740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

Performance Leveraged Upside Securities<sup>SM</sup>  
Principal at Risk Securities

## **Overview**

The securities offered by this pricing supplement are unsecured debt securities issued by Citigroup Inc. Unlike conventional debt securities, the securities do not pay interest and do not repay a fixed amount of principal at maturity. Instead, the securities offer a payment at maturity that may be greater than, equal to or less than the stated principal amount, depending on the performance of shares of the WisdomTree India Earnings Fund (the "underlying shares") from the initial share price to the final share price.

The securities offer leveraged exposure to a limited range of potential appreciation of the underlying shares as described below. In exchange for that leverage within a limited range, investors in the securities must be willing to forgo (i) any appreciation of the underlying shares in excess of the maximum return at maturity specified below and (ii) any dividends that may be paid on the underlying shares. In addition, investors in the securities must be willing to accept full downside exposure to any depreciation of the underlying shares. **If the final share price is less than the initial share price, you will lose 1% of the stated principal amount of your securities for every 1% of that decline. There is no minimum payment at maturity.**

In order to obtain the modified exposure to the underlying shares that the securities provide, investors must be willing to accept (i) an investment that may have limited or no liquidity and (ii) the risk of not receiving any amount due under the securities if we default on our obligations. **All payments on the securities are subject to the credit risk of Citigroup Inc.**

**KEY TERMS**

**Underlying shares:** Shares of the WisdomTree India Earnings Fund (NYSE Arca symbol: "EPI") (the "underlying share issuer" or "ETF")

**Aggregate stated principal amount:** \$7,402,650

**Stated principal amount:** \$10 per security

**Pricing date:** May 29, 2015

**Issue date:** June 3, 2015

**Valuation date:** August 31, 2016, subject to postponement if such date is not a scheduled trading day or if certain market disruption events occur

**Maturity date:** September 6, 2016

For each \$10 stated principal amount security you hold at maturity:

If the final share price is **greater than** the initial share price:  
\$10 + the leveraged return amount, subject to the maximum return at maturity

**Payment at maturity:** If the final share price is **less than or equal to** the initial share price:  
\$10 × the share performance factor

**If the final share price declines from the initial share price, your payment at maturity will be less, and possibly significantly less, than the \$10 stated principal amount per security. You should not invest in the securities unless you are willing and able to bear the risk of losing a significant portion of your investment.**

**Initial share price:** \$22.12, the closing price of the underlying shares on the pricing date

**Final share price:** The closing price of the underlying shares on the valuation date

**Share performance factor:** The final share price *divided by* the initial share price

**Share percent increase:** The final share price *minus* the initial share price, *divided by* the initial share price

**Leveraged return amount:** \$10 × the share percent increase × the leverage factor

**Leverage factor:** 300.00%

**Maximum return at maturity:** \$2.00 per security (20.00% of the stated principal amount). Because of the maximum return at maturity, the payment at maturity will not exceed \$12.00 per security.

**Listing:** The securities will not be listed on any securities exchange

**CUSIP / ISIN:** 17323B273 / US17323B2732

<b>Underwriter:</b>	Citigroup Global Markets Inc. ("CGMI"), an affiliate of the issuer, acting as principal		
<b>Underwriting fee and issue price:</b>	<b>Issue price<sup>(1)(2)</sup></b>	<b>Underwriting fee</b>	<b>Proceeds to issuer</b>
<b>Per security:</b>	\$10	\$0.175 <sup>(2)</sup>	\$9.775
		\$0.05 <sup>(3)</sup>	
<b>Total:</b>	\$7,402,650	\$166,559.625	\$7,236,090.375

(1) On the date of this pricing supplement, the estimated value of the securities is \$9.729 per security, which is less than the issue price. The estimated value of the securities is based on CGMI's proprietary pricing models and our internal funding rate. It is not an indication of actual profit to CGMI or other of our affiliates, nor is it an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you at any time after issuance. See "Valuation of the Securities" in this pricing supplement.

(2) CGMI, an affiliate of Citigroup Inc. and the underwriter of the sale of the securities, is acting as principal and will receive an underwriting fee of \$0.225 for each \$10 security sold in this offering. Certain selected dealers, including Morgan Stanley Wealth Management and their financial advisors, will collectively receive from CGMI a fixed selling concession of \$0.175 for each \$10 security they sell. Additionally, it is possible that CGMI and its affiliates may profit from hedging activity related to this offering, even if the value of the securities declines. See "Use of Proceeds and Hedging" in the accompanying prospectus.

(3) Reflects a structuring fee payable to Morgan Stanley Wealth Management by CGMI of \$0.05 for each security.

**Investing in the securities involves risks not associated with an investment in conventional debt securities. See "Summary Risk Factors" beginning on page PS-4.**

**Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the securities or determined that this pricing supplement and the accompanying product supplement, prospectus supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

*You should read this pricing supplement together with the accompanying product supplement, prospectus supplement and prospectus, each of which can be accessed via the hyperlinks below:*

**Product Supplement No. EA-02-03 dated November 13, 2013**

**Prospectus Supplement and Prospectus each dated November 13, 2013**

**The securities are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.**

Citigroup Inc.

