UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended June 30, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission file number 001-35492

ALEXANDER & BALDWIN, INC.

(Exact name of registrant as specified in its charter)

Hawaii

(State or other jurisdiction of
incorporation or organization)

45-4849780

(I.R.S. Employer
Identification No.)

P. O. Box 3440, Honolulu, Hawaii
822 Bishop Street, Honolulu, Hawaii
(Address of principal executive offices)

96801
96813
(Zip Code)

(808) 525-6611

(Registrant's telephone number, including area code)

N/A

(Former name, former address, and former
fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Edgar Filing: Alexander & Baldwin, Inc. - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Number of shares of common stock outstanding as of June 30, 2015: 48,871,931

Alexander & Baldwin, Inc.
Notes to Condensed Consolidated Financial Statements
(Unaudited)

(1) Description of Business. A&B is headquartered in Honolulu and operates four segments: Real Estate Development and Sales; Real Estate Leasing; Agribusiness; and Materials and Construction.

Real Estate Development and Sales: The Real Estate Development and Sales segment generates its revenue through the investment in and development and sale of land and commercial and residential properties in Hawaii and through the sale of properties in the Company's Leasing portfolio.

Real Estate Leasing: The Real Estate Leasing segment owns, operates and manages retail, office and industrial properties in Hawaii and on the Mainland. The Real Estate Leasing segment also leases urban land in Hawaii to third-party lessees.

Agribusiness: The Agribusiness segment produces bulk raw sugar, specialty food grade sugars and molasses; produces and sells specialty food-grade sugars; provides general trucking services, equipment maintenance and repair services; leases agricultural land to third parties; and generates and sells electricity to the extent not used in A&B's Agribusiness operations.

Materials and Construction: The Materials and Construction segment performs asphalt paving as prime contractor and subcontractor; imports and sells liquid asphalt; mines, processes and sells basalt aggregate; produces and sells construction materials; and provides and sells various construction- and traffic-control-related products.

(2) Basis of Presentation. The condensed consolidated financial statements are unaudited. Because of the nature of the Company's operations, the results for interim periods are not necessarily indicative of results to be expected for the year. While these condensed consolidated financial statements reflect all normal recurring adjustments that are, in the opinion of management, necessary for fair presentation of the results of the interim period, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles (GAAP) for complete financial statements. Therefore, the interim condensed consolidated financial statements should be read in conjunction with the consolidated balance sheets as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2014 and the notes thereto included in the Company's Annual Report filed on Form 10-K for the year ended December 31, 2014, and other subsequent filings with the SEC.

Revisions of prior period financial statements: In the first quarter of 2014, the Company recorded an out-of-period 2013 adjustment to income taxes, which had the effect of increasing income tax expense and reducing net income and income from continuing operations by \$1.6 million, or approximately \$0.03 per diluted share. In the course of preparing the Company's financial statements for the year ended December 31, 2014, the Company identified immaterial misstatements in certain deferred tax accounts related to prior periods. In connection with the correction of these misstatements, which were reflected in the Company's 2014 Form 10-K, the Company also corrected for the 2013 out-of-period income tax adjustment by retroactively adjusting income taxes for the first quarter of 2014, which increased net income and income from continuing operations by \$1.6 million, or approximately \$0.03 per diluted share, from the results previously reported in the Company's Form 10-Q for the quarter ended March 31, 2014. The impact of the adjustments had no impact on pre-tax income or cash flows from operating, investing or financing activities.

Rounding: Amounts in the condensed consolidated financial statements and notes are rounded to the nearest tenth of a million, but per-share calculations and percentages were determined based on amounts before rounding. Accordingly, a recalculation of some per-share amounts and percentages, if based on the reported data, may be slightly different.

(3) Commitments, Guarantees and Contingencies: Commitments and financial arrangements not recorded on the Company's condensed consolidated balance sheet, excluding lease commitments that are disclosed in Note 10 of the Company's Annual Report filed on Form 10-K for the year ended December 31, 2014, included the following (in millions) as of June 30, 2015:

Standby letters of credit	\$ 12.0
Bonds related to real estate and construction*	\$ 421.5

Represents bonds related to construction and real estate activities in Hawaii, and include construction bonds issued by third party sureties (bid, performance, and payment bonds) and commercial bonds issued by third party sureties *(permit, subdivision, license, and notary bonds). In the event the bonds are drawn upon, the Company would be obligated to reimburse the surety that issued the bond. None of the bonds have been drawn upon to date, and the Company believes it is unlikely that any of these bonds will be drawn upon.

Indemnity Agreements: For certain real estate joint ventures, the Company may be obligated under bond indemnities to complete construction of the real estate development if the joint venture does not perform. These indemnities are designed to protect the surety in exchange for the issuance of surety bonds that cover joint venture construction activities, such as project amenities, roads, utilities, and other infrastructure, at its joint ventures. Under the indemnities, the Company and its joint venture partners agree to indemnify the surety bond issuer from all losses and expenses arising from the failure of the joint venture to complete the specified bonded construction. The maximum potential amount of aggregate future payments is a function of the amount covered by outstanding bonds at the time of default by the joint venture, reduced by the amount of work completed to date. The recorded amounts of the indemnity liabilities were not material individually or in the aggregate.

Other than the above items and those described in the Company's 2014 Form 10-K, obligations of the Company's non-consolidated joint ventures do not have recourse to the Company and the Company's "at-risk" amounts are limited to its investment.

Legal Proceedings and Other Contingencies: A&B owns 16,000 acres of watershed lands in East Maui that supply a significant portion of the irrigation water used by Hawaiian Commercial & Sugar Company ("HC&S"), a division of A&B that produces raw sugar. A&B also held four water licenses to another 30,000 acres owned by the State of Hawaii in East Maui which, over the last ten years, have supplied approximately 56 percent of the irrigation water used by HC&S. The last of these water license agreements expired in 1986, and all four agreements were then extended as revocable permits that were renewed annually. In 2001, a request was made to the State Board of Land and Natural Resources (the "BLNR") to replace these revocable permits with a long-term water lease. Pending the conclusion by the BLNR of this contested case hearing on the request for the long-term lease, the BLNR has kept the existing permits on a holdover basis. A third party filed a lawsuit on April 10, 2015 alleging that the BLNR has been renewing the revocable permits annually rather than keeping them in holdover status, and that the BLNR unlawfully failed to conduct an environmental assessment for the renewals. The lawsuit seeks a court order voiding the revocable permits and requiring preparation of an environmental assessment of the renewals. If the Company is not permitted to utilize sufficient quantities of stream waters from state lands in East Maui, it would have a material adverse effect on the Company's sugar-growing operations.

In addition, on May 24, 2001, petitions were filed by a third party, requesting that the Commission on Water Resource Management of the State of Hawaii ("Water Commission") establish interim instream flow standards ("IIFS") in 27 East Maui streams that feed the Company's irrigation system. On September 25, 2008, the Water Commission took action on eight of the petitions, resulting in some quantity of water being returned to the streams rather than being utilized for irrigation purposes. In May 2010, the Water Commission took action on the remaining 19 streams resulting in additional water being returned to the streams. A petition requesting a contested case hearing to challenge the Water Commission's decisions was filed with the Commission by the opposing third party. On October 18, 2010, the Water

Commission denied the petitioner's request for a contested case hearing. On November 17, 2010, the petitioner filed an appeal of the Water Commission's denial to the Hawaii Intermediate Court of Appeals. On August 31, 2011, the Hawaii Intermediate Court of Appeals dismissed the petitioner's appeal. On November 29, 2011, the petitioner appealed the Hawaii Intermediate Court of Appeals' dismissal to the Hawaii Supreme Court. On January 11, 2012, the Hawaii Supreme Court vacated the Hawaii Intermediate Court of Appeals' dismissal of the petitioner's appeal and remanded the appeal back to the Intermediate Court of Appeals. On November 30, 2012, the Intermediate Court of Appeals remanded the case back to the Water Commission, ordering the Commission to grant the petitioner's request for a contested case hearing. On July 17, 2013, the Commission authorized the appointment of a hearings officer for the contested case hearing. On August 20, 2014, the Commission expanded the scope of the contested case hearing to encompass all 27 petitions for amendment of the IIFS for East

Maui streams, including the eight petitions that the Commission previously acted upon in 2008. The evidentiary phase of the hearing before the Commission-appointed hearings officer was completed on April 2, 2015, and the final decision of the Commission is not expected until 2016.

Water loss that may result from the Water Commission's future decisions would impose challenges to the Company's sugar growing operations. Water loss would result in a combination of future suppression of sugar yields and negative financial impacts on the Company that will only be quantifiable over time. Accordingly, the Company is unable to predict, at this time, the total impact of the water proceedings.

