Table of Contents**MITCHAM INDUSTRIES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(unaudited)****1. Organization**

Mitcham Industries, Inc. (for purposes of these notes, the Company) was incorporated in Texas in 1987. The Company, through its wholly owned Canadian subsidiary, Mitcham Canada, ULC (MCL), its wholly owned Russian subsidiary, Mitcham Seismic Eurasia LLC (MSE), its wholly owned Hungarian subsidiary, Mitcham Europe Ltd. (MEL), its wholly owned Singaporean subsidiary, Mitcham Marine Leasing Pte. Ltd. (MML), and its branch operations in Colombia and Peru, provides full-service equipment leasing, sales and service to the seismic industry worldwide. The Company, through its wholly owned Australian subsidiary, Seismic Asia Pacific Pty Ltd. (SAP), provides seismic, oceanographic and hydrographic leasing and sales worldwide, primarily in Southeast Asia and Australia. The Company, through its wholly owned subsidiaries, Seemap International Holdings Pte, Ltd. (Seemap) and Klein Marine Systems, Inc. (Klein), designs, manufactures and sells a broad range of proprietary products for the seismic, hydrographic and offshore industries with product sales and support facilities based in New Hampshire, Singapore and the United Kingdom. All intercompany transactions and balances have been eliminated in consolidation.

2. Basis of Presentation

The condensed consolidated balance sheet as of January 31, 2016 for the Company has been derived from audited consolidated financial statements. The unaudited interim condensed consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and the related notes included in the Company's Annual Report on Form 10-K for the year ended January 31, 2016. In the opinion of the Company, all adjustments, consisting only of normal recurring adjustments, necessary to present fairly the financial position as of April 30, 2016, the results of operations for the three months ended April 30, 2016 and 2015, and the cash flows for the three months ended April 30, 2016 and 2015, have been included in these financial statements. The foregoing interim results are not necessarily indicative of the results of operations to be expected for the full fiscal year ending January 31, 2017.

3. New Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-09, *Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*, to reduce complexity in accounting standards involving several aspects of the accounting for employee share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. ASU No. 2016-09 will be effective during the fiscal year ended January 31, 2018. The Company is currently evaluating the impact of ASU No. 2016-09 on its financial

statements.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*, to provide guidance on recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements, specifically differentiating between different types of leases. ASU No. 2016-02 will be effective during the fiscal year ended January 31, 2019. The Company is currently evaluating the impact of ASU No. 2016-02 on its financial statements.

In September 2015, the FASB issued ASU No. 2015-16, *Business Combinations: (Topic 805)*, to provide guidance on the simplification of the accounting for adjustments made to provisional amounts recognized in a business combination, eliminating the requirement to retrospectively account for those adjustments. ASU 2015-16 requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The amendment requires that the acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. The amendment further requires presentation separately on the face of the income statement or

Table of Contents

disclosure in the notes to the financial statements of the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. ASU 2015-16 was effective during the three months ended April 30, 2016. The adoption of this standard did not have a material effect on the Company's financial statements.

In August 2015, the FASB issued ASU No. 2015-15, *Interest-Imputation of Interest: (Subtopic 835-30)*, to provide guidance on measurement of debt issuance costs associated with line-of-credit arrangements. ASU 2015-15 allows debt issuance costs associated with line-of-credit arrangements to be deferred and presented as an asset and subsequently amortized ratably over the term of the line-of-credit arrangement. ASU 2015-15 was effective during the three months ended April 30, 2016. The adoption of this standard did not have a material effect on the Company's financial statements.

In July 2015, the FASB issued ASU No. 2015-11, *Inventory: (Topic 330)*, to provide guidance on measurement of inventory. ASU 2015-11 requires that inventories utilizing the first-in, first-out (FIFO) method be measured at lower of cost or net realizable value. ASU 2015-11 will be effective during the fiscal year ended January 31, 2018. The Company does not believe the adoption will have a material effect on its financial statements.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers: (Topic 606)*, to provide guidance on revenue recognition on contracts with customers to transfer goods or services or on contracts for the transfer of nonfinancial assets. ASU 2014-09 requires that revenue recognition on contracts with customers depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 will be effective during the fiscal year ended January 31, 2019. The Company does not believe the adoption will have a material effect on its financial statements.

4. Subsequent Events

In June 2016, the Company completed a public offering of 320,000 shares of its 9.00% Series A Cumulative Preferred Stock, par value \$1.00 per share (the "Series A Preferred Stock"). In addition, the Company granted the underwriters a 30-day option to purchase up to an additional 48,000 shares of Series A Preferred Stock.

Net proceeds from the offering were approximately \$7.0 million and were used to partially repay amounts outstanding under the Credit Agreement (as defined below). See Note 8.

5. Acquisition

In December 2015, the Company purchased Klein, a designer, manufacturer and worldwide distributor of sonar and waterside security systems to military and commercial customers, for \$10.0 million in cash. Klein's product lines consist of single and multi-beam side scan sonar systems. The Company made this acquisition to expand the product offerings available to customers, gain access to additional technology, expand the markets in which it operates and to reduce the Company's dependence on the cyclical energy industry.

The Company estimated fair values for assets acquired utilizing management estimates with the assistance of an independent appraisal firm. The value of tangible property was estimated using a combination of cost and sales comparison approaches. The value of identifiable intangible assets was estimated generally using an income approach. This approach utilized inputs that are not observable in the market and thus represents a Level 3 fair value

measurement. Key assumptions include management's estimates of revenue and costs associated with various intangible assets and the discount rate applied to those revenues and costs.

The following is a summary of the amounts recognized for assets acquired and liabilities assumed at the date of acquisition (in thousands):

Working capital	\$ 2,572
Property, plant and equipment	3,416
Intangible assets	2,350
Goodwill	1,662

Table of Contents

Intangible assets include trade names of approximately \$760,000, which have an indefinite useful life and are not amortizable. The weighted average useful life of other acquired intangibles is 9.5 years.

The goodwill associated with this acquisition is deductible for tax purposes.

Pro Forma Results of Operations

The following consolidated pro forma results of operations for the three months ended April 30, 2015 assumes the acquisition of Klein occurred as of the beginning of the period and reflects the full results of operations for the period presented. The consolidated pro forma results have been prepared for comparative purposes only and do not purport to indicate the results of operations that would actually have occurred had the combinations been in effect on the dates indicated, or that may occur in the future.

6. Balance Sheet

	April 30,	January 31,
	2016	2016
	(in thousands)	
Accounts receivable	\$ 26,177	\$ 27,691
Contracts receivable	2,753	2,877
	28,930	30,568
Less long-term portion	(4,968)	(4,972)
Current accounts and contracts receivable	23,962	25,596
Less allowance for doubtful accounts	(5,824)	(5,821)
Current portion of accounts and contracts receivable, net of allowance for doubtful accounts	\$ 18,138	\$ 19,775

Contracts receivable consisted of \$2.8 million and \$2.9 million due from three customers as of April 30, 2016 and January 31, 2016, respectively. The balance of contracts receivable at April 30, 2016 and January 31, 2016 consisted of contracts bearing interest at an average rate of approximately 2.2% and 2.4%, respectively, and with remaining repayment terms from one to 14 months and one to 17 months, respectively. These contracts are collateralized by the

equipment sold. The Company has entered into structured payment arrangements with four customers, which extend the payment of their accounts and contracts receivable balances resulting in long-term accounts receivable with two customers totaling \$3.7 million and long-term contracts receivable with two customers totaling \$1.3 million. Payments terms for long-term receivables are structured to be completed by the end of fiscal 2018

Table of Contents

	April 30, 2016	January 31, 2016
	(in thousands)	
Inventories:		
Raw materials	7,289	\$ 7,314

Amortizable intangible assets		\$ 15,076	\$ (4,575)	\$ 10,501	\$ 14,517	\$ (4,051)	\$ 10,466	

In December of 2015, the Company acquired \$1.7 million in goodwill and \$2.4 million in other intangible assets in connection with the purchase of Klein. See note 5 to our consolidated financial statements. The remaining \$2.6 million of goodwill is allocated to Seamap.

Table of Contents

On January 31, 2016 the Company completed the annual review of goodwill and other intangible assets. Based on a review of qualitative factors, the Company recorded an impairment of the goodwill associated with its Seamap reporting unit in the amount of \$3.0 million. Also at January 31, 2016, the Company recorded impairment of approximately \$600,000 related to certain identifiable intangible assets related to its leasing reporting unit. There have been no significant changes to the environment to indicate additional impairment is necessary as of April 30, 2016.

