

BofI Holding, Inc.
Form 10-Q
January 29, 2015

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the Quarterly Period ended December 31, 2014

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
Commission file number: 000-51201
BofI HOLDING, INC.
(Exact name of registrant as specified in its charter)

Delaware 33-0867444
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

4350 La Jolla Village Drive, Suite 140, San Diego, CA 92122
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (858) 350-6200

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website every Interactive Data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Securities Exchange Act of 1934.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes No

The number of shares outstanding of the Registrant's common stock on the last practicable date: 15,076,557 shares of common stock, \$0.01 par value per share, as of January 23, 2015.

BOFI HOLDING, INC. AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE AND SIX MONTH PERIODS ENDED DECEMBER 31, 2014 AND 2013
(Dollars in thousands, except per share data)
(Unaudited)

1. BASIS OF PRESENTATION

The condensed consolidated financial statements include the accounts of BofI Holding, Inc. and its wholly owned subsidiary, BofI Federal Bank (formerly Bank of Internet USA, the “Bank” and collectively with BofI Holding, Inc., the “Company”). All significant intercompany balances and transactions have been eliminated in consolidation. The accompanying interim condensed consolidated financial statements, presented in accordance with accounting principles generally accepted in the United States of America (“GAAP”), are unaudited and reflect all adjustments which, in the opinion of management, are necessary for a fair statement of financial condition and results of operations for the interim periods. All adjustments are of a normal and recurring nature. Results for the six months ended December 31, 2014 are not necessarily indicative of results that may be expected for any other interim period or for the year as a whole. Certain information and note disclosures normally included in the audited annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) with respect to interim financial reporting. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes for the year ended June 30, 2014 included in our Annual Report on Form 10-K.

2. SIGNIFICANT ACCOUNTING POLICIES

Securities. Debt securities are classified as held-to-maturity and carried at amortized cost when management has both the positive intent and ability to hold them to maturity. Debt securities are classified as available-for-sale when they might be sold before maturity. Trading securities refer to certain types of assets that banks hold for resale at a profit at fair value. Increases or decreases in the fair value of trading securities are recognized in earnings as they occur. Securities available-for-sale are carried at fair value, with unrealized holding gains and losses reported in other comprehensive income, net of tax.

Gains and losses on securities sales are based on a comparison of sales proceeds and the amortized cost of the security sold using the specific identification method. Purchases and sales are recognized on the trade date. Interest income includes amortization of purchase premium or discount. Premiums and discounts on securities are amortized or accreted using the level-yield method without anticipating prepayments, except for mortgage-backed securities where prepayments are anticipated. The Company’s portfolios of held-to-maturity and available-for-sale securities are reviewed quarterly for other-than-temporary impairment. In performing this review, management considers (1) the length of time and extent that fair value has been less than cost, (2) the financial condition and near term prospects of the issuer, (3) the impact of changes in market interest rates on the market value of the security and (4) whether the Company intends to sell or it is more likely than not that it will be required to sell a security in an unrealized loss position before the Company recovers the security’s amortized cost. If either of these criteria for (4) is met, the entire difference between amortized cost and fair value is recognized in earnings. Alternatively, if the criteria for (4) is not met, the amount of impairment recognized in earnings is limited to the amount related to credit losses, while impairment related to other factors is recognized in other comprehensive income. The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis.

Loans. Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of unearned interest, deferred purchase premiums and discounts, deferred loan origination fees and costs, and an allowance for loan losses. Interest income is accrued on the unpaid principal balance. Premiums and discounts on loans purchased as well as loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income using the level-yield method.

Recognition of interest income on all portfolio segments is generally discontinued at the time the loan is 90 days delinquent unless the loan is well secured and in process of collection. Past due status is based on the contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not received for loans placed on nonaccrual, is reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Table of Contents

Loans Held for Sale. U.S government agency (“agency”) loans originated and intended for sale in the secondary market are carried at fair value. Net unrealized gains and losses are recognized through the income statement. The Bank generally sells its loans with the servicing released to the buyer. Gains and losses on loan sales are recorded as mortgage banking income, based on the difference between sales proceeds and carrying value. Non-agency loans held for sale are carried at the lower of cost or fair value.

Loans that were originated with the intent and ability to hold for the foreseeable future (loans held in portfolio) but which have been subsequently designated as being held for sale for risk management or liquidity needs are carried at the lower of cost or fair value calculated on an individual loan by loan basis.

There may be times when loans have been classified as held for sale and for some reason cannot be sold. Loans transferred to a long-term-investment classification from held-for-sale are transferred at the lower of cost or market value on the transfer date. Any difference between the carrying amount of the loan and its outstanding principal balance is recognized as an adjustment to yield by the interest method. A loan cannot be classified as a long-term investment unless the Bank has both the ability and the intent to hold the loan for the foreseeable future or until maturity.

Allowance for Loan Losses. The allowance for loan losses is maintained at a level estimated to provide for probable incurred losses in the loan portfolio. Management determines the adequacy of the allowance based on reviews of individual loans and pools of loans, recent loss experience, current economic conditions, the risk characteristics of the various categories of loans and other pertinent factors. This evaluation is inherently subjective and requires estimates that are susceptible to significant revision as more information becomes available. The allowance is increased by the provision for loan losses, which is charged against current period operating results and recoveries of loans previously charged-off. The allowance is decreased by the amount of charge-offs of loans deemed uncollectible. Allocations of the allowance may be made for specific loans but the entire allowance is available for any loan that, in management’s judgment, should be charged off. See Note 5 of these financial statement footnotes and the financial statement footnotes for the year ended June 30, 2014 included in our Annual Report on Form 10-K for further information.

3. FAIR VALUE

Fair value is defined as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Accounting Standards Codification Topic 820, Fair Value Measurement, also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Quoted prices in active markets for identical assets or liabilities in active markets that the entity has the ability Level to access as of the measurement date. Level 1 assets and liabilities include debt and equity securities that are 1: actively traded in an exchange or over-the-counter market and are highly liquid, such as, among other assets and securities, certain U.S. treasury and other U.S. government debt.
- Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market Level data for substantially the full term of the assets or liabilities. Level 2 assets include securities with quoted prices 2: that are traded less frequently than exchange-traded instruments and whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.
- Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of Level the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined 3: using pricing models such as discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

When available, the Company generally uses quoted market prices to determine fair value, in which case the items are classified in Level 1. In some cases where a market price is available, the Company will make use of acceptable practical expedients (such as matrix pricing) to calculate fair value, in which case the items are classified in Level 2.

The Company considers relevant and observable market prices in its valuations where possible. The frequency of transactions, the size of the bid-ask spread and the nature of the participants are some of the factors the Company uses to help determine whether a market is active and orderly or inactive and not orderly. Price quotes based upon transactions that are not orderly are not considered to be determinative of fair value and should be given little, if any, weight in measuring fair value.

Table of Contents

If quoted market prices are not available, fair value is based upon internally developed valuation techniques that use, where possible, current market-based or independently sourced market parameters, such as interest rates, credit spreads, housing value forecasts, etc. Items valued using such internally generated valuation techniques are classified according to the lowest level input or value driver that is significant to the valuation. Thus, an item may be classified in Level 3 even though there may be some significant inputs that are readily observable.

The following section describes the valuation methodologies used by the Company to measure various financial instruments at fair value, including an indication of the level in the fair value hierarchy in which each instrument is generally classified:

Securities—trading. Trading securities are recorded at fair value. The trading portfolio consists of two different issues of floating-rate debt securities collateralized by pools of bank trust preferred securities. Recent liquidity and economic uncertainty have made the market for collateralized debt obligations less active or inactive. As quoted market prices are not available, the Level 3 fair values for these securities are determined by the Company utilizing industry-standard tools to calculate the net present value of the expected cash flows available to the securities from the underlying assets. The Company's expected cash flows are calculated for each security and include the impact of actual and forecasted bank defaults within each collateral pool as well as structural features of the security's tranche such as lock outs, subordination and overcollateralization. The forecast of underlying bank defaults in each pool is based upon a quarterly financial update including the trend in non-performing assets, the allowance for loan losses and the underlying bank's capital ratios. Also a factor is the Company's loan loss experience in the local economy in which the bank operates. At December 31, 2014, the Company's forecast of cash flows for both securities includes actual and forecasted defaults totaling 25.5% of all banks in the collateral pools, compared to 22.9% of the banks actually in default. The expected cash flows reflect the Company's best estimate of all pool losses which are then applied to the overcollateralization reserve and the subordinated tranches to determine the cash flows. The Company selects a discount rate margin based upon the spread between U.S. Treasury rates and the market rates for active credit grades for financial companies. The discount margin when added to the U.S. Treasury rate determines the discount rate, reflecting primarily market liquidity and interest rate risk since expected credit loss is included in the cash flows. At December 31, 2014, the Company used a weighted average discount margin of 450 basis points above U.S. Treasury rates to calculate the net present value of the expected cash flows and the fair value of its trading securities. The Level 3 fair values determined by the Company for its trading securities rely heavily on management's assumptions as to the future credit performance of the collateral banks, the impact of the global and regional economic activity, the timing of forecasted defaults and the discount rate applied to cash flows. The fair value of the trading securities at December 31, 2014 is sensitive to an increase or decrease in the discount rate. An increase in the discount margin of 100 basis points would have reduced the total fair value of the trading securities and decreased net income before income tax by \$885. A decrease in the discount margin of 100 basis points would have increased the total fair value of the trading securities and increased net income before income tax by \$1,041.

Securities—available-for-sale and held-to-maturity. Available-for-sale securities are recorded at fair value and consist of residential mortgage-backed securities ("RMBS") issued by U.S. agencies, non-agencies, collateralized loan obligations, and municipals. Held-to-maturity securities are recorded at amortized cost and consist of RMBS issued by U.S. agencies, RMBS issued by non-agencies, and municipals. Fair value for U.S. agency securities is generally based on quoted market prices of similar securities used to form a dealer quote or a pricing matrix. There continues to be significant illiquidity in the market for RMBS issued by non-agencies, impacting the availability and reliability of transparent pricing. As orderly quoted market prices are not available, the Level 3 fair values for these securities are determined by the Company utilizing industry-standard tools to calculate the net present value of the expected cash flows available to the securities from the underlying mortgage assets. The Company computes Level 3 fair values for each non-agency RMBS in the same manner (as described below) whether available-for-sale or held-to-maturity. To determine the performance of the underlying mortgage loan pools, the Company estimates prepayments, defaults, and loss severities based on a number of macroeconomic factors, including housing price changes, unemployment rates, interest rates and borrower attributes such as credit score and loan documentation at the time of origination. The Company inputs for each security a projection of monthly default rates, loss severity rates and voluntary prepayment rates for the underlying mortgages for the remaining life of the security to determine the expected cash flows. The

projections of default rates are derived by the Company from the historic default rate observed in the pool of loans collateralizing the security, increased by and decreased by the forecasted increase or decrease in the national unemployment rate. The projections of loss severity rates are derived by the Company from the historic loss severity rate observed in the pool of loans, increased by (and decreased by) the forecasted decrease or increase in the national home price appreciation (“HPA”) index. The largest factors influencing the Company’s modeling of the monthly default rate are unemployment and housing price appreciation. The most updated national unemployment rate announced prior to the end of the period covered by this report (reported for November 2014) was 5.8%, down from the high of 10% in October 2009. Consensus estimates for unemployment are that the rate will continue to decline. Going forward, the Company is projecting lower monthly default rates. The range of loss severity rates applied to each default used in the Company’s projections at December 31,

Table of Contents

2014 are from 28.5% up to 97.9% based upon individual bond historical performance. The default rates and the severities are projected for every non-agency RMBS security held by the Company and will vary monthly based upon the actual performance of the security and the macroeconomic factors discussed above.

