

MARINEMAX INC
Form 10-Q
July 31, 2018

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, DC 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE QUARTERLY PERIOD ENDED JUNE 30, 2018.

Commission File Number. 1-14173

MARINEMAX, INC.

(Exact Name of Registrant as Specified in Its Charter)

Florida 59-3496957
(State or Other Jurisdiction of Incorporation or Organization) (I.R.S. Employer Identification Number)

2600 McCormick Drive, Suite 200
Clearwater, Florida 33759
(Address of Principal Executive Offices) (ZIP Code)
727-531-1700

(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Edgar Filing: MARINEMAX INC - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer		Accelerated filer
Non-accelerated filer	(Do not check if a smaller reporting company)	Smaller reporting company
		Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The number of outstanding shares of the registrant's Common Stock on July 27, 2018 was 26,985,409.

MARINEMAX, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

1. COMPANY BACKGROUND:

We are the largest recreational boat and yacht retailer in the United States. We engage primarily in the retail sale, brokerage, and service of new and used boats, motors, trailers, marine parts and accessories and offer slip and storage accommodations in certain locations. In addition, we arrange related boat financing, insurance, and extended service contracts. We also offer the charter of power and sailing yachts in the British Virgin Islands. As of June 30, 2018, we operated through 63 retail locations in 16 states, consisting of Alabama, Connecticut, Florida, Georgia, Maryland, Massachusetts, Minnesota, Missouri, New Jersey, New York, North Carolina, Ohio, Oklahoma, Rhode Island, South Carolina and Texas. Our MarineMax Vacations operation maintains a facility in Tortola, British Virgin Islands.

We are the nation's largest retailer of Sea Ray and Boston Whaler recreational boats and yachts, which are manufactured by Brunswick Corporation ("Brunswick"). Sales of new Brunswick boats accounted for approximately 42% of our revenue in fiscal 2017. Sales of new Sea Ray and Boston Whaler boats, both divisions of Brunswick, accounted for approximately 23% and 17%, respectively, of our revenue in fiscal 2017. Brunswick is a world leading manufacturer of marine products and marine engines. We believe we represented approximately 55% of Brunswick's Sea Ray boat sales, during our fiscal 2017.

In June 2018 Brunswick announced it will discontinue Sea Ray sport yacht and yacht models. Sea Ray sport yacht and yacht models represented approximately 10% of our rolling 12-month revenue in the period ending June 30, 2018. We believe our brand and product diversification should allow us to replace the Sea Ray sport yacht and yacht revenue.

We have dealership agreements with Sea Ray, Boston Whaler, Harris, Meridian, and Mercury Marine, all subsidiaries or divisions of Brunswick. We also have dealer agreements with Italy-based Azimut-Benetti Group's product line for Azimut Yachts. These agreements allow us to purchase, stock, sell, and service these manufacturers' boats and products. These agreements also allow us to use these manufacturers' names, trade symbols, and intellectual properties in our operations.

We have multi-year dealer agreements with Brunswick covering Sea Ray products that appoint us as the exclusive dealer of Sea Ray boats in our geographic markets. We are the exclusive dealer for Boston Whaler through multi-year dealer agreements for many of our geographic markets. In addition, we are the exclusive dealer for Azimut Yachts for the entire United States through a multi-year dealer agreement. Sales of new Azimut boats accounted for approximately 9% of our revenue in fiscal 2017. We believe non-Brunswick brands offer a migration for our existing customer base or fill a void in our product offerings, and accordingly, do not compete with the business generated from our other prominent brands.

As is typical in the industry, we deal with most of our manufacturers, other than Sea Ray, Boston Whaler, Meridian, and Azimut Yachts, under renewable annual dealer agreements, each of which gives us the right to sell various makes and models of boats within a given geographic region. Any change or termination of these agreements, or the agreements discussed above, for any reason, or changes in competitive, regulatory, or marketing practices, including rebate or incentive programs, could adversely affect our results of operations. Although there are a limited number of manufacturers of the type of boats and products that we sell, we believe that adequate alternative sources would be

available to replace any manufacturer other than Sea Ray and Azimut as a product source. These alternative sources may not be available at the time of any interruption, and alternative products may not be available at comparable terms, which could affect operating results adversely.

General economic conditions and consumer spending patterns can negatively impact our operating results. Unfavorable local, regional, national, or global economic developments or uncertainties regarding future economic prospects could reduce consumer spending in the markets we serve and adversely affect our business. Economic conditions in areas in which we operate dealerships, particularly Florida in which we generated approximately 53%, 55%, and 55% of our revenue during fiscal 2015, 2016, and 2017, respectively, can have a major impact on our operations. Local influences, such as corporate downsizing, military base closings, inclement weather such as Hurricane Sandy in 2012 or Hurricanes Harvey and Irma in 2017, environmental conditions, and specific events, such as the BP oil spill in the Gulf of Mexico in 2010, also could adversely affect, and in certain instances have adversely affected, our operations in certain markets.

In an economic downturn, consumer discretionary spending levels generally decline, at times resulting in disproportionately large reductions in the sale of luxury goods. Consumer spending on luxury goods also may decline as a result of lower consumer confidence levels, even if prevailing economic conditions are favorable. As a result, an economic downturn could impact us more than certain of our competitors due to our strategic focus on a higher end of our market. Although we have expanded our operations during periods of stagnant or modestly declining industry trends, the cyclical nature of the recreational boating industry or the lack of

industry growth may adversely affect our business, financial condition, and results of operations. Any period of adverse economic conditions or low consumer confidence is likely to have a negative effect on our business.

Lower consumer spending resulting from a downturn in the housing market and other economic factors adversely affected our business in fiscal 2007, and continued weakness in consumer spending and depressed economic conditions had a substantial negative effect on our business and industry for several years after fiscal 2007. These conditions caused us to substantially reduce our acquisition program, delay new store openings, reduce our inventory purchases, engage in inventory reduction efforts, close a number of our retail locations, reduce our headcount, and amend and replace our credit facility. Acquisitions and new store openings remain important strategies to our company, and we plan to accelerate our growth through these strategies as economic conditions continue to improve. However, we cannot predict the length of unfavorable economic or industry conditions or the extent to which they will continue to adversely affect our operating results nor can we predict the effectiveness of the measures we have taken to address this environment.

