CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements relate to future events or our future financial performance. These forward-looking statements regarding future events and our future results are based on current expectations, estimates, forecasts and projections, and the beliefs and assumptions of our management including, without limitation, our expectations regarding the following: our ability to execute on our revenue strategy shift to cloud-first, the license and subscription revenues generated by our software products and services; the impact of our revenue recognition policies; our belief that our current assets, including cash, cash equivalents, short-term investments, and expected cash flows from operating activities, will be sufficient to fund our operations; our belief that we will successfully integrate our acquisitions; our anticipated additions to property, plant and equipment; our belief that our facilities are suitable and adequate to meet our current operating needs; and our belief that we do not have any material exposure to changes in the fair value of our investment portfolio as a result of changes in foreign currency exchange rates or interest rates. Words such as, but not limited to, “we expect,” “anticipate,” “target,” “project,” “believe,” “goals,” “estimate,” “potential,” “predict,” “may,” “might,” “could,” “would,” “intend,” and variations of these type and similar expressions are intended to identify these forward-looking statements.

Table of Contents

PROS Holdings, Inc.
Notes to Condensed Consolidated Financial Statements
(Unaudited)

1. Organization and Nature of Operations

PROS Holdings, Inc., a Delaware corporation, through its operating subsidiaries (collectively, the "Company"), provides revenue and profit realization solutions that help B2B and B2C customers realize their potential through the blend of simplicity and data science. The Company offers solutions to help accelerate sales, formulate winning pricing strategies and align product, demand and availability. The Company's revenue and profit realization solutions are designed to allow customers to experience meaningful revenue growth, sustained profitability and modernized business processes. The Company also provides professional services to implement its software applications as well as business consulting. In addition, the Company provides product maintenance and support to its customers to receive unspecified upgrades, maintenance releases and bug fixes during the term of the support period on a when-and-if-available basis. The Company provides its cloud solutions to enterprises across a range of industries, including manufacturing, distribution, services, and travel.

2. Summary of Significant Accounting Policies

The accompanying unaudited condensed consolidated financial statements reflect the application of significant accounting policies as described below and elsewhere in these notes to the condensed consolidated financial statements.

Basis of presentation

The accompanying unaudited condensed consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States ("GAAP") for interim financial reporting and applicable quarterly reporting regulations of the Securities and Exchange Commission ("SEC"). In management's opinion, the accompanying interim unaudited condensed consolidated financial statements include all adjustments necessary for a fair statement of the financial position of the Company as of September 30, 2015, the results of operations for the three and nine months ended September 30, 2015 and cash flows for the nine months ended September 30, 2015.

Certain information and disclosures normally included in the notes to the annual financial statements prepared in accordance with GAAP have been omitted from these interim unaudited condensed consolidated financial statements pursuant to the rules and regulations of the SEC. Accordingly, these unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014 ("Annual Report") filed with the SEC. The condensed consolidated balance sheet as of December 31, 2014 was derived from the Company's audited consolidated financial statements but does not include all disclosures required under GAAP.

Certain prior year amounts have been reclassified to conform to the current period financial statement presentation. These changes did not impact the results of operations, cash flows, or financial position of the Company.

In addition, in connection with the preparation of the Company's financial statements for the year ended December 31, 2014, the Company revised the classification of the amortization expense of developed technology arising from acquisitions. The amortization expense was previously recorded within research and development expenses as a component of operating expenses and was reclassified as a component of cost of revenue. Accordingly, the Condensed Consolidated Statements of Comprehensive Income (Loss) were adjusted for the three and nine months ended

September 30, 2014 to increase cost of revenue and reduce gross profit by \$0.6 million and \$1.7 million, respectively. Research and development expenses were reduced by the same adjustments resulting in no change to reported net income attributable to the Company or basic or diluted net earnings attributable to common stock per share. The revision was not deemed material to the Condensed Consolidated Statements of Comprehensive Income (Loss).

Basis of consolidation

The unaudited condensed consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany transactions and balances have been eliminated in consolidation. The functional currency of PROS France SAS, formerly known as Cameleon Software SA ("PROS France") is the Euro. The financial statements of this subsidiary are translated into U.S. dollars using period-end rates of exchange for assets and liabilities, historical rates of exchange for equity, and average rates of exchange for the period for revenue and expenses. Translation gains (losses) are recorded in accumulated other comprehensive income (loss) as a component of stockholders' equity.

Table of Contents

Dollar amounts

The dollar amounts presented in the tabular data within these footnote disclosures are stated in thousands of dollars, except per share amounts, or as noted within the context of each footnote disclosure.

Use of estimates

The Company makes estimates and assumptions in the preparation of its unaudited condensed consolidated financial statements, and its estimates and assumptions may affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the unaudited condensed consolidated financial statements, and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates. The complexity and judgment required in the Company's estimation process, as well as issues related to the assumptions, risks and uncertainties inherent in the application of the percentage-of-completion method of accounting, affect the amounts of revenue, expenses, unbilled receivables and deferred revenue. Estimates are also used for, but not limited to, receivables, allowance for doubtful accounts, useful lives of assets, depreciation and amortization, income taxes and deferred tax asset valuation, valuation of stock options, other current liabilities and accrued liabilities. Numerous internal and external factors can affect estimates. The critical accounting policies related to the estimates and judgments are discussed in the Company's Annual Report under management's discussion and analysis of financial condition and results of operations. There have been no significant changes to the Company's critical accounting policies as described in the Company's Annual Report.

Revenue recognition

The Company derives its revenue from the licensing and implementation of software solutions and associated software maintenance and support. The Company also offers software-as-a-service ("SaaS") and cloud-based services that do not require customers to host the Company's solutions in their data centers. This SaaS and cloud-based component of the Company's revenues is currently growing at a faster rate than the license revenue. The Company's arrangements with customers typically include: (a) license or SaaS fees paid for the use of software solutions either in perpetuity or over a specified term and implementation fees for configuration, implementation and training services and (b) maintenance and support fees related to technical support and software updates. If there is significant uncertainty about contract completion or collectability is not reasonably assured, revenue is deferred until the uncertainty is sufficiently resolved or collectability is reasonably assured. In addition, revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred and fees are fixed or determinable.

In determining whether professional services revenue should be accounted for separately from license revenue, the Company evaluates whether the professional services are considered essential to the functionality of the software using factors such as: the nature of its software products; whether they are ready for use by the customer upon receipt; the nature of professional services; the availability of services from other vendors; whether the timing of payments for license revenue coincides with performance of services; and whether milestones or acceptance criteria exist that affect the realizability of the software license fee.

If the Company determines that professional services revenue should not be accounted for separately from license revenue, the license revenue is recognized together with the professional services revenue using the percentage-of-completion method or completed contract method. The completed contract method is also used for contracts where there is a risk over final acceptance by the customer or for contracts that are short-term in nature.

The percentage-of-completion method is measured by the percentage of man-days incurred during the reporting period as compared to the estimated total man-days necessary for each contract for implementation of the software solutions.

The Company measures performance under the percentage-of-completion method using the total man-day method based on current estimates of man-days to complete the project. The Company believes that for each such project, man-days expended in proportion to total estimated man-days at completion represents the most reliable and meaningful measure for determining a project's progress toward completion. Under the Company's fixed-fee arrangements, should a loss be anticipated on a contract, the full amount of the loss is recorded when the loss is determinable.

The Company also licenses software solutions under term license agreements that typically include maintenance during the license term. When maintenance is included for the entire term of the license, there is no renewal rate and the Company has not established vendor specific objective evidence ("VSOE") of fair value for the maintenance on term licenses. For term license agreements, revenue and the associated costs are deferred until the delivery of the solution and recognized ratably over the remaining license term.

Table of Contents

For arrangements that include cloud-based services, the Company allocates the arrangement consideration between the service and other elements and recognizes the cloud-based services fee ratably beginning on the date the customer commences use of those services and continues through the end of the service term.

The Company's customer arrangements typically contain multiple elements that include software license, professional services and post-implementation maintenance and support. For multiple element arrangements containing nonsoftware services, the Company must (1) determine whether and when each element has been delivered; (2) determine fair value of each element using the selling price hierarchy of VSOE of fair value, third party evidence ("TPE"), or best estimate of selling price ("BESP"), as applicable; and (3) allocate the total price among the various elements based on the relative selling price method.