To determine the discount rates used to compute the present value of the expected cash flows for these non-agency RMBS securities, the Company separates the securities by the borrower characteristics in the underlying pool. Specifically, “prime” securities generally have borrowers with higher FICO scores and better documentation of income. “Alt-A” securities generally have borrowers with a little lower FICO and a little less documentation of income. “Pay-option ARMs” are Alt-A securities with borrowers that tend to pay the least amount of principal (or increase their loan balance through negative amortization). The Company calculates separate discount rates for prime, Alt-A and Pay-option ARM non-agency RMBS securities using market-participant assumptions for risk, capital and return on equity. The range of annual default rates used in the Company’s projections at December 31, 2014 are from 0.7% up to 17.7% with prime securities tending toward the lower end of the range and Alt-A and Pay-option ARMs tending toward the higher end of the range. The Company applies its discount rates to the projected monthly cash flows which already reflect the full impact of all forecasted losses using the assumptions described above. When calculating present value of the expected cash flows at December 31, 2014, the Company computed its discount rates as a spread between 239 and 925 basis points over the interpolated swap curve with prime securities tending toward the lower end of the range and Alt-A and Pay-option ARMs tending toward the higher end of the range.

Loans Held for Sale. Loans held for sale at fair value are primarily single-family and multifamily residential loans. The fair value of residential loans held for sale is determined by pricing for comparable assets or by existing forward sales commitment prices with investors.

Impaired Loans. Impaired loans are loans which are inadequately protected by the current net worth and paying capacity of the borrowers or the collateral pledged. The accrual of interest income has been discontinued for impaired loans. The impaired loans are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. The Company assesses loans individually and identifies impairment when the loan is classified as impaired or has been restructured or management has serious doubts about the future collectibility of principal and interest, even though the loans may currently be performing. The fair value of an impaired loan is determined based on an observable market price or current appraised value of the underlying collateral. The fair value of impaired loans with specific write-offs or allocations of the allowance for loan losses are generally based on recent real estate appraisals or internal valuation analyses consistent with the methodology used in real estate appraisals and include other third-party valuations and analysis of cash flows. These appraisals and analyses are updated at least on an annual basis. The Company primarily obtains real estate appraisals and in the rare cases where an appraisal cannot be obtained, the Company performs an internal valuation analysis. These appraisals and analyses may utilize a single valuation approach or a combination of approaches including comparable sales and income approaches. The sales comparison approach uses at least three recent similar property sales to help determine the fair value of the property being appraised. The income approach is calculated by taking the net operating income generated by the collateral property of the rent collected and dividing it by an assumed capitalization rate. Adjustments are routinely made in the process by the appraisers to account for differences between the comparable sales and income data available. When measuring the fair value of the impaired loan based upon the projected sale of the underlying collateral, the Company subtracts the costs expected to be incurred for the transfer of the underlying collateral, which includes items such as sales commissions, delinquent taxes and insurance premiums. These adjustments to the estimated fair value of non-performing loans may result in increases or decreases to the provision for loan losses recorded in current earnings. Such adjustments are typically significant and result in a Level 3 classification for the inputs for determining fair value.

Other Real Estate Owned and Repossessed Vehicles. Non-recurring adjustments to certain commercial and residential real estate properties classified as other real estate owned (“OREO”) are measured at the lower of carrying amount or fair value, less estimated costs to sell. Fair values are generally based on third-party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Mortgage Servicing Rights. The Company initially records all mortgage servicing rights (“MSRs”) at fair value and accounts for MSRs at fair value during the life of the MSR, with changes in fair value recorded through current period earnings. Fair value adjustments encompass market-driven valuation changes as well as modeled amortization involving the run-off of value that occurs due to the passage of time as individual loans are paid by borrowers. Market expectations about loan duration, and correspondingly the expected term of future servicing cash flows, may vary from time to time due to changes in expected prepayment activity, especially when interest rates rise or fall. Market expectations of increased loan prepayment speeds may negatively impact the fair value of the single family MSRs. Fair value is also dependent on the discount rate used in calculating present value, which is imputed from observable market activity and market participants and results in Level 3 classification. Management reviews and adjusts the discount rate on an ongoing basis. An increase in the discount rate would reduce the estimated fair value of the MSRs asset.

Table of Contents

Mortgage Banking Derivatives. Level 3 fair values for mortgage banking derivatives are either based upon prices in active secondary markets for identical securities or based on quoted market prices of similar assets used to form a dealer quote or a pricing matrix. If no such quoted price exists, the fair value of a commitment is determined by quoted prices for a similar commitment or commitments, adjusted for the specific attributes of each commitment. These fair values are then adjusted for items such as fallout and estimated costs to originate the loan.

The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with or, in some cases, more conservative than other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the relevant reporting date.

Table of Contents

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis at December 31, 2014 and June 30, 2014. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement:

(Dollars in thousands)	December 31, 2014			Total

Table of Contents

The table below summarizes the quantitative information about level 3 fair value measurements at the periods indicated:

		December 31, 2014		
(Dollars in thousands)	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
Securities – Trading: Collateralized Debt Obligations	\$7,862	Discounted Cash Flow	Total Projected Defaults, Discount Rate over Treasury Constant Prepayment Rate,	18.8 to 31.5% (25.5%) 4.5 to 4.5% (4.5%) 2.5 to 56.9% (9.8%) 0.7 to 17.7% (5.8%)
Securities – Available-for-Sale: Non-agency RMBS	\$31,926	Discounted Cash Flow	Constant Default Rate, Loss Severity, Discount Rate over LIBOR Constant Prepayment Rate,	28.5 to 97.9% (62.3%) 2.4 to 9.3% (6.0%) 4.1 to 12.1% (7.4%) 4.0 to 8.2 (7.1)
Mortgage Servicing Rights	\$1,037	Discounted Cash Flow	Expected Life (in years), Discount Rate	10.0 to 11.5% (10.2%)
Derivative Instruments, net	\$659	Sales Comparison Approach	Projected Sales Profit of Underlying Loans	0.5 to 1.5%
		June 30, 2014		
(Dollars in thousands)	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
Securities – Trading: Collateralized Debt Obligations	\$8,066	Discounted Cash Flow	Total Projected Defaults, Discount Rate over Treasury Constant Prepayment Rate,	19.0 to 26.6% (23.1%) 4.0 to 4.0% (4.0%) 0.1 to 27.8 (10.0%)
Securities – Available-for-Sale: Non-agency RMBS	\$37,409	Discounted Cash Flow	Constant Default Rate, Loss Severity, Discount Rate over LIBOR Constant Prepayment Rate,	0.0 to 21.7% (5.6%) 1.6 to 87.9% (61.7%) 2.5 to 8.4% (5.2%) 5.6 to 7.4% (7.4%) 3.6 to 8.3 (7.1)
Mortgage Servicing Rights	\$562	Discounted Cash Flow	Expected Life (in years), Discount Rate	10.0 to 11.5% (10.1%)
Derivative Instruments, net	\$875	Sales Comparison Approach	Projected Sales Profit of Underlying Loans	0.5 to 1.5%

The significant unobservable inputs used in the fair value measurement of the Company's residential mortgage-backed securities are prepayment rates, probability of default, and loss severity in the event of default. Significant increases (decreases) in any of those inputs in isolation would result in a significantly lower (higher) fair value measurement. Generally, a change in the assumption used for the probability of default is accompanied by a directionally similar change in the assumption used for the loss severity and a directionally opposite change in the assumption used for prepayment rates.

The table below summarizes changes in unrealized gains and losses and interest income recorded in earnings for level 3 trading assets and liabilities that are still held at the periods indicated:

Impaired loans measured for impairment on a non-recurring basis using the fair value of the collateral for collateral-dependent loans have a carrying amount of \$35,427, after charge-offs of \$242 for the six months ended December 31, 2014, and life to date charge-offs of \$5,792. Impaired loans had a related allowance of \$1,177 at December 31, 2014.

Other real estate owned and foreclosed assets, which are measured at the lower of carrying value or fair value less costs to sell, had a net carrying amount of \$809 after charge-offs of \$34 for the three months ended December 31,

2014. Our other real estate owned and foreclosed assets had a net carrying amount of \$75 after charge-offs of \$0 during the year ended June 30, 2014.

Held-to-maturity securities measured for impairment on a non-recurring basis had a fair value of \$85,118 and a carrying amount of \$90,226 at December 31, 2014, after net impairment charges to income of \$1,164 and changes to other comprehensive income of \$2,280 during the six months ended December 31, 2014. The Company recognized net impairment charges to income of \$572 and changes in other comprehensive loss of \$1,078 for the six months ended December 31, 2013. These held-to-maturity securities are valued using Level 3 inputs.

Table of Contents

The Company has elected the fair value option for Agency loans held for sale. These loans are intended for sale and the Company believes that the fair value is the best indicator of the resolution of these loans. Interest income is recorded based on the contractual terms of the loan. None of these loans are 90 days or more past due nor on nonaccrual as of December 31, 2014 and June 30, 2014.

As of December 31, 2014 and June 30, 2014, the aggregate fair value, contractual balance (including accrued interest), and gain was as follows:

(Dollars in thousands)	December 31, 2014	June 30, 2014
Aggregate fair value	\$22,831	\$20,575
Contractual balance	22,314	20,138
Gain	\$517	\$437

The total amount of gains and losses from changes in fair value included in earnings for the period indicated below for loans held for sale were:

Table of Contents

The following table presents quantitative information about level 3 fair value measurements for financial instruments measured at fair value on a non-recurring basis at the periods indicated:

December 31, 2014

(Dollars in thousands)	Fair Value	Valuation Technique(s)	Unobservable Input	Range (Weighted Average) ¹
Impaired loans:				
Single family real estate secured:				
Mortgage	\$27,606	Sales comparison approach	Adjustment for differences between the comparable sales	-32.3 to 37.2% (3.2%)
Home equity	\$51	Sales comparison approach	Adjustment for differences between the comparable sales	-44.0 to 68.0% (7.1%)
Multifamily real estate secured	\$5,138	Sales comparison approach, income approach, Discounted cash flows	Adjustment for differences between the comparable sales and adjustments for differences in net operating income expectations, Capitalization rate	-37.7 to 71.9% (10.8%)
Commercial real estate secured	\$2,175	Sales comparison approach and income approach	Adjustment for differences between the comparable sales and adjustments for differences in net operating income expectations, Capitalization rate	-54.6 to 22.9% (-32.7%)
Auto and RV secured	\$457	Sales comparison approach	Adjustment for differences between the comparable sales	0.0 to 26.7% (10.3%)
Other real estate owned:				
Single family real estate secured:				
Mortgage	\$699	Sales comparison approach	Adjustment for differences between the comparable sales	-9.3 to 24.5% (7.4%)
Auto and RV secured	\$110	Sales comparison approach	Adjustment for differences between the comparable sales	0.0 to 22.5% (10.2%)
HTM Securities – Non-Agency RMBS	\$85,118	Discounted cash flow	Constant prepayment rate, constant default rate, loss severity, discount rate over LIBOR	2.5 to 19.4% (9.3%) 1.4 to 17.7% (6.1%) 31.5 to 76.9% (62.3%) 3.0 to 9.3% (7.1%)

June 30, 2014

(Dollars in thousands) Fair Value Valuation Technique(s) Unobservable Input

				Range (Weighted Average) ¹
Impaired loans:				
Single family real estate secured:				
Mortgage	\$13,385	Sales comparison approach	Adjustment for differences between the comparable sales	-28.7 to 35.1% (1.3%)
Home equity	\$168	Sales comparison approach	Adjustment for differences between the comparable sales	-20.0 to 42.7% (10.1%)
Multifamily real estate secured	\$4,301	Sales comparison approach and income approach	Adjustment for differences between the comparable sales and adjustments for differences in net operating income expectations, Capitalization rate	-43.3 to 65.0% (13.1%)
Commercial real estate secured	\$4,376	Sales comparison approach and income approach	Adjustment for differences between the comparable sales and adjustments for differences in net operating income expectations, Capitalization rate	-84.1 to 82.4% (-22.1%)
Auto and RV secured	\$534	Sales comparison approach	Adjustment for differences between the comparable sales	0.0 to 27.4% (10.3%)
Other real estate owned:				
Auto and RV secured	\$75	Sales comparison approach	Adjustment for differences between the comparable sales	-84.0 to 41.3% (-32.8%)
HTM Securities – Non-Agency RMBS	\$91,297	Discounted cash flow	Constant prepayment rate,	0.1 to 16.3% (10.2%)
			constant default rate,	0.0 to 11.1% (5.9%)
			loss severity,	3.5 to 76.5% (61.2%)
			discount rate over LIBOR	2.7 to 8.4% (6.2%)

¹ For impaired loans and other real estate owned the ranges shown may vary positively or negatively based on the comparable sales reported in the current appraisal. In certain instances, the range can be significant due to small sample sizes and in some cases the property being valued having limited comparable sales with similar characteristics at the time the current appraisal is conducted.

