**BIRMINGHAM BLOOMFIELD BANCSHARES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Note 1 Summary of Significant Accounting Policies

Basis of Statement Presentation

The accompanying unaudited consolidated interim financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) with the instructions to Form 10-Q. Accordingly, certain information and disclosures required by accounting principles generally accepted in the United States of America for complete financial statements are not included herein. The interim financial statements should be read in conjunction with the financial statements of Birmingham Bloomfield Bancshares, Inc. (the Corporation) and the notes thereto included in the Corporation s annual report on Form 10-K for the year ended December 31, 2008.

In the opinion of management, all adjustments, consisting of normal recurring adjustments, which in the opinion of management are necessary for a fair presentation of financial position, results of operations, and cash flows, have been made. Events occurring subsequent to the balance sheet date through November 13, 2009 (the date of filing with the Securities and Exchange Commission) have been evaluated for potential recognition or disclosure in the consolidated financial statements. The results of operations for the three and nine month periods ended September 30, 2009 are not necessarily indicative of the results that may be expected for the year ended December 31, 2009.

Certain amounts in the prior period financial statements have been reclassified to conform to the current period presentation.

Principles of Consolidation

The consolidated financial statements include the accounts of the Corporation and its wholly-owned subsidiary the Bank of Birmingham (the Bank). All significant intercompany balances and transactions have been eliminated in consolidation.

Recent Accounting Developments

During May of 2009 the Financial Accounting Standards Board issued FASB ASC 855, Subsequent Events (formerly SFAS 165). This statement establishes standards under which an entity shall recognize and disclose events that occur after the balance sheet date but before the related financial statements are issued or are available to be issued. FASB ASC 855 is in effect for fiscal years and interim periods ending after June 15, 2009. Birmingham Bloomfield Bancshares adoption of FASB ASC 855 had no impact on our consolidated financial position or results of operations. In June 2009, the Financial Accounting Standards board issued three additional pronouncements. Birmingham Bloomfield Bancshares is assessing the impact of the adoption of these pronouncements on its consolidated financial position and results of operations. The pronouncements were:

The Financial Accounting Standards Board (FASB) Accounting Standards Codification TM (the Codification or ASC)

FASB ASC 105, Generally Accepted Accounting Principles, a replacement of FASB Statement No. 162 (formerly SFAS No. 168). On the effective date of FASB ASC 105, the codification will become the sole source of authoritative U.S. Generally Accepted Accounting Principles, (GAAP), recognized by the Financial Accounting Standards Board. This pronouncement is effective for interim and fiscal years ending after September 15, 2009. As FASB ASC 105 does not alter current Generally Accepted Accounting Principles, Birmingham Bloomfield Bancshares adoption of the same is not expected to have any material impact on our

Table of Contents

**BIRMINGHAM BLOOMFIELD BANCSHARES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

consolidated financial position or results of operations. In order to ease the transition to the Codification, we are providing the Codification cross-reference alongside the references to the standards issued and adopted prior to the adoption of the Codification. All future references to authoritative accounting literature in our consolidated financial statements will be referenced in accordance with the Codification.

FASB ASC 860, *Transfers and Servicing* (formerly SFAS No. 166). The objective of FASB ASC 860 is to improve both the relevance and the comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and the transferring entity's continuing involvement, if any, in the transferred financial assets. This pronouncement is effective for interim and annual reporting periods that begin after November 15, 2009.

FASB ASC 810, *Consolidation of Variable Interest Entities*. The objective of FASB ASC 810 is to improve financial reporting by enterprises involved with variable interest entities and to provide more relevant and reliable information to users of financial statements. FASB ASC 810 shall be effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for the interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. Earlier application is prohibited. Birmingham Bloomfield Bancshares is currently evaluating the impact of the adoption of this standard, but does not expect it to have a material effect on the Corporation's financial position or results of operation.

During August 2009, FASB issued FASB ASC 820, *Fair Value Measurements* (formerly ASU 2009-05). This update provides additional guidance on how to measure the fair value of liabilities. It does not require any new fair value disclosure measurements, but does reiterate the definition of the fair value of a liability is the price that would be paid to transfer it in an orderly transaction between market participants at the measurement date. It also states that a company must consider its own nonperformance risk, including credit risk in the fair value measurement of liabilities. FASB ASC 820 is effective for interim and annual reporting periods beginning after issuance. Birmingham Bloomfield Bancshares adoption of the update as of October 1, 2009 is not expected to have any material impact on its consolidated financial position or results of operations.

In September 2009, FASB issued FASB ASC 820, *Fair Value Measurements* (formerly ASU 2009-12). If certain conditions are met, FASB ASC 820 allows reporting entities to use net asset value per share to estimate the fair value of these investments as a practical expedient in cases where there is no readily determinable fair value. The FASB ASC also requires disclosures by major category of investment about the attributes of the investments, such as the nature of any restrictions on the investor's ability to redeem its investments at the measurement date, any unfunded commitments, and the investment strategies of the investees. FASB ASC 820 is effective for interim and annual periods ending after Dec. 15, 2009, with early application permitted. Adoption of FASB ASC 820 is not expected to have any material impact on Birmingham Bloomfield Bancshares, Inc.