Amortizable intangible assets are amortized over their estimated useful lives of three to 15 years using the straight-line method (for customer relationships, the straight-line method is not materially different from other methods that estimate run off of the underlying customer base). Aggregate amortization expense was \$401,000 and \$423,000 for the three months ended April 30, 2016 and 2015, respectively. As of April 30, 2016, future estimated amortization expense related to amortizable intangible assets was estimated to be:

For fiscal years ending January 31 (in thousands):	
2017	\$ 1,178
2018	1,480
2019	1,480
2020	1,480
2021	1,327
2022 and thereafter	3,556
Total	\$ 10,501

8. Long-Term Debt and Notes Payable

Long-term debt and notes payable consisted of the following (in thousands):

	April 30, 2016	January 31, 2016
Revolving line of credit	\$ 12,450	\$ 14,400
Term credit facility	5,200	6,000
Other equipment notes	85	84
	17,735	20,484
Less current portion	(3,219)	(3,218)
Long-term debt	\$ 14,516	\$ 17,266

The Company has a secured, revolving credit facility, as described below (the Credit Agreement). The Credit Agreement is a secured revolving facility in the maximum principal amount of \$30.0 million and a maturity of August 31, 2017, among the Company, as borrower, HSBC Bank USA, N.A., as administrative agent and several banks and other financial institutions from time to time as lenders thereunder (initially consisting of HSBC Bank USA, N.A. and First Victoria National Bank).

In June 2016, the Company elected to reduce the commitment to \$20.0 million, as provided for in the Credit Agreement.

Amounts available for borrowing under the Credit Agreement are determined by a borrowing base. The borrowing base is determined primarily based upon the appraised value of the Company's domestic lease pool equipment and certain accounts receivable. The Credit Agreement is collateralized by essentially all of the Company's domestic assets (other than real estate) and 65% of the capital stock of Mitcham Holdings, Ltd., a foreign holding company and wholly owned subsidiary of the Company that holds the capital stock of the Company's foreign subsidiaries.

The Credit Agreement provides interest at a base rate, or for Eurodollar borrowings, in both cases plus an applicable margin. As of April 30, 2016, the base rate margin was 250 basis points and the Eurodollar margin was 350 basis points. The Company has agreed to pay a commitment fee on the unused portion of the Credit Agreement of 0.375% to 0.5%. Up to \$10.0 million of available borrowings under the Credit Agreement may be utilized to secure letters of credit. The Credit Agreement contains certain financial covenants that require, among other things, that the Company maintain a leverage ratio, which is calculated at the end of each quarter, of no greater than 2.00 to 1.00 on a trailing four quarter basis and a fixed charge coverage ratio, which also is calculated at the end of each quarter, of no less than 1.25 to 1.00 on a trailing four quarter basis. In addition, should Adjusted EBITDA, as defined in the Credit Agreement, for any trailing four quarter period be less than \$22.0 million, the ratio of capital expenditures to Adjusted EBITDA for that four quarter

Table of Contents

period may not be greater than 1.0 to 1.0. The Credit Agreement also includes restrictions on additional indebtedness in excess of \$5.0 million. The Company was in compliance with each of these provisions as of and for the three months ended April 30, 2016, with the exception of the leverage ratio. The banks have waived compliance with this provision as of April 30, 2016. Reductions in the Company's funded debt (as defined in the Credit Agreement) subsequent to April 30, 2016 resulted in the Company regaining compliance with this provision.

The Credit Agreement contains customary representations, warranties, conditions precedent to credit extensions, affirmative and negative covenants and events of default. The negative covenants include restrictions on liens, additional indebtedness in excess of \$5.0 million, acquisitions, fundamental changes, dispositions of property, restricted payments, and transactions with affiliates and lines of business. The events of default include a change in control provision.

On August 22, 2014, Seemap Singapore, entered into a \$15.0 million credit facility (the Seemap Credit Facility) with The Hongkong and Shanghai Banking Corporation Limited (HSBC-Singapore). The facility consists of a \$10.0 million term loan, a \$3.0 million revolving credit facility, and a \$2.0 million banker's guarantee facility.

The term loan portion of the Seemap Credit Facility provides for eleven quarterly principal payments of \$800,000 and a final payment of the remaining \$1.2 million on or before August 22, 2017. Interest on the term facility is payable quarterly at LIBOR plus 2.75%. Under the Seemap Credit Facility, Seemap Singapore may borrow up to \$3.0 million for a period of one to three months to be utilized for working capital and other general corporate purposes. Borrowings under the revolving credit facility bear interest at LIBOR plus 3.00%. Borrowings under this arrangement are secured by essentially all of the assets of Seemap Singapore and the Company's guarantee.

The Seemap Credit Facility contains financial covenants that require Seemap Singapore to maintain a minimum shareholder's equity of S\$15 million and a minimum ratio of debt to EBITDA of not less than 125% for each fiscal year. The Company was in compliance with each of these provisions as of and for the three months ended April 30, 2016.

The Seemap Credit Facility contains customary representations and warranties, conditions precedent to credit extensions, affirmative and negative covenants and events of default. The negative covenants include restrictions on liens, additional indebtedness, acquisitions, fundamental changes, dispositions of property, restricted payments, and transactions with affiliates. The Seemap Credit Facility also requires the Company, as guarantor, to comply with financial covenants contained in the Credit Agreement.

The Company's average borrowings under the Credit Agreement and the Seemap Credit Facility for the three months ended April 30, 2016 and 2015 were approximately \$19.3 million and \$24.4 million, respectively.

From time to time, certain subsidiaries have entered into notes payable to finance the purchase of certain equipment, which is pledged as security for the notes payable.

9. Income Taxes

Effective January 31, 2016 the Company has adopted the provisions of ASU 2015-17 on a prospective basis. Accordingly, all net deferred tax assets are classified as long-term assets as of April 30, 2016 and January 31, 2016 in the accompanying Consolidated Balance Sheets. Amounts for prior periods have not been restated. The provisions of this pronouncement have been adopted in order to simplify the presentation of deferred income taxes.

Prepaid taxes of approximately \$1.4 million at April 30, 2016 consisted of approximately \$1.2 million of foreign taxes and approximately \$187,000 of domestic federal and state taxes. Prepaid income taxes of approximately \$2.5 million at January 31, 2016 consisted of approximately \$2.3 million of foreign taxes and approximately \$182,000 of domestic federal and state taxes.

The Company and its subsidiaries file consolidated and separate income tax returns in the United States federal jurisdiction and in foreign jurisdictions. The Company is subject to United States federal income tax examinations for all tax years beginning with its fiscal year ended January 31, 2013.

The Company is subject to examination by taxing authorities throughout the world, including foreign jurisdictions such as Australia, Canada, Colombia, Hungary, Peru, Russia, Singapore and the United Kingdom. The Company and its subsidiaries are no longer subject to foreign income tax examinations for tax years before the fiscal year ended Jan 31, 2011.

The provision for income taxes for the three months ended April 30, 2016 includes certain foreign withholding taxes. These taxes can distort the relationship between income or loss before income taxes and the provision for income taxes. Also, a valuation against the deferred tax assets of the Company for approximately \$18.4 million and \$16.7 million has been recorded as of April 30, 2016 and January 31, 2016, respectively. These deferred tax assets relate primarily to net operating loss carryforwards in the United States and other jurisdictions. The valuation allowances were determined based on management's judgment as to the likelihood that these deferred tax assets would be realized. The judgment was based on an evaluation of available evidence, both positive and negative. Accordingly, the effective tax rates for these periods differ significantly from the federal statutory rate of 34%. The Company has determined that certain earnings from foreign jurisdictions have been permanently reinvested outside of the United States through the three months ended April 30, 2016.

Table of Contents

For the three months ended April 30, 2016, the Company did not recognize any tax expense or benefit related to uncertain tax positions. For the fiscal year ended January 31, 2016, the Company recognized tax benefits of approximately \$92,000 related to the resolution of uncertain tax positions and reversed approximately \$144,000 of penalties and interest related to these matters.

10. Earnings per Share

Net income per basic common share is computed using the weighted average number of common shares outstanding during the period, excluding unvested restricted stock. Net income per diluted common share is computed using the weighted average number of common shares and dilutive potential common shares outstanding during the period using the treasury stock method. Potential common shares result from the assumed exercise of outstanding common stock options having a dilutive effect and from the assumed vesting of unvested shares of restricted stock.