For multiple-element arrangements that contain software and nonsoftware elements such as the Company's cloud-based service offerings, the Company allocates revenue between the software and software related elements as a group and any nonsoftware elements based on a relative fair value allocation. The Company determines fair value for each deliverable using the selling price hierarchy described above and utilizes VSOE of fair value if it exists.

In certain instances, the Company may not be able to establish VSOE for all deliverables in an arrangement with multiple elements. This may be due to infrequently selling each element separately, not pricing solutions or services within a narrow range, or only having a limited sales history. In addition, third party evidence may not be available. When the Company is unable to establish selling prices using VSOE or TPE, it uses BESP in the allocation of arrangement consideration. The objective of BESP is to determine the price at which the Company would transact a sale if the product or service were sold on a stand-alone basis. For transactions that only include software and software-related elements, the Company continues to account for such arrangements under the software revenue recognition standards which require it to establish VSOE of fair value to allocate arrangement consideration to multiple deliverables.

Maintenance and support revenue includes post-implementation customer support and the right to unspecified software updates and enhancements on a when and if available basis. The Company recognizes revenue from maintenance arrangements ratably over the period in which the services are provided.

Revenue that has been recognized, but for which the Company has not invoiced the customer, is recorded as unbilled receivables. Invoices that have been issued before revenue has been recognized are recorded as deferred revenue in the accompanying consolidated balance sheets.

Business Combinations

The Company records tangible and intangible assets acquired and liabilities assumed in business combinations under the acquisition method of accounting. Amounts paid for each acquisition are allocated to the assets acquired and liabilities assumed based on their fair values at the date of acquisition.

Significant management judgments and assumptions are required in determining the fair value of acquired assets and liabilities, particularly intangible assets. The valuation of purchased intangible assets is based upon estimates of the future performance and cash flows from the acquired business. Each asset is measured at fair value from the perspective of a market participant.

The Company uses its best estimates and assumptions to assign fair value to the tangible and intangible assets acquired and liabilities assumed at the acquisition date. The Company's estimates are inherently uncertain and subject to refinement. During the measurement period, which may be up to one year from the acquisition date, the Company may record adjustments to the fair value of these tangible and intangible assets acquired and liabilities assumed, with

the corresponding offset to goodwill. In addition, uncertain tax positions and tax-related valuation allowances are initially established in connection with a business combination as of the acquisition date. The Company continues to collect information and reevaluates these estimates and assumptions quarterly and records any adjustments to the Company's preliminary estimates to goodwill, provided that the Company is within the measurement period. Upon the conclusion of the measurement period or final determination of the fair value of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to the Company's condensed consolidated statements of operations.

Internal-use software

Costs incurred to develop internal-use software during the development stage are capitalized, stated at cost, and depreciated using the straight-line method over the estimated useful lives of the assets. Development stage costs generally include salaries and personnel costs and third-party contractor expenses associated with internal-use software configuration, coding, installation and

Table of Contents

testing. The Company capitalized internal-use software development costs related to cloud-based offerings of zero and \$0.5 million for the three months ended September 30, 2015 and 2014, respectively, and \$0.3 million and \$1.5 million for the nine months ended September 30, 2015 and 2014, respectively. Capitalized internal-use software development costs related to cloud-based offerings are amortized using the straight-line method over the useful life of the asset. For the three and nine months ended September 30, 2015, the Company amortized no capitalized internal-use software development costs. For the three and nine months ended September 30, 2014, the Company amortized zero and \$0.3 million, respectively, of capitalized internal-use software development costs. Capitalized software for internal use is included in property and equipment, net in the unaudited condensed consolidated balance sheets. Amortization of capitalized internal-use software development costs is included in cost of subscription revenues in the accompanying unaudited condensed consolidated statements of comprehensive income (loss).

Impairment of long-lived assets

Long-lived assets are reviewed for impairment whenever an event or change in circumstances indicates that the carrying amount of an asset or group of assets may not be recoverable. The impairment review includes comparison of future cash flows expected to be generated by the asset or group of assets with the associated assets' carrying value. If the carrying value of the asset or group of assets exceeds its expected future cash flows (undiscounted and without interest charges), an impairment loss is recognized to the extent that the carrying amount of the asset exceeds its fair value. The Company recorded no impairment charges during the three and nine months ended September 30, 2015. During the quarter ended June 30, 2014, the Company recorded a \$2.1 million impairment charge related to internally developed software. The impairment resulted from a reduction of projected cash flows for a product group based on revisions to the Company's projections during the quarter and was recorded to reduce the carrying value to fair value. This reflected changes to the Company's plans for this product group in connection with the integration of the Company's acquisitions. Other than such impairment charge, the Company recorded no other impairment charges during the nine months ended September 30, 2014.

Noncash share-based compensation

The Company measures all share-based payments to its employees based on the grant date fair value of the awards and recognizes expenses in the Company's unaudited consolidated statement of comprehensive income (loss) on a straight-line basis over the periods during which the recipient is required to perform services (generally over the vesting period of the awards). To date, the Company has granted stock options, Restricted Stock Units ("RSUs"), stock settled Stock Appreciation Rights ("SARs"), and Market Stock Units ("MSUs"). RSUs include both time-based awards as well as performance-based awards in which the number of shares that vest upon satisfying certain conditions from binding customer agreements for the provision of configure, price, and quote ("CPQ") solutions. MSUs are performance-based awards in which the number of shares that vest are based upon the Company's relative stockholder return.

The following table presents the number of shares or units outstanding for each award type as of September 30, 2015 and December 31, 2014, respectively, (in thousands):

Award type	September 30, 2015	December 31, 2014
Stock options	855	961
Restricted stock units (time based)	2,022	1,830
Restricted stock units (performance based)	32	34
Stock appreciation rights	532	673
Market stock units	563	444

Stock options, time based RSUs and SARs vest ratably between one and four years. The actual number of MSUs that will be eligible to vest is based on the total stockholder return of the Company relative to the total stockholder return of the Russell 2000 Index ("Index") over their respective performance periods, as defined by each award's plan documents. The Company did not grant any stock options or SARs during the three and nine months ended September 30, 2015 and 2014.

The fair value of the RSUs is based on the closing price of the Company's stock on the date of grant.

The Company estimates the fair value of MSUs on the date of grant using a Monte Carlo simulation model. The determination of fair value of the MSUs is affected by the Company's stock price and a number of assumptions including the expected volatilities of the Company's stock and the Index, its risk-free interest rate and expected dividends. The Company's

Table of Contents

expected volatility at the date of grant was based on the historical volatilities of the Company and the Index over the performance period.

The weighted average assumptions used to value the MSUs granted during the three and nine months ended September 30, 2015 were as follows:

	September 30, 2015
Volatility	42.06%
Risk-free interest rate	0.89%
Expected option life in years	2.95
Dividend yield	—

Earnings per share

The Company computes basic earnings (loss) per share by dividing net income (loss) attributable to common stockholders by the weighted average number of common shares outstanding. Diluted earnings (loss) per share is computed by dividing net income (loss) attributable to common stockholders by the weighted average number of common shares and dilutive potential common shares then outstanding. Diluted earnings per share reflect the assumed conversion of all dilutive securities, using the treasury stock method. Dilutive potential common shares consist of shares issuable upon the exercise of stock options, shares of unvested restricted stock units, and settlement of stock appreciation rights. When the Company incurs a net loss, the effect of the Company's outstanding stock options, stock appreciation rights and restricted stock units are not included in the calculation of diluted earnings (loss) per share as the effect would be anti-dilutive. Accordingly, basic and diluted net loss per share are identical.

Short-term investments

The Company's investments are available-for-sale commercial paper and certificates of deposit that are recorded at fair value in the consolidated balance sheets. Unrealized gains and losses on available-for-sale securities are recorded, net of tax, as a component of accumulated other comprehensive income (loss), unless impairment is considered to be other-than-temporary. Other-than-temporary unrealized losses on available-for-sale securities are generally recorded in gain (loss) on investments, net, in the consolidated statements of comprehensive income (loss) unless certain criteria are met. The primary factors considered when determining if a charge must be recorded because a decline in the fair value of an investment is other-than-temporary include whether: (i) the fair value of the investment is significantly below the Company's cost basis; (ii) the financial condition of the issuer of the security has deteriorated; (iii) if a debt security, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the security; (iv) the decline in fair value has existed for an extended period of time; (v) if a debt security, such security has been downgraded by a rating agency; and (vi) the Company has the intent and ability to retain the investment for a period of time sufficient to allow for any anticipated recovery in fair value. Investments with remaining maturities of twelve months or less are classified as short-term investments. Investments with remaining maturities of more than twelve months are classified as long-term investments. All of the Company's investments had contractual maturities of less than twelve months as of September 30, 2015.