In January 2013, the Environmental Protection Agency ("EPA") finalized nationwide standards for controlling hazardous air pollutant emissions from industrial, commercial, institutional boilers and process heaters (the "Boiler MACT" rule), which apply to Hawaiian Commercial & Sugar Company's ("HC&S") three boilers at the Puunene Sugar Mill. Compliance with the Boiler MACT rule is required by January 2016. The Company anticipates that the Puunene Mill boilers will be able to meet the new emissions limits without significant modifications and that compliance costs will be less than \$1 million, based on currently available information. The Company is currently developing strategies for achieving compliance with the new regulations, including identifying required upgrades to boiler and air pollution control instrumentation and developing the complex compliance monitoring approaches necessary to accommodate the facility's multi-fuel operations. There remains significant uncertainty as to the final requirements of the Boiler MACT rule, pending an EPA response to various petitions for reconsideration and ongoing litigation. Any resulting changes to the Boiler MACT rule could adversely impact the Company's compliance schedule or cost of compliance.

On June 24, 2014, the Hawaii State Department of Health ("DOH") Clean Air Branch issued a Notice and Finding of Violation and Order ("NFVO") to HC&S alleging various violations relating to the operation of HC&S's three boilers at its sugar mill. The DOH reviewed a five-year period (2009-2013) and alleged violations relating primarily to periods of excess visible emissions and operation of the wet scrubbers installed to control particulate matter emissions from the boiler stacks. All incidents were self-reported by HC&S to the DOH prior to the DOH's review, and there is no indication that these deviations resulted in any violation of health-based air quality standards. The NFVO includes an administrative penalty of \$1.3 million, which HC&S has contested. The Company is unable to predict, at this time, the outcome or financial impact of the NFVO, but does not believe that the financial impact of the NFVO will be material to its financial position, cash flows or results of operations.

On July 1, 2015, a lawsuit was filed against the State of Hawaii and the Director of the Department of Health, alleging that the sugar cane burning permits issued by the State to HC&S were unlawfully issued, and seeking an injunction against the burning of cane. On July 6, 2015, the plaintiffs added the Company as a defendant. If the Company is not permitted or is substantially limited in its ability to burn sugar cane, this would have a material adverse effect on the Company's sugar operations. The Company will vigorously defend itself in this matter.

A&B is a party to, or may be contingently liable in connection with, other legal actions arising in the normal conduct of its businesses, the outcomes of which, in the opinion of management after consultation with counsel, would not have a material effect on A&B's condensed consolidated financial statements as a whole.

(4) Earnings Per Share (“EPS”): The following table provides a reconciliation of income from continuing operations to income from continuing operations attributable to A&B (in millions):

	Quarter Ended		Six Months Ended	
	June 30,		June 30,	
	2015	2014	2015	2014
Income from continuing operations, net of tax	\$10.1	\$10.2	\$36.0	\$11.3
Noncontrolling interest	(0.3)	(1.0)	(0.9)	(1.4)
Income from continuing operations attributable to A&B shareholders, net of tax	\$9.8	\$9.2	\$35.1	\$9.9

The number of shares used to compute basic and diluted earnings per share is as follows (in millions):

	Quarter Ended		Six Months Ended	
	June 30,		June 30,	
	2015	2014	2015	2014
Denominator for basic EPS – weighted average shares	48.9	48.7	48.8	48.7
Effect of dilutive securities:				
Employee/director stock options and restricted stock units	0.5	0.6	0.5	0.5
Denominator for diluted EPS – weighted average shares	49.4	49.3	49.3	49.2

Basic earnings per share is computed based on the weighted-average number of common shares outstanding during the period. Diluted earnings per share is computed based on the weighted-average number of common shares outstanding adjusted by the number of additional shares, if any, that would have been outstanding had the potentially dilutive common shares been issued. Potentially dilutive shares of common stock include non-qualified stock options, time-based restricted stock units and performance share units. The vesting of performance share units is contingent upon the achievement of relative total shareholder return metrics. Prior to vesting, if all necessary conditions would have been satisfied by the end of the reporting period (as if the end of the reporting period were deemed to be the end of the performance measurement period), the dilutive effect of the performance share units, if any, is included in the computation of diluted EPS using the treasury stock method.

During the three and six month periods ended June 30, 2015 and 2014, there were no anti-dilutive securities outstanding.

Fair Value of Financial Instruments. The fair values of receivables and short-term borrowings approximate their carrying values due to the short-term nature of the instruments. The Company’s cash and cash equivalents, consisting principally of cash on deposit, may from time to time include short-term money markets funds. The fair values of these money market funds, based on market prices (level 2), approximate their carrying values due to (5) their short-maturities. The carrying amount and fair value of the Company’s long-term debt at June 30, 2015 was \$617.4 million and \$632.0 million, respectively, and \$706.0 million and \$729.6 million at December 31, 2014, respectively. The fair value of long-term debt is calculated by discounting the future cash flows of the debt at rates based on instruments with similar risk, terms and maturities as compared to the Company’s existing debt arrangements (level 2).

Inventories. Sugar inventories are stated at the lower of cost (first-in, first-out basis) or market value. Materials (6) and supplies and Materials and Construction segment inventory are stated at the lower of cost (principally average cost, first-in, first-out basis) or market value.

Inventories at June 30, 2015 and December 31, 2014 were as follows (in millions):

	June 30, 2015	December 31, 2014
Sugar inventories	\$17.2	\$23.3
Work in process - sugar	17.2	—
Asphalt	14.3	21.3
Processed rock, portland cement, and sand	13.3	15.7
Work in process	3.2	2.8
Retail merchandise	1.6	1.5
Parts, materials and supplies inventories	13.0	17.3
Total	\$79.8	\$81.9

Share-Based Compensation. Under the 2012 Plan, which provides for grants of equity-based incentive compensation, 4.3 million shares of common stock were initially reserved for issuance and, as of June 30, 2015, 1,277,179 shares of the Company's common stock remained available for future issuance, which is reflective of a (7)2.7 million share reduction for outstanding equity awards replaced in the separation transaction from Matson, Inc. in 2012. The shares of common stock authorized to be issued under the 2012 Plan may be drawn from the shares of the Company's authorized but unissued common stock or from shares of its common stock that the Company acquires, including shares purchased on the open market or in private transactions.

The Company does not currently grant stock options under its share-based equity program. The last grant of options occurred in January 2012. Activity in the Company's stock option plans in 2015 was as follows (in thousands, except weighted average exercise price and weighted average contractual life):

	2012 Plan	Weighted Average Exercise Price	Weighted Average Contractual Life	Aggregate Intrinsic Value
Outstanding, January 1, 2015	1,124.6	\$18.84		
Exercised	(25.9) \$20.13		
Outstanding, June 30, 2015	1,098.7	\$18.81	4.1	\$22,635
Exercisable, June 30, 2015	1,098.7	\$18.81	4.1	\$22,635

The following table summarizes non-vested restricted stock unit activity through June 30, 2015 (in thousands, except weighted average grant-date fair value amounts):

	2012 Plan Restricted Stock Units	Weighted Average Grant-Date Fair Value
Outstanding, January 1, 2015	279.0	\$33.76
Granted	124.7	\$40.85
Vested	(103.1) \$31.78
Canceled	(25.4) \$35.15
Outstanding, June 30, 2015	275.2	\$37.59

A portion of the restricted stock unit awards are time-based awards that vest ratably over three years. The remaining portion of the awards represents market-based awards that cliff vest after two or three years, provided that the total shareholder return of the Company's common stock over the relevant measurement period meets or exceeds pre-defined levels of relative total shareholder returns of the Standard & Poor's MidCap 400 index and the Russell 2000 index.

The fair value of the Company's time-based awards is determined using the Company's stock price on the date of grant. The fair value of the Company's market-based awards is estimated using the Company's stock price on the date of grant and the probability of vesting using a Monte Carlo simulation with the following weighted average assumptions:

	2015 Grants	2014 Grants
Volatility of A&B common stock	29.5%	25.4%
Average volatility of peer companies	34.2%	27.3%
Risk-free interest rate	0.7%	0.4%

A summary of compensation cost related to share-based payments is as follows (in millions):

	Quarter Ended		Six Months Ended	
	June 30,		June 30,	
	2015	2014	2015	2014
Share-based expense (net of estimated forfeitures):				
Stock options	\$—	\$0.1	\$—	\$0.3
Restricted stock units	1.1	1.1	2.3	2.1
Total share-based expense	1.1	1.2	2.3	2.4
Total recognized tax benefit	(0.3) (0.3) (0.6) (0.7
Share-based expense (net of tax)	\$0.8	\$0.9	\$1.7	\$1.7

(8) Discontinued Operations. In the first half of 2015, there were no sales that were classified as discontinued operations. In the first half of 2014, the Company sold a retail property on Maui whose revenue and expenses were classified as discontinued operations because the sale met the conditions for classification as discontinued operations for 2014.