The following table presents the calculation of basic and diluted weighted average common shares used in the earnings per share calculation:

	Three Months Ended April 30,	
	2016	2015
	(in thousands)	
Basic weighted average common shares outstanding	12,059	12,018
Stock options		50
Unvested restricted stock	63	33
Total weighted average common share equivalents	63	83
Diluted weighted average common shares outstanding	12,122	12,101

For the three months ended April 30, 2016 and 2015, potentially dilutive common shares underlying stock options and unvested restricted stock were anti-dilutive and were therefore not considered in calculating diluted loss per share for that period.

11. Treasury Stock

In April 2013, the Company's Board of Directors authorized the repurchase of up to 1.0 million shares of the Company's common stock through December 31, 2014. The Company purchased a total of 1.0 million shares under this program, representing the total amount of shares authorized for repurchase. These shares are reflected as treasury stock in the accompanying financial statements.

In the fourth quarter of our fiscal year ended January 31, 2015 (fiscal 2015), the Company's Board of Directors authorized the repurchase of up to an additional 1.0 million shares of the Company's common stock through December 31, 2015. The Company did not purchase any shares pursuant to this additional authorization.

12. Stock-Based Compensation

Total compensation expense recognized for stock-based awards granted under the Company's equity incentive plan during the three months ended April 30, 2016 and 2015 was approximately \$247,000 and \$281,000, respectively.

Table of Contents**13. Segment Reporting**

The Equipment Leasing segment offers new and experienced seismic equipment for lease or sale to the oil and gas industry, seismic contractors, environmental agencies, government agencies and universities. The Equipment Leasing segment is headquartered in Huntsville, Texas, with sales and services offices in Calgary, Canada; Brisbane, Australia; Ufa, Bashkortostan, Russia; Budapest, Hungary; Singapore; Bogota, Colombia; and Lima, Peru.

The Equipment Manufacturing and Sales segment is engaged in the design, manufacture and sale of state-of-the-art seismic and offshore telemetry systems. Manufacturing, support and sales facilities are maintained in New Hampshire, the United Kingdom and Singapore.

Financial information by business segment is set forth below (net of any allocations):

	As of April 30, 2016	As of January 31, 2016
	Total Assets	Total Assets
	(in thousands)	
Equipment Leasing	\$ 86,806	\$ 95,932
Equipment Manufacturing and Sales	39,896	39,059
Eliminations	(202)	(232)
Consolidated	\$ 126,500	\$ 134,759

Results for the three months ended April 30, 2016 and 2015 were as follows (in thousands):

	Revenues		Operating (loss) income(Loss) income before taxes			
	2016	2015	2016	2015	2016	2015
Equipment Leasing	\$ 4,543	\$ 11,536	\$ (6,539)	\$ (1,012)	\$ (5,653)	\$ (311)
Equipment Manufacturing and Sales	7,220	5,675	202	42	(452)	(94)
Eliminations	(32)	(69)	6	13	(39)	13
Consolidated	\$ 11,731	\$ 17,142	\$ (6,331)	\$ (957)	\$ (6,144)	\$ (392)

Sales from the Equipment Manufacturing and Sales segment to the Equipment Leasing segment are eliminated in consolidated revenues. Consolidated income before taxes reflects the elimination of profit from intercompany sales and depreciation expense on the difference between the sales price and the cost to manufacture the equipment. Fixed assets are reduced by the difference between the sales price and the cost to manufacture the equipment, less the accumulated depreciation related to the difference.

Table of Contents

CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING STATEMENTS

Certain statements contained in this Quarterly Report on Form 10-Q (this Form 10-Q) may be deemed to be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The words anticipate, believe, expect, plan, intend, foresee, should, would, could, or other similar expressions identify forward-looking statements, which generally are not historical in nature. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting us will be those that we anticipate. All comments concerning our expectations for future revenues and operating results are based on our forecasts for our existing operations and do not include the potential impact of any future acquisitions. Our forward-looking statements involve significant risks and uncertainties (some of which are beyond our control) and assumptions that could cause actual results to differ materially from our historical experience and our present expectations or projections. Important factors that could cause actual results to differ materially from those in the forward-looking statements include, but are not limited to, those summarized below:

decline in the demand for seismic data and our services;

the effect of changing economic conditions and fluctuations in oil and natural gas prices on exploration activities;

the effect of uncertainty in financial markets on our customers and our ability to obtain financing;

loss of significant customers;

increased competition;

loss of key suppliers;

uncertainties regarding our foreign operations, including political, economic and currency risks;

seasonal fluctuations that can adversely affect our business;

fluctuations due to circumstances beyond our control or that of our customers;

defaults by customers on amounts due us;

possible further impairment of our long-lived assets due to technological obsolescence or changes in anticipated cash flow generated from those assets;

inability to obtain funding or to obtain funding under acceptable terms;

intellectual property claims by third parties;

risks associated with our manufacturing operations;

the impact of economic and trade sanctions imposed on Russia by the United States and the European Union in response to the political unrest in Ukraine; and

other risks associated with our foreign operations, including foreign currency exchange risk.

For additional information regarding known material factors that could cause our actual results to differ materially from our projected results, please see (1) Part II, Item 1A. Risk Factors of this Form 10-Q, and (2) Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended January 31, 2016.

Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publically update or revise any forward-looking statement after the date they are made, whether as the result of new information, future events or otherwise.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Overview**

We operate in two segments, equipment leasing (Equipment Leasing) and equipment manufacturing and sales (Equipment Manufacturing and Sales). Through our Equipment Leasing Segment, we believe we are the largest independent provider of exploration equipment to the seismic industry. Our worldwide Equipment Manufacturing and Sales Segment includes the Seemap business, which designs, manufactures and sells specialized seismic marine equipment and Klein Marine Systems, Inc. (Klein), which designs, manufactures and sells high performance side scan sonar systems.

Our Equipment Leasing segment is primarily engaged in the leasing of seismic equipment to companies in the oil and gas industry throughout the world. We conduct our leasing business through the Company, our wholly-owned subsidiaries and our branch in Colombia. We also sell new and used seismic equipment from time to time. The subsidiaries that conduct our leasing business are Mitcham Canada ULC (MCL), Seismic Asia Pacific Pty Ltd. (SAP), Mitcham Seismic Eurasia LLC (MSE), Mitcham Europe Ltd. (MEL) and Mitcham Marine Leasing Pte. Ltd. (MML).

Our Equipment Manufacturing and Sales segment is engaged in the design, production and sale of marine seismic equipment and oceanographic and hydrographic equipment. The operations of this segment are conducted through our wholly-owned subsidiaries, Seemap (UK) Ltd. (Seemap UK), Seemap Pte. Ltd. (Seemap Singapore) and, together with Seemap UK, Seemap), Klein and SAP.

The following table presents certain operating information by operating segment.

	For the Three Months Ended	
	April 30,	
	2016	2015
	(in thousands)	
Revenues:		
Equipment Leasing	\$ 4,543	\$ 11,536

Changes in inventory	(297)	850
Changes in accounts payable, accrued expenses and other current liabilities and deferred revenue	2,044	(253)
Changes in prepaid expenses and other current assets	250	(3,277)
Foreign FX currency losses	119	778
Other	(69)	(66)
EBITDA ⁽¹⁾	\$ 1,678	\$ 8,136

- (1) EBITDA is defined as net income before (a) interest income and interest expense, (b) provision for (or benefit from) income taxes and (c) depreciation and amortization. Adjusted EBITDA excludes non-cash foreign exchange gains and losses, non-cash costs of lease pool equipment sales, certain non-recurring contract settlement costs, impairment of intangible assets and stock-based compensation. This definition of Adjusted EBITDA is consistent with the definition in the Credit Agreement. We consider EBITDA and Adjusted EBITDA to be important indicators for the performance of our business, but not measures of performance or liquidity calculated in accordance with accounting principles generally accepted in the United States of America (GAAP). We have included these non-GAAP financial measures because management utilizes this information for assessing our performance and liquidity, and as indicators of our ability to make capital expenditures, service debt and finance working capital requirements. The Credit Agreement contains financial covenants based on EBITDA or Adjusted EBITDA. Management

believes that EBITDA and Adjusted EBITDA are measurements that are commonly used by analysts and some investors in evaluating the performance and liquidity of companies such as us. In particular, we believe that it is useful to our analysts and investors to understand this relationship because it excludes transactions not related to our core cash operating activities. We believe that excluding these transactions allows investors to meaningfully trend and analyze the performance of our core cash operations. EBITDA and Adjusted EBITDA are not measures of financial performance or liquidity under GAAP and should not be considered in isolation or as alternatives to cash flow from operating activities or as alternatives to net income as indicators of operating performance or any other measures of performance derived in accordance with GAAP. In evaluating our performance as measured by EBITDA, management recognizes and considers the limitations of this measurement. EBITDA and Adjusted EBITDA do not reflect our obligations for the payment of income taxes, interest expense or other obligations such as capital expenditures. Accordingly, EBITDA and Adjusted EBITDA are only two of the measurements that management utilizes. Other companies in our industry may calculate EBITDA or Adjusted EBITDA differently than we do and EBITDA and Adjusted EBITDA may not be comparable with similarly titled measures reported by other companies.

