserve to the assigned reserve and tracked separately.

Revenue recognition

We recognize revenues on new and rebuilt railcars when (1) individual cars are completed, (2) the railcars are accepted by the customer following inspection, (3) the risk for any damage or other loss with respect to the railcars passes to the customer and (4) title to the railcars transfers to the customer. We do not record any returns or allowances against sales. We value used railcars received at their estimated fair market value at the date of receipt less a normal profit margin.

We recognize service-related revenue from maintenance and repairs and inspections when all significant maintenance or repair or inspections services have been completed, quality accepted and delivery has occurred. We recognize revenue from parts sales when the risk of any damage or loss and title passes to the customer and delivery has occurred.

We recognize operating lease revenue on Inventory on Lease on a contractual basis and recognize operating lease revenue on Railcars Available for Lease on a straight-line basis over the life of the lease. We recognize revenue from the sale of Inventory on Lease on a gross basis in manufacturing sales and cost of sales if the manufacture of the railcars and the sales process is completed within 12 months. We recognize revenue from the sale of Railcars Available for Lease on a net basis as Gain (Loss) on Sale of Railcars Available for Lease since the sale represents the disposal of a long-term operating asset.

We recognize a loss when we have a contractual commitment to manufacture railcars at an estimated cost in excess of the contractual selling price.

RECENT ACCOUNTING PRONOUNCEMENTS

In February 2013, the FASB issued ASU 2013-02, *Comprehensive Income (Topic 220): Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income* (ASU 2013-02). ASU 2013-02 requires entities to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, entities are required to present, either on the face of the statement where net income is presented or in the

notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amounts are required to be reclassified to net income in their entirety in the same reporting period. For amounts that are not required to be reclassified in their entirety to net income, entities are required to cross-reference to other disclosure that provides additional detail on these amounts. This standard is effective prospectively for reporting periods beginning after December 15, 2012. The adoption of these changes had no impact on our consolidated financial position, results of operations or cash flows. (See Note 11 to the consolidated financial statements)

Table of Contents

FORWARD-LOOKING STATEMENTS

This annual report on Form 10-K contains certain forward-looking statements including, in particular, statements about our plans, strategies and prospects. We have used the words may, will, expect, anticipate, believe, and similar expressions in this prospectus to identify forward-looking statements. We have based these forward-looking statements on our current views with respect to future events and financial performance. Our actual results could differ materially from those projected in the forward-looking statements.

Our forward-looking statements are subject to risks and uncertainties, including:

- the cyclical nature of our business;
- the highly competitive nature of our industry;
- our reliance upon a small number of customers that represent a large percentage of our sales;
- the variable purchase patterns of our customers and the timing of completion, delivery and customer acceptance of orders;
- the availability and price of used railcars offered for sale and new or used railcars offered for lease;
- fluctuating costs of raw materials, including steel and aluminum, and delays in the delivery of raw materials;
- limitations on the supply of railcar components;
- our reliance on the sales of our coal cars;
- international economic and political risks to the extent we expand our sales of products and services internationally;
- the risk of lack of acceptance of our new railcar offerings by our customers;
- our reported backlog may not indicate what our future sales will be;
- potential significant warranty claims;
- our ability to successfully integrate our Shoals facility or any acquired business with our existing business;
- shortages of skilled labor;
- our ability to manage our health care and pension costs;
- risks relating to our relationship with our unionized employees and their unions;
- our ability to maintain relationships with our suppliers of railcar components;
- the cost of complying with environmental laws and regulations; and
- various covenants in the agreements governing our indebtedness that limit our management's discretion in the operation of our businesses.

Our actual results could be different from the results described in or anticipated by our forward-looking statements due to the inherent uncertainty of estimates, forecasts and projections and may be better or worse than anticipated. Given these uncertainties, you should not rely on forward-looking statements. Forward-looking statements represent our estimates and assumptions only as of the date that they were made. We expressly disclaim any duty to provide updates to forward-looking statements, and the estimates and assumptions associated with them, in order to reflect changes in circumstances or expectations or the occurrence of unanticipated events except to the extent required by applicable securities laws. All of the forward-looking statements are qualified in their entirety by reference to the factors discussed under Item 1A, Risk Factors.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

We have a \$50 million senior secured revolving credit facility, the proceeds of which can be used for general corporate purposes, including working capital. On an annual basis, a 1% change in the interest rate in our revolving credit facility will increase or decrease our interest expense by \$10,000 for every \$1.0 million of outstanding

borrowings. As of December 31, 2013, we had \$4.6 million in outstanding letters of credit under the Revolving Credit Facility and therefore had \$45.4 million available for borrowing under the Revolving Credit Facility.

The production of railcars and our operations require substantial amounts of aluminum and steel. The cost of aluminum, steel and all other materials (including scrap metal) used in the production of our railcars represents a significant majority of our direct manufacturing costs. Our business is subject to the risk of price increases and periodic delays in the delivery of aluminum, steel and other materials, all of which are beyond our control. Any fluctuations in the price or availability of aluminum or steel, or any other

Table of Contents

material used in the production of our railcars, may have a material adverse effect on our business, results of operations or financial condition. In addition, if any of our suppliers were unable to continue its business or were to seek bankruptcy relief, the availability or price of the materials we use could be adversely affected. When market conditions permit us to do so, we negotiate contracts with our customers that allow for variable pricing to protect us against future changes in the cost of raw materials. When raw material prices increase rapidly or to levels significantly higher than normal, we may not be able to pass price increases through to our customers, which could adversely affect our operating margins and cash flows.

We are not exposed to any significant foreign currency exchange risks as our general policy is to denominate foreign sales and purchases in U.S. dollars.

Item 8. Financial Statements and Supplementary Data.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

FreightCar America, Inc.

Chicago, Illinois

We have audited the accompanying consolidated balance sheets of FreightCar America, Inc. and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income (loss), stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2013. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of FreightCar, America, Inc. and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2013, based on the criteria established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 14, 2014 expressed an unqualified opinion on the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

FreightCar America, Inc.

Chicago, Illinois

We have audited the internal control over financial reporting of FreightCar America, Inc. and subsidiaries (the Company) as of December 31, 2013, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed by, or under the supervision of, the company s principal executive and principal financial officers, or persons performing similar functions, and effected by the company s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedule as of and for the year ended December 31, 2013 of the Company and our report dated March 14, 2014 expressed an unqualified opinion on those financial statements and financial statement schedule.

FreightCar America, Inc. and Subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the Years Ended December 31, 2013, 2012 and 2011

(in thousands, except for share and per share data)

Note 1 Description of the Business

FreightCar America, Inc. (FreightCar), operates primarily in North America through its direct and indirect subsidiaries, JAC Operations, Inc. (Operations), Johnstown America, LLC (JA LLC), Freight Car Services, Inc. (FCS), JAIX Leasing Company (JAIX), FreightCar Roanoke, LLC (FCR), FreightCar Mauritius Ltd. (Mauritius), FreightCar Rail Services, LLC (FCRS), FreightCar Rail Management Services, LLC (FCRMS), FreightCar Short Line, Inc. (Short Line) and FreightCar Alabama, LLC (FCAL) (herein collectively referred to as the Company), and manufactures freight cars, supplies railcar parts, leases freight cars and provides railcar maintenance, repairs and management. The Company designs and builds coal cars, bulk commodity cars, flat cars, mill gondola cars, intermodal cars, coil steel cars and motor vehicle carriers. The Company is headquartered in Chicago, Illinois and has facilities in the following locations: Cherokee, Alabama; Danville, Illinois; Lakewood, Colorado; Grand Island, Nebraska; Hastings, Nebraska; Johnstown, Pennsylvania; and Roanoke, Virginia.

The Company s operations comprise two reportable segments, Manufacturing and Services. The Company and its direct and indirect subsidiaries are all Delaware corporations or Delaware limited liability companies except Mauritius, which is incorporated in Mauritius. The Company s direct and indirect subsidiaries are all wholly owned.

Note 2 Summary of Significant Accounting Policies

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of FreightCar, Operations, JA LLC, FCS, JAIX, FCR, Mauritius, FCRS, FCRMS, Short Line and FCAL. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include the valuation of used railcars received in sale transactions, useful lives of long-lived assets, warranty, workers compensation accruals, pension and postretirement benefit assumptions, stock compensation, evaluation of goodwill, other intangibles and property, plant and equipment for impairment and the valuation allowance on the net deferred tax asset. Actual results could differ from those estimates.

Cash and Cash Equivalents

On a daily basis, cash in excess of current operating requirements is invested in various highly liquid investments. The Company considers all unrestricted short-term investments with maturities of three months or less when acquired to

be cash equivalents. The amortized cost of cash equivalents approximate fair value because of the short maturity of these instruments.

