MAGNETEK, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 28, 2010
(Amounts in thousands unless otherwise noted, except per share data, unaudited)

1. Summary of Significant Accounting Policies

Profile

Magnetek, Inc. (the “Company” or “Magnetek”) is a global provider of digital power control systems that are used to control motion and power primarily in material handling, elevator and energy delivery applications. The Company’s products consist primarily of programmable motion control and power conditioning systems used on the following applications: overhead cranes and hoists; elevators; coal mining equipment; and renewable energy.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of Magnetek, Inc. and its subsidiaries. All significant intercompany accounts and transactions have been eliminated.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial reporting and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. For further information, refer to the financial statements and footnotes thereto included in the Company’s Annual Report on Form 10-K for the year ended June 28, 2009 filed with the Securities and Exchange Commission (the “SEC”). In the Company’s opinion, these unaudited statements contain all adjustments, consisting of normal recurring adjustments, necessary to present fairly the financial position of the Company as of March 28, 2010, and the results of its operations and cash flows for the three- and nine-month periods ended March 28, 2010 and March 29, 2009. Results for the three- and nine-months ended March 28, 2010 are not necessarily indicative of results that may be experienced for the full fiscal year.

The Company uses a fifty-two, fifty-three week fiscal year ending on the Sunday nearest to June 30. Fiscal quarters are the 13 or 14 week periods ending on the Sunday nearest September 30, December 31, March 31 and June 30. The three- and nine-month periods ended March 28, 2010 and March 29, 2009 each contained 13 and 39 weeks respectively.

Use of Estimates - The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Recent Accounting Pronouncements

In February 2010, the SEC approved a work plan regarding convergence of US GAAP with International Financial Reporting Standards (“IFRS”) and the timeline for the preparation of financial statements by U.S. registrants under IFRS. IFRS are standards and interpretations adopted by the International Accounting Standards Board. Under the proposed roadmap, the Company would be required to prepare financial statements in accordance with IFRS no earlier

than in fiscal 2016, including comparative information also prepared under IFRS for fiscal 2015 and fiscal 2014. The Company is currently assessing the potential impact of IFRS on its financial statements and will continue to follow the proposed roadmap for future developments.

In December 2007, the FASB issued Accounting Standards Codification (“ASC”) Topic 805, Business Combinations. ASC Topic 805 is effective for business combinations closed in fiscal years beginning after December 15, 2008. This standard significantly changes the accounting for business acquisitions both during the period of the acquisition and in subsequent periods. Among the more significant changes in the accounting for acquisitions are the following:

- Acquired in-process research and development (“IPR&D”) is accounted for as an asset, with the cost recognized as the research and development is realized or abandoned. IPR&D was previously expensed at the time of the acquisition.
 - Contingent consideration is recorded at fair value as an element of purchase price with subsequent adjustments recognized in operations. Contingent consideration was previously accounted for as a subsequent adjustment of purchase price.
 - Transaction costs are expensed. These costs were previously treated as costs of the acquisition.
-

TABLE OF CONTENTS

In December 2007, the FASB issued ASC Topic 810, Noncontrolling Interests in Consolidated Financial Statements. ASC Topic 810 establishes accounting and reporting standards for the noncontrolling interest (minority interest) in a subsidiary and for the deconsolidation of a subsidiary. ASC Topic 810 is effective for financial statements issued for fiscal years beginning after December 15, 2008. The Company adopted ASC Topic 810 effective June 29, 2009. As the Company currently has no minority interests, the adoption of ASC Topic 810 did not have a material impact on its consolidated financial statements.

In May 2009, the FASB issued ASC Topic 855, Subsequent Events, which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. This Statement requires an entity to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet. For nonrecognized subsequent events that must be disclosed to keep the financial statements from being misleading, an entity will be required to disclose the nature of the event, as well as an estimate of its financial effect, or a statement that such an estimate cannot be made. In addition, ASC Topic 855 requires entities to disclose the date through which subsequent events were evaluated. ASC Topic 855 is effective for interim or annual financial periods ending after June 15, 2009. The Company adopted the provisions of ASC Topic 855 for its fiscal year ended June 28, 2009 and applied the requirements of ASC Topic 855 on a prospective basis.

2. Discontinued Operations

In April 2008, the Company committed to a plan to divest its telecom power systems (“TPS”) business, which manufactured backup power systems for wireless applications. As a result, the Company reclassified the assets to be disposed of, primarily inventory, as held for sale at June 29, 2008, and classified the operating results of the business as discontinued operations. In September 2008, the Company completed the sale of the assets of the TPS business to Myers Power Products, Inc. (“Myers”). The purchase price of \$1.25 million was paid by Myers to the Company in October, 2008. The Company recorded a loss of \$0.4 million related to the divestiture, included in results of discontinued operations for the nine months ended March 29, 2009, comprised mainly of future lease costs and the write-off of certain TPS fixed assets.

In addition, certain expenses incurred related to businesses the Company no longer owns are classified as discontinued operations. The results of discontinued operations are as follows:

	Three Months Ended		Nine Months Ended	
	March 28, 2010	March 29, 2009	March 28, 2010	March 29, 2009
Net sales - TPS business	\$ -	\$ -	\$ -	\$ 1,503
Lease termination expense	\$ -	\$ (959)	\$ -	\$ (959)
Loss from discontinued operations - TPS	(1)	-	(29)	(94)
Income from Federal Mogul settlement	-	-	-	480
Loss on disposal of TPS business	-	-	-	(368)
Expense related to divested businesses	(206)	(108)	(807)	(301)

Edgar Filing: MAGNETEK, INC. - Form 10-Q

Loss from discontinued operations \$ (207) \$ (1,067) \$ (836) \$ (1,242)

The condensed consolidated balance sheet as of March 28, 2010 includes certain accrued liabilities which represent the Company's best estimate of remaining contingent liabilities related to indemnification provisions included in sale agreements of divested businesses. While management has used its best judgment in assessing the potential liability for these items, given the uncertainty regarding future events, it is difficult to estimate the possible timing or magnitude of any payments that may be required for liabilities subject to indemnification. Any future adjustment to currently recorded contingencies related to indemnification claims or payments based upon changes in circumstances would be recorded as a gain or loss in discontinued operations.