Table of Contents

We own a variety of technologically advanced equipment acquired from the leading seismic manufacturers. Our lease pool includes many types of equipment used in seismic data acquisition, including various electronic components of land, transition zone and marine seismic data acquisition systems, geophones and cables, peripheral equipment, survey and other equipment. The majority of our seismic equipment lease pool is provided by the Sercel subsidiaries of Compagnie Generale de Geophysique (Sercel) and Geospace Technologies Corporation (Geospace). However, we also purchase equipment from a number of other equipment manufacturers.

We lease our equipment on a short-term basis, generally for two to six months, to seismic contractors who need equipment for a particular seismic survey. Certain equipment that is used in vertical seismic profiling, or downhole operations, is generally leased to oil field service companies and often for shorter periods, ranging from a few days to two weeks. Short-term leasing agreements enable our customers to achieve operating and capital investment efficiencies. A typical seismic crew uses a wide variety of equipment to perform seismic data acquisition surveys. Our customers may lease a small amount of equipment to expand an existing crew's capabilities or a complete seismic data acquisition system to equip an entire crew. Demand for short-term seismic equipment leases is affected by many factors, including: (1) the highly variable size and technological demands of individual seismic surveys, (2) seasonal weather patterns and sporadic demand for seismic surveys in certain regions, (3) the term of the lease and (4) the cost of seismic equipment. We believe these factors allow seismic contractors to use short-term seismic equipment leasing as a cost-effective alternative to purchasing additional equipment. Our equipment lease rates vary according to an item's expected useful life, utilization, acquisition cost and the term of the lease. From time to time, we sell used equipment from our lease pool in response to specific demand or to dispose of older equipment.

In our Equipment Manufacturing and Sales segment, Seamap designs, manufactures and sells a broad range of proprietary products for the seismic, hydrographic and offshore industries. Seamap's primary products include the GunLink seismic source acquisition and control systems, commonly referred to as energy source controllers or air gun controllers, which provide operators of marine seismic surveys more precise control of energy sources, and the BuoyLink RTGPS tracking system, which is used to provide precise positioning of seismic sources and streamers. In May 2014, Seamap acquired two product lines from ION Geophysical Corporation (ION), Digis for energy source controllers and Sleeve Gun energy sources. These intellectual property rights will allow us to incorporate certain design features and new functionality in future versions of our GunLink product line. We believe the pertinent patents to have a valid term through at least 2023. We believe that Seamap is the primary provider of energy source controllers.

Klein primarily designs, manufactures and sells advanced side scan sonar systems and waterside security systems for the oceanographic, hydrographic and defense industries on a world-wide basis. Klein's family of side scan sonar products are used in a variety of applications including hydrographic surveys, naval mine counter measure operations, search and recovery operations, ocean bottom profiling and other underwater object detection operations.

SAP sells equipment, consumables, systems integration, engineering hardware and software maintenance support services to companies in the seismic, hydrographic, oceanographic, environmental and defense industries throughout Southeast Asia and Australia. SAP is a distributor for a number of manufacturers of products, including Klein and occasionally Seamap.

Seamap and Klein have overlapping customer bases and it is not uncommon for a marine survey vessel to be equipped with products from Seamap and from Klein. We expect that in the future we will have opportunities to package products from Seamap and Klein in response to requests from customers.

The technologies underlying the products of Seamap and Klein are similar, as are the engineering disciplines and challenges. We anticipate significant engineering collaboration between Seamap and Klein and plan to jointly develop

new products.

The manufacturing processes of Seemap and Klein are similar. While we expect to maintain separate manufacturing operations, we do believe there will be opportunities for collaboration. Such collaboration might include using common suppliers, outsourcing specific functions between the operations and common support and repair activities.

For information regarding our operating results and total assets by segment, see Note 13 to our consolidated financial statements.

Business Outlook

The revenues of our Equipment Leasing segment and to a large degree our Equipment Manufacturing and Sales segment are related to the level of worldwide oil and gas exploration activities and the profitability and cash

Table of Contents

flows of oil and gas companies and seismic contractors, which, in turn, are affected by expectations regarding supply and demand for oil and natural gas, energy prices and finding and development costs. Land seismic data acquisition activity levels are measured in terms of the number of active recording crews, known as the crew count, and the number of recording channels deployed by those crews, known as channel count. The level of marine seismic data acquisition activity is indicated by the number of seismic vessels in operation around the world. Because an accurate and reliable census of active crews and active vessels does not exist, it is not possible to make definitive statements regarding the absolute levels of seismic data acquisition activity. Furthermore, a significant number of seismic data acquisition contractors are either private or state-owned enterprises and information about their activities is not available in the public domain.

In recent years there has been a significant decline in worldwide oil prices, reaching their lowest levels since 2009. Prices in recent weeks have increased from pricing lows, however, much uncertainty remains and oil prices could remain low for an extended period of time. In response to this, many oil and gas companies have dramatically reduced exploration budgets. This has in turn resulted in the cancellation or postponement of many seismic exploration projects. In addition, some customers have requested pricing concessions and/or other arrangements designed to reduce their operating costs. Together, reduced activity levels and profit margins have had, and are expected to continue to have, a negative impact on our business. The downturn in seismic exploration activity has resulted in an excess of equipment within the industry, both land and marine. In response to this reduced activity and excess capacity, many seismic contractors are attempting to reduce cost, including, in the case of marine contractors, retiring older vessels and cold stacking other vessels, which entails taking vessels out of service temporarily. The industry has also experienced consolidation recently, particularly among land contractors. Vessel retirements and consolidation among contractors can have a short-term negative effect on the demand for our services and equipment. However, we believe such actions are beneficial to the industry in general and benefit us in the long-term.

We believe it likely that the recent lower level of oil prices and general slowdown in seismic exploration projects will continue at least through the balance of our fiscal year ending January 31, 2017 (fiscal 2017). Therefore, we expect lower levels of leasing revenue in fiscal 2017 as compared to our fiscal year ended January 31, 2016 (fiscal 2016). However, we are not able to quantify the magnitude of such reduction at this time. Although we believe the overall level of seismic exploration activity is reduced and much uncertainty remains, we think activity varies among geographic regions. Recently we have received increases in the number of enquiries from existing and potential customers, particularly in some geographic regions, as more fully discussed below. The ultimate impact of the current industry downturn on us will depend upon its length and other factors, many of which remain beyond our control. We do not currently believe this situation will result in any impairment of our lease pool. However, at January 31, 2016, we recorded an impairment of approximately \$3.6 million related to intangible assets.

Certain of our customers have experienced delays in payments from their customers or other financial distress. As a result, they have delayed payments to us beyond the originally agreed to terms. We have negotiated extended payment terms or other settlement agreements with some of these customers. In some cases, we have restructured amounts due into secured notes. We have provided an allowance for doubtful accounts for amounts we estimate to be uncollectable. However, further delays in customer payments could have a material adverse effect on our cash flows and financial position.

North America, particularly Canada, appears to be most affected by the recent decline in activity. Industry sources estimate that approximately five land seismic crews operated in Canada during the 2015-2016 winter season, as compared to approximately 15 crews during the 2014-2015 winter season and more than 40 crews during that period four years ago. This had a material negative effect on our revenues in the first quarter of fiscal 2017 as compared to the same period in fiscal 2016. We expect the level of activity in the United States to remain weak during fiscal 2017, although we are aware of some planned projects which may contribute to our leasing revenues. However, there can be

no certainty that these planned projects will proceed or that we will have the opportunity to provide equipment for any such projects.

