SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

Quarterly Report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

For the quarterly period ended March 31, 2012

OR

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission file number 001-34095

FIRST BUSINESS FINANCIAL SERVICES, INC.

(Exact name of registrant as specified in its charter)

Wisconsin

39-1576570

(State or jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

401 Charmany Drive Madison, WI

53719

(Address of Principal Executive Offices)

(Zip Code)

(608) 238-8008

Telephone number

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities and Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data Field required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the registrant's sole class of common stock, par value \$0.01 per share, on April 19, 2012 was 2,625,288 shares.

Table of Contents

Notes to Unaudited Consolidated Financial Statements

Note 1 — Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations. First Business Financial Services, Inc. (together with all of its subsidiaries, collectively referred to as “FBFS” or the “Corporation”) is a registered bank holding company incorporated under the laws of the State of Wisconsin and is engaged in the commercial banking business through its wholly owned subsidiaries First Business Bank (“FBB”) and First Business Bank — Milwaukee (“FBB-Milwaukee”). FBB and FBB-Milwaukee are sometimes referred to together as the “Banks”. FBB operates as a commercial banking institution in the Dane County and surrounding areas market with loan production offices in Oshkosh, Appleton, and Green Bay, Wisconsin. FBB also offers trust and investment services through First Business Trust & Investments (“FBTI”), a division of FBB. FBB — Milwaukee operates as a commercial banking institution in Waukesha County and surrounding areas market. The Banks provide a full range of financial services to businesses, business owners, executives, professionals and high net worth individuals. The Banks are subject to competition from other financial institutions and service providers and are also subject to state and federal regulations. FBB has the following subsidiaries: First Business Capital Corp. (“FBCC”), First Madison Investment Corp. (“FMIC”), First Business Equipment Finance, LLC and FBB Real Estate, LLC (“FBBRE”). FMIC is located in and was formed under the laws of the state of Nevada. FBB-Milwaukee has one subsidiary, FBB — Milwaukee Real Estate, LLC (“FBBMRE”).

Principles of Consolidation. The unaudited consolidated financial statements include the accounts and results of First Business Financial Services, Inc. (“FBFS” or the “Corporation”), and its wholly-owned subsidiaries, First Business Bank and First Business Bank — Milwaukee (“Banks”). In accordance with the provisions of Accounting Standards Codification (ASC) Topic 810, the Corporation’s ownership interest in FBFS Statutory Trust II (“Trust II”) has not been consolidated into the financial statements. All significant intercompany balances and transactions were eliminated in consolidation.

Basis of Presentation. The accompanying unaudited consolidated financial statements were prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. The Corporation has not changed its significant accounting and reporting policies from those disclosed in the Corporation’s Form 10-K for the year ended December 31, 2011 except as described further below in Note 1.

In the opinion of management, all adjustments (consisting of normal recurring accruals) necessary for a fair presentation of the unaudited consolidated financial statements were included in the unaudited consolidated financial statements. The results of operations for the three month period ended March 31, 2012 is not necessarily indicative of results that may be expected for any other interim period or the entire fiscal year ending December 31, 2012. Certain amounts in prior periods may have been reclassified to conform to the current presentation. Subsequent events were evaluated through the issuance of the unaudited consolidated financial statements.

Recent Accounting Pronouncements.

Fair Value Measurement. In May 2011, the FASB issued ASU 2011-04, “Fair Value Measurement: Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in the U.S. GAAP and IFRSs” (ASU 2011-04). The amended guidance of ASU 2011-04 (i) clarifies how a principal market is determined, (ii) establishes the valuation premise for the highest and best use of non-financial assets, (iii) addresses the fair value measurement of instruments with offsetting market or counterparty credit risks, (iv) extends the prohibition on blockage factors to all three levels of the fair value hierarchy, and (v) requires additional disclosures including transfers between Level 1 and Level 2 of the fair value hierarchy, quantitative and qualitative information and a description of an entity’s valuation process for Level 3 fair value measurements, and fair value hierarchy disclosures for financial instruments not measured at fair value. ASU 2011-04 is effective for interim and annual periods beginning on or after December 15, 2011, with early adoption prohibited. The adoption of ASU 2011-04 as of January 1, 2012 did not have a material impact on the Corporation’s consolidated financial condition or results of operations.

Note 2 — Earnings Per Common Share

Earnings per common share are computed using the two-class method. Basic earnings per common share are computed by dividing net income allocated to common shares by the weighted average number of shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities include unvested restricted shares. Unvested restricted shares are considered participating securities because holders of these securities receive non-forfeitable dividends at the same rate as holders of the Corporation's common stock. Diluted earnings per share are computed by dividing net income allocated to common shares adjusted for reallocation of undistributed earnings of unvested restricted shares by the weighted average number of shares determined for the basic earnings per common share computation plus the dilutive effect of common stock equivalents using the treasury stock method. For the three month periods ended March 31, 2012 and 2011, average anti-dilutive employee share-based awards totaled 115,050 and 202,741, respectively.

	For the Three Months Ended March 31,	
	2012	2011
Basic earnings per common share		
Net income	\$2,210,237	\$1,349,460
Less: earnings allocated to participating securities	80,221	51,796
Earnings allocated to common shareholders	\$2,130,016	\$1,297,664
Weighted-average common shares outstanding, excluding participating securities	2,530,084	2,497,918
Basic earnings per common share	\$0.84	\$0.52
Diluted earnings per common share		
Earnings allocated to common shareholders	\$2,130,016	\$1,297,663
Reallocation of undistributed earnings	(24)	—
Earnings allocated to common shareholders	\$2,129,992	\$1,297,663
Weighted average common shares outstanding	2,530,084	2,497,918
Dilutive effect of share-based awards	863	—
Weighted-average diluted common shares outstanding	2,530,947	2,497,918
Diluted earnings per common share	\$0.84	\$0.52

Note 3 — Share-Based Compensation

The Corporation adopted the 2006 Equity Incentive Plan (the "Plan"). The Plan is administered by the Compensation Committee of the Board of Directors of FBFS and provides for the grant of equity ownership opportunities through incentive stock options and nonqualified stock options ("Stock Options") as well as restricted stock. As of March 31, 2012, 45,542 shares were available for future grants under the Plan. Shares covered by awards that expire, terminate or lapse will again be available for the grant of awards under the Plan. The Corporation may issue new shares and shares from treasury for shares delivered under the Plan. The 2006 plan expires January 30, 2016.

Stock Options

The Corporation may grant Stock Options to senior executives and other employees under the its approved equity incentive plans. Stock Options generally have an exercise price that is equal to the fair value of the common shares on the date the option is awarded. Stock Options granted under the plans are subject to graded vesting, generally ranging from four to eight years, and have a contractual term of 10 years. For any new awards issued, compensation expense is recognized over the requisite service period for the entire award on a straight-line basis. No Stock Options were granted since the Corporation met the definition of a public entity and no Stock Options were modified, repurchased or cancelled. Therefore, no stock-based compensation related to Stock Options was recognized in the consolidated financial statements for the three months ended March 31, 2012 and 2011. As of March 31, 2012, all Stock Options granted and not previously forfeited have vested.

Stock Option activity for the year ended December 31, 2011 and three months ended March 31, 2012 was as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)
Outstanding at December 31, 2010	138,766	\$22.09	2.75
Granted	—	—	
Exercised	—	—	
Expired	(13,732)	19.00	
Forfeited	—	—	
Outstanding at December 31, 2011	125,034	\$22.43	1.75
Exercisable at December 31, 2011	125,034		1.75
Outstanding as of December 31, 2011	125,034	\$22.43	1.75
Granted	—	—	
Exercised	—	—	
Expired	—	—	
Forfeited	—	—	
Outstanding at March 31, 2012	125,034	\$22.43	1.50
Exercisable at March 31, 2012	125,034	\$22.43	1.50

Restricted Stock

Under the Plan, the Corporation may grant restricted shares to plan participants, subject to forfeiture upon the occurrence of certain events until the dates specified in the participant's award agreement. While the restricted shares are subject to forfeiture, the participant may exercise full voting rights and will receive all dividends and other distributions paid with respect to the restricted shares. The restricted shares granted under the Plan are subject to graded vesting. Compensation expense is recognized over the requisite service period of four years for the entire award on a straight-line basis. Upon vesting of restricted share awards, the benefits of tax deductions in excess of recognized compensation expense is recognized as a financing cash flow activity. For the three months ended March 31, 2012, there were two restricted share awards that vested on a date at which the closing price was greater than the market value on the date of grant and is reflected in the unaudited consolidated statement of cash flows. For the three months ended March 31, 2011, all restricted share awards vested on a date at which the closing price was lower than the market value on the date of grant; therefore no excess tax benefit is reflected in the unaudited consolidated statement of cash flows for that period.

Restricted share activity for the year ended December 31, 2011 and the three months ended March 31, 2012 was as follows:

	Number of Restricted Shares	Weighted Average Grant-Date Fair Value
Nonvested balance as of December 31, 2010	101,182	\$14.93
Granted	34,625	17.05
Vested	(39,939)	16.24
Forfeited	—	—
Nonvested balance as of December 31, 2011	95,868	15.15
Granted	—	—
Vested	(1,125)	14.08
Forfeited	—	—
Nonvested balance as of March 31, 2012	94,743	15.16

As of March 31, 2012, \$1.2 million of deferred compensation expense was included in additional paid-in capital in the consolidated balance sheet related to unvested restricted shares which the Corporation expects to recognize over approximately three years. As of March 31, 2012, all restricted shares that vested were delivered.