TABLE OF CONTENTS

3. Inventories

Inventories consist of the following:

	March 28, 2010	June 28, 2009
Raw materials and stock parts	\$ 7,125	\$ 9,479
Work-in-process	1,204	909
Finished goods	2,369	2,229
	\$ 10,698	\$ 12,617

4. Commitments and Contingencies

Litigation—Product Liability

The Company is involved in a product liability lawsuit related to the Telemotive Industrial Controls business acquired in December 2002 through the purchase of the stock of MXT Holdings, Inc. (“MXT”). The lawsuit was initially filed by Robert Redman in Cook County, Illinois in 1998 against MXT and other defendants, but now is pending only against MXT and Electromotive Systems, Inc., a non-affiliated third party. The claim pre-dated the acquisition and was tendered to the insurance companies that provided coverage for MXT Holdings, Inc., against such claims, and the defense and indemnification has been accepted by the carriers, subject to a reservation of rights. The lawsuit seeks damages for personal injuries allegedly incurred by Mr. Redman due to an allegedly defective radio control product manufactured by MXT. The lawsuit is in the discovery phase. Management believes that the insurers will bear all liability, if any, with respect to the case and that the proceeding will not have a material adverse effect on the Company’s results of operations or financial position.

In August 2006, Pamela L. Carney, Administrator of the Estate of Michael J. Carney, filed a lawsuit in the Court of Common Pleas of Westmoreland County, Pennsylvania, against the Company and other defendants, alleging that a product manufactured by the Company’s Telemotive Industrial Controls business acquired by the Company in December 2002 contributed to an accident that resulted in the death of Michael J. Carney in August 2004. The claim has been tendered to the Company’s insurance carrier and legal counsel has been retained to represent the Company. Magnetek is defending the action on the basis of findings that the operator/owner of the product, Alleghany Ludlum Corporation, improperly maintained or modified the product, which led to its alleged failure. In March 2010, Magnetek’s primary carrier, Travelers, denied coverage under a reservation of rights. This followed the Company’s excess coverage carrier, AIG/AISLIC, denying coverage in June 2009. Travelers has agreed to continue to pay defense counsel to defend the case and has authorized defense counsel to undertake the defense of the “pass through” vendor PDS. Magnetek has retained separate coverage counsel. Plaintiff’s claim for damages is unknown at this time. The case is in the discovery phase and no trial date has been set.

The Company has been named, along with multiple other defendants, in asbestos-related lawsuits associated with business operations previously acquired by the Company, but which are no longer owned. During the Company’s ownership, none of the businesses produced or sold asbestos-containing products. With respect to these claims, the Company believes that it has no such liability. For such claims, the Company is uninsured, contractually indemnified against liability, or contractually obligated to defend and indemnify the purchaser of these former Magnetek business operations. The Company aggressively seeks dismissal from these proceedings. Management does not believe the asbestos proceedings, individually or in the aggregate, will have a material adverse effect on its financial position or

results of operations.

Litigation—Patent Infringement and Related Proceedings

In August 2008, the Company filed a complaint in the Circuit Court of Cook County, Illinois, County Department, Law Division, against Kirkland & Ellis, LLP (“K&E”). The lawsuit involves a claim for breach of professional responsibility arising out of K&E’s representation of Magnetek in the patent infringement action, Ole K. Nilssen v Magnetek, Inc. The Company alleges that, as a result of K&E’s negligent breach of professional duty in failing to discover or investigate the existence of prior art and prior misconduct which would have made Nilssen’s patent claim unenforceable or invalidated his patent, the Company suffered an arbitration award and judgment in the amount of \$23.4 million, which judgment was ultimately settled by the payment to Nilssen of \$18.75 million. The Company is seeking damages in the amount of \$18.75 million, reimbursement of reasonable costs and attorneys fees incurred in the proceeding to vacate the arbitration award and settlement thereof, and costs incurred in connection with this lawsuit. In December 2009, K&E filed a motion to dismiss for lack of subject matter jurisdiction and alternative motion to file amended affirmative defenses. On April 5, 2010, the Circuit Court of Cook County dismissed the complaint against K&E for lack of subject matter jurisdiction. The Court relied upon a recent Illinois appellate decision in which the Court held that attorney malpractice cases arising out of the

TABLE OF CONTENTS

prosecution or defense of federal patent claims raised federal questions for which the federal courts have exclusive jurisdiction. Although the Company vigorously resisted the motion, the dismissal has been entered and an appeal has been taken to the Illinois Appellate Court. On April 7, 2010, the Company filed a substantially identical complaint in the United States District Court for the Northern District of Illinois. The new federal complaint seeks damages in the amount of \$18.75 million, plus any additional damages as may be warranted by the evidence introduced at trial.

Litigation—Other

In November 2007, a lawsuit was filed by Antonio Canova in Italy, in the Court of Arezzo, Labor Law Section, against the Company and Power-One Italy, S.p.A. Mr. Canova is a former Executive Vice President of the Company and was Deputy Chairman and Managing Director of the Company's former Italian subsidiary, Magnetek S.p.A. Mr. Canova asserted claims for damages in the amount of 3.5 million Euros (approximately \$5.1 million USD) allegedly incurred in connection with the termination of his employment at the time of the sale of the Company's power electronics business to Power-One, Inc. in October 2006. The claims against the Company relate to a change of control agreement and restricted stock grant. The Company's reply brief was filed in March 2008, and the Company believes the claim is without merit and intends to vigorously defend against it. A hearing was held on October 15, 2009, at which time testimony from the witnesses for the parties was presented in Court, and on December 15, 2009, the parties filed briefs confirming the facts in support of their positions. The Court has scheduled the final hearing in the lawsuit for May 25, 2010.

Environmental Matters—General

From time to time, Magnetek has taken action to bring certain facilities associated with previously owned businesses into compliance with applicable environmental laws and regulations. Upon the subsequent sale of certain businesses, the Company agreed to indemnify the buyers against environmental claims associated with the divested operations, subject to certain conditions and limitations. Remediation activities, including those related to the Company's indemnification obligations, did not involve material expenditures during the first nine months of fiscal years 2010 or 2009.

The Company has also been identified by the United States Environmental Protection Agency and certain state agencies as a potentially responsible party for cleanup costs associated with alleged past waste disposal practices at several previously owned or leased facilities and offsite locations. Its remediation activities as a potentially responsible party were not material in the first nine months of fiscal years 2010 or 2009. Although the materiality of future expenditures for environmental activities may be affected by the level and type of contamination, the extent and nature of cleanup activities required by governmental authorities, the nature of the Company's alleged connection to the contaminated sites, the number and financial resources of other potentially responsible parties, the availability of indemnification rights against third parties and the identification of additional contaminated sites, the Company's estimated share of liability, if any, for environmental remediation, including its indemnification obligations, is not expected to be material.