The revenue, operating profit, income tax expense and after-tax effects of sales treated as discontinued operations were as follows (in millions):

	Quarter Ended		Six Months Ended	
	June 30,		June 30,	
	2015	2014	2015	2014
Proceeds from the sale of income-producing properties	\$—	\$—	\$—	\$70.1
Real estate leasing revenue	—	—	—	0.3
Total	\$—	\$—	\$—	\$70.4
Gain on sale of income-producing properties	\$—	\$—	\$—	\$55.9
Real estate leasing operating profit	—	—	—	0.3
Total operating profit before taxes	—	—	—	56.2
Income tax expense	—	—	—	21.9
Income from discontinued operations	\$—	\$—	\$—	\$34.3

(9) Pension and Post-retirement Plans. The Company has defined benefit pension plans that cover substantially all non-bargaining unit and certain bargaining unit employees. The Company also has unfunded non-qualified plans that provide benefits in excess of the amounts permitted to be paid under the provisions of the tax law to participants in qualified plans. In 2007, the Company changed the traditional defined benefit pension plan formula for new non-bargaining unit employees hired after January 1, 2008 and replaced it with a cash balance defined benefit pension plan formula. Subsequently, effective January 1, 2012, the Company froze the benefits under its traditional defined benefit plans for non-bargaining unit employees hired before January 1, 2008 and replaced the benefit with the same cash balance defined benefit pension plan formula provided to those employees hired after January 1, 2008. Retirement benefits under the cash balance pension plan formula are based on a fixed percentage

of employee eligible

11

compensation, plus interest. The plan interest credit rate will vary from year-to-year based on the ten-year U.S. Treasury rate.

The assumptions related to discount rates, expected long-term rates of return on invested plan assets, salary increases, age, mortality and health care cost trend rates, along with other factors, are used in determining the assets, liabilities and expenses associated with pension benefits. Management reviews the assumptions annually with its independent actuaries, taking into consideration existing and future economic conditions and the Company's intentions with respect to these plans. Management believes that its assumptions and estimates are reasonable. Different assumptions, however, could result in material changes to the assets, obligations and costs associated with benefit plans.

The components of net periodic benefit cost recorded for the three months ended June 30, 2015 and 2014 were as follows (in millions):

	Pension Benefits		Post-retirement Benefits	
	2015	2014	2015	2014
Service cost	\$0.7	\$0.5	\$0.1	\$—
Interest cost	1.7	2.2	—	0.1
Expected return on plan assets	(2.8)	(2.6)	—	—
Amortization of prior service credit	(0.2)	(0.2)	—	—
Amortization of net loss	2.5	0.1	—	—
Net periodic benefit cost	\$1.9	\$—	\$0.1	\$0.1

The components of net periodic benefit cost recorded for the six months ended June 30, 2015 and 2014 were as follows (in millions):

	Pension Benefits		Post-retirement Benefits	
	2015	2014	2015	2014
Service cost	\$1.5	\$1.2	\$0.1	\$0.1
Interest cost	4.0	4.1	0.2	0.2
Expected return on plan assets	(5.5)	(5.3)	—	—
Amortization of prior service credit	(0.4)	(0.4)	—	—
Amortization of net loss	3.5	2.0	0.1	0.1
Net periodic benefit cost	\$3.1	\$1.6	\$0.4	\$0.4

(10) New Accounting Pronouncements.

In April 2015, the FASB issued Accounting Standards Update No. 2015-03, Interest—Imputation of Interest (Subtopic 835-30), Simplifying the Presentation of Debt Issuance Costs, ("ASU 2015-03"). ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The amendments in ASU 2015-03 are effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. The Company is currently assessing the impact that adopting this new accounting guidance will have on its consolidated financial statements.

(11) Accumulated Other Comprehensive Income. The changes in accumulated other comprehensive income by component for the six months ended June 30, 2015 were as follows (in millions, net of tax):

	Pension and Postretirement Plans Six Months Ended June 30, 2015	
Beginning balance	\$44.4	
Amounts reclassified from accumulated other comprehensive income, net of tax	(1.3)
Ending balance	\$43.1	

The reclassifications of other comprehensive income components out of accumulated other comprehensive income for the three and six months ended June 30, 2015 and 2014 were as follows (in millions):

Details about Accumulated Other Comprehensive Income Components	Quarter Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Actuarial gain (loss)*	\$(0.8) \$1.2	\$(0.8) \$1.2
Amortization of defined benefit pension items reclassified to net periodic pension cost:				
Net loss*	\$2.5	0.3	\$3.6	2.2
Prior service credit*	(0.3) (0.3) (0.6) (0.6
Total before income tax	1.4	1.2	2.2	2.8
Income taxes	(0.6) (0.4) (0.9) (1.1
Other comprehensive income net of tax	\$0.8	\$0.8	\$1.3	\$1.7

* These accumulated other comprehensive income components are included in the computation of net periodic pension cost (see Note 9 for additional details).

Income Taxes. The Company makes certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments are applied in the calculation of tax credits, tax benefits and deductions, and in the calculation of certain deferred tax assets and liabilities, which arise from differences in the timing of recognition of revenue and expense for tax and financial statement purposes. Deferred (12) tax assets and deferred tax liabilities are adjusted to the extent necessary to reflect tax rates expected to be in effect when the temporary differences reverse. Adjustments may be required to deferred tax assets and deferred tax liabilities due to changes in tax laws and audit adjustments by tax authorities. To the extent adjustments are required in any given period, the adjustments would be included within the tax provision in the condensed consolidated statements of income or balance sheet.

On September 13, 2013, the U.S. Treasury Department released final income tax regulations on the deduction and capitalization of expenditures related to tangible property. These final regulations apply to tax years beginning on or after January 1, 2014. Application of these provisions will require the Company to file a tax accounting method change with the IRS and record a cumulative adjustment with its 2014 tax return.

The Company is subject to taxation by the United States and various state and local jurisdictions. As of June 30, 2015, the Company's tax years 2012 (short-year return) and 2013, which were prepared on a standalone basis excluding Matson, are open to examination by the federal and state tax authorities. For tax years in which the Company was included in the consolidated tax group together with Matson, the 2011 and 2012 tax years remain open to examination by the federal and state tax authorities, and in addition the 2010 tax year remains open to examination by California. The Company's 2012 short-year tax return is currently under examination by the IRS.

Investment in Affiliates. At June 30, 2015, investments in affiliates consisted principally of equity investments in (13) limited liability companies. The Company has the ability to exercise significant influence over the operating and financial policies of these investments and, accordingly, accounts for its investments using the equity method of

13

accounting. The Company's operating results include its share of net earnings from its equity method investments. For the six months ended June 30, 2015, the financial results reported by a significant joint venture were \$243.0 million for operating revenue and \$32.3 million for operating income, income from continuing operations, and net income.

Derivative Instruments. The Company is exposed to interest rate risk related to its floating rate debt. The (14)Company balances its cost of debt and exposure to interest rates primarily through its mix of fixed and floating rate debt. From time to time, the Company may use interest rate swaps to manage its exposure to interest rate risk. The Company measures its interest rate swaps at fair value. The fair values of the Company's interest rate swaps (Level 2) are determined based on discounted cash flow analysis, reflecting the terms of the contracts, and utilize observable inputs such as interest rates and yield curves.

As of June 30, 2015, the Company had a gross notional amount of \$19.5 million related to interest rate swaps that were assumed in connection with 2013 acquisitions, in which the floating rates were swapped for fixed rates. The table below presents the fair value of derivative financial instruments, which are included in Other non-current liabilities in the condensed consolidated balance sheets (in millions):

	As of June 30, 2015	As of December 31, 2014
Interest rate swap liability - floating to fixed rate	\$2.6	\$2.9

The amount of expense the Company recorded in Interest income and other in the condensed consolidated statements of income for the change in the fair values of the interest rate swaps was not material in 2014 or 2015.