Fair value measurement

The Company's financial assets that are measured at fair value on a recurring basis consisted of \$109.1 million and \$135.3 million invested in treasury money market funds at September 30, 2015 and December 31, 2014, respectively. The fair value of these accounts is determined based on quoted market prices, which represents level 1 in the fair value hierarchy as defined by Accounting Standard Codification ("ASC") 820, "Fair Value Measurement and

Disclosure."

The fair value of the Company's short-term investments which is comprised of available-for-sale commercial paper and certificates of deposit was \$22.5 million as of September 30, 2015. The fair value of these accounts is determined based on quoted market prices for similar assets in active markets, which represents level 2 in the fair value hierarchy. The Company recorded an immaterial amount of unrealized gain related to the short-term investments for the three and nine months ended September 30, 2015. Reclassification adjustments for realized gain (loss) on available-for-sale securities in net income were immaterial for the three and nine months ended September 30, 2015.

11

Table of Contents

Deferred revenue and unbilled receivables

Software license and implementation services that have been performed, but for which the Company has not invoiced the customer, are recorded as unbilled receivables, and invoices that have been issued before the software license and implementation, maintenance and subscription services have been performed are recorded as deferred revenue in the accompanying unaudited condensed consolidated balance sheets.

Credit Facility

As of September 30, 2015, the Company had no outstanding borrowings under the Company's \$50 million secured Credit Agreement ("Revolver"), and \$0.1 million of unamortized debt issuance costs related to the Revolver is included in other long-term assets in the condensed consolidated balance sheets. For each of the three and nine months ended September 30, 2015 and the three and nine months ended September 30, 2014, the Company recorded an immaterial amount of amortization of debt issuance cost which is included in other expense, net in the unaudited condensed consolidated statements of comprehensive income (loss).

Income taxes

The Company recorded an income tax benefit of \$0.1 million and an income tax provision of \$0.4 million for the three and nine months ended September 30, 2015, respectively, primarily related to foreign taxes, state taxes not based on pre-tax income, acquisition-related tax amortization and the settlement of the Company's 2009 IRS audit. The Company recorded an income tax benefit of \$0.3 million and \$2.1 million for the three and nine months ended September 30, 2014, respectively, primarily related to the Company's pre-tax loss for the period partially offset by nondeductible officers' compensation and changes in the foreign tax valuation allowance. The effective tax rate for the three months ended September 30, 2015 and 2014 was 0% and 6%, respectively. The effective tax rate for the nine months ended September 30, 2015 and 2014 was (1)% and 9%, respectively. The 2015 income tax rates vary from the Federal statutory rate primarily due to valuation allowances on the Company's deferred tax assets, the limitation on the deductibility of certain officers' compensation, and foreign and state taxes not based on pre-tax income. The 2014 income tax rates vary from the Federal statutory rate primarily due to non-deductible officers' compensation and changes in the foreign tax valuation allowance.

In the third quarter of 2015 the Company settled an audit with the Internal Revenue Service for an immaterial amount related to its 2009 Research and Experimental ("R&E") tax credit. The Company is not aware of any other significant audits in progress at this time.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update (ASU) 2014-09, "Revenue from Contracts with Customers (Topic 606)," which supersedes nearly all existing revenue recognition guidance under GAAP and permits the use of either the retrospective or cumulative effect transition method. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers: Deferral of the Effective Date, which deferred the effective date of the new revenue standard for periods beginning after December 15, 2016 to December 15, 2017, with early adoption permitted but not earlier than the original effective date. Accordingly, the updated standard is effective for us in the first quarter of fiscal 2018. The Company has not yet selected a transition method and is currently evaluating the effect that the updated standard will have on the Company's consolidated financial statements and related disclosures.

In April 2015, the FASB issued Accounting Standards Update (ASU) 2015-05, "Intangibles - Goodwill and Other Internal-Use Software". The amendments in this update provide guidance to customers about whether a cloud

computing arrangement includes a software license, and if so, how the software license element of the arrangement should be accounted for by the customer. The new standard will be effective for annual period ending after December 15, 2015, and all reporting periods thereafter. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial statements.

In April 2015, the FASB issued Accounting Standards Update (ASU) 2015-03, "Simplifying the Presentations of Debt Issuance Costs", which requires debt issuance cost to be presented in the balance sheet as a direct deduction from the carrying value of the associated debt liability, consistent with the presentation of a debt discount. This new standard will be effective for interim and annual periods beginning on January 1, 2016, and is required to be retrospectively adopted. Adoption of this new standard is not expected to have a material impact on the Company's consolidated balance sheets or related disclosures.

With the exception of the new standards discussed above, there have been no other recent accounting pronouncements or changes in accounting pronouncements during the nine months ended September 30, 2015, as compared to the recent accounting pronouncements described in the Company's Annual Report, that are of significance or potential significance to the Company.

Table of Contents

3. Business Combinations

PROS France SAS (formerly Cameleon Software SA)

In October 2013, the Company entered into a tender offer agreement with Cameleon Software SA (now PROS France, and referred to in this subsection 3 as "Cameleon"), indicating the Company's intent to acquire that company through the tender offer for all of its outstanding share capital in an all-cash tender offer. In January 2014, the Company announced that the initial tender offer for Cameleon was successful and upon completion of the initial tender offer, the Company controlled 81.7% of Cameleon's common stock and 94.0% of Cameleon's outstanding warrants, inclusive of the commitments from Cameleon's management to sell their free shares. As a result of shares purchased by the Company in the market following the completion of the initial tender, the exercise of warrants in July 2014, and the completion of a second tender in November 2014, the Company now controls 100% of Cameleon's common stock. The Company acquired Cameleon for total cash consideration of approximately \$32 million, net of cash acquired.

During the three and nine months ended September 30, 2015, the Company incurred no acquisition-related costs. During the three and nine months ended September 30, 2014, the Company incurred \$0.3 million and \$1.3 million, respectively, consisting primarily of costs for the retention of key employees, advisory and legal fees.

All of the assets acquired and the liabilities assumed in the transaction have been recognized at their acquisition date fair values at January 8, 2014.

The final allocation of the purchase price for Cameleon is as follows (in thousands):

Cash and cash equivalents	\$ 7,086	
Accounts receivable	10,395	
Prepaid and other assets	1,418	
Intangible assets	18,653	
Goodwill	15,717	
Accounts payable and accrued liabilities	(12,539)
Deferred revenue	(5,392)
Non-controlling interest	(6,204)
Net assets acquired	\$ 29,134	

The following are the identifiable intangible assets acquired (in thousands) and their respective useful lives:

	Amount	Useful Life (years)
Trade Name	\$ 1,020	8
Customer Relationships	1,455	2-5
Maintenance Relationships	3,808	8
Developed Technology	11,147	7
Other	1,223	2
Total	\$ 18,653	

In performing the purchase price allocation, the Company considered, among other factors, its anticipated future use of the acquired assets, analysis of historical financial performance, and estimates of future cash flows from Cameleon's products and services. The allocation resulted in acquired intangible assets of \$18.7 million. The acquired intangible assets consisted of developed technology, customer and maintenance relationships, a trade name and other intangible assets and were valued using the income approach in which the after-tax cash flows are discounted to present value. The cash flows are based on estimates used to price the transaction, and the discount rates applied were benchmarked with reference to the implied rate of return from the transaction model as well as the weighted average

cost of capital. Additionally, the Company assumed certain liabilities in the acquisition, including deferred revenue to which a fair value of \$5.4 million was ascribed using a cost-plus profit approach.

Liabilities assumed include \$2.7 million related to the Company's offer to pay an additional €0.15 per share cash premium to the Cameleon stock and warrant holders tendering their shares and warrants in the initial tender offer if the Company acquired

Table of Contents

at least 95% of the share capital and voting rights of Cameleon on a fully diluted basis on or before December 31, 2014. The Company recorded this liability at fair value as the Company expected to meet this threshold prior to December 31, 2014 and ultimately settled the contingent liability related to the share premium in December 2014 for \$2.2 million. In addition, the net assets acquired include contingent consideration of \$1.4 million related to the committed purchase of free shares owned by Cameleon management which was settled in September 2015 for \$1.3 million.