Note 2 Fair Value Accounting

On January 1, 2008, the Corporation adopted FASB ASC 820, *Fair Value Measurements* (formerly SFAS 157, SFAS 157-2 and SFAS 157-4). FASB ASC 820 establishes a framework for measuring fair value and expands disclosures about fair value measurements. FASB ASC 820 was issued to bring conformity to the definition of fair value; prior to FASB ASC 820 there was no conformity in the accounting guidance regarding the definition of fair value. FASB ASC 820, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (formerly SFAS 157-4), provides guidance on how to determine the fair value of assets and liabilities in an environment where the volume and level of activity for the asset or liability have significantly decreased and re-

Table of Contents

BIRMINGHAM BLOOMFIELD BANCSHARES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

emphasizes that the objective of a fair value measurement remains an exit price. The FASB ASC is effective for periods ending after June 15, 2009, with earlier adoption permitted. The adoption of FASB ASC 820 did not have a material effect on Birmingham Bloomfield Bancshares financial position or results of operations.

As of June 30, 2009 Birmingham Bloomfield Bancshares adopted FASB ASC 825, The Fair Value Option for Financial Assets and Financial Liabilities (formerly FSP 107-1 and APB 28-1), requires companies to disclose the fair value of financial instruments within interim financial statements, adding to the current requirement to provide those disclosures annually. Since FASB ASC 825 addresses financial statement disclosures only, its adoption, effective June 30, 2009, did not impact Birmingham Bloomfield Bancshares consolidated financial position or results of operations and the required disclosures have been provided within this note.

Valuation Hierarchy

FASB ASC 820 (formerly SFAS 157) establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date and are the primary method of valuation used by Birmingham Bloomfield Bancshares, Inc. The three levels are defined as follows.

Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets which the Corporation can participate.

Birmingham Bloomfield Bancshares currently holds no securities in level one of the hierarchy.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 2 assets and liabilities for Birmingham Bloomfield Bancshares, Inc. include available for sale investments in government sponsored agencies, asset backed securities, and investments in obligations of state and political subdivisions. Fair values of these items are determined via external pricing from vendors.

Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement, and include inputs that are available in situations where there is little, if any, market activity for the related asset or liability.

Level 3 assets and liabilities for Birmingham Bloomfield Bancshares, Inc. include FHLB stock.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The following table presents the financial instruments carried at fair value as of September 30, 2009, on the Consolidated Balance Sheet and by FASB ASC 820 valuation hierarchy (as described above):

Assets measured at fair value on a recurring basis as of September 30, 2009 (000s omitted):

	Quoted Prices in Active Markets	Significant Other	Significant Unobservable	Balance at September 30, 2009
	for Identical Assets Level 1	Observable Inputs Level 2	Inputs Level 3	
Securities available for sale	\$	\$ 4,244	\$ 162	\$ 4,406

Note 3 Securities

The amortized cost and estimated fair value of securities, with gross unrealized gains and losses, follows (000s omitted):

	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
September 30, 2009 (unaudited)				
U.S. Government agency securities	\$ 2,844	\$ 13	\$	\$ 2,857
Municipal securities	200	4		204
Mortgage backed securities	1,091	92		1,183
Corporate bonds				
FHLB Stock	162			162
Total securities available for sale	\$ 4,297	\$ 109	\$	\$ 4,406

	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
December 31, 2008				
U.S. Government agency securities	\$ 2,004	\$ 30	\$	\$ 2,034
Municipal securities				
Mortgage backed securities	1,250	92		1,342
Corporate bonds	504			504
FHLB Stock				
Total	\$ 3,758	\$ 122	\$	\$ 3,880

As of September 30, 2009 and December 31, 2008, all securities are available for sale. The securities held in our portfolio experienced no rating changes during the quarter and remain at AAA for all except the municipal holding which is at Aa3 based on ratings by Moody. At September 30, 2009, there were \$1.5 million in securities pledged to secure public deposits from the State of Michigan. At December 31, 2008, there were no securities pledged to secure borrowings, public deposits or for other purposes required or permitted by law.