The Company's cash and cash equivalents are primarily deposited with two U.S. financial institutions. Such deposits are in excess of federally insured limits.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the Years Ended December 31, 2013, 2012 and 2011

(in thousands, except share and per share data)

Restricted Cash and Restricted Certificates of Deposit

The Company establishes restricted cash balances and restricted certificates of deposit to collateralize certain standby letters of credit with respect to purchase price payment guarantees and performance guarantees and to support the Company's worker's compensation insurance claims. The restrictions expire upon completing the Company's related obligation.

Financial Instruments

Management estimates that all financial instruments (including cash equivalents, restricted cash and restricted certificates of deposit, marketable securities, accounts receivable and accounts payable) as of December 31, 2013 and 2012, have fair values that approximate their carrying values.

Upon purchase, the Company categorizes debt securities as *securities held to maturity*, *securities available for sale* or *trading securities*. Debt securities that the Company has the positive intent and ability to hold to maturity are classified as *securities-held-to-maturity* and are reported at amortized cost adjusted for amortization of premium and accretion of discount on a level yield basis. Debt securities that are bought and held principally for the purpose of selling them in the near term are classified as *trading securities* and reported at fair value, with unrealized gains and losses included in earnings. Debt securities not classified as either held-to-maturity or trading securities are classified as *securities available for sale* and are reported at fair value, with unrealized gains and losses excluded from earnings and reported as a component of other comprehensive income, which is included in stockholders' equity, net of deferred taxes.

Fair Value Measurements

Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of assets and liabilities and the placement within the fair value hierarchy levels.

The Company classifies the inputs to valuation techniques used to measure fair value as follows:

- Level 1* Quoted prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2* Inputs other than quoted prices for Level 1 inputs that are either directly or indirectly observable for the asset or liability including quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are observable for the asset or liability, and inputs that are derived from observable market data by correlation

or other means.

Level 3 Unobservable inputs for the asset or liability, including situations where there is little, if any, market activity for the asset or liability.

Inventories

Inventories are stated at the lower of cost or market value. Cost is determined on a first-in, first-out basis and includes material, labor and manufacturing overhead. The Company's inventory consists of work in progress and finished goods for individual customer contracts, used railcars acquired upon trade-in and railcar parts retained for sale to external parties or use by FCRS when providing maintenance and repair services to customers.

Leased Railcars

The Company offers railcar leases to its customers at market rates with terms and conditions that have been negotiated with the customers. It is the Company's strategy to actively market these leased assets for sale to leasing

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

companies and financial institutions rather than holding them to maturity. If, as of the date of the initial lease, management determines that the sale of the leased railcars is probable, and transfer of the leased railcars is expected to qualify for recognition as a completed sale within one year, then the leased railcars are classified as current assets on the balance sheet (Inventory on Lease). In determining whether it is probable that the leased railcars will be sold within one year, management considers general market conditions for similar railcars and considers whether market conditions are indicative of a potential sales price that will be acceptable to the Company to sell the cars within one year. Inventory on Lease is carried at the lower of cost or market value and is not depreciated. At the one-year anniversary of the initial lease or such earlier date when management no longer believes the leased railcars will be sold within one year of the initial lease, the leased railcars are reclassified from current assets (Inventory on Lease) to long-term assets (Railcars Available for Lease). Railcars Available for Lease are depreciated over 40 years from the date the railcars are placed in service under the initial lease.

Property, Plant and Equipment

Property, plant and equipment are stated at acquisition cost less accumulated depreciation. Depreciation is provided using the straight-line method over the original estimated useful lives of the assets, which are as follows:

Description of Assets	Life
Buildings and improvements	15-40 years
Leasehold improvements	6-10 years
Machinery and equipment	3-7 years
Software	3-7 years

Maintenance and repairs are charged to expense as incurred, while major refurbishments and improvements are capitalized. The cost and accumulated depreciation of items sold or retired are removed from the property accounts and any gain or loss is recorded in the consolidated statement of operations upon disposal or retirement.

Long-Lived Assets

The Company tests long-lived assets for recoverability whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. These changes in circumstances may include a significant decrease in the market price of an asset group, a significant adverse change in the manner or extent in which an asset group is used, a current year operating loss combined with history of operating losses, or a current expectation that, more likely than not, a long-lived asset group will be sold or otherwise disposed of significantly before the end of its previously estimated useful life. The Company routinely evaluates its manufacturing footprint to assess its manufacturing capacity and cost of production in an effort to optimize production at its low-cost manufacturing facilities.

For assets to be held and used, the Company groups a long-lived asset or assets with other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. Estimates of future cash flows used to test the recoverability of a long-lived asset group include only the future cash flows that are directly associated with and that are expected to arise as a direct result of the use and eventual disposition of the asset group. Recoverability of the carrying value of the asset group is determined by comparing the carrying value of the asset group to total undiscounted future cash flows of the asset group. If the carrying value of the asset group is not recoverable, an impairment loss is measured based on the excess of the carrying amount of asset group over the estimated fair value of the asset group. An impairment loss for an asset group reduces only the carrying amounts of a long-lived asset or assets of the group being evaluated.

Research and Development

Costs associated with research and development are expensed as incurred and totaled approximately \$382, \$393 and \$1,957 for the years ended December 31, 2013, 2012 and 2011, respectively. Such costs are reported within selling, general and administrative expenses in the consolidated statements of operations.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the Years Ended December 31, 2013, 2012 and 2011

(in thousands, except share and per share data)

Goodwill and Intangible Assets

The Company assesses the carrying value of goodwill for impairment as required by ASC 350, *Intangibles – Goodwill and Other*, annually or more frequently whenever events occur and circumstances change indicating potential impairment. During its annual goodwill impairment assessment as of August 1, 2013, management estimated the value of the Company's reporting units that carry goodwill using the income approach, which indicates the fair value of a business based on the present value of the cash flows that the business can be expected to generate in the future, and the market approach, which uses the price at which shares of similar companies are exchanged to estimate the fair value of a company's equity. Within the income approach, the discounted cash flow method was used, and within the market approach, the guideline company method was used. Fair value based on the income approach was given a 60% weighting and fair value based on the Market Approach was given a 40% weighting. During its annual goodwill impairment assessment for 2012 and 2011, management estimated the value of the Company's reporting units using the discounted cash flow method. In 2012 the Company changed its goodwill assessment date from January 1, to August 1. Management concluded that the estimated fair value of the Company's reporting units exceeded the carrying value as of the dates of the Company's impairment tests for 2013, 2012 and 2011 and therefore no impairment charges were recorded.

Patents are amortized on a straight-line method over their remaining legal lives from the date of acquisition. Customer related intangible assets are amortized from the date of acquisition based on the estimated cash flows to be generated from the intangibles. The Company assesses the carrying value of patents and customer related intangible assets for impairment whenever events occur and circumstances change indicating potential impairment.

Income Taxes

For federal income tax purposes, the Company files a consolidated federal tax return. The Company also files state tax returns in states where the Company has operations. In conformity with ASC 740, *Income Taxes*, the Company provides for deferred income taxes on differences between the book and tax bases of its assets and liabilities and for items that are reported for financial statement purposes in periods different from those for income tax reporting purposes.

Management evaluates net deferred tax assets and provides a valuation allowance when it believes that it is more likely than not that some portion of these assets will not be realized. In making this determination, management evaluates both positive evidence, such as cumulative pre-tax income for previous years, the projection of future taxable income, the reversals of existing taxable temporary differences and tax planning strategies, and negative evidence, such as any recent history of losses and any projected losses. Management also considers the expiration dates of net operating loss carryforwards in the evaluation of net deferred tax assets. Management evaluates the realizability of the Company's net deferred tax assets and assesses the valuation allowance on a quarterly basis, adjusting the amount of such allowance as necessary.

Tax benefits related to uncertain tax positions taken or expected to be taken on a tax return are recorded when such benefits meet a more likely than not threshold. Otherwise, these tax benefits are recorded when a tax position has been effectively settled, which means that the appropriate taxing authority has completed its examination even though the statute of limitations remains open, or the statute of limitation expires. Interest and penalties related to uncertain tax positions are recognized as part of the provision for income taxes and are accrued beginning in the period that such interest and penalties would be applicable under relevant tax law until such time that the related tax benefits are recognized.

