Nokia applies for delisting from the Frankfurt Stock Exchange

Nokia Corporation

Stock exchange release

November 24, 2011 at 09.00 (CET+1)

Espoo, Finland - Nokia has decided to apply for the delisting of Nokia's shares from the Frankfurt Stock Exchange due to the decreased trading volumes of Nokia shares at the exchange. The application for the delisting will be made to the Management Board of Frankfurt Stock Exchange. Subject to approval, the final day of trading of Nokia shares on the Frankfurt Stock Exchange is estimated to be during the first half of 2012.

Nokia's trading volumes on the Frankfurt Stock Exchange have decreased during the years and currently represent only a small percentage of the total global trading volumes of the Nokia share. In 2003, 2004 and 2007 Nokia delisted from the stock exchanges in London, Paris and Stockholm respectively. Nokia shares will continue to be traded within the Eurozone on the NASDAQ OMX Helsinki Stock Exchange and in the United States in the form of American Depositary Shares on the New York Stock Exchange (NYSE).

Press Release

Espoo, Finland / Shelton, Connecticut November 29, 2011

NewNet plans to acquire Nokia Siemens Networks WiMAX business

NewNet Communication Technologies, LLC, a Skyview Capital, LLC portfolio company, announced today that the company plans to acquire the former Motorola Solutions WiMAX business from Nokia Siemens Networks. Under the terms of the agreement, NewNet would acquire the complete WiMAX product portfolio, the related employees and assets, as well as active customer and supplier contracts. Approximately 300 Nokia Siemens Networks employees would transfer to NewNet. The companies expect to close before December 31, 2011.

The addition of the WiMAX business would enhance the breadth of NewNet's product portfolio, R&D capabilities, customer relationships and our overall market position in providing wireless infrastructure solutions to carriers on a global basis. We are thrilled at the prospect of welcoming a world-class group of WiMAX pioneers and thought leaders to the NewNet team," said Ron Pyles, president and CEO of NewNet.

NewNet recognizes there is enormous potential in providing outstanding products, support and services to operators who have already invested heavily in WiMAX technologies as well as those who will do so in the future. We are committed to serving the market with an industry leading roadmap and innovative product migration options.

We believe that our current WiMAX customers would receive the highest quality products, services and sales support from NewNet," said Marc Rouanne, head of Network Systems, Nokia Siemens Networks. This transaction would also provide an excellent opportunity for our WiMAX employees. We have great confidence in NewNet's plans to become a major WiMAX infrastructure provider. The company has a solid track record in acquiring telecommunication businesses and driving revenue growth.

This transaction represents a significant milestone in our strategy of building a strong global presence in the telecommunications marketplace through NewNet Communication Technologies," said Alex Soltani, chairman and CEO of Skyview Capital. We are very excited about the WiMAX market opportunity and are fully committed to supporting Ron and his team as they evolve the business into a global leadership position.

As a part of the transaction the companies expect to transition approximately 300 globally deployed Nokia Siemens Networks employees to NewNet. Many of these employees are based in suburban Chicago, USA and Hangzhou, China. Nokia Siemens Networks and NewNet believe this acquisition would provide transferring employees with attractive professional growth opportunities in a solid, technologically advanced company that has an on-going focus within their core areas of expertise.

Specific terms of the transaction were not disclosed.

About Nokia Siemens Networks

Nokia Siemens Networks is a leading global enabler of telecommunications services. With its focus on innovation and sustainability, the company provides a complete portfolio of mobile,

environment, all of which are difficult to predict and many of which are beyond management control, and that could cause actual results to differ materially from estimated results expressed in or implied by these forward-looking statements. Such risks and uncertainties include, but are not limited to, the risks to both companies that the acquisition of the WiMAX business will not be consummated within the stated time frame because of the inability to satisfy closing conditions including obtaining needed regulatory approvals in various jurisdictions; the requirement that NewNet

establish local entities to receive the acquired assets of the WiMAX business; and compliance with local employee related laws as well as, in respect of Nokia Corporation including Nokia Siemens Networks, the risk factors specified on pages 12-39 of Nokia's annual report Form 20-F for the year ended December 31, 2010 under Item 3D. Risk Factors. Forward-looking statements made in this release, or elsewhere, speak only as of the date on which the statements were made. New risks and uncertainties arise from time to time, and it is impossible for management to predict these events or how they may affect the company or anticipated results. All forward-looking statements are qualified in their entirety by this cautionary statement. In light of these risks and uncertainties, readers should keep in mind that any forward-looking statement made in this release may not occur. The companies have no duty or obligation to, and do not intend to, update or otherwise revise any forward-looking statements, whether as a result of new information, future events or other factors, except as may be required by law. Readers are cautioned not to place undue reliance on forward-looking statements.

Press Release

Espoo, Finland / Ottawa, Canada November 4, 2011

DragonWave plans to acquire Nokia Siemens Networks microwave transport business

Companies also plan strategic technology and supply relationship

DragonWave, Inc. (TSX: DWI; NASDAQ: DRWI) plans to acquire Nokia Siemens Networks microwave transport business, including its associated operational support systems (OSS) and related support functions (the business). Under the terms of the Master Acquisition Agreement signed today, as well as acquiring the business, DragonWave would also become the preferred, strategic supplier to Nokia Siemens Networks of packet microwave and related products, and the companies would jointly coordinate technology development activities. The planned transaction is subject to any applicable regulatory, exchange and third party approvals, a consultation process with trade union representatives, and other customary terms and conditions.