Table of Contents

The methods and assumptions, not previously presented, used to estimate fair value are described as follows: Carrying amount is the estimated fair value for cash and cash equivalents, interest bearing deposits, accrued interest receivable and payable, demand deposits, short-term debt, and variable rate loans or deposits that reprice frequently and fully. For fixed rate loans, deposits, borrowings or subordinated debt and for variable rate loans, deposits, borrowings or subordinated debt with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk. A discussion of the methods of valuing trading securities, available for sale securities and loans held for sale can be found earlier in this footnote. The carrying amount of stock of the Federal Home Loan Bank ("FHLB") approximates the estimated fair value of this investment. The fair value of off-balance sheet items is not considered material.

4. SECURITIES

The amortized cost, carrying amount and fair value for the major categories of securities trading, available-for-sale, and held-to-maturity at December 31, 2014 and June 30, 2014 were:

-
1. U.S. government-backed or government sponsored enterprises including Fannie Mae, Freddie Mac and Ginnie Mae.
 2. Private sponsors of securities collateralized primarily by pools of 1-4 family residential first mortgages. Primarily super senior securities secured by prime, Alt-A or pay-option ARM mortgages.

The Company's non-agency RMBS available-for-sale portfolio with a total fair value of \$31,926 at December 31, 2014 consists of twenty-one different issues of super senior securities with a fair value of \$20,034; one senior structured whole loan security with a fair value of \$11,609 and three mezzanine z-tranche securities with a fair value of \$283 collateralized by seasoned prime and Alt-A first-lien mortgages. The Company acquired its mezzanine z-tranche securities in fiscal 2009 and accounts for them by measuring the excess of cash flows expected at acquisition over the purchase price (accretable yield) and recognizes interest income over the remaining life of the security.

Table of Contents

The non-agency RMBS held-to-maturity portfolio with a carrying value of \$156,894 at December 31, 2014 consists of 77 different issues of super senior securities totaling \$154,752 and one senior-support security with a carrying value of \$2,142. Debt securities with evidence of credit quality deterioration since issuance and for which it is probable at purchase that the Company will be unable to collect all of the par value of the security are accounted for under ASC Topic 310, Accounting for Loans and Debt Securities Acquired with Deteriorated Credit Quality (“ASC Topic 310”). Under ASC Topic 310, the excess of cash flows expected at acquisition over the purchase price is referred to as the accretable yield and is recognized in interest income over the remaining life of the security. The Company has one senior support security that it acquired at a significant discount that evidenced credit deterioration at acquisition and is accounted for under ASC Topic 310. For a cost of \$17,740 the Company acquired the senior support security with a contractual par value of \$30,560 and accretable and non-accretable discounts that were projected to be \$9,015 and \$3,805, respectively. Since acquisition, repayments from the security have been received more rapidly than projected at acquisition, but expected total payments have declined, resulting in a determination that the security was other-than-temporarily impaired and a charge of \$572 was recorded for the fiscal 2014 year and a charge of \$0 for the six months ended December 31, 2014. At December 31, 2014 the security had a remaining contractual par value of zero and amortizable and non-amortizable premium are currently projected to be zero and \$2,472, respectively. The current face amounts of debt securities available-for-sale and held-to-maturity that were pledged to secure borrowings at December 31, 2014 and June 30, 2014 were \$41,076 and \$67,605 respectively.

Table of Contents

The securities with unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows:

December 31, 2014

Table of Contents

There were 34 securities that were in a continuous loss position at December 31, 2014 for a period of more than 12 months. There were 35 securities that were in a continuous loss position at June 30, 2014 for a period of more than 12 months. The following table summarizes amounts of credit loss recognized in the income statement through other-than-temporary impairment charges which reduced non-interest income:

(Dollars in thousands)	For the Three Months Ended December 31,		For the Six Months Ended December 31,	
	2014	2013	2014	2013
Beginning balance	\$(19,351) \$(15,909) \$(18,139) \$(15,336
Additions for the amounts related to credit loss for which an other-than-temporary impairment was not previously recognized	—	—	(39) —
Increases to the amount related to the credit loss for which other-than-temporary impairment was previously recognized	(285) (873) (1,458) (1,446
Ending balance	\$(19,636) \$(16,782) \$(19,636) \$(16,782

At December 31, 2014, non-agency RMBS with a total carrying amount of \$100,000 were determined to have cumulative credit losses of \$19,636 of which \$285 was recognized in earnings during the three months ended December 31, 2014. This quarter's other-than-temporary impairment of \$285 is related to seven non-agency RMBS with a total carrying amount of \$5,964. The Company measures its non-agency RMBS in an unrecognized loss position at the end of the reporting period for other-than-temporary impairment by comparing the present value of the cash flows currently expected to be collected from the security with its amortized cost basis. If the calculated present value is lower than the amortized cost, the difference is the credit component of an other-than-temporary impairment of its debt securities. The excess of present value over the fair value of the security (if any) is the non-credit component only if the Company does not intend to sell the security and will not be required to sell the security before recovery of its amortized cost basis. The credit component of the other-than-temporary impairment is recorded as a loss in earnings and the non-credit component as a charge to other comprehensive income, net of the related income tax benefit.

To determine the cash flow expected to be collected and to calculate the present value for purposes of testing for other-than-temporary impairment, the Company utilizes the same industry-standard tool and the same cash flows as those calculated for Level 3 fair values as discussed in Note 3 – Fair Value. The discount rates used to compute the present value of the expected cash flows for purposes of testing for the credit component of the other-than-temporary impairment are either the implicit rate calculated in each of the Company's securities at acquisition or the last accounting yield. The Company calculates the implicit rate at acquisition based on the contractual terms of the security, considering scheduled payments (and minimum payments in the case of pay-option ARMs) without prepayment assumptions. Once the discount rate (or discount margin in the case of floating rate securities) is calculated as described above, the discount is used in the industry-standard model to calculate the present value of the cash flows.

The gross gains and losses realized through earnings upon the sale of available-for-sale securities were as follows:

(Dollars in thousands)	For the Three Months Ended December 31,		For the Six Months Ended December 31,	
	2014	2013	2014	2013
Proceeds	9,614	—	9,614	—

Table of Contents

5. LOANS & ALLOWANCE FOR LOAN LOSSES

The following table sets forth the composition of the loan portfolio as of the dates indicated:

(Dollars in thousands)	December 31, 2014	June 30, 2014
Single family real estate secured:		
Mortgage	\$2,527,281	\$1,918,626
Home equity	4,267	12,690
Warehouse and other ¹	387,451	370,717
Multifamily real estate secured	1,168,999	978,511
Commercial real estate secured	18,550	24,061
Auto and RV secured	13,516	14,740
Factoring	112,545	118,945
Commercial & Industrial	139,533	152,619
Other	611	1,971
Total gross loans	4,372,753	3,592,880
Allowance for loan losses	(23,187) (18,373
Unaccreted discounts and loan fees	(45,905) (41,666
Total net loans	\$4,303,661	\$3,532,841

- ¹ The balance of single family warehouse loans was \$97,245 at December 31, 2014 and \$92,920 at June 30, 2014. The remainder of the balance is attributable to single family lender finance loans.

Allowance for Loan Losses. The Company's goal is to maintain the allowance for loan losses (sometimes referred to as the "allowance") at a level that is considered to be commensurate with estimated probable incurred credit losses in the portfolio. Although the adequacy of the allowance is reviewed quarterly, management performs an ongoing assessment of the risks inherent in the portfolio. While the Company believes that the allowance for loan losses is adequate at December 31, 2014, future additions to the allowance will be subject to continuing evaluation of estimated and known, as well as inherent, risks in the loan portfolio.

Allowance for Loan Loss Disclosures. The assessment of the adequacy of the Company's allowance for loan losses is based upon a number of quantitative and qualitative factors, including levels and trends of past due and nonaccrual loans, change in volume and mix of loans, collateral values and charge-off history.

The Company provides general loan loss reserves for its recreational vehicle ("RV") and auto loans based upon the borrower credit score at the time of origination and the Company's loss experience to date. The allowance for loan loss for the RV and auto loan portfolio at December 31, 2014 was determined by classifying each outstanding loan according to semi-annually refreshed FICO score and providing loss rates. The Company had \$13,059 of RV and auto loan balances subject to general reserves as follows: FICO greater than or equal to 770: \$3,333; 715 – 769: \$4,399; 700 – 714: \$1,027; 660 – 699: \$2,296 and less than 660: \$2,004.

The Company provides general loan loss reserves for mortgage loans based upon the size and class of the mortgage loan and the loan-to-value ratio ("LTV") at date of origination. The Company divides the LTV analysis into two classes, separating the purchased loans from the loans underwritten directly by the Company. Based on historical performance, the Company concluded that originated loans require lower estimated loss rates than purchased loans. The allowance for each class is determined by dividing the outstanding unpaid balance for each loan by the loan-to-value and applying a loss rates. The LTV groupings for each significant mortgage class are as follows:

The Company had \$2,499,675 of single family mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 60%: \$1,400,432; 61% – 70%: \$899,598; 71% – 80%: \$174,131; and greater than 80%: \$25,514.

The Company had \$1,163,861 of multifamily mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 55%: \$514,885; 56% – 65%: \$380,633; 66% – 75%: \$255,634; 76% – 80%: \$11,847 and greater than 80%: \$862.

The Company had \$16,375 of commercial real estate loan balances subject to general reserves as follows: LTV less than or equal to 50%: \$11,068; 51% – 60%: \$3,889; 61% – 70%: \$1,418; and 71% – 80%: \$0.

The Company's lender finance portfolio consists of business loans well-collateralized by residential real estate. The Company's commercial & industrial portfolio consists of business loans well-collateralized by business assets. The Company's other portfolio consists of other consumer loans. The Company allocates its allowance for loan loss for these asset types based on qualitative factors which consider the value of the collateral and the financial position of the issuer of the receivables.

Purchased	1,759	1,995	
Commercial Real Estate Secured:			
Purchased	2,175	2,985	
Total non-performing loans secured by real estate	34,435	19,851	
Auto and RV Secured	457	534	
Total non-performing loans	\$34,892	\$20,385	
Non-performing loans to total loans	0.80	% 0.57	%

The Company has no loans over 90 days delinquent that are still accruing interest at December 31, 2014.

Approximately 77.59% of the Company's non-performing loans are single family first mortgages already written down to 47.55% in aggregate, of the original appraisal value of the underlying properties. Generally these loans have experienced longer delays completing the foreclosure process due to the poor servicing practices of one of our seller servicers.

The following table provides the outstanding unpaid balance of loans that are performing and non-performing by portfolio class:

December 31, 2014

From time to time the Company modifies loan terms temporarily for borrowers who are experiencing financial stress. These loans are performing and accruing and will generally return to the original loan terms after the modification term expires.

Approximately 14.75% of our non-performing loans at December 31, 2014 were considered TDRs, compared to 19.60% at June 30, 2014. Borrowers that make timely payments after TDRs are considered non-performing for at least six months. Generally, after six months of timely payments, those TDRs are reclassified from the non-performing loan category to the performing loan category and any previously deferred interest income is recognized.

The Company classifies these loans as performing loans temporarily modified as TDR and are included in impaired loans as follows:

December 31, 2014										
(Dollars in thousands)	Single Family Real Estate Secured			Multifamily Real Estate Secured	Commercial Real Estate Secured	Auto and RV Secured	Commercial Factoring & Industrial	Other	Total	
	Mortgage	Home Equity	Warehouse & other	Real Estate Secured	Real Estate Secured	Secured	Secured	Secured	Secured	Secured

The Company's loan modifications primarily included single family, multifamily and commercial loans of which included one or a combination of the following: a reduction of the stated interest rate or delinquent property taxes that were paid by the Bank and either repaid by the borrower over a one year period or capitalized and amortized over the remaining life of the loan. The Company's loan modifications also included RV loans in which borrowers were able to make interest-only payments for a period of six months to one year which then reverted back to fully amortizing.

Table of Contents

Credit Quality Indicators

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans based on credit risk. The Company uses the following definitions for risk ratings.