2. BASIS OF PRESENTATION:

These unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information, the instructions to Quarterly Report on Form 10-Q, and Rule 10-01 of Regulation S-X and should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended September 30, 2017. Accordingly, these unaudited condensed consolidated financial statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. All adjustments, consisting of only normal recurring adjustments considered necessary for fair presentation, have been reflected in these unaudited condensed consolidated financial statements. As of June 30, 2018, our financial instruments consisted of cash and cash equivalents, accounts receivable, accounts payable, customer deposits, and short-term borrowings. The carrying amounts of our financial instruments reported on the balance sheet as of June 30, 2018, approximated fair value due either to length to maturity or existence of variable interest rates, which approximate prevailing market rates. The operating results for the three and nine months ended June 30, 2018, are not necessarily indicative of the results that may be expected in future periods.

The preparation of unaudited condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the unaudited condensed consolidated financial statements and the reported amounts of revenue and expenses during the reporting periods. Significant estimates made by us in the accompanying unaudited condensed consolidated financial statements include valuation allowances, valuation of goodwill and intangible assets, valuation of long-lived assets, and valuation of accruals. Actual results could differ from those estimates.

Unless the context otherwise requires, all references to “MarineMax” mean MarineMax, Inc. prior to its acquisition of five previously independent recreational boat dealers in March 1998 (including their related real estate companies) and all references to the “Company,” “our company,” “we,” “us,” and “our” mean, as a combined company, MarineMax, Inc. and the 28 recreational boat dealers, two boat brokerage operations, and two full-service yacht repair operations acquired as of June 30, 2018 (the “acquired dealers,” and together with the brokerage and repair operations, “operating subsidiaries” or the “acquired companies”).

In order to provide comparability between periods presented, certain amounts have been reclassified from the previously reported unaudited condensed consolidated financial statements to conform to the unaudited condensed consolidated financial statement presentation for the current period. The unaudited condensed consolidated financial statements include our accounts and the accounts of our subsidiaries, all of which are wholly owned. All significant intercompany transactions and accounts have been eliminated.

3. NEW ACCOUNTING PRONOUNCEMENTS:

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09"), a converged standard on revenue recognition. The new pronouncement requires revenue recognition to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance also specifies the accounting for some costs to obtain or fulfill a contract with a customer, as well as enhanced disclosure requirements. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Early adoption is permitted for annual reporting periods beginning after December 15, 2016. While we have not completed the implementation process, we currently do not believe the adoption of this standard will have a material impact on our unaudited condensed consolidated financial statements, or will cause a significant change to our current accounting policies or internal control over financial reporting for revenue recognition on boat, motor, and trailer sales, brokerage commissions, slip and storage services, charter rentals, and fee income generated from

finance and insurance products. However, the timing of revenue recognition for certain parts and service operations will be accelerated, as we have determined these performance obligations are satisfied over time under the new standard. We currently anticipate adopting the standard using the modified retrospective approach applied only to contracts not completed as of the date of adoption, with no restatement of comparative periods and if material a cumulative effect adjustment recognized as of the date of adoption. We plan to adopt ASU 2014-09 in fiscal 2019.

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842)” (“ASU 2016-02”). This update requires organizations to recognize lease assets and lease liabilities on the balance sheet and also disclose key information about leasing arrangements. ASU 2016-02 is effective for annual reporting periods beginning on or after December 15, 2018, and interim periods within those annual periods. Earlier application is permitted for all entities as of the beginning of an interim or annual period. While we are continuing to evaluate the impact of the adoption of ASU 2016-02 on our unaudited condensed consolidated financial statements, we believe the adoption of ASU 2016-02 may have a significant and material impact to our unaudited condensed consolidated balance sheet given our current lease agreements for our leased retail locations. We are currently evaluating the impact the adoption of ASU 2016-02 will have on our other unaudited condensed consolidated financial statements. Based on a preliminary assessment, we expect that most of our operating lease commitments will be subject to the new guidance and recognized as operating lease liabilities and right-of-use assets upon adoption, resulting in a material increase in the assets and liabilities recorded on our unaudited condensed consolidated balance sheet. We are continuing our assessment, which may identify additional impacts this standard will have on our consolidated financial statements and related disclosures and internal control over financial reporting. We plan to adopt ASU 2016-02 in fiscal 2020.

In January 2017, the FASB issued ASU 2017-04, “Simplifying the Test for Goodwill Impairment (Topic 350)” (“ASU 2017-04”). This update removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step 2 of the goodwill impairment test. As a result, under ASU 2017-04, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit’s fair value; however, the impairment loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. This guidance is effective prospectively for fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed after January 1, 2017. The adoption of ASU 2017-04 is not expected to have a significant impact on the Company’s unaudited condensed consolidated financial statements or internal control over financial reporting.

4. REVENUE RECOGNITION:

We recognize revenue from boat, motor, and trailer sales, and parts and service operations at the time the boat, motor, trailer, or part is delivered to or accepted by the customer or the service is completed. We recognize deferred revenue from service operations and slip and storage services on a straight-line basis over the term of the contract as services are completed. We recognize commissions earned from a brokerage sale at the time the related brokerage transaction closes. We recognize income from the rentals of chartering power and sailing yachts on a straight-line basis over the term of the contract as services are completed. We recognize commissions earned by us for placing notes with financial institutions in connection with customer boat financing when we recognize the related boat sales. We recognize marketing fees earned on credit, life, accident, disability, gap, and hull insurance products sold by third-party insurance companies at the later of customer acceptance of the insurance product as evidenced by contract execution or when the related boat sale is recognized. Pursuant to negotiated agreements with financial and insurance

institutions, we are charged back for a portion of these fees should the customer terminate or default on the related finance or insurance contract before it is outstanding for a stipulated minimum period of time. We base the chargeback allowance, which was not material to the unaudited condensed consolidated financial statements taken as a whole as of June 30, 2018, on our experience with repayments or defaults on the related finance or insurance contracts.

We also recognize commissions earned on extended warranty service contracts sold on behalf of third-party insurance companies at the later of customer acceptance of the service contract terms as evidenced by contract execution or recognition of the related boat sale. We are charged back for a portion of these commissions should the customer terminate or default on the service contract prior to its scheduled maturity. We determined the chargeback allowance, which was not material to the unaudited condensed consolidated financial statements taken as a whole as of June 30, 2018, based upon our experience with terminations or defaults on the service contracts.