740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

## Additional Information

**General.** The terms of the securities are set forth in the accompanying product supplement, prospectus supplement and prospectus, as supplemented by this pricing supplement. The accompanying product supplement, prospectus supplement and prospectus contain important disclosures that are not repeated in this pricing supplement. For example, certain events may occur that could affect your payment at maturity, such as market disruption events and other events affecting the underlying shares. These events and their consequences are described in the accompanying product supplement in the sections “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Consequences of a Market Disruption Event; Postponement of a Valuation Date” and “—Delisting, Liquidation or Termination of an Underlying ETF,” and not in this pricing supplement. It is important that you read the accompanying product supplement, prospectus supplement and prospectus together with this pricing supplement in connection with your investment in the securities. Certain terms used but not defined in this pricing supplement are defined in the accompanying product supplement.

**Dilution and Reorganization Adjustments.** The initial share price is a “Relevant Price” for purposes of the section “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments” in the accompanying product supplement. Accordingly, the initial share price is subject to adjustment upon the occurrence of any of the events described in that section.

## Investment Summary

The securities can be used:

As an alternative to direct exposure to the underlying shares that enhances returns, subject to the maximum return at maturity, for a limited range of potential appreciation of the underlying shares;

To enhance returns and potentially outperform the underlying shares in a moderately bullish scenario; and

To achieve similar levels of upside exposure to the underlying shares as a direct investment, subject to the maximum return at maturity, while using fewer dollars by taking advantage of the leverage factor.

If the final share price is less than the initial share price, the securities are exposed on a 1-to-1 basis to the percentage of that decline. Accordingly, investors may lose their entire initial investment in the securities.

<b>Maturity:</b>	Approximately 15 months
<b>Leverage factor:</b>	300.00%, subject to the maximum return at maturity. The leverage factor applies only if the final share price is greater than the initial share price.
<b>Maximum return at maturity:</b>	\$2.00 (20.00% of the stated principal amount)
<b>Minimum payment at maturity:</b>	None. Investors may lose their entire initial investment in the securities.
<b>Interest:</b>	None

#### Key Investment Rationale

The securities provide for the possibility of receiving a return at maturity equal to 300% of the appreciation of the underlying shares, *provided* that investors will not receive a payment at maturity in excess of the maximum payment at maturity, which is \$12.00 per security. At maturity, if the underlying shares have **appreciated** in value, investors will receive the stated principal amount of their investment plus the leveraged upside performance of the underlying shares, subject to the maximum return at maturity. However, if the underlying shares have **depreciated** in value, investors will lose 1% for every 1% decline in the value of the underlying shares from the initial share price. Under these circumstances, the payment at maturity will be less than the stated principal amount and could be zero.

**Investors may lose their entire initial investment in the securities.** All payments on the securities are subject to the credit risk of Citigroup Inc.

<b>Leveraged Upside Performance:</b>	The securities offer investors an opportunity to capture enhanced returns relative to a direct investment in the underlying shares within a limited range of positive performance.
<b>Upside Scenario:</b>	If the final share price is <b>greater than</b> the initial share price, the payment at maturity for each security will be equal to the \$10 stated principal amount <i>plus</i> the leveraged return amount, subject to the maximum return at maturity of \$2.00 per security (20.00% of the stated principal amount). For example, if the final share price is 3% greater than the initial share price, the securities will provide a total return of 9% at maturity.
<b>Downside Scenario:</b>	If the final share price is <b>less than</b> the initial share price, you will lose 1% for every 1% decline in the value of the underlying shares from the initial share price and the payment at maturity

Citigroup Inc.

740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

will be less than the stated principal amount. For example, if the final share price is 30% less than the initial share price, you will receive a payment at maturity of \$7.00 per security, or 70% of the stated principal amount. There is no minimum payment at maturity on the securities, and investors may lose their entire initial investment.

### Hypothetical Examples

The diagram below illustrates your payment at maturity for a range of hypothetical percentage changes from the initial share price to the final share price.

**Investors in the securities will not receive any dividends on the underlying shares or the stocks included in or held by the ETF. The diagram and examples below do not show any effect of lost dividend yield over the term of the securities.** See “Summary Risk Factors—You will not have voting rights, rights to receive any dividends or other distributions or any other rights with respect to the ETF” below.

### PLUS

#### Payment at Maturity Diagram

n The Securities    n The Underlying Shares

Your actual payment at maturity per security will depend on the actual final share price. The examples below are intended to illustrate how your payment at maturity will depend on whether the final share price is greater than or less than the initial share price and by how much.

**Example 1—Upside Scenario A.** The hypothetical final share price is \$23.23 (an approximately 5.00% increase from the initial share price), which is **greater than** the initial share price.

Payment at maturity per security = \$10 + the leveraged return amount, subject to the maximum return at maturity of \$2.00 per security

= \$10 + (\$10 × the share percent increase × the leverage factor), subject to the maximum return at maturity of \$2.00 per security

= \$10 + (\$10 × 5.00% × 300.00%), subject to the maximum return at maturity of \$2.00 per security

= \$10 + \$1.50, subject to the maximum return at maturity of \$2.00 per security

= \$11.50

May 2015 PS-3

Citigroup Inc.

740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

Because the underlying shares appreciated from the initial share price to the hypothetical final share price and the leveraged return amount of \$1.50 per security results in a total return at maturity of 15.00%, which is less than the maximum return at maturity of 20.00%, your payment at maturity in this scenario would be equal to the \$10 stated principal amount per security *plus* the leveraged return amount, or \$11.50 per security.

**Example 2—Upside Scenario B.** The hypothetical final share price is \$33.18 (a 50.00% increase from the initial share price), which is **greater than** the initial share price.