Bridgeport, Connecticut Facility

In 1986, the Company acquired the stock of Universal Manufacturing Company ("Universal") from a predecessor of Fruit of the Loom ("FOL"), and the predecessor agreed to indemnify the Company against certain environmental

liabilities arising from pre-acquisition activities at a facility in Bridgeport, Connecticut. Environmental liabilities covered by the indemnification agreement included completion of additional cleanup activities, if any, at the Bridgeport facility and defense and indemnification against liability for potential response costs related to offsite disposal locations. The Company's leasehold interest in the Bridgeport facility was assigned to the buyer in connection with the sale of the Company's transformer business in June 2001. FOL, the successor to the indemnification obligation, filed a petition for Reorganization under Chapter 11 of the Bankruptcy Code in 1999 and the Company filed a proof of claim in the proceeding for obligations related to the environmental indemnification agreement. The Company believes that FOL had substantially completed the clean-up obligations required by the indemnification agreement prior to the bankruptcy filing. In November 2001, the Company and FOL entered into an agreement involving the allocation of certain potential tax benefits and Magnetek withdrew its claims in the bankruptcy proceeding. The Company further believes that FOL's obligation to the state of Connecticut was not discharged in the reorganization proceeding.

In October 2006, Sergy Company, LLC ("Sergy"), the owner of the Bridgeport facility, filed a lawsuit in Superior Court, J.D. of Fairfield, Connecticut alleging that the Company is obligated to remediate environmental contamination at the facility. The case was transferred to the Complex Litigation Docket, J.D. of Waterbury at Waterbury, Connecticut. Sergy filed an amended complaint alleging a breach of lease obligations and violation of Connecticut environmental statutory requirements, which allegations were denied in the Company's amended answer, affirmative defenses and counterclaims. The case is in the discovery and motions phase. Sergy amended its complaint to include additional claims against the Company under the Connecticut Transfer Act. The Company's request to add additional potentially responsible parties as

TABLE OF CONTENTS

defendants was granted by the Court, and the Company filed declaratory judgment complaints against the FOL successor and Merrit Gavin, trustee of the Sergy Trust, a former owner of the Bridgeport facility, seeking a declaration that the obligations that Sergy seeks to enforce against the Company are the obligations of these other parties. In July 2009, the Court granted Gavin's motion to dismiss him from the lawsuit, and in February 2010, the Court granted FOL's motion to dismiss it from the lawsuit, and the Company filed an appeal of such rulings. The lawsuit is in the discovery phase, and the trial is scheduled to begin in January, 2011. The Company intends to continue vigorously defending the claims brought against it in the lawsuit.

In January 2007, the Connecticut Department of Environmental Protection ("DEP") requested parties, including the Company, to submit reports summarizing the investigations and remediation performed to date at the site and the proposed additional investigations and remediation necessary to complete those actions at the site. DEP requested additional information from the Company relating to site investigations and remediation. The Company retained an environmental consultant to review and prepare reports on historical operations and environmental activities at the Bridgeport facility. In November 2009, the Company submitted its report and proposed work plan to the DEP. The Company has recorded a liability of \$0.3 million related to the Bridgeport facility, representing the Company's best estimate of future site investigation costs and remediation costs, the majority of which is expected to be incurred during fiscal 2010. The liability is included in accrued liabilities in the condensed consolidated balance sheet as of June 28, 2009 and March 28, 2010.

In April 2008, the Commissioner of Environmental Protection ("CTCEP") filed an action in Superior Court, Judicial District of Hartford-New Britain at Hartford seeking injunctive relief against Sergy and the Company, which action was commenced after Sergy cut off power to the Bridgeport facility, thereby disabling a groundwater pump and treatment system previously installed by FOL and currently operated by the Company on a voluntary basis. Although a stipulation was entered into by the Company and Sergy relating to the start up and operation of the groundwater pump and treatment system, the CTCEP filed a request to amend the complaint to assert additional claims and to seek further remedies, including injunctive relief and civil penalties, for alleged failure to investigate and remediate pollution under the Connecticut Transfer Act. In September, 2008 the Hartford Court ordered the case transferred to the Waterbury Court, where the above referenced action filed by Sergy against the Company is currently pending. In July 2009, the Court denied the Company's motion to join Gavin and FOL in the CTCEP lawsuit and also denied the motion to consolidate the Sergy and CTCEP actions. The lawsuit is currently in the discovery phase.

FOL's inability to satisfy its remaining obligations related to the Bridgeport facility and any offsite disposal locations, or an unfavorable ruling in the lawsuits with the owner of the Bridgeport facility or the CTCEP, or the discovery of additional environmental contamination at the Bridgeport facility could have a material adverse effect on the Company's financial position, cash flows or results of operations.

5. Comprehensive Income (Loss)

For the three- and nine-month periods ended March 28, 2010, and March 29, 2009, comprehensive income (loss) consisted of the following:

	Three Months Ended		Nine Months Ended	
	March 28, 2010	March 29, 2009	March 28, 2010	March 29, 2009
Net income (loss)	\$ (1,613)	\$ 178	\$ (4,633)	\$ 2,998
Change in unrecognized pension liability	1,552	1,079	4,657	3,239

Edgar Filing: MAGNETEK, INC. - Form 10-Q

Change in currency translation adjustments	(77)	66	10	(576)
Comprehensive income (loss)	\$ (138)	\$ 1,323	\$ 34	\$ 5,661

TABLE OF CONTENTS

6. Earnings (Loss) Per Share

The following table sets forth the computation of basic and diluted earnings (loss) per share for the three- and nine-months ended March 28, 2010, and March 29, 2009:

	Three Months Ended		Nine Months Ended	
	March 28, 2010	March 29, 2009	March 28, 2010	March 29, 2009
Numerator:				
Income (loss) from continuing operations	\$ (1,406)	\$ 1,245	\$ (3,797)	\$ 4,240
Loss from discontinued operations	(207)	(1,067)	(836)	(1,242)
Net income (loss)	\$ (1,613)	\$ 178	\$ (4,633)	\$ 2,998
Denominator:				
Weighted average shares - basic earnings per share	31,098	30,866	31,025	30,774
Add dilutive effective of stock based compensation	-	26	-	81
Weighted average shares - diluted earnings per share	31,098	30,892	31,025	30,855
Basic and Diluted:				
Income (loss) per share from continuing operations	\$ (0.05)	\$ 0.04	\$ (0.12)	\$ 0.14
Loss per share from discontinued operations	\$ (0.01)	\$ (0.03)	\$ (0.03)	\$ (0.04)
Net income (loss) per share	\$ (0.05)	\$ 0.01	\$ (0.15)	\$ 0.10

Outstanding options to purchase 2.3 million and 2.5 million shares of common stock for the three months ended March 28, 2010, and March 29, 2009, have not been included in the Company's computation of weighted average shares for diluted earnings per share because the effect would have been anti-dilutive. Outstanding options to purchase 2.3 million shares of common stock for the nine months ended March 28, 2010, and March 29, 2009, respectively, have not been included in the Company's computation of weighted average shares for diluted earnings per share because the effect would have been anti-dilutive.