5. INVENTORIES:

Inventory costs consist of the amount paid to acquire inventory, net of vendor consideration and purchase discounts, the cost of equipment added, reconditioning costs, and transportation costs relating to acquiring inventory for sale. We state new and used boat, motor, and trailer inventories at the lower of cost, determined on a specific-identification basis, or net realizable value. We state parts

and accessories at the lower of cost, determined on an average cost basis, or net realizable value. We utilize our historical experience, the aging of the inventories, and our consideration of current market trends as the basis for determining a lower of cost or net realizable value valuation allowance. As of September 30, 2017 and June 30, 2018, our lower of cost or net realizable value valuation allowance for new and used boat, motor, and trailer inventories was \$1.8 million and \$2.5 million, respectively. If events occur and market conditions change, causing the fair value to fall below carrying value, the lower of cost or net realizable value valuation allowance could increase.

6. IMPAIRMENT OF LONG-LIVED ASSETS:

FASB Accounting Standards Codification 360-10-40, "Property, Plant, and Equipment - Impairment or Disposal of Long-Lived Assets" ("ASC 360-10-40"), requires that long-lived assets, such as property and equipment and purchased intangibles subject to amortization, be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of the asset is measured by comparison of its carrying amount to undiscounted future net cash flows the asset is expected to generate. If such assets are considered to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount of the asset exceeds its fair market value. Estimates of expected future cash flows represent our best estimate based on currently available information and reasonable and supportable assumptions. Any impairment recognized in accordance with ASC 360-10-40 is permanent and may not be restored. The analysis is performed at a regional level for indicators of permanent impairment given the geographical interdependencies among our locations. Based upon our most recent analysis, which excludes fixed assets classified as held for sale which are recorded at fair value, we believe no impairment of long-lived assets existed as of June 30, 2018.

7. INCOME TAXES:

We account for income taxes in accordance with FASB Accounting Standards Codification 740, "Income Taxes" ("ASC 740"). Under ASC 740, we recognize deferred tax assets and liabilities for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. We measure deferred tax assets and liabilities using enacted tax rates expected to apply to taxable income in the years in which we expect those temporary differences to be recovered or settled. We record valuation allowances to reduce our deferred tax assets to the amount expected to be realized by considering all available positive and negative evidence. As of September 30, 2017 and June 30, 2018, we had a valuation allowance on our deferred tax assets of \$246,000 and \$299,000, respectively.

During the three months ended June 30, 2017 and 2018 we recognized an income tax provision of \$9.1 million and \$6.7 million, respectively. During the nine months ended June 30, 2017 and 2018 we recognized an income tax provision of \$12.4 million and \$10.6 million, respectively. The effective income tax rate for the three months ended June 30, 2017 and 2018 was 39.0% and 27.9%, respectively. The effective income tax rate for the nine months ended June 30, 2017 and 2018 was 38.7% and 27.6%, respectively. Due to the passage of the Tax Cuts and Jobs Act legislation in December 2017, which lowered the federal corporate tax rate from 35% to 21% (among other changes), our deferred tax assets were re-measured as of December 31, 2017 resulting in an approximately \$889,000 reduction in our beginning deferred tax assets and corresponding increase in our income tax provision for the nine months ended

June 30, 2018. The final impact of the Tax Cuts and Jobs Act legislation may differ due to, among other things, changes in interpretations, our assumptions used, issuance of additional guidance, and actions we may take as a result of the new legislation.

8. SHORT-TERM BORROWINGS:

In May 2017, we amended and restated our Inventory Financing Agreement (the “Amended Credit Facility”), originally entered into in June 2010, as subsequently amended, with Wells Fargo Commercial Distribution Finance LLC (formerly GE Commercial Distribution Finance Corporation). The May 2017 amendment and restatement extended the maturity date of the Credit Facility to October 2020, and the Amended Credit Facility includes two additional one-year extension periods, with lender approval. The May 2017 amendment and restatement, among other things, modified the amount of borrowing availability and maturity date of the Credit Facility. The Amended Credit Facility provides a floor plan financing commitment of up to \$350.0 million, an increase from the previous limit of \$300.0 million, subject to borrowing base availability resulting from the amount and aging of our inventory.

The Amended Credit Facility has certain financial covenants as specified in the agreement. The covenants include provisions that our leverage ratio must not exceed 2.75 to 1.0 and that our current ratio must be greater than 1.2 to 1.0. The interest rate for amounts outstanding under the Amended Credit Facility is 345 basis points above the one-month London Inter-Bank Offering Rate (“LIBOR”). There is an unused line fee of ten basis points on the unused portion of the Amended Credit Facility.

Advances under the Amended Credit Facility are initiated by the acquisition of eligible new and used inventory or are re-advances against eligible new and used inventory that have been partially paid-off. Advances on new inventory will generally mature

1,080 days from the original invoice date. Advances on used inventory will mature 361 days from the date we acquire the used inventory. Each advance is subject to a curtailment schedule, which requires that we pay down the balance of each advance on a periodic basis starting after six months. The curtailment schedule varies based on the type and value of the inventory. The collateral for the Amended Credit Facility is all of our personal property with certain limited exceptions. None of our real estate has been pledged for collateral for the Amended Credit Facility.

As of June 30, 2018, our indebtedness associated with financing our inventory and working capital needs totaled approximately \$232.8 million. As of June 30, 2017 and 2018, the interest rate on the outstanding short-term borrowings was approximately 4.5% and 5.1%, respectively. As of June 30, 2018, our additional available borrowings under our Amended Credit Facility were approximately \$36.2 million based upon the outstanding borrowing base availability.

As is common in our industry, we receive interest assistance directly from boat manufacturers, including Brunswick. The interest assistance programs vary by manufacturer, but generally include periods of free financing or reduced interest rate programs. The interest assistance may be paid directly to us or our lender depending on the arrangements the manufacturer has established. We classify interest assistance received from manufacturers as a reduction of inventory cost and related cost of sales as opposed to netting the assistance against our interest expense incurred with our lenders.