(15) Segment Results. Segment results for the three and six months ended June 30, 2015 and 2014 were as follows (in millions):

	Quarter Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014

Represents the deduction of revenue from the sales of a Colorado retail property in March 2015 and a Texas office building in June 2015 that are classified as "Gain on the sale of improved property" in the Condensed Consolidated Statements of Income, but reflected as revenue for segment reporting purposes.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following analysis of the condensed consolidated financial condition and results of operations of Alexander & Baldwin, Inc. and its subsidiaries (collectively, the "Company") should be read in conjunction with the condensed consolidated financial statements and related notes thereto included in Item 1 of this Form 10-Q and the Company's Annual Report on Form 10-K for the year ended December 31, 2014 filed with the U.S. Securities and Exchange Commission.

FORWARD-LOOKING STATEMENTS

Alexander & Baldwin, Inc. ("A&B" or the "Company"), from time to time, may make or may have made certain forward-looking statements, whether orally or in writing, such as forecasts and projections of the Company's future performance or statements of management's plans and objectives. These statements are "forward-looking" statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may be contained in, among other things, Securities and Exchange Commission ("SEC") filings, such as the Forms 10-K, 10-Q and 8-K, the Annual Report to Shareholders, press releases made by the Company, the Company's Internet Web sites (including Web sites of its subsidiaries), and oral statements made by the officers of the Company. Except for historical information contained in these written or oral communications, such communications contain forward-looking statements. New risk factors emerge from time to time and it is not possible for the Company to predict all such risk factors, nor can it assess the impact of all such risk factors on the Company's business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Accordingly, forward-looking statements cannot be relied upon as a guarantee of future results and involve a number of risks and uncertainties that could cause actual results to differ materially from those projected in the statements, including, but not limited to the factors that are described in "Risk Factors" of the Company's 2014 Annual Report on Form 10-K and other filings with the SEC. The Company is not required, and undertakes no obligation, to revise or update forward-looking statements or any factors that may affect actual results, whether as a result of new information, future events, or circumstances occurring after the date of this report.

INTRODUCTION

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is a supplement to the accompanying condensed consolidated financial statements and provides additional information about A&B's business, recent developments, financial condition, liquidity and capital resources, cash flows, results of operations and how certain accounting principles, policies and estimates affect A&B's financial statements. MD&A is organized as follows:

- **Business Overview:** This section provides a general description of A&B's business, as well as recent developments that the Company believes are important in understanding its results of operations and financial condition or in understanding anticipated future trends.
- **Consolidated Results of Operations:** This section provides an analysis of A&B's consolidated results of operations for the three and six months ended June 30, 2015 and 2014.
- **Analysis of Operating Revenue and Profit by Segment:** This section provides an analysis of A&B's results of operations by business segment.
- **Liquidity and Capital Resources:** This section provides a discussion of A&B's financial condition and an analysis of A&B's cash flows for the six months ended June 30, 2015 and 2014, as well as a discussion of A&B's ability to fund its future commitments and ongoing operating activities through internal and external sources of capital.
- **Outlook:** This section provides a discussion of management's general outlook about the Hawaii economy and the Company's markets.

Other Matters: This section provides a summary of other matters, such as officer and management changes.

BUSINESS OVERVIEW

Alexander & Baldwin, whose history in Hawaii dates back to 1870, is a corporation headquartered in Honolulu that conducts business in four operating segments—Real Estate Development and Sales; Real Estate Leasing; Agribusiness; and Materials and Construction.

Real Estate Development and Sales: The Real Estate Development and Sales segment generates its revenue through the investment in and development and sale of land and commercial and residential properties in Hawaii and through the sale of properties in the Company's Leasing portfolio.

Real Estate Leasing: The Real Estate Leasing segment owns, operates and manages retail, office and industrial properties in Hawaii and on the Mainland. The Real Estate Leasing segment also leases urban land in Hawaii to third-party lessees.

Agribusiness: The Agribusiness segment produces bulk raw sugar, specialty food grade sugars and molasses; produces and sells specialty food-grade sugars; provides general trucking services, equipment maintenance and repair services; leases agricultural land to third parties; and generates and sells electricity to the extent not used in A&B's Agribusiness operations.

Materials and Construction: The Materials and Construction segment performs asphalt paving as prime contractor and subcontractor; imports and sells liquid asphalt; mines, processes and sells basalt aggregate; produces and sells construction materials; and provides and sells various construction- and traffic-control-related products.

CONSOLIDATED RESULTS OF OPERATIONS

Consolidated – Second quarter of 2015 compared with 2014

(dollars in millions)	Quarter Ended June 30,			
	2015	2014	Change	
Operating revenue	\$ 153.7	\$ 146.7	4.8	%
Operating costs and expenses	132.4	123.9	6.9	%
Operating income	21.3	22.8	(6.6))%
Other expense	(4.2) (6.1) (31.1)%
Income from continuing operations before income taxes	17.1	16.7	2.4	%
Income tax expense	7.0	6.5	7.7	%
Net income	10.1	10.2	(1.0))%
Income attributable to noncontrolling interest	(0.3) (1.0) (70.0)%
Net income attributable to A&B	\$9.8	\$9.2	6.5	%
Basic earnings per share attributable to A&B	\$0.20	\$0.19	5.3	%
Diluted earnings per share attributable to A&B	\$0.20	\$0.19	5.3	%

Consolidated operating revenue for the second quarter of 2015 increased \$7.0 million, or 4.8 percent, compared to the second quarter of 2014. This increase was principally due to \$14.3 million in higher Development and Sales revenue, \$3.8 million in higher Real Estate Leasing revenue, partially offset by \$7.1 million in lower revenue from Materials and Construction, and \$4.0 million in lower Agribusiness revenue. The reasons for the revenue changes are described below, by business segment, in the Analysis of Operating Revenue and Profit by Segment.

Consolidated operating costs and expenses for the second quarter of 2015 increased \$8.5 million, or 6.9 percent, compared to the second quarter of 2014, due principally to \$8.1 million in higher Real Estate Development and Sales cost, \$1.3 million in higher Agribusiness costs, and \$1.8 million in higher selling, general and administrative costs, principally related to higher professional service fees, partially offset by \$4.2 million in lower Materials and Construction cost. The reasons for the operating cost and expense changes are described below, by business segment, in the Analysis of Operating Revenue and Profit by Segment.

Other income and (expense) was \$(4.2) million in the second quarter of 2015 compared to \$(6.1) million in the second quarter of 2014. The change in other income and (expense) was primarily due to a \$3.4 million increase in earnings from joint ventures.

Income taxes and the effective tax rate on income from continuing operations for the second quarter of 2015 was higher compared to the second quarter of 2014 due to higher income from continuing operations in 2015 and a greater impact of non-deductible expenses on lower 2014 income from continuing operations.

Consolidated – First half of 2015 compared with 2014

(dollars in millions)	Six Months Ended June 30,				
	2015	2014	Change		
Operating revenue	\$304.4	\$241.6	26.0	%	
Operating costs and expenses	258.7	208.7	24.0	%	
Operating income	45.7	32.9	38.9	%	
Other income and (expense)	12.9	(14.3)	NM	
Income from continuing operations before income taxes	58.6	18.6	3X		
Income tax expense	22.6	7.3	3X		
Discontinued operations (net of income taxes)	—	34.3	(100.0)%	
Net income	36.0	45.6	(21.1)%	
Income attributable to noncontrolling interest	(0.9)	(1.4) (35.7)%
Net income attributable to A&B	\$35.1	\$44.2	(20.6)%	
Basic earnings per share attributable to A&B	\$0.72	0.91	(20.9)%	
Diluted earnings per share attributable to A&B	\$0.71	0.90	(21.1)%	

Consolidated operating revenue for the first half of 2015 increased \$62.8 million, or 26.0 percent, compared to the first half of 2014. This increase was principally due to Real Estate Development and Sales revenue, which increased \$45.6 million. Agribusiness revenue increased \$12.0 million and Real Estate Leasing revenue increased \$5.6 million. The reasons for the revenue change are described below, by business segment, in the Analysis of Operating Revenue and Profit by Segment.

Consolidated operating costs and expenses for the first half of 2015 increased \$50.0 million, or 24.0 percent, compared to the first half of 2014, due principally to \$29.6 million in higher Real Estate Development and Sales costs, \$18.3 million in higher Agribusiness costs, and \$3.0 million in higher selling, general and administrative costs, principally attributable to higher professional service fees. The reasons for the operating cost and expense changes are described below, by business segment, in the Analysis of Operating Revenue and Profit by Segment.

Other income (expense) was \$12.9 million in the first half of 2015, compared to \$(14.3) million in the first half of 2014. The change in other income and (expense) was principally due to higher joint venture earnings related to condominium unit sales at Waihonua.

Income taxes in the first half of 2015 were higher than the first half of 2014 due to higher income from continuing operations. The effective tax rate for the first half of 2015 was lower than 2014 due to a reduction in the amount of non-deductible expenses.