Payment at maturity per security = \$10 + the leveraged return amount, subject to the maximum return at maturity of \$2.00 per security

= \$10 + (\$10 × the share percent increase × the leverage factor), subject to the maximum return at maturity of \$2.00 per security

= \$10 + (\$10 × 50.00% × 300.00%), subject to the maximum return at maturity of \$2.00 per security

= \$10 + \$15.00, subject to the maximum return at maturity of \$2.00 per security

= \$12.00

Because the underlying shares appreciated from the initial share price to the hypothetical final share price and the leveraged return amount of \$15.00 per security would result in a total return at maturity of 150.00%, which is greater than the maximum return at maturity of 20.00%, your payment at maturity in this scenario would equal the maximum payment at maturity of \$12.00 per security. In this scenario, an investment in the securities would underperform a hypothetical alternative investment providing 1-to-1 exposure to the appreciation of the underlying shares without a maximum return.

**Example 3—Downside Scenario.** The hypothetical final share price is \$6.64 (an approximately 70.00% decrease from the initial share price), which is **less than** the initial share price.

Payment at maturity per security = \$10 × the share performance factor

= \$10 × 30.00%

= \$3.00

Because the underlying shares depreciated from the initial share price to the hypothetical final share price, your payment at maturity in this scenario would reflect 1-to-1 exposure to the negative performance of the underlying shares.

#### Summary Risk Factors

An investment in the securities is significantly riskier than an investment in conventional debt securities. The securities are subject to all of the risks associated with an investment in our conventional debt securities, including the risk that we may default on our obligations under the securities, and are also subject to risks associated with the underlying shares. Accordingly, the securities are suitable only for investors who are capable of understanding the complexities and risks of the securities. You should consult your own financial, tax and legal advisers as to the risks of an investment in the securities and the suitability of the securities in light of your particular circumstances.

The following is a summary of certain key risk factors for investors in the securities. You should read this summary together with the more detailed description of risks relating to an investment in the securities contained in the section “Risk Factors Relating to the Securities” beginning on page EA-6 in the accompanying product supplement. You should also carefully read the risk factors included in the documents incorporated by reference in the accompanying prospectus, including our most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q, which describe risks relating to our business more generally.

**You may lose some or all of your investment.** Unlike conventional debt securities, the securities do not repay a fixed amount of principal at maturity. Instead, your payment at maturity will depend on the performance of the underlying shares. If the final share price is less than the initial share price, you will lose 1% of the stated principal amount of the securities for every 1% by which the final share price is less than the initial share price. There is no minimum payment at maturity on the securities, and you may lose up to all of your investment.

**The securities do not pay interest.** Unlike conventional debt securities, the securities do not pay interest or any other amounts prior to maturity. You should not invest in the securities if you seek current income during the term of the

securities.

**Your potential return on the securities is limited.** Your potential total return on the securities at maturity is limited to the maximum return at maturity of 20.00%, which is equivalent to a maximum return at maturity of \$2.00 per security and would result in a maximum payment at maturity of \$12.00 per security. Taking into account the leverage factor, any increase in the final share price over the initial share price by more than approximately 6.67% will not increase your return on the securities and will progressively reduce the effective amount of leverage provided by the securities.

**You will not have voting rights, rights to receive any dividends or other distributions or any other rights with respect to the ETF.** As of May 29, 2015, the trailing 12-month dividend yield of the underlying shares was approximately 0.72%. While it is impossible to know the future dividend yield of the underlying shares, if this trailing 12-month dividend yield were to remain

May 2015 PS-4

Citigroup Inc.

740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

constant for the term of the securities, you would be forgoing an aggregate yield of approximately 0.90% (assuming no reinvestment of dividends) by investing in the securities instead of investing directly in the underlying shares or in another investment linked to the underlying shares that provides for a pass-through of dividends. The payment scenarios described in this pricing supplement do not show any effect of lost dividend yield over the term of the securities.

**Your payment at maturity depends on the closing price of the underlying shares on a single day.** Because your payment at maturity depends on the closing price of the underlying shares solely on the valuation date, you are subject to the risk that the closing price of the underlying shares on that day may be lower, and possibly significantly lower, than on one or more other dates during the term of the securities. If you had invested directly in the underlying shares or in another instrument linked to the underlying shares that you could sell for full value at a time selected by you, or if the payment at maturity were based on an average of closing prices of the underlying shares, you might have achieved better returns.

**The securities are subject to the credit risk of Citigroup Inc.** If we default on our obligations under the securities, you may not receive anything owed to you under the securities.

**The securities will not be listed on a securities exchange and you may not be able to sell them prior to maturity.** The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. CGMI currently intends to make a secondary market in relation to the securities and to provide an indicative bid price for the securities on a daily basis. Any indicative bid price for the securities provided by CGMI will be determined in CGMI's sole discretion, taking into account prevailing market conditions and other relevant factors, and will not be a representation by CGMI that the securities can be sold at that price, or at all. CGMI may suspend or terminate making a market and providing indicative bid prices without notice, at any time and for any reason. If CGMI suspends or terminates making a market, there may be no secondary market at all for the securities because it is likely that CGMI will be the only broker-dealer that is willing to buy your securities prior to maturity. Accordingly, an investor must be prepared to hold the securities until maturity.