The availability and costs of borrowed funds can adversely affect our ability to obtain adequate boat inventory and the holding costs of that inventory as well as the ability and willingness of our customers to finance boat purchases. As of June 30, 2018, we had no long-term debt. However, we rely on our Amended Credit Facility to purchase our inventory of boats. The aging of our inventory limits our borrowing capacity as defined curtailments reduce the allowable advance rate as our inventory ages. Our access to funds under our Amended Credit Facility also depends upon the ability of our lenders to meet their funding commitments, particularly if they experience shortages of capital or experience excessive volumes of borrowing requests from others during a short period of time. Unfavorable economic conditions, weak consumer spending, turmoil in the credit markets, and lender difficulties, among other potential reasons, could interfere with our ability to utilize our Amended Credit Facility to fund our operations. Any inability to utilize our Amended Credit Facility could require us to seek other sources of funding to repay amounts outstanding under the credit agreements or replace or supplement our credit agreements, which may not be possible at all or under commercially reasonable terms.

Similarly, decreases in the availability of credit and increases in the cost of credit adversely affect the ability of our customers to purchase boats from us and thereby adversely affect our ability to sell our products and impact the profitability of our finance and insurance activities.

9. STOCK-BASED COMPENSATION:

We account for our stock-based compensation plans following the provisions of FASB Accounting Standards Codification 718, "Compensation — Stock Compensation" ("ASC 718"). In accordance with ASC 718, we use the Black-Scholes valuation model for valuing all stock-based compensation and shares purchased under our Employee Stock Purchase Plan. We measure compensation for restricted stock awards and restricted stock units at fair value on the grant date based on the number of shares expected to vest and the quoted market price of our common stock. We recognize compensation cost for all awards in operations, net of estimated forfeitures, on a straight-line basis over the requisite service period for each separately vesting portion of the award.

During the three months ended June 30, 2017 and 2018, we recognized stock-based compensation expense of approximately \$1.3 million and \$1.7 million, respectively, and for the nine months ended June 30, 2017 and 2018, we recognized stock-based compensation expense of approximately \$4.6 million and \$4.9 million, respectively, in selling, general, and administrative expenses in the unaudited condensed consolidated statements of operations.

Cash received from option exercises under all share-based compensation arrangements and the employee stock purchase plan for the three months ended June 30, 2017 and 2018, was approximately \$1.0 million and \$3.7 million, respectively, and for the nine months ended June 30, 2017 and 2018, was approximately \$3.0 million and \$7.6 million, respectively. We currently expect to satisfy share-based awards with registered shares available to be issued.

10. THE INCENTIVE STOCK PLANS:

During February 2017, our shareholders approved a proposal to amend the 2011 Stock-Based Compensation Plan (“2011 Plan”) to increase the 2,200,456 share threshold by 1,000,000 shares to 3,200,456 shares. During January 2011, our shareholders approved a proposal to authorize our 2011 Plan, which replaced our 2007 Incentive Compensation Plan (“2007 Plan”). Our 2011 Plan provides for the grant of stock options, stock appreciation rights, restricted stock, stock units, bonus stock, dividend equivalents, other stock related awards, and performance awards (collectively “awards”), that may be settled in cash, stock, or other property. Our 2011 Plan

is designed to attract, motivate, retain, and reward our executives, employees, officers, directors, and independent contractors by providing such persons with annual and long-term performance incentives to expend their maximum efforts in the creation of shareholder value. Subsequent to the February 2017 amendment described above, the total number of shares of our common stock that may be subject to awards under the 2011 Plan is equal to 3,000,000 shares, plus: (i) any shares available for issuance and not subject to an award under the 2007 Plan, which was 200,456 shares at the time of approval of the 2011 Plan; (ii) the number of shares with respect to which awards granted under the 2011 Plan and the 2007 Plan terminate without the issuance of the shares or where the shares are forfeited or repurchased; (iii) with respect to awards granted under the 2011 Plan and the 2007 Plan, the number of shares that are not issued as a result of the award being settled for cash or otherwise not issued in connection with the exercise or payment of the award; and (iv) the number of shares that are surrendered or withheld in payment of the exercise price of any award or any tax withholding requirements in connection with any award granted under the 2011 Plan or the 2007 Plan. The 2011 Plan terminates in January 2021, and awards may be granted at any time during the life of the 2011 Plan. The dates on which awards vest are determined by the Board of Directors or the Plan Administrator. The Board of Directors has appointed the Compensation Committee as the Plan Administrator. The exercise prices of options are determined by the Board of Directors or the Plan Administrator and are at least equal to the fair market value of shares of common stock on the date of grant. The term of options under the 2011 Plan may not exceed ten years. The options granted have varying vesting periods. To date, we have not settled or been under any obligation to settle any awards in cash.

The following table summarizes activity from our incentive stock plans from September 30, 2017 through June 30, 2018:

	Shares Available for Grant	Options Outstanding	Aggregate Intrinsic Value (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
Balance as of September 30, 2017	1,386,561	1,207,504	\$ 5,737	\$ 11.81	5.3
Options granted	(5,000)	5,000	—	18.95	
Options cancelled/forfeited/expired	14,750	(14,750)	—	12.27	
Options exercised	—	(581,364)	—	11.44	
Restricted stock awards issued	(341,517)	—	—	—	
Restricted stock awards forfeited	42,689	—	—	—	
Additional shares of stock issued	(7,328)	—	—	—	
Balance as of June 30, 2018	1,090,155	616,390	\$ 4,159	\$ 12.17	4.7
Exercisable as of June 30, 2018		613,056	\$ 4,159	\$ 12.21	4.7

The weighted average grant date fair value of options granted during the three months ended June 30, 2018 was \$8.42. No options were granted for the nine months ended June 30, 2017. The total intrinsic value of options exercised during the nine months ended June 30, 2017 and 2018 was \$1.6 and \$6.2 million, respectively.

Edgar Filing: MARINEMAX INC - Form 10-Q

As of June 30, 2017 and 2018, there was approximately \$268,000 and \$26,000, respectively, of unrecognized compensation costs related to non-vested options that are expected to be recognized over a weighted average period of 0.3 years and 2.0 years, respectively. The total fair value of options vested during the nine months ended June 30, 2017 and 2018 was approximately \$2.5 million and \$1.3 million, respectively.