We expect land seismic exploration activity in Latin America to remain subdued during fiscal 2017. However, we have bid projects scheduled for fiscal 2017 and we have received recent enquiries regarding other projects. There is no certainty that those projects will proceed or proceed within the time frames currently anticipated. Parts of Latin America, such as Colombia, continue to be difficult areas in which to operate for our customers due to logistical, regulatory and security issues. Lower oil prices have introduced additional uncertainty regarding the economic viability of some projects, including those in Mexico. We do not believe that any significant land seismic activity will commence in Mexico during fiscal 2017.

Table of Contents

Economic issues caused by the decline in oil prices and the devaluation of the ruble versus the U.S. dollar have created significant difficulties and uncertainty within the Russian market. As a consequence, many seismic programs scheduled for the 2015-2016 winter season were cancelled. It is uncertain how these factors will impact our business in Russia and the Commonwealth of Independent States over the balance of fiscal 2017 and beyond, however, certain of our customers have indicated that they expect additional exploration activity in the 2016-2017 winter season. Limitations on our ability to temporarily import equipment into Russia due to the effect of sanctions imposed by the United States and European Union, as well as restrictions under our Credit Agreement, could adversely impact our ability to satisfy the demands of our customers in this region.

Our land leasing activity in Europe has been relatively constant over the past two years. However, overall exploration activity in this region has been impacted by the depressed market conditions within the oil and gas industry. Despite the overall decline in seismic exploration activity, we believe there are continued opportunities in Europe for our services and equipment and we had enquiries for additional projects within this region.

We believe there are other areas of opportunity for our land leasing business, including the Middle East, North Africa, Asia and the Pacific Rim. We have been active in each of these regions in recent years; however, the level of activity has varied. Based on discussion with our customers and other industry participants, we understand there are significant projects planned in these areas; however, the timing of these projects is uncertain. In addition, there can be no assurance that these projects will proceed or that we will have the opportunity to participate in any such projects.

Marine leasing activity has declined significantly over the past three years. We believe this is due in large part to an excess of equipment in the marine seismic market. As marine contractors have sought to reduce costs by retiring older vessels an excess of used equipment has become available, thereby reducing the demand for rental equipment. We believe this excess of available equipment will continue into fiscal 2017.

Over the past several months we have seen a softening of demand for downhole seismic tools. This equipment is most often used in applications related to the development of oil and gas properties, such as frac monitoring or reservoir monitoring programs. Accordingly, the degree to which current oil prices and exploration activity influence demand for these products can be different from that for our other equipment.

The market for the products in our Equipment Manufacturing and Sales segment is only partially dependent upon activity in the oil and gas industry. Many products are utilized in the hydrographic and oceanographic industries and, therefore, are not necessarily related to the energy industry. While the results of this segment have been negatively impacted by the downturn in the energy industry, the extent of the impact has not been as great as that experienced by our Leasing segment.

The market for products sold by Seamap is primarily dependent upon activity within the offshore, or marine, seismic industry, including the re-fitting of existing seismic vessels and the equipping of new vessels. However, these products are also utilized in some cases by hydrographic and geotechnical survey vessels whose activities are not limited to oil and gas related operations. Our Seamap business has benefited from equipping new-build vessels and from re-equipping older vessels with newer, more efficient technology. In addition, as Seamap has expanded its installed base of products, including the product lines purchased in fiscal 2015, our business for replacements, spare parts, repair and support services has expanded. The overall decline in seismic exploration activity has had, and can be expected to continue to have, an impact on the demand from Seamap's products and services. However, we believe the expansion of our product offerings and the desire for customers to upgrade to newer, more efficient technology will mitigate this impact to some extent. We also believe that Seamap has been successful in penetrating new markets recently, partially due to the product lines purchased from ION in fiscal 2015 as evidenced by deliveries to new customers in China during fiscal 2016. We continue to have discussions with existing and potential customers

regarding new products and enhancement to existing products in order to better meet the needs of the marine seismic, hydrographic and oceanographic industries.

In June 2013, we entered into a manufacturing arrangement with Petroleum Geo-Services ASA (PGS), one of the largest marine seismic contractors in the world. Under this arrangement, we manufacture and sell to PGS a customized and proprietary marine energy source controller that is based on our GunLink 4000 product (the PGS SourceLink). We have previously collaborated with PGS to develop PGS SourceLink. We expect PGS SourceLink will be deployed on the majority of PGS fleet of seismic vessels; however, current industry conditions will likely result in a delay in the complete deployment of the new products. The deployment will take place over a period of several years.

We expect to make additional deliveries to PGS in fiscal 2017 related to new build vessels and the re-equipping of existing vessels. We are also pursuing a number of opportunities in Asia for the equipping of hydrographic and geotechnical survey vessels. Some of these opportunities include products from both Seamap and Klein.

Table of Contents

Demand for Klein's products and those sold by SAP is generally not dependent upon activity within the oil and gas industry. Customers for these products primarily consist of domestic and foreign governmental and military organizations and commercial entities involved in the hydrographic and oceanographic industries. We expect sales of Klein products to benefit from the recent and pending introduction of new products and new capabilities within existing products. We expect Klein to contribute in excess of \$12.0 million in annual revenues in fiscal 2017. While demand for these products is not generally subject to seasonal variations, individual orders can be relatively significant and therefore significant fluctuations in revenues between quarterly periods is not unusual.

The oil and gas industry, in general, and the seismic industry, in particular, have historically been cyclical businesses. If worldwide oil and gas prices should remain at current depressed levels or decline from current levels, we could see a material change in the level of our business and our income from operations.

In response to the decline in demand for our equipment and what we believe to be an excess of equipment in the market, we reduced the additions to our lease pool in fiscal 2015 and fiscal 2016. During fiscal 2016, we added approximately \$2.4 million of equipment to our lease pool, as compared to approximately \$11.8 million in fiscal 2015 and approximately \$49.0 million in fiscal 2014. We expect lease pool additions in fiscal 2017 to be at a level similar to that in fiscal 2016. We expect any such additions will be limited to maintenance of our existing equipment or additional ancillary items that will enhance our ability to lease existing equipment. However, should industry conditions change, or unusual opportunities present themselves, we could revise our planned leased pool additions.

We continually monitor the composition of our lease pool in relation to general industry conditions and customer requirements. As a result of this, from time to time we may seek to reduce the amount of certain types of equipment in our lease pool or to completely divest ourselves of certain types of equipment. Sales of lease pool equipment are reflected in our consolidated results of operations as Lease pool equipment sales. We also analyze the demand for the types and amount of equipment within various geographic regions and will move equipment among our various locations as warranted.

Historically, there have been two or three primary manufacturers of land seismic equipment. Recently, the industry has seen the emergence of additional entities seeking to introduce new equipment, particularly wireless recording equipment. Accordingly, significant competition among these new and existing manufacturers has developed. This competition has, we believe, led to pricing pressure for the manufacturers of equipment. While we benefit from lower prices for new equipment, this situation has had a negative impact on the pricing for our products and services. We have not been able to determine the magnitude of this impact on our results to date.

We believe one of our key competitive advantages is our broad geographic footprint and ability to operate in a number of areas. We have accomplished this over the past several years by establishing subsidiaries and branch operations such that we now operate in nine countries. In response to a decline in activity in some regions, we have taken steps to reduce costs such as by reducing personnel. As a result of reduced activity in Latin America, we have decided to close our branch operation in Peru. We believe that all opportunities within that region can be more efficiently managed from our branch in Colombia. We do not believe the impact of this closing will be material to our results of operations. We will continue to monitor our costs in relation to our activity, but at this time we have no plans to eliminate any of our other operating locations. Should industry conditions improve, or should particular opportunities arise, we may seek to expand our operating locations either by establishing green field operations or by acquiring other businesses.

A significant portion of our revenues are generated from foreign sources. For the three months ended April 30 2016 and 2015, revenues from international customers totaled approximately \$9.0 million and \$12.5 million, respectively. These amounts represent 77% and 73% of consolidated revenues in those fiscal periods, respectively. The majority of

our transactions with foreign customers are denominated in United States, Australian, Canadian and Singapore dollars and Russian rubles. We have not entered, nor do we intend to enter, into derivative financial instruments for hedging or speculative purposes.

Our revenues and results of operations have not been materially impacted by inflation or changing prices in the past three fiscal years, except as described above.