**The estimated value of the securities on the pricing date, based on CGMI's proprietary pricing models and our internal funding rate, is less than the issue price.** The difference is attributable to certain costs associated with selling, structuring and hedging the securities that are included in the issue price. These costs include (i) the selling concessions and structuring fees paid in connection with the offering of the securities, (ii) hedging and other costs incurred by us and our affiliates in connection with the offering of the securities and (iii) the expected profit (which may be more or less than actual profit) to CGMI or other of our affiliates in connection with hedging our obligations under the securities. These costs adversely affect the economic terms of the securities because, if they were lower, the economic terms of the securities would be more favorable to you. The economic terms of the securities are also likely to be adversely affected by the use of our internal funding rate, rather than our secondary market rate, to price the securities. See "The estimated value of the securities would be lower if it were calculated based on our secondary market rate" below.

**The estimated value of the securities was determined for us by our affiliate using proprietary pricing models.** CGMI derived the estimated value disclosed on the cover page of this pricing supplement from its proprietary pricing models. In doing so, it may have made discretionary judgments about the inputs to its models, such as the volatility of the underlying shares, dividend yields on the underlying shares and the stocks held by the ETF and interest rates. CGMI's views on these inputs may differ from your or others' views, and as an underwriter in this offering, CGMI's interests may conflict with yours. Both the models and the inputs to the models may prove to be wrong and therefore not an accurate reflection of the value of the securities. Moreover, the estimated value of the securities set forth on the cover page of this pricing supplement may differ from the value that we or our affiliates may determine for the securities for other purposes, including for accounting purposes. You should not invest in the securities because of the estimated value of the securities. Instead, you should be willing to hold the securities to maturity irrespective of the initial estimated value.

**The estimated value of the securities would be lower if it were calculated based on our secondary market rate.**

The estimated value of the securities included in this pricing supplement is calculated based on our internal funding rate, which is the rate at which we are willing to borrow funds through the issuance of the securities. Our internal funding rate is generally lower than the market rate implied by traded instruments referencing our debt obligations in the secondary market for those debt obligations, which we refer to as our secondary market rate. If the estimated value included in this pricing supplement were based on our secondary market rate, rather than our internal funding rate, it would likely be lower. We determine our internal funding rate based on factors such as the costs associated with the securities, which are generally higher than the costs associated with conventional debt securities, and our liquidity needs and preferences. Our internal funding rate is not an interest rate that we will pay to investors in the securities, which do not bear interest.

**The estimated value of the securities is not an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you in the secondary market.** Any such secondary market price will fluctuate over the term of the securities based on the market and other factors described in the next risk factor. Moreover, unlike the estimated value included in this pricing supplement, any value of the securities determined for purposes of a secondary market transaction will be based on our secondary market rate, which will likely result in a lower value for the securities than if our internal funding rate were

Citigroup Inc.

740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

used. In addition, any secondary market price for the securities will be reduced by a bid-ask spread, which may vary depending on the aggregate stated principal amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding related hedging transactions. As a result, it is likely that any secondary market price for the securities will be less than the issue price.

**The value of the securities prior to maturity will fluctuate based on many unpredictable factors.** The value of your securities prior to maturity will fluctuate based on the price and volatility of the underlying shares and a number of other factors, including the price and volatility of the stocks held by the ETF, the dividend yields on the underlying shares and the stocks held by the ETF, the exchange rate and the volatility of the exchange rate between the U.S. dollar and the Indian rupee, the correlation between that rate and the price of the underlying shares, interest rates in the United States and in each of the markets of the stocks held by the ETF, the time remaining to maturity and our creditworthiness, as reflected in our secondary market rate. You should understand that the value of your securities at any time prior to maturity may be significantly less than the issue price.

**Immediately following issuance, any secondary market bid price provided by CGMI, and the value that will be indicated on any brokerage account statements prepared by CGMI or its affiliates, will reflect a temporary upward adjustment.** The amount of this temporary upward adjustment will steadily decline to zero over the temporary adjustment period. See “Valuation of the Securities” in this pricing supplement.

**The securities are subject to currency exchange risk.** Because the price of the securities is related to the U.S. dollar value of stocks of the index underlying the ETF, holders of the securities will be exposed to currency exchange rate risk with respect to the Indian rupee. Movements in the Indian rupee/U.S. dollar exchange rate are volatile and are the result of numerous factors including the supply of, and the demand for, those currencies, as well as government policy, intervention or actions, but are also influenced significantly from time to time by political or economic developments, and by macroeconomic factors and speculative actions related to India and the United States. Further, currencies of emerging economies, such as the Indian economy, are often subject to more frequent and larger central bank interventions than the currencies of developed countries and are also more likely to be affected by drastic changes in monetary or exchange rate policies of the relevant country. An investor's net exposure will depend on the extent to which the Indian rupee strengthens or weakens against the U.S. dollar. If the dollar strengthens against the Indian rupee, the closing price of the underlying shares will be adversely affected and the payment at maturity on the securities may be reduced.

Of particular importance to potential currency exchange risk are:

existing and expected rates of inflation;

existing and expected interest rate levels;

the balance of payments; and

the extent of governmental surpluses or deficits in India and the United States of America.

All of these factors are in turn sensitive to the monetary, fiscal and trade policies pursued by the governments of India, the United States and other countries important to international trade and finance.