Pass. Loans classified as pass are well protected by the current net worth and paying capacity of the obligor or by the fair value, less cost to acquire and sell, of any underlying collateral in a timely manner.

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

The Company reviews and grades loans following a continuous loan review process, featuring coverage of all loan types and business lines at least quarterly. Continuous reviewing provides more effective risk monitoring because it immediately tests for potential impacts caused by changes in personnel, policy, products or underwriting standards.

Table of Contents

6. STOCK-BASED COMPENSATION

The Company has three equity incentive plans, the 2014 Stock Incentive Plan (“2014 Plan”), the 2004 Stock Incentive Plan (“2004 Plan”) and the 1999 Stock Option Plan (collectively, the “Plans”), which provides for the granting of non-qualified and incentive stock options, restricted stock and restricted stock units, stock appreciation rights and other awards to employees, directors and consultants.

1999 Stock Option Plan. In July 1999, the Company’s Board of Directors approved the 1999 Stock Option Plan (“1999 Plan”) and in August 2001, the Company’s shareholders approved an amendment to the 1999 Plan such that 15% of the outstanding shares of the Company would always be available for grants under the 1999 Plan. The 1999 Plan is designed to encourage selected employees and directors to improve operations and increase profits, and to accept or continue employment or association with the Company through participation in the growth in the value of the common stock. The 1999 Plan requires that option exercise prices be not less than fair market value per share of common stock on the option grant date for incentive and non-qualified options. The options issued under the 1999 Plan generally vest in between three and five years. Option expiration dates are established by the plan administrator but may not be later than 10 years after the date of the grant.

In November 2007, the shareholders of the Company approved the termination of the 1999 Plan. No new option awards will be made under the 1999 Plan and the outstanding awards under the 1999 Plan will continue to be subject to the terms and conditions of the 1999 Plan.

2004 Stock Incentive Plan. In October 2004, the Company’s Board of Directors and the stockholders approved the 2004 Plan. In November 2007, the 2004 Plan was amended and approved by the Company’s stockholders. The maximum number of shares of common stock available for issuance under the 2004 Plan is 14.8% of the Company’s outstanding common stock measured from time to time. In addition, the number of shares of the Company’s common stock reserved for issuance will also automatically increase by an additional 1.5% on the first day of each of four fiscal years starting July 1, 2007. With the stockholders approving the 2014 Plan in October 2014, no further awards will be made under the 2004 Plan and the 2004 Plan will remain in effect only so long as awards made thereunder remain outstanding.

2014 Stock Incentive Plan. In September and October 2014, the Company’s Board of Directors and stockholders approved the 2014 Plan, respectively. The maximum number of shares of common stock available for issuance under the 2014 Plan is 920,000.

Stock Options. At December 31, 2014 and at June 30, 2014, all expense related to stock option grants has been fully recognized.

A summary of stock option activity under the Plans during the periods indicated is presented below:

	Number of Shares	Weighted-Average Exercise Price Per Share
Outstanding—June 30, 2013	162,482	\$ 8.81
Granted	—	—
Exercised	(55,532) 9.00
Cancelled	—	—
Outstanding—June 30, 2014	106,950	\$ 8.71
Granted	—	—
Exercised	(300) 7.35
Cancelled	—	—
Outstanding—December 31, 2014	106,650	\$ 8.71
Options exercisable—June 30, 2013	162,482	\$ 8.81
Options exercisable—June 30, 2014	106,950	\$ 8.71
Options exercisable—December 31, 2014	106,650	\$ 8.71

Table of Contents

The following table summarizes information on currently outstanding and exercisable options:

As of December 31, 2014

Options Outstanding			Options Exercisable	
Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life (Years)	Number Exercisable	Weighted-Average Exercise Price
\$7.35	34,250	1.57	34,250	\$7.35
8.50	7,500	0.91	7,500	8.50
9.20	7,500	0.64	7,500	9.20
9.50	57,400	0.57	57,400	9.50
	106,650	0.92	106,650	

The aggregate intrinsic value of options outstanding and options exercisable under the Plans at December 31, 2014 was \$7,369, respectively.

Restricted Stock and Restricted Stock Units. Employees and directors are eligible to receive grants of restricted stock and restricted stock units. The Company determines stock-based compensation expense using the fair value method. The fair value of restricted stock and restricted stock units is equal to the closing sale price of the Company's common stock on the date of grant.

During the six months ended December 31, 2014 and 2013, the Company granted 157,606 and 129,141 restricted stock units, respectively, to employees and directors. Restricted stock unit awards ("RSUs") granted during these quarters vest over three years, one-third on each anniversary date, except for any RSUs granted to our CEO, which vest one-fourth on each fiscal year end.

The Company's income before income taxes and net income for the three months ended December 31, 2014 and December 2013 included stock award expense was \$1,696 and \$1,109, with total income tax benefit of \$700 and \$448, respectively. For the six months ended December 31, 2014 and 2013, stock awards expense was \$3,015 and \$2,075, with total income tax benefit of \$1,239 and \$838 respectively. The Company recognizes compensation expense based upon the grant-date fair value divided by the vesting and the service period between each vesting date. At December 31, 2014, unrecognized compensation expense related to non-vested awards aggregated to \$17,187 and is expected to be recognized in future periods as follows:

(Dollars in thousands)	Stock Award Compensation Expense
For the fiscal year remainder:	
2015	\$3,568
2016	6,656
2017	5,030
2018	1,933
Total	\$17,187

The following table presents the status and changes in restricted stock grants for the periods indicated:

	Restricted Stock and Restricted Stock Unit Shares	Weighted-Average Grant-Date Fair Value
Non-vested balance at July 1, 2013	298,485	\$ 22.13
Granted	132,944	59.91
Vested	(169,760)) 23.37
Cancelled	(25,230)) 34.41
Non-vested balance at June 30, 2014	236,439	\$ 41.17
Granted	157,606	77.09

Edgar Filing: Bofl Holding, Inc. - Form 10-Q

Vested	(62,974) 30.13
Cancelled	(7,451) 54.33
Non-vested balance at December 31, 2014	323,620	\$ 60.51

35

Table of Contents

The total fair value of shares vested for the three and six months ended December 31, 2014 was \$1,395 and \$4,935. The total fair value of shares vested for the three and six months ended December 31, 2013 was \$1,640 and \$5,877. 2004 Employee Stock Purchase Plan. In October 2004, the Company's Board of Directors and stockholders approved the 2004 Employee Stock Purchase Plan, which is intended to qualify as an "Employee Stock Purchase Plan" under Section 423 of the Internal Revenue Code. An aggregate total of 500,000 shares of the Company's common stock has been reserved for issuance and will be available for purchase under the 2004 Employee Stock Purchase Plan. In October 2014, the 2004 Employee Stock Purchase Plan expired with no shares issued.

7. EARNINGS PER SHARE ("EPS")

Basic EPS excludes dilution and is computed by dividing net income or loss available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if stock options or other contracts to issue common stock were exercised or converted to common stock that would then share in the Company's earnings.

The following table presents the calculation of basic and diluted EPS:

(Dollars in thousands, except per share data)	Three Months Ended December 31,		Six Months Ended December 31,	
	2014	2013	2014	2013
Earnings Per Common Share				
Net income	\$19,372	\$13,154	\$37,213	\$25,336

Dilutive net income attributable to common shareholders	\$19,294	\$13,077	\$37,058	\$25,181
Average common shares issued and outstanding	15,204,812	14,275,705	14,995,794	14,189,568
Dilutive effect of stock options	58,755	74,519	58,804	77,150
Dilutive effect of convertible preferred stock	—	—	—	—
Total dilutive common shares issued and outstanding	15,263,567	14,350,224	15,054,598	14,266,718
Diluted earnings per common share	\$1.26	\$0.91	\$2.46	\$1.77

8. COMMITMENTS AND CONTINGENCIES

Credit-Related Financial Instruments. The Company is a party to credit-related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments are commitments to extend credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Company's exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At December 31, 2014, the Company had commitments to originate \$37,929 in fixed rate loans and \$110,617 in variable rate loans, totaling an aggregate outstanding principal balance of \$148,546. Our fixed rate loan commitments to originate had rates ranging from 2.88% to 8.32%. At December 31, 2014, the Company also had commitments to sell \$46,199 in fixed rate loans and \$7,283 in variable rate loans, totaling an aggregate outstanding principal balance of \$53,482.

Commitments to extend credit are agreements to lend to a customer so long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for equity lines of credit may expire without being drawn upon. Therefore, the total commitment

Table of Contents

amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company, is based on management's credit evaluation of the customer.

Deposits. The Bank entered into a purchase and assumption agreement to assume approximately \$125,000 of FDIC-insured deposits including individual checking, money market savings, and CD accounts. Under the Agreement, the Bank will receive approximately \$125,000 in cash at the closing date and will assume deposits at par with no purchase premium. The deposit transfer transaction is subject to prior approval by the Office of the Comptroller of the Currency and to other standard closing conditions. The closing of the transaction is targeted for the second calendar quarter of fiscal 2015.

9. RELATED PARTY TRANSACTIONS

In the ordinary course of business, the Company has granted related party loans collateralized by real property to officers, directors and their affiliates that are considered to be insiders by regulation. There were no new related party loans granted under the provisions of the employee loan program and no refinances of existing loans during the six months ended December 31, 2014, and no refinances of existing loans and no new loans during the six months ended December 31, 2013.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion provides information about the results of operations, financial condition, liquidity, off balance sheet items, contractual obligations and capital resources of BofI Holding, Inc. and subsidiary. This information is intended to facilitate the understanding and assessment of significant changes and trends related to our financial condition and the results of our operations. This discussion and analysis should be read in conjunction with our financial information in our Annual Report on Form 10-K for the year ended June 30, 2014, and the interim unaudited condensed consolidated financial statements and notes thereto contained in this report.

Some matters discussed in this report may constitute forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and as such, may involve risks and uncertainties. These forward-looking statements can be identified by the use of terminology such as "estimate," "project," "anticipate," "expect," "intend," "believe," "will," or the negative thereof or other variations thereon or comparable terminology or by discussions of strategy that involve risks and uncertainties. These forward-looking statements relate to, among other things, expectations of the environment in which we operate and projections of future performance.

Forward-looking statements are inherently unreliable and actual results may vary. Factors that could cause actual results to differ from these forward-looking statements include economic conditions, changes in the interest rate environment, changes in the competitive marketplace, risks associated with credit quality and other risk factors discussed under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations – Factors That May Affect Our Performance" in our Annual Report on Form 10-K for the year ended June 30, 2014, which has been filed with the Securities and Exchange Commission. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. All written and oral forward-looking statements made in connection with this report, which are attributable to us or persons acting on our behalf are expressly qualified in their entirety by the foregoing information.

General

Our company, BofI Holding, Inc., is the holding company for BofI Federal Bank, a diversified financial services company with approximately \$5.2 billion in assets that provides consumer and business banking products through its branchless, low-cost distribution channels and affinity partners. The Bank has deposit and loan customers nationwide including consumer and business checking, savings and time deposit accounts and financing for single family and multifamily residential properties, small-to-medium size businesses in target sectors, and selected specialty finance receivables. The Bank generates fee income from consumer and business products including fees from loans originated for sale and transaction fees earned from processing payment activity. BofI Holding, Inc.'s common stock is listed on the NASDAQ Global Select Market and is a component of the Russell 2000® Index and the S&P SmallCap 600® Index.

BofI Federal Bank is a federal savings bank wholly-owned by our company and regulated by the Office of the Comptroller of the Currency ("OCC"). The parent company, BofI Holding, Inc., is a unitary savings and loan holding company regulated by the Board of Governors of the Federal Reserve System.

We distribute our deposit products through a wide range of retail distribution channels, and our deposits consist of demand, savings and time deposits accounts. We distribute our loan products through our retail, correspondent and wholesale channels, and the loans we retain are primarily first mortgages secured by single family real property and by multifamily real property. Our mortgage-backed securities consist primarily of mortgage pass-through securities issued by government-sponsored entities and non-agency collateralized mortgage obligations and pass-through mortgage-backed securities issued by private sponsors. We believe our flexibility to adjust our asset generation channels has been a competitive advantage allowing us to avoid markets and products where credit fundamentals are poor.