Goodwill of \$15.7 million represents the excess of the purchase price over the fair value of the underlying net tangible and identifiable intangible assets, and represents the expected synergistic benefits of the transaction, the knowledge and experience of Cameleon's workforce in place, and the expectation that the combined company's complementary products will significantly broaden the Company's CPQ solution offering. The Company believes the combined company will benefit from a broader global presence and, with the Company's direct sales force and larger channel coverage, significant cross selling opportunities. Goodwill of \$5.8 million is expected to be currently deductible for tax purposes. In accordance with GAAP, goodwill is not amortized but instead is tested for impairment at least annually, or, more frequently if certain indicators are present. In the event that the management of the combined company determines that the value of goodwill has become impaired, the combined company will incur an accounting charge for the amount of the impairment during the fiscal quarter in which the determination is made.

SignalDemand, Inc.

In December 2013, the Company acquired SignalDemand, Inc. ("SignalDemand") for total cash consideration of \$13.5 million. All of the assets acquired and the liabilities assumed in the transaction were recognized at their acquisition date fair values at December 16, 2013, which included \$7.2 million of goodwill.

Pro Forma Financial Information

The unaudited financial information in the table below summarizes the combined results of operations of the Company and Cameleon, on a pro forma basis, as though the Company had acquired Cameleon on January 1, 2013. The pro forma information for all periods presented also includes the effect of business combination accounting resulting from the acquisition, including amortization charges from acquired intangible assets.

	Three months ended September 30, 2014		Nine months ended September 30, 2014	
(in thousands, except earnings per share)				
Total revenue	\$46,719		\$132,252	
Net loss attributable to PROS Holdings, Inc.	(3,734)	(19,317)
Loss per share - basic and diluted	\$(0.13)	\$(0.67)

4. Earnings per Share

The following table sets forth the computation of basic and diluted earnings per share for the three and nine months ended September 30, 2015 and 2014:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
(in thousands, except per share data)	2015	2014	2015	2014
Numerator:				
Net loss attributable to PROS Holdings, Inc.	\$(18,182) \$(3,734) \$(48,080) \$(19,185
Denominator:				
Weighted average shares (basic)	29,649	29,000	29,530	28,875
Dilutive effect of potential common shares	—	—	—	—

Edgar Filing: PROS Holdings, Inc. - Form 10-Q

Weighted average shares (diluted)	29,649	29,000	29,530	28,875
Basic loss per share	\$(0.61) \$(0.13) \$(1.63) \$(0.66
Diluted loss per share	\$(0.61) \$(0.13) \$(1.63) \$(0.66

Dilutive potential common shares consist of shares issuable upon the exercise of stock options, settlement of SARs, and the vesting of RSUs and MSUs. Potential common shares determined to be antidilutive and excluded from diluted weighted average shares outstanding were approximately 2.2 million and 2.0 million for the three months ended September 30, 2015 and 2014,

Table of Contents

respectively, and 2.1 million and 1.9 million for the nine months ended September 30, 2015 and 2014. Basic shares were used to calculate loss per share for the three and nine months ended September 30, 2015 and 2014.

Since the Company intends to settle the principal amount of its Senior Notes (see Note 6) in cash, the treasury stock method is expected to be used for calculating any potential dilutive effect of the conversion spread on diluted net income per share, if applicable. The conversion spread will have a dilutive impact on diluted net income per share of common stock when the average market price of common stock for a given period exceeds the conversion price of \$33.79 per share.

5. Noncash Share-based Compensation

During the three months ended September 30, 2015, the Company granted 12,822 RSUs with a weighted average grant-date fair value of \$21.14 per share. The Company did not grant any stock options, SARs or MSUs during the three months ended September 30, 2015.

During the nine months ended September 30, 2015, the Company granted 949,552 RSUs with a weighted average grant-date fair value of \$25.41 per share. The Company granted 131,400 MSUs with a weighted average grant-date fair value of \$32.45 to certain executive employees during the nine months ended September 30, 2015. These MSUs vest on January 1, 2018 and March 3, 2018, respectively, and the actual number of MSUs that will be eligible to vest is based on the total stockholder return of the Company relative to the total stockholder return of the Index over the Performance Period, as defined by each award's plan documents or individual award agreements. The Company did not grant any stock options or SARs during the nine months ended September 30, 2015.

Share-based compensation expense is allocated to expense categories on the unaudited condensed consolidated statements of comprehensive income (loss). The following table summarizes share-based compensation expense included in the Company's unaudited condensed consolidated statements of comprehensive income (loss) for the three and nine months ended September 30, 2015 and 2014:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2015	2014	2015	2014
Share-based compensation:				
Cost of revenue	\$852	\$864	\$2,896	\$2,546
Operating expenses:				
Selling and marketing	2,229	1,769	6,541	4,693
General and administrative	2,280	2,198	8,000	5,715
Research and development	1,270	1,244	3,944	3,425
Total included in operating expenses	5,779	5,211	18,485	13,833
Total share-based compensation expense	\$6,631	\$6,075	\$21,381	\$16,379

In January 2015, the number of shares available for issuance increased by 900,000 to 9,068,000 under an evergreen provision in the Company's 2007 Equity Incentive Plan ("2007 Stock Plan"). As of September 30, 2015, 984,527 shares remained available for issuance under the 2007 Stock Plan.

At September 30, 2015, the Company had an estimated \$48.1 million of total unrecognized compensation costs related to share-based compensation arrangements. These costs will be recognized over a weighted average period of 2.5 years.

In June 2013, the Board of Directors authorized an Employee Stock Purchase Plan ("ESPP") which provides for eligible employees to purchase shares on an after-tax basis in an amount between 1% and 10% of their annual pay: (i)

on June 30 of each year at a 5% discount of the fair market value of the Company's common stock on January 1 or June 30, whichever is lower, and (ii) on December 31 of each year at a 5% discount of the fair market value of the Company's common stock on July 1 or December 31, whichever is lower. An employee may not purchase more than \$5,000 in either of the six-month measurement periods described above or more than \$10,000 annually. During the quarter ended September 30, 2015, the Company issued 22,812 shares under the ESPP. As of September 30, 2015, 449,003 shares remain authorized and available for issuance under the ESPP. As of September 30, 2015, the Company held approximately \$0.3 million on behalf of employees for future purchases under the ESPP, and this amount was recorded in accrued liabilities in the Company's unaudited condensed consolidated balance sheet.

6. Convertible Senior Notes

Table of Contents

2.0% Convertible Senior Notes Due December 1, 2019

In December 2014, the Company issued \$143.8 million aggregate principal amount of 2% convertible Senior Notes (the "Senior Notes") due December 1, 2019, unless earlier purchased by the Company or converted. Interest is payable semiannually in arrears on June 1 and December 1 of each year, commencing on June 1, 2015.

The Senior Notes are governed by an Indenture between the Company, as issuer, and Wilmington Trust, National Association, as trustee. The Senior Notes are the Company's general unsecured obligations and will rank senior in right of payment to all of the Company's indebtedness that is expressly subordinated in right of payment to the Senior Notes, will rank equally in right of payment with all of Company's existing and future liabilities that are not so subordinated, will be effectively junior to any of the Company's secured indebtedness to the extent of the value of the assets securing such indebtedness and will be structurally subordinated to all indebtedness and other liabilities (including trade payables but excluding intercompany obligations owed to the Company or its subsidiaries).

Upon conversion of the Senior Notes, the Company will pay or deliver, as the case may be, cash, shares of the Company's common stock or a combination of cash and shares of common stock, at the Company's election.

The initial conversion rate for the Senior Notes will be 29.5972 shares of common stock per \$1,000 in principal amount of Senior Notes, equivalent to a conversion price of approximately \$33.79 per share of common stock. Throughout the term of the Senior Notes, the conversion rate may be adjusted upon the occurrence of certain events. Holders of the Senior Notes will not receive any cash payment representing accrued and unpaid interest upon conversion. Accrued but unpaid interest will be deemed to be paid in full upon conversion rather than canceled, extinguished or forfeited. Holders may convert their Senior Notes at their option at any time prior to the close of business on the business day immediately preceding September 1, 2019 only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ending on March 31, 2015, if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five consecutive business day period immediately following any five consecutive trading day period in which the trading price per \$1,000 principal amount of Senior Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of the Company's common stock and the conversion rate on each such trading day; or
- upon the occurrence of specified corporate events.