The amortized cost and estimated fair value of securities at September 30, 2009, by contractual maturity are shown below. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations without call or prepayment penalties. The contractual maturities of securities are as follows (000s omitted):

	Amortized cost	Estimated fair value
Due in one year or less	\$	\$
Due in one year through five years	3,044	3,061
Due in five years through ten years	162	162
Due after ten years		
Subtotal	3,206	3,223

Edgar Filing: Birmingham Bloomfield Bancshares - Form 10-Q

Mortgage backed securities, due after 10 years	1,091	1,183
Total	\$ 4,297	\$ 4,406

Total	\$ 13,205	\$ 23,265	\$ 36,470

Note 6 Leases and Commitments

The Corporation has entered into a lease agreement for its main office. Payments began in February 2005 and the initial term of the lease expires in October 2015. In October 2007, the Corporation exercised its first renewal option on the property which expires in October 2025. The main office lease has one additional ten year renewal option. The Corporation also entered into a lease agreement for its branch office in Bloomfield Township. Payments began in March 2006 and the lease expires February 2016. The Bloomfield branch office lease has one five year renewal option. Refer to Management Discussion and Analysis for additional information regarding the Bloomfield office lease. Rent expense under the lease agreements was \$70,000 and \$68,000 for the three months ended September 30, 2009 and 2008, respectively. Rent expense under the lease agreements was \$209,000 and \$205,000 for the nine months ended September 30, 2009 and 2008, respectively.

The following is a schedule of future minimum rental payments under operating leases on a calendar year basis (000s omitted):

2009	\$ 71
2010	286
2011	292
2012	298
2013	304
Thereafter	3,365
Total	\$ 4,616

Note 7 Fair Value of Financial Instruments

The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Corporation's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. FASB ASC 825 (formerly SFAS 107) excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Corporation.

The following methods and assumptions were used by the Corporation in estimating fair value disclosures for financial instruments:

Cash and Cash Equivalents - The carrying values of cash and cash equivalents approximate fair values.

Securities - Fair values of securities are based on quoted market prices. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

Loans Receivable - For variable-rate loans that re-price frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for other loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair values of nonperforming loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Deposit Liabilities - The fair values disclosed for demand deposits are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The carrying amounts of variable-rate, fixed-term money market accounts and certificates of deposit approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Accrued Interest - The carrying value of accrued interest approximates fair value.

Other Financial Instruments - The fair value of other financial instruments, including loan commitments and unfunded letters of credit, based on discounted cash flow analyses, is not material.

Note 8 Minimum Regulatory Capital Requirements

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet capital requirements can initiate regulatory action. The prompt corrective action regulations provide four classifications, well capitalized, adequately capitalized, undercapitalized and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and plans for capital restoration are required. The Bank of Birmingham was well-capitalized as of September 30, 2009. At September 30, 2009, the Corporation qualifies for an exemption from regulatory capital requirements due to its asset size.

The Bank's actual capital amounts and ratios as of September 30, 2009 are presented in the following table (000s omitted):

	Actual		For Capital Adequacy Purposes		To be Well-Capitalized	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of September 30, 2009

Management's Discussion and Analysis of Financial Condition and Results of Operations

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Disclosure Regarding Forward Looking Statements

This report contains forward-looking statements throughout that are based on management's beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy, and about the Corporation and the Bank. Words such as anticipates, believes, estimates, expects, forecasts, intends, is likely, plans, projects, variations of such words and similar expressions are intended to identify such forward-looking statements. These forward-looking statements are intended to be covered by the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Actual results and outcomes may materially differ from what may be expressed or forecasted in the forward-looking statements. The Corporation undertakes no obligation to update, amend, or clarify forward looking statements, whether as a result of new information, future events (whether anticipated or unanticipated), or otherwise. Future factors that could cause actual results to differ materially from the results anticipated or projected include, but are not limited to, the following: the credit risks of lending activities, including changes in the level and direction of loan delinquencies and write-offs and changes in estimates of the adequacy of the allowance for loan losses; competitive pressures among depository institutions, especially in light of increased consolidation within the industry; our ability to recruit and retain personnel required to support our growth and expansion and maintain the level of expertise necessary to support operational compliance; the ability to control expenses in this very difficult economic environment and era of special assessments from the FDIC and additional government oversight; interest rate movements and their impact on customer behavior and net interest margin; the impact of re-pricing and competitor's pricing initiatives on loan and deposit products; the ability to adapt successfully to technological changes to meet customers' needs and development in the market place; our ability to manage and access cost-effective funding; changes in economic conditions in general and particularly as related to the automotive and related industries in the Detroit metropolitan area; new legislation or regulatory changes, including but not limited to changes in federal and/or state tax laws or interpretations thereof by taxing authorities; changes in accounting principles, policies or guidelines; and our future acquisitions of other depository institutions or lines of business. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Further information concerning the Corporation and its business, including additional factors that could materially affect the Corporation's financial results, is included in its filings with the Securities and Exchange Commission.