Critical Accounting Policies

The following discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements and the notes thereto, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make a number of estimates and assumptions that affect the reported amounts and disclosures in the consolidated financial statements. On an ongoing basis, we evaluate our estimates and assumptions based upon historical experience and various factors and circumstances. We believe that our estimates and assumptions are reasonable under the circumstances. However, actual results may differ significantly from these estimates and assumptions that could have a material effect on the carrying value of assets and liabilities at the balance sheet dates and our results of operations for the reporting periods.

Table of Contents

Our significant accounting policies and practices are described in greater detail in Note 1 to our June 30, 2014 audited consolidated financial statements and under the caption “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies” contained in our Annual Report on Form 10-K filed with the Securities and Exchange Commission for the fiscal year end June 30, 2014.

Use of Non-GAAP Financial Measures

In addition to the results presented in accordance with GAAP, this report includes non-GAAP financial measures such as core earnings. We define net income without the after-tax impact of realized and unrealized securities gains and losses as adjusted earnings (“core earnings”), a non-GAAP measurement, which we believe provides useful information about the Bank’s operating performance. Excluding the securities gains and losses provides investors with an understanding of our Bank’s core lending and mortgage banking business. Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied and are not audited. Readers should be aware of these limitations and should be cautious as their use of such measures. Although we believe the non-GAAP financial measures disclosed in this report enhance investors’ understanding of its business and performance, these non-GAAP measures should not be considered in isolation, or as a substitute for GAAP basis financial measures.

RESULTS OF OPERATIONS

Comparison of the Three and Six Months Ended December 31, 2014 and 2013

For the three months ended December 31, 2014, we had net income of \$19.4 million compared to net income of \$13.2 million for the three months ended December 31, 2013. Net income attributable to common stockholders was \$19.3 million or \$1.26 per diluted share for the three months ended December 31, 2014 compared to net income attributable to common stockholders of \$13.1 million or \$0.91 per diluted share for the three months ended December 31, 2013. For the six months ended December 31, 2014, we had net income of \$37.2 million compared to net income of \$25.3 million for the six months ended December 31, 2013. Net income attributable to common stockholders was \$37.1 million or \$2.46 per diluted share for the six months ended December 31, 2014 compared to net income attributable to common stockholders of \$25.2 million or \$1.77 per diluted share for the six months ended December 31, 2013.

Other key comparisons between our operating results for the three and six months ended December 31, 2014 and 2013 are as follows:

Net interest income increased \$15.3 million and \$32.0 million due to a 52.6% and 53.5% increase in average earning assets in the three and six months ended December 31, 2014, respectively. These increases were primarily the result of growth in our loan portfolio and a net decrease in the average funding rate of our liabilities. Our net interest margin decreased 16 and 3 basis points in the three and six months ended December 31, 2014 compared to December 31, 2013. The overall rate on interest earning assets was lower by 30 basis points and 22 basis points for the three and six months ended December 31, 2014 compared to December 31, 2013, respectively, primarily due to a decrease in market interest rates for new loans and borrower repayments of higher rate loans. This reduction on the asset side was offset by a 15 basis point and 20 basis point reduction in average rates paid on interest bearing liabilities for the three and six months ended December 31, 2014 compared to December 31, 2013. The reduction of securities sold under agreements to repurchase and addition of lower rate demand and savings deposits was the primary reason for the decrease in average rates paid for the three and six months ended December 31, 2014 compared to December 31, 2013.

Non-interest income increased \$1.2 million and decreased \$0.6 million for the three and six months ended December 31, 2014 compared to the three and six months ended December 31, 2013, respectively. The \$1.2 million increase in non-interest income for the three months ended December 31, 2014 was primarily the result of an increase in realized gain on the sale of securities of \$0.6 million, a decrease in unrealized losses on securities of \$0.5 million and an increase in banking services and fees of \$0.4 million. These increases were partially offset by a decrease in mortgage banking income of \$0.2 million. The decrease of \$0.6 million in non-interest income for the six months ended December 31, 2014 compared to December 31, 2013 was primarily the result of a \$2.1 million decrease in gain on sale – other from reduced sales of structured settlements and a \$0.7 million increase in unrealized losses on securities, partially offset by a \$0.9 million increase in banking service fees and other income, a \$0.9 million increase in mortgage banking income and a \$0.4 million increase in realized gain on sale of securities.

Non-interest expense increased \$3.6 million and \$6.6 million for the three and six months ended December 31, 2014 compared to the three and six months ended December 31, 2013, respectively. For the three months ended December 31, 2014 compared to the three months ended December 31, 2013 salaries and related expenses increased \$2.8 million and occupancy and equipment increased \$0.3 million primarily due to the overall increase in staff. Professional fees decreased \$0.4 million primarily attributable to a lower volume of legal fees and increased insurance reimbursement. Data processing and internet expense increased \$0.4 million due to core system updates and increased core deposit bank customers. Advertising and promotional expense increased \$0.2 million as a result of increased deposit marketing. For the six months ended December 31, 2014 compared to the six months ended December 31, 2013 salaries and related expenses increased \$4.7 million and occupancy and equipment increased \$0.4 million primarily due to the overall increase in staff mainly in our compliance, deposits and loan areas to support the overall growth of the Bank. Professional fees decreased \$1.3 million primarily attributable to a lower volume of legal fees

and increased insurance reimbursement. Data processing and internet expense increased \$0.7 million due to core system updates and increased core deposit bank customers. Advertising and promotional expense increased \$1.0 million as a result of increased mortgage banking activity and deposit marketing. Other general and administrative costs increased by \$0.3 million and FDIC and regulator fees increased \$0.5 million attributable to loan and deposit growth, respectively.

Table of Contents

Core earnings for the three months ended December 31, 2014 and 2013 were \$19.4 million and \$13.8 million, respectively. For the six months ended December 31, 2014 and 2013 core earnings were \$37.9 million and \$25.8 million, respectively.

Below is a reconciliation of net income to core earnings:

(Dollars in thousands)	Three Months Ended		Six Months Ended	
	December 31,		December 31,	
	2014	2013	2014	2013
Net Income	\$19,372	\$13,154	\$37,213	\$25,336
Realized securities losses (gains)	(587)	—	(587)	(208)
Unrealized securities losses (gains)	610	1,061	1,700	1,010
Tax (provision) benefit	(9)	(429)	(457)	(320)
Core earnings	\$19,386	\$13,786	\$37,869	\$25,818
Net Interest Income				

Net interest income for the three and six months ended December 31, 2014 totaled \$48.1 million and \$93.0 million, an increase of 46.6% and a increase of 52.6% compared to net interest income of \$32.8 million and \$60.9 million for the three and six months ended December 31, 2013, respectively. The growth of net interest income for both the three and six months ended December 31, 2014 is primarily due to net loan portfolio growth combined with a net decrease in the average funding rate of our liabilities.

Total interest and dividend income during the three and six months ended December 31, 2014 increased 43.3% to \$59.1 million and 46.8% to \$113.9 million, respectively, compared to \$41.2 million and \$77.6 million during the three and six months ended December 31, 2013, respectively. The increase in interest and dividend income for the three and six months ended December 31, 2014 was primarily attributable to growth in average earning assets from loan originations, primarily in the single family and multifamily portfolios. The average balance of loans increased 62.5% and 63.2% for the three and six months ended December 31, 2014 compared to the three and six months ended December 31, 2013. The increase in interest income on loans was partially offset by lower rates earned on loans and securities.

Total interest expense was \$11.0 million and \$20.9 million for the three and six months ended December 31, 2014, an increase of \$2.6 million or 30.6% and of \$4.3 million or 25.6% as compared with the three and six month periods ended December 31, 2013, respectively. The average funding rate for the three and six months ended December 31, 2014 compared to 2013 decreased by 15 and 20 basis points while average interest-bearing liabilities grew 50.2% and 50.5%, respectively. The decrease in the average cost of funds rate for the three and six months ended December 31, 2014 compared to 2013 was primarily due to a shift in our funding mix into our lower cost checking and savings deposits and away from higher cost time deposits and borrowings.

Net interest margin, defined as annualized net interest income divided by average earning assets, decreased by 16 basis points to 3.85% and by 3 basis points to 3.91% for the three and six months ended December 31, 2014, respectively. The decreases in net interest margin were primarily the result of the above discussed decline in loan and securities average rates, which was more than the decline in the overall cost of funds.

Provision for Loan Losses

The loan loss provision was \$2.9 million for the three months ended December 31, 2014 compared to \$1.0 million for the three months ended December 31, 2013. The loan loss provision was \$5.4 million for the six months ended December 31, 2014 compared to \$1.5 million for the same period in 2013. The increase in the provision for the three and six months ended December 31, 2014 is primarily due to additions to the allowance as a result of growth in the loan portfolio. Provisions for loan losses are charged to income to bring the allowance for loan losses to a level

deemed appropriate by management based on the factors discussed under “Financial Condition—Asset Quality and Allowance for Loan Losses.”

Table of Contents

Non-Interest Income

The following table sets forth information regarding our non-interest income for the periods shown:

(Dollars in thousands)	For the Three Months Ended			For the Six Months Ended		
	December 31,		Inc (Dec)	December 31,		Inc (Dec)
	2014	2013		2014	2013	
Realized gain on securities:						
Sale of securities	\$587	\$—	\$587	\$587	\$208	\$379
Total realized gain on securities	587	—	587	587	208	379
Other-than-temporary loss on securities:						
Total impairment losses	\$(1,075)	\$(1,606)	\$531	\$(4,647)	\$(1,352)	\$(3,295)
Loss recognized in other comprehensive loss	789	733	56	3,150	(93)	3,243
Net impairment loss recognized in earnings	(286)	(873)	587	(1,497)	(1,445)	(52)
Fair value gain on trading securities	(324)	(188)	(136)	(203)	435	(638)
Total unrealized loss on securities	(610)	(1,061)	451	(1,700)	(1,010)	(690)
Prepayment penalty fee income	1,053	1,174	(121)	1,930	1,828	102
Gain on sale – other	1,090	1,047	43	2,006	4,136	(2,130)
Mortgage banking income	2,937	3,139	(202)	6,000	5,125	875
Banking service fees and other income	1,640	1,244	396	3,123	2,233	890
Total non-interest income	\$6,697	\$5,543	\$1,154	\$11,946	\$12,520	\$(574)

Non-interest income increased \$1.2 million to \$6.7 million for the three months ended December 31, 2014. The increase was primarily the result of a realized gain on sale of securities of \$0.6 million and a decline in total impairment losses of \$0.5 million. The increase was partially offset by decrease in mortgage banking income of \$0.2 million and a \$0.1 million decrease in prepayment penalty fee income. Non-interest income decreased \$0.6 million to \$11.9 million for the six months ended December 31, 2014. The decrease was primarily the result of a \$2.1 million decrease in gain on sale – other from reduced sales of structured settlements and a \$0.7 million increase in unrealized losses on securities, partially offset by a \$0.9 million increase in banking service fees and other income, a \$0.9 million increase in mortgage banking income and a \$0.4 million increase in realized gain on sale of securities.

Included in gain on sale – other are sales of structured settlement annuity receivables. We engage in the wholesale and retail purchase of state lottery prize and structured settlement annuity payments. These payments are high credit quality deferred payment receivables having a state lottery commission or investment grade (top two tiers) insurance company payor. The Bank originates contracts for the retail purchase of such payments and classifies these under the heading of Factoring in the loan portfolio. Factoring yields are typically higher than mortgage loan rates. Typically, the gain received upon sale of these payment streams is greater than the gain received from an equivalent amount of mortgage loan sales. Since 2013, pools of structured settlement receivables have been originated for sale depending upon management's assessment of interest rate risk, liquidity, and offers containing favorable terms and are classified on our balance sheet as loans held for sale.