7. Warranties

The Company offers warranties for certain products that it manufactures, with the warranty term generally ranging from one to two years. Warranty reserves are established for costs expected to be incurred after the sale and delivery of products under warranty, based mainly on known product failures and historical experience. Actual repair costs incurred for products under warranty are charged against the established reserve balance as incurred. Changes in the warranty reserve for the nine-month periods ended March 28, 2010, and March 29, 2009, are as follows:

	Nine Months Ended	
	March 28, 2010	March 29, 2009
Balance, beginning of fiscal year	\$ 281	\$ 493
Changes in product warranties charged to earnings	372	64
Use of reserve for warranty obligations	(304)	(198)
Balance, end of period	\$ 349	\$ 359

Warranty reserves are included in accrued liabilities in the accompanying condensed consolidated balance sheets.

TABLE OF CONTENTS

8. Pension Expense

Pension expense related to the Company's defined benefit pension plan for the three- and nine-month periods ended March 28, 2010, and March 29, 2009, follows:

	Three Months Ended		Nine Months Ended	
	March 28, 2010	March 29, 2009	March 28, 2010	March 29, 2009
Interest cost	\$ 2,706	\$ 2,799	\$ 8,116	\$ 8,397
Expected return on plan assets	(2,206)	(3,032)	(6,618)	(9,097)
Recognized net actuarial losses	1,552	1,079	4,657	3,239
Total net pension expense	\$ 2,052	\$ 846	\$ 6,155	\$ 2,539

Under current funding regulations, actuarial projections indicate that the Company will be required to make contributions to the defined benefit pension plan of approximately \$3.1 million during the remainder of fiscal year 2010.

9. Income Taxes

Due to historical taxable losses, the Company provides valuation reserves against its U.S. deferred tax assets. A portion of the Company's deferred tax liability relates to tax-deductible amortization of goodwill that is no longer amortized for financial reporting purposes. These deferred tax liabilities are considered to have an indefinite life and are therefore ineligible to be considered as a source of future taxable income in assessing the realization of deferred tax assets.

The Company's provision for income taxes for each of the three-month periods ended March 28, 2010 and March 29, 2009 includes \$248 and \$293 of deferred income tax expense related to the increase in the Company's deferred tax liability related to tax-deductible amortization of goodwill. The provision for income taxes for the nine-month periods ended March 28, 2010 and March 29, 2009 includes \$707 and \$743 of deferred income tax expense related to the increase in the Company's deferred tax liability related to tax-deductible amortization of goodwill. The remaining tax provision is comprised of income taxes of the Company's foreign subsidiary in Canada.

10. Bank Borrowing Arrangements

In November 2007, the Company entered into an agreement with Associated Bank, N.A. ("Associated Bank") providing for a \$10 million revolving credit facility (the "revolving facility"). Borrowings under the revolving facility bore interest at the London Interbank Offering Rate ("LIBOR") plus 1.5%, with borrowing levels determined by a borrowing base formula as defined in the agreement, which includes the level of eligible accounts receivable. The revolving facility also supports the issuance of letters of credit, places certain restrictions on the Company's ability to pay dividends or make acquisitions, and includes covenants that require minimum operating profit levels and limit annual capital expenditures. Borrowings under the revolving facility are collateralized by the Company's accounts receivable

and inventory. In December 2008, the Company and Associated Bank entered into a first amendment to the revolving facility, the primary purpose of which was to extend the maturity date of the revolving facility to November 2010. On February 19, 2010, the Company and Associated Bank entered into a second amendment to the revolving facility, the purpose of which was to (i) extend the maturity date of the revolving facility to December 15, 2010, (ii) establish minimum adjusted earnings before interest, taxes, depreciation and amortization requirements for the periods ending March 31, 2010, June 30, 2010 and September 30, 2010; (iii) reduce the commitment amount of Associated Bank from \$10.0 million to \$7.5 million; (iv) establish maximum cash amounts the Company can contribute to its defined benefit pension plan during calendar year 2010; and (v) broaden the security interest of Associated Bank to include all assets of the Company. There were no amounts outstanding on the amended revolving facility as of March 28, 2010. The Company is currently in compliance with all covenants of the second amendment to the revolving facility.

TABLE OF CONTENTS

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Overview

Magnetek, Inc. (“Magnetek,” “the Company,” “we,” or “us”) is a global provider of digital power control systems that are used to control motion and power primarily in material handling, elevator and energy delivery applications. Our systems consist primarily of programmable motion control and power conditioning systems used in the following applications: overhead cranes and hoists; elevators; coal mining equipment; and renewable energy applications, including wind turbines and photovoltaic power systems. We believe that with our technical and productive resources, application expertise, broad product offerings and sales channel capabilities, we are well positioned to respond to increasing demand in our served markets. Our operations are located in North America, predominantly in Menomonee Falls, Wisconsin, our Company headquarters.

Our product offerings for material handling applications include drive systems, radio remote controls, and braking, collision-avoidance, and electrification subsystems, sold primarily to original equipment manufacturers (“OEMs”) of overhead cranes and hoists. We have a significant market share in North America in alternating current (“AC”) control systems and believe we have growth opportunities in wireless radio controls, direct current (“DC”) control systems for retrofit applications and in automating existing manual material handling processes.

Our product offerings for elevator applications are comprised of highly integrated subsystems and drives used to control motion primarily in high-rise, high speed elevator applications. Our products are sold mainly to elevator OEMs and we have a significant share of the available market for DC drives and subsystems used in high-rise elevators used primarily in retrofit projects. We believe we have opportunities for growth in available elevator markets by introducing new energy-saving product offerings for AC applications, expanding the breadth of our product offerings to include competitive low-end products for lower performance AC applications, and using our new product offerings to expand geographically.