On or after September 1, 2019 to the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert all or any portion of their Senior Notes regardless of the above. Upon conversion, the Company will pay or deliver cash, shares of its common stock or a combination of cash and shares of its common stock, at its election, as described in the indenture.

As of September 30, 2015, the Senior Notes are not yet convertible.

In accounting for the issuance of the Senior Notes, the Company separated the Senior Notes into liability and equity components. The carrying amount of the liability component was calculated by measuring the fair value of a similar liability that does not have an associated convertible feature. The carrying amount of the equity component representing the conversion option was determined by deducting the fair value of the liability component from the face value of the Senior Notes as a whole. The excess of the principal amount of the liability component over its carrying amount ("debt discount") is amortized to interest expense over the term of the Senior Notes. The equity

component is not remeasured as long as it continues to meet the conditions for equity classification.

In accounting for the transaction costs related to the Senior Notes issuance, the Company allocated the total amount incurred to the liability and equity components based on their relative values. Issuance costs attributable to the liability component, totaling \$4.3 million, are being amortized to expense over the term of the Senior Notes using the effective interest method, and issuance costs attributable to the equity component, totaling \$1.2 million, were netted with the equity component in stockholders' equity. Additionally, the Company recorded an immaterial deferred tax asset on a portion of the equity component transaction costs which are deductible for tax purposes.

Table of Contents

The Senior Notes consist of the following (in thousands):

	September 30, 2015	December 31, 2014
Liability component:		
Principal	\$ 143,750	\$ 143,750
Less: debt discount, net of amortization	(28,903) (33,302
Net carrying amount	\$ 114,847	\$ 110,448
Equity component (1)	\$ 28,714	\$ 28,714

(1) Recorded in the consolidated balance sheet within additional paid-in capital, net of \$1.2 million issuance cost in equity.

The following table sets forth total interest expense recognized related to the Senior Notes (in thousands):

	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2015
2.0% coupon	\$ 719	\$ 2,157
Amortization of debt issuance costs	199	592
Amortization of debt discount	1,316	3,893
Total	\$ 2,234	\$ 6,642

As of September 30, 2015, the fair value of the Senior Notes was \$113.6 million. The fair value was determined based on inputs that are observable in the market or that could be derived from, or corroborated with, observable market data, including the Company's stock price, interest rates and carrying value of the debt instrument (carrying value excludes the equity component of the Company's convertible notes classified in equity), which represents level 2 in the fair value hierarchy.

Note Hedge

To minimize the impact of potential economic dilution upon conversion of the Senior Notes, the Company entered into convertible note hedge transactions with respect to its common stock (the "Note Hedge"). In December 2014, the Company paid an aggregate amount of \$29.4 million for the Note Hedge. The Note Hedge will expire upon maturity of the Senior Notes. The Note Hedge is intended to offset the potential dilution upon conversion of the Senior Notes and/or offset any cash payments the Company is required to make in excess of the principal amount upon conversion of the Senior Notes in the event that the market value per share of the Company's common stock, as measured under the Senior Notes, is greater than the strike price of the Note Hedge, which initially corresponds to the conversion price of the Notes and is subject to anti-dilution adjustments substantially similar to those applicable to the conversion rate of the Senior Notes. The Note Hedge is a separate transaction, entered into by the Company and is not part of the Senior Notes or the Warrant, and has been accounted for as part of additional paid-in capital.

Warrant

Separately, in December 2014, the Company entered into warrant transactions (the "Warrant"), whereby the Company sold warrants to acquire shares of the Company's common stock at a strike price of \$45.48 per share. The Company received aggregate proceeds of \$17.1 million from the sale of the Warrant. If the average market value per share of the Company's common stock for the reporting period, as measured under the Warrant, exceeds the strike price of the Warrant, the Warrant will have a dilutive effect on the Company's earnings per share. The Warrant is a separate transaction, entered into by the Company and is not part of the Senior Notes or the Note Hedge, and has been accounted for as part of additional paid-in capital. Holders of the Senior Notes and Note Hedge will not have any rights with respect to the Warrant.

7. Commitments and Contingencies

Litigation

In the ordinary course of business, the Company regularly becomes involved in contract and other negotiations and, in more limited circumstances, becomes involved in legal proceedings, claims and litigation. The outcomes of these matters are inherently unpredictable. The Company is not currently involved in any outstanding litigation that it believes, individually or in the aggregate, will have a material adverse effect on its business, financial condition, results of operations or cash flows.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The terms “we,” “us,” “PROS“ and “our” refer to PROS Holdings, Inc. and all of its subsidiaries that are consolidated in conformity with generally accepted accounting principles in the United States.

This management's discussion and analysis of financial condition and results of operations should be read along with the unaudited condensed consolidated financial statements and unaudited notes to condensed consolidated financial statements included in Item 1 of this Quarterly Report on Form 10-Q, as well as the audited consolidated financial statements and notes to consolidated financial statements and management's discussion and analysis of financial condition and results of operations set forth in our Annual Report.

Overview

PROS is a revenue and profit realization company that helps B2B and B2C customers realize their potential through the blend of simplicity and data science. PROS offers solutions to help accelerate sales, formulate winning pricing strategies and align product, demand and availability. PROS revenue and profit realization solutions are designed to allow customers to experience meaningful revenue growth, sustained profitability and modernized business processes.

Revenue by Geography

The following geographic information is presented for the three and nine months ended September 30, 2015 and 2014. PROS categorizes geographic revenues based on the location of the customer's headquarters.

	For the Three Months Ended September 30,				For the Nine Months Ended September 30,				
	2015		2014		2015		2014		
	Revenue	Percent	Revenue	Percent	Revenue	Percent	Revenue	Revenue	
United States of America	\$16,277	40	% \$14,880	32	% \$49,751	39	% \$53,736	41	%

Opportunities, Trends and Uncertainties

The opportunities, trends and uncertainties that we believe are particularly significant to understand our financial results and condition are:

Variability in revenue. The timing of our revenue recognition varies based on the nature and requirements of our contracts. In 2014, approximately one-half of our contracts were for perpetual licenses, which enabled us to recognize the associated license revenue upon contract execution and software delivery. In conjunction with our cloud-first announcement earlier this year, we expect to have an increasing number of subscription contracts, which will result in less license revenue recognized upon contract execution and software delivery in 2015. As we continue to emphasize our SaaS and cloud-based offerings over perpetual offerings, near term year over year comparisons will likely be muted due to the differences in revenue recognition. Over time, we expect the revenue impact of our shift to cloud-first to adjust, and year over year comparisons will become more comparable and favorable.

Cloud-first strategy. We have historically sold the majority of our products via perpetual licenses. In addition, on limited occasions, we also sold our solutions via term license or SaaS and cloud-based offerings, which defers revenue recognition. In connection with our previously announced cloud-first strategy, we expect customers will

purchase a lower percentage of perpetual licenses and more subscription-based solutions such as SaaS and cloud-based offerings. Following a transition period, we expect this business model will increase our recurring revenue. For 2015, we anticipate that this strategy will

18

Table of Contents

result in lower license revenue and total revenues than originally anticipated. However, we do not anticipate a corresponding decrease in expenses in 2015, which will adversely affect our net income and operating margins.

Growth opportunities. We believe the market for our big data software applications for pricing and sales effectiveness is underpenetrated. Market interest for our software has increased over the past several years providing us with growth opportunities. We have and will continue to invest in our business to more effectively address these opportunities through significant investment in professional services, research and development, sales, marketing and support functions. In addition to organic growth, we have acquired, and may continue to acquire companies or technologies that can contribute to the strategic, operational and financial growth of our business. We expect to continue to explore both organic and inorganic growth opportunities.

Managing our continued growth. Since 2012, we have significantly grown our revenues and operations, including our sales and marketing personnel. Our continued success depends on, among other things, our ability to successfully recruit, train and retain personnel to execute our sales and marketing strategies; to execute on our recently announced cloud-first strategy; successfully integrate the operations and personnel of companies we have acquired or may acquire; appropriately manage our expenses as we grow; enter into and maintain beneficial channel relationships; and develop new products. If we are not able to execute on these actions, our business may not grow as we anticipate.