Table of Contents

Non-Interest Expense

The following table sets forth information regarding our non-interest expense for the periods shown:

(Dollars in thousands)	For the Three Months Ended			For the Six Months Ended		
	December 31,			December 31,		
	2014	2013	Inc (Dec)	2014	2013	Inc (Dec)
Salaries and related costs	\$10,764	\$7,960	\$2,804	\$20,461	\$15,743	\$4,718
Professional services	797	1,242	(445)	1,599	2,921	(1,322)
Occupancy and equipment	832	577	255	1,553	1,126	427
Data processing and internet	1,683	1,321	362	3,197	2,506	691
Advertising and promotional	1,449	1,214	235	2,755	1,803	952
Depreciation and amortization	766	696	70	1,483	1,417	66
Real estate owned and repossessed vehicles	51	(164)	215	108	(95)	203
FDIC and regulator fees	828	547	281	1,606	1,094	512
Other general and administrative	1,767	1,911	(144)	3,621	3,305	316
Total non-interest expenses	\$18,937	\$15,304	\$3,633	\$36,383	\$29,820	\$6,563

Non-interest expense, which is comprised primarily of compensation, professional services, data processing and internet expenses, occupancy, advertising and promotional and other operating expenses, was \$18.9 million for the three months ended December 31, 2014, up from \$15.3 million for the three months ended December 31, 2013.

Non-interest expense was \$36.4 million for the six months ended December 31, 2014, up from \$29.8 million for the six months ended December 31, 2013. The increase in non-interest expense for the three and six months ended December 31, 2014 was primarily due to the expansion of the Bank, specifically in areas related to lending, business banking and regulatory compliance.

Total salaries and related costs increased \$2.8 million to \$10.8 million for the quarter ended December 31, 2014, compared to \$8.0 million for the quarter ended December 31, 2013 due to increased staffing levels to support growth in deposit and lending activities. Total salaries and related costs increased \$4.7 million to \$20.5 million for the six months ended December 31, 2014 compared to \$15.7 million for the six months ended December 31, 2013 due to an increase in the Bank's staffing for lending, business banking and regulatory compliance. Our staff increased to 430 from 323, or 33.1% between December 31, 2014 and 2013, respectively.

Professional services, which include accounting and legal fees, decreased \$0.4 million and \$1.3 million for the three and six months ended December 31, 2014, compared to the three and six month period last year. Professional services for both the three and six months ended December 31, 2014 decreased due to lower volume of legal fees and increased insurance reimbursement.

Advertising and promotional expense increased \$0.2 million for the three months ended December 31, 2014, compared to the three months ending December 31, 2013. Advertising and promotional expense increased \$1.0 million for the six months ended December 31, 2014, compared to the six months ended December 31, 2013. The increases were primarily due to online, email and direct leads expense related to agency mortgage banking and deposit marketing.

Data processing and internet expense increased \$0.4 million and \$0.7 million for the three and six months ended December 31, 2014, compared to the three and six month periods in fiscal 2013, respectively. The increase was primarily due to growth in the number of core deposit customer accounts and enhancements to the Bank's core processing system.

The cost of our Federal Deposit Insurance Corporation ("FDIC") and OCC standard regulatory charges increased \$0.3 million and \$0.5 million for the three and six months ended December 31, 2014, compared to the three and six month period last year, respectively. The increase was due to the overall growth of the Bank's liabilities. As an FDIC-insured institution, the Bank is required to pay deposit insurance premiums to the FDIC.

Other general and administrative costs increased \$0.3 million for the six months ended December 31, 2014 compared to the six month period in the previous fiscal year. The increase was primarily related to costs supporting loan production.

Provision for Income Taxes

Our effective income tax rates (income tax provision divided by net income before income tax) for the three months ended December 31, 2014 and 2013 were 41.25% and 40.39%, respectively. Our effective income tax rate for the six months ended December 31, 2014 and 2013 were 41.07% and 39.87%, respectively. The changes in the tax rates are the result of changes in state tax allocations and the expiration of a California state enterprise zone tax credit at December 31, 2013.

Table of Contents

FINANCIAL CONDITION

Balance Sheet Analysis

Our total assets increased \$791.7 million, or 18.0%, to \$5,194.7 million, as of December 31, 2014, up from \$4,403.0 million at June 30, 2014. The increase in total assets was primarily due to an increase of \$770.8 million in net loans held for investment. Total liabilities increased \$712.1 million, primarily from growth in deposits of \$963.9 million, partially offset by a decline in FHLB advances of \$240.0 million and the maturity of \$10.0 million of reverse repurchase agreements.

Loans

Net loans held for investment increased 21.8% to \$4,303.7 million at December 31, 2014 from \$3,532.8 million at June 30, 2014. The increase in the loan portfolio was primarily due to loan originations and purchases of \$1,615.6 million, partially offset by loan repayments and other adjustments of \$844.7 million during the six months ended December 31, 2014.

The following table sets forth the composition of the loan portfolio as of the dates indicated:

(Dollars in thousands)	December 31, 2014		June 30, 2014		Percent
	Amount	Percent	Amount	Percent	
Single family real estate secured:					
Mortgage	\$2,527,281	57.8	% \$1,918,626	53.4	%
Home equity	4,267	0.1	% 12,690	0.4	%
Warehouse and other	387,451	8.9	% 370,717	10.3	%
Multifamily real estate secured	1,168,999	26.7	% 978,511	27.2	%
Commercial real estate secured	18,550	0.4	% 24,061	0.7	%
Auto and RV secured	13,516	0.3	% 14,740	0.4	%
Factoring	112,545	2.6	% 118,945	3.3	%
Commercial & Industrial	139,533	3.2	% 152,619	4.2	%
Other	611	0.0	% 1,971	0.1	%
Total gross loans	4,372,753	100.0	% 3,592,880	100.0	%
Allowance for loan losses	(23,187)		(18,373)		
Unaccreted discounts and loan fees	(45,905)		(41,666)		
Net mortgage loans on real estate	\$4,303,661		\$3,532,841		

The Bank originates some interest only loans with terms that include repayments that are less than the repayments for fully amortizing loans. Also, the Bank previously purchased option adjustable-rate mortgage (“ARM”) loans and other loan types that permit payments that may be smaller than interest accruals. The Bank’s lending guidelines for interest only loans are adjusted for the increased credit risk associated with these loans by requiring borrowers with such loans to borrow at LTVs that are lower than standard amortizing ARM loans and by calculating debt to income ratios for qualifying borrowers based upon a fully amortizing payment, not the interest only payment. The Company’s Internal Asset Review Committee monitors and performs reviews of interest only loans. Adverse trends reflected in the Company’s delinquency statistics, grading and classification of interest only loans would be reported to management and the Board of Directors. As of December 31, 2014, the Company had \$617.8 million of interest only mortgage loans and \$5.6 million of option adjustable-rate mortgage loans. Through December 31, 2014, the net amount of deferred interest on these loan types was not material to the financial position or operating results of the Company.

Table of Contents

Asset Quality and Allowance for Loan Loss

Non-performing Assets

Non-performing loans are comprised of loans past due 90 days or more on nonaccrual status and other nonaccrual loans. Non-performing assets include non-performing loans plus other real estate owned and repossessed vehicles. At December 31, 2014, our non-performing loans totaled \$34.9 million, or 0.80% of total gross loans and our total non-performing assets totaled \$35.7 million, or 0.69% of total assets.

Non-performing loans and foreclosed assets or “non-performing assets” consisted of the following as of the dates indicated:

(Dollars in thousands)	December 31, 2014	June 30, 2014	Inc (Dec)	
Non-performing assets:				
Non-accrual loans:				
Single family real estate secured:				
Mortgage	\$27,071	\$12,396	\$14,675	
Home equity	51	168	(117))
Multifamily real estate secured	5,138	4,302	836	
Commercial real estate secured	2,175	2,985	(810))
Total non-performing loans secured by real estate	34,435	19,851	14,584	
Auto and RV secured	457	534	(77))
Total non-performing loans	34,892	20,385	14,507	
Foreclosed real estate	699	—	699	
Repossessed—Auto and RV	110	75	35	
Total non-performing assets	\$35,701	\$20,460	\$15,241	
Total non-performing loans as a percentage of total loans	0.80	% 0.57	% 0.23	%
Total non-performing assets as a percentage of total assets	0.69	% 0.46	% 0.23	%

Total non-performing assets increased from \$20.5 million at June 30, 2014 to \$35.7 million at December 31, 2014. As a percentage of total assets, non-performing assets increased from 0.46% at June 30, 2014 to 0.69% at December 31, 2014. The non-performing assets increase of approximately \$15.2 million, was primarily the result of two single family residential loans. These two loans, with balances of \$7.0 million and \$5.0 million and LTVs of 70.0% and 47.6%, respectively, were also the primary causes of the increases in the 90+ days past due and substandard categories of our loan portfolio.

A troubled debt restructuring is a concession made to a borrower experiencing financial difficulties, typically permanent or temporary modifications of principal and interest payments or an extension of maturity dates. When a loan is delinquent and classified as a troubled debt restructuring no interest is accrued until the borrower demonstrates over time (typically six months) that it can make payments. When a loan is considered a troubled debt restructuring and is on nonaccrual, it is considered non-performing and included in the table above. The Bank had performing troubled debt restructurings with outstanding balances totaling \$0.5 million at December 31, 2014 and \$2.4 million at June 30, 2014.

Allowance for Loan Losses

We are committed to maintaining the allowance for loan losses at a level that is considered to be commensurate with estimated and known risks in the portfolio. Although the adequacy of the allowance is reviewed quarterly, our management performs an ongoing assessment of the risks inherent in the portfolio. While we believe that the allowance for loan losses is adequate at December 31, 2014, future additions to the allowance will be subject to continuing evaluation of estimated and known, as well as inherent, risks in the loan portfolio.

The assessment of the adequacy of our allowance for loan losses is based upon a number of quantitative and qualitative factors, including levels and trends of past due and nonaccrual loans, change in volume and mix of loans, collateral values and charge-off history.

We provide general loan loss reserves for our RV and auto loans based upon the borrower credit score at the time of origination and the Company's loss experience to date. The allowance for loan loss for the RV and auto loan portfolio at December 31, 2014 was determined by classifying each outstanding loan according to the semi-annually refreshed FICO score and providing loss rates. The Company had \$13.1 million of RV and auto loan balances subject to general reserves as follows: FICO greater than or equal to 770: \$3.3 million; 715 – 769: \$4.4 million; 700 – 714: \$1.0 million; 660 – 699: \$2.3 million and less than 660: \$2.0 million.

Table of Contents

We experienced increased charge-offs of RV loans in fiscal 2007 through 2011, due to the nationwide recession. Our portfolio of RV loans is expected to decrease in the future because the Bank ceased originating RV loans in fiscal 2009.

The Company provides general loan loss reserves for mortgage loans based upon the size and class of the mortgage loan and the loan-to-value ratio (“LTV”) at date of origination. The allowance for each class is determined by dividing the outstanding unpaid balance for each loan by the loan-to-value and applying quantitative and qualitative loss rates.

The LTV groupings for each significant mortgage class are as follows:

The Company had \$2,499.7 million of single family mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 60%: \$1,400.4 million; 61% – 70%: \$899.6 million; 71% – 80%: \$174.1 million; greater than 80%: \$25.5 million.

The Company had \$1,163.9 million of multifamily mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 55%: \$514.9 million; 56% – 65%: \$380.6 million; 66% – 75%: \$255.6 million; 76% – 80%: \$11.8 million and greater than 80%: \$0.9 million.

The Company had \$16.4 million of commercial real estate loan balances subject to general reserves as follows: LTV less than or equal to 50%: \$11.1 million; 51% – 60%: \$3.9 million; 61% – 70%: \$1.4 million; and 71% – 80%: \$0.0 million.

The weighted average LTV percentage for our entire real estate loan portfolio was 54% at December 31, 2014. We believe that this percentage is lower and more conservative than most banks, which results in lower average mortgage loan charge-offs when compared to many other comparable banks.

While we anticipate that such level of charge-offs will continue into the future, given the uncertainties surrounding the improvement of the U.S. economy, we may experience an increase in the relative amount of charge-offs and we may be required to increase our loan loss provisions in the future to provide a larger loss allowance for one or more of our loan types.