Our product offerings for energy delivery applications include power inverters for renewable energy applications, including wind turbines and photovoltaic installations, which deliver AC power to the utility grid from generators inside wind turbines or from solar panels. Both the wind and solar markets have grown rapidly in North America over the past several years as both wind and solar power have become increasingly competitive from a cost standpoint with more traditional methods of power generation. However, the ongoing credit crisis and uncertainty of continued governmental incentives and regulations has had an impact on solar and wind projects as these markets are heavily dependent on availability of financing and government incentives over extended periods of time. Although the slowdown in renewable energy projects negatively impacted demand for our products during fiscal 2009, we believe our product offerings have us well positioned to take advantage of growth in renewable energy markets as credit conditions continue to improve and capital is readily available to fund projects.

Continuing Operations

We focus on a variety of key indicators to monitor our business performance. These indicators include order rates, sales growth, gross profit margin, operating profit margin, net income, earnings per share, and working capital and cash flow measures. These indicators are compared to our operating plans as well as to our prior year actual results, and are used to measure our success relative to our company objectives. Our company objectives are to grow sales at least 10% on a year-over year basis, to achieve 30% gross margins and 10% operating profit margins, and to generate sufficient cash flow to fund our operations and meet our obligations.

The U.S. industrial slowdown and decline in capital spending began to negatively impact our business during the third quarter of fiscal 2009 and has continued to impact us through the third quarter of fiscal 2010. Sales of our material handling product offerings, which comprised nearly 70% of our sales in fiscal 2009, are influenced by cyclical forces in the industrial marketplace, and over the past 12 months, we have experienced softening demand in certain of our served markets, mainly in the automotive and primary metals industries. We have recently seen indicators of improvements in certain of our served markets, mainly in renewable energy, and we have seen signs of stabilization in our served material handling markets. Our bookings in the March 2010 quarter were \$19.3 million, comparable to our sales for the quarter despite an expected seasonal decline in sales of material handling products resulting from cyclical purchasing patterns of our customer base. Year-over-year our third quarter total company sales have declined by 24%, as third quarter sales of material handling products decreased 34% year-over-year.

In response to lower levels of sales and incoming orders throughout the downturn in our business, we have reduced our workforce by nearly 60 positions, approximately 16% of our workforce, and implemented a wage and salary freeze that is expected to remain in place throughout fiscal 2010. More recently, we have taken actions to temporarily suspend the Company's 401(k) plan matching contributions and also have changed the method of payment of the Company's incentive compensation plan for fiscal 2010 from cash payments to payment in Company common stock in an effort to preserve cash.

TABLE OF CONTENTS

We continue to look for further actions to improve our processes and improve production efficiency as well as reduce our fixed cost structure.

Third quarter fiscal 2010 gross margin decreased to 28.5% of sales from prior year third quarter gross margin of 30.9%, due mainly to lower sales volume and a shift in sales mix from higher margin material handling products to relatively lower margin renewable energy products, partially offset by savings from cost reduction actions implemented throughout the economic slowdown. We reported a loss from operations of \$1.2 million for the third quarter of fiscal 2010 compared to a prior year third quarter income from operations of \$1.2 million, due mainly to lower sales volume and higher pension expense, which increased by \$1.2 million in the third quarter of fiscal 2010 over prior year third quarter levels. Also during the third quarter of fiscal 2010, our cash balances decreased by \$4.0 million as a result of additional contributions to our defined benefit pension plan of \$2.6 million and an increase in working capital requirements mainly related to higher accounts receivable balances.

We believe that future sustained profitability is largely dependent upon increased sales revenue and continued improvement in gross margins. In addition, a further increase in the valuation of our pension plan assets or increases in interest rates, primarily related to long-term high-quality corporate bond rates, would favorably impact our periodic pension expense. Our past sales growth has been, and we believe future sales growth will continue to be, dependent on strong demand for material handling products, our customers' ability to obtain financing and willingness to invest in the current economic environment, successful introduction and increasing acceptance of new products, and a continuing recovery in renewable energy markets.

Further improvement in gross margins is mainly dependent upon favorable economic conditions, continued acceptance of recently introduced product offerings by the marketplace, and ongoing successful cost reduction actions related to recently introduced product offerings.

We intend to focus our development and marketing efforts on internal sales growth opportunities across all product lines, with an emphasis on development and enhancement of energy efficient power control products and systems. While we have continued to focus on controlling our operating expenses, our pension expense is expected to increase to \$8.2 million in fiscal 2010 from \$3.4 million in fiscal 2009, mainly due to negative returns on plan assets experienced during fiscal 2009. The combination of economic headwinds, lower sales volume and higher pension expense resulted in operating losses in the first three quarters of fiscal 2010, and as a result, we will not achieve our goal of 10% operating profit margins for all of fiscal 2010.

Our current outlook projects a double-digit percentage sequential sales increase in our fourth quarter of fiscal 2010 as compared to the third quarter of fiscal 2010, and we are currently projecting a slight positive income from operations in the fourth quarter of fiscal 2010. While we believe overall economic conditions are improving and the U.S. economy is in the early stages of recovery, given the nearly unprecedented economic circumstances we've faced over the past year, it is very difficult to predict the magnitude of the economic recovery, whether in the U.S. overall or in the specific end markets we serve.

Discontinued Operations

In the fourth quarter of fiscal 2008, we classified the assets and liabilities of our telecom power systems ("TPS") business as held for sale, and the results of operations of the TPS business as discontinued operations. Our TPS product offerings were focused on providing back-up power for wireless applications. We concluded we could better achieve our sales growth objectives by redirecting certain resources deployed in the TPS business to our product offerings in the material handling, elevator and energy delivery markets. We completed the divestiture of the TPS business during the first quarter of fiscal 2009 (see Note 2 of Notes to Condensed Consolidated Financial Statements).

In addition to the operating results of the divested TPS business, certain expenses related to previously divested businesses have also been classified as discontinued operations in the accompanying condensed consolidated financial statements and footnotes for all periods presented (see Note 2 of Notes to Condensed Consolidated Financial Statements). Expenses related to previously divested businesses have historically included certain expenses for environmental matters, asbestos claims and product liability claims (see Note 4 of Notes to Condensed Consolidated Financial Statements). All of these issues relate to businesses we no longer own and most relate to indemnification agreements we provided when we divested those businesses.

Our results of discontinued operations in future periods may include additional costs incurred related to businesses no longer owned, and may include additional costs above those currently estimated and accrued related to the divestiture of our TPS business and our power electronics business, which was divested in October 2006.