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations****OVERVIEW**

Economic conditions have worsened for banks in general and particularly in Michigan as the U.S. economy has fallen into a recession. The nation's economy as a whole including the banking industry has experienced significant downturns resulting in losses, additional government intervention and oversight, and additional expense from FDIC special assessments within our industry. The Bank has been very prudent in lending practices and those efforts continue to show a very clean loan portfolio through the third quarter of the year. Through management's ongoing review of operations it was determined that the Bloomfield Hills branch location was not contributing to the profitability of the company in the manner anticipated. On October 1, 2009 the Corporation entered into an agreement with the lease holder for that location to terminate the lease effective January 18, 2010. The lease had an original termination date in February 2016. While the cost related to the closure of this location is expected to negatively impact earnings for 2009, the closure will aid in the reduction of ongoing operational costs which have been a hindrance in our efforts to achieve profitability. It is expected that the closure costs will be approximately \$630,000 incurred in the fourth quarter that will allow for cost savings of approximately \$300,000 per year going forward. The Bank continues to use its capital for customer loans, investments and other general banking purposes. The Corporation's initial offering proceeds have enabled the Bank to maintain a leverage capital ratio, which is a measure of core capital to average total assets, in excess of 8% for the first three years of operations as required by the FDIC. The Bank is no longer in de novo status as of July 27, 2009. The Corporation does anticipate that it will require \$4.0 to \$6.0 million in additional equity during the next 36 months of operations in order to continue to grow while meeting regulatory capital requirements. The Corporation has participated in the Government's Capital Purchase Program, receiving \$1.635 million in capital through the program to fulfill a portion of that need. A second application has been sent in for additional funding available under the program. No determination on the application has been made by the appropriate agencies as of this filing. Management is exploring additional options within the capital markets with the aid of consultants to determine how and when it may raise the anticipated necessary equity.

FINANCIAL CONDITION

At September 30, 2009, the Corporation's total assets were \$82.8 million, an increase of \$15.5 million or 23.1% from December 31, 2008. Cash and cash equivalents increased by \$4.7 million or 100.1%. Investment securities increased \$.5 million or 13.5% from December 31, 2008 to September 30, 2009. Loans, net of the allowance for loan losses, increased by \$10.5 million or 18.7% from December 31, 2008 to September 30, 2009. Total deposits increased by \$14.8 million or 25.7% from December 31, 2008 to September 30, 2009. Basic and diluted loss per share for the three and nine months ended September 30, 2009 were \$(0.08) per share and \$(0.52) per share, respectively. These numbers include the impact of the Corporation's participation in the Capital Purchase Program through the Department of Treasury. Basic and diluted loss per share for the three and nine months ended September 30, 2008 were \$(0.13) per share and \$(0.70) per share, respectively.

Cash and Cash Equivalents

Cash and cash equivalents increased \$4.7 million or 100.1% to \$9.3 million at September 30, 2009 up from \$4.7 million at December 31, 2008. This difference is due to a decrease in Federal funds sold of \$1.0 million and an increase in cash due to \$1.6 million received through the Government Capital Purchase Plan, \$1.5 million from the State of Michigan CD Stimulus program, and \$2.6 million in certificates of deposit and new customer deposits. These funds will be utilized for future anticipated loan fundings.

Table of Contents

BIRMINGHAM BLOOMFIELD BANCSHARES, INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Investments

Total investment securities available-for-sale increased \$526,000 or 13.5% to \$4.4 million at September 30, 2009, compared to \$3.9 million at December 31, 2008. The increase in investment securities is primarily attributable to \$2.8 million in U.S. Government agency security purchases and the purchase of \$162,100 in FHLBI stock, offset by the sale of a corporate security and the call of four U.S. Government agency securities, resulting in an approximate decrease of \$2.3 million. The remaining offset was due to repayments on mortgage backed securities. The Bank had no held to maturity securities as of September 30, 2009 and December 31, 2008.

Loans, Credit Quality and Allowance for Loan Losses

During the first nine months of 2009, loans, net of the allowance for loan losses, increased \$10.5 million or 18.7%, to \$66.6 million at September 30, 2009 up from \$56.1 million at December 31, 2008. The largest single category increase within loans, as noted in Note 4 to the financial statements, was commercial non real estate loans which increased by \$3.8 million or 46.4% to \$12.1 million at September 30, 2009. Multifamily real estate increased by \$3.5 million or 46.1% to \$11.2 million at September 30, 2009. Commercial real estate increased by \$6.2 million or 26.9% to \$29.3 million at the current quarter end. These loans are for the most part owner occupied properties. These increases are due in part to increased draws on existing lines as well as continued business development efforts. The allowance for loan losses was \$872,000 or 1.29% of loans at September 30, 2009. For the three and nine month periods ended September 30, 2009, there was one home equity line of credit loan charge off for approximately \$18,000 due to it becoming a probate matter, which occurred in the second quarter of 2009. For the three and nine month periods ended September 30, 2008, there were two loan charge-offs totaling approximately \$198,000 in the third quarter, a commercial term loan for \$173,000 and a consumer line of credit for \$25,000. The Corporation had no loan recoveries during the three and nine month periods ended September 30, 2009. In the second quarter of 2008, the Corporation did recover approximately \$84,000 on a loan charged-off from 2007. There were no loans over 90 days past due and still accruing interest at September 30, 2009 or 2008.