We used the Black-Scholes model to estimate the fair value of options granted. The expected term of options granted is derived from the output of the option pricing model and represents the period of time that options granted are expected to be outstanding. Volatility is based on the historical volatility of our common stock. The risk-free rate for periods within the contractual term of the options is based on the U.S. Treasury yield curve in effect at the time of grant.

The follow are the weighted average assumptions used for each respective period:

	Three Months Ended June 30, 2018	Nine Months Ended June 30, 2018
Dividend yield	—0.0%	—0.0%
Risk-free interest rate	—2.7%	—2.7%
Volatility	—45.4%	—45.4%
Expected life	—5.0 years	—5.0 years

11. EMPLOYEE STOCK PURCHASE PLAN:

During February 2012, our shareholders approved a proposal to amend our 2008 Employee Stock Purchase Plan (“Stock Purchase Plan”) to increase the number of shares available under that plan by 500,000 shares. The Stock Purchase Plan as amended provides for up to 1,000,000 shares of common stock to be available for purchase by our regular employees who have completed at least one year of continuous service. In addition, there were 52,837 shares of common stock available under our 1998 Employee Stock Purchase Plan, which have been made available for issuance under our Stock Purchase Plan. The Stock Purchase Plan provides for implementation of up to 10 annual offerings beginning on the first day of October starting in 2008, with each offering terminating on September 30 of the following year. Each annual offering may be divided into two six-month offerings. For each offering, the purchase price per share will be the lower of: (i) 85% of the closing price of the common stock on the first day of the offering or (ii) 85% of the closing price of the common stock on the last day of the offering. The purchase price is paid through periodic payroll deductions not to exceed 10% of the participant’s earnings during each offering period. However, no participant may purchase more than \$25,000 worth of common stock annually.

We used the Black-Scholes model to estimate the fair value of options granted to purchase shares issued pursuant to the Stock Purchase Plan. The expected term of options granted is derived from the output of the option pricing model and represents the period of time that options granted are expected to be outstanding. Volatility is based on the historical volatility of our common stock. The risk-free rate for periods within the contractual term of the options is based on the U.S. Treasury yield curve in effect at the time of grant.

The following are the weighted average assumptions used for each respective period:

	Three Months Ended		Nine Months Ended	
	June 30,		June 30,	
	2017	2018	2017	2018
Dividend yield	0.0%	0.0%	0.0%	0.0%
Risk-free interest rate	0.9%	1.9%	0.7%	1.6%
Volatility	46.1%	48.8%	40.7%	49.9%
Expected life	Six months	Six months	Six months	Six months

As of June 30, 2018, we had issued 860,535 shares of common stock under our Stock Purchase Plan.

12. RESTRICTED STOCK AWARDS:

We have granted non-vested (restricted) stock awards (“restricted stock”) and restricted stock units (“RSUs”) to employees and officers pursuant to the 2011 Plan and the 2007 Plan. The restricted stock awards and RSUs have varying vesting

periods, but generally become fully vested between two and four years after the grant date, depending on the specific award, performance targets met for performance based awards granted to officers, and vesting period for time based awards. Officer performance based awards are granted at the target amount of shares that may be earned and the actual amount of the award earned generally could range from 0% to 200% of the target number of shares based on the actual specified performance target met. We accounted for the restricted stock awards granted using the measurement and recognition provisions of ASC 718. Accordingly, the fair value of the restricted stock awards, including performance based awards, is measured on the grant date and recognized in earnings over the requisite service period for each separately vesting portion of the award.

The following table summarizes restricted stock award activity from September 30, 2017 through June 30, 2018:

	Shares/ Units	Weighted Average Grant Date Fair Value
Non-vested balance as of September 30, 2017	606,543	\$ 16.53
Changes during the period		
Awards granted	341,517	\$ 16.53
Awards vested	(19,162)	\$ 19.18
Awards forfeited	(42,689)	\$ 17.15
Non-vested balance as of June 30, 2018	886,209	\$ 17.83

As of June 30, 2018, we had approximately \$8.6 million of total unrecognized compensation cost, assuming applicable performance conditions are met, related to non-vested restricted stock awards. We expect to recognize that cost over a weighted average period of 2.2 years.

13. NET INCOME PER SHARE:

The following is a reconciliation of the shares used in the denominator for calculating basic and diluted net income per share:

	Three Months Ended June 30,		Nine Months Ended June 30,	
	2017	2018	2017	2018
Weighted average common shares outstanding used in				
calculating basic income per share	24,336,777	22,399,079	24,293,512	22,185,736
Effect of dilutive options and non-vested restricted stock				
awards	758,621	783,467	751,534	758,845
Weighted average common and common equivalent shares				
used in calculating diluted income per share	25,095,398	23,182,546	25,045,046	22,944,581

For the three months ended June 30, 2017 and 2018, there were 7,418 and 110 weighted average shares related to options outstanding and non-vested restricted stock awards, respectively, that were not included in the computation of diluted income per share because the options' exercise prices or assumed proceeds per share were greater than the average market price of our common stock, and therefore, would have an anti-dilutive effect. For the nine months ended June 30, 2017 and 2018, there were 18,084 and 1,193 weighted average shares related to options outstanding and non-vested restricted stock awards, respectively, that were not included in the computation of diluted income per share because the options' exercise prices or assumed proceeds per share were greater than the average market price of our common stock, and therefore, would have an anti-dilutive effect.

14. COMMITMENTS AND CONTINGENCIES:

We are party to various legal actions arising in the ordinary course of business. While it is not feasible to determine the actual outcome of these actions as of June 30, 2018, we believe that these matters should not have a material adverse effect on our unaudited condensed consolidated financial condition, results of operations, or cash flows.

ITEM 2.MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management’s Discussion and Analysis of Financial Condition and Results of Operations contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include statements regarding our “expectations,” “anticipations,” “intentions,” “beliefs,” or “strategies” regarding the future. These forward-looking statements include statements relating to market risks such as interest rate risk and foreign currency exchange rate risk; economic and industry conditions and corresponding effects on consumer behavior and operating results; environmental conditions; inclement weather; certain specific and isolated events; our future estimates, assumptions and judgments, including statements regarding whether such estimates, assumptions and judgments would have a material adverse effect on our operating results; the impact of changes in accounting policy and standards; our plans to accelerate our growth through acquisitions and new store openings; our belief that our existing capital resources will be sufficient to finance our operations for at least the next 12 months, except for possible significant acquisitions; and the seasonality and cyclicity of our business and the effect of such seasonality and cyclicity on our business, financial results and inventory levels. Actual results could differ materially from those currently anticipated as a result of a number of factors, including those set forth under “Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended September 30, 2017.