ANALYSIS OF OPERATING REVENUE AND PROFIT BY SEGMENT

REAL ESTATE INDUSTRY

Real Estate Development and Sales and Real Estate Leasing revenue and operating profit are analyzed before subtracting amounts related to discontinued operations. This is consistent with how A&B generates earnings and how A&B's management evaluates performance and makes decisions regarding capital allocation for A&B's real estate businesses. A discussion of discontinued operations for the real estate business is included separately.

Effect of Property Sales Mix on Operating Results: Direct year-over-year comparison of the real estate development and sales results may not provide a consistent, measurable indicator of future performance because results from period to period are significantly affected by the mix and timing of property sales. Operating results, by virtue of each project's asset class, geography and timing are inherently variable. Earnings from joint venture investments are not included in segment revenue, but are included in operating profit. The mix of real estate sales in any year or quarter can be diverse and can include developed residential real estate, commercial properties, developable subdivision lots, undeveloped land, and property sold under threat of condemnation. The sale of undeveloped land and vacant parcels in Hawaii generally provides higher margins than does the sale of developed and commercial property, due to the low historical-cost basis of A&B's Hawaii land. Consequently, real estate sales revenue trends, cash flows from the sales of real estate, and the amount of real estate held for sale on the balance sheets do not necessarily indicate future profitability trends for this segment. Additionally, the operating profit reported in each quarter does not necessarily follow a percentage of sales trend because the cost basis of property sold can differ significantly between transactions.

Real Estate Leasing – Second quarter of 2015 compared with 2014

(dollars in millions)	Quarter Ended June 30,		Change	
	2015	2014		
Real estate leasing segment revenue	\$34.8	\$31.0	12.3	%
Real estate leasing segment operating costs and expenses	(20.8) (19.0) 9.5	%
Selling, general and administrative	(0.4) (0.1) 4X	
Other income	0.3	0.1	3X	
Real estate leasing operating profit	\$13.9	\$12.0	15.8	%
Operating profit margin	39.9	% 38.7	%	
Net Operating Income*	21.4	19.6	9.2	%
Leasable Space (million sq. ft.) at period end				
Hawaii - improved	2.7	2.4		
Mainland - improved	2.3	2.5		
Total improved	5.0	4.9		
Hawaii urban ground leases (acres)	106	116		

* Refer to page 21 for a discussion of management's use of a non-GAAP financial measure and the required reconciliation of non-GAAP measures to GAAP measures.

Real Estate Leasing revenue for the second quarter of 2015 was 12.3 percent higher than 2014, primarily due to increases in Hawaii same-store rents and the timing of sales and acquisitions. "Same-store" refers to properties that were owned throughout the entire duration of both periods under comparison, including stabilized properties. Stabilized properties refer to commercial properties developed by the Company that have achieved 80 percent economic occupancy in each of the periods presented for comparison.

Operating profit and net operating income ("NOI") for the second quarter of 2015 were 15.8 percent and 9.2 percent higher, respectively, than 2014 due to the same factors cited for the revenue increase. Tenant improvement costs and

leasing commissions were \$3.5 million and \$1.5 million for the three months ended June 30, 2015 and 2014, respectively.

The Company's commercial portfolio's weighted average occupancy summarized by geographic location and property type for the quarter ended June 30, 2015 was as follows:

Weighted average occupancy - percent	Hawaii	Mainland	Total
Retail	94%	94%	94%
Industrial	94%	99%	97%
Office	83%	92%	91%
Total	93%	95%	94%

Improved leasable space increased in the second quarter of 2015, compared with the second quarter of 2014. The table below identifies sales and acquisitions between April 1, 2014 and June 30, 2015:

Dispositions			Acquisitions		
Date	Property	Leasable sq. ft	Date	Property	Leasable sq. ft
3-15	Wilshire Shopping Center	46,500	12-14	Kaka'ako Commerce Center	204,400
5-15	San Pedro Plaza	171,900	5-15	Aikahi Shopping Center*	98,000
Total Dispositions		218,400	Total Improved Acquisitions		302,400

*Leasehold improvements acquired (fee interest was acquired in 2013).

Same-store occupancy in the second quarter of 2015 of 95%, was unchanged compared to 2014.

Real Estate Leasing – First half of 2015 compared with 2014

(dollars in millions)	Six Months Ended June 30,		
	2015	2014	Change
Real estate leasing segment revenue	\$67.5	\$62.2	8.5 %
Real estate leasing segment operating costs and expenses	(40.1)	(38.0)	5.5 %
Selling, general and administrative	(0.9)	(0.6)	50.0 %
Other income	0.6	0.2	3X
Real estate leasing operating profit	\$27.1	\$23.8	13.9 %
Operating profit margin	40.1 %	38.3 %	%
Net Operating Income*	42.3	39.2	7.9 %

* Refer to page 21 for a discussion of management's use of a non-GAAP financial measure and the required reconciliation of non-GAAP measures to GAAP measures.

Real Estate Leasing segment revenue for the first half of 2015, before subtracting amounts presented as discontinued operations, was 8.5 percent higher than 2014, primarily due to higher Hawaii same-store rents and the timing of sales and acquisitions activity.

Operating profit and NOI were 13.9 percent and 7.9 percent higher, respectively, for the first half of 2015, as compared to same period last year, for the reasons previously cited for the revenue increase. The increase in operating profit also was partially offset by higher depreciation and amortization expenses resulting from a step-up in asset bases for acquisitions made pursuant to IRS code section 1031. Tenant improvement costs and leasing commissions were \$5.4 million and \$2.5 million for the first half of 2015 and 2014, respectively.

The Company's commercial portfolio's weighted average occupancy summarized by geographic location and property type for the six months ended June 30, 2015 was as follows:

Weighted average occupancy - percent	Hawaii	Mainland	Total
Retail	94%	93%	94%
Industrial	95%	99%	97%
Office	83%	91%	89%
Total	93%	95%	94%

Same store occupancy for the six months ended June 30, 2015 of 95% was unchanged from 2014.

Use of Non-GAAP Financial Measures

The Company presents NOI, which is a non-GAAP measure derived from Real Estate Leasing segment revenue (determined in accordance with GAAP, less straight-line rental adjustments) minus property operating expenses (determined in accordance with GAAP). NOI does not have any standardized meaning prescribed by GAAP, and therefore, may differ from definitions of NOI used by other companies. The Company provides this information to investors as an additional means of evaluating ongoing core operations. NOI should not be considered as an alternative to net income (determined in accordance with GAAP) as an indicator of the Company's financial performance, or as an alternative to cash flow from operating activities as a measure of the Company's liquidity. NOI is commonly used as a measure of operating performance because it is an indicator of the return on property investment, and provides a method of comparing property performance over time. NOI excludes general and administrative expenses, straight-line rental adjustments, interest income, interest expense, depreciation and amortization, and gains on sales of interests in real estate. The Company believes that the Real Estate Leasing segment's operating profit after discontinued operations is the most directly comparable GAAP measurement to NOI. A reconciliation of Real Estate Leasing segment operating profit to Real Estate Leasing segment NOI is as follows:

Reconciliation of Real Estate Leasing Operating Profit to NOI

(In Millions, Unaudited)	Quarter Ended June		Six Months Ended	
	30, 2015	2014	June 30, 2015	2014

Real Estate Development and Sales operating profit margin	64.6	% 9.8		%	

Second quarter 2015: Real Estate Development and Sales revenue and operating profit were \$52.4 million and \$14.3 million, respectively. Sales included three residential properties on Oahu, a 171,900 square foot office property in Texas, 2.4 acres at Maui Business Park Phase II, and four Maui parcels. Proceeds from the sale of the office property were used to complete the funding of the December 2014 purchase of the 204,400-square-foot Kaka'ako Commerce Center. Operating profit also included the following joint venture unit sales: six units on Kauai and two units on Hawaii Island, partially offset by joint venture expenses.

First half 2015: Real Estate Development and Sales revenue and operating profit, were \$88.9 million and \$46.3 million, respectively. Sales included five residential properties on Oahu, a 171,900 square-foot office property in Texas, 6.4 acres at Maui Business Park Phase II, five Maui parcels, a vacant 22-acre parcel in Santa Barbara, California, and a 46,500 square-foot retail property in Colorado. Operating profit also included all remaining units at the 340-unit Waihonua condominium on Oahu (12 units closed in December 2014), nine units on Kauai, four units on Hawaii Island, and one unit on Maui, partially offset by joint venture expenses.