The primary risk element considered by management regarding each consumer and residential real estate loan is lack of timely payment. Management has a reporting system that monitors past due loans and has adopted policies to pursue its creditor's rights in order to preserve the Bank's position. The primary risk elements concerning commercial and industrial loans and commercial real estate loans are the financial condition of the borrower, the sufficiency of collateral, and lack of timely payment. Management has a policy of requesting and reviewing annual financial statements from its commercial loan customers and periodically reviews existence of collateral and its value. Management evaluates the condition of the loan portfolio monthly and again on a quarterly basis to determine the adequacy of the allowance for loan losses. Management's evaluation of the allowance is further based on consideration of actual loss experience, the present and prospective financial condition of borrowers, adequacy of collateral, industry concentrations within the portfolio, and general economic conditions. Management believes that the present allowance is currently adequate, based on the broad range of considerations listed above. However, management planned a gradual increase in the ratio of loan loss reserve to total loans to around 1.30% for 2009 due to the continued unstable economic environment that the corporation is operating within.

Although management believes that the allowance for loan losses is adequate to absorb losses as they arise, there can be no assurance that the Corporation will not sustain losses in any given period that could be substantial in relation to the size of the allowance for credit losses. Inherent risks and uncertainties related to the operation of a financial institution require management to depend on estimates, appraisals and evaluations of loans to prepare the Corporation's financial statements. Changes in economic conditions and the financial prospects of borrowers may result in changes to the estimates, appraisals and evaluations used. In addition, if circumstances and losses differ

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations**

substantially from management's assumptions and estimates, the allowance for loan losses may not be sufficient to absorb all future losses and net income could be significantly impacted.

Premises and Equipment

Premises and equipment, net of depreciation, was \$2.0 million as of September 30, 2009 and \$2.2 million at December 31, 2008. Due to the anticipated branch closure the Corporation will experience a write off of premises and equipment that are associated with that location. The charge will be approximately \$498,000 during the fourth quarter of 2009. The Corporation currently is anticipating a change in data processing service providers during the first quarter of 2010. This change may require some additional hardware purchases, however these are not anticipated to have a material impact on expenses.

Deposits

Total deposits were \$72.6 million at September 30, 2009, an increase of \$14.8 million over December 31, 2008. In the deposit categories, noninterest bearing DDA deposits were \$7.9 million, which were made up primarily of business accounts. NOW accounts which, except for limited circumstances, are owned by individuals were \$7.8 million at September 30, 2009, while Money Market accounts were \$9.8 million and Savings accounts were \$10.6 million at the current quarter end. Certificates of deposit were \$36.5 million at September 30, 2009. Of this amount \$23.3 million was in certificates greater than \$100,000. Beginning in February 2008, the Corporation began advertising its rates on certain certificates of deposits on a national certificate of deposit network, which has attracted some deposits from outside the local market. We will continue to utilize this avenue to supplement our deposit base as we continue to focus on growing our portion of the local retail and commercial deposit market. We have also chosen to participate in the MI-CD program with the State of Michigan. This program allows us to acquire State of Michigan certificate of deposit funds at below market rates to aid in the funding of our loan portfolio. Currently, \$1.5 million in these funds are included in our time deposits over \$100,000.

	(000s omitted)	As of September 30, 2009	
		Balance	Percentage
Noninterest bearing demand		\$ 7,897	10.9
NOW accounts		7,819	10.8
Money market		9,845	13.6
Savings		10,560	14.5
Time deposits under \$100,000		13,205	18.1
Time deposits over \$100,000		23,265	32.1
Total deposits		\$ 72,591	100.0%

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations****RESULTS OF OPERATIONS****Net Interest Income**

Net interest income for the three months ended September 30, 2009 and 2008 were \$748,000 and \$532,000 respectively. Interest income on loans was \$1,038,000 and \$818,000 for the three months ended September 30, 2009 and 2008, respectively. The growth in interest income on loans was driven by continued growth in the loan portfolio. Deposit interest expense of \$337,000 and \$352,000 for the three month periods ended September 30, 2009 and 2008, respectively, decreased due to the growth in savings accounts and certificates of deposit accounts being offset by significantly lower interest rates offered during the 3rd quarter of 2009 compared to the same period in 2008.

The following table shows the Corporation's consolidated average balances of assets, liabilities, and equity. The table also details the amount of interest income or interest expense and the average yield or rate for each category of interest-earning asset or interest-bearing liability as well as the net interest margin.

	Three Months Ended September 30,					
	2009			2008		
	Average Balance (000s)	Interest	Average Yield/ Rate	Average Balance (000s)	Interest	Average Yield/ Rate

(1) Net interest earnings divided by average interest-earning assets.

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations**

Net interest income for the nine months ended September 30, 2009 and 2008 was \$1.9 million and \$1.4 million respectively. Interest income on loans was \$2.8 million and \$2.2 million for the nine months ended September 30, 2009 and 2008, respectively. As indicated above, the growth in interest income on loans was driven by continued growth in the loan portfolio. Significant growth in interest bearing deposit balances, offset by significantly lower interest rates offered in 2009, resulted in consistent levels of deposit interest expense. Interest expense was \$1.0 million for the two nine month periods ended September 30, 2009 and 2008.