The following table summarizes impaired loans as of:

(Dollars in thousands)	December 31, 2014	June 30, 2014
Non-performing loans—90+ days past due plus other non-accrual loans	\$29,745	\$16,390
Troubled debt restructuring loans—non-accrual	5,147	3,995
Troubled debt restructuring loans—performing	535	2,379
Total impaired loans	\$35,427	\$22,764

The following table reflects management’s allocation of the allowance for loan losses by loan category and the ratio of each loan category to total loans as of the dates indicated:

(Dollars in thousands)	December 31, 2014		June 30, 2014		
	Amount of Allowance	Allocation as a % of Allowance	Amount of Allowance	Allocation as a % of Allowance	
Single family real estate secured:					
Mortgage	11,792	50.9	% 7,959	43.4	%
Home equity	97	0.4	% 134	0.7	%
Warehouse and other	1,585	6.8	% 1,259	6.9	%
Multifamily real estate secured	4,234	18.3	% 3,785	20.6	%
Commercial real estate secured	985	4.2	% 1,035	5.6	%
Auto and RV secured	1,053	4.5	% 812	4.4	%
Factoring	270	1.2	% 279	1.5	%
Commercial & Industrial	3,153	13.6	% 3,048	16.6	%
Other	18	0.1	% 62	0.3	%
Total	\$23,187	100.0	% \$18,373	100.0	%

The loan loss provision was \$2.9 million and \$1.0 million for the three months ended December 31, 2014 and December 31, 2013, respectively. The loan loss provision was \$5.4 million and \$1.5 million for the six months ended

December 31, 2014 and December 31, 2013, respectively. The increase for the three and six months ended December 31, 2014 in the loan loss provision was primarily the result of growth in the loan portfolio. We believe that the lower average LTV in the Bank's mortgage loan portfolio will continue to result in future lower average mortgage loan charge-offs when compared to many other comparable

Table of Contents

banks. Our general loan loss reserves are based upon historical losses and expected future trends. The resolution of the Bank's existing other real estate owned and non-performing loans should not have a significant adverse impact on our operating results.

Investment Securities

Total investment securities were \$423.3 million as of December 31, 2014, compared with \$470.6 million at June 30, 2014. During the six months ended December 31, 2014, we purchased one debt security for \$1.0 million, sold two securities for \$9.6 million and received principal repayments of approximately \$29.3 million in our available-for-sale portfolio. In our held-to-maturity portfolio, we received principal repayments of \$13.7 million. The remainder of the change for both the available-for-sale and held-to-maturity portfolios is attributable to accretion and other activities. We currently classify agency mortgage-backed and debt securities as held-to-maturity or available-for-sale at the time of purchase based upon issue size and based on issue features, such as callable terms.

Deposits

Deposits increased a net \$963.9 million, or 31.7%, to \$4,005.4 million at December 31, 2014, from \$3,041.5 million at June 30, 2014. Our deposit growth was the result of a 22.8% increase in interest-bearing demand accounts and a 64.5% increase in savings accounts. Increases in business banking customers resulted in higher demand and savings account business during the six months ended December 31, 2014.

The following table sets forth the composition of the deposit portfolio as of the dates indicated:

(Dollars in thousands)	December 31, 2014		June 30, 2014		
	Amount	Rate ¹	Amount	Rate ¹	
Non-interest bearing	\$267,130	—	% \$186,786	—	%
Interest-bearing:					
Demand	1,386,573	0.67	% 1,129,535	0.63	%
Savings	1,540,078	0.78	% 935,973	0.73	%
Total interest-bearing demand and savings	2,926,651	0.73	% 2,065,508	0.67	%
Time deposits:					
Under \$100,000	79,758	1.22	% 107,294	1.23	%
\$100,000 or more ²	731,856	1.73	% 681,948	1.67	%
Total time deposits	811,614	1.68	% 789,242	1.61	%
Total interest bearing ²	3,738,265	0.93	% 2,854,750	0.93	%
Total deposits	\$4,005,395	0.87	% \$3,041,536	0.88	%

¹ Based on weighted-average stated interest rates at end of period.

² The total interest-bearing includes brokered deposits of \$653.9 million and \$404.8 million as of December 31, 2014 and June 30, 2014, respectively, of which \$320.2 million and \$275.4 million, respectively, are time deposits classified as \$100,000 or more.

The following table sets forth the number of deposit accounts by type as of the date indicated:

	December 31, 2014	June 30, 2014	December 31, 2013
Checking and savings accounts	32,531	30,402	30,222
Time deposits	6,428	7,571	8,869
Total number of deposit accounts	38,959	37,973	39,091

Table of Contents

Borrowings

The following table sets forth the composition of our borrowings and the interest rates at the dates indicated:

(Dollars in thousands)	December 31, 2014		June 30, 2014		December 31, 2013			
	Balance	Weighted Average Rate	Balance	Weighted Average Rate	Balance	Weighted Average Rate		
Repurchase agreements	\$35,000	4.38	% \$45,000	4.46	% \$95,000	4.43	%	
FHLB Advances	670,000	1.39	% 910,000	0.97	% 729,000	1.12	%	
Subordinated debentures and other borrowings	5,155	2.63	% 5,155	2.63	% 5,155	2.64	%	
Total borrowings	\$710,155	1.54	% \$960,155	1.14	% \$829,155	1.51	%	
Weighted average cost of borrowings during the quarter	1.25	%	1.50	%	1.39	%		
Borrowings as a percent of total assets	13.7	%	21.8	%	23.2	%		

At December 31, 2014, total borrowings amounted to \$710.2 million, down \$250.0 million, or 26.0%, from June 30, 2014 and down \$119.0 million or 14.4% from December 31, 2013. Total borrowings represented 13.7% of total assets and had a weighted-average cost of 1.25% at December 31, 2014, compared with 21.8% of total assets at a weighted-average cost of 1.50% at June 30, 2014 and 23.2% of total assets at a weighted-average cost of 1.39% at December 31, 2013.

We have sold securities under various agreements to repurchase for total proceeds of \$35.0 million. The repurchase agreements have interest rates between 3.75% and 4.75% and scheduled maturities between April 2017 and December 2017. Under these agreements, we may be required to repay the \$35.0 million and repurchase our securities before the scheduled maturity if the issuer requests repayment on scheduled quarterly call dates. The weighted-average remaining contractual maturity period is 2.61 years and the weighted average remaining period before such repurchase agreements could be called is 0.36 years.

We regularly use advances from the FHLB to manage our interest rate risk and, to a lesser extent, manage our liquidity position. Generally, FHLB advances with terms between three and ten years have been used to fund the purchase of single family and multifamily mortgages and to provide us with interest rate risk protection should rates rise. At December 31, 2014, a total of \$5.0 million of FHLB advances include agreements that allow the FHLB, at its option, to put the advances back to us after specified dates. The weighted-average remaining contractual maturity period of the \$15.0 million in puttable advances is 3.07 years and the weighted average remaining period before such advances could be put to us is 0.05 years.

Stockholders' Equity

Stockholders' equity increased \$79.6 million to \$450.4 million at December 31, 2014 compared to \$370.8 million at June 30, 2014. The increase was the result of our net income for the six months ended December 31, 2014 of \$37.2 million, sale of common stock of \$38.9 million, vesting and issuance of RSUs and exercise of stock options of \$2.2 million, a \$1.4 million unrealized gain in other comprehensive income, net of tax, less a reduction of \$0.2 million for dividends declared on preferred stock.

Table of Contents

LIQUIDITY

Cash flow information is as follows:

(Dollars in thousands)	For the Six Months Ended	
	December 31,	
	2014	2013
Operating Activities	\$62,256	\$36,827
Investing Activities	\$(761,206) \$(560,528
Financing Activities	\$753,505	\$453,893

During the six months ended December 31, 2014, we had net cash inflows from operating activities of \$62.3 million compared to inflows of \$36.8 million for the six months ended December 31, 2013. Net operating cash inflows and outflows fluctuate primarily due to the timing of originations of loans held for sale and proceeds from loan sales. Net cash outflows from investing activities totaled \$761.2 million for the six months ended December 31, 2014, while outflows totaled \$560.5 million for the same period in fiscal year 2014. The increase was primarily due to higher loan originations, which were only partially offset by increased repayments of loans in the fiscal 2015 period compared to the same period in the prior year.

Our net cash provided by financing activities totaled \$753.5 million for the six months ended December 31, 2014, and \$453.9 million for the six months ended December 31, 2013. Net cash provided by financing activities increased primarily from a net increase in deposits partially offset by repayments exceeding advances from the FHLB for the six months ended December 31, 2014 compared to December 31, 2013.

During the six months ended December 31, 2014, the Bank could borrow up to 40.0% of its total assets from the FHLB. Borrowings are collateralized by the pledge of certain mortgage loans and investment securities to the FHLB. At December 31, 2014, the Company had \$1,431.2 million available immediately and reflects a fully collateralized position. At December 31, 2014, we also had two unsecured federal funds purchase lines with two different banks totaling \$35.0 million, under which no borrowings were outstanding.

The Bank has the ability to borrow short-term from the Federal Reserve Bank of San Francisco Discount Window. At December 31, 2014, the Bank did not have any borrowings outstanding and the amount available from this source was \$11.4 million. The credit line is collateralized by consumer loans and mortgage-backed securities.

In an effort to expand the Bank's liquidity options, we have issued brokered deposits, with \$653.9 million outstanding at December 31, 2014. We believe our liquidity sources to be stable and adequate for our anticipated needs and contingencies. We believe we have the ability to increase our level of deposits and borrowings to address our liquidity needs for the foreseeable future.

AT-THE-MARKET OFFERING

On July 22, 2014, we entered into an At-the-Market ("ATM") Equity Distribution Agreement with Keefe, Bruyette & Woods, Inc., Raymond James & Associates, Inc. and Sterne, Agee & Leach, Inc. (the "Distribution Agents") pursuant to which we may issue and sell through the Distribution Agents from time to time shares of our common stock in at the market offerings with an aggregate offering price of up to \$50.0 million (the "ATM Offering"). The sales of shares of our common stock under the Equity Distribution Agreement are to be made in "at the market" offerings as defined in Rule 415 of the Securities Act of 1933, as amended, including sales made directly on the NASDAQ Global Select Market (the principal existing trading market for our common stock), or sales made through a market maker or any other trading market for our common stock, or (with our prior consent) in privately negotiated transactions at negotiated prices. The aggregate compensation payable to the Distribution Agents under the Distribution Agreement will not exceed 2.5% of the gross sales price of the shares sold under the agreement. We have also agreed to reimburse the Distribution Agents for up to \$75,000 in their expenses and have provided the Distribution Agents with customary indemnification rights.

Table of Contents

In fiscal year 2015, we commenced sales of common stock through the ATM Offering. The details of the shares of common stock sold through the ATM Offering through December 31, 2014 are as follows (dollars in thousands, except per share data, per share price is net of commissions):

Distribution Agent	Month	Weighted Average Per Share Price	Number of Shares Sold	Net Proceeds	Compensation to Distribution Agent
Keefe, Bruyette & Woods, Inc.	August 2014	\$78.72	44,417	\$3,409	\$87
Keefe, Bruyette & Woods, Inc.	September 2014	\$74.58	236,800	\$17,218	\$441
Keefe, Bruyette & Woods, Inc.	October 2014	\$70.22	50,000	\$3,423	\$88
Keefe, Bruyette & Woods, Inc.	November 2014	\$78.30	130,000	\$9,924	\$254
Keefe, Bruyette & Woods, Inc.	December 2014	\$78.76	66,800	\$5,130	\$132

As of December 31, 2014, the total gross sales were \$40.1 million and the remaining amount of common stock we have available under the ATM Offering to sell was \$9.9 million.

OFF-BALANCE SHEET COMMITMENTS

At December 31, 2014, we had commitments to originate loans with an aggregate outstanding principal balance of \$148.5 million, and commitments to sell loans with an aggregate outstanding principal balance of \$53.5 million. We have no commitments to purchase loans, investment securities or any other unused lines of credit.

CONTRACTUAL OBLIGATIONS

The Company enters into contractual obligations in the normal course of business primarily as a source of funds for its asset growth and to meet required capital needs. Our time deposits due within one year of December 31, 2014 totaled \$401.3 million. We believe the large percentage of time deposits that mature within one year reflects customers' hesitancy to invest their funds long term. If these maturing deposits do not remain with us, we may be required to seek other sources of funds, including other time deposits and borrowings. Depending on market conditions, we may be required to pay higher rates on deposits and borrowings than we currently pay on time deposits maturing within one year. However, based on past experience we believe a significant portion of our time deposits will remain with us. We believe we have the ability to attract and retain deposits by adjusting interest rates offered.