On September 13, 2013, the Department of the Treasury and the Internal Revenue Service issued final regulations regarding the deduction and capitalization of expenditures related to tangible property. The final regulations under Sections 162, 167 and 263(a) of the Internal Revenue Code of 1986 as amended, apply to amounts paid to acquire, produce or improve tangible property as well as dispositions of such property and are generally effective for tax years beginning on or after January 1, 2014. The Company has evaluated these regulations and determined that they will not have a material impact on its consolidated results of operations, cash flows or financial position.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the Years Ended December 31, 2013, 2012 and 2011

(in thousands, except share and per share data)

Product Warranties

The Company warrants that new railcars produced by it will be free from defects in material and workmanship under normal use identified for a period of up to five years from the time of sale. The Company also provides limited warranties with respect to certain rebuilt railcars. With respect to parts and materials manufactured by others and incorporated by the Company in its products, such parts and materials are covered only by the warranty provided by the original manufacturer. The Company establishes a warranty reserve at the time of sale to account for future warranty charges. The warranty reserve consists of two categories: assigned claims and unassigned claims. The unassigned warranty reserve is calculated based on historical warranty costs adjusted for estimated material price changes and other factors. Once a warranty claim is filed for railcars under warranty, the estimated cost to correct the defect is moved from the unassigned reserve to the assigned reserve and tracked separately.

Revenue Recognition

Revenues on new and rebuilt railcars are recognized when (1) individual cars are completed, (2) the railcars are accepted by the customer following inspection, (3) the risk for any damage or other loss with respect to the railcars passes to the customer and (4) title to the railcars transfers to the customer. There are no sales returns or allowances.

The Company recognizes service-related revenue from maintenance and repairs and inspections when all significant maintenance or repair or inspections services have been completed and quality accepted. The Company recognizes revenue from parts sales when the risk of any damage or loss and title passes to the customer and delivery has occurred.

The Company recognizes operating lease revenue on Inventory on Lease on a contractual basis and recognizes operating lease revenue on Railcars Available for Lease on a straight-line basis over the life of the lease. The Company recognizes revenue from the sale of Inventory on Lease on a gross basis in manufacturing sales and cost of sales if the manufacture of the railcars and the sales process is completed within 12 months. The Company recognizes revenue from the sale of Railcars Available for Lease on a net basis as Gain (Loss) on Sale of Railcars Available for Lease since the sale represents the disposal of a long-term operating asset.

The Company recognizes a loss when it has a contractual commitment to manufacture railcars at an estimated cost in excess of the contractual selling price.

The Company reports amounts billed to customers for shipping and handling as part of sales in accordance with ASC 605-45, *Revenue Recognition - Principal Agent Consideration*, and reports related costs in cost of sales.

Earnings Per Share

Basic earnings (loss) per share attributable to common shareholders is computed by dividing net income (loss) attributable to common shareholders by the weighted average common shares outstanding. The calculation of diluted

earnings per share includes the effect of any dilutive equity incentive instruments. The Company uses the treasury stock method to calculate the effect of outstanding dilutive equity incentive instruments, which requires the Company to compute total proceeds as the sum of (1) the amount the employee must pay upon exercise of the award, (2) the amount of unearned stock-based compensation costs attributed to future services and (3) the amount of tax benefits, if any, that would be credited to additional paid-in capital assuming exercise of the award. Equity incentive instruments for which the total employee proceeds from exercise exceed the average fair value of the same equity incentive instrument over the period have an anti-dilutive effect on earnings per share during periods with net income from continuing operations, and accordingly, the Company excludes them from the calculation.

Recent Accounting Pronouncements

In February 2013, the FASB issued ASU 2013-02, *Comprehensive Income (Topic 220): Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income* (ASU 2013-02). ASU 2013-02 requires entities to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, entities are required to present, either on the face of the statement where net income is presented or in

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amounts are required to be reclassified to net income in their entirety in the same reporting period. For amounts that are not required to be reclassified in their entirety to net income, entities are required to cross-reference to other disclosure that provides additional detail on these amounts. This standard is effective prospectively for reporting periods beginning after December 15, 2012. The adoption of these changes had no impact on the consolidated financial position, results of operations or cash flows of the Company. (See Note 11)

Note 3 Fair Value Measurements

The Company's current investment policy is to invest in cash, certificates of deposit, U.S. treasury securities, U.S. government agency obligations and money market funds invested in U.S. government securities. Investments as of December 31, 2013 have remaining maturities of up to eleven months.

The following table sets forth by level within the ASC 820 fair value hierarchy the Company's financial assets that were recorded at fair value on a recurring basis.

Recurring Fair Value Measurements	As of December 31, 2013				
		Level 1	Level 2	Level 3	Total
ASSETS:					
Cash equivalents	\$ 48	\$	\$	\$	\$ 48
U.S. treasury securities held to maturity	\$ 38,988	\$	\$	\$	\$ 38,988
Restricted certificates of deposit	\$ 4,605	\$	\$	\$	\$ 4,605

Recurring Fair Value Measurements	As of December 31, 2012				
		Level 1	Level 2	Level 3	Total
ASSETS:					
Cash equivalents	\$ 11,933	\$	\$	\$	\$ 11,933
U.S. treasury securities held to maturity	\$ 41,978	\$	\$	\$	\$ 41,978

Note 4 Inventories

Inventories, net of reserve for excess and obsolete items, consist of the following:

	December 31,	
	2013	2012
Work in progress	\$ 43,643	\$ 68,171

Edgar Filing: FreightCar America, Inc. - Form 10-K

Finished new railcars	16,798	
Used railcars acquired upon trade-in	105	105
Parts and service inventory	5,794	5,566
Total inventories	\$ 66,340	\$ 73,842

Inventory on the Company's consolidated balance sheets includes reserves of \$1,793 and \$1,565 relating to excess or slow-moving inventory for parts and work in progress at December 31, 2013 and 2012, respectively.

Note 5 Leased Railcars

Inventory on Lease at December 31, 2013 was \$16,955 and at December 31, 2012 was \$0. Railcars Available for Lease at December 31, 2013 was \$36,110 (cost of \$41,389 and accumulated depreciation of \$5,279) and at December 31, 2012 was \$43,435 (cost of \$48,234 and accumulated depreciation of \$4,799). The Company's lease utilization rate for railcars in its lease fleet was 100% at each of December 31, 2013 and December 31, 2012. Depreciation expense on leased railcars was \$1,169, \$1,267 and \$1,980 for the years ended December 31, 2013, 2012 and 2011, respectively.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

Leased railcars at December 31, 2013 are subject to lease agreements with external customers with terms of up to eight years and are accounted for as operating leases.

Future minimum rental revenues on leases at December 31, 2013 are as follows:

Year ending December 31, 2014	\$ 3,985
Year ending December 31, 2015	1,313
Year ending December 31, 2016	1,256
Year ending December 31, 2017	1,257
Year ending December 31, 2018	668
Thereafter	1,377
	\$ 9,856

Note 6 Restructuring and Impairment Charges

During the fourth quarter of 2013, the Company recorded restructuring and impairment charges of \$10,452 which are reported as a separate line item on the Company's consolidated statements of operations. These charges consisted of non-cash charges of \$7,592 related to the Company's idled Danville, Illinois manufacturing facility, \$1,620 related to the Company's closed railcar maintenance and repair shop in Clinton, Indiana, corporate severance charges of \$1,119 and other charges of \$121.

Although the Company is committed to maintaining its status as a market leader in coal car manufacturing and does not have plans to permanently close its Danville manufacturing facility, the current industry outlook for the coal car market remains soft. Based on the Company's backlog for coal car orders as of December 31, 2013 and given the soft current industry outlook, the Company is unable to predict when its Danville manufacturing facility will resume operations and therefore tested the long-lived assets at the Danville facility for impairment as of December 31, 2013. The carrying values of property, plant and equipment at the Danville facility were reduced to their estimated fair market values, resulting in non-cash impairment charges of \$7,024 for buildings and improvements and \$568 for machinery and equipment for the year ended December 31, 2013. Fair market values were estimated using the market approach for items in which there is an active secondary market where recent sales of comparable assets exist. In instances where market data was available but deemed too incomplete to apply a complete market approach, the market relationship data available was used to adjust the cost approach analysis. In instances where market data was unavailable the cost approach analysis was used.

As part of the Company's strategic initiative to improve the contribution of its Services business to the Company's results of operations, management evaluated the long-term profitability of each of its railcar maintenance and repair shops during the fourth quarter of 2013. As a result of this analysis the Company decided to close its underperforming

maintenance and repair shop in Clinton, Indiana. As a result of this decision the Company evaluated the recoverability of its long-lived assets and reduced the carrying values of property, plant and equipment to their estimated fair market values, resulting in non-cash impairment charges of \$1,113 for buildings and improvements, \$270 for machinery and equipment and \$131 for land for the year ended December 31, 2013. The estimated fair market values represent estimated salvage values of buildings, equipment and rail at the facility and the estimated sales value for the associated land. The Company also recorded a non-cash impairment charge of \$106 related to customer intangibles and recorded other charges of \$121 related to the Clinton closure during the fourth quarter of 2013.