Critical Accounting Policies and Estimates

TABLE OF CONTENTS

There have been no material changes to our critical accounting policies and estimates from the information provided in Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, included in our Annual Report on Form 10-K for the fiscal year ended June 28, 2009.

Results of Operations - Three Months Ended March 28, 2010 and March 29, 2009

Net Sales and Gross Profit

Net sales for the three months ended March 28, 2010, were \$19.2 million, a decrease of 24% from the three months ended March 29, 2009, sales of \$25.1 million. The decrease in sales was primarily due to lower sales volumes in our material handling product line as a result of the decline in capital spending in North America in recent months. Net sales by product line were as follows, in millions:

	Three Months Ended					
	March 28, 2010			March 29, 2009		
Material handling	\$ 10.7	56	%	\$ 16.2	65	%
Elevator motion control	4.7	24	%	4.8	19	%
Energy systems	3.8	20	%	4.1	16	%
Total net sales	\$ 19.2	100	%	\$ 25.1	100	%

Gross profit for the three months ended March 28, 2010, was \$5.5 million, or 28.5% of sales, versus \$7.8 million, or 30.9% of sales, for the three months ended March 29, 2009. The decrease in gross profit as a percentage of sales for the three months ended March 28, 2010, as compared to the three months ended March 29, 2009, was due to lower sales volume of higher margin material handling products, partially offset by savings from cost reductions implemented in response to the lower sales volume.

Research and Development, Pension Expense, and Selling, General and Administrative

Research and development (“R&D”) expense was \$1.0 million, or 5.2% of sales, for the three months ended March 28, 2010, comparable to R&D expense of \$0.9 million, or 3.7% of sales, for the three months ended March 29, 2009.

Pension expense was \$2.1 million and \$0.8 million for the three months ended March 28, 2010 and March 29, 2009, respectively (see Note 8 of Notes to Condensed Consolidated Financial Statements). The increase in pension expense was mainly due to negative returns on plan assets experienced during fiscal 2009.

Selling, general and administrative (“SG&A”) expense was \$3.6 million (18.6% of sales) for the three months ended March 28, 2010, versus \$4.8 million (19.0% of sales) for the three months ended March 29, 2009. Selling expenses in the three months ended March 28, 2010, decreased to \$1.8 million from \$2.4 million in the three months ended March 29, 2009, due to lower volume-related commissions and lower payroll-related expenses. General and administrative (“G&A”) expense decreased to \$1.8 million for the three months ended March 28, 2010, from \$2.4 million for the three months ended March 29, 2009, mainly due to lower payroll-related costs and lower incentive compensation provisions.

Income (Loss) from Operations

Edgar Filing: MAGNETEK, INC. - Form 10-Q

Our loss from operations for the three months ended March 28, 2010, was \$1.2 million compared to income from operations of \$1.2 million for the three months ended March 29, 2009. The decline in income from operations for the three months ended March 28, 2010, as compared to the three months ended March 29, 2009, was mainly due to lower sales volumes and higher pension expense in the three months ended March 28, 2010.

Interest Income

Interest income was negligible for the three months ended March 28, 2010 and March 29, 2009.

Provision for Income Taxes

We recorded an income tax provision of \$0.2 million for the three months ended March 28, 2010, and a negligible income tax benefit for the three months ended March 29, 2009. The income tax provision in both periods includes non-cash deferred income tax provisions of \$0.2 million related to changes in deferred tax liabilities from goodwill amortization for tax purposes.

Income (Loss) from Continuing Operations

TABLE OF CONTENTS

We recorded a loss from continuing operations of \$1.4 million for the three months ended March 28, 2010, or a \$0.05 loss per share on both a basic and diluted basis, compared to income from continuing operations of \$1.2 million for the three months ended March 29, 2009, or \$0.04 income per share on both basic and diluted basis.

Loss from Discontinued Operations

We recorded a loss from discontinued operations for the three months ended March 28, 2010, of \$0.2 million, or a \$0.01 loss per share on both a basic and diluted basis, compared to a loss from discontinued operations of \$1.1 million, or a \$0.03 loss per share on both a basic and diluted basis, for the three months ended March 29, 2009. The loss from discontinued operations in the three months ended March 28, 2010, includes expenses of \$0.2 million related to previously divested businesses. The loss from discontinued operations in the three months ended March 29, 2009 includes a lease termination expenses of \$1.0 million as well as a loss of \$0.1 million related to previously divested businesses.

Net Income (Loss)

Our net loss was \$1.6 million in the three months ended March 28, 2010, or a \$0.05 loss per share, basic and diluted, compared to net income of \$0.2 million in the three months ended March 29, 2009, or \$0.01 per share on a basic and diluted basis.

Results of Operations - Nine Months Ended March 28, 2010 and March 29, 2009

Net Sales and Gross Profit

Net sales for the nine months ended March 28, 2010, were \$56.3 million, a decrease of 28% from the nine months ended March 29, 2009, sales of \$78.2 million. The decrease in sales was primarily due to lower sales volumes in our material handling product line as a result of the decline in capital spending in North America in recent months. Net sales by product line were as follows, in millions:

	Nine Months Ended					
	March 28, 2010			March 29, 2009		
Material handling	\$ 34.2	61	%	\$ 54.2	69	%
Elevator motion control	14.0	25	%	15.2	19	%
Energy systems	8.1	14	%	8.8	11	%
Total net sales	\$ 56.3	100	%	\$ 78.2	100	%

Gross profit for the nine months ended March 28, 2010, was \$17.0 million, or 30.2% of sales, versus \$26.6 million, or 34.0% of sales, for the nine months ended March 29, 2009. The decrease in gross profit as a percentage of sales for the nine months ended March 28, 2010, as compared to the nine months ended March 29, 2009, was due to lower sales volume of higher margin material handling products, partially offset by savings from cost reductions implemented in response to the lower sales volume.

Research and Development, Pension Expense, and Selling, General and Administrative

Research and development (“R&D”) expense was \$2.9 million, or 5.2% of sales, for the nine months ended March 28, 2010, compared to R&D expense of \$2.7 million, or 3.4% of sales, for the nine months ended March 29, 2009.

Pension expense was \$6.2 million and \$2.5 million for the nine months ended March 28, 2010 and March 29, 2009, respectively (see Note 8 of Notes to Condensed Consolidated Financial Statements). The increase in pension expense was mainly due to negative returns on plan assets experienced during fiscal 2009.