Results of Operations

Revenues for the three months ended April 30, 2016 were approximately \$11.7 million compared to approximately \$17.1 million for the three months ended April 30, 2015. The declines in the fiscal 2017 period compared to the prior year was primarily due to lower equipment leasing revenues, attributable to the industry trends discussed above. For the three months ended April 30, 2016, we generated an operating loss of approximately \$6.3 million, compared to an operating loss of approximately \$1.0 million for the three months

Table of Contents

ended April 30, 2015. The decrease in operating profit in the fiscal 2017 period as compared to the same period a year ago was due primarily to the lower revenues discussed above, partially offset by lower lease pool depreciation. A more detailed explanation of these variations follows.

Revenues and Cost of Sales***Equipment Leasing***

Revenue and cost of sales from our Equipment Leasing segment were as follows:

	Three Months Ended April 30,	
	2016	2015
	(\$ in thousands)	
Revenue:		
Equipment leasing	\$ 3,608	\$ 11,179
Lease pool equipment sales	906	227
Other equipment sales	29	130
	4,543	11,536
Cost of sales:		
Direct costs-equipment leasing	752	1,367
Lease pool depreciation	6,873	7,671
Cost of lease pool equipment sales	415	97
Cost of other equipment sales	36	117
	8,076	9,252
Gross (loss) profit	\$ (3,533)	\$ 2,284
Gross (loss) profit %	(78)%	20%

Equipment leasing revenues decreased approximately 68% in the first quarter of fiscal 2017 from the first quarter of fiscal 2016 due to lower land leasing revenues in essentially all geographic regions. The regions with the biggest declines from the prior year were the United States and Russia. As discussed above, seismic exploration activity is generally very depressed. Our land leasing operations in the Western Hemisphere have been most affected by the decline in activity. Historically, our first quarter has been generated the largest leasing revenues due to the impact of seasonal activity in Canada and Russia. However, in the three months ended April 30, 2016 there was very little leasing activity in either Canada or Russia. Accordingly, we do not expect the same seasonal variations in our leasing revenues in fiscal 2017. From time to time, we sell equipment from our lease pool based on specific customer demand and as opportunities present themselves in order to redeploy our capital. Accordingly, these transactions tend to occur sporadically and are difficult to predict. Often, the equipment that is sold from our lease pool has been in service, and therefore depreciated, for some period of time. Accordingly, the equipment sold may have a relatively low net book value at the time of the sale, resulting in a relatively high gross margin from the transaction. The amount of the margin on a particular transaction varies greatly based primarily upon the age of the equipment. The gross profit from sales of lease pool equipment for the three months ended April 30, 2016 and 2015 was approximately \$491,000 and \$129,000,

respectively. Demand for used lease pool equipment is depressed by the same factors affecting leasing services; however, we expect to continue to sell lease pool equipment from time to time.

Direct costs related to equipment leasing were approximately 21% of leasing revenues in the three months ended April 30, 2016. This compares with approximately 12% for the three months ended April 30, 2015. A significant portion of direct costs are generally fixed and therefore do not fluctuate with the level of leasing revenues. For the three periods ended April 30, 2016, lease pool depreciation decreased approximately 10% from the same period in the prior fiscal year. The decrease reflects the lower level of lease pool purchases and the effect of certain equipment becoming fully depreciated.

Table of Contents*Equipment Manufacturing and Sales*

Revenues and cost of sales from our Equipment Manufacturing and Sales segment were as follows:

	Three Months Ended April 30,	
	2016	2015
Revenues:		
Seamap	\$ 4,919	\$ 5,115
Klein	2,136	
SAP	480	560
Intra-segment sales	(315)	
	7,220	5,675
Cost of sales:		
Seamap	2,539	2,988
Klein	1,471	
SAP	363	408
Intra-segment sales	(315)	
	4,058	3,396
Gross profit	\$ 3,162	\$ 2,279
Gross profit margin	44%	40%

The sale of Seamap products, while not generally impacted by seasonal factors, can vary significantly from quarter to quarter due to customer delivery requirements. Seamap revenues were relatively flat between the first quarter of fiscal 2017 and the same period in the prior fiscal year, declining approximately 4%, despite the general decline in the seismic industry. Scheduled deliveries of system components contributed to revenues in the current period. Due to the general decline in marine seismic activity we have experienced a decline in demand for after-market services such as spare parts and repairs. We believe it is likely that this relative softness in demand will continue throughout the balance of fiscal 2017. However, we do have certain deliveries currently scheduled for the balance of fiscal 2017. Accordingly, we expect Seamap revenues for all of fiscal 2017 to be generally in line with those of fiscal 2016.

We acquired Klein effective December 31, 2015. Therefore, our results for the three months ended April 30, 2015 did not include any amounts related to Klein. Demand for Klein's products relates primarily to activity within the hydrographic and oceanographic industries. Such demand is not subject to significant seasonal factors, but sales can vary significantly from quarter to quarter based on the requirements of specific projects. We do not believe that the revenue from Klein products for the three months ended April 30, 2016 is necessarily indicative of revenues for all of fiscal 2017, which we expect to total approximately \$12.0 million.

SAP's revenues are also attributable to activity within the hydrographic and oceanographic industry and can vary significantly from quarter to quarter based on the requirements of specific programs. In the three months ended April 30, 2016 sales of products by SAP included approximately \$300,000 related to products acquired from Klein, which amounts have been eliminated in our consolidated results of operations. We do not believe that the revenue from SAP sales for the three months ended April 30, 2016 is necessarily indicative of revenue for all of fiscal 2017.

We expect SAP's revenues for all of fiscal 2017 to be significantly above that of fiscal 2016.

The gross profit margin from the Equipment Manufacturing and Sales segment varies between the fiscal 2017 and fiscal 2016 periods primarily due to changes in product mix and the effect of revenues from Klein. Klein products and Seemap products generally have similar gross profit margins, but both manufacturing operations have certain fixed costs which can negatively impact gross profit margins in periods of relatively lower revenues. Sales by SAP generally produce lower gross profit margins than do sales of Seemap and Klein.

Operating Expenses

General and administrative expenses for the three months ended April 30, 2016 were approximately \$5.3 million compared to approximately \$4.9 million for the three months ended April 30, 2015. The fiscal 2017 period includes

Table of Contents

approximately \$690,000 of general and administrative expenses related to the operations of Klein that were not present in the fiscal 2016 period. Absent these additional costs, general and administrative expenses in the fiscal 2017 period declined by approximately 6% from the fiscal 2015 period. The reduction in these expenses reflects the effect of our efforts to control such costs.

Depreciation and amortization includes depreciation of equipment, furniture and fixtures and the amortization of intangible assets. These costs were approximately \$652,000 in the three months ended April 30, 2016, as compared to approximately \$637,000 in the three months ended April 30, 2015. This increase relates primarily to the amortization of intangible assets related to the acquisition of Klein.

Other Income (Expense)

Net interest expense for the three months ended April 30, 2016 was approximately \$264,000 as compared to approximately \$221,000 for the three months ended April 30, 2015. The increase reflects higher interest rates, partially offset by lower average borrowings between the two periods.

Other income and other expense relate primarily to foreign exchange losses and gains incurred by our foreign subsidiaries and branches. Certain of these entities have functional currencies other than the U.S. dollar but in many cases hold U.S. dollar cash balances and have accounts receivable and accounts payable, including inter-company obligations, denominated in U.S. dollars. As the U.S. dollar fluctuates in value against each subsidiary's functional currency, the subsidiary can incur a foreign exchange gain or loss, although the value of these amounts in our consolidated financial statements may not have changed materially. Items of this nature are considered non-cash in our calculation of Adjusted EBITDA and resulted in a net gain of approximately \$174,000 and \$759,000 in the three months ended April 30, 2016 and April 30, 2015, respectively. These net gains in the fiscal 2017 period resulted primarily from the strengthening of the Russian ruble and the Singaporean dollar versus the U.S. dollar. Other of our operations have a functional currency of the U.S. dollar but have assets and liabilities denominated in other currencies. The net foreign exchange gains and losses from these operations resulted in net gains of approximately \$212,000 and \$14,000 in the three months ended April 30, 2016 and April 30, 2015, respectively.

Provision for Income Taxes

Our tax provision for the three months ended April 30, 2016 is a provision of approximately \$299,000 despite a loss before income taxes. This is due to the effect of valuation allowances related to deferred tax assets and the effect of foreign withholding taxes. These deferred tax assets relate primarily to net operating loss carryforwards in the United States and other jurisdictions. Although we do not have a history of such loss carryovers expiring without being utilized and the earliest expiration of a loss carryforward is in 2025, we have a recent history of taxable losses in the United States and future earnings in this jurisdiction are uncertain. In order to fully utilize the deferred tax assets in the United States we must generate taxable income of approximately \$41.0 million.