The Company revised its Corporate management reporting structure as part of the leadership transition following the retirement of the Company's previous President and Chief Executive Officer during the fourth quarter of 2013, resulting in severance charges of \$1,119 being recorded during the fourth quarter of 2013. Severance payments will be made during 2014.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

The components of the restructuring and impairment charges for the year ended December 31, 2013, are as follows:

Impairment charge for Manufacturing segment land, building and equipment	\$ 7,592
Impairment charge for Services segment land, building and equipment	1,514
Impairment charge for Services segment customer intangibles	106
Employee severance as a result of Corporate restructuring	1,119
Other charges related to Services segment impairment	121
Total restructuring and impairment charges	\$ 10,452

Note 7 Property, Plant and Equipment

Property, plant and equipment consists of the following:

	December 31,	
	2013	2012
Land (including easements)	\$ 2,072	\$ 2,203
Buildings and improvements	11,076	25,192
Leasehold improvements	5,483	5,350
Machinery and equipment	42,115	36,672
Software	9,089	8,383
Cost of buildings and improvements, leasehold improvements, machinery and equipment	67,763	75,597
Less: Accumulated depreciation and amortization	(31,406)	(39,269)
Buildings and improvements, leasehold improvements, machinery and equipment, net of accumulated depreciation and amortization	36,357	36,328
Construction in process	967	812
Total property, plant and equipment	\$ 39,396	\$ 39,343

The table above reflects the impairment charges to property, plant and equipment described in Note 6. Depreciation expense for the years ended December 31, 2013, 2012 and 2011, was \$8,168, \$6,393 and \$6,208, respectively.

Note 8 Intangible Assets and Goodwill

Intangible assets consist of the following:

	December 31,	
	2013	2012
Patents	\$ 13,097	\$ 13,097
Accumulated amortization	(11,557)	(10,966)
Patents, net of accumulated amortization	1,540	2,131
Customer-related intangibles	1,194	1,300
Accumulated amortization	(362)	(213)
Customer-related intangibles, net of accumulated amortization	832	1,087
Total amortizing intangibles	\$ 2,372	\$ 3,218

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

	December 31,	
	2013	2012
Manufacturing segment goodwill	\$ 21,521	\$ 21,521
Services segment goodwill	607	607
Total goodwill	\$ 22,128	\$ 22,128

The fair value of customer-related intangibles was estimated using a discounted cash flow model which included assumptions concerning projected growth rates as well as historical customer attrition. Customer-related intangible assets are being amortized from the date of acquisition and have a remaining life of 17 years. Amortization expense related to customer intangibles, which is included in selling, general and administrative expenses, was \$149, \$149 and \$43 for the years ended December 31, 2013, 2012 and 2011, respectively. Customer-related intangibles in the table above reflect the impairment charges of \$106 described in Note 6.

Patents are being amortized on a straight-line method over their remaining legal life from the date of acquisition and have a weighted average remaining life of 3 years. Amortization expense related to patents, which is included in cost of sales, was \$591 for the year ended December 31, 2013 and \$590 for each of the years ended December 31, 2012 and 2011.

Estimated future intangible amortization at December 31, 2013 is as follows:

Year ending December 31, 2014	\$ 719
Year ending December 31, 2015	698
Year ending December 31, 2016	457
Year ending December 31, 2017	91
Year ending December 31, 2018	73
Thereafter	334
	\$ 2,372

Note 9 Product Warranties

Warranty terms are based on the negotiated railcar sales contracts. The Company typically warrants that new railcars produced by it will be free from defects in material and workmanship under normal use and service identified for a period of up to five years from the time of sale. The changes in the warranty reserve for the years ended December 31, 2013, 2012 and 2011, are as follows:

		December 31,	
	2013	2012	2011
Balance at the beginning of the year	\$ 7,625	\$ 7,795	\$ 7,932
Current year provision	480	2,502	1,696
Reductions for payments, costs of repairs and other	(1,046)	(543)	(717)
Adjustments to prior warranties	(102)	(2,129)	(1,116)
Balance at the end of the year	\$ 6,957	\$ 7,625	\$ 7,795

Adjustments to prior warranties includes changes in the warranty reserve for warranties issued in prior periods due to expiration of the warranty period, revised warranty cost estimates and other factors.

Note 10 Revolving Credit Facility

The Company entered into a new \$50,000 senior secured revolving credit facility (the **Revolving Credit Facility**) pursuant to a Credit Agreement dated as of July 26, 2013 (the **Credit Agreement**) by and among FreightCar and certain of its subsidiaries, as borrowers (together the **Borrowers**), and Bank of America, N.A., as lender, and cancelled its previous credit facility. The Revolving Credit Facility can be used for general corporate purposes, including working capital. As of December 31, 2013, the Company had no borrowings under the Revolving Credit

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

Facility. The Credit Agreement also contains a sub-facility for letters of credit not to exceed the lesser of \$30,000 and the amount of the senior secured revolving credit facility at such time. As of December 31, 2013, the Company had \$4,605 in outstanding letters of credit under the Revolving Credit Facility and therefore had \$45,395 available for borrowing under the Revolving Credit Facility. The Credit Agreement has a term ending on July 26, 2016 and revolving loans outstanding thereunder will bear interest at a rate of LIBOR plus an applicable margin of 1.50% or at a base rate, as selected by the Company. Base rate loans will bear interest at the highest of (a) the federal funds rate plus 0.50%, (b) the prime rate or (c) LIBOR plus 1.00%. The Company is required to pay a non-utilization fee of between 0.10% and 0.30% on the unused portion of the revolving loan commitment depending on the Company's quarterly average balance of unrestricted cash and the Company's consolidated leverage ratio. Borrowings under the Revolving Credit Facility are secured by a first priority perfected security interest in substantially all of the Borrowers assets excluding railcars held by its railcar leasing subsidiary, JAIX. The Borrowers also have pledged all of the equity interests in the Company's direct and indirect domestic subsidiaries as security for the Revolving Credit Facility. The Credit Agreement has both affirmative and negative covenants, including, without limitation, a covenant requiring a minimum consolidated net liquidity requirement of \$35,000 and limitations on indebtedness, liens and investments. The Credit Agreement also provides for customary events of default.

The Revolving Credit Facility replaces the Company's prior revolving credit facility pursuant to a Loan and Security Agreement dated as of July 29, 2010 among FreightCar and certain of its subsidiaries, as borrowers, and Fifth Third Bank, as lender (the "Prior Credit Agreement"), which was terminated and cancelled effective July 26, 2013.

As of December 31, 2012, the Company had no borrowings under the prior credit facility and therefore had \$30,000 available under the Prior Credit Agreement. The Company had no outstanding letters of credit under the Prior Credit Agreement as of December 31, 2012.

Note 11 Accumulated Other Comprehensive Income (Loss)

The changes in accumulated other comprehensive income (loss) consist of the following:

	Pre-Tax	Tax	Net of Tax
Year ended December 31, 2013			
Pension liability activity:			
Actuarial gain	\$ 10,168	\$ 3,582	\$ 6,586
Reclassification adjustment for amortization of net loss (pre-tax cost of sales of \$470 and selling, general and administrative expenses of \$54)	524	184	340
Postretirement liability activity:			
Actuarial gain	5,448	1,919	3,529
	612	216	396

Reclassification adjustment for amortization of net loss (pre-tax cost of sales of \$578 and selling, general and administrative expenses of \$34)

The components of accumulated other comprehensive loss consist of the following:

	December 31,	
	2013	2012
Unrecognized pension cost, net of tax of \$4,253 and \$8,020	\$ (6,478)	\$ (13,404)
Unrecognized postretirement cost, net of tax of \$5,406 and \$7,626	(8,654)	(12,735)
	\$ (15,132)	\$ (26,139)

Note 12 Employee Benefit Plans

The Company has qualified, defined benefit pension plans that were established to provide benefits to certain employees. These plans are frozen and participants are no longer accruing benefits. The Company also provides

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

certain postretirement health care benefits for certain of its salaried and hourly retired employees. Generally, employees may become eligible for health care benefits if they retire after attaining specified age and service requirements. These benefits are subject to deductibles, co-payment provisions and other limitations.