Selling, general and administrative (“SG&A”) expense was \$11.1 million (19.8% of sales) for the nine months ended March 28, 2010, versus \$16.2 million (20.7% of sales) for the nine months ended March 29, 2009. Selling expenses in the nine months ended March 28, 2010, decreased to \$5.9 million from \$7.6 million in the nine months ended March 29, 2009, due to lower volume-related commissions and lower payroll-related expenses. General and administrative (“G&A”) expense decreased to \$5.2 million for the nine months ended March 28, 2010, from \$8.6 million for the nine months ended March 29, 2009, mainly due to lower payroll-related costs and lower incentive compensation provisions. G&A expense for the nine months ended March 29, 2009 includes a restructuring charge of \$0.9 million related to management reorganization.

Income (Loss) from Operations

Our loss from operations for the nine months ended March 28, 2010, was \$3.2 million compared to income from operations of \$5.3 million for the nine months ended March 29, 2009. The decline in income from operations for the nine months

TABLE OF CONTENTS

ended March 28, 2010, as compared to the nine months ended March 29, 2009, was mainly due to lower sales volumes and higher pension expense in the nine months ended March 28, 2010, partially offset by lower payroll related costs.

Interest Income

Interest income was negligible for the nine months ended March 28, 2010 and March 29, 2009.

Provision for Income Taxes

We recorded income tax provisions of \$0.6 million for the nine months ended March 28, 2010, and \$1.1 million for the nine months ended March 29, 2009. The income tax provision in both periods includes non-cash deferred income tax provisions of \$0.7 million related to changes in deferred tax liabilities from goodwill amortization for tax purposes.

Income (Loss) from Continuing Operations

We recorded a loss from continuing operations of \$3.8 million for the nine months ended March 28, 2010, or a \$0.12 loss per share on both a basic and diluted basis, compared to income from continuing operations of \$4.2 million for the nine months ended March 29, 2009, or \$0.14 income per share on both a basic and diluted basis.

Loss from Discontinued Operations

We recorded a loss from discontinued operations for the nine months ended March 28, 2010, of \$0.8 million, or a \$0.03 loss per share on both a basic and diluted basis, compared to a loss from discontinued operations of \$1.2 million, or \$0.04 loss per share on both a basic and diluted basis, for the nine months ended March 29, 2009. The loss from discontinued operations in the nine months ended March 28, 2010, is comprised entirely of expenses related to previously divested businesses. Our loss from discontinued operations for the nine months ended March 29, 2009, includes a loss from termination of a lease agreement of \$1.0 million, a loss on the September 2008 disposal of our TPS business of \$0.4 million, and expenses related to previously divested businesses of \$0.3 million, partially offset by a settlement gain of \$0.5 million from a previous agreement with Federal-Mogul Corporation.

Net Income (Loss)

Our net loss was \$4.6 million in the nine months ended March 28, 2010, or a \$0.15 loss per share, basic and diluted, compared to net income of \$3.0 million in the nine months ended March 29, 2009, or \$0.10 per share on a basic and diluted basis.

Liquidity and Capital Resources

Our cash and cash equivalent balance, including restricted cash, decreased \$5.6 million during the nine months ended March 28, 2010, from \$18.4 million at June 29, 2009, to \$12.8 million at March 28, 2010. Our primary sources of cash during the nine months ended March 28, 2010, were from operations assisted by reduced working capital requirements of \$1.2 million and a participation payment related to an annuity contract of \$0.5 million, and our primary use of cash was for contributions of \$9.5 million to our defined benefit pension plan. During the nine months ended March 28, 2010, our net inventories decreased by \$1.9 million offset by an increase in our accounts receivable

balances by \$0.4 million. While we may make further investments to increase capacity for and to improve efficiency in the production of wind inverters, we do not anticipate that capital expenditures in fiscal 2010 will exceed \$1.5 million. The expected amount of capital expenditures could change depending upon changes in revenue levels, our financial condition and the general economy.

In November 2007 we entered into an agreement with Associated Bank, N.A. (“Associated Bank”) providing for a \$10 million revolving credit facility (the “revolving facility”). Borrowings under the revolving facility bear interest at the London Interbank Offering Rate (“LIBOR”) plus 1.5%, with borrowing levels determined by a borrowing base formula as defined in the agreement, based on the level of eligible accounts receivable. The revolving facility also supports the issuance of letters of credit, places certain restrictions on our ability to pay dividends or make acquisitions, and includes covenants which require minimum operating profit levels and limit annual capital expenditures. Borrowings under the revolving facility are collateralized by our accounts receivable and inventory. In December 2008, we entered into an amendment to the revolving facility with Associated Bank, the primary purpose of which was to extend the maturity date of the revolving facility to November 1, 2010. On February 19, 2010, we entered into a second amendment to the revolving credit facility with Associated Bank, the purpose of which was to (i) extend the maturity date of the Credit Agreement to December 15, 2010; (ii) establish minimum adjusted earnings before interest, taxes, depreciation and amortization requirements for the periods ending March 31, 2010, June 30, 2010 and September 30, 2010; (iii) reduce the commitment amount of Associated Bank from \$10.0 million to \$7.5 million; (iv) establish maximum cash amounts the Company can contribute to its defined benefit pension plan during calendar year 2010; and (v) broaden the security interest of Associated Bank to include all assets of the Company. There were no amounts outstanding under the revolving facility as of March 28, 2010. We are currently in compliance with all covenants of the second amendment to the revolving credit facility.

TABLE OF CONTENTS

Primarily as a result of the decline in interest rates over the past several years and more recent declines in values in equity markets, the accumulated benefit obligation of our defined benefit pension plan currently exceeds plan assets. We have made contributions to the plan aggregating \$21.7 million from April 2008 through March 2010, funded by cash generated from operations and existing cash on hand. Under funding regulations, current actuarial projections indicate that we will be required to make contributions to the plan aggregating approximately \$12.6 million in fiscal 2010, of which \$9.5 million has already been contributed as of March 28, 2010, the end of our fiscal 2010 third quarter. Required contributions beyond fiscal 2010 could still be significant, and will depend on future interest rate levels, values in equity and fixed income markets, and the level and timing of additional interim contributions we may make to the plan. Based upon current plans and business conditions, we believe that current cash balances, borrowing capacity under the revolving facility and internally generated cash flows will be sufficient to fund anticipated operational needs, capital expenditures, required pension plan contributions and other commitments over the next 12 months.