Note 4 — Securities

The amortized cost and estimated fair value of securities available-for-sale were as follows:

	As of March 31, 2012			
	Amortized cost	Gross unrealized holding gains	Gross unrealized holding losses	Estimated fair value
	(In Thousands)			
Municipal obligations	\$4,562	\$45	\$(59)) \$4,548
Collateralized mortgage obligations — government agencies	159,782	4,254	(104)) 163,932
Collateralized mortgage obligations — government-sponsored enterprises	2,063	4	—) 2,067
	\$166,407	\$4,303	\$(163)) \$170,547
	As of December 31, 2011			
	Amortized cost	Gross unrealized holding gains	Gross unrealized holding losses	Estimated fair value
	(In Thousands)			
Municipal obligations	\$2,736	\$95	\$—) \$2,831
Collateralized mortgage obligations — government agencies	161,443	4,022	(64)) 165,401
Collateralized mortgage obligations — government-sponsored enterprises	2,169	—	(15)) 2,154
	\$166,348	\$4,117	\$(79)) \$170,386

Collateralized mortgage obligations — government agencies represent securities guaranteed by the Government National Mortgage Association. Collateralized mortgage obligations — government-sponsored enterprises include securities guaranteed by the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association. Municipal obligations include securities issued by various municipalities located primarily within the State of Wisconsin and are tax-exempt general obligation bonds. There were no sales of securities available for sale in the three month periods ended March 31, 2012 and 2011.

The amortized cost and estimated fair value of securities available-for-sale by contractual maturity at March 31, 2012 are shown below. Actual maturities may differ from contractual maturities because issuers have the right to call or prepay obligations without call or prepayment penalties.

	Amortized Cost	Estimated Fair Value
	(In Thousands)	
Due in one year or less	\$234	\$239
Due in one year through five years	—	—
Due in five through ten years	6,323	6,379
Due in over ten years	159,850	163,929
	\$166,407	\$170,547

The table below shows the Corporation's gross unrealized losses and fair value of investments, aggregated by investment category and length of time that individual investments were in a continuous unrealized loss position at March 31, 2012 and December 31, 2011. At March 31, 2012 and December 31, 2011, the Corporation had 15 out of 168 securities and 9 out of 155 securities that were in an unrealized loss position, respectively. Such securities have not experienced credit rating downgrades; however, they have primarily declined in value due to the current interest rate environment. At March 31, 2012, the Corporation did not hold any securities that had been in a continuous loss position for twelve months or greater.

The Corporation also has not specifically identified securities in a loss position that it intends to sell in the near term and does not believe that it will be required to sell any such securities. It is expected that the Corporation will recover the entire amortized cost basis of each security based upon an evaluation of the present value of the expected future cash flows. Accordingly, no other than temporary impairment was recorded in the consolidated results of operations for the three months ended March 31, 2012 and 2011.

A summary of unrealized loss information for available-for-sale securities, categorized by security type follows:

	As of March 31, 2012		12 months or longer		Total	
	Fair value	Unrealized losses	Fair value	Unrealized losses	Fair value	Unrealized losses
	(In Thousands)

At March 31, 2012 and December 31, 2011, securities with a fair value of \$16.1 million and \$19.6 million, respectively, were pledged to secure interest rate swap contracts, outstanding Federal Home Loan Bank (FHLB) advances and client letters of credit. Securities pledged also provide for future availability for additional advances from the FHLB.

Note 5 — Loan and Lease Receivables, Impaired Loans and Leases and Allowance for Loan and Lease Losses

Loan and lease receivables consist of the following:

	March 31, 2012	December 31, 2011
	(In Thousands)	
Commercial real estate loans		
Commercial real estate — owner occupied	\$149,103	\$150,528
Commercial real estate — non-owner occupied	292,129	304,597

	17,448	16,652

Edgar Filing: FIRST BUSINESS FINANCIAL SERVICES, INC. - Form 10-Q

Total gross loans and lease receivables	832,490	851,546
Less:		
Allowance for loan and lease losses	14,451	14,155
Deferred loan fees	742	704
Loans and lease receivables, net	\$817,297	\$836,687

The total principal amount of loans transferred to third parties, which consisted solely of participation interests in originated loans, during the three months ended March 31, 2012 and 2011 was \$25.8 million and \$1.5 million, respectively. Each of the transfers of these financial assets met the qualifications for sale accounting and therefore \$25.8 million and \$1.5 million for the three ended March 31, 2012 and 2011 has been derecognized in the unaudited consolidated financial statements. The Corporation has a continuing involvement in each of the agreements by way of relationship management and servicing the loans; however, there are no further obligations required of the Corporation in the event of default, other than standard representations and warranties related to sold amounts. The loans were transferred at their fair value and no gain or loss was recognized upon the transfer as the participation interest was transferred at or near the date of loan origination. There were no other significant purchases or sales of loan and lease receivables or transfers to loans held for sale during the three months ended March 31, 2012 and 2011. The total amount of outstanding loans transferred to third parties as loan participations at March 31, 2012 and December 31, 2011 was \$43.8 million and \$49.2 million, respectively, all of which were treated as a sale and derecognized under the applicable accounting guidance in effect at the time of the transfers of the financial assets. The Corporation continues to have involvement with these loans by way of partial ownership, relationship management and all servicing responsibilities. As of March 31, 2012 and December 31, 2011, the total amount of loan participations remaining on the Corporation's balance sheet was \$67.4 million and \$74.6 million, respectively. As of March 31, 2012 and December 31, 2011, \$3.4 million and \$3.4 million of the loans in this participation sold portfolio were considered impaired, respectively. The Corporation recognized a total \$2.7 million charge-off associated with specific credits within the retained portion of this portfolio of loans and is measured by the Corporation's allowance for loan and lease loss measurement process and policies. The Corporation does not share in the participant's portion of the charge-offs.

The following information illustrates ending balances of the Corporation's loan and lease portfolio, including impaired loans by class of receivable, and considering certain credit quality indicators as of March 31, 2012 and December 31, 2011:

Credit underwriting through a committee process is a key component of the Corporation's operating philosophy. Business development officers have relatively low individual lending authority limits, therefore requiring that a significant portion of the Corporation's new credit extensions be approved through various committees depending on the type of loan or lease, amount of the credit, and the related complexities of each proposal. In addition, the Corporation makes every effort to ensure that there is appropriate collateral at the time of origination to protect the Corporation's interest in the related loan or lease.

Each credit is evaluated for proper risk rating upon origination, at the time of each subsequent renewal, upon evaluation of updated financial information from our borrowers, or as other circumstances dictate. The Corporation uses a nine grade risk rating system to monitor the ongoing credit quality of its loans and leases. The risk rating grades follow a consistent definition, but are then applied to specific loan types based on the nature of the loan. Each risk rating is subjective and depending on the size and nature of the credit subject to various levels of review and concurrence on the stated risk rating. Depending on the type of loan and related risk rating, the Corporation groups loans into four categories, which determine the level and nature of review by management.

Category I — Loans and leases in this category are performing in accordance with the terms of the contract and generally exhibit no immediate concerns regarding the security and viability of the underlying collateral of the debt, financial stability of the borrower, integrity or strength of the borrower's management team or the business industry in which the borrower operates. Loans and leases in this category are not subject to additional monitoring procedures above and beyond what is required at the origination or renewal of the loan or lease. The Corporation monitors Category I loans and leases through payment performance along with personal relationships with our borrowers and monitoring of financial results and compliance per the terms of the agreement.

Category II — Loans and leases in this category are beginning to show signs of deterioration in one or more of the Corporation's core underwriting criteria such as financial stability, management strength, industry trends and collateral values. Management will place credits in this category to allow for proactive monitoring and resolution with the borrower to possibly mitigate the area of concern and prevent further deterioration or risk of loss to the Corporation. Category II loans are monitored frequently by the assigned business development officer and by a subcommittee of the Banks' loan committees and are considered performing.

Category III — Loans and leases in this category may be classified by the Banks' Regulators or identified by the Corporation's business development officers and senior management as warranting special attention. Category III loans and leases generally exhibit undesirable characteristics such as evidence of adverse financial trends and conditions, managerial problems, deteriorating economic conditions within the related industry, or evidence of adverse public filings and may exhibit collateral shortfall positions. Management continues to believe that it will collect all required principal and interest in accordance with the original terms of the contract and therefore Category III loans are considered performing and no specific reserves are established for this category. This portfolio of loans is monitored on a monthly basis by management, loan committees of the Banks, as well as the Banks' Boards of Directors.

Edgar Filing: FIRST BUSINESS FINANCIAL SERVICES, INC. - Form 10-Q

Category IV — Loans and leases in this category are considered to be impaired. Impaired loans and leases have been placed on non-accrual as management has determined that it is unlikely that the Banks will receive the required principal and interest in accordance with the contractual terms of the agreement. Impaired loans are individually evaluated to assess the need for the establishment of specific reserves or charge-offs. When analyzing the adequacy of collateral, the Corporation obtains external appraisals at least annually for impaired loans and leases. External appraisals are obtained from the Corporation's approved appraiser listing and are independently reviewed to monitor the quality of such appraisals. To the extent a collateral shortfall position is present, a specific reserve or charge-off will be recorded to reflect the magnitude of the impairment. Loans and leases in this category are monitored on a monthly basis by management, loan committees of the Banks, as well as the Banks' Boards of Directors. The delinquency aging of the loan and lease portfolio by class of receivable as of March 31, 2012 and December 31, 2011 were as follows:

Total	45	\$ 17,722	\$ 12,439	49	\$ 18,327	\$ 13,423

As of both March 31, 2012 and December 31, 2011, there were no troubled debt restructurings that subsequently defaulted on their modified obligation. For the three months ended March 31, 2012 and the year ended December 31, 2011, the primary reasons for troubled debt restructuring classification are due to the Banks' decisions to provide below market interest rates to assist the borrowers in managing their cash flow as well as extensions of credit either through additional dollars or an extension of time when additional collateral or other evidence of repayment was not available.

The following represents additional information regarding the Corporation's impaired loans and leases by class:

(1) Average recorded investment is calculated primarily using daily average balances.