A substantial portion of the Company's postretirement benefit plan obligation relates to an expired settlement agreement with the union representing employees at the Company's and its predecessors' Johnstown manufacturing facilities. The terms of that settlement agreement (the 2005 Settlement Agreement) required the Company to pay until November 30, 2012 certain monthly amounts toward the cost of retiree health care coverage. The Company engaged in voluntary negotiations for two years in an effort to reach a consensual agreement related to the expired 2005 Settlement Agreement but no agreements were reached. The Company terminated, effective November 1, 2013, its contributions for medical coverage and life insurance benefits to affected retirees and is seeking declaratory relief to confirm the Company's rights under the Employee Retirement Income Security Act of 1974, as amended (ERISA), to reduce or terminate retiree medical coverage and life insurance benefits pursuant to the plans that were the subject of the 2005 Settlement Agreement. On July 9, 2013, the union and certain retiree defendants filed suit in the United States District Court for the Western District of Pennsylvania regarding the same dispute (see Note 15). The outcome of the pending litigation and the impact on the Company's postretirement benefit plan obligation cannot be determined at this time. The Company's recorded postretirement benefit plan obligation assumes for accounting purposes a continuation of those monthly payments after November 30, 2012 (as was permitted under the settlement). However, the Company's postretirement benefit plan obligation could significantly increase or decrease as a result of the litigation or if the parties agree to an alternative settlement agreement.

Generally, contributions to the plans are not less than the minimum amounts required under ERISA and not more than the maximum amount that can be deducted for federal income tax purposes. The plans' assets are held by independent trustees and consist primarily of equity and fixed income securities.

The changes in benefit obligation, change in plan assets and funded status as of December 31, 2013 and 2012, are as follows:

	Pension Benefits		Postretirement Benefits	
	2013	2012	2013	2012
Change in benefit obligation				
Benefit obligation Beginning of year	\$ 64,957	\$ 62,403	\$ 69,300	\$ 65,061
Service cost			73	64
Interest cost	2,526	2,899	2,627	3,020
Actuarial (gain) loss	(6,278)	4,853	(5,448)	6,054
Benefits paid	(4,864)	(5,198)	(3,240)	(4,899)

Edgar Filing: FreightCar America, Inc. - Form 10-K

Benefit obligation	End of year	56,341	64,957	63,312	69,300
Change in plan assets					
Plan assets	Beginning of year	52,788	48,350		
	Return on plan assets	7,437	7,054		
	Employer contributions	183	2,582	3,240	4,899
	Benefits paid	(4,864)	(5,198)	(3,240)	(4,899)
Plan assets at fair value	End of year	55,544	52,788		
Funded status of plans	End of year	\$ (797)	\$ (12,169)	\$ (63,312)	\$ (69,300)

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

	Pension Benefits		Postretirement Benefits	
	2013	2012	2013	2012
Amounts recognized in the Consolidated Balance Sheets				
Noncurrent assets	\$ 48	\$ 24	\$	\$
Current liabilities			(413)	(4,978)
Noncurrent liabilities	(845)	(12,193)	(62,899)	(64,322)
Net amount recognized at December 31	\$ (797)	\$ (12,169)	\$ (63,312)	\$ (69,300)

Amounts recognized in accumulated other comprehensive loss but not yet recognized in earnings at December 31, 2013 and 2012, are as follows:

	Pension Benefits		Postretirement Benefits	
	2013	2012	2013	2012
Net actuarial loss	\$ 10,731	\$ 21,424	\$ 13,535	\$ 19,595
Prior service cost			525	766
	\$ 10,731	\$ 21,424	\$ 14,060	\$ 20,361

The estimated net loss for the defined benefit pension plan that will be amortized from accumulated other comprehensive loss into net periodic benefit cost in 2014 is \$204. The estimated net loss and prior service cost for the postretirement benefit plan that will be amortized from accumulated other comprehensive loss into net periodic benefit cost in 2014 are \$353 and \$241, respectively.

Components of net periodic benefit cost for the years ended December 31, 2013, 2012 and 2011, are as follows:

	Pension Benefits			Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
Components of net periodic benefit cost						
Service cost	\$	\$	\$	\$ 73	\$ 64	\$ 55
Interest cost	2,526	2,899	3,136	2,627	3,020	3,211

Amortization of prior service cost		(241)		(241)
Total recognized in accumulated other comprehensive loss (gain)	\$ (10,692)	\$ (6,301)	\$ 742	\$ 5,439

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011**

(in thousands, except share and per share data)

The following benefit payments, which reflect expected future service, as appropriate, were expected to be paid as of December 31, 2013:

	Postretirement Benefits		
	Pension Benefits	Salaried Retirees	Hourly Retirees⁽¹⁾
2014	\$ 4,439	\$ 413	\$ 8,807
2015	4,166	426	8,807
2016	3,861	407	4,224
2017	3,602	399	4,093
2018	3,534	389	3,966
2019 through 2023	17,426	1,921	18,135

(1) The Company's recorded postretirement benefit plan obligation assumes a continuation of these benefit payments for accounting purposes only. However, because the Company's postretirement benefit plan obligation is currently subject to litigation the actual postretirement benefit payments for hourly retirees, if any, are unknown at this time.

The Company expects to make \$341 in contributions to its pension plans in 2014 to meet its minimum funding requirements.

The assumptions used to determine end of year benefit obligations are shown in the following table:

	Pension Benefits		Postretirement Benefits	
	2013	2012	2013	2012
Discount rates	4.91%	4.11%	4.75%	3.95%

The discount rate is determined using a yield curve model that uses yields on high quality corporate bonds (AA rated or better) to produce a single equivalent rate. The yield curve model excludes callable bonds except those with make-whole provisions, private placements and bonds with variable rates.

The assumptions used in the measurement of net periodic cost are shown in the following table:

	Pension Benefits			Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
Discount rate	4.11%	4.90%	5.36%	3.95%	4.80%	5.26%

Edgar Filing: FreightCar America, Inc. - Form 10-K

Expected return on plan assets 6.98% 7.28% 7.99% N/A N/A N/A
 As benefits under these postretirement healthcare plans have been capped, assumed health care cost trend rates have no effect on the amounts reported for the health care plans.

The Company's pension plans' weighted average asset allocations at December 31, 2013 and 2012, and target allocations for 2014, by asset category, are as follows:

Asset Category	Plan Assets at		Target
	December 31, 2013	December 31, 2012	Allocation 2014
Cash and cash equivalents	1%	1%	0% - 5%
Equity securities	64%	56%	45% - 65%
Fixed income securities	31%	39%	30% - 50%
Real estate	4%	4%	4% - 6%
	100%	100%	100%

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

The basic goal underlying the pension plan investment policy is to ensure that the assets of the plans, along with expected plan sponsor contributions, will be invested in a prudent manner to meet the obligations of the plans as those obligations come due under a broad range of potential economic and financial scenarios, maximize the long-term investment return with an acceptable level of risk based on such obligations, and broadly diversify investments across and within the capital markets to protect asset values against adverse movements in any one market. The Company's investment strategy balances the requirement to maximize returns using potentially higher return generating assets, such as equity securities, with the need to manage the risk of such investments with less volatile assets, such as fixed-income securities. Investment practices must comply with the requirements of ERISA and any other applicable laws and regulations. The Company, in consultation with its investment advisors, has determined a targeted allocation of invested assets by category and it works with its advisors to reasonably maintain the actual allocation of assets near the target.

The long term return on assets was estimated based upon historical market performance, expectations of future market performance for debt and equity securities and the related risks of various allocations between debt and equity securities. Numerous asset classes with differing expected rates of return, return volatility and correlations are utilized to reduce risk through diversification.

The Company's pension plan assets are invested in one mutual fund for each fund classification. The following table presents the fair value of pension plan assets classified under the appropriate level of the ASC 820 fair value hierarchy (see Note 2 for a description of the fair value hierarchy) as of December 31, 2013 and 2012:

Pension Plan Assets	As of December 31, 2013			
	Level 1	Level 2	Level 3	Total
Mutual funds:				
Fixed income fund	\$ 17,468	\$	\$	\$ 17,468
Large cap stock fund	21,575			21,575
Small cap stock fund	4,909			4,909
International fund	8,954			8,954
Real estate fund	2,306			2,306
Cash and cash equivalents	332			332
Total	\$ 55,544	\$	\$	\$ 55,544

Pension Plan Assets	As of December 31, 2012			
	Level 1	Level 2	Level 3	Total
Mutual funds:				

Edgar Filing: FreightCar America, Inc. - Form 10-K

Fixed income fund	\$ 20,562	\$	\$	\$ 20,562
Large cap stock fund	16,163			16,163
Small cap stock fund	5,442			5,442
International fund	7,663			7,663
Real estate fund	2,274			2,274
Cash and cash equivalents	684			684
Total	\$ 52,788	\$	\$	\$ 52,788

The Company also maintains qualified defined contribution plans, which provide benefits to their employees based on employee contributions and employee earnings, with discretionary contributions allowed. Expenses related to these plans were \$1,465, \$1,776 and \$1,409 for the years ended December 31, 2013, 2012 and 2011, respectively.