The following table shows the Corporation's consolidated average balances of assets, liabilities, and equity. The table also details the amount of interest income or interest expense and the average yield or rate for each category of interest-earning asset or interest-bearing liability and the net interest margin for the nine month periods ended September 30, 2009 and 2008, respectively.

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations**

The yield on interest-earning assets decreased for the quarter ended September 30, 2009 to 5.30% from 5.73% as compared to the same period in the prior year. Much of the decrease was due to reductions in the yield in the loan portfolio, particularly within the variable rate home equity portfolio with the prime rate changes that originally occurred during 2008 and have carried through 2009. The yield on loans receivable decreased to 6.13% for the three months ended September 30, 2009 from 6.17% for the same period in 2008. The Corporation's interest rate spread increased for the three months ended September 30, 2009 to 3.25% from 2.84% for the same period in 2008. The Corporation has benefited from an improvement in the spread on interest rates as reductions in the cost of deposits outpaced the reduction in loan yields. In the prior year, deposit rates were higher due to the competitive market as well as promotional rates offered by us as a de novo institution to attract and build the customer base. Net interest margin increased to 3.65% for the three months ended September 30, 2009 up from 3.45% for the same period in 2008. The yield on interest-earning assets decreased for the nine month period ended September 30, 2009 to 5.25% from 5.76% as compared to the same period in the prior year. The yield on loans receivable decreased to 5.89% for the nine months ended September 30, 2009, down from 6.26% for the same period in 2008. As indicated above, these decreases relate directly to decreases in the prime lending rate throughout 2008. The Corporation's interest rate spread increased for the nine months ended September 30, 2009 to 3.02%, up from 2.63% for the same period in 2008. Net interest margin increased to 3.43% for the nine months ended September 30, 2009, up from 3.35% for the same period in 2008. Management expects that the excess liquidity held in federal funds sold and Federal Reserve balances will be utilized in the fourth quarter through continued loan growth, depletion of deposits due to non-renewal of certain higher rate certificates and the purchase of higher yield investment products, which will improve the yield on interest earning assets.

Provision for Loans Losses

The provision for loan losses was \$32,000 and \$109,000 for the three months ended September 30, 2009 and 2008, respectively. The decrease from the previous comparable period in provision for loan losses was due to the loan portfolio declining by \$1.06 million for the three months ended September 30, 2009, while the increase in the loan portfolio for the same period in 2008 was \$6.48 million. The provision for loan losses was \$180,000 and \$254,000 for the nine months ended September 30, 2009 and 2008, respectively. The 2008 number included a specific reserve on a loan placed on non-accrual status during the second quarter. Due to the continuing difficult economic conditions, management has decided to gradually increase the provision to build our loan loss reserve levels to a more conservative 1.30% of total loans during 2009.

Non-Interest Income

Non-interest income was \$27,000 and \$35,000 for the three months ended September 30, 2009 and 2008, respectively. This decrease is primarily due to decreases in official check and wire transfer activity fees. Loan fees and charges increased to approximately \$4,300 for the three months ended September 30, 2009, up from \$3,200 for the same period in 2008. Deposit fees and charges increased to \$20,000 for the three months ended September 30, 2009, up from \$15,500 for the same period in 2008. Other income decreased to approximately \$3,000 for the quarter ended September 30, 2009, down from \$16,000 for the same period in 2008. This decrease is due to a gain recognized on the sale of a mortgage backed security in the 3rd quarter of 2008.

Non-interest income was \$77,500 and \$96,500 for the nine months ended September 30, 2009 and 2008, respectively. Loan fees and charges decreased to approximately \$10,000 for the first nine months of 2009 compared to \$15,000 for the same period in 2008. This decrease is due to a prepayment penalty on a commercial loan payoff in January 2008. Deposit fees and charges increased to approximately \$54,800 for the nine months ended September 30, 2009, up from approximately \$53,300 for the same period in 2008. Other income decreased to approximately \$12,700 for the nine months ended September 30, 2009, down from approximately \$28,100 for

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations**

the same period in 2008. This decrease is due primarily to gains recognized for calls on two investment securities in 2009 totaling approximately \$3,000, while gains recognized for calls on certain investment securities in 2008 totaled approximately \$19,300.