Second quarter 2014: Real Estate Development and Sales revenue and operating profit were \$21.4 million and \$7.8 million, respectively, and were principally related to the sales of three residential lots on Oahu, five non-core land parcels on Maui, and one residential lot on Maui. Operating profit also included the sales of joint venture resort residential units, including four on Hawaii Island and six on Kauai, partially offset by joint venture expenses.

First half 2014: Real Estate Development and Sales revenue and operating profit were \$92.4 million and \$60.1 million, respectively, and included the lot and parcel sales in the second quarter described above, sale of the 185,700 square-foot Maui Mall and recognition of \$6.0 million in deferred revenue associated with the sale of three Mainland retail properties in the fourth quarter of 2013. Operating profit also included the sale of 15 joint venture resort residential units, including eight units on Kauai, one unit on Maui, and six units on Hawaii Island, partially offset by joint venture expenses.

Real Estate Discontinued Operations – 2015 compared with 2014

Income from discontinued operations consisted of the following (in millions):

	Quarter Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Proceeds from the sale of income-producing properties	\$—	\$—	\$—	\$70.1
Real Estate Leasing revenue	—	—	—	0.3
Total	—	—	—	70.4
Gain on sale of income-producing properties	—	—	—	55.9
Real Estate Leasing operating profit	—	—	—	0.3
Total operating profit before taxes	—	—	—	56.2
Income tax expense	—	—	—	21.9
Income from discontinued operations	\$—	\$—	\$—	\$34.3

2015: There were no sales in 2015 that were classified as discontinued operations pursuant to Accounting Standards Update 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity ("ASU 2014-08").

2014: The revenue and expenses related to the sale and operations of Maui Mall, a retail property on Maui, have been classified as discontinued operations.

The results of operations from these properties in prior periods were reclassified from continuing operations to discontinued operations to conform to the current period's accounting presentation. Proceeds from the sales of property treated as discontinued operations are deposited in escrow accounts for tax-deferred reinvestment in accordance with Section 1031 of the Internal Revenue Code if the replacement property is purchased after the sale, or alternatively, proceeds are received by the Company if the replacement property is purchased before the sale.

MATERIALS AND CONSTRUCTION

Materials and Construction - Second quarter of 2015 compared with 2014

(dollars in millions)	Quarter Ended June 30,		Change	
	2015	2014		
Revenue	\$57.4	\$64.5	(11.0))%
Operating profit	\$7.0	\$8.0	(12.5))%
Operating profit margin	12.2	% 12.4	%	
Depreciation and amortization	\$3.0	\$4.4	(31.8))%
Aggregate used and sold (tons in thousands)	234.4	167.5	39.9	%
Asphaltic concrete placed (tons in thousands)	115.5	149.4	(22.7))%
Backlog ¹ at period end	\$251.4	\$249.2	0.9	%

Backlog represents the amount of revenue that Grace (and consolidated subsidiaries) and Maui Paving, LLC, a 50-percent-owned non-consolidated affiliate, expect to realize on contracts awarded, primarily related to asphalt paving and, to a lesser extent, Grace's consolidated revenue from its construction- and traffic-control-related products. Backlog includes estimated revenue from the remaining portion of contracts not yet completed, as well as revenue from approved change orders. The length of time that projects remain in backlog can span from a few days for a small volume of work to 36 months for large paving contracts and contracts performed in phases. Maui Paving's backlog at June 30, 2015 and 2014 were \$25.0 million and \$43.7 million, respectively.

Materials and Construction revenue for the second quarter of 2015 decreased \$7.1 million, or 11.0%, compared to the second quarter of 2014 and was primarily attributable to a reduction in the price of asphalt sold due to the decline in oil prices, as well as lower paving activity due to the timing of projects, partially offset by higher aggregate sales. Revenue reflected approximately 234.4 tons of aggregate used and sold and 115.5 tons of asphaltic concrete placed. Backlog at the end of June 30, 2015 was \$251.4 million, compared to \$219.4 million as of December 31, 2014. Backlog increased from year-end due primarily to the timing of government bid award activity. Materials and Construction revenue was \$64.5 million for the second quarter of 2014 and reflects 167.5 tons of aggregate used and sold and 149.4 tons of asphaltic concrete placed.

Operating profit was \$7.0 million for the second quarter of 2015, compared to \$8.0 million for the second quarter of 2014. The decrease in operating profit was principally related to lower asphalt pricing and paving activity described above.

Materials and Construction - First half of 2015 compared with 2014

(dollars in millions)	Six Months Ended June 30,		Change	
	2015	2014		
Revenue	\$114.3	\$114.7	(0.3))%
Operating profit	\$14.2	\$11.4	24.6	%
Operating profit margin	12.4	% 9.9	%	
Depreciation and amortization	\$5.8	\$8.6	(32.6))%
Aggregate used and sold (tons in thousands)	469.5	312.9	50.0	%
Asphaltic concrete placed (tons in thousands)	231.9	258.3	(10.2))%

Materials and Construction revenue was \$114.3 million for the first half of 2015, slightly lower than the first half of 2014. Revenue reflected approximately 469.5 tons of aggregate used and sold and 231.9 tons of asphaltic concrete placed. Materials and Construction revenue was \$114.7 million for the first half of 2014 and reflects 312.9 tons of aggregate used and sold and 258.3 tons of asphaltic concrete placed.

Operating profit was \$14.2 million for the first half of 2015, compared to \$11.4 million for the first half of 2014. The increase in operating profit related principally to increased paving efficiencies and increased aggregate and other construction-related material sales.

AGRIBUSINESS

The quarterly results of the Agribusiness segment are subject to fluctuations from a number of factors, including the timing of sugar deliveries, which typically commence after the first quarter of each year. Additionally, each delivery is generally priced independently, which could result in significant variations in margins between deliveries. Accordingly, quarterly results are not indicative of the results that may be achieved for a full year.

Agribusiness – Second quarter of 2015 compared with 2014

(dollars in millions)	Quarter Ended June 30,		Change	
	2015	2014		
Revenue	\$25.8	\$29.8	(13.4)%
Operating profit (loss)	\$(4.7) \$0.4	NM	
Operating profit margin	NM	1.3	%	
Tons sugar produced	53,000	46,900	13.0	%
Tons sugar sold (raw and specialty sugar)	30,900	38,800	(20.4)%

Agribusiness revenue for the second quarter of 2015 decreased \$4.0 million, or 13.4 percent, compared to the second quarter of 2014. The decrease was primarily due to \$2.7 million lower power revenue in the second quarter of 2015, as compared to the second quarter of 2014, resulting principally from a contractual reduction in power supplied by HC&S to Maui Electric Company (MECO) during peak hours, and a reduction in pricing for power sold to MECO. Combined raw and specialty sugar revenues were also \$0.9 million lower due to lower volume sold, primarily due to a reduction in per voyage load capacity of the Company's sugar vessel. The Company's sugar vessel was retrofitted during the off-season to carry molasses in addition to raw sugar, which lowers the per voyage tonnage capacity of raw sugar transported by 25 percent per voyage, but also reduces molasses transportation costs. The total number of sugar voyages is expected to increase from the previous four to five annual voyages to six to seven annual combined sugar and molasses voyages, which will affect future timing of the recognition of raw sugar revenue compared to previous quarters.

Operating profit for the second quarter of 2015 decreased \$5.1 million compared to the second quarter of 2014. The decrease was principally due to the second quarter 2014 sale of land previously used in the Kauai trucking operations and lower power margin, primarily due to lower volume and prices on Maui, partially offset by lower vessel costs.

Tons of sugar produced for the second quarter of 2015 was 13 percent higher than the second quarter of 2014 due to an increase in the number of acres harvested. However, yields (tons of sugar per acre) continue to be negatively impacted by poor weather conditions, resulting in sugar production levels that are substantially behind schedule. Sugar volume sold in the second quarter of 2015 was lower than last year, due to the molasses tank retrofit described above.

Agribusiness – First half of 2015 compared with 2014

(dollars in millions)	Six Months Ended June 30,		Change	
	2015	2014		
Revenue	\$54.7	\$42.7	28.1	%
Operating profit (loss)	\$(2.8) \$3.5	NM	
Operating profit margin	NM	8.2	%	
Tons sugar produced	56,200	48,300	16.4	%
Tons sugar sold (raw and specialty sugar)	68,000	41,200	65.0	%

Agribusiness revenue for the first half of 2015 increased \$12.0 million, or 28.1 percent, compared with the first half of 2014. The increase was due to an additional raw sugar voyage in 2015 as compared to 2014, and higher sugar prices, partially offset by lower power revenue.

Operating profit for the first half of 2015 decreased \$6.3 million compared to the first half of 2014. The decrease was primarily due to lower power margins, resulting from lower power sold at lower prices, and the 2014 land sale described previously.