Uncertain global economic conditions. During fiscal 2014, the global economic environment continued to show signs of improvement. However, there remain concerns and uncertainty about the strength of the recovery, future domestic and global economic growth, and the global financial system including numerous ongoing geopolitical issues around the globe. During uncertain economic conditions, we generally experience longer sales cycles, increased scrutiny on purchasing decisions and overall cautiousness taken by customers. In addition, certain foreign countries are still facing significant economic and political crises, and it is possible that these crises could result in economic deterioration in the markets in which we operate. This economic uncertainty may negatively affect the overall demand environment in fiscal 2015, particularly in Europe. We believe that our expanded offerings of industry-specific solutions and innovative technology will enable us to stay competitive in a challenging economic environment and outperform the broader market as business leaders continue to focus on projects that quickly deliver value, however the extent to which the current economic conditions will further affect our business is uncertain.

Effective tax rate. The income tax rates vary from the federal and state statutory rates due to the valuation allowances on our deferred tax assets and foreign withholding taxes; changing tax laws, regulations, and interpretations in multiple jurisdictions in which we operate; changes to the financial accounting rules for income taxes; unanticipated changes in tax rates; differences in accounting and tax treatment of our equity-based compensation and the tax effects of purchase accounting for acquisitions.

Table of Contents

License revenue. For the three months ended September 30, 2015, license revenue decreased \$5.9 million to \$6.0 million from \$11.8 million for the three months ended September 30, 2014, representing a 50% decrease. Our license revenue is dependent on the amount of perpetual licenses sold in the period, as well as the timing of revenue recognition. As a result of our shift to a cloud-first strategy, we experienced a decrease in license revenue, which included a decrease of \$0.5 million in license revenue recognized upon software delivery. We recognized \$0.9 million and \$1.4 million of license revenue upon software delivery for the three months ended September 30, 2015 and 2014, respectively. For the nine months ended September 30, 2015 license revenue decreased \$9.5 million to \$26.6 million, from \$36.0 million for the nine months ended September 30, 2014, representing a 26% decrease. The decrease in license revenue included a decrease of \$3.5 million in license revenue recognized upon software delivery. We recognized \$7.6 million and \$11.1 million of license revenue upon software delivery for the nine months ended September 30, 2015 and 2014, respectively. As a result of our shift to a cloud-first strategy, we expect that customers will be purchasing a lower percentage of perpetual licenses and more subscription-based solutions such as SaaS and cloud-based offerings, resulting in lower future license revenue.

Services revenue. For the three months ended September 30, 2015, services revenue decreased \$1.5 million to \$12.3 million from \$13.8 million for the three months ended September 30, 2014, representing a 11% decrease. For the nine months ended September 30, 2015 services revenue decreased \$6.9 million to \$32.1 million from \$39.0 million, representing a 18% decrease. The decrease in services revenue was primarily attributable to several implementations that were completed in 2014 with significant professional services and to a lesser extent recent pre-packaged offerings requiring less professional services and overall lower effective man-day rates. The total number of customers generating services revenue was 136 for the three months ended September 30, 2015, as compared to 128 for the three months ended September 30, 2014, an increase of 6%; and 193 for the nine months ended September 30, 2015, as compared to 167 in the corresponding period in 2014, an increase of 16%.

Subscription revenue. Subscription revenue increased \$0.1 million to \$6.9 million for the three months ended September 30, 2015, from \$6.8 million for the three months ended September 30, 2014, representing a 2% increase. For the nine months ended September 30, 2015, subscription revenue increased \$4.1 million to \$21.0 million from \$16.9 million for the nine months ended September 30, 2014, representing a 24% increase. The increase in subscription revenue was primarily attributable to an increase in the number of customers subscribing to our cloud-based services. The total number of customers generating subscription revenue was 88 for the three months ended September 30, 2015, as compared to 81 for the three months ended September 30, 2014, an increase of 9%, and 96 for the nine months ended September 30, 2015, as compared to 86 in the corresponding period in 2014, an increase of 12%. We expect our subscription revenue will continue to increase as a result of our shift to a cloud-first strategy.

Maintenance and support. Maintenance and support revenue increased \$1.4 million to \$15.7 million for the three months ended September 30, 2015, from \$14.3 million for the three months ended September 30, 2014, representing a 10% increase. For the nine months ended September 30, 2015, maintenance and support revenue increased \$6.5 million to \$46.6 million from \$40.1 million for the nine months ended September 30, 2014, representing a 16% increase. The increase in maintenance and support revenue was principally a result of an increase in the number of customers purchasing maintenance and support services as a result of customers licensing our software.

Cost of revenue and gross profit:

(Dollars in thousands)	For the Three Months Ended September 30,				For the Nine Months Ended September 30,					
	2015	2014	Variance		2015	2014	Variance			
			\$	%			\$	%	%	
Cost of license	\$51	\$64	\$(13)	(20)%	\$242	\$191	\$51	27	%	
Cost of services	9,138	10,152	(1,014)	(10)%	27,064	29,506	(2,442)	(8)	%	
Cost of subscription	3,105	1,523	1,582	104	%	9,330	6,015	3,315	55	%

Edgar Filing: PROS Holdings, Inc. - Form 10-Q

Total cost of license, services and subscription	12,294	11,739	555	5	%	36,636	35,712	924	3	%
Cost of maintenance and support	2,972	2,538	434	17	%	9,361	7,864	1,497	19	%
Total cost of revenue	15,266	14,277	989	7	%	45,997	43,576	2,421	6	%
Gross profit	\$25,600	\$32,442	\$(6,842)	(21)	%	\$80,237	\$88,424	\$(8,187)	(9)	%

Cost of license. Cost of license consists of third-party fees for licensed software. The cost of license was approximately \$0.1 million for each of the three months ended September 30, 2015 and 2014, and approximately \$0.2 million for each of the

Table of Contents

nine months ended September 30, 2015 and 2014. License gross profit percentages for the three and nine months ended September 30, 2015 and 2014, remained relatively unchanged as a result of limited third-party fees for licensed software incurred over both periods.

Cost of services. Cost of services decreased \$1.0 million to \$9.1 million for the three months ended September 30, 2015, from \$10.2 million for the three months ended September 30, 2014, representing a 10% decrease. For the nine months ended September 30, 2015, cost of services decreased \$2.4 million to \$27.1 million from \$29.5 million, representing a 8% decrease. The three and nine month decrease was primarily attributable to a decrease in personnel costs used in our software implementations of \$0.8 million and \$2.1million, respectively, and a decrease in other overhead expenses of \$0.2 million and \$0.3 million, respectively. Services gross profit percentages for both the three months ended September 30, 2015 and 2014, were 26%. Services gross profit percentages for the nine months ended September 30, 2015 and 2014, were 16% and 24%, respectively. The percent decrease in services gross profit was primarily driven by the completion of several implementations in 2014 with higher professional services man-day rates and lower professional services utilization in the nine month period ended September 30, 2015. Service gross profit percentages can vary from period to period depending on different factors, including the level of professional services required to implement our offerings and the utilization of our professional services personnel.

Cost of subscription. Cost of subscription increased \$1.6 million to \$3.1 million for the three months ended September 30, 2015, from \$1.5 million for the three months ended September 30, 2014, representing a 104% increase. For the nine months ended September 30, 2015, cost of subscription increased \$3.3 million to \$9.3 million from \$6.0 million, representing a 55% increase. The three and nine month increase was primarily attributable to a \$0.7 million and \$1.7 million, respectively, increase of personnel costs and a \$0.9 million and \$1.6 million, respectively, increase in infrastructure costs to support our current and anticipated future subscription customer base. The subscription gross profit percentage for the three months ended September 30, 2015 and 2014, was 55% and 78%, respectively. The subscription gross profit percentage for the nine months ended September 30, 2015 and 2014, was 55% and 64%, respectively.

Cost of maintenance and support. Cost of maintenance and support increased \$0.4 million to \$3.0 million for the three months ended September 30, 2015, from \$2.5 million for the three months ended September 30, 2014, representing a 17% increase. For the nine months ended September 30, 2015, cost of maintenance and support increased \$1.5 million to \$9.4 million from \$7.9 million, representing a 19% increase. The increase in cost of maintenance and support was attributable to an increase in personnel costs associated with the continued growth in our customer maintenance and support function commensurate with our maintenance and support revenue growth. The maintenance and support gross profit percentage was 81% and 82% for the three months ended September 30, 2015 and 2014, respectively. The maintenance and support gross profit percentage was 80% for both the nine months ended September 30, 2015 and 2014.