**There are risks associated with investments in securities linked to the value of foreign equity securities.**

Investments in securities linked to the value of foreign equity securities involve risks associated with the securities markets in those countries, including risks of volatility in those markets, governmental intervention in those markets and cross-shareholdings in companies in certain countries. Also, there is generally less publicly available information about foreign companies than about U.S. companies that are subject to the reporting requirements of the SEC, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements different from those applicable to U.S. reporting companies. In addition, share prices of companies located in emerging markets, such as India, or whose principal operations are located in emerging markets, are subject to political, economic, financial and social factors that affect emerging markets. These factors, which could negatively affect the value of the securities, include the possibility of changes in local or national economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other laws or restrictions applicable to such companies or to investments in equity securities of companies located, or whose principal operations are located, in emerging markets. Specifically, political and/or legal developments in emerging markets could include forced divestiture of assets; restrictions on production, imports and exports; war or other international conflicts; civil unrest and local security concerns that threaten the safe operation of company facilities; price controls; tax increases and other retroactive tax claims; expropriation of property; cancellation of contract rights; and environmental regulations. Moreover, the economies of emerging nations may differ unfavorably from the U.S. economy in such respects as growth of gross national product, rate of inflation, capital investment, resources and self-sufficiency.

**Our offering of the securities does not constitute a recommendation of the underlying shares.** The fact that we are offering the securities does not mean that we believe that investing in an instrument linked to the underlying shares is likely to achieve favorable returns. In fact, as we are part of a global financial institution, our affiliates may have positions (including short positions) in the underlying shares or the stocks held by the ETF or in instruments related to the underlying shares or such stocks and may

May 2015 PS-6

Citigroup Inc.

740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

publish research or express opinions, that in each case are inconsistent with an investment linked to the underlying shares. These and other activities of our affiliates may affect the price of the underlying shares in a way that has a negative impact on your interests as a holder of the securities.

**The price of the underlying shares may not completely track the performance of the index underlying the ETF.**

The price of the underlying shares will reflect transaction costs and fees of the underlying share issuer that are not included in the calculation of the index underlying the ETF. In addition, the underlying share issuer may not hold all of the shares included in, and may hold securities and derivative instruments that are not included in, the index underlying the ETF.

**The price of the underlying shares may be adversely affected by our or our affiliates' hedging and other trading activities.**

We have hedged our obligations under the securities through CGMI or other of our affiliates, who have taken positions directly in the underlying shares or the stocks held by the ETF and other financial instruments related to the underlying shares or such stocks and may adjust such positions during the term of the securities. Our affiliates also trade the underlying shares or the stocks held by the ETF and other financial instruments related to the underlying shares or such stocks on a regular basis (taking long or short positions or both), for their accounts, for other accounts under their management or to facilitate transactions on behalf of customers. These activities could affect the price of the underlying shares in a way that negatively affects the value of the securities. They could also result in substantial returns for us or our affiliates while the value of the securities declines.

**We and our affiliates may have economic interests that are adverse to yours as a result of our affiliates' business activities.**

Our affiliates may currently or from time to time engage in business with the underlying share issuer or the issuers of the stocks held by the ETF, including extending loans to, making equity investments in or providing advisory services to such issuers. In the course of this business, we or our affiliates may acquire non-public information about such issuers, which we will not disclose to you. Moreover, if any of our affiliates is or becomes a creditor of any such issuer, they may exercise any remedies against any such issuer that are available to them without regard to your interests.

**Even if the underlying share issuer pays a dividend that it identifies as special or extraordinary, no adjustment will be required under the securities for that dividend unless it meets the criteria specified in the accompanying product supplement.** In general, an adjustment will not be made under the terms of the securities for any cash dividend paid on the underlying shares unless the amount of the dividend per share, together with any other dividends paid in the same fiscal quarter, exceeds the dividend paid per share in the most recent fiscal quarter by an amount equal to at least 10% of the closing price of the underlying shares on the date of declaration of the dividend. Any dividend will reduce the closing price of the underlying shares by the amount of the dividend per share. If the underlying share issuer pays any dividend for which an adjustment is not made under the terms of the securities, holders of the securities will be adversely affected. See "Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments—Certain Extraordinary Cash Dividends" in the accompanying product supplement.

**The securities will not be adjusted for all events that could affect the price of the underlying shares.** For example, we will not make any adjustment for ordinary dividends or extraordinary dividends that do not meet the criteria described above. Moreover, the adjustments we do make may not fully offset the dilutive or adverse effect of the particular event. Investors in the securities may be adversely affected by such an event in a circumstance in which a direct holder of the underlying shares would not.

**The securities may become linked to shares of an issuer other than the original underlying share issuer upon the occurrence of a reorganization event or upon the delisting of the underlying shares.** For example, if the underlying share issuer enters into a merger agreement that provides for holders of the underlying shares to receive shares of another entity, the shares of such other entity will become the underlying shares for all purposes of the securities upon consummation of the merger. Additionally, if the underlying shares are delisted or the ETF is otherwise terminated, the calculation agent may, in its sole discretion, select shares of another ETF to be the underlying shares. See “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments,” and “—Delisting, Liquidation or Termination of an Underlying ETF” in the accompanying product supplement.

**The calculation agent, which is an affiliate of ours, will make important determinations with respect to the securities.** If certain events occur, such as market disruption events, events with respect to the underlying share issuer that may require a dilution adjustment or the delisting of the underlying shares, CGMI, as calculation agent, will be required to make discretionary judgments that could significantly affect your payment at maturity. In making these judgments, the calculation agent’s interests as an affiliate of ours could be adverse to your interests as a holder of the securities.