Year-to-date tons of sugar produced was 16.4 percent higher in 2015 than in 2014, due to an increase in the number of acres harvested but, as mentioned above, is substantially behind schedule. Sugar volume sold was 65.0 percent higher for the same period, primarily due to one additional raw sugar voyage completed year to date as compared to 2014.

LIQUIDITY AND CAPITAL RESOURCES

The Company's primary liquidity needs have historically been to support working capital requirements and fund capital expenditures and real estate developments. A&B's principal sources of liquidity have been cash flows provided by operating activities, available cash and cash equivalent balances, and borrowing capacity under its various credit facilities.

A&B's operating income is generated by its subsidiaries. There are no material restrictions on the ability of A&B's subsidiaries to pay dividends or make other distributions to A&B. A&B regularly evaluates investment opportunities, including development projects, joint venture investments, share repurchases, business acquisitions and other strategic transactions to increase shareholder value. A&B cannot predict whether or when it may enter into acquisitions or joint ventures or what impact any such transactions could have on A&B's results of operations, cash flows or financial condition. A&B's cash flows from operations, borrowing availability and overall liquidity are subject to certain risks and uncertainties, including those described in the section entitled "Risk Factors" of the Company's 2014 Annual Report on Form 10-K.

Cash Flows: Cash flows from operating activities totaled \$69.4 million for the first six months of 2015, compared to cash flows used in operating activities of \$20.6 million for the first six months of 2014. The increase in cash flows from operating activities was primarily due to higher proceeds from real estate development sales and distributions from joint ventures.

Cash flows from investing activities totaled \$25.0 million for the first half of 2015, compared with \$61.4 million in the first half of 2014. The decrease in cash flows from investing activities was primarily due to higher proceeds received in 2014 from the sale of a commercial property on Maui and an increase in investments in affiliates in 2015, partially offset by higher proceeds from joint venture investments in 2015.

Capital expenditures for the first half of 2015 totaled \$20.4 million compared with \$19.7 million for the first half of 2014. Net cash flows used in investing activities for capital expenditures were as follows:

(dollars in millions)	Six Months Ended June 30,			
	2015	2014	Change	
Quarrying and paving	\$2.9	\$7.1	(59.2)%
Commercial real estate property improvements	5.2	5.8	(10.3)%
Tenant improvements	4.3	1.5	186.7	%
Agribusiness and other	8.0	5.3	50.9	%
Total capital expenditures*	\$20.4	\$19.7	3.6	%

* Capital expenditures for real estate developments to be held and sold as real estate development inventory are classified in condensed consolidated statement of cash flows as operating activities.

Cash flows used in financing activities were \$94.9 million for the first half of 2015, compared with \$37.9 million used in financing activities during the first half of 2014. The increase in cash flows used in financing activities was principally due to net payments made on the Company's debt facilities.

The Company believes that funds generated from results of operations, available cash and cash equivalents, and available borrowings under credit facilities will be sufficient to finance the Company's business requirements for the next fiscal year, including working capital, capital expenditures, and potential acquisitions and stock repurchases.

There can be no assurance, however, that the Company will continue to generate cash flows at or above current levels or that it will be able to maintain its ability to borrow under its available credit facilities.

Sources of Liquidity: Additional sources of liquidity for the Company, consisting of cash and cash equivalents, receivables, and quarry and sugar inventory, totaled \$110.2 million at June 30, 2015, a decrease of \$6.4 million from December 31, 2014. The decrease was due primarily to a \$15.0 million decrease in inventories, partially offset by a \$10.7 million increase in receivables.

The Company also has various revolving credit and term facilities that provide additional sources of liquidity for working capital requirements or investment opportunities on a short-term as well as longer-term basis. Total debt as of June 30, 2015 was \$617.4 million compared to \$706.0 million at the end of 2014. The decrease in debt during the first half of 2015 was principally due to payments on the Company's revolving credit facility and, to a lesser extent, the payoff of a \$18.8 million, 5.39% mortgage loan on Waianae Mall. As of June 30, 2015, unused amounts under the Company's revolving credit facility and its Prudential shelf facility totaled \$218.9 million.

Balance Sheet: The Company had working capital of \$47.1 million at June 30, 2015, compared to a working capital deficit of \$7.1 million at the end of 2014. The change in working capital is principally due to a reduction in notes payable as well as the recognition of deferred revenue related to a completed sugar voyage and higher receivable balances.

At June 30, 2015, the Company believes it was in compliance with all of its covenants under its credit facilities. While there can be no assurance that the Company will remain in compliance with its covenants, the Company expects that it will remain in compliance.

Tax-Deferred Real Estate Exchanges: Sales - During the first half of 2015, there were \$20.8 million of proceeds from the sales a retail center in Colorado, an office property in Texas and two non-core land sales on Maui that qualified for tax-deferral treatment under Internal Revenue Code Section 1031, which were applied toward the acquisition of Kaka'ako Commerce Center that closed on December 1, 2014. Additionally, during the second quarter of 2015 there were \$1.6 million of proceeds from the sale of a ground lease and non-core land sale on Maui that qualified for tax-deferral treatment under Internal Revenue Code Section 1031, which were applied toward the acquisition of three unimproved parcels on Maui that closed on April 9, 2015. During the second quarter of 2014, approximately \$63.1 million of proceeds from the sale of a Maui commercial property qualified for tax-deferral treatment under Internal Revenue Code Section 1031.

Purchases - During the second quarter of 2015 and 2014, the Company made no 1031 acquisitions.

The proceeds from 1031 tax-deferred sales are held in escrow pending future use to purchase new real estate assets. The proceeds from 1033 condemnations are held by the Company until the funds are redeployed. As of June 30, 2015, there were \$2.7 million from tax-deferred sales that had not been designated for reinvestment.

Commitments, Contingencies and Off-balance Sheet Arrangements: A description of other commitments, contingencies, and off-balance sheet arrangements at June 30, 2015, and herein incorporated by reference, is included in Note 3 to the condensed consolidated financial statements of Item 1 in this Form 10-Q.

OUTLOOK

All of the forward-looking statements made herein are qualified by the inherent risks of the Company's operations and the markets it serves, as more fully described on pages 17 to 30 of the Company's 2014 Form 10-K and other filings with the SEC.

There are two primary sources of periodic economic forecasts and data for the State of Hawaii: The University of Hawaii Economic Research Organization (UHERO) and the state's Department of Business, Economic Development and Tourism (DBEDT). Much of the economic information included herein has been derived from economic reports available on UHERO's and DBEDT's websites that provide more complete information about the status of, and forecast for, the Hawaii economy. Information below on Oahu residential re-sales is published by the Honolulu Board of Realtors and Title Guaranty of Hawaii, Incorporated. Information below on the Oahu commercial real estate market is provided by Colliers International (Hawaii). Bankruptcy filing information cited below is published by the U.S.

Bankruptcy Court District of Hawaii. Information below on foreclosures is from the Hawaii State Judiciary. Debit and credit card same-store sales activity is provided by First Hawaiian Bank.

The Company's overall outlook assumes steady growth for the U.S. and Hawaii economies. The Hawaii economy is projected to produce real growth of 2.5 percent in 2015, and is expected to continue to grow at a moderate pace for the next several years.

The primary driver of growth is tourism, which set an all-time record for visitor expenditures and arrivals for a third consecutive year in 2014, and is expected to continue to grow at a modest rate for the next several years. Year-to-date through June 2015, arrivals and expenditures have increased by 4.0 percent and 3.5 percent, respectively, compared to last year.

Construction continues its upward trend. The value of statewide private building permits through May 2015 was up 41.0 percent compared to the same period in 2014, led by an increase in commercial/industrial and residential construction permits.

The median resale price of \$700,000 for a single family home on Oahu in June 2015 was consistent with the record set last June, but the median resale price of an Oahu condominium was down 6.0 percent at \$338,500. Year-to-date through June 2015, the median Oahu single family home price was \$685,000, up 2.3 percent compared to last year, and the median resale price of an Oahu condominium was \$358,500, up 2.4 percent. For June 2015, days on market remained low at 18 days for homes and 22 days for condos.

Oahu retail vacancy fell below 4% for the first time in over four years to 3.8 percent, while asking rents increased 9.3 percent to \$3.77 in the second quarter of 2015, compared to last year. Second quarter industrial vacancy was 2.0 percent, compared to 2.4 percent in last year's second quarter. Industrial asking rents increased 11.4 percent in the second quarter of 2015, compared to last year. Office asking rents in the second quarter of 2015 improved 3.8 percent over the same comparative period despite a modest decrease in vacancy.