The difference between the loans and leases recorded investment and the unpaid principal balance of \$7.0 million and \$7.9 million as of March 31, 2012 and December 31, 2011 represents partial charge-offs resulting from confirmed losses due to the value of the collateral securing the loans and leases being below the carrying values of the loans and leases. Impaired loans and leases also included \$41,000 and \$111,000 of loans that are performing troubled debt restructurings, and thus, while not on non-accrual, are reported as impaired, due to the concession in terms. When a loan is placed on non-accrual, interest accruals are discontinued and previously accrued but uncollected interest is deducted from interest income. Cash payments collected on non-accrual loans are first applied to principal. Foregone interest represents the interest that was contractually due on the note. To the extent the amount of principal on a non-accrual note is fully collected and additional cash is received, the Corporation will recognize interest income. Net foregone interest for the three months ended March 31, 2011 was \$632,000.

Edgar Filing: FIRST BUSINESS FINANCIAL SERVICES, INC. - Form 10-Q

To determine the level and composition of the allowance for loan and lease losses, the Corporation breaks out the portfolio by segments and risk ratings. First, the Corporation evaluates loans and leases for potential impairment classification. If a loan or lease is determined to be impaired, then the Corporation analyzes the impaired loans and leases on an individual basis to determine a specific reserve based upon the estimated value of the underlying collateral for collateral-dependent loans, or alternatively, the present value of expected cash flows. The Corporation applies historical trends of the previously identified factors to each category of loans and leases that has not been individually evaluated for the purpose of establishing the general portion of the allowance.

A summary of the activity in the allowance for loan and lease losses by portfolio segment is as follows:

	As of and for the Three Months Ended March 31, 2012					
	Commercial real estate	Commercial and industrial	Consumer and other	Direct Financing Lease, Net	Total	
	(Dollars in Thousands)

Note 7 — FHLB Advances, Other Borrowings and Junior Subordinated Notes Payable

The composition of borrowed funds at March 31, 2012 and December 31, 2011 was as follows:

	March 31, 2012			December 31, 2011			
	Balance	Weighted average balance	Weighted average rate	Balance	Weighted average balance	Weighted average rate	
	(Dollars In Thousands)						
Federal funds purchased	\$—	\$—	—	% \$—	\$252	0.90	%
FHLB advances	479	480	6.12	482	656	5.83	
Line of credit	2,019	1,112	3.97	810	2,236	4.06	
Subordinated notes payable	39,000	39,000	6.82	39,000	39,000	6.12	
Junior subordinated notes	10,315	10,315	10.76	10,315	10,315	10.78	
	\$51,813	\$50,907	7.57	\$50,607	\$52,459	6.94	
Short-term borrowings	\$2,498			\$810			
Long-term borrowings	49,315			49,797			
	\$51,813			\$50,607			

As of March 31, 2012, the Corporation was in compliance with its debt covenants under its senior line of credit. The Corporation pays an unused line fee on its secured senior line of credit. For the three months ended March 31, 2012 and 2011, the Corporation incurred unused line fee interest expense of \$3,000 and \$1,000, respectively.

During the first quarter of 2012, the Corporation sold and issued approximately \$6.2 million aggregate principal amount of subordinated debentures ("debentures") to certain accredited investors. The debentures have been structured

to qualify as Tier 2 capital, mature on January 15, 2022 and bear a fixed interest rate of 7.5% per year for their entire term. The Corporation may, at its option, redeem the debentures, in whole or part, at any time after the fifth anniversary of issuance. The Corporation used the net proceeds from the sale of the debentures to replace a portion of its existing \$39.0 million of subordinated notes payable.

Note 8 — Fair Value Disclosures

The Corporation determines the fair market values of its financial instruments based on the fair value hierarchy established in ASC Topic 820, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair value is defined as the price that would be received in an orderly transaction that is not a forced liquidation or distressed sale at the measurement date and is based on exit prices. Fair value includes assumptions about risk such as nonperformance risk in liability fair values and is a market-based measurement, not an entity-specific measurement. The standard describes three levels of inputs that may be used to measure fair value.

Level 1 — Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Corporation has the ability to access at the measurement date.

Level 2 — Level 2 inputs are inputs other than quoted prices included with Level 1 that are observable for the asset or liability either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 — Level 3 inputs are inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The Corporation's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

Assets and liabilities measured at fair value on a recurring basis, segregated by fair value hierarchy level, are summarized below:

March 31, 2012	Fair Value Measurements Using			Total
	Level 1	Level 2	Level 3	
	(In Thousands)			
Assets:				
Municipal obligations	\$—	\$4,548	\$—	\$4,548
Collateralized mortgage obligations — government agencies	—	163,932	—	163,932
Collateralized mortgage obligations — government sponsored enterprises	—	2,067	—	2,067
Interest rate swaps	—	2,942	—	2,942
Liabilities:				
Interest rate swaps	\$—	\$2,942	\$—	\$2,942
December 31, 2011	Fair Value Measurements Using			Total
	Level 1	Level 2	Level 3	
	(In Thousands)			
Assets:				
Municipal obligations	\$—	\$2,831	\$—	\$2,831
Collateralized mortgage obligations — government agencies	—	165,401	—	165,401
Collateralized mortgage obligations — government sponsored enterprises	—	2,154	—	2,154
Interest rate swaps	—	3,434	—	3,434

Liabilities:

Interest rate swaps	\$—	\$3,434	\$—	\$3,434
---------------------	-----	---------	-----	---------

There were no transfers in or out of Level 1 or 2 during the three months ended March 31, 2012 or the year ended December 31, 2011 related to the above measurements.

Assets and liabilities measured at fair value on a non-recurring basis, segregated by fair value hierarchy are summarized below:

	Balance at March 31, 2012 (In Thousands)	As of and for the Three Months Ended March 31, 2012 Fair Value Measurements Using			Total Gains (Losses)
		Level 1	Level 2	Level 3	
Impaired loans	\$13,332	\$—	\$9,157	\$4,175	\$—
Foreclosed properties	2,590	564	1,917	109	(20)
	Balance at December 31, 2011 (In Thousands)	As of and for the Year Ended December 31, 2011 Fair Value Measurements Using			Total Gains (Losses)
		Level 1	Level 2	Level 3	
Impaired loans	\$12,787	\$—	\$12,787	\$—	\$—
Foreclosed properties	2,236	138	1,989	109	(621)

Impaired loans that are collateral dependent were written down to their fair value less costs to sell of \$13.3 million and \$12.8 million at March 31, 2012 and December 31, 2011, respectively, through the establishment of specific reserves or by recording charge-offs when the carrying value exceeded the fair value. Valuation techniques consistent with the market approach, income approach, or cost approach were used to measure fair value and primarily included observable inputs for the individual impaired loans being evaluated such as current appraisals, recent sales of similar assets or other observable market data. In cases where such inputs were unobservable, specifically discounts applied to appraisal values to adjust such values to current market conditions or to reflect net realizable value, the impaired loan balance is reflected within Level 3 of the hierarchy. The quantification of unobservable inputs for Level 3 values range from 13% - 100%.

Certain non-financial assets subject to measurement at fair value on a non-recurring basis included foreclosed properties. Foreclosed properties, upon initial recognition, are re-measured and reported at fair value through a charge-off to the allowance for loan and lease losses, if deemed necessary, based upon the fair value of the foreclosed property. The fair value of a foreclosed property, upon initial recognition, is estimated using a market approach or Level 2 inputs based on observable market data, typically an appraisal, or Level 3 inputs based upon assumptions specific to the individual property or equipment. Level 3 inputs typically include unobservable inputs such as management applied discounts used to further reduce values to a net realizable value or in situations when observable inputs become stale. The quantification of unobservable inputs are approximately 13%. Subsequent impairments of foreclosed properties are recorded as a loss on foreclosed properties. During the three months ended March 31, 2012, \$1.2 million of outstanding loans were transferred to foreclosed properties as the Corporation claimed title to the respective assets. During the three months ended March 31, 2012, the Corporation completed an evaluation of certain of its foreclosed assets. Based upon the evaluation and the results of the impairment calculation, we recognized impairment losses of \$20,000 on foreclosed properties. The activity of the Corporation's foreclosed properties is summarized as follows:

As of and for the Three Months Ended March 31, 2012 (In thousands)	As of and for the Year Ended December 31, 2011
--	---

Edgar Filing: FIRST BUSINESS FINANCIAL SERVICES, INC. - Form 10-Q

Foreclosed properties at the beginning of the period	\$2,236	\$1,750
Loans transferred to foreclosed properties, at lower of cost or fair value	1,186	3,119
Proceeds from sale of foreclosed properties	(657) (2,213
Net (loss) gain on sale of foreclosed properties	(155) 201
Impairment valuation	(20) (621
Foreclosed properties at the end of the period	\$2,590	\$2,236

Fair Value of Financial Instruments

The Corporation is required to disclose estimated fair values for its financial instruments. Fair value estimates, methods, and assumptions, consistent with exit price concepts for fair value measurements, are set forth below:

	March 31, 2012		December 31, 2011				
	Carrying Amount	Fair Value	Fair Value			Carrying Amount	Fair Value
			Total	Level 1	Level 2		
	(In Thousands)

*Not meaningful

Disclosure of fair value information about financial instruments, for which it is practicable to estimate that value, is required whether or not recognized in the consolidated balance sheets. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instruments. Certain financial instruments and all non-financial instruments are excluded from the disclosure requirements. Accordingly, the aggregate fair value amounts presented do not necessarily represent the underlying value of the Corporation.

The carrying amounts reported for cash and cash equivalents, interest bearing deposits, accrued interest receivable and accrued interest payable approximate fair value because of their short-term nature and because they do not present unanticipated credit concerns.

Securities: The fair value measurements of investment securities are determined by a third party pricing service which considers observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, trade execution data, market consensus prepayment speeds, credit information and the securities' terms and conditions, among other things.