Gross profit. Gross profit decreased \$6.8 million to \$25.6 million for the three months ended September 30, 2015, from \$32.4 million for the three months ended September 30, 2014, representing a 21% decrease. The decrease in overall gross profit was primarily attributable to a 13% decrease in total revenue for the same period.

Gross profit decreased \$8.2 million to \$80.2 million for the nine months ended September 30, 2015 from \$88.4 million for the nine months ended September 30, 2014, representing a 9% decrease. The decrease in overall gross profit was primarily attributable to a 4% decrease in total revenue for the same period.

Selling and marketing expenses. Selling and marketing expenses increased \$4.4 million to \$19.6 million for the three months ended September 30, 2015 from \$15.3 million for the three months ended September 30, 2014, representing a 29% increase. The increase was primarily attributable to an increase of \$1.8 million in personnel costs. Personnel costs, which include our employees and third party contractors, increased primarily as a result of an increase in headcount in sales and marketing to support

Table of Contents

our current and future growth objectives. Included in the increase in personnel costs was an increase of \$0.5 million of noncash share-based compensation, \$0.3 million increase in severance expense and \$0.2 million increase in sales commissions. The remaining increase of \$2.6 million related to non-personnel costs which primarily included an increase of \$1.6 million in sales and marketing events, \$0.7 million increase in amortization expense on certain intangible assets that became fully amortized and \$0.3 million in facility, travel and other overhead expenses.

Selling and marketing expenses increased \$11.0 million to \$55.8 million for the nine months ended September 30, 2015 from \$44.9 million for the nine months ended September 30, 2014, representing a 24% increase. The increase was primarily attributable to an increase of \$6.2 million in personnel costs, which included an increase of \$1.9 million of noncash share-based compensation, an increase of \$0.6 million in sales commissions and \$0.1 million increase in severance expense. The remaining increase of \$4.8 million related to non-personnel costs which included an increase of \$3.0 million in sales and marketing events, \$1.4 million in travel expenses, \$0.7 million increase in amortization expense on certain intangible assets that became fully amortized, \$0.1 million in facility and other overhead expenses partially offset by a decrease of \$0.4 million in recruiting expenses.

General and administrative expenses. General and administrative expenses increased \$0.5 million to \$9.6 million for the three months ended September 30, 2015 from \$9.2 million for the three months ended September 30, 2014, representing a 5% increase. The increase was primarily attributable to an increase of \$0.5 million in personnel costs, which included a noncash share-based compensation expense of \$0.1 million. Personnel costs, which include our employees and third party contractors, increased as a result of an increase in headcount in general and administrative to support our current and future growth objectives.

General and administrative expenses increased \$3.5 million to \$29.8 million for the nine months ended September 30, 2015 from \$26.3 million for the nine months ended September 30, 2014, representing a 13% increase. The increase was attributable to an increase of \$4.0 million of personnel costs, primarily related to \$2.3 million increase in noncash share-based compensation expense, which included an acceleration of noncash share-based compensation expense of \$1.1 million in the first quarter of 2015 due to the change in employment status for our former Chief Financial Officer. The increase in personnel cost was partially offset by a decrease in non-personnel cost of \$0.5 million, which primarily included a \$0.4 million decrease in professional fees and a \$0.1 million decrease in facility and other overhead expenses.

Research and development expenses. Research and development expenses increased \$1.1 million to \$12.2 million for the three months ended September 30, 2015, from \$11.1 million for the three months ended September 30, 2014, representing a 10% increase. The increase was attributable to an increase of \$0.5 million of personnel costs which was due primarily to an increase in severance expenses of \$0.4 million. The remaining increase of \$0.6 million was primarily attributable to facility and other overhead expenses.

Research and development expenses increased \$2.5 million to \$35.1 million for the nine months ended September 30, 2015 from \$32.6 million for the nine months ended September 30, 2014, representing a 8% increase. The increase was attributable to an increase of \$1.7 million of personnel costs which was due primarily to an increase in noncash share based compensation of \$0.5 million and an increase of \$0.4 million of severance expenses. The remaining increase of \$0.8 million was primarily attributable to an increase of facility and other overhead expenses.

Acquisition-related expenses. Acquisition-related expenses were zero for both the three and nine months ended September 30, 2015. Acquisition-related expenses were \$0.6 million and \$2.6 million for the three and nine months ended September 30, 2014, respectively, which consisted primarily of retention bonuses, advisory and legal fees, accounting and other professional fees related to our acquisition and integration of PROS France and SignalDemand.

Edgar Filing: PROS Holdings, Inc. - Form 10-Q

Impairment charge. During the quarter ended June 30, 2014, we recorded a \$2.1 million impairment charge related to internally developed software. The impairment resulted from a reduction of projected cash flows for a product group based on revisions to our projections during the quarter and was recorded to reduce the carrying value to fair value. This reflected changes to our plans for this product group in connection with the integration of our acquisitions.

Other expense, net:

(Dollars in thousands)	For the Three Months Ended September 30,		Variance		For the Nine Months Ended September 30,		Variance

Other expense, net	\$(152)	\$(466)	\$314	(67)%	\$(571)	\$(2,009)	\$1,438	(72)%

Table of Contents

Convertible debt interest and amortization. The convertible debt expense for the three and nine months ended September 30, 2015 related to coupon interest and amortization of debt discount and issuance costs attributable to our Senior Notes issued in December 2014.

Other expense, net. Other expense, net decreased by \$0.3 million during the three months ended September 30, 2015, primarily due to the reduced impact of movements in foreign currency exchange rates during the period.

Other expense, net decreased by \$1.4 million during the nine months ended September 30, 2015, primarily due to the reduced impact of movements in foreign currency exchange rates during the period, including foreign currency losses on the restricted cash used for the acquisition of PROS France recognized in 2014.

Income tax (benefit) provision:

(Dollars in thousands)	For the Three Months Ended September 30,				For the Nine Months Ended September 30,								
	2015	2014	Variance		2015	2014	Variance						
			\$	%			\$	%					
Effective tax rate	—	% 6	% n/a	n/a	(1)% 9	% n/a	n/a					
Income tax (benefit) provision	\$(70)	\$(257)	\$187	(73)%	\$410	\$(2,057)	\$2,467	(120)%

Income tax (benefit) provision. Our income tax benefit decreased \$0.2 million to a \$0.1 million for the three months ended September 30, 2015 from a \$0.3 million for the three months ended September 30, 2014. Our income tax provision increased \$2.5 million to a \$0.4 million provision for the nine months ended September 30, 2015 as compared to a benefit of \$2.1 million for the nine months ended September 30, 2014. The \$0.1 million tax benefit and \$0.4 million tax provision for the three and nine months ended September 30, 2015 includes foreign taxes and state taxes not based on pre-tax income. No tax benefit was recognized on jurisdictions with a projected loss for the year due to the valuation allowances on our deferred tax assets.

Our effective tax rate was 0% and 6% for the three months ended September 30, 2015 and 2014, respectively, and our effective tax rate was (1)% and 9% for the nine months ended September 30, 2015 and 2014, respectively. The difference between the effective tax rate and the federal statutory rate of 34% for the three and nine months ended September 30, 2015 was due primarily to valuation allowances on our deferred tax assets and foreign and state taxes not based on pre-tax income. Jurisdictions with a projected loss for the year where no tax benefit can be recognized due to the valuation allowances on our deferred tax assets are excluded from the estimated annual Federal effective tax rate. The impact of such an exclusion could result in higher or lower effective tax rates during a particular quarter.

Liquidity and Capital Resources

At September 30, 2015, we had \$134.9 million of cash and cash equivalents and \$132.7 million of working capital as compared to \$161.0 million of cash and cash equivalents and \$151.9 million of working capital at December 31, 2014.

Our principal sources of liquidity are our cash and cash equivalents, short-term investments, cash flows generated from operations and potential borrowings under our Revolver. To supplement our overall liquidity position, during the quarter ended December 31, 2014, we issued the Senior Notes. Our material drivers or variants of operating cash flow are net income, noncash expenses (principally share-based compensation, intangible amortization and amortization of debt discount and issuance costs) and the timing of periodic invoicing and cash collections related to licenses, subscriptions and support for our software and related services. The primary source of operating cash flows is the collection of accounts receivable from our customers. Our operating cash flows are also impacted by the timing of payments to our vendors and the payments of our other liabilities. We generally pay our vendors and service providers

in accordance with the invoice terms and conditions.