General

We are the largest recreational boat and yacht retailer in the United States with fiscal 2017 revenue in excess of \$1 billion. Through our current 63 retail locations in 16 states (as of the filing of this Quarterly Report on 10-Q), we sell new and used recreational boats and related marine products, including engines, trailers, parts, and accessories. We also arrange related boat financing, insurance, and extended service contracts; provide boat repair and maintenance services; offer yacht and boat brokerage sales; and, where available, offer slip and storage accommodations, as well as the charter of power and sailing yachts in the British Virgin Islands.

MarineMax was incorporated in January 1998 (and reincorporated in Florida in March 2015). We commenced operations with the acquisition of five independent recreational boat dealers on March 1, 1998. Since the initial acquisitions in March 1998, we have, as of the filing of this Quarterly Report on 10-Q, acquired 28 recreational boat dealers, two boat brokerage operations, and two full-service yacht repair facilities. As a part of our acquisition strategy, we frequently engage in discussions with various recreational boat dealers regarding their potential acquisition by us. Potential acquisition discussions frequently take place over a long period of time and involve difficult business integration and other issues, including, in some cases, management succession and related matters. As a result of these and other factors, a number of potential acquisitions that from time to time appear likely to occur do not result in binding legal agreements and are not consummated. We completed three acquisitions in the fiscal year ended September 30, 2016, one acquisition in the fiscal year ended September 30, 2017, and two acquisitions to date in fiscal 2018.

General economic conditions and consumer spending patterns can negatively impact our operating results. Unfavorable local, regional, national, or global economic developments or uncertainties regarding future economic prospects could reduce consumer spending in the markets we serve and adversely affect our business. Economic conditions in areas in which we operate dealerships, particularly Florida in which we generated approximately 53%, 55%, and 55% of our revenue during fiscal 2015, 2016, and 2017, respectively, can have a major impact on our operations. Local influences, such as corporate downsizing, military base closings, and inclement weather such as hurricanes and other storms, environmental conditions, and specific events, such as the BP oil spill in the Gulf of Mexico in 2010, also could adversely affect, and in certain instances have adversely affected, our operations in certain markets.

In an economic downturn, consumer discretionary spending levels generally decline, at times resulting in disproportionately large reductions in the sale of luxury goods. Consumer spending on luxury goods also may decline as a result of lower consumer confidence levels, even if prevailing economic conditions are favorable. As a result, an economic downturn could impact us more than certain of our competitors due to our strategic focus on a higher end of our market. Although we have expanded our operations during periods of stagnant or modestly declining industry trends, the cyclical nature of the recreational boating industry or the lack of industry growth may adversely affect our business, financial condition, and results of operations. Any period of adverse economic conditions or low consumer confidence is likely to have a negative effect on our business.

Lower consumer spending resulting from a downturn in the housing market and other economic factors adversely affected our business in fiscal 2007, and continued weakness in consumer spending and depressed economic conditions had a substantial negative effect on our business and industry for several years after fiscal 2007. These conditions caused us to substantially reduce our acquisition program, delay new store openings, reduce our inventory purchases, engage in inventory reduction efforts, close a number of our retail locations, reduce our headcount, and amend and replace our credit facility. Acquisitions and new store openings remain important strategies to our company, and we plan to accelerate our growth through these strategies as economic conditions continue to

improve. However, we cannot predict the length of unfavorable economic or industry conditions or the extent to which they will continue to adversely affect our operating results nor can we predict the effectiveness of the measures we have taken to address this environment.

Although economic conditions have adversely affected our operating results, we believe we have capitalized on our core strengths to substantially outperform the industry, resulting in market share gains. Our ability to capture such market share supports the alignment of our retailing strategies with the desires of consumers. We believe the steps we have taken to address weak market conditions have yielded, and will yield in the future, an increase in revenue. If general economic trends continue to improve, we expect our core strengths and retailing strategies will position us to capitalize on growth opportunities as they occur and will allow us to emerge from the current economic environment with greater earnings potential.

Application of Critical Accounting Policies

We have identified the policies below as critical to our business operations and the understanding of our results of operations. The impact and risks related to these policies on our business operations are discussed throughout Management's Discussion and Analysis of Financial Condition and Results of Operations when such policies affect our reported and expected financial results.

In the ordinary course of business, we make a number of estimates and assumptions relating to the reporting of results of operations and financial condition in the preparation of our financial statements in conformity with accounting principles generally accepted in the United States. We base our estimates on historical experiences and on various other assumptions (including future earnings) that we believe are reasonable under the circumstances. The results of these assumptions form the basis for making judgments about the carrying values of assets and liabilities, including contingent assets and liabilities such as contingent consideration liabilities from acquisitions, which are not readily apparent from other sources. Actual results could differ significantly from those estimates under different assumptions and conditions. We believe that the following discussion addresses our most critical accounting policies, which are those that are most important to the portrayal of our financial condition and results of operations and require our most difficult, subjective, and complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

Revenue Recognition

We recognize revenue from boat, motor, and trailer sales and parts and service operations at the time the boat, motor, trailer, or part is delivered to or accepted by the customer or the service is completed. We recognize deferred revenue from service operations and slip and storage services on a straight-line basis over the term of the contract as services are completed. We recognize commissions earned from a brokerage sale at the time the related brokerage transaction closes. We recognize income from the rentals of chartering power and sailing yachts on a straight-line basis over the term of the contract as services are completed. We recognize commissions earned by us for placing notes with financial institutions in connection with customer boat financing when we recognize the related boat sales. We recognize marketing fees earned on credit, life, accident, disability, gap, and hull insurance products sold by third-party insurance companies at the later of customer acceptance of the insurance product as evidenced by contract execution or when the related boat sale is recognized. We recognize income from the rentals of chartering power and sailing yachts on a straight-line basis over the term of the contract or when service is completed. We also recognize commissions earned on extended warranty service contracts sold on behalf of third-party insurance companies at the later of customer acceptance of the service contract terms as evidenced by contract execution or recognition of the related boat sale.