Loans and Leases: The fair value estimation process for the loan portfolio uses an exit price concept and reflects discounts the Corporation believes are consistent with liquidity discounts in the market place. Fair values are estimated for portfolios of loans with similar financial characteristics. The fair value of performing and nonperforming loans is calculated by discounting scheduled and expected cash flows through the estimated maturity using estimated market rates that reflect the credit and interest rate risk inherent in the portfolio of loans and then applying a discount factor based upon the embedded credit risk of the loan and the fair value of collateral securing nonperforming loans when the loan is collateral dependent. The estimate of maturity is based on the Banks' historical experience with repayments for each loan classification, modified, as required, by an estimate of the effect of current economic and lending conditions. Significant unobservable inputs include but are not limited to discounts (investor yield premiums) applied to fair value calculations to further determine the exit value of a portfolio of loans.

Federal Home Loan Bank Stock: The carrying amount of FHLB stock equals its fair value because the shares may be redeemed by the FHLB at their carrying amount of \$100 per share amount.

Cash Surrender Value of Life Insurance: The carrying amount of the cash surrender value of life insurance approximates its fair value as the carrying value represents the current settlement amount.

Deposits: The fair value of deposits with no stated maturity, such as demand deposits and money market accounts, is equal to the amount payable on demand. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities. The fair value estimates do not include the intangible value that results from the funding provided by deposit liabilities compared to borrowing funds in the market.

Borrowed Funds: Market rates currently available to the Corporation and Banks for debt with similar terms and remaining maturities are used to estimate fair value of existing debt.

Financial Instruments with Off-Balance Sheet Risks: The fair value of the Corporation's off-balance sheet instruments is based on quoted market prices and fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the credit standing of the related counterparty. Commitments to extend credit and standby letters of credit are generally not marketable. Furthermore, interest rates on any amounts drawn under such commitments would generally be established at market rates at the time of the draw. Fair value would principally derive from the present value of fees received for those products.

Interest Rate Swaps: The carrying amount and fair value of existing derivative financial instruments are based upon independent valuation models, which use widely accepted valuation techniques, including discounted cash flow analysis on the expected cash flows of each derivative contract. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. The Corporation incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Corporation has considered the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts and guarantees.

Limitations: Fair value estimates are made at a discrete point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Corporation's entire holding of a particular financial instrument. Because no market exists for a significant portion of the Corporation's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect

on fair value estimates and were not considered in the estimates.

Note 9 — Derivative Financial Instruments

The Corporation offers interest rate swap products directly to qualified commercial borrowers. The Corporation economically hedges client derivative transactions by entering into offsetting interest rate swap contracts executed with a third party. Derivative transactions executed as part of this program are not designated as accounting hedge relationships and are marked-to-market through earnings each period. The derivative contracts have mirror-image terms, which results in the positions' changes in fair value primarily offsetting through earnings each period. The credit risk and risk of non-performance embedded in the fair value calculations is different between the dealer counterparties and the commercial borrowers which may result in a difference in the changes in the fair value of the mirror image swaps. The Corporation incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the counterparty's risk in the fair value measurements. When evaluating the fair value of its derivative contracts for the effects of non-performance and credit risk, the Corporation considered the impact of netting and any applicable credit enhancements such as collateral postings, thresholds and guarantees.

At March 31, 2012, the aggregate amortizing notional value of interest rate swaps with various commercial borrowers was \$48.4 million. The Corporation receives fixed rates and pays floating rates based upon LIBOR on the swaps with commercial borrowers. The aggregate amortizing notional value of interest rate swaps with dealer counterparties was also \$48.4 million. The Corporation pays fixed rates and receives floating rates based upon LIBOR on the swaps with dealer counterparties. These interest rate swaps mature in February 2013 through October 2021. The commercial borrower swaps were reported on the Corporation's balance sheet as a derivative asset of \$2.9 million and were included in accrued interest receivable and other assets. Dealer counterparty swaps were reported on the Corporation's balance sheet as a net derivative liability of \$2.9 million due to master netting and settlement contracts with dealer counterparties and were included in accrued interest payable and other liabilities as of March 31, 2012.

The table below provides information about the location and fair value of the Corporation's derivative instruments as of March 31, 2012 and December 31, 2011.

	Interest Rate Swap Contracts		Liability Derivatives	
	Asset Derivatives		Balance Sheet	Fair Value
	Balance Sheet	Fair Value	Balance Sheet	Fair Value
	Location		Location	
	(In Thousands)			
Derivatives not designated as hedging instruments				
March 31, 2012	Other assets	\$2,942	Other liabilities	\$2,942
December 31, 2011	Other assets	\$3,434	Other liabilities	\$3,434

No derivative instruments held by the Corporation for the three months ended March 31, 2012 were considered hedging instruments. All changes in the fair value of these instruments are recorded in other non-interest income. Given the mirror-image terms of the outstanding derivative portfolio the change in fair value for the three months ended March 31, 2012 and 2011 had no net impact to the unaudited consolidated income statement.

Note 10 — Regulatory Capital

The Corporation and the Banks are subject to various regulatory capital requirements administered by Federal and State of Wisconsin banking agencies. Failure to meet minimum capital requirements can result in certain mandatory, and possibly additional discretionary actions on the part of regulators, that if undertaken, could have a direct material effect on the Banks' assets, liabilities and certain off-balance sheet items as calculated under regulatory practices. The Corporation's and the Banks' capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. The Corporation has updated its Capital and Liquidity Action Plan (the "Plan"), which is designed to help ensure appropriate capital adequacy, to plan for future capital needs and to ensure that the Corporation serves as a source of financial strength to the Banks. The Corporation's and the Banks' Board of Directors and management work in concert with the appropriate regulatory bodies on decisions which affect their capital position, including but not limited to, decisions relating to the payment of dividends and increasing indebtedness.

As a bank holding company, the Corporation's ability to pay dividends is affected by the policies and enforcement powers of the Federal Reserve. Federal Reserve guidance urges companies to strongly consider eliminating, deferring or significantly reducing dividends if: (i) net income available to common shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividend; (ii) the prospective rate of earnings retention is not consistent with the bank holding company's capital needs and overall current prospective financial condition; or (iii) the bank holding company will not meet, or is in danger of not meeting, its minimum regulatory capital ratios. Management intends to consult with the Federal Reserve Bank of Chicago and provide them with information on the Corporation's then-current and prospective earnings and capital position, on a quarterly basis, in advance of declaring any cash dividends.

The Banks are also subject to certain legal, regulatory and other restrictions on their ability to pay dividends to the Corporation. As a bank holding company, the payment of dividends by the Banks to the Corporation is one of the sources of funds the Corporation could use to pay dividends, if any, in the future and to make other payments. Future dividend decisions by the Banks and the Corporation will continue to be subject to compliance with various legal, regulatory and other restrictions as defined from time to time.

Qualitative measures established by regulation to ensure capital adequacy require the Corporation and the Banks to maintain minimum amounts and ratios of Total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average assets. Tier 1 capital generally consists of stockholders' equity plus certain qualifying debentures and other specified items less intangible assets such as goodwill. Risk-based capital requirements presently address credit risk related to both recorded and off-balance sheet commitments and obligations. Management believes, as of March 31, 2012, that the Corporation and the Banks met all applicable capital adequacy requirements.

As of March 31, 2012, the most recent notification from the Federal Deposit Insurance Corporation and the State of Wisconsin Department of Financial Institutions categorized the Banks as well capitalized under the regulatory framework for prompt corrective action. In addition, the Banks exceeded the minimum net worth requirement of 6.0% required by the State of Wisconsin at December 31, 2011, the latest evaluation date.

The following table summarizes the Corporation's and Banks' capital ratios and the ratios required by their federal regulators at March 31, 2012 and December 31, 2011, respectively:

	Actual		Minimum Required for Capital Adequacy Purposes		Minimum Required to be Well Capitalized Under Prompt Corrective Action Requirements

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

When used in this report the words or phrases “may,” “could,” “should,” “hope,” “might,” “believe,” “expect,” “plan,” “assume,” “estimate,” “anticipate,” “project,” “likely,” or similar expressions are intended to identify “forward-looking statements.” Such statements are subject to risks and uncertainties, including, without limitation, changes in economic conditions in the market areas of First Business Bank (“FBB”) or First Business Bank — Milwaukee (“FBB — Milwaukee”), changes in policies by regulatory agencies, fluctuation in interest rates, demand for loans in the market areas of FBB or FBB — Milwaukee, borrowers defaulting in the repayment of loans and competition. These risks could cause actual results to differ materially from what First Business Financial Services, Inc. (“FBFS”) has anticipated or projected. These risk factors and uncertainties should be carefully considered by potential investors. See Item 1A — Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2011 for discussion relating to risk factors impacting the Corporation. Investors should not place undue reliance on any such forward-looking statement, which speaks only as of the date on which it was made. The factors described within this Form 10-Q could affect the financial performance of FBFS and could cause actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods.

Where any such forward-looking statement includes a statement of the assumptions or bases underlying such forward-looking statement, FBFS cautions that, while its management believes such assumptions or bases are reasonable and are made in good faith, assumed facts or bases can vary from actual results, and the differences between assumed facts or bases and actual results can be material, depending on the circumstances. Where, in any forward-looking statement, an expectation or belief is expressed as to future results, such expectation or belief is expressed in good faith and believed to have a reasonable basis, but there can be no assurance that the statement of

expectation or belief will result in, or be achieved or accomplished.

FBFS does not intend to, and specifically disclaims any obligation to, update any forward-looking statements.

The following discussion and analysis is intended as a review of significant events and factors affecting the financial condition and results of operations of FBFS for the periods indicated. The discussion should be read in conjunction with the Unaudited Consolidated Financial Statements and the Notes thereto presented in this Form 10-Q.