**Changes made by the investment adviser to the underlying share issuer or by the sponsor of the index underlying the ETF may adversely affect the underlying shares.** We are not affiliated with the investment adviser to the underlying share issuer or with the sponsor of the index underlying the ETF. Accordingly, we have no control over any changes such investment adviser or sponsor may make to the underlying share issuer or the index underlying the ETF. Such changes could be made at any time and could adversely affect the performance of the underlying shares.

Citigroup Inc.

740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

**The U.S. federal tax consequences of an investment in the securities are unclear.** There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the Internal Revenue Service (the “IRS”). Consequently, significant aspects of the tax treatment of the securities are uncertain, and the IRS or a court might not agree with the treatment of the securities as prepaid forward contracts. If the IRS were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. Even if the treatment of the securities as prepaid forward contracts is respected, a security may be treated as a “constructive ownership transaction,” with consequences described below under “United States Federal Tax Considerations.” In addition, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “United States Federal Tax Considerations” in this pricing supplement. You should also consult your tax adviser regarding the U.S. federal tax consequences of an investment in the securities, as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

#### Information About the Underlying Shares

The WisdomTree India Earnings Fund is an exchange-traded fund that seeks investment results that correspond closely to the price and yield performance, before fees and expenses, of the WisdomTree India Earnings Index. The WisdomTree India Earnings Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the WisdomTree India Earnings Index. The WisdomTree India Earnings Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the WisdomTree India Earnings Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the WisdomTree India Earnings Index as a whole. Under normal circumstances, at least 95% of the WisdomTree India Earnings Fund’s total assets (exclusive of collateral held from securities lending) will be invested in the component securities of the WisdomTree India Earnings Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities. To the extent the WisdomTree India Earnings Index is concentrated (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the WisdomTree India Earnings Fund will concentrate its investments to approximately the same extent as the WisdomTree India Earnings Index.

The WisdomTree India Earnings Fund is managed by WisdomTree Trust (“WTT”), a registered investment company that consists of numerous separate investment portfolios, including the WisdomTree India Earnings Fund. Mellon Capital Management Corporation serves as sub-adviser to the WisdomTree India Earnings Fund. Information provided to or filed with the SEC by WTT pursuant to the Securities Act of 1933 and the Investment Company Act of 1940 can be located by reference to SEC file numbers 333-132380 and 811-21864, respectively, through the SEC’s website at <http://www.sec.gov>. In addition, information may be obtained from other sources including, but not limited

to, press releases, newspaper articles and other publicly disseminated documents. We make no representation or warranty as to the accuracy or completeness of such information. The WisdomTree India Earnings Fund trades on the NYSE Arca, Inc. under the ticker symbol “EPI.”

**This pricing supplement relates only to the securities offered hereby and does not relate to the underlying shares or other securities of the underlying share issuer. We have derived all disclosures contained in this pricing supplement regarding the underlying shares and the underlying share issuer from the publicly available documents described above. In connection with the offering of the securities, neither Citigroup Inc. nor CGMI has participated in the preparation of such documents or made any due diligence inquiry with respect to the underlying share issuer or the underlying shares.**

The securities represent obligations of Citigroup Inc. only. The underlying share issuer is not involved in any way in this offering and has no obligation relating to the securities or to holders of the securities.

Neither we nor any of our affiliates make any representation to you as to the performance of the underlying shares.

#### Historical Information

The graph below shows the closing prices of the underlying shares for each day such price was available from January 4, 2010 to May 29, 2015. The table that follows shows the high and low closing prices of, and dividends paid on, the underlying shares for each quarter in that same period. We obtained the closing prices and other information below from Bloomberg L.P., without independent verification. You should not take the historical prices of the underlying shares as an indication of future performance.

#### Description of the WisdomTree India Earnings Index

The WisdomTree India Earnings Index measures the performance of companies incorporated and traded in India that are profitable and that are eligible to be purchased by foreign investors as of the annual index screening date. The WisdomTree India Earnings Index is calculated to capture price appreciation and total return of its component securities, which assumes dividends are reinvested into the index. The WisdomTree India Earnings Index consists of companies that: (i) are incorporated in India, (ii) are listed on a major stock exchange in India, (iii) have generated at least \$5 million in earnings in their fiscal year prior to the annual index screening date, (iv) have a market capitalization of at least \$200 million on the annual index screening date, (v) have an average daily dollar trading volume of at least \$200,000 for each of the six months prior to the annual index screening date, (vi) have traded at least 250,000 shares per month for each of the six months prior to the annual index screening date, (vii) have a calculated volume factor (the average daily dollar volume for three months preceding the annual index screening date divided by the weight of the security in the WisdomTree India Earnings Index) that is greater than \$200 million and (viii) have a price to earnings ratio of at least 2 as of the annual index screening date.

Companies are weighted in the WisdomTree India Earnings Index based on reported net income in their fiscal year prior to the annual index screening date. The reported net income number is then multiplied by a second factor developed by Standard & Poor's called the "Investability Weighting Factor" ("IWF"). The IWF is used to scale the earnings generated by each company by restrictions on shares available to be purchased. The product of the reported net income and IWF is known as the "Earnings Factor." Companies are weighted by the proportion of each individual earnings factor relative to the sum of all earnings factors within the WisdomTree India Earnings Index. The maximum weight of any one sector in the WisdomTree India Earnings Index, at the time of the annual index screening date, is capped at 25%. In response to market conditions, sector weights may fluctuate between 25% between annual index screening dates.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the WisdomTree India Earnings Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, telecommunication services, and utilities. A sector is comprised of multiple industries.