The following table presents certain of our contractual obligations as of the period indicated:

(Dollars in thousands)	Total	Payments Due by Period ¹			
		Less Than One Year	One To Three Years	Three To Five Years	More Than Five Years
Long-term debt obligations ²	\$754,314	\$280,049	\$177,006	\$198,707	\$98,552
Time deposits ²	823,287	406,090	149,277	42,750	225,170
Operating lease obligations ³	14,930	2,339	4,981	5,438	2,172
Total	\$1,592,531	\$688,478	\$331,264	\$246,895	\$325,894

1. Our contractual obligations include long-term debt, time deposits and operating leases as shown. We had no capitalized leases or material commitments for capital expenditures at December 31, 2014.

2. Amounts include principal and interest due to recipient.

3. Payments are for leases of real property.

CAPITAL RESOURCES AND REQUIREMENTS

BofI Federal Bank is subject to various regulatory capital requirements set by the federal banking agencies. Failure by our Bank to meet minimum capital requirements could result in certain mandatory and discretionary actions by regulators that could have a material adverse effect on our consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, our Bank must meet specific capital guidelines that involve quantitative measures of our Bank's assets, liabilities and certain off-balance-sheet items as calculated

under regulatory accounting practices. Our Bank's capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings and other factors.

Table of Contents

Quantitative measures established by regulation require our Bank to maintain certain minimum capital amounts and ratios. Regulations of the OCC require our Bank to maintain minimum ratios of tangible capital to tangible assets of 1.5%, core capital to tangible assets of 4.0% and total risk-based capital to risk-weighted assets of 8.0%. At December 31, 2014, our Bank met all the capital adequacy requirements to which it was subject. At December 31, 2014, our Bank was “well capitalized” under the regulatory framework for prompt corrective action. To be “well capitalized,” our Bank must maintain minimum leverage, tier 1 risk-based and total risk-based capital ratios of at least 5.0%, 6.0% and 10.0%, respectively. Management believes that no conditions or events have occurred since December 31, 2014 that management believes would materially adversely change the Bank’s capital classification. From time to time, we may need to raise additional capital to support our Bank’s further growth and to maintain its “well capitalized” status. Effective January 1, 2015, the OCC and related agencies set forth revised capital adequacy quantitative measures which increased the “well capitalized” standard for minimum leverage, tier 1 risk-based and total risk-based capital ratios to at least 5.0%, 8.0% and 10.0%, respectively. The revised guidance also increases the risk weighting of certain assets, however the risk-based capital treatment of residential mortgage exposures remains unchanged. The quarter-ended March 31, 2015 is the first quarter the Bank will be subject to the revised guidance. If the revised guidance were applied at December 31, 2014, the Bank’s capital ratios would exceed the new “well capitalized” capital adequacy standards.

The Bank’s capital amounts, capital ratios and capital requirements were as follows:

As of December 31, 2014

	Actual		For Capital Adequacy Purposes		To be “Well Capitalized” Under Prompt Corrective Action Regulations		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
(Dollars in thousands)							
Tier 1 leverage (core) capital to adjusted tangible assets	\$460,160	8.84	% \$208,211	4.00	% \$260,263	5.00	%
Tier 1 capital (to risk-weighted assets)	460,160	14.95	% N/A	N/A	184,630	6.00	%
Total capital (to risk-weighted assets)	483,347	15.71	% 246,173	8.00	% 307,716	10.00	%
Tangible capital (to tangible assets)	459,123	8.82	% 78,079	1.50	% N/A	N/A	

As of June 30, 2014

	Actual		For Capital Adequacy Purposes		To be “Well Capitalized” Under Prompt Corrective Action Regulations		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
(Dollars in thousands)							
Tier 1 leverage (core) capital to adjusted tangible assets	\$382,441	8.66	% \$176,639	4.00	% \$220,799	5.00	%
Tier 1 capital (to risk-weighted assets)	382,441	14.42	% N/A	N/A	159,181	6.00	%
Total capital (to risk-weighted assets)	400,814	15.11	% 212,241	8.00	% 265,302	10.00	%
Tangible capital (to tangible assets)	382,441	8.66	% 66,240	1.50	% N/A	N/A	

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We measure interest rate sensitivity as the difference between amounts of interest-earning assets and interest-bearing liabilities that mature or contractually re-price within a given period of time. The difference, or the interest rate sensitivity gap, provides an indication of the extent to which an institution’s interest rate spread will be affected by changes in interest rates. A gap is considered positive when the amount of interest rate sensitive assets exceeds the amount of interest rate sensitive liabilities and negative when the amount of interest rate sensitive liabilities exceeds the amount of interest rate sensitive assets. In a rising interest rate environment, an institution with a positive gap would be in a better position than an institution with a negative gap to invest in higher yielding assets or to have its asset yields adjusted upward, which would cause the yield on its assets to increase at a faster pace than the cost of its interest-bearing liabilities. During a period of falling interest rates, however, an institution with a positive gap would

tend to have its assets reprice at a faster rate than one with a negative gap, which would tend to reduce the growth in its net interest income.

55

Table of Contents

The following table sets forth the amounts of interest earning assets and interest bearing liabilities that were outstanding at December 31, 2014 and the portions of each financial instrument that are expected to mature or reset interest rates in each future period:

(Dollars in thousands)	Term to Repricing, Repayment, or Maturity at December 31, 2014					Total
	Six Months or Less	Over Six Months Through One Year	Over One Year Through Five Years	Over Five Years		
Interest-earning assets:						
Cash and cash equivalents	\$210,139	\$—	\$—	\$—		\$210,139
Securities ¹	292,593	14,439	38,362	77,955		423,349
Stock of the FHLB, at cost	44,992	—	—	—		44,992
Loans—net of allowance for loan loss	643,610	455,892	2,848,557	355,602		4,303,661
Loans held for sale	131,117	—	—	—		131,117
Total interest-earning assets	1,322,451	470,331	2,886,919	433,557		5,113,258
Non-interest earning assets						
Total assets	\$1,322,451	\$470,331	\$2,886,919	\$433,557		\$5,194,721
Interest-bearing liabilities:						
Interest-bearing deposits	\$520,905	\$2,807,054	\$241,700	\$168,606		\$3,738,265
Securities sold under agreements to repurchase	—	—	35,000	—		35,000
Advances from the FHLB	260,000	10,000	315,000	85,000		670,000
Other borrowed funds	5,155	—	—	—		5,155
Total interest-bearing liabilities	786,060	2,817,054	591,700	253,606		4,448,420
Other non-interest-bearing liabilities						
Stockholders' equity	—	—	—	—		450,422
Total liabilities and equity	\$786,060	\$2,817,054	\$591,700	\$253,606		\$5,194,721
Net interest rate sensitivity gap	\$536,391	\$(2,346,723)	\$2,295,219	\$179,951		\$664,838
Cumulative gap	\$536,391	\$(1,810,332)	\$484,887	\$664,838		\$664,838
Net interest rate sensitivity gap—as a % of interest earning assets	40.56	% (498.95)	% 79.50	% 41.51		% 13.00
Cumulative gap—as % of cumulative interest earning assets	40.56	% (100.98)	% 10.36	% 17.54		% 13.00

1. Comprised of agency and non-agency mortgage-backed securities, municipal securities and other non-agency debt securities, which are classified as held-to-maturity, available-for-sale and trading.

The above table provides an approximation of the projected re-pricing of assets and liabilities at December 31, 2014 on the basis of contractual maturities, adjusted for anticipated prepayments of principal and scheduled rate adjustments. The loan and securities prepayment rates reflected herein are based on historical experience. For the non-maturity deposit liabilities, we use decay rates and rate adjustments based upon our historical experience. Actual repayments of these instruments could vary substantially if future experience differs from our historic experience. Although “gap” analysis is a useful measurement device available to management in determining the existence of interest rate exposure, its static focus as of a particular date makes it necessary to utilize other techniques in measuring exposure to changes in interest rates. For example, gap analysis is limited in its ability to predict trends in future earnings and makes no assumptions about changes in prepayment tendencies or deposit or loan maturity preferences.

Table of Contents

The following table indicates the sensitivity of net interest income movements to parallel instantaneous shocks in interest rates for the 1-12 months and 13-24 months' time periods. For purposes of modeling net interest income sensitivity the Bank assumes no growth in the balance sheet other than for retained earnings:

(Dollars in thousands)	As of December 31, 2014					
	First 12 Months		Next 12 Months			
	Net Interest Income	Percentage Change from Base	Net Interest Income	Percentage Change from Base		
Up 200 basis points	\$210,961	1.54	% \$187,581	(9.04)%	
Base	207,759	—	% 206,219	—	%	
Down 200 basis points	203,687	(1.96)%	197,158	(4.39)%

We attempt to measure the effect market interest rate changes will have on the net present value of assets and liabilities, which is defined as market value of equity. The market value of equity for these purposes is not intended to refer to the trading pricing of our common stock. We analyze the market value of equity sensitivity to an immediate parallel and sustained shift in interest rates derived from the current treasury and LIBOR yield curves. For rising interest rate scenarios, the industry market interest rate forecast was increased by 100, 200 and 300 basis points.

The following table indicates the sensitivity of market value of equity to the interest rate movement described above:

(Dollars in thousands)	As of December 31, 2014				
	Net Present Value	Percentage Change from Base	Net Present Value as a Percentage of Assets		
	Up 300 basis points	\$292,058	(43.9)%	6.00
Up 200 basis points	354,524	(31.9)%	7.08	%
Up 100 basis points	436,711	(16.1)%	8.43	%
Base	520,459	—	%	9.75	%
Down 100 basis points	586,490	12.7	%	10.76	%
Down 200 basis points	621,600	19.4	%	11.26	%

The computation of the prospective effects of hypothetical interest rate changes is based on numerous assumptions, including relative levels of interest rates, asset prepayments, runoffs in deposits and changes in repricing levels of deposits to general market rates, and should not be relied upon as indicative of actual results. Furthermore, these computations do not take into account any actions that we may undertake in response to future changes in interest rates.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

For quantitative and qualitative disclosures regarding market risks in our portfolio, see, "Management's Discussion and Analysis of Financial Condition and Results of Operations—Quantitative and Qualitative Disclosures About Market Risk."

ITEM 4. CONTROLS AND PROCEDURES

The Company's management, with the participation of its Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures, pursuant to Exchange Act Rule 13a-15(e). Based upon that evaluation, our Chief Executive Officer along with our Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission's rules and forms, and that such information is

accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents

Management, including the Company's Chief Executive Officer and Chief Financial Officer, does not expect that the Company's internal controls will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of internal controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Also, any evaluation of the effectiveness of controls in future periods are subject to the risk that those internal controls may become inadequate because of changes in business conditions, or that the degree of compliance with the policies or procedures may deteriorate.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are not involved in any material legal proceedings. From time to time we may be a party to a claim or litigation that arises in the ordinary course of business, such as claims to enforce liens, claims involving the origination and servicing of loans, and other issues related to the business of the Bank.

ITEM 1A. RISK FACTORS

We face a variety of risks that are inherent in our business and our industry. These risks are described in more detail under Part 1, “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended June 30, 2014. We encourage you to read these factors in their entirety. Moreover, other factors may also exist that we cannot anticipate or that we currently do not consider to be significant based on information that is currently available.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The table below sets forth our market repurchases of BofI common stock and the BofI common shares retained in connection with net settlement of restricted stock awards during the three months ended December 31, 2014. Purchases made relate to the stock repurchase plan of 414,991 shares that was originally approved by the Company’s Board of Directors on July 5, 2005, plus an additional 500,000 shares approved on November 20, 2008. Stock repurchased under this plan will be held as treasury shares.

Period	Number of Shares Purchased	Average Price Paid Per Shares	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
Stock Repurchases				
Quarter Ended December 31, 2014				
October 1, 2014 to December 31, 2014	—	\$—	—	319,291
Balance at December 31, 2014	595,700	\$5.72	595,700	319,291
Stock Retained in Net Settlement				
Beginning Balance at October 1, 2014	391,072			
October 1, 2014 to October 31, 2014	41			
November 1, 2014 to November 30, 2014	1,381			
December 1, 2014 to December 31, 2014	5,160			
Ending Balance at December 31, 2014	397,654			
Total Treasury Shares at December 31, 2014	993,354			

ITEM 3. DEFAULTS UPON SENIOR SECURITIES