We believe our existing cash, cash equivalents and short-term investments balances, including funds provided by the issuance of our Senior Notes, funds available under our Revolver and our current estimates of future operating cash flows, will provide adequate liquidity and capital resources to meet our operational requirements, anticipated capital expenditures and coupon payments for our Senior Notes for the next twelve months. Our future working capital requirements will depend on many factors, including the operations of our existing business, potential growth of our SaaS and cloud-based services, future acquisitions we might undertake, and expansion into complementary businesses. If such need arises, we may raise additional funds through equity or debt financings.

The following table presents key components of our unaudited condensed consolidated statements of cash flows for the nine months ended September 30, 2015 and 2014:

24

Table of Contents

(Dollars in thousands)	For the Nine Months Ended September 30,	
	2015	2014

Cash and cash equivalents (end of period)	\$134,948	\$40,413

Net cash provided by operating activities. Net cash provided by operating activities for the nine months ended September 30, 2015 was \$6.8 million compared to \$3.1 million for the nine months ended September 30, 2014. The \$3.7 million increase was primarily due to the net impact of working capital changes, primarily driven by accounts receivable collections, partially offset by a \$28.0 million increase in net loss.

Net cash (used in) provided by investing activities. Net cash used in investing activities was \$27.6 million for the nine months ended September 30, 2015 compared to net cash provided by investing activities of \$6.9 million for the nine months ended September 30, 2014. The \$34.5 million increase in net cash used in investing activities was primarily due to \$37.4 million in restricted cash related to the PROS France acquisition provided during the nine months ended September 30, 2014, offset by the net purchases of \$22.5 million short-term investments during the nine months ended September 30, 2015. In addition, purchases of property and equipment decreased by \$1.4 million in the nine months ended September 30, 2015 as compared to the same period in 2014.

Net cash used in financing activities. Net cash used in financing activities was \$5.6 million for the nine months ended September 30, 2015 compared to \$14.7 million for the nine months ended September 30, 2014. The decrease of \$9.1 million was primarily the result of a decrease of \$7.5 million in tax withholding primarily related to no net share settlements of market stock units in 2015, a decrease of \$3.6 million of cash used to purchase additional common shares of PROS France, a payment of contingent consideration related to the PROS France acquisition of \$1.3 million, a \$0.6 million decrease for the exercise of stock options, a payment of debt issuance cost related to the convertible debt of \$0.4 million, offset by \$0.5 million from proceeds from employee stock plans.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material. We do not have any relationships with unconsolidated entities or financial partnerships, such as variable interest entities, that would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Contractual Obligations and Commitments

There have been no material changes to our contractual obligations and commitments disclosed in our Annual Report.

Credit facility

In July 2012, we entered into the Revolver. There were no outstanding borrowings under the Revolver as of September 30, 2015. As of September 30, 2015, we had \$0.1 million of unamortized debt issuance costs related to the Revolver included in other long-term assets in the unaudited condensed consolidated balance sheets. For each of the three and nine months ended September 30, 2015 and 2014, we recorded an immaterial amount of amortization of debt issuance cost which is included in other expense, net in the unaudited condensed consolidated statements of

comprehensive income (loss).

Recent Accounting Pronouncements

See Note 2, “Recent Accounting Pronouncements” of Notes to Unaudited Condensed Consolidated Financial Statements of this Form 10-Q for discussion of recent accounting pronouncements including the respective expected dates of adoption.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Risk

Our contracts are predominately denominated in U.S. dollars. We are exposed to foreign currency exchange risk because we also have contracts denominated in foreign currencies. The effect of a hypothetical 10% adverse change in exchange rates on our foreign denominated receivables as of September 30, 2015 would result in a loss of approximately \$0.2 million. We are also exposed to foreign currency risk due to our French subsidiary, PROS France. A hypothetical 10% adverse change in the value of the U.S. dollar in relation to the Euro, which is the Company's single most significant foreign currency exposure, would have changed revenue for the three and nine months ended September 30, 2015 by approximately \$0.3 million and \$0.8 million, respectively. In addition, we have operating subsidiaries in the United Kingdom, Canada, Germany, and Ireland. However, due to the relatively low volume of payments made and received by the Company through its foreign subsidiaries, we do not believe that we have significant exposure to foreign currency exchange risks. Fluctuations in foreign currency exchange rates could harm our financial results in the future.

We currently do not use derivative financial instruments to mitigate foreign currency exchange risks. We continue to review this matter and may consider hedging certain foreign exchange risks through the use of currency futures or options in future years.

Interest Rate Risk

The Company is exposed to market risk for changes in interest rates related to the variable interest rate on borrowings under the Revolver. As of September 30, 2015, the Company had no borrowings under the Revolver.

Our investment portfolio mainly consists of short-term interest-bearing obligations, including government and investment grade debt securities and money market funds. These securities are classified as available-for-sale and, consequently, are recorded in the unaudited condensed consolidated balance sheets at fair value with unrealized gains or losses reported as a separate component of accumulated other comprehensive income (loss), net of tax. Our investment strategy is focused on the preservation of capital and supporting our working capital requirements. We do not enter into investments for trading or speculative purposes. We believe that we do not have any material exposure to changes in the fair value as a result of changes in interest rates due to the short term nature of our cash equivalents.

As of September 30, 2015, we had \$143.8 million principal amount of Senior Notes outstanding which are fixed rate instruments. Therefore, our results of operations are not subject to fluctuations in interest rates. The fair value of the Senior Notes may change when the market price of our stock fluctuates.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) or 15d-15(e) under the Exchange Act of 1934, as amended (the "Exchange Act") as of September 30, 2015. Based on our evaluation of our disclosure controls and procedures as of September 30, 2015, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding

required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting during the three months ended September 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are a party to legal proceedings and claims arising in the ordinary course of business. We are not currently aware of any such proceedings or claims that we believe will have, individually or in the aggregate, a material adverse effect on our business, financial condition, results of operations or cash flows.

ITEM 1A. RISK FACTORS

Except as detailed below, there have been no material changes to the risk factors as previously disclosed in response to Item 1A in our Annual Report on Form 10-K for the year ended December 31, 2014:

We are experiencing reduced revenues without a corresponding decrease in expenses as a result of our shift to a cloud first strategy, which may continue for longer than we expect if we cannot execute on this strategy effectively.

We expect to derive an increasing portion of our revenues in the future from SaaS and cloud based offerings. This reflects a shift from delivery of our software via on-premise perpetual licenses, to providing our customers the right to access our software in a cloud environment. Our cloud-first strategy requires continued investment in cloud operations, and may give rise to risks that could harm our business, including:

- our revenues are expected to decline as we implement this strategy, which may take longer than we expect;
- although we intend to continue to support our perpetual license customers, our emphasis on a cloud-first strategy may raise concerns among our installed perpetual license customer base and lead to the loss of customers;
- new or existing customers may be reluctant to migrate to a cloud based solution due to the cost, performance, security or privacy concerns associated with our solutions or cloud applications;
- we may incur costs at a higher than forecasted rate as we expand our cloud operations;
- if we experience a security incident, disruption in delivery, or other problems related to our SaaS and cloud based offerings, we could lose customers, be found liable for damages, and incur other losses; and
 - the enterprise cloud computing market is not as mature as the market for on-premise enterprise software, and it is uncertain whether cloud applications will achieve broad acceptance in the enterprise market;
- our sales cycles may be delayed if we need to educate customers about the benefits of our cloud solutions, including technical capabilities, security, privacy, and return on investment; and
- our third-party data center hosting facilities, cloud platform providers, third-party service providers, or other unrelated cloud providers may experience security incidents, disruptions in delivery, or other problems, which could negatively affect the market for our solutions or for cloud applications as a whole.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

We have an ongoing authorization from our Board of Directors to repurchase up to \$15.0 million in shares of our common stock in the open market or through privately negotiated transactions. As of September 30, 2015, \$10.0 million remained available for repurchase under the existing repurchase authorization.

We did not make any purchases of our common stock under this program for the three months ended September 30, 2015.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURE

None.

ITEM 5. OTHER INFORMATION