Note 13 Income Taxes

The (benefit) provision for income taxes for the periods indicated includes current and deferred components as follows:

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

	Year Ended December 31,		
	2013	2012	2011
Current taxes			
Federal	\$	\$ 653	\$ 6
State	14	2,371	754
	14	3,024	760
Deferred taxes			
Federal	(11,554)	8,755	1,870
State	5,833	1,665	(2,552)
	(5,721)	10,420	(682)
Interest expense, gross of related tax effects	170	327	276
Total	\$ (5,537)	\$ 13,771	\$ 354

The (benefit) provision for income taxes for the periods indicated differs from the amounts computed by applying the federal statutory rate as follows:

	Year Ended December 31,		
	2013	2012	2011
Statutory U.S. federal income tax rate	(35.0)%	35.0%	35.0%
State income taxes, net of federal tax benefit	(2.5)%	5.4%	3.4%
Valuation allowance	9.0%	(2.0)%	3.8%
Goodwill	(3.4)%	(1.8)%	(11.5)%
Nondeductible expenses	0.4%	0.6%	2.9%
State rate and other changes on deferred taxes	8.8%	4.9%	(31.1)%
Uncertain tax positions	0.4%	0.1%	2.8%
Other		(0.3)%	1.4%
Effective income tax rate	(22.3)%	41.9%	6.7%

Deferred income taxes result from temporary differences in the financial and tax basis of assets and liabilities. Components of deferred tax assets (liabilities) consisted of the following:

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

Description	December 31, 2013		December 31, 2012	
	Assets	Liabilities	Assets	Liabilities
Accrued postretirement and pension benefits long-term	\$ 23,055	\$	\$ 31,656	\$
Intangible assets		(2,480)		(2,263)
Accrued workers compensation costs	1,067		1,059	
Accrued warranty costs	3,072		3,515	
Accrued rent	957			
Accrued bonuses			1,273	
Accrued vacation	633		657	
Accrued contingencies	1,316		2,981	
Accrued severance	490		294	
Inventory valuation	3,102		1,784	
Property, plant and equipment and railcars on operating leases		(12,396)		(17,810)
Deferred revenue	1,077			
Net operating loss carryforwards	14,059		9,804	
Credit carryforward	709		722	
Stock-based compensation expense	2,506		2,084	
Other	224			(155)
	52,267	(14,876)	55,829	(20,228)
Valuation allowance	(6,616)		(4,582)	
Deferred tax assets (liabilities)	\$ 45,651	\$ (14,876)	\$ 51,247	\$ (20,228)
Increase (decrease) in valuation allowance	\$ 2,034		\$ (1,489)	

In the consolidated balance sheets, these deferred tax assets and liabilities are classified as current or noncurrent, based on the classification of the related asset or liability for financial reporting. A deferred tax asset or liability that is not related to an asset or liability for financial reporting, including deferred tax assets related to carryforwards, is classified according to the expected reversal date of the temporary differences as of the end of the year. A valuation allowance is provided when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The railcar market has an established history of cyclicalities based on significant swings in customer demand. Industry projections forecast this trend to continue, with the decrease in demand in 2013 to be followed by a recovery in demand continuing for several years. Although realization of our net deferred assets is not certain, management has concluded that, based on the positive and negative evidence considered and the expected improvement in railcar demand and, therefore, operating results, we will more likely than not realize the full benefit of the deferred tax assets

except for our deferred tax assets in certain states. The Company has certain pretax state net operating loss carryforwards of \$117,634, which will expire between 2015 and 2033, of which \$103,608 have a full valuation allowance recorded. In addition to the state valuation allowances, the Company has also provided a full valuation allowance against net operating losses associated with the foreign jurisdictions in which it operates. The losses associated with these jurisdictions will begin to expire in 2014. The Company has federal net operating loss carryforwards of \$20,702 which will expire between 2030 and 2033.

A reconciliation of the beginning and ending gross amounts of unrecognized tax benefits for the years ended December 31, 2013, 2012 and 2011, were as follows:

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

	2013	2012	2011
Beginning of year balance	\$ 2,172	\$ 2,225	\$ 2,144
Increases in prior period tax positions			92
Decreases in prior period tax positions			(11)
Decreases relating to expiring statutes of limitations		(53)	
End of year balance	\$ 2,172	\$ 2,172	\$ 2,225

The total estimated unrecognized tax benefit that, if recognized, would affect the Company's effective tax rate was approximately \$1,924, \$1,924 and \$1,978 as of December 31, 2013, 2012 and 2011, respectively. Due to the nature of the Company's unrecognized tax benefits, the Company does not expect changes in its unrecognized tax benefit reserve in the next twelve months to have a material impact on its financial statements. The Company's income tax provision included \$96 of expense (net of a federal tax benefit of \$75), \$82 of expense (net of a federal tax benefit of \$69) and \$95 of expense (net of a federal tax benefit of \$74) related to interest and penalties for the years ended December 31, 2013, 2012 and 2011, respectively. The Company records interest and penalties within tax (benefit) expense. Such expenses brought the balance of accrued interest and penalties to \$1,745, \$1,575 and \$1,424 at December 31, 2013, 2012 and 2011, respectively.

The Company and/or its subsidiaries file income tax returns with the U.S. Federal government and in various state and foreign jurisdictions. A summary of tax years that remain subject to examination is as follows:

Jurisdiction	Earliest Year Open To Examination
U.S. Federal	2010
States:	
Pennsylvania	2000
Texas	2008
Illinois	2009
Virginia	2010
Colorado	2010
Indiana	2010
Nebraska	2010
Foreign:	
India	2008
Mauritius	2009

Note 14 Stock-Based Compensation

The Company's incentive compensation plan, titled "The 2005 Long Term Incentive Plan" (as restated to incorporate all amendments, the "Incentive Plan"), was approved by the Company's board of directors and ratified by the stockholders. The Incentive Plan is intended to provide incentives to attract, retain and motivate employees and directors, to provide for competitive compensation opportunities, to encourage long-term service, to recognize individual contributions and reward achievement of performance goals. The Company believes that the Incentive Plan promotes the creation of long-term value for its stockholders by better aligning the interests of its employees and directors with those of its stockholders. The Incentive Plan provides for the grant to eligible persons of stock options, share appreciation rights, or SARs, restricted shares, restricted share units, or RSUs, performance shares, performance units, dividend equivalents and other share-based awards, referred to collectively as the awards. Option awards generally vest based on one to three years of service and have 10 year contractual terms. Share awards generally vest over one to three years. Certain option and share awards provide for accelerated vesting if there is a change in control (as defined in the Incentive Plan). The Incentive Plan will terminate as to future awards on May 17, 2023. Under the Incentive Plan, 2,459,616 shares of common stock have been reserved for issuance (from either authorized but unissued shares or treasury shares), of which 1,128,676 were available for issuance at December 31, 2013.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

The Company recognizes stock-based compensation expense for stock option awards based on the fair value of the award on the grant date using the Black-Scholes option valuation model. Expected life in years for all stock options awards was determined using the simplified method. The Company believes that it is appropriate to use the simplified method in determining the expected life for options because the Company does not have sufficient historical exercise data to provide a reasonable basis upon which to estimate the expected term for stock options and due to the limited number of stock option grants to date. Expected volatility was based on the historical volatility of the Company's stock. The risk-free interest rate was based on the U.S. Treasury bond rate for the expected life of the option. The expected dividend yield was based on the latest annualized dividend rate and the current market price of the underlying common stock on the date of the grant. The Company recognizes stock-based compensation for restricted stock awards over the vesting period based on the fair market value of the stock on the date of the award, calculated as the average of the high and low trading prices for the Company's common stock on the award date.

Grant date fair values of stock option awards were estimated using the Black-Scholes option valuation model with the following assumptions:

Grant Year	Grant Date	Expected Life	Expected Volatility	Expected Dividend Yield	Risk Free Interest Rate	Grant Date Fair Value Per Share
2013	1/14/2013	6 years	51.36%	0.98%	0.78%	\$ 10.70
2013	1/18/2013	6 years	51.38%	0.99%	0.77%	\$ 10.82
2013	5/1/2013	6 years	51.43%	1.19%	0.65%	\$ 8.79
2013	10/4/2013	6 years	51.46%	1.17%	1.41%	\$ 9.03
2012	1/12/2012	6 years	50.86%	0%	0.84%	\$ 11.23
2011	1/13/2011	6 years	49.74%	0%	1.93%	\$ 14.61
2011	10/3/2011	6 years	49.83%	0%	0.87%	\$ 6.61

Stock-based compensation expense of \$2,289, \$1,703 and \$2,189 is included within selling, general and administrative expense for the years ended December 31, 2013, 2012 and 2011, respectively. The total income tax benefit recognized on the consolidated statements of operations for share-based compensation arrangements was \$806, \$653 and \$827 for the years ended December 31, 2013, 2012 and 2011, respectively.