Caution Regarding Forward-Looking Statements and Risk Factors

This document, including documents incorporated herein by reference, contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. The words “believe,” “expect,” “estimate,” “anticipate,” “intend,” “may,” “might,” “will,” “would,” “could,” “project,” and “predict,” or similar words and phrases generally identify forward-looking statements. Forward-looking statements are inherently subject to risks and uncertainties which in many cases are beyond our control and which cannot be predicted or quantified. As a result, future events and actual results could differ materially from those set forth in, contemplated by, or underlying forward-looking statements. Forward-looking statements contained in this document speak only as of the date of this document or, in the case of any document incorporated by reference from another document, the date of that document. We do not have any obligation to publicly update or revise any forward-looking statement contained or incorporated by reference in these documents to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results over time.

Our future results of operations and the other forward-looking statements contained in this filing, including this section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” involve a number of risks and uncertainties. In particular, the statements regarding future economic conditions, our goals and strategies, new product introductions, penetration of new markets, projections of sales revenues and sales growth, manufacturing costs and operating costs, pricing of our products and raw materials required to manufacture our products, gross margin expectations, relocation and outsourcing of production capacity, capital spending, research and development expenses, the outcome of pending legal proceedings and environmental matters, payment of certain claims by insurance carriers, tax rates, sufficiency of funds to meet our needs including contributions to our defined benefit pension plan, and our plans for future operations, as well as our assumptions relating to the foregoing, are all subject to risks and uncertainties.

A number of factors could cause our actual results to differ materially from our expectations. We are subject to all of the business risks facing public companies, including business cycles and trends in the general economy, financial market conditions, changes in interest rates, demand variations and volatility, potential loss of key personnel, supply chain disruptions, government legislation and regulation, and natural causes. Additional risks and uncertainties include but are not limited to industry conditions, competitive factors such as technology and pricing pressures, business conditions in our served markets, dependence on significant customers, increased material costs, risks and costs associated with acquisitions and divestitures, environmental matters and the risk that our ultimate costs of doing business exceed present estimates. This list of risk factors is not all-inclusive, as other factors and unanticipated events could adversely affect our financial position or results of operations. Further information on factors that could affect our financial results can be found in our Annual Report on Form 10-K filed with the Securities and Exchange

Commission for the fiscal year ended June 28, 2009, under the heading “Risk Factors” as well as below in Part II, Item 1A under the heading “Risk Factors”.

Item 3 – Quantitative and Qualitative Disclosures about Market Risk

There have been no material changes to the quantitative and qualitative disclosures about our market risk disclosed in our Annual Report on Form 10-K for the fiscal year ended June 28, 2009. We did not have any outstanding hedge instruments or foreign currency contracts outstanding at March 28, 2010 or March 29, 2009.

Item 4 – Controls and Procedures

In connection with this Quarterly Report on Form 10-Q, under the direction of our Chief Executive Officer and Chief Financial Officer, we evaluated our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, and internal control over financial reporting and concluded that (i) our disclosure controls and procedures were effective as of March 28, 2010; and (ii) no change in internal control over financial reporting occurred

TABLE OF CONTENTS

during the quarter ended March 28, 2010, that has materially affected, or is reasonably likely to materially affect, such internal control over financial reporting.

Attached as exhibits to this Quarterly Report on Form 10-Q are certifications of the Company's Chief Executive Officer and Chief Financial Officer, which are required in accordance with Rule 13a-14 of the Securities Exchange Act of 1934. This "Controls and Procedures" section includes information concerning the controls and evaluation thereof referred to in the attached certifications, and it should be read in conjunction with the attached certifications for a more complete understanding of the topics presented.

PART II - OTHER INFORMATION

Item 1 – Legal Proceedings

Information about our legal proceedings is contained in Part I, Item 3, Legal Proceedings, and Note 11 in the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended June 28, 2009, which is incorporated herein by reference, and in Note 4 of the Notes to Condensed Consolidated Financial Statements contained in our Quarterly Reports on Form 10-Q. Except as noted below, we believe that there have been no material developments with respect to these matters during the fiscal quarter ended March 28, 2010.

As previously reported by the Company, the Company and Pamela L. Carney, Administrator of the Estate of Michael J. Carney, are involved in a lawsuit in the Court of Common Pleas, Westmoreland County, Pennsylvania relating to allegations that a product manufactured by the Company's Telemotive Industrial Controls business contributed to an accident that resulted in the death of Michael J. Carney. Magnetek is defending the action on the basis of findings that the operator/owner of the product, Alleghany Ludlum Corporation, improperly maintained or modified the product, which led to its alleged failure. Notwithstanding tender of the claim to the Company's insurance carrier, in March 2010 the Company's primary insurance carrier denied coverage but agreed to continue to provide defense counsel costs subject to a reservation of rights. This followed the Company's excess insurance coverage carrier denying coverage in June 2009. The case is in its discovery phase and no trial date has been set.

In addition as previously reported by the Company, the Company originally filed a complaint in the Circuit Court of Cook County, Illinois, against Kirkland & Ellis, LLP ("K&E") involving a claim for a breach of professional responsibility. On April 5, 2010, the Court dismissed the complaint against K&E for lack of subject matter jurisdiction. An appeal has been taken to the Illinois Appellate Court and on April 7, 2010, the Company filed a substantially identical complaint in the United States District Court for the Northern District of Illinois. The new federal complaint seeks damages in the amount of \$18.75 million plus any additional damages as may be warranted by the evidence.

Item 1A – Risk Factors

There have been no material changes to the risk factors disclosed in our Annual Report on Form 10-K for the fiscal year ended June 28, 2009.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

There were no unregistered sales of equity securities and there were no repurchases of equity securities during our fiscal quarter ended March 28, 2010.

Item 3 – Defaults upon Senior Securities

None.

Item 4 – (Removed and Reserved)

Item 5 – Other Information

The Company has scheduled a special meeting of the stockholders to be held on May 24, 2010 in order to seek stockholder approval of an amendment to Magnetek's Restated Certificate of Incorporation to effect a reverse stock split of the Company's common stock at any whole number ratio between 1-for-2 and 1-for-10, with the final decision whether to proceed with the reverse stock split and the exact ratio and timing of the reverse stock split to be determined by the Company's Board of Directors. The reverse stock split, if effected, is intended to increase the trading price of the Company's common stock on the New York Stock Exchange to facilitate a possible transition of the Company's listing of its common stock from the New York Stock Exchange to the Nasdaq Global Market or an alternative United States stock exchange.