Certain finance and extended warranty commissions and marketing fees on insurance products may be charged back if a customer terminates or defaults on the underlying contract within a specified period of time. Based upon our experience of terminations and defaults, we maintain a chargeback allowance that was not material to our financial statements taken as a whole as of June 30, 2018. Should results differ materially from our historical experiences, we would need to modify our estimate of future chargebacks, which could have a material adverse effect on our operating margins. We do not believe there is a reasonable likelihood that there will be a change in the future estimates or assumptions we use to calculate our estimate of future chargebacks which would result in a material effect on our operating results.

Vendor Consideration Received

We account for consideration received from our vendors in accordance with FASB Accounting Standards Codification 605-50, "Revenue Recognition - Customer Payments and Incentives" ("ASC 605-50"). ASC 605-50 requires us to classify interest assistance received from manufacturers as a reduction of inventory cost and related cost of sales as opposed to netting the assistance against our interest expense incurred with our lenders. Pursuant to ASC 605-50, amounts received by us under our co-op assistance programs from our manufacturers are netted against related advertising expenses. Our consideration received from our vendors contains uncertainties because the calculation requires management to make assumptions and to apply judgment regarding a number of factors,

including our ability to collect amounts due from vendors and the ability to meet certain criteria stipulated by our vendors. We do not believe there is a reasonable likelihood that there will be a change in the future estimates or assumptions we use to calculate our vendor considerations which would result in a material effect on our operating results.

Inventories

Inventory costs consist of the amount paid to acquire inventory, net of vendor consideration and purchase discounts, the cost of equipment added, reconditioning costs, and transportation costs relating to acquiring inventory for sale. We state new and used boat, motor, and trailer inventories at the lower of cost, determined on a specific-identification basis, or net realizable value. We state parts and accessories at the lower of cost, determined on an average cost basis, or net realizable value. We utilize our historical experience, the aging of the inventories, and our consideration of current market trends as the basis for determining a lower of cost or net realizable value valuation allowance. Our lower of cost or net realizable value valuation allowance contains uncertainties because the calculation requires management to make assumptions and to apply judgment regarding the amount at which the inventory will ultimately be sold which considers forecasted market trends, model changes, and new product introductions. With the exception of inventory of \$7.6 million in the British Virgin Islands damaged as a result of Hurricane Irma as of September 30, 2017, we do not believe there is a reasonable likelihood that there will be a change in the future estimates or assumptions we use to calculate our lower of cost or net realizable value valuation allowance which would result in a material effect on our operating results. With respect to the inventory in the British Virgin Islands, given the damage from Hurricane Irma, we have estimated the net realizable value of the inventory as of June 30, 2018, however, we cannot be certain that further damage will not be incurred upon the passage of time as repair work is performed. As of September 30, 2017 and June 30, 2018, our lower of cost or net realizable value valuation allowance for new and used boat, motor, and trailer inventories was \$1.8 million and \$2.5 million, respectively. If events occur and market conditions change, causing the fair value to fall below carrying value, the lower of cost or net realizable value valuation allowance could increase.

Goodwill

We account for goodwill in accordance with FASB Accounting Standards Codification 350, “Intangibles - Goodwill and Other” (“ASC 350”), which provides that the excess of cost over net assets of businesses acquired is recorded as goodwill. In January 2018, we purchased Island Marine Center, a privately owned boat dealer located in New Jersey resulting in the recording of \$1.3 million in goodwill. In total, current and previous acquisitions have resulted in the recording of \$27.4 million in goodwill. In accordance with ASC 350, we review goodwill for impairment at least annually and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Our annual impairment test is performed during the fourth fiscal quarter. If the carrying amount of goodwill exceeds its fair value we would recognize an impairment loss in accordance with ASC 350. As of June 30, 2018, and based upon our most recent analysis, we determined through our qualitative assessment that it is not “more likely than not” that the fair values of our reporting units are less than their carrying values. As a result, we were not required to perform the two-step goodwill impairment test. The qualitative assessment requires us to make judgments and assumptions regarding macroeconomic and industry conditions, our financial performance, and other factors. We do not believe there is a reasonable likelihood that there will be a change in the judgments and assumptions used in our qualitative assessment which would result in a material effect on our operating results.

Impairment of Long-Lived Assets

FASB Accounting Standards Codification 360-10-40, “Property, Plant, and Equipment - Impairment or Disposal of Long-Lived Assets” (“ASC 360-10-40”), requires that long-lived assets, such as property and equipment and purchased intangibles subject to amortization, be reviewed for impairment whenever events or changes in circumstances indicate

that the carrying amount of an asset may not be recoverable. Recoverability of the asset is measured by comparison of its carrying amount to undiscounted future net cash flows the asset is expected to generate. If such assets are considered to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount of the asset exceeds its fair market value. Estimates of expected future cash flows represent our best estimate based on currently available information and reasonable and supportable assumptions. Our impairment loss calculations contain uncertainties because they require us to make assumptions and to apply judgment in order to estimate expected future cash flows. Any impairment recognized in accordance with ASC 360-10-40 is permanent and may not be restored. The analysis is performed at a regional level for indicators of permanent impairment given the geographical interdependencies among our locations. Based upon our most recent analysis, which excludes fixed assets classified as held for sale which are recorded at fair value, we believe no impairment of long-lived assets existed as of June 30, 2018. We do not believe there is a reasonable likelihood that there will be a change in the future estimates or assumptions used to test for recoverability which would result in a material effect on our operating results.

Stock-Based Compensation

We account for our stock-based compensation plans following the provisions of FASB Accounting Standards Codification 718, “Compensation — Stock Compensation” (“ASC 718”). In accordance with ASC 718, we use the Black-Scholes valuation model for valuing all stock-based compensation and shares purchased under our Employee Stock Purchase Plan. We measure compensation for restricted stock awards and restricted stock units at fair value on the grant date based on the number of shares expected to vest and the quoted market price of our common stock. We recognize compensation cost for all awards in operations, net of estimated forfeitures, on a straight-line basis over the requisite service period for each separately vesting portion of the award. Our valuation models and generally accepted valuation techniques require us to make assumptions and to apply judgment to determine the fair value of our awards. These assumptions and judgments include estimating the volatility of our stock price, expected dividend yield, employee turnover rates and employee stock option exercise behaviors. We do not believe there is a reasonable likelihood that there will be a change in the future estimates or assumptions we use to calculate our stock-based compensation which would result in a material effect on our operating results.