A summary of the Company's stock options activity and related information at December 31, 2013 and 2012, and changes during the years then ended, is presented below:

Edgar Filing: FreightCar America, Inc. - Form 10-K

	Options Outstanding	Weighted- Average Exercise Price (per share)	Options Outstanding	Weighted- Average Exercise Price (per share)
Outstanding at the beginning of the year	553,248	\$ 23.79	440,780	\$ 24.20
Granted	176,710	22.75	179,500	23.40
Exercised	(11,498)	16.82		
Forfeited or expired	(56,412)	25.76	(67,032)	25.48
Outstanding at the end of the year	662,048	\$ 23.46	553,248	\$ 23.79
Exercisable at the end of the year	418,858	\$ 23.49	325,917	\$ 23.23

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

The weighted-average grant-date fair value per share of stock options granted during the years ended December 31, 2013, 2012 and 2011, was \$10.04, \$11.23 and \$13.98, respectively.

A summary of the Company's stock options outstanding as of December 31, 2013 is presented below:

	Options Outstanding	Weighted- Average Remaining Contractual Term (in years)	Weighted- Average Exercise Price (per share)	Aggregate Intrinsic Value
Options outstanding	662,048	7.3	\$ 23.46	\$ 2,699
Vested or expected to vest	645,849	7.2	\$ 23.45	\$ 2,655
Options exercisable	418,858	6.4	\$ 23.49	\$ 1,844

The intrinsic value of stock options exercised during the year ended December 31, 2013 was \$72. Cash received from exercise of stock options during the year ended December 31, 2013 was \$193. There were no stock options exercised during the year ended December 31, 2012. As of December 31, 2013, there was \$1,466 of total unrecognized compensation expense related to nonvested options, which will be recognized over the remaining requisite service period of 33 months.

A summary of the Company's nonvested restricted shares as of December 31, 2013 and 2012, and changes during the years then ended is presented below:

	December 31, 2013		2012	
	Shares	Weighted- Average Grant Date Fair Value (per share)	Shares	Weighted- Average Grant Date Fair Value (per share)
Nonvested at the beginning of the year	40,275	\$ 22.70	28,526	\$ 27.06
Granted	72,635	22.47	32,982	21.37
Vested	(28,777)	22.77	(19,365)	26.55
Forfeited	(9,986)	23.05	(1,868)	25.72
Nonvested at the end of the year	74,147	\$ 22.40	40,275	\$ 22.70

Expected to vest	67,118	\$	21.98	35,900	\$	22.28
------------------	--------	----	-------	--------	----	-------

The weighted-average grant-date fair value per share of stock awards granted during the years ended December 31, 2013, 2012 and 2011, was \$22.47, \$21.37 and \$29.30, respectively. The fair value of stock awards vested during the years ended December 31, 2013, 2012 and 2011, was \$612, \$425 and \$566, respectively, based on the value at vesting date. As of December 31, 2013, there was \$894 of total unrecognized compensation expense related to nonvested restricted stock awards, which will be recognized over the average remaining requisite service period of 31 months.

Note 15 Risks and Contingencies

The Company is involved in various warranty and repair claims and, in certain cases, related pending and threatened legal proceedings with its customers in the normal course of business. In the opinion of management, the Company's potential losses in excess of the accrued warranty and legal provisions, if any, are not expected to be material to the Company's consolidated financial condition, results of operations or cash flows.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the Years Ended December 31, 2013, 2012 and 2011

(in thousands, except share and per share data)

On July 8, 2013, the Company filed a Complaint for Declaratory Judgment (the *Complaint*) in the United States District Court for the Northern District of Illinois, Eastern Division (the *Illinois Court*). The case names as defendants the United Steel, Paper & Forestry, Rubber, Manufacturing, Energy, Allied Industrial & Services Workers International Union, AFL-CIO, CLC (the *USW*), as well as approximately 650 individual Retiree Defendants (as defined in the *Complaint*), and was assigned Case No 1:13-cv-4889.

As described in the *Complaint*, pursuant to the 2005 Settlement Agreement among the Company, the USW and the Retiree Defendants, the Company agreed to make certain levels of contributions to medical coverage for the Retiree Defendants and to continue to provide life insurance benefits at their amount at that time under certain of the Company's employee welfare benefit plans. The 2005 Settlement Agreement expressly provided that, as of November 30, 2012, the Company could cease making these contributions. In June 2011, the Company and the USW began discussing the possibility of an extension beyond November 30, 2012 for the Company's contributions to retiree medical coverage and life insurance benefits at a reduced amount and on other mutually acceptable terms. The Company engaged in voluntary negotiations for two years with the USW and counsel for the Retiree Defendants in an effort to reach a consensual agreement regarding such medical and life insurance benefits, but the parties were unable to reach a final agreement. The Company terminated, effective November 1, 2013, its contributions for medical coverage provided to the Retiree Defendants and the provision of life insurance benefits and is seeking declaratory relief to confirm its rights under the Employee Retirement Income Security Act of 1974, as amended, to reduce or terminate retiree medical coverage and life insurance benefits pursuant to the plans that were the subject of the 2005 Settlement Agreement.

On July 9, 2013, the USW and certain Retiree Defendants (collectively, the *Pennsylvania Plaintiffs*) filed a putative class action in the United States District Court for the Western District of Pennsylvania (the *Pennsylvania Court*), captioned as *Zanghi, et al. v. FreightCar America, Inc., et al.*, Case No. 3:13-cv-146. The complaint filed with the *Pennsylvania Court* alleges that the Company does not have the right to terminate welfare benefits previously provided to the Retiree Defendants and requests, among other relief, entry of a judgment finding that the Retiree Defendants have a vested right to specified welfare benefits.

On July 26, 2013, the *Pennsylvania Plaintiffs* filed with the *Illinois Court* a Motion to Dismiss Pursuant to Fed. R. Civ. P. 12(b) or in the Alternative, to Transfer Pursuant to 28 U.S.C. 1404(a), as well as a Motion to Stay and/or Prevent Plaintiff from Obtaining Defaults against the Retiree Defendants. On August 5, 2013, the Company filed with the *Pennsylvania Court* a Motion to Dismiss Pursuant to Fed. R. Civ. P. 12(b) or in the Alternative, to Transfer Pursuant to 28 U.S.C. 1404(a). On January 14, 2014, the *Pennsylvania Court* denied the Company's motion to dismiss, and on January 16, 2014, the *Illinois Court* transferred the Company's case to the *Pennsylvania Court*. On January 31, 2014, the Company filed a motion to consolidate both cases before the *Pennsylvania Court*. The *Pennsylvania Court* has not yet ruled on this motion.

On September 5, 2013, the *Pennsylvania Plaintiffs* and certain putative class representatives filed a *Plaintiffs' Motion for Temporary Restraining Order and Preliminary Injunction* (the *TRO Motion*) with the *Pennsylvania Court*. In the *TRO Motion*, the plaintiffs requested that the *Pennsylvania Court* enter an injunction requiring the Company to

continue to make monthly contributions at the same rate established by the 2005 Settlement Agreement until the parties' dispute is fully adjudicated on the merits. The Pennsylvania Court has not yet ruled on the TRO Motion.

On February 18, 2014, the Pennsylvania Plaintiffs filed a motion with the Pennsylvania Court seeking summary judgment as to the Company's liability. The Company filed a procedural motion in opposition to the summary judgment motion. The Pennsylvania Court has not yet ruled as to whether the summary judgment motion may proceed at this juncture in the case.

The Company has recorded postretirement benefit plan obligations, a substantial portion of which relates to the dispute now before the Illinois Court and the Pennsylvania Court (see Note 12).