Liquidity and Capital Resources

Our principal source of liquidity and capital in recent periods has been cash flows provided by operating activities, our Credit Agreement and our Seemap Credit Facility (as defined below). The principal factor that has affected our cash flow from operating activities is the level of oil and gas exploration and development activities as discussed above.

We believe that our liquidity needs for the next 12 months will be met from cash on hand, cash provided by operating activities, proceeds from the issuance of preferred stock and from proceeds from our Credit Agreement, taking into account the possible restrictions on funds from our foreign subsidiaries. However, should our needs for liquidity

increase, such as to make an acquisition, we may seek to issue debt or equity securities. As more fully discussed below, in June 2016, we completed a public offering of preferred stock which resulted in net proceeds to us of approximately \$7.0 million.

The following table sets forth selected historical information regarding cash flows from our Consolidated Statements of Cash Flows:

	For the Three Months Ended April 30, 2016 2015	
	(in thousands)	
Net cash provided by operating activities	\$ 1,750	\$ 6,438
Net cash provided by investing activities	302	66
Net cash used in financing activities	(2,754)	(5,756)
Effect of changes in foreign exchange rates on cash and cash equivalents	(707)	304
Net decrease in cash and cash equivalents	\$ (1,409)	\$ 1,052

Table of Contents

As of April 30, 2016, we had working capital of approximately \$26.3 million, including cash and cash equivalents and restricted cash of approximately \$2.4 million, as compared to working capital of approximately \$28.2 million, including cash and cash equivalents and restricted cash of approximately \$3.8 million, at January 31, 2016. The decrease in working capital resulted primarily from reductions in long-term debt during the first three months of fiscal 2017.

Cash Flows from Operating Activities. Net cash provided by operating activities was approximately \$1.8 million in the first three months of fiscal 2017 as compared to approximately \$6.4 million in the first three months in fiscal 2016. The decrease between the two periods resulted primarily from the change in net income between the periods. In the three months ended April 30, 2015, a significant amount of cash was provided related to decreases in prepaid expenses and other current assets. This relates to the recovery of value added taxes in certain foreign jurisdictions resulting from the importation of equipment.

Cash Flows from Investing Activities. Net cash flows used in investing activities for the three months ended April 30, 2016 included purchases of seismic equipment held for lease totaling approximately \$522,000, of which approximately \$200,000 relates to the net change in accounts payable related to lease pool purchases. Due to the decline in demand for our rental equipment, we have significantly curtailed our purchases of lease pool equipment in recent periods. We expect additions to our lease pool for all of fiscal 2017 to total less than \$2.0 million. We expect to fund these acquisitions with a combination of cash on hand, cash flow generated from operating activities and borrowings under our Credit Agreement.

In the first three months of fiscal 2017, proceeds from the sale of lease pool equipment totaled approximately \$906,000 compared to approximately \$227,000 in the first three months of fiscal 2016. We generally do not seek to sell our lease pool equipment on a regular basis, but may do so from time to time. In particular, we may sell lease pool equipment in response to specific demand from customers if the selling price exceeds the estimated present value of projected future leasing revenue from that equipment. Accordingly, cash flow from the sale of lease pool equipment is unpredictable.

Cash Flows from Financing Activities. Net cash used in financing activities in the first three months of fiscal 2017 consists primarily of approximately \$2.0 million of net payments under the Credit Agreement and \$800,000 of payments pursuant to the Seemap Credit Facility.

In June 2016, we completed a public offering of 320,000 shares of 9.00% cumulative preferred stock (the Series A Preferred Stock). The Series A Preferred Stock has a liquidation preference of \$25.00 per share, an annual dividend rate of 9.00%, has no maturity date, but may be redeemed at the option of the Company at any time after June 8, 2021 or upon a change of control of the Company in which event the conversion would be subject to a limit on the maximum number of shares of common stock to be issued, and is not anticipated to grant holders with voting control of our board of directors. The Series A Preferred Stock is not convertible into shares of our common stock, except in limited situations arising from a change in control of the Company. The net proceeds to us, after deducting underwriting discounts and offering costs, totaled approximately \$7.0 million. We applied all net proceeds to amounts outstanding under the Credit Agreement. Annual dividend requirements for the Series A Preferred Stock total approximately \$720,000.

In connection with the temporary importation of our lease pool equipment into some countries, we are required to post import bonds with the customs authorities of that country. In addition, from time to time we are required to provide performance bonds related to the sale and delivery of new equipment, primarily by Seemap. These bonds are normally provided by insurance companies, surety companies or local banks. In some cases, the party issuing the bond requires that we post collateral to secure our obligations under the bonds. As of April 30, 2016, we had provided stand-by

letters of credit totaling approximately \$840,000 under the Credit Agreement and the Seemap Credit Facility, as defined below, related to such obligations.

On August 2, 2013, we entered into a syndicated, secured, three-year revolving credit agreement (the Credit Agreement) with HSBC Bank USA, N.A. (HSBC) as administrative agent. The Credit Agreement, as amended, provides for borrowings of up to \$30 million, subject to a borrowing base. Proceeds from the Credit Agreement may be used for working capital and general corporate needs. Up to \$10.0 million of the Credit Agreement may be used to secure letters of credit.

In June 2016, we reduced the commitment under the Credit Facility to \$20.0 million from \$30.0 million by giving notice to the bank. We do not anticipate needs for amounts beyond \$20.0 million and do not believe we could incur debt beyond that amount without violating certain provisions of the Credit Agreement. Therefore, we reduced the commitment, as is our right under the provisions of the Credit Agreement, in order to avoid commitment fees on amounts we are not likely to utilize.

The Credit Agreement provides for Eurodollar loans, which bear interest at the Eurodollar base rate, plus a margin of from 2.50% to 3.50% based on our leverage ratio and for ABR loans which bear interest at the applicable base rate plus a margin of from 1.50% to 2.50% based on our leverage ratio. As of April 30, 2016, the margins for Eurodollar loans and ABR loans are 3.50% and 2.50%, respectively. We have agreed to pay a commitment fee on the unused portion of the Credit Agreement of 0.375% to 0.50% based on our leverage ratio. As of April 30, 2016, the commitment fee rate is 0.5%.

Amounts available under the Credit Agreement are subject to a borrowing base which is determined based primarily on the appraised value of our domestic lease pool equipment and certain accounts receivable. The Credit Agreement is secured by essentially all of our domestic assets and 65% of the capital stock of Mitcham Holdings Ltd., which is the holding company for all of our foreign subsidiaries.

Table of Contents

The Credit Agreement contains customary representations, warranties, conditions precedent to credit extensions, affirmative and negative covenants and events of default. The negative covenants include restrictions on liens, additional indebtedness in excess of \$5.0 million, other than indebtedness to HSBC and its affiliates, acquisitions, fundamental changes, dispositions of property, restricted payments, transactions with affiliates and lines of business. The events of default include a change in control provision.

The Credit Facility contains certain financial covenants that require us to maintain a maximum ratio of debt to Adjusted EBITDA, a minimum ratio of fixed charges to Adjusted EBITDA and, in certain circumstances, a maximum ratio of capital expenditures to Adjusted EBITDA, all as defined in the Credit Agreement. The following chart indicates each of these financial covenants as of April 30, 2016:

Description of Financial		Actual for the four quarters
Covenant	Required Amount	ended April 30, 2016
Leverage Ratio	Not more than 2.00 to 1.00	2.29 to 1.00
Fixed Charge Coverage Ratio	Not less than 1.25 to 1.00	1.58 to 1.00
Capital Expenditures to Adjusted EBITDA Ratio	Not more than 1.0 to 1.0, when Adjusted EBITDA is less than \$22.0 million for trailing four quarters	0.18 to 1.00

The Leverage Ratio is defined as the ratio of (a) the sum of funded debt, capital lease obligations and letters of credit to (b) Adjusted EBITDA. The Fixed Charge Coverage Ratio is defined as the ratio of (a) Adjusted EBITDA less the sum of (i) income tax expense and (ii) maintenance capital expenditures to (b) Fixed Charges. Fixed Charges is defined as the sum of interest expense and the current portion of long-term debt, excluding amounts due under the Credit Agreement.

We were in compliance with each of these covenants, except for the Leverage Ratio. However, due to subsequent reductions in amounts of funded debt, no continuing default occurred and the bank has granted a waiver for any default that may have occurred as a result of the Leverage Ratio as of April 30, 2016. We expect to remain in compliance with each of these covenants for the balance of fiscal 2017.