Table of Contents

General

Unless otherwise indicated or unless the context requires otherwise, all references in this Report to “FBFS”, the “Corporation”, “we”, “us”, “our”, or similar references mean First Business Financial Services, Inc. together with our subsidiaries. “FBB” or “FBB — Milwaukee” or the “Banks” are used to refer to our subsidiaries, First Business Bank and First Business Bank — Milwaukee, alone.

Overview

FBFS is a registered bank holding company incorporated under the laws of the State of Wisconsin and is engaged in the commercial banking business through its wholly-owned banking subsidiaries, FBB and FBB-Milwaukee. All of the operations of FBFS are conducted through the Banks and certain subsidiaries of FBB. The Corporation operates as a business bank focusing on delivering a full line of commercial banking products and services tailored to meet the specific needs of small and medium sized businesses, business owners, executives, professionals and high net worth individuals. The Corporation does not utilize a branch network to attract retail clients. In 2012, our strategic initiatives will focus on improving our asset quality as well as increasing full banking relationships with commercial and industrial clients in order to increase our in-market deposits, enhance our loan and lease portfolio and grow our non-interest income. We intend to add business development officers as appropriate to continue revenue growth and ongoing core earnings improvement. We believe this strategy will create opportunities to capitalize on economic expansion as well as any current disruption to our competitors' businesses in our core Wisconsin area.

Operational Highlights

Total assets were \$1.162 billion as of March 31, 2012 compared to \$1.177 billion as of December 31, 2011.

Net income for the three months ended March 31, 2012 was \$2.2 million compared to net income of \$1.3 million for the three months ended March 31, 2011.

Diluted earnings per common share for the three months ended March 31, 2012 were \$0.84 compared to diluted earnings per common share of \$0.52 for the three months ended March 31, 2011.

Net interest margin remained relatively flat at 3.15% for the three months ended March 31, 2012 compared to 3.14% for the three months ended March 31, 2011.

Top line revenue, the sum of net interest income and non-interest income, increased 6.1% to \$10.8 million for the three months ended March 31, 2012 compared to \$10.2 million for the three months ended March 31, 2011.

Provision for loan and lease losses was \$504,000 for the three months ended March 31, 2012 compared to \$1.4 million for same time period in the prior year. Allowance for loan and lease losses as a percentage of gross loans and leases was 1.74% at March 31, 2012 and 1.66% at December 31, 2011.

Non-performing assets as a percentage of total assets were 1.96% at March 31, 2012 compared to 2.04% at December 31, 2011.

Non-accrual loans declined by \$1.6 million or 7.2%, to \$20.2 million at March 31, 2012 from \$21.8 million at December 31, 2011.

Annualized return on average equity and annualized return on average assets were 13.43% and 0.74%, respectively, for the three month period ended March 31, 2012, compared to 9.62% and 0.48%, respectively, for the same time period in 2011.

Results of Operations

Top Line Revenue. Top line revenue is comprised of net interest income and non-interest income. This measurement is also commonly referred to as operating revenue. Top line revenue grew 6.1% for the three months ended March 31, 2012, as compared to the same period in the prior year. The components of top line revenue were as follows:

Table of Contents

	For the Three Months Ended March 31,			
	2012	2011	Change	
	(Dollars In Thousands)			
Net interest income	\$8,926	\$8,484	5.2	%
Non-interest income	1,850	1,672	10.6	
Total top line revenue	\$10,776	\$10,156	6.1	

Core Earnings

Core earnings is comprised of our pre-tax income adding back our provision for loan and lease losses, other identifiable costs of credit and other discrete items that are unrelated to our core business activities. In our judgment, the presentation of core earnings allows our management team, investors and analysts to better assess the growth of our core business by removing the volatility that is associated with costs of credit and other discrete items that are unrelated to our core business and facilitates a more streamlined comparison of core growth to our benchmark peers. Core earnings is a non-GAAP financial measure that does not represent and should not be considered as an alternative to net income derived in accordance with GAAP. Our core earnings metric has improved by 19.5% when comparing the three months ended March 31, 2012 to the three months ended March 31, 2011.

	For the Three Months Ended March 31,			
	2012	2011	Change	
	(Dollars in Thousands)			
Income before income tax expense	\$3,440	\$1,992	72.7	%
Add back:				
Provision for loan and lease losses	504	1,404	(64.1)
Loss (gain) on foreclosed properties	175	51	243.1	
Core earnings	\$4,119	\$3,447	19.5	

Return on Average Assets and Return on Average Equity. Annualized return on average assets (ROAA) for the three months ended March 31, 2012 was 0.74% compared to 0.48% for the three months ended March 31, 2011. The increase in return on average assets was primarily due to the improvement in net income. ROAA is a critical metric used by us to measure the profitability of our organization and how efficiently our assets are employed. During challenging economic times in the banking industry, ROAA is a measurement that allows us to better benchmark our profitability to our peers without the need to consider different degrees of leverage which can ultimately influence return on equity measures.

Annualized return on average equity for the three months ended March 31, 2012 was 13.43% compared to 9.62% for the three months ended March 31, 2011. The increase in return on average equity was due to the improvement in net income, specifically an increase in net interest income and a reduction of our loan and lease loss provision expense. We view return on average equity to be an important measure of profitability, and we continue to focus on improving our return to our shareholders by enhancing the overall profitability of our client relationships, controlling our expenses and minimizing our costs of credit.

Net Interest Income. Net interest income depends on the amounts of and yields on interest-earning assets as compared to the amounts of and rates paid on interest-bearing liabilities. Net interest income is sensitive to changes in market rates of interest and the asset/liability management procedures to prepare and respond to such changes.

Table of Contents

The following table provides information with respect to (1) the change in interest income attributable to changes in rate (changes in rate multiplied by prior volume), (2) the change in interest income attributable to changes in volume (changes in volume multiplied by prior rate) and (3) the change in interest income attributable to changes in rate/volume (changes in rate multiplied by changes in volume) for the three months ended March 31, 2012 compared to the same period of 2011.

(1) The average balances of loans and leases include non-performing loans and leases. Interest income related to non-performing loans and leases is recognized when collected.

(2) Includes amortized cost basis of assets available for sale.

Table of Contents

Net interest income increased by \$442,000, or 5.2%, during the three months ended March 31, 2012 compared to the same period in 2011. The increase in net interest income is primarily attributable to favorable rate variances from lower cost of deposits. The Federal Reserve held interest rates constant across the three-month periods ended March 31, 2012 and March 31, 2011. Therefore the majority of the increase in net interest income associated with rate variances was caused by replacing higher yielding maturing brokered certificates of deposits at lower current market rates.

The yield on average earning assets for the three months ended March 31, 2012 was 4.82% compared to 5.21% for the three months ended March 31, 2011. The yield on average earning assets for the three months ended March 31, 2012 was negatively affected by the overall change in the investment portfolio. We have invested in collateralized mortgage obligations with structured cash flow payments. The cash flows generated from these expected prepayments are reinvested in additional collateralized mortgage obligations or tax-exempt municipal obligations. Given the continued low rate environment, the overall coupon on new security purchases has typically been lower than the rates on securities that experience prepayments. This has caused the investment yield to decline by approximately 96 basis points. The total loans and leases receivable yield was 6.06% for the three months ended March 31, 2012 compared to 5.94% for the three months ended March 31, 2011. As we have continued our focus on originating commercial and industrial loans, we have experienced a decline in the average balance of commercial real estate loans as a percentage of total loans. The overall yield on the loan and lease portfolio will be influenced by a change in mix of loan types. The overall weighted average rate paid on interest-bearing liabilities was 1.91% for the three months ended March 31, 2012, a decrease of 41 basis points from 2.32% for the three months ended March 31, 2011. The decrease in the overall rate on the interest-bearing liabilities was primarily caused by the replacement of maturing certificates of deposits, including brokered certificates of deposits, at lower current market rates and a lower rate paid on our money market accounts. The continued low rate environment coupled with our maturity structure of our brokered certificate of deposit portfolio has provided us the opportunity to be able to manage our liability structure in both terms of composition and rate to assist in providing an enhanced net interest margin.

Net interest margin remained relatively flat at 3.15% for the three months ended March 31, 2012 compared to 3.14% for the three months ended March 31, 2011. Reducing our overall cost of funds and shifting of the mix of the loan and lease portfolio has positively influenced our net interest margin; however, the significant increase in our short-term investment portfolio and an increased investment portfolio at lower rates due to the current, ongoing low rate environment have primarily offset any benefit of net interest margin improvement resulting in a flat net interest margin. The overall level of our margin is depressed given the sizable amount of excess liquidity on our balance sheet. As we employ initiatives to reduce our overall short-term cash position, all else being equal, we expect that our margin will improve as we invest the excess in higher yielding alternatives, such as approved investment securities and loan and lease growth.

Provision for Loan and Lease Losses. The provision for loan and lease losses totaled \$504,000 and \$1.4 million for the three months ended March 31, 2012 and 2011, respectively. We determine our provision for loan and lease losses based upon credit risk and other subjective factors pursuant to our allowance for loan and lease loss methodology, the magnitude of current and historical net charge-offs recorded in the period and the amount of reserves established for impaired loans that present collateral shortfall positions.