Non-Interest Expense

Non-interest expense for the three months ended September 30, 2009 and 2008 was \$867,500 and \$692,000 respectively. Salaries and benefits continued to be the largest component of non-interest expense. Salaries and benefits increased \$96,800, or 32.1%, to \$398,600 for the quarter ended September 30, 2009 up from \$301,800 for the same period of 2008. The current period included salaries for an increase of three additional employees, none of which were included in salaries for the same period in 2008. Occupancy expenses decreased slightly to \$192,000 for the quarter ended September 30, 2009 from \$199,000 for the same period of 2008. Data processing expenses were \$54,800 for the three month period ended September 30, 2009, compared to \$48,000 for the same period in 2008 mainly due to loan and deposit growth and price increases from the vendor. Advertising expenses were \$(650) for the three months ended September 30, 2009, down from \$10,100 as compared to the same period in 2008. The negative advertising expense for the current three month period is due to the partial reversal of an accrual booked in February 2009 for marketing expenses presented for payment, which related to prior years. These expenses were paid in September but at a negotiated 25% discount; therefore the remaining accrual was reversed. Professional fees were \$72,700 for the three months ended September 30, 2009 compared to \$66,000 for the same period in 2008. For the quarter ended September 30, 2009, the Corporation recognized \$9,800 for legal expenses related to the Capital Purchase Program Participation, which was not applicable to the same period in 2008. Other expenses increased to \$138,100 for the three months ended September 30, 2009 compared to \$95,300 for the same period in 2008. This increase is due in large part to regulatory assessment expenses being \$50,000 for the three months ended September 30, 2009 compared to \$19,000 for the same period in 2008. This increase is tied to the Corporation's deposit growth from the same period in the prior year.

Non-interest expense for the nine months ended September 30, 2009 and 2008 was \$2.71 million and \$2.50 million, respectively. Salaries and benefits increased \$13,000, or 1.1%, to \$1.176 million for the nine months ended September 30, 2009, up from \$1.163 million for the same period of 2008. In the first quarter of 2008, management of the Corporation reduced staffing in several key areas. This decrease in compensation expense remained throughout 2008 and into 2009. The staff additions made during the second quarter of this year has since offset this compensation reduction. Occupancy expenses remained relatively stable at \$607,000 for the nine months ended September 30, 2009 down from \$616,000 for the same period of 2008. Data processing expenses were \$159,000 for the nine month period ended September 30, 2009 compared to \$135,000 for the same period in 2008. These increased costs are due to increases in volume in the current year which is the basis for most of the data processing costs. In addition, increased ATM usage has increased the ATM transaction fees incurred in the current year. Advertising expenses remained relatively stable at \$56,600 for the nine months ended September 30, 2009, down from \$69,700 as compared to the same period in 2008. Professional fees were \$270,000 for the nine months ended September 30, 2009 compared to \$226,000 for the same period in 2008. The increase was related to specific programs which required legal review and are not expected to be recurring. Other expenses increased to \$396,000 for the nine months ended September 30, 2009 compared to \$302,000 for the same period in 2008. Regulatory assessments accounted for the majority of the difference. The increase in our deposit base will continue to increase the normal deposit insurance assessment, and the FDIC has the ability to assess additional special assessments across the industry as needed. The FDIC has issued a notice of proposed rule making that would allow it to replenish the deposit insurance fund by requiring financial institutions to prepay share insurance assessments for the fourth quarter of 2009 and all of 2010 through 2012 on December 31, 2009. The comment period extended through October 28, 2009, but the rule would be effective immediately upon adoption. The payment of an estimated \$475,000 would be recorded on the Corporation's books as a prepaid asset that would be written down over the appropriate periods.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Income Taxes

No income tax expense or benefit was recognized during the three and nine month periods ended September 30, 2009 or 2008 due to the tax loss carry-forward position of the Corporation. An income tax benefit may be booked in future periods when the Corporation begins to turn a profit and management believes that profitability will be expected for the foreseeable future beyond that point.

LIQUIDITY AND CAPITAL RESOURCES; ASSET/LIABILITY MANAGEMENT

Bank liquidity depends upon the mix of the banking institution's potential sources and uses of funds. The major sources of liquidity for the Bank have been deposit growth, federal funds sold, and loans which mature within one year. Large deposit balances which might fluctuate in response to interest rate changes are closely monitored. These deposits consist mainly of certificates of deposit over \$100,000. We anticipate that we will have sufficient funds available to meet our future commitments. As of September 30, 2009, unused commitments totaled \$19.3 million. As a majority of the unused commitments represent commercial and equity lines of credit. Experience has shown that only a small portion of the unused commitments will normally be drawn upon. While we expect to see an increase in advances on the home equity lines of credit under these tough economic times, we believe that these usage numbers will not be excessive or have a major impact on our liquidity needs. A large portion (70%), of the Bank's time deposits of \$36.5 million matures within twelve months from September 30, 2009. This is on par with June 30, 2009, but down significantly from December 31, 2008 when 95% of deposits matured within one year. The Bank continues to focus on restructuring the deposit side of the balance sheet, extending the duration of those deposits to mitigate the effects of our liability sensitive position. We have been able to negate the negative impact of rising rates on our potential earnings over the short term. Several alternative funding sources have developed to supplement our deposit base in order to satisfy our liquidity needs. We utilize an online listing service that allows us to bring in deposits from outside the local marketplace and we have chosen to participate in the State of Michigan's MI-CD program, which allows us to pull in below market rate certificate of deposit dollars to aid in the funding of our loan portfolio. In addition, our application to the Federal Home Loan Bank of Indianapolis has been approved and a credit line with the Federal Reserve Bank was established to provide additional funding sources should they be needed.