On September 29, 2008, Bral Corporation, a supplier of certain railcar parts to the Company, filed a complaint against the Company in the U.S. District Court for the Western District of Pennsylvania (the "Pennsylvania Lawsuit"). The complaint alleged that the Company breached an exclusive supply agreement with Bral by

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

purchasing parts from CMN Components, Inc. (CMN) and sought damages in an unspecified amount, attorneys' fees and other legal costs. On December 14, 2007, Bral sued CMN in the U.S. District Court for the Northern District of Illinois, alleging among other things that CMN interfered in the business relationship between Bral and the Company (the Illinois Lawsuit) and seeking damages in an unspecified amount, attorneys' fees and other legal costs. On October 22, 2008, the Company entered into an Assignment of Claims Agreement with CMN under which CMN assigned to the Company its counterclaims against Bral in the Illinois Lawsuit and the Company agreed to defend and indemnify CMN against Bral's claims in that lawsuit. On March 4, 2013, Bral Corporation and the Company agreed to settle the Illinois Lawsuit and the Pennsylvania Lawsuit. The settlement resulted in a \$3,884 reduction in litigation reserves, which favorably impacted the Company's results of operations for the year ended December 31, 2013.

In addition to the foregoing, the Company is involved in certain other pending and threatened legal proceedings, including commercial disputes and workers' compensation and employee matters arising out of the conduct of its business. While the ultimate outcome of these other legal proceedings cannot be determined at this time, it is the opinion of management that the resolution of these other actions will not have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Note 16 Other Commitments

The Company leases certain property and equipment under long-term operating leases expiring at various dates through 2024. The leases generally contain specific renewal options at lease-end at the then fair market amounts.

Future minimum lease payments at December 31, 2013 are as follows:

2014	\$ 10,305
2015	10,019
2016	9,085
2017	8,775
2018	8,850
Thereafter	35,687
	\$ 82,721

The Company is liable for maintenance, insurance and similar costs under most of its leases and such costs are not included in the future minimum lease payments. Total rental expense for the years ended December 31, 2013, 2012 and 2011, was approximately \$8,893, \$3,306 and \$2,812, respectively.

The Company is party to certain non-cancelable fixed price agreements to purchase fixed amounts of materials used in the manufacturing process. These purchase commitments are typically entered into after a customer places an order

Edgar Filing: FreightCar America, Inc. - Form 10-K

for railcars and at December 31, 2013, these purchase commitments totaled \$166. The Company expects to take delivery of such materials during 2014.

In addition, the Company has other non-cancelable agreements with its suppliers to purchase certain materials used in the manufacturing process. The commitments may vary based on the actual quantities ordered and be subject to the actual price when ordered. At December 31, 2013, the Company had purchase commitments under these agreements as follows:

2014	\$
2015	6,395
2016	9,592
2017	9,592
2018	
Thereafter	
	\$ 25,579

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

Purchases related to these agreements were approximately \$19,273, \$30,467 and \$14,956 for the years ended December 31, 2013, 2012 and 2011, respectively.

Note 17 Earnings Per Share

The weighted average common shares outstanding are as follows:

	Year Ended December 31,		
	2013	2012	2011
Weighted average common shares outstanding	11,954,238	11,932,926	11,916,292
Dilutive effect of employee stock options and restricted share awards		36,441	45,904
Weighted average diluted common shares outstanding	11,954,238	11,969,367	11,962,196

Weighted average diluted common shares outstanding include the incremental shares that would be issued upon the assumed exercise of stock options and the assumed vesting of nonvested share awards. Company had a net loss for the year ended December 31, 2013, all stock options and shares of nonvested share awards were anti-dilutive and not included in the above calculation for that period. For the years ended December 31, 2013, 2012 and 2011, 737,473, 413,469 and 442,656 shares, respectively, were not included in the weighted average common shares outstanding calculation as they were anti-dilutive.

Note 18 Revenue Sources and Concentration of Sales

The following table sets forth the Company's sales resulting from various revenue sources for the periods indicated below:

	Year Ended December 31,		
	2013	2012	2011
New railcar revenues	\$ 103,543	\$ 565,244	\$ 444,810
Rebuild railcar revenues	142,977	66,508	
Used railcar sales	1,238	6,177	2,772
Parts sales	10,825	9,042	10,610
Leasing revenues	5,776	6,118	5,468
Maintenance and repair revenues	24,866	23,429	22,643

Other sales	1,168	931	683
	\$ 290,393	\$ 677,449	\$ 486,986

Due to the nature of its operations, the Company is subject to significant concentration of risks related to business with a few customers. Sales to the Company's top three customers accounted for 45%, 12% and 6%, respectively, of revenues for the year ended December 31, 2013. Sales to the Company's top three customers accounted for 28%, 22% and 14%, respectively, of revenues for the year ended December 31, 2012. Sales to the Company's top three customers accounted for 52%, 24% and 5%, respectively, of revenues for the year ended December 31, 2011. The Company's sales to customers outside the United States were \$21,421, \$48,265 and \$24,343 in 2013, 2012 and 2011, respectively.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011**

(in thousands, except share and per share data)

Note 19 Labor Agreements

A collective bargaining agreement at one of the Company's facilities that covers approximately 17% and 10% of the Company's active labor force at December 31, 2013 and 2012, respectively, expires on March 31, 2017.

A collective bargaining agreement at a facility that was idled during 2013 expires on October 31, 2018 and covered approximately 31% of the Company's active labor force at December 31, 2012.

Note 20 Selected Quarterly Financial Data (Unaudited)

(Dollar amounts in thousands except per share data)

Quarterly financial data is as follows:

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2013				
Revenues	\$ 87,615	\$ 47,109	\$ 75,946	\$ 79,723
Gross profit	4,969	2,277	6,182	(203)
Net loss attributable to FreightCar America ⁽¹⁾	(2,644)	(3,438)	(926)	(12,287)
Net loss per common share attributable to FreightCar America basic	\$ (0.22)	\$ (0.29)	\$ (0.08)	\$ (1.03)
Net loss per common share attributable to FreightCar America diluted	\$ (0.22)	\$ (0.29)	\$ (0.08)	\$ (1.03)
2012				
Revenues	\$ 219,066	\$ 181,206	\$ 160,598	\$ 116,579
Gross profit	23,731	17,043	16,092	8,120
Net income (loss) attributable to FreightCar America	9,734	5,563	4,757	(959)
Net income (loss) per common share attributable to FreightCar America basic	\$ 0.82	\$ 0.47	\$ 0.40	\$ (0.08)
Net income (loss) per common share attributable to FreightCar America diluted	\$ 0.81	\$ 0.46	\$ 0.40	\$ (0.08)

¹ Results for the fourth quarter of 2013 include restructuring and impairment charges of \$10,452 (see Note 6 for a description of these charges).

Note 21 Segment Information

The Company's operations comprise two reportable segments, Manufacturing and Services. The Company's Manufacturing segment includes new railcar manufacturing, used railcar sales, railcar leasing and major railcar rebuilds. The Company's Services segment includes general railcar repair and maintenance, inspections, parts sales and railcar fleet management services. Corporate includes selling, general and administrative expenses not related to production of goods and services, retiree pension and other postretirement benefit costs, and all other non-operating activity.

Segment operating income is an internal performance measure used by the Company's Chief Operating Decision Maker to assess the performance of each segment in a given period. Segment operating income includes all external revenues attributable to the segments as well as operating costs and income that management believes are directly

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****For the Years Ended December 31, 2013, 2012 and 2011****(in thousands, except share and per share data)**

attributable to the current production of goods and services. The Company's management reporting package does not include interest revenue, interest expense or income taxes allocated to individual segments and these items are not considered as a component of segment operating income. Segment assets represent operating assets and exclude intersegment accounts, deferred tax assets and income tax receivables. The Company does not allocate cash and cash equivalents to its operating segments as the Company's treasury function is managed at the corporate level. Intersegment revenues were not material in any period presented.

The accounting policies of the business segments are the same as those described in the summary of significant accounting policies in Note 2. Intersegment revenues are not material in any period presented.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, management evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), as of the end of the period covered by our annual report on Form 10-K for the fiscal year ended December 31, 2013 (the Evaluation Date). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission s rules and forms.

MANAGEMENT S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management, under the supervision of the Chief Executive Officer and the Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Exchange Act, is a process designed by, or under the supervision of, the Chief Executive Officer and Chief Financial Officer and effected by the board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with GAAP. Internal control over financial reporting includes those policies and procedures that:

Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP;

Provide reasonable assurance that receipts and expenditures of the Company are being made only in accordance with appropriate authorization of management and the board of directors; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company s assets that could have a material effect on the financial statements.

As of the end of the Company s 2013 fiscal year, management conducted an evaluation of the effectiveness of the Company s internal control over financial reporting based on the framework established in *Internal Control-Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company s system of internal control over financial reporting is designed to provide reasonable assurance to the

Company's management and board of directors regarding the reliability of financial records used in preparation of the Company's published financial statements. As all internal control systems have inherent limitations, even systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Based on its assessment, management has concluded that the Company's internal control over financial reporting was effective as of December 31, 2013.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2013 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report appearing herein.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There has been no change in our internal control over financial reporting during the last fiscal quarter of 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