Nokia Siemens Networks and DragonWave believe the proposed acquisition and supply agreements would accelerate innovation in backhaul products, supporting world class microwave solutions for mobile operators. The companies aim to complete the planned acquisition and supply agreements in the first quarter 2012 (the closing date).

Following the proposed acquisition, Nokia Siemens Networks would retain responsibility for its existing solution sales and associated services for microwave transport, while DragonWave would be responsible for the product line, including R&D, product management and operations functions.

Through this strategic relationship, customers would continue to receive high-quality services and sales support from Nokia Siemens Networks, while DragonWave's best of breed products would ensure they have access to industry leading technology, said Marc Rouanne, head of Network Systems, Nokia Siemens Networks. Our intention is to capitalize on DragonWave's proven capabilities for innovative product development and focus on our end-to-end solutions.

DragonWave is very proud to partner with Nokia Siemens Networks. We hope to welcome new employees as a valuable addition to the DragonWave team, said Peter Allen, president & chief executive officer of DragonWave. This relationship is transformational, giving us the ability to serve customers who want to access an integrated solution. In addition, it provides DragonWave an expanded technology base to address those customers who wish to purchase stand-alone best-in-breed products. Our increased scale, diversity and customer footprint, coupled with significantly enhanced resources and capabilities, will provide a solid foundation for faster innovation and broader market penetration.

The consideration paid by DragonWave on closing will include approximately 10 million euros in cash subject to customary purchase price adjustments and 5 million euros worth of DragonWave common shares which will be subject to a lock-up agreement restricting sale or disposition of the shares (subject to customary exceptions) for 24 months. DragonWave will also assume employee liabilities of approximately 10 million euros and will enter into a

Nokia Siemens Networks

Media Relations

PO Box 1

FI-02022 Nokia Siemens Networks

capital asset lease arrangement for approximately 5 million euros. The terms of the Master Acquisition Agreement also provides for sales performance based earn-out payments to be made following closing. The hardware and basic software earn-out period runs for 18 months following closing and the earn-out period on application software upgrades runs for four years following closing. The earn-out payments could raise the value of the transaction by approximately 80 million euros.

DragonWave expects to finance the transaction through a combination of cash on its balance sheet and increased debt facilities provided by Comerica Bank and Export Development Canada. Such debt facilities are subject to conditions and will be entered into on, and subject to, closing of the acquisition.

The planned deal would substantially broaden and strengthen DragonWave's product presence in major mobile operators throughout the world through Nokia Siemens Networks' extensive global sales channel.

As part of the proposed acquisition, the companies expect approximately 360 Nokia Siemens Networks employees, mainly based in Milan, Italy and Shanghai, China, to transfer to DragonWave. The companies will shortly enter into consultation regarding the proposed acquisition with employees and employee representatives in accordance with applicable law provisions and relevant timelines.

Both Nokia Siemens Networks and DragonWave believe the planned acquisition would provide transferring employees with attractive new opportunities in a solid, technologically advanced company, with its focus on their core areas of expertise.

This planned deal is a significant acquisition for DragonWave under applicable securities laws and, accordingly, DragonWave will file a Business Acquisition Report within 75 days of closing. Canaccord Genuity Corp. acted as exclusive financial advisor to DragonWave.

Conference Call and Webcast

DragonWave will host a conference call and webcast beginning at 08:30 a.m. (Eastern Time) on Friday, November 4, 2011.

Toll-free North America Dial-in: 866 393 0571

International Dial-in: +1 760 536 8545

Forward-looking statements

Certain statements in this release constitute forward-looking statements within the meaning of applicable securities laws. Forward-looking statements include, without limitation, statements as to the plans and terms of the transaction between Nokia Siemens Networks and DragonWave (referred to below as the "transaction"); DragonWave's growth opportunities as a result of the proposed transaction; the potential benefits of such transaction to either Nokia Siemens Networks and DragonWave (referred to below as the "parties") and expectations regarding the future business relationship between the parties. Forward-looking statements are based on certain assumptions, including the parties' beliefs regarding the industry and markets in which the parties operate; successful completion of the proposed transaction; expectations regarding potential synergies and prospects for the business if the transaction is closed and statements preceded by "believe," "expect," "anticipate," "foresee," "target," "estimate," "designed," "plans," "will" or similar expressions. The proposed transaction is subject to risks, including: the risks that the parties will not proceed with the transaction for any reason; that the ultimate terms of the transaction will differ from those that are currently contemplated; that if the transaction is completed, that expected synergies will not materialize, that unexpected costs will be incurred to integrate the business, or that end-customer demand will not meet expectations. In particular, the completion of the proposed transaction is subject to a number of terms and conditions, including, without limitation regulatory approvals and no occurrence of a material adverse effect. These approvals may not be obtained and/or the other conditions to the transaction may not be satisfied, in which case the proposed transaction could be modified, restructured or terminated. Other risks relating to Nokia Corporation including Nokia Siemens Networks are specified on pages 12-39 of Nokia's annual report Form 20-F for the year ended December 31, 2010 under item 3D "Risk Factors". Other risks relating to DragonWave's business and industry, and risks associated with acquisitions generally, can be found in the public documents filed by DragonWave with U.S. and Canadian securities regulatory authorities. Readers are cautioned not to place undue reliance on forward-looking statements. The risks referred to above, as well as others, could cause actual results and events to vary materially. The parties assume no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by law.