During the three months ended March 31, 2012 and 2011, the factors influencing the provision for loan and lease losses were the following:

	For the Three Months Ended March 31,	
	2012	2011
	(In Thousands)	
Changes in the provision for loan and lease losses associated with:		
Establishment/modification of specific reserves on impaired loans, net	\$679	\$406
Increase in allowance for loan and lease loss reserve due to subjective factor changes	—	53
Charge-offs in excess of specific reserves	134	815
Recoveries	(56)	(28)

Edgar Filing: FIRST BUSINESS FINANCIAL SERVICES, INC. - Form 10-Q

Change in inherent risk of the loan and lease portfolio	(253) 158
Total provision for loan and lease losses	\$504	\$1,404

9

Table of Contents

The establishment/modification of specific reserves on impaired loans represents new specific reserves established on impaired loans where, although collateral shortfalls are present, we believe that we will be able to recover our principal and/or it represents the release of previously established reserves that are no longer required. Charge-offs in excess of specific reserves represents an additional provision for loan and lease losses required to maintain the allowance for loan and leases at a level deemed appropriate by management. This amount is net of the release of any specific reserve that may have already been provided. Charge-offs in excess of specific reserves can occur in situations where a loan has previously been partially written down to its estimated fair value and continues to decline, rapid deterioration of a credit that requires an immediate partial or full charge-off, or amounts where the specific reserve was not adequate to cover the amount of the required charge-off. Change in the inherent risk of the portfolio can be influenced by growth or migration in and out of an impaired loan classification where a specific evaluation of a particular credit may be required rather than the application of a general reserve ratio. Refer to Asset Quality for further information regarding the overall credit quality of our loan and lease portfolio.

Non-interest income. Non-interest income, consisting primarily of fees earned for trust and investment services, service charges on deposits, income from bank-owned life insurance and loan fees increased \$178,000, or 10.6%, to \$1.9 million for the three months ended March 31, 2012 from \$1.7 million for the three months ended March 31, 2011. The increase was primarily due to an increase in trust and investment services fee income and loan fees partially offset by a decline in other non-interest income.

Trust and investment services fee income increased by \$46,000, or 7.2%, to \$687,000 for the three months ended March 31, 2012 from \$641,000 for the three months ended March 31, 2011. Trust and investment services fee income is driven by the amount of assets under management and administration and can be positively or negatively influenced by the timing and magnitude of volatility within the equity markets.

At March 31, 2012, we had \$558.6 million of trust assets under management compared to \$532.6 million at December 31, 2011 and \$425.8 million at March 31, 2011. Assets under administration were \$140.8 million at March 31, 2012 compared to \$129.7 million at December 31, 2011 and \$131.7 million at March 31, 2011. The growth in assets under management is primarily due to establishing new relationships. A significant amount of growth occurred during the fourth quarter of 2011, when a large client utilized our expertise in handling a substantial transaction as part of its business succession plan. In accordance with our operating philosophy, we focus on obtaining and managing larger than average client relationships. Our assets under management and administration can be influenced by the addition or loss of a client relationship.

Services charges on deposits increased by \$106,000, or 28.4%, to \$479,000 for the three months ended March 31, 2012 from \$373,000 for the three months ended March 31, 2011. The increase of service charges on deposits was primarily related to an increase in deposit relationships associated with commercial and industrial clients who tend to have higher transaction volumes resulting in the generation of service charge income.

Loan fees increased by \$67,000, or 20.2%, to \$398,000 for the three months ended March 31, 2012 from \$331,000 for the three months ended March 31, 2011. Loan fees represent non-deferrable fees earned on loan activity and the revenue generated through the collateral audit process we perform to ensure the integrity of the collateral associated with our asset-based loans. The increase in loan fees was primarily related to additional collateral audits performed and additional other asset-based loan fees collected.

Non-interest expense. Non-interest expense increased marginally by \$72,000, or 1.1%, to \$6.8 million for the three months ended March 31, 2012 from \$6.8 million for the comparable period of 2011. The increase in non-interest expense was primarily caused by an increase in compensation expense primarily offset by a decline in FDIC insurance expense and collateral liquidation costs.

Compensation expense increased by \$268,000, or 7.2%, to \$4.0 million for the three months ended March 31, 2012 from \$3.7 million for the three months ended March 31, 2011. The increase was due, in part, to the following four factors: (1) increased salary expense due to annual merit increases, (2) new positions filled in support of strategic initiatives, (3) elevated expenses associated with the employer portion of social security taxes due to the payment of non-equity incentive awards during the first quarter of 2012 and (4) increased expenses associated with the employer match for amounts contributed to employee 401(k) plans. We made similar payments during the first quarter of 2011 for these types of expenses, but; not to the same magnitude and therefore generating an increase in compensation

expense.

FDIC insurance expense decreased by \$172,000, or 22.7%, to \$587,000 for the three months ended March 31, 2012 from \$759,000 for the three months ended March 31, 2011. Effective April 1, 2011, the FDIC amended the Federal Deposit Insurance Act to implement revisions required by the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), including, among other changes, modifying the definition of an institution's deposit insurance assessment base from a deposit-based calculation to an average assets less average tangible equity-based calculation and changing the

10

Table of Contents

assessment rate adjustments. This amendment resulted in a reduced FDIC insurance cost for our Banks. Collateral liquidation costs decreased by \$134,000, or 55.4%, to \$108,000 for the three months ended March 31, 2012 from \$242,000 for the three months ended March 31, 2011. Collateral liquidation costs are expenses incurred by us to facilitate resolution of certain problem commercial loans. The amount of collateral liquidation costs recorded in any particular period are influenced by the timing and level of effort required for each individual loan. Our ability to recoup these costs from our clients is uncertain and therefore we have expensed them as incurred through our consolidated results of operations. To the extent we are successful in recouping these expenses from our clients, the recovery of expense is shown as a net reduction to this line item. We have been successful in reducing our levels of non-performing loans and therefore incurring a lower level of collateral liquidation costs.

Income Taxes. Income tax expense was \$1.2 million for the three months ended March 31, 2012, with an effective tax rate of 35.8% compared to income tax expense of \$643,000 for the three months ended March 31, 2011, with an effective tax rate of 32.3%. The effective tax rate differs from the federal statutory corporate tax rate as follows:

	For the Three Months Ended March 31,			
	2012		2011	
Statutory federal tax rate	34.0	%	34.0	%
State taxes, net of federal benefit	4.7		4.1	
FIN 48 expense, net of federal benefit	1.0		—	
Bank owned life insurance	(1.7)	(2.9)
Tax-exempt security and loan income, net of TEFRA adjustments	(2.7)	(3.4)
Discrete items	—		(0.3)
Other	0.5		0.8	
	35.8	%	32.3	%

Generally, the provision for income taxes is determined by applying an estimated annual effective income tax rate to income before taxes and adjusting for discrete items. Typically, the rate is based on the most recent annualized forecast of pretax income, book versus tax differences and tax credits, if any. If we conclude that a reliable estimated annual effective tax rate cannot be determined, the actual effective tax rate for the year-to-date period may be used. We re-evaluate the income tax rates each quarter. Therefore, the current projected effective tax rate for the entire year may change.

Financial Condition

General. Our total assets remained relatively stable at \$1.162 billion as of March 31, 2012 compared to \$1.177 billion at December 31, 2011.

Short-term investments. Short-term investments increased by \$7.6 million to \$121.0 million at March 31, 2012 from \$113.4 million at December 31, 2011. Our short-term investments primarily consist of interest-bearing deposits held at the Federal Reserve Bank. The level of our short-term investments will be influenced by the timing of deposit gathering, scheduled maturities of brokered deposits, funding of loan growth when opportunities are presented, and the level of our available-for-sale securities portfolio. We value the safety and soundness provided by the Federal Reserve Bank and therefore we incorporate short-term investments in our on-balance sheet liquidity program. Please refer to Liquidity and Capital Resources for further discussion.

Securities. Securities available-for-sale remained relatively flat at \$170.5 million at March 31, 2012 compared to \$170.4 million at December 31, 2011. During this time period, we reinvested cash flows received from our securities with purchases of additional securities. Our available-for-sale investment portfolio primarily consists of collateralized mortgage obligations and is used to provide a source of liquidity, including the ability to pledge securities, while contributing to the earnings potential of the Banks. We purchase investment securities intended to protect our net interest margin while maintaining an acceptable risk profile. In addition, we will purchase investments to utilize our cash position effectively within appropriate policy guidelines and estimates of future cash demands. While collateralized mortgage obligations present prepayment risk and extension risk, we believe the overall credit risk associated with these investments is minimal as substantially all of the obligations we hold were issued by the Government National Mortgage Association (GNMA), a U.S. Government agency. The estimated prepayment streams associated with this portfolio also allow us to better match our short-term liabilities. The Banks' investment policies

allow for various types of investments including tax-exempt municipal securities. The addition of tax-exempt municipal securities provides for further opportunity to improve our overall yield on our investment portfolio. We evaluate the credit risk of the municipal obligations prior to purchase and limit our exposure of obligations to general obligation

Table of Contents

issuances from municipalities primarily in Wisconsin.

As we continue to evaluate the level of on-balance sheet liquidity, we may in the future purchase other types of investments as permitted by our investment policy. Such investments will be subject to credit worthiness and yields appropriate for the risk assumed.

During the three months ended March 31, 2012, we recognized unrealized holding gains of \$102,000 through other comprehensive income. The majority of the securities we hold have active trading markets, and we are not currently experiencing difficulties in pricing our securities. Our portfolio is sensitive to fluctuations in the interest rate environment and has limited sensitivity to credit risk due to the nature of the issuers of our securities as previously discussed. If interest rates decline and the credit quality of the securities remain positive, the market value of our debt securities portfolio should improve thereby increasing our total comprehensive income. If interest rates increase and the credit quality of the securities remain positive, the market value of our debt securities portfolio should decline and therefore decrease our total comprehensive income. No securities within our portfolio were deemed to be other-than-temporarily impaired as of March 31, 2012.

