PRECISION DRILLING CORPORATION ANNOUNCES RESULTS FOR THE THIRD QUARTER

Precision Drilling Corporation ("Precision" or the "Corporation") today announces its results for the third quarter of 2004. Diluted earnings per share from continuing operations were \$0.68 for the quarter ended September 30, 2004 compared to \$0.66 in 2003. Revenue and operating earnings both increased by 26% with the acquisition of Reeves Oilfield Services Limited ("Reeves") and the land drilling operations of GlobalSantaFe Corporation contributing significantly to the increase. This improvement was achieved despite a 13% reduction in Canadian drilling activity, which was hampered by the much reported wet weather conditions in western Canada. Although activity levels were lower than the third quarter of 2003, anticipated strong demand for services going into the winter drilling season has provided support for pricing improvements across most of our service lines in Canada.

The increased value of the Canadian dollar relative to the US Dollar had a significant negative impact in the third quarter of 2004, reducing before tax earnings by \$6.8 million. Most of the Corporation's international operations are carried on in US dollars and as a result the 6% strengthening of the Canadian dollar versus the US dollar had a two fold impact. First, the Canadian dollar equivalent of our net US dollar denominated monetary asset position declined, leading to a foreign exchange loss being recorded, and second, the Canadian dollar equivalent of US dollar denominated operating cash flow was reduced.

Stock-based compensation expense amounted to \$4.9 million (\$0.08 per share) in the quarter compared to \$1.9 million (\$0.04 per share) in the third quarter of 2003.

In September, the Corporation launched a branding campaign focused on its Technology Services segment. This important milestone in the Corporation's technology services development will see all the businesses that currently make

Edgar Filing: PRECISION DRILLING CORP - Form 6-K

up the Technology Services segment combined under one brand, "Precision Energy Services". The segment will have three product lines: Wireline Services, Drilling & Evaluation Services and Production Services.

CONTRACT DRILLING

Contract Drilling revenue increased by 26% in the third quarter compared to the same period in 2003 as a result of the acquisition of 31 internationally based rigs in May 2004 and pricing increases in the Canadian market. These positive factors were mitigated somewhat by lower activity levels in Canada as a result of wet weather conditions hindering the movement and operation of drilling rigs. Western Canada received 23% more rainfall in the third quarter of 2004 than in the third quarter of 2003 contributing to a 13% reduction in well completions.

Operating earnings as a percentage of revenue declined to 25% from 27% in 2003. Improved margins in the Canadian market were more than offset by lower margins realized internationally. Reduced spending by PEMEX, the Mexican National Oil Company, reduced our activity and profitability in that country. In addition, expenses were incurred in connection with the integration of the GlobalSantaFe land drilling business. Foreign exchange fluctuations also contributed to the reduced profitability of the Contract Drilling segment.

The Canadian drilling rig fleet achieved 9,479 operating days for a utilization rate of 46% in the quarter compared to 10,848 operating days and a 52% utilization rate in 2003. The service rig operation was less affected by the wet conditions in western Canada and saw a slight increase in operating hours from 110,447 in 2003 to 112,637 in 2004.

ENERGY SERVICES

Compared to the same period in 2003, revenues in the Energy Services segment increased 31% in the third quarter of 2004. This growth was primarily achieved in international operations. Revenue from Canadian operations remained relatively flat year over year where the impact of adverse weather conditions was offset by the addition of Reeves. The same is true for operating earnings where overall results increased \$9.0 million, despite the inclusion of a foreign exchange loss of \$3.4 million. The addition of Reeves contributed significantly to the profitability of the Energy Services segment in the quarter. The biggest geographical improvements came from operations in the United States, Latin America and Asia Pacific.

Wireline Services generated the largest increase in results from 2003 levels, with improvements coming from both the core business as well as from the addition of Reeves. Continued capital spending in 2004, to round out LWD and RST service offerings, resulted in increased depreciation charges and a slight decline in operating earnings for Drilling & Evaluation Services. Business levels for this product-line have not yet reached a sustainable threshold where the global fleet is enjoying continuous utilization of assets. The outlook for the balance of the year appears promising as we are experiencing an increase in jobs being awarded for our drilling and evaluation services. The Production Services division experienced mixed performances with some regions achieving excellent results, while others, such as Canada, struggled in adverse business environments. With renewal of a key North Sea contract and the start-up of other international projects before year end we are anticipating a stronger finish to 2004.

In spite of utilization growing pains within our drilling and evaluation business we have been encouraged by the performance of our new RST and LWD tools. Several key customer trials were successfully completed around the world in the third quarter, with both reliability and performance demonstrating top

Edgar Filing: PRECISION DRILLING CORP - Form 6-K

tier industry standards. With respect to Wireline, we have been very encouraged by the addition of Reeves to our existing business. We believe Reeves' unique technology, as well as its cost effective service solutions, will provide exciting opportunities for our formation evaluation business in mature basins.

RENTAL AND PRODUCTION

The Rental and Production segment saw a 9% increase in revenue, with the majority of the increase coming from the industrial plant maintenance business. The Canadian rental business experienced a slight decrease in rental days, however the impact on revenue was more than offset by pricing increases. Operating margins remained relatively consistent year over year in both businesses.

Certain statements contained in this press release, including statements which are related to drivers for improved earnings, customer requests for services and drilling activity and the outlook for the balance of the year for our Energy Services segment, statements which may contain words such as "anticipate", "could", "should", "expect", "believe", "will" and similar expressions and statements relating to matters that are not historical facts are forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks and uncertainties which may cause the actual results, performance or achievements of Precision to be materially different from any future results, performances or achievements expressed or implied by such forward-looking statements. Such factors include fluctuations in the market for oil and gas and related products and services; competition; political and economic conditions in countries in which Precision does business; the demand for services provided by Precision; changes in laws and regulations, including environmental, to which Precision is subject and other factors, which are described in further detail in Precision's filings with the U.S. Securities and Exchange Commission.