The Credit Agreement contains customary representations, warranties, conditions precedent to credit extensions, affirmative and negative covenants and events of default. The negative covenants include restrictions on liens, additional indebtedness in excess of \$5.0 million, acquisitions, fundamental changes, dispositions of property, restricted payments, and transactions with affiliates and lines of business. The events of default include a change in control provision. The Credit Agreement also contains covenants that limit the use of proceeds from the facility, including letters of credit, to fund or support oil and gas exploration activities within Russia. These provisions could negatively impact our ability to conduct business within Russia.

In August 2014, our wholly-owned subsidiary, Seemap Pte Ltd. (Seemap Singapore), entered into a \$15.0 million credit facility with HSBC Singapore (the Seemap Credit Facility). The facility consists of a \$10.0 million term loan, an uncommitted \$3.0 million revolving credit facility, and an uncommitted \$2.0 million banker s guarantee facility.

The term facility provides for eleven quarterly principal payments of \$800,000 and a final payment of \$1,200,000 on or before August 22, 2017. Interest on the term facility is payable quarterly at LIBOR plus 2.75%. Under the revolving credit facility, Seemap Singapore may borrow up to \$3.0 million from time to time for working capital and other general corporate purposes. Borrowings under this facility bear interest at LIBOR plus 3.00%. Under the banker's guarantee facility HSBC Singapore will, from time to time as requested, issue banker's guarantees for performance, customs or bid bonds. The Seemap Credit Facility is secured by essentially all of the assets of Seemap Singapore and by a corporate guarantee by Mitcham Industries, Inc. The agreement contains customary representations, warranties, affirmative and negative covenants and events of default. The negative covenants include restrictions on Seemap Singapore related to liens, additional indebtedness, acquisitions, fundamental changes, dispositions of property, restricted payments, transactions with affiliates and lines of business. The agreement contains financial covenants that require Seemap Singapore to maintain a minimum net worth of S\$15 million and a minimum ratio of debt to EBITDA of 125%, both measured as of the end of our fiscal year end. We were in compliance with these financial covenants as of January 31, 2016.

Table of Contents

As indicated by the following chart, we were in compliance with all financial covenants as of January 31, 2016:

Description of Financial		
Covenant	Required Amount	Actual for the four quarters ended January 31, 2016
Shareholder s Equity	Not less than \$15.0 million	\$36.3 million
EBITDA to Debt Ratio	Not less than 1.25 to 1.00	1.56 to 1.00

As of June 9, 2016, borrowings of approximately \$6.0 million and letters of credit totaling approximately \$844,000 were outstanding under the Credit Agreement. Under the Seemap Credit Facility the balance of the term loan was \$4.4 million and bankers guarantees totaling approximately \$71,000 were outstanding as of that date. No amounts were outstanding under the revolving credit of the Seemap Credit Facility.

We believe that as of April 30, 2016, the borrowing base under the Credit Agreement was sufficient to provide for borrowings of up to \$30.0 million. However, the financial covenants of the Credit Agreement provide that total debt, as defined, may not exceed 200% of Adjusted EBITDA for the trailing twelve-month period. For the twelve months ended April 30, 2016, Adjusted EBITDA was approximately \$8.1 million, indicating total allowable funded debt of approximately \$16.2 million, including amounts outstanding under the Credit Agreement and the Seemap Credit Facility. The amount available under the Credit Agreement may change throughout the balance of fiscal 2017 based on the level of Adjusted EBITDA and amounts outstanding under the Credit Agreement and the Seemap Credit Facility. We expect Adjusted EBITDA for the trailing twelve-month period as of the end of our fiscal quarters for the balance of fiscal 2017 to be greater than as of April 30, 2016. We do not currently foresee the need to utilize the Credit Agreement to the maximum allowable amount.

We have determined that certain undistributed earnings of our foreign subsidiaries, other than branch operations in Colombia and Peru, have been permanently reinvested outside of the United States. These permanent investments include the purchase of lease pool equipment by certain of those subsidiaries and the acquisition of the ION Source Products. Accordingly, while there is generally no legal restriction on the distribution of such earnings, we do not expect to have any such earnings available to satisfy obligations in the United States, such as the Credit Agreement. Should we in the future distribute these earnings to the United States, such distributions could be subject to foreign withholding taxes in certain cases and would likely result in additional federal income tax obligations in the United States. As of April 30, 2016, we had deposits in foreign banks consisting of both United States dollar and foreign currency deposits equal to approximately \$2.2 million. Approximately \$2.2 million may be distributed to the United States in repayment of inter-company obligations as of April 30, 2016 and therefore do not result in any of the adverse tax consequences discussed above.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

We are exposed to market risk, which is the potential loss arising from adverse changes in market prices and rates. We have not entered, and do not intend to enter, into derivative financial instruments for hedging or speculative purposes.

Foreign Currency Risk

We operate in a number of foreign locations, which gives rise to risk from changes in foreign exchange rates. To the extent possible, we attempt to denominate our transactions in foreign locations in United States dollars. For those

cases in which transactions are not denominated in United States dollars, we are exposed to risk from changes in exchange rates to the extent that non-United States dollar revenues exceed non-United States dollar expenses related to those operations. Our non-United States dollar transactions are denominated primarily in Canadian dollars, Australian dollars, Singapore dollars and Russian rubles. As a result of these transactions, we generally hold cash balances that are denominated in these foreign currencies. At April 30, 2016, our consolidated cash and cash equivalents included foreign currency denominated amounts equivalent to approximately \$1.2 million in United States dollars. A 10% increase in the value of the United States dollar as compared to the value of

Table of Contents

each of these currencies would result in a loss of approximately \$120,000 in the United States dollar value of these deposits, while a 10% decrease would result in an equal amount of gain. We do not currently hold or issue foreign exchange contracts or other derivative instruments as we do not believe it is cost efficient to attempt to hedge these exposures.

Some of our foreign operations are conducted through wholly-owned foreign subsidiaries or branches that have functional currencies other than the United States dollar. We currently have subsidiaries whose functional currencies are the Canadian dollar, British pound sterling, Australian dollar, Russian ruble and the Singapore dollar. Assets and liabilities from these subsidiaries are translated into United States dollars at the exchange rate in effect at each balance sheet date. The resulting translation gains or losses are reflected as accumulated other comprehensive income (loss) in the shareholders' equity section of our consolidated balance sheets. Approximately 43% of our net assets as of April 30, 2016 were impacted by changes in foreign currencies in relation to the United States dollar.

Interest Rate Risk

As of April 30, 2016, there was \$12.5 million outstanding under the Credit Agreement and \$5.2 million outstanding under the Seemap Credit Facility. Both of these agreements provide for floating interest rates based on an applicable base rate, generally the prime rate, or Eurodollar rates, also known as LIBOR. Assuming the outstanding balance remains unchanged, a change of 100 basis points in the underlying base rate would result in an increase in annual interest expense of approximately \$177,000. In addition, changes in our leverage ratio, as defined in the Credit Agreement, could result in an increase to our interest expense. We have not entered into interest rate hedging arrangements in the past, and have no plans to do so in the future. Due to fluctuating balances in the amount outstanding under the Credit Agreement, we do not believe such arrangements to be cost effective.

Item 4. Controls and Procedures***Evaluation of Disclosure Controls and Procedures***

As required by Rule 13a-15(b) of the Exchange Act, we have evaluated, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Form 10-Q. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in reports that we file under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based upon the evaluation, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures were effective as of April 30, 2016 at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There was no change in our system of internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended April 30, 2016 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

Item 1. *Legal Proceedings*

From time to time, we are a party to legal proceedings arising in the ordinary course of business. We are not currently a party to any legal proceedings, individually or collectively, that we believe could have a material adverse effect on our results of operations or financial condition or is otherwise material.

Item 1A. *Risk Factors*

The risk factors included in our Annual Report on Form 10-K for the fiscal year ended January 31, 2016 have not materially changed. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results.

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds*

(a) Not applicable.

(b) Not applicable.

Item 3. *Defaults Upon Senior Securities*

Not applicable.

Item 4. *Mine Safety Disclosures*

Not applicable.

Item 5. *Other Information*

Not applicable.

Item 6. *Exhibits*

Exhibits

The exhibits required to be filed pursuant to the requirements of Item 601 of Regulation S-K are set forth in the Exhibit Index accompanying this Form 10-Q and are incorporated herein by reference.