Loans and Leases Receivable. Loans and leases receivable, net of allowance for loan and lease losses, decreased by \$19.4 million, or 2.3%, to \$817.3 million at March 31, 2012 from \$836.7 million at December 31, 2011. We principally originate commercial business loans and commercial real estate loans. The overall mix of the loan and lease portfolio at March 31, 2012 remained generally consistent with the mix at December 31, 2011, with a continued concentration in commercial real estate mortgage loans at approximately 68% of our total loan and lease portfolio. We are seeing demand for new loans; however, our new loan and lease growth is not sufficient to keep pace with the level of the contractual amortization of our existing loan and lease portfolio. The economic environment continues to present challenges; specifically, the demand for loans from qualified prospects continues to be weak. We have also experienced greater competition as banks operating in our primary geographic area attempt to deploy excess liquidity. We remain committed to our underwriting standards and will not deviate from those standards for the sole purpose of growing our loan and lease portfolio. Therefore, we expect our new loan and lease activity to be lower than we have experienced in our past and may continue to be insufficient to replace normal amortization and potential disposition of non-performing loans in future quarters.

The allowance for loan and lease losses as a percentage of gross loans and leases was 1.74% as of March 31, 2012 and 1.66% as of December 31, 2011. Non-accrual loans and leases as a percentage of gross loans and leases decreased to 2.43% at March 31, 2012 compared to 2.56% at December 31, 2011. We continue to aggressively work through our problem loans and leases and are experiencing success in certain exit strategies; yet, we continue to identify new loans or leases where we believe the borrowers do not have adequate liquidity to make their payments in accordance with the terms of the contractual arrangements. The exit strategies undertaken, including but not limited to foreclosure actions, charge-offs, and pay-offs, have outpaced the identification of new impaired loans and therefore we experienced a net reduction in our non-accrual loans and leases. During the three months ended March 31, 2012, we recorded net charge-offs on impaired loans and leases of approximately \$208,000, comprised of \$264,000 of charge-offs and \$56,000 of recoveries. During the three months ended March 31, 2011, we recorded net charge-offs on impaired loans and leases of approximately \$873,000, comprised of \$901,000 of charge-offs and \$28,000 of recoveries. The charge-offs recorded are primarily due to declining real estate values supporting our loans where the collateral is no longer sufficient to cover the outstanding principal and the borrowers do not have other means to repay the obligation. Based upon our internal methodology which actively monitors the asset quality and inherent risks within the loan and loss portfolio, management concludes that a loan and lease loss reserve of \$14.5 million, 1.74% of total loans and leases, is appropriate as of March 31, 2012. Refer to the Asset Quality section for more information.

Deposits. As of March 31, 2012, deposits decreased by \$17.5 million to \$1.034 billion from \$1.051 billion at December 31, 2011. Deposits are the primary source of the Banks' funds for lending and other investment activities. A variety of accounts are designed to attract both short- and long-term deposits. These accounts include non-interest bearing transaction accounts, interest-bearing transaction accounts, money market accounts and time deposits. Deposit terms offered by the Banks vary according to the minimum balance required, the time period the funds must remain on deposit, the rates and products offered by marketplace competition and the interest rates charged on other sources of funds, among other factors. Attracting in-market deposits continues to be a focus of the Banks' business

development efforts. With two separately chartered financial institutions within our Corporation, we have the ability to offer our clients additional FDIC insurance coverage by maintaining separate deposits with each Bank. With the change in the regulations regarding the interest limits on NOW accounts to qualify for unlimited FDIC insurance, we have seen a shift in our balances out of NOW accounts and into non-interest bearing transaction accounts. The ending balances within the various deposit types fluctuate based upon maturity of time deposits, client demands for the use of their cash coupled with servicing and maintaining client relationships. We focus on attracting and servicing deposit relationships, as compared to rate sensitive clients, and therefore we monitor the success of growth of in-market deposits based on the average balances of our deposit accounts. Rate sensitive clients may create an element of volatility to our deposit balances. Refer to Note 6 - Deposits in our Unaudited Consolidated financial Statements for additional information

Table of Contents

regarding our deposit composition.

Our Banks' in-market deposits are obtained primarily from the South Central, Northeastern and Southeastern regions of Wisconsin. Of our total year-to-date average deposits, approximately \$630.8 million, or 59.4%, were considered in-market deposits for the three months ended March 31, 2012. This compares to in-market deposits of \$509.5 million, or 50.7%, for the year-to-date average at March 31, 2011. We continue to remain focused on increasing our in-market deposit base and reducing our overall dependency on brokered certificates of deposits; however, as changes in regulation occur, specifically as outlined in the Dodd-Frank Act, and other amendments by the FDIC, we cannot be assured that our clients will maintain their balances solely with our institution. Our competition and the banking industry as a whole face this challenge, and we believe new opportunities to develop relationships and attract new money will be available.

Asset Quality

Non-performing Assets. Our non-accrual loans and leases consisted of the following at March 31, 2012 and December 31, 2011, respectively:

	March 31, 2012	December 31, 2011	
	(Dollars In Thousands)		
Non-accrual loans and leases			
Commercial real estate:			
Commercial real estate — owner occupied	\$2,380	\$2,972	
Commercial real estate — non-owner occupied	1,041	2,249	
Construction and land development	6,057	7,229	
Multi-family	85	2,009	
1-4 family	2,856	3,506	
Total non-accrual commercial real estate	12,419	17,965	
Commercial and industrial	5,632	1,558	
Direct financing leases, net	—	18	
Consumer and other:			
Home equity and second mortgage	977	1,002	
Other	1,171	1,223	
Total non-accrual consumer and other loans	2,148	2,225	
Total non-accrual loans and leases	20,199	21,766	
Foreclosed properties, net	2,590	2,236	
Total non-performing assets	\$22,789	\$24,002	
Performing troubled debt restructurings	\$41	\$111	
Total non-accrual loans and leases to gross loans and leases	2.43	% 2.56	%
Total non-performing assets to total assets	1.96	2.04	
Allowance for loan and lease losses to gross loans and leases	1.74	1.66	
Allowance for loan and lease losses to non-accrual loans and leases	71.54	65.03	

As of March 31, 2012 and December 31, 2011, \$12.4 million and \$13.3 million of the non-accrual loans are considered troubled debt restructurings.

Table of Contents

A summary of our non-accrual loan activity from December 31, 2011 through March 31, 2012 is as follows (In Thousands):

Non-accrual loans and leases as of the beginning of the period	\$21,766
Loans and leases transferred to non-accrual status	4,080
Non-accrual loans and leases returned to accrual status	(342)
Non-accrual loans and leases transferred to foreclosed properties	(1,186)
Non-accrual loans and leases partially or fully charged-off	(259)
Cash received and applied to principal of non-accrual loans and leases	(3,861)
Non-accrual loans and leases as of the end of the period	\$20,198

We use a wide variety of available metrics to assess the overall asset quality of the portfolio and no one metric is used independently to make a final conclusion as to the asset quality of the portfolio. As of March 31, 2012, non-performing assets as a percentage of total assets declined to 1.96% from 2.04% at December 31, 2011. We monitor early stage delinquencies to provide insight of potential future problems. Based upon the payment performance, there does not appear to be any new areas of concern as of the end of the reporting period, as approximately 99% of the loan and lease portfolio is in a current payment status. This metric can change rapidly however, if factors currently unknown to us change. We also monitor our asset quality through our established categories as defined in Note 5 of our Unaudited Consolidated Financial Statements. We are seeing improved percentages in the categories that would be considered adequate credit quality. Although we continue to see signs of asset quality improvement we will continue to and will always actively monitor the credit quality of our loan and lease portfolios. Through this monitoring effort, we may identify additional loans and leases for which the borrowers or lessees are having difficulties making the required principal and interest payments based upon factors including but not limited to, the inability to sell land, inadequate cash flow from the operations of the underlying businesses, liquidation events, or bankruptcy filings. Therefore, we continue to experience new additions of non-accrual loans. We believe current economic conditions will remain largely the same for the near term. As a result, we expect that we will continue to experience elevated levels of impaired loans and leases. We are proactively working with our impaired loan borrowers to find meaningful solutions to difficult situations that are in the best interest of the Banks. As we continue to have these discussions, we expect we will continue to see further reductions in our overall non-accrual portfolio as our clients' financial performance returns to profitable levels, collateral is liquidated to provide sufficient reductions in outstanding principal, or alternatively as our clients establish different banking relationships with other institutions.

Impaired loans and leases exhibit weaknesses that inhibit repayment in compliance with the original terms of the note or lease. However, the measurement of impairment on loans and leases may not always result in a specific reserve included in the allowance for loan and lease losses. As part of the underwriting process as well as our ongoing monitoring efforts, we try to ensure that we have adequate collateral to protect our interest in the related loan or lease. As a result of this practice, a significant portion of our outstanding balance of non-performing loans or leases either does not require additional specific reserves or a minimal amount of required specific reserve as we believe the loans and leases are adequately collateralized as of the measurement period. In addition, management is proactive in recording charge-offs to bring loans to their net realizable value in situations where it is determined with certainty that we will not recover our entire principal. This practice leads to a lower allowance for loan and lease loss to non-accrual loans and leases ratio as compared to our peers or industry expectations. As of March 31, 2012 and December 31, 2011, our allowance for loan and lease losses to total non-accrual loans and leases was 71.54% and 65.03%, respectively. As we begin to see improvements in asset quality and allowance for loan and lease loss reserves are measured more through general characteristics of our portfolio rather than through specific identification, we will see this ratio rise. Conversely, if we identify further impaired loans this ratio could fall should the impaired loan be adequately collateralized and therefore no specific or general reserve provided. Given our business practices and evaluation of our existing loan and lease portfolio, management believes this coverage ratio is appropriate for the

probable losses inherent in our loan and lease portfolio as of March 31, 2012.