The inception date of the WisdomTree India Earnings Index was December 3, 2007. The level of the WisdomTree India Earnings Index is reported by Bloomberg L.P. under the ticker symbol "WTIND." As of May 29, 2015, there were 282 components in the WisdomTree India Earnings Index with a total index market capitalization of \$1.31 trillion. As of May 29, 2015, 61.22% of the weight of the WisdomTree India Earnings Index consisted of securities with market capitalizations of over \$10 billion, 26.27% of the WisdomTree India Earnings Index consisted of securities with market capitalizations of between \$2 and \$10 billion, and 12.52% of the WisdomTree India Earnings Index consisted

of companies with market capitalizations of less than \$2 billion. Below is a breakdown of the top ten components of the WisdomTree India Earnings Index by weight, as of May 29, 2015.

<b>Component</b>	<b>Weight</b>
1. Infosys Ltd	7.88%
2. Reliance Industries Ltd	7.67%
3. Housing Development Finance Co	7.54%

#### United States Federal Tax Considerations

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “Summary Risk Factors” in this pricing supplement.

In the opinion of our counsel, Davis Polk & Wardwell LLP, which is based on current market conditions, a security should be treated as a prepaid forward contract for U.S. federal income tax purposes. By purchasing a security, you agree (in the absence of an administrative determination or judicial ruling to the contrary) to this treatment. There is uncertainty regarding this treatment, and the IRS or a court might not agree with it.

Assuming this treatment of the securities is respected and subject to the discussion in “United States Federal Tax Considerations” in the accompanying product supplement, the following U.S. federal income tax consequences should result under current law:

You should not recognize taxable income over the term of the securities prior to maturity, other than pursuant to a sale or exchange.

Upon a sale or exchange of a security (including retirement at maturity), you should recognize gain or loss equal to the difference between the amount realized and your tax basis in the security. Subject to the discussion below concerning the potential application of the “constructive ownership” rules under Section 1260 of the Internal Revenue Code of 1986, as amended (the “Code”), any gain or loss recognized upon a sale, exchange or retirement of a security should be long-term capital gain or loss if you held the security for more than one year.

Even if the treatment of the securities as prepaid forward contracts is respected, your purchase of a security may be treated as entry into a “constructive ownership transaction,” within the meaning of Section 1260 of the Code, with respect to the underlying shares. In that case, all or a portion of any long-term capital gain you would otherwise recognize in respect of your securities would be recharacterized as ordinary income to the extent such gain exceeded the “net underlying long-term capital gain.” Although the matter is unclear, the “net underlying long-term capital gain” may equal the amount of long-term capital gain you would have realized if on the issue date you had purchased underlying shares with a value equal to the amount you paid to acquire your securities and subsequently sold those shares for their fair market value at the time your securities are sold, exchanged or retired (which would reflect the percentage increase, without any multiplier, in the value of the underlying shares over the term of the securities). Alternatively, the “net underlying long-term capital gain” could be calculated using a number of underlying shares that reflects the multiplier used to calculate the payment that you will receive on your securities. Any long-term capital gain recharacterized as ordinary income under Section 1260 would be treated as accruing at a constant rate over the period you held your securities, and you would be subject to an interest charge in respect of the deemed tax liability on the income treated as accruing in prior tax years. Due to the lack of governing authority under Section 1260, our counsel is not able to opine as to whether or how Section 1260 applies to the securities. You should read the section entitled “United States Federal Tax Considerations—Tax Consequences to U.S. Holders—Potential Application of Section 1260 of the Code” in the accompanying product supplement for additional information and consult your tax adviser regarding the potential application of the “constructive ownership” rule.

Under current law, if you are a Non-U.S. Holder (as defined in the accompanying product supplement) of the securities, you generally should not be subject to U.S. federal withholding or income tax in respect of any amount paid to you with respect to the securities,

May 2015 PS-11

Citigroup Inc.

740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

provided that (i) income in respect of the securities is not effectively connected with your conduct of a trade or business in the United States, and (ii) you comply with the applicable certification requirements.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime described above. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. If withholding tax applies to the securities, we will not be required to pay any additional amounts with respect to amounts so withheld.

**You should read the section entitled “United States Federal Tax Considerations” in the accompanying product supplement. The preceding discussion, when read in combination with that section, constitutes the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of owning and disposing of the securities.**

**You should also consult your tax adviser regarding all aspects of the U.S. federal income and estate tax consequences of an investment in the securities and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.**

#### Supplemental Plan of Distribution

CGMI, an affiliate of Citigroup Inc. and the underwriter of the sale of the securities, is acting as principal and will receive an underwriting fee of \$0.225 for each \$10 security sold in this offering. From this underwriting fee, CGMI will pay selected dealers not affiliated with CGMI, including Morgan Stanley Wealth Management and their financial advisers collectively, a fixed selling concession of \$0.175 for each \$10 security they sell. In addition, Morgan Stanley Wealth Management will receive a structuring fee of \$0.05 for each security they sell.

CGMI is an affiliate of ours. Accordingly, this offering will conform with the requirements addressing conflicts of interest when distributing the securities of an affiliate set forth in Rule 5121 of the Financial Industry Regulatory Authority. Client accounts over which Citigroup Inc. or its subsidiaries have investment discretion will not be permitted to purchase the securities, either directly or indirectly, without the prior written consent of the client.