Property Type	Vacancy Rate for the Quarter Ended June 30, 2015	Average Asking Rent Per Square Foot Per Month (NNN) for the Quarter Ended June 30, 2015
Retail	3.8%	\$3.77
Industrial	2.0%	\$1.17
Office	13.1%	\$1.66

The state continues to see positive trends in other economic indicators. Unemployment in June 2015 was 4.0 percent, down from 4.4 percent in June 2014, and below the national unemployment rate of 5.3 percent.

Bankruptcy filings through June 2015 were down by 9.5 percent compared to the same period of 2014. Foreclosures were down 17.5 percent through May 2015 compared to last year. First Hawaiian Bank reported that its debit and credit card same-store sales activity increased 6.3 percent for the second quarter of 2015 compared to the second quarter of 2014.

The Company's Real Estate Leasing NOI was up 7.9 percent¹ for the first half of 2015 due to improvements in Hawaii same-store performance and the timing of acquisitions and dispositions. The Company projects the full-year 2015 NOI will approximate the growth rate for the first half of 2015.

Agribusiness operating profit is dependent on a number of factors, including, but not limited to, the following:

- Market prices for raw sugar at the time sugar is priced;
- Total sugar production, which is affected by weather and other factors;
- The volume, price and timing of molasses sales; and
- The volume and prices at which the Company sells power to the local electric utilities.

Extremely poor weather conditions experienced in the first quarter of 2015 have continued, and sugar production is well behind where it was expected to be at this point in the harvest. Power margins also have been significantly lower than anticipated, as the drop in fuel prices has reduced the price the local utility pays the Company for power. With only about half of the harvest season completed, and given the unpredictable weather patterns, it is very difficult to forecast full-year sugar production. If the Company is unable to meet its full-year production goals and power prices remain low, the Agribusiness segment is likely to generate a full-year 2015 loss above last year's loss. The Company continues to explore ways to improve its sugar production and pricing, and also is actively looking at various alternative business models. While the Company is making progress in its efforts, the analysis is a significant and

complex undertaking that will require additional time to complete.

At the end of June 2015, the Materials and Construction segment had a consolidated backlog² of \$251.4 million, 22.0 percent higher than at the end of March 2015 due to the increase in government bid activity and the dollar amount of bids won. The long-term outlook for Materials and Construction remains positive.

¹ Refer to page 21 for a discussion of management's use of a non-GAAP financial measure and the required reconciliation of non-GAAP measures to GAAP measures.

² Refer to page 24 for a discussion of the Company's backlog.

OTHER MATTERS

Officer and Management Changes: The A&B Board of Directors appointed A&B President Christopher J. Benjamin to the position of chief executive officer, effective January 1, 2016, succeeding Chairman and Chief Executive Officer Stanley M. Kuriyama, who will retire after 6 years as CEO. Kuriyama will continue to serve A&B as executive chairman of the A&B board. The A&B Board of Directors also appointed A&B Properties, Inc. Senior Vice President Lance K. Parker to the position of president of A&B Properties, Inc., effective September 1, 2015, succeeding Benjamin.

Significant Accounting Policies: The Company's significant accounting policies are described in Note 2 to the consolidated financial statements included in Item 8 of the Company's 2014 Form 10-K.

Critical Accounting Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America, upon which the Management's Discussion and Analysis is based, requires that management exercise judgment when making estimates and assumptions about future events that may affect the amounts reported in the financial statements and accompanying notes. Future events and their effects cannot be determined with absolute certainty and actual results will, inevitably, differ from those critical accounting estimates. These differences could be material. The most significant accounting estimates inherent in the preparation of A&B's financial statements were described in Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the Company's 2014 Form 10-K.

Dividends: On July 28, 2015, A&B's Board of Directors announced a third-quarter 2015 dividend of \$0.05 per share, payable on September 3, 2015 to shareholders on record as of the close of business on August 10, 2015.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information concerning market risk is incorporated herein by reference to Item 7A of the Company's Form 10-K for the fiscal year ended December 31, 2014. There has been no material change in the quantitative and qualitative disclosures about market risk since December 31, 2014.

ITEM 4. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

As previously disclosed in the Company's 2014 Form 10-K, in the course of preparing its financial statements for the year ended December 31, 2014, the Company, based on a multi-year evaluation of all of its significant deferred income tax accounts, identified corrections required for prior periods in certain of these accounts and, accordingly, revised its prior period financial statements. These revisions were quantitatively and qualitatively immaterial to the consolidated financial statements taken as whole and had no impact on pre-tax income or on cash flows from operating, investing, or financing activities. However, management concluded that the control deficiency that gave rise to the errors could possibly have, if not identified, resulted in a material misstatement of the deferred income taxes and related income tax expense, and therefore, at December 31, 2014, the Company's disclosure controls and procedures were not effective due to a material weakness in internal control over financial reporting related to the accounting for deferred income taxes.

During the three months ended June 30, 2015, the Company continued to make progress on a number of remediation efforts to address the control deficiency. These activities are further described below. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. Because the remediation work related to the accounting for deferred income taxes is ongoing, the Chief Executive Officer, along with the Chief Financial Officer, concluded that, as of June 30, 2015, the Company's disclosure controls and procedures were not effective. As a result, prior to filing its quarterly report on Form 10-Q, additional substantive procedures were performed with the assistance of third-party tax and accounting consultants. Accordingly, management believes that the financial statements included in this 2015 Form 10-Q fairly present, in all material respects, the Company's financial position, results of operations and cash flows for the periods presented in conformity with accounting principles generally accepted in the United States of America.

(b) Changes in Internal Control Over Financial Reporting

Other than the ongoing remediation efforts described below, there were no changes in the Company's internal control over financial reporting during the second quarter of 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

(c) Remediation Plan for Material Weakness in Internal Control

In response to the identified control issue, the Company is enhancing its review and related controls over the reconciliation of deferred income taxes through a combination of the following actions, which have been taken or are pending:

Design and implement additional controls over the accounting for deferred income taxes: The Company has designed and implemented additional accounting process and internal control procedures related to the accounting for deferred income taxes, such as an improved tax provision model, additional reconciliations, and enhanced review of deferred income tax balances.

Recruit additional qualified personnel and retain outside consultants to identify and assist with implementation of enhanced tax accounting processes and related internal control procedures: The Company has retained external consultants to assist the Company in developing revised control processes and procedures related to the accounting for deferred taxes, which has been completed. The Company is in the process of finalizing employment agreements with qualified personnel.

Provide additional training and education for tax and accounting staff: The Company has conducted additional training and education and will continue to support professional training for tax and accounting staff.

Management and the Company's Board of Directors are committed to maintaining a strong internal control environment and believe that these remediation efforts will provide the necessary improvements to the Company's internal controls over the accounting for deferred income taxes to remediate the material weakness. The redesigned controls and other remediation efforts are expected to be substantially completed by the end of the third quarter. However, the material weakness in internal control related to deferred taxes will not be considered fully remediated until the new procedures have been operating for a sufficient amount of time to evaluate the operating effectiveness of the redesigned controls. Since certain key controls adopted by the Company are performed only on an annual basis, the Company cannot fully conclude on the operating effectiveness of the redesigned controls until these controls are performed and tested in early 2016 for the 2015 annual period.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information set forth under the “Legal Proceedings and Other Contingencies” section in Note 3 of Notes to Condensed Consolidated Financial Statements, included in Part I, Item 1 of this report, is incorporated herein by reference.

ITEM 4. MINE SAFETY DISCLOSURES

The information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulations S-K (17 CFR 229.104) is included in Exhibit 95 to this periodic report on Form 10-Q.

ITEM 6. EXHIBITS

31.1 Certification of Chief Executive Officer, as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of Chief Financial Officer, as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

³² Certification of Chief Executive Officer and Chief Financial Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

¹⁰¹ The following information from Alexander & Baldwin, Inc.’s Quarterly Report on Form 10-Q for the quarter ended June 30, 2015, formatted in XBRL (eXtensible Business Reporting Language): (i) Condensed Consolidated Statements of Income for the three and six months ended June 30, 2015 and June 30, 2014, (ii) Condensed Consolidated Statement of Comprehensive Income for the three and six months ended June 30, 2015 and June 30, 2014, (iii) Condensed Consolidated Balance Sheets at June 30, 2015 and December 31, 2014, (iv) Condensed Consolidated Statement of Cash Flows for the six months ended June 30, 2015 and June 30, 2014, (v) Condensed Consolidated Statements of Equity for the six months ended June 30, 2015 and June 30, 2014, and (vi) the Notes to the Condensed Consolidated Financial Statements.