14

Table of Contents

The following represents additional information regarding our impaired loans and leases:

	For the Three Months Ended March 31, 2012 (In Thousands)	For the Three Months Ended March 31, 2011	As of and for the Year Ended December 31, 2011
Impaired loans and leases with no impairment reserves required	\$13,762	\$19,752	\$18,888
Impaired loans and leases with impairment reserves required	6,478	19,438	2,989
Total impaired loans and leases	20,240	39,190	21,877
Less:			
Impairment reserve (included in allowance for loan and lease losses)	1,438	3,778	888
Net impaired loans and leases	\$18,802	\$35,412	\$20,989
Average impaired loans and leases	\$19,701	\$38,014	\$33,793
Foregone interest income attributable to impaired loans and leases	\$421	\$756	\$2,682
Interest income recognized on impaired loans and leases	(236) (124) (787
Net foregone interest income on impaired loans and leases	\$185	\$632	\$1,895

Specific reserves are established on impaired loans when evidence of a collateral shortfall exists and we believe that there continues to be potential for us to recover our outstanding principal. When we are certain that we will not recover our principal on a loan or lease, we record a charge-off for the amount to recognize the loan or lease at its net realizable value. We record the charge-off through our allowance for loan and lease losses. For the three months ended March 31, 2012, we recorded net charge-offs of \$208,000 compared to recording net charge-offs for the three months ended March 31, 2011 of \$873,000. We continue to proactively monitor our loan and lease portfolio for further deterioration and apply our prescribed allowance for loan and lease loss reserve methodology. We believe that our allowance for loan and lease loss reserve was recorded at the appropriate level at March 31, 2012. However, given ongoing complexities with current workout situations, the lack of significant improvement in economic conditions and continued declines in collateral values, further charge-offs and increased provisions for loan losses could be recorded if additional facts and circumstances lead us to a different conclusion. In addition, various federal and state regulatory agencies review the allowance for loan and lease losses. These agencies may require that certain loan and lease balances be classified differently or charged off when their credit evaluations differ from those of management, based on their judgments about information available to them at the time of their examination.

Table of Contents

A summary of the activity in the allowance for loan and lease losses follows:

	For the Three Months Ended March 31,		
	2012	2011	
	(Dollars In Thousands)		
Allowance at beginning of period	\$14,155	\$16,271

Nonperforming assets also include foreclosed properties. A summary of our current period foreclosed properties activity is as follows (In Thousands):

Foreclosed properties as of December 31, 2011	\$2,236
Loans transferred to foreclosed properties	1,186
Proceeds from sale of foreclosed properties	(657
Net loss on sale of foreclosed properties	(155
Impairment valuation	(20
Foreclosed properties as of March 31, 2012	\$2,590

Table of Contents

Liquidity and Capital Resources

During the three months ended March 31, 2012 and the year ended December 31, 2011, the Banks did not make any dividend payments to the Corporation. The Banks are subject to certain regulatory limitations regarding their ability to pay dividends to the Corporation. We believe that the Corporation will not be adversely affected by these dividend limitations. The Corporation expects to meet its liquidity needs through existing cash on hand, established cash flow sources, its third party senior line of credit, or dividends received from the Banks, if any. The Corporation's principal liquidity requirements at March 31, 2012 are the repayment of the outstanding balance on its senior line of credit, interest payments due on subordinated notes and interest payments due on junior subordinated notes. The capital ratios of the Corporation and its subsidiaries continue to meet all applicable regulatory capital adequacy requirements and have either remained stable or have shown signs of improvement from December 31, 2011. The Corporation's and the Banks' Board of Directors and management work in concert with the appropriate regulatory bodies on decisions which affect their capital position, including but not limited to, decisions relating to the payment of dividends and increasing indebtedness.

The Banks maintain liquidity by obtaining funds from several sources. The Banks' primary sources of funds are principal and interest repayments on loans receivable and mortgage-related securities, deposits and other borrowings such as federal funds and FHLB advances. The scheduled payments of loans and mortgage-related securities are generally a predictable source of funds. Deposit flows and loan prepayments, however, are greatly influenced by general interest rates, economic conditions and competition.

We view on-balance sheet liquidity as a critical element to maintaining adequate liquidity to meet our cash and collateral obligations. We define our on-balance sheet liquidity as the total of our short-term investments and our unpledged securities available-for-sale. As of March 31, 2012, our immediate on-balance sheet liquidity was \$271.9 million. At March 31, 2012 and December 31, 2011, the Banks had \$120.4 million and \$113.2 million on deposit with the Federal Reserve Bank, respectively. Any excess funds not used for loan funding or satisfying other cash obligations were maintained as part of our on-balance sheet liquidity in our interest bearing accounts with the Federal Reserve Bank, as we value the safety and soundness provided by the Federal Reserve Bank. We plan to utilize excess liquidity to pay down maturing debt, pay down maturing brokered certificates of deposit, or invest in securities to maintain adequate liquidity at an improved margin. Should loan growth opportunities be presented, we would also expect to utilize excess liquidity to fund loan portfolio growth.

We had \$415.2 million of outstanding brokered deposits at March 31, 2012, compared to \$446.7 million of brokered deposits as of December 31, 2011, which represented 40.2% and 42.5%, respectively, of ending balance total deposits. We are committed to our continued efforts to raise in-market deposits and reduce our overall dependence on brokered certificates of deposit. However, brokered deposits are an efficient source of funding for the Banks and allow them to gather funds across a larger geographic base at price levels and maturities that are more attractive than single service deposits when required to raise a similar level of deposits within a short time period. Access to such deposits allows us the flexibility to decline pursuing single service deposit relationships in markets that have experienced unfavorable pricing levels. In addition, the administrative costs associated with brokered deposits are considerably lower than those that would be incurred to administer a similar level of local deposits with a similar maturity structure. Our in-market relationships remain stable; however, deposit balances associated with those relationships will fluctuate. We expect to establish new client relationships and continue marketing efforts aimed at increasing the balances in existing clients' deposit accounts. Nonetheless, we will likely continue to use brokered deposits to compensate for shortfalls in deposit gathering in maturity periods, typically three to five years, needed to effectively match the interest rate sensitivity measured through our defined asset/liability management process. In order to provide for ongoing liquidity and funding, all of our brokered deposits are certificates of deposit that do not allow for withdrawal at the option of the depositor before the stated maturity. The Banks' liquidity policies limit the amount of brokered deposits to 75% of total deposits, with a goal of 50% or less of brokered deposits to total deposits. The Banks were in compliance with the policy limits throughout 2012 and 2011.

The Banks were able to access the brokered certificate of deposit market as needed at rates and terms comparable to market standards during the three-month period ending 2012. In the event that there is a disruption in the availability of brokered deposits at maturity, the Banks have managed the maturity structure, in compliance with the Board of

Directors approved liquidity policy, so that at least one year of maturities could be funded through on balance sheet liquidity. These potential funding sources include deposits with the Federal Reserve Bank and borrowings with the Federal Home Loan Bank or Federal Reserve Discount Window utilizing currently unencumbered securities as collateral. As of March 31, 2012, the available liquidity is in excess of the stated policy and is equal to approximately 30 months of maturities. We believe the Banks will also have access to the unused federal funds lines, cash flows from borrower repayments, and cash flows from security maturities and have the ability to raise local market deposits by offering attractive rates to generate the level required to fulfill their liquidity needs.

Table of Contents

The Banks are required by federal regulation to maintain sufficient liquidity to ensure safe and sound operations. We believe that the Banks have sufficient liquidity to match the balance of net withdrawable deposits and short-term borrowings in light of present economic conditions and deposit flows.

Contractual Obligations and Off-balance Sheet Arrangements

There were no significant changes to the Corporation's contractual obligations and off-balance arrangements disclosed in our Form 10-K for the year ended December 31, 2011. We continue to believe that we have adequate capital and liquidity available from various sources to fund projected contractual obligations and commitments.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest rate risk, or market risk, arises from exposure of our financial position to changes in interest rates. It is our strategy to reduce the impact of interest rate risk on net interest margin by maintaining a favorable match between the maturities and repricing dates of interest-earning assets and interest-bearing liabilities. This strategy is monitored by the Banks' respective Asset/Liability Management Committees, in accordance with policies approved by the Banks' respective Boards of Directors. These committees meet regularly to review the sensitivity of each Bank's assets and liabilities to changes in interest rates, liquidity needs and sources, and pricing and funding strategies.

We use two techniques to measure interest rate risk. The first is simulation of earnings. The balance sheet is modeled as an ongoing entity whereby future growth, pricing, and funding assumptions are implemented. These assumptions are modeled under different rate scenarios.

The second measurement technique used is static gap analysis. Gap analysis involves measurement of the difference in asset and liability repricing on a cumulative basis within a specified time frame. A positive gap indicates that more interest-earning assets than interest-bearing liabilities reprice/mature in a time frame and a negative gap indicates the opposite. In addition to the gap position, other determinants of net interest income are the shape of the yield curve, general rate levels, reinvestment spreads, balance sheet growth and mix and interest rate spreads. We manage the structure of interest-earning assets and interest-bearing liabilities by adjusting their mix, yield, maturity and/or repricing characteristics based on market conditions. Currently, we do not employ any derivatives to assist in managing our interest rate risk exposure; however, management has the authorization and ability to utilize such instruments should they be necessary to manage interest rate exposure.

The process of asset and liability management requires management to make a number of assumptions as to when an asset or liability will reprice or mature. Management believes that its assumptions approximate actual experience and considers them reasonable, although the actual amortization and repayment of assets and liabilities may vary substantially. Our economic sensitivity to changes in interest rates at March 31, 2012 has not changed materially since December 31, 2011.

Item 4. Controls and Procedures

The Corporation's management, with the participation of the Corporation's Chief Executive Officer and Chief Financial Officer, has evaluated the Corporation's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer have concluded that the Corporation's disclosure controls and procedures were effective as of March 31, 2012.

There was no change in the Corporation's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended March 31, 2012 that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II. Other Information

Item 1. Legal Proceedings

From time to time, the Corporation and its subsidiaries are engaged in legal proceedings in the ordinary course of their respective businesses. Management believes that any liability arising from any such proceedings currently existing or threatened will not have a material adverse effect on the Corporation's financial position, results of operations, or cash

flows.