See “Plan of Distribution; Conflicts of Interest” in the accompanying product supplement and “Plan of Distribution” in each of the accompanying prospectus supplement and prospectus for additional information.

A portion of the net proceeds from the sale of the securities will be used to hedge our obligations under the securities. We have hedged our obligations under the securities through CGMI or other of our affiliates. CGMI or such other of our affiliates may profit from this hedging activity even if the value of the securities declines. This hedging activity could affect the closing price of the underlying shares and, therefore, the value of and your return on the securities. For additional information on the ways in which our counterparties may hedge our obligations under the securities, see “Use of Proceeds and Hedging” in the accompanying prospectus.

#### Valuation of the Securities

CGMI calculated the estimated value of the securities set forth on the cover page of this pricing supplement based on proprietary pricing models. CGMI’s proprietary pricing models generated an estimated value for the securities by estimating the value of a hypothetical package of financial instruments that would replicate the payout on the securities, which consists of a fixed-income bond (the “bond component”) and one or more derivative instruments underlying the economic terms of the securities (the “derivative component”). CGMI calculated the estimated value of the bond component using a discount rate based on our internal funding rate. CGMI calculated the estimated value of the derivative component based on a proprietary derivative-pricing model, which generated a theoretical price for the instruments that constitute the derivative component based on various inputs, including the factors described under “Summary Risk Factors—The value of the securities prior to maturity will fluctuate based on many unpredictable factors” in this pricing supplement, but not including our creditworthiness. These inputs may be market-observable or may be based on assumptions made by CGMI in its discretionary judgment.

For a period of approximately three months following issuance of the securities, the price, if any, at which CGMI would be willing to buy the securities from investors, and the value that will be indicated for the securities on any brokerage account statements prepared by CGMI or its affiliates (which value CGMI may also publish through one or more financial information vendors), will reflect a temporary upward adjustment from the price or value that would otherwise be determined. This temporary upward adjustment represents a portion of the hedging profit expected to be realized by CGMI or its affiliates over the term of the securities. The amount of this temporary upward adjustment will decline to zero on a straight-line basis over the three-month temporary adjustment period. However, CGMI is

May 2015 PS-12

Citigroup Inc.

740,265 PLUS Based on Shares of the WisdomTree India Earnings Fund Due September 6, 2016

not obligated to buy the securities from investors at any time. See “Summary Risk Factors—The securities will not be listed on a securities exchange and you may not be able to sell them prior to maturity.”

#### Validity of the Securities

In the opinion of Davis Polk & Wardwell LLP, as special products counsel to Citigroup Inc., when the securities offered by this pricing supplement have been executed and issued by Citigroup Inc. and authenticated by the trustee pursuant to the indenture, and delivered against payment therefor, such securities will be valid and binding obligations of Citigroup Inc., enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), provided that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above. This opinion is given as of the date of this pricing supplement and is limited to the laws of the State of New York, except that such counsel expresses no opinion as to the application of state securities or Blue Sky laws to the securities.

In giving this opinion, Davis Polk & Wardwell LLP has assumed the legal conclusions expressed in the opinion set forth below of Michael J. Tarpley, Associate General Counsel—Capital Markets of Citigroup Inc. In addition, this opinion is subject to the assumptions set forth in the letter of Davis Polk & Wardwell LLP dated November 13, 2013, which has been filed as an exhibit to a Current Report on Form 8-K filed by Citigroup Inc. on November 13, 2013, that the indenture has been duly authorized, executed and delivered by, and is a valid, binding and enforceable agreement of the trustee and that none of the terms of the securities nor the issuance and delivery of the securities, nor the compliance by Citigroup Inc. with the terms of the securities, will result in a violation of any provision of any instrument or agreement then binding upon Citigroup Inc. or any restriction imposed by any court or governmental body having jurisdiction over Citigroup Inc.

In the opinion of Michael J. Tarpley, Associate General Counsel—Capital Markets of Citigroup Inc., (i) the terms of the securities offered by this pricing supplement have been duly established under the indenture and the Board of Directors (or a duly authorized committee thereof) of Citigroup Inc. has duly authorized the issuance and sale of such securities and such authorization has not been modified or rescinded; (ii) Citigroup Inc. is validly existing and in good standing under the laws of the State of Delaware; (iii) the indenture has been duly authorized, executed, and delivered by Citigroup Inc.; and (iv) the execution and delivery of such indenture and of the securities offered by this pricing supplement by Citigroup Inc., and the performance by Citigroup Inc. of its obligations thereunder, are within its corporate powers and do not contravene its certificate of incorporation or bylaws or other constitutive documents. This opinion is given as of the date of this pricing supplement and is limited to the General Corporation Law of the State of Delaware.

Michael J. Tarpley, or other internal attorneys with whom he has consulted, has examined and is familiar with originals, or copies certified or otherwise identified to his satisfaction, of such corporate records of Citigroup Inc., certificates or documents as he has deemed appropriate as a basis for the opinions expressed above. In such examination, he or such persons has assumed the legal capacity of all natural persons, the genuineness of all signatures (other than those of officers of Citigroup Inc.), the authenticity of all documents submitted to him or such persons as originals, the conformity to original documents of all documents submitted to him or such persons as certified or photostatic copies and the authenticity of the originals of such copies.