The largest uses and sources of cash and cash equivalents for the Corporation for the quarter ended September 30, 2009, as noted in the Consolidated Statement of Cash Flows, were centered primarily on the uses of cash in investing activities and the net cash provided by financing activities. The uses of cash in investing activities were largely due to increases in the loan portfolio, and the cash provided from increases in deposits contributed to the total cash and cash equivalents at the end of September 30, 2009 of \$9.3 million, which was an increase of \$4.7 million from \$4.7 million at December 31, 2008.

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for Banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet capital requirements can initiate regulatory action. The Bank was well-capitalized as of September 30, 2009. Note 7 to the financial statements are hereby incorporated by reference. At September 30, 2009, the Corporation qualifies for an exemption from regulatory capital requirements due to its asset size. The Corporation does anticipate that it will require \$4.0 to \$6.0 million in additional equity during the next 36 months of operations in order to continue to grow while meeting regulatory capital requirements. Management applied for and was granted in April 2009 \$1.6 million in funding under the U.S. Treasury's Capital Purchase Program as part of our equity plan. A second application has been sent in for additional funding available under the program. No determination on the application has been made by the appropriate agencies as of this filing. Management is exploring additional options within the capital markets with the aid of consultants to determine how and when it may raise the anticipated equity management feels will be required to continue to expand our business in a controlled and prudent manner.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Managing rates on earning assets and interest bearing liabilities focuses on maintaining stability in the net interest margin, an important factor in earnings growth and stability. Emphasis is placed on maintaining a controlled rate sensitivity position to avoid wide swings in margins and to manage risk due to changes in interest rates. Some of the major areas of focus of the Corporation's Asset Liability Committee (ALCO) incorporate the following overview functions: review the interest rate risk sensitivity of the Bank to measure the impact of changing interest rates on the Bank's net interest income, review the liquidity position through various measurements, review current and projected economic conditions and the corresponding impact on the Bank, ensure that capital and adequacy of the allowance for loan losses are maintained at proper levels to sustain growth, monitor the investment portfolio, recommend policies and strategies to the Board that incorporate a better balance of our interest rate risk, liquidity, balance sheet mix and yield management, and review the current balance sheet mix and proactively determine the future product mix.

Off-Balance Sheet Arrangements

As of September 30, 2009, unused commitments totaled \$19.3 million. As a majority of the unused commitments represent commercial and equity lines of credit, the Bank has experienced a moderate increase in line usage during 2009 which is not unexpected and has caused no undue burden to the Corporation.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Corporation's primary market risk exposure is interest rate risk and liquidity risk. All of the Corporation's transactions are denominated in U.S. dollars with no specific foreign exchange exposure. Any impacts that changes in foreign exchange rates would have on interest rates are assumed to be insignificant.

Interest rate risk (IRR) is the exposure of a banking organization's financial condition to adverse movements in interest rates. Accordingly, effective risk management that maintains IRR at prudent levels is essential to the Corporation's safety and soundness. The Board of Directors has instituted a policy setting limits on the amount of interest rate risk that may be assumed. Management evaluates the Corporation's level of risk through a series of measurement techniques including gap analysis, earning simulations, and economic value of equity simulations. This detailed process is performed on a quarterly basis, but is managed daily. The Bank continues to be in a liability sensitive position and management continues to work toward creating a more closely matched portfolio to minimize any potential impact that changing rates could have on earnings in the short term. The institution is well positioned with the latest balance sheet shock analysis showing that over the long term, rate changes pose only a minimal risk to our economic value of equity (EVE ratio). This information is provided to the Board of Directors on a quarterly basis detailing interest rate risk estimates and activities to mitigate such risk.

The Corporation has not experienced a material change in its financial instruments that are sensitive to changes in interest rates since December 31, 2008, which information can be located in the Corporation's annual report on Form 10-K.

ITEM 4T. CONTROLS AND PROCEDURES

As of the end of the period covered by this report we carried out an evaluation under the supervision and with the participation of the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures, as such term is defined under Exchange Act Rules 13a-15(e) and 15d-15(e).

Based on this evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer concluded that as of the end of the period covered by this report such disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and

Management's Discussion and Analysis of Financial Condition and Results of Operations

accumulated and communicated to the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

In designing and evaluating the disclosure controls and procedures, the Corporation's management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives and in reaching a reasonable level of assurance. The Corporation's management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

There were no changes in the Corporation's internal controls over financial reporting during the period ended September 30, 2009 that materially affected, or are reasonably likely to materially affect, the Corporation's internal controls over financial reporting.