Income Taxes

We account for income taxes in accordance with FASB Accounting Standards Codification 740, “Income Taxes” (“ASC 740”). Under ASC 740, we recognize deferred tax assets and liabilities for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. We measure deferred tax assets and liabilities using enacted tax rates expected to apply to taxable income in the years in which we expect those temporary differences to be recovered or settled. We record valuation allowances to reduce our deferred tax assets to the amount expected to be realized by considering all available positive and negative evidence.

Pursuant to ASC 740, we must consider all positive and negative evidence regarding the realization of deferred tax assets. ASC 740 provides for four possible sources of taxable income to realize deferred tax assets: 1) taxable income in prior carryback years, 2) reversals of existing deferred tax liabilities, 3) tax planning strategies and 4) projected future taxable income. As of June 30, 2018, we have no available taxable income in prior carryback years, limited reversals of existing deferred tax liabilities or prudent and feasible tax planning strategies. Therefore, the recoverability of our deferred tax assets is dependent upon generating future taxable income.

The determination of releasing valuation allowances against deferred tax assets is made, in part, pursuant to our assessment as to whether it is more likely than not that we will generate sufficient future taxable income against which benefits of the deferred tax assets may or may not be realized. Significant judgment is required in making estimates regarding our ability to generate income in future periods.

During the fourth quarter of fiscal 2017, the Company recorded a net tax benefit of \$1.8 million primarily pertaining to a worthless stock deduction. The tax benefit of this deduction was primarily based on the write-off of the Company’s investment in its British Virgin Islands subsidiary for US tax purposes.

During the first quarter of fiscal 2018, the Company recorded a reduction of our beginning deferred tax assets of approximately \$889,000 and a corresponding increase in our income tax provision as a result of the Tax Cuts and Jobs Act legislation passed in December 2017 which lowered the federal corporate tax rate from 35% to 21%, among other changes. The final impact of the Tax Cuts and Jobs Act legislation may differ due to, among other things, changes in interpretations, our assumptions used, issuance of additional guidance, and actions we may take as a result of the new legislation.

The application of income tax law is inherently complex. Laws and regulations in this area are voluminous and are often ambiguous. Under ASC 740, the impact of uncertain tax positions taken or expected to be taken on an income tax return must be recognized in the financial statements at the largest amount that is more likely than not to be sustained upon audit by the relevant taxing authority. An uncertain income tax position will not be recognized in the financial statements unless it is more likely than not of being sustained. As such, we are required to make subjective assumptions and judgments regarding our effective tax rate and our income tax exposure. Our effective income tax rate is affected by changes in tax law in the jurisdictions in which we currently operate, tax jurisdictions of new retail locations, our earnings, and the results of tax audits. We believe that the judgments and estimates discussed herein are reasonable.

Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, “Revenue from Contracts with Customers (Topic 606)” (“ASU 2014-09”), a converged standard on revenue recognition. The new pronouncement requires revenue recognition to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance also specifies the accounting for some costs to obtain or fulfill a

contract with a customer, as well as enhanced disclosure requirements. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Early adoption is permitted for annual reporting periods beginning after December 15, 2016. While we have not completed the implementation process, we currently do not believe the adoption of this standard will have a material impact on our unaudited condensed consolidated financial statements, or will cause a significant change to our current accounting policies or internal control over financial reporting for revenue recognition on boat, motor, and trailer sales, brokerage commissions, slip and storage services, charter rentals, and fee income generated from finance and insurance products. However, the timing of revenue recognition for certain parts and service operations will be accelerated, as we have determined these performance obligations are satisfied over time under the new standard. We currently anticipate adopting the standard using the modified retrospective approach applied only to contracts not completed as of the date of adoption, with no restatement of comparative periods and if material a cumulative effect adjustment recognized as of the date of adoption. We plan to adopt ASU 2014-09 in fiscal 2019.

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842)” (“ASU 2016-02”). This update requires organizations to recognize lease assets and lease liabilities on the balance sheet and also disclose key information about leasing arrangements. ASU 2016-02 is effective for annual reporting periods beginning on or after December 15, 2018, and interim periods within those annual periods. Earlier application is permitted for all entities as of the beginning of an interim or annual period. While we are continuing to evaluate the impact of the adoption of ASU 2016-02 on our unaudited condensed consolidated financial statements, we believe the adoption of ASU 2016-02 may have a significant and material impact to our unaudited condensed consolidated balance sheet given our current lease agreements for our leased retail locations. We are currently evaluating the impact the adoption of ASU 2016-02 will have on our other unaudited condensed consolidated financial statements. Based on a preliminary assessment, we expect that most of our operating lease commitments will be subject to the new guidance and recognized as operating lease liabilities and right-of-use assets upon adoption, resulting in a material increase in the assets and liabilities recorded on our unaudited condensed consolidated balance sheet. We are continuing our assessment, which may identify additional impacts this standard will have on our consolidated financial statements and related disclosures and internal control over financial reporting. We plan to adopt ASU 2016-02 in fiscal 2020.

In January 2017, the FASB issued ASU 2017-04, “Simplifying the Test for Goodwill Impairment (Topic 350)” (“ASU 2017-04”). This update removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step 2 of the goodwill impairment test. As a result, under ASU 2017-04, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit’s fair value; however, the impairment loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. This guidance is effective prospectively for fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed after January 1, 2017. The adoption of ASU 2017-04 is not expected to have a significant impact on the Company’s unaudited condensed consolidated financial statements or internal control over financial reporting.

Consolidated Results of Operations

The following discussion compares the three and nine months ended June 30, 2018, with the three and nine months ended June 30, 2017 and should be read in conjunction with the unaudited condensed consolidated financial statements, including the related notes thereto, appearing elsewhere in this report.

Three Months Ended June 30, 2018 Compared with Three Months Ended June 30, 2017

Revenue. Revenue increased \$31.4 million, or 9.5%, to \$361.2 million for the three months ended June 30, 2018, from \$329.8 million for the three months ended June 30, 2017. Of this increase, \$26.5 million was attributable to an 8.0% increase in comparable-store sales and a \$4.9 million increase attributable to stores acquired or opened that were not eligible for inclusion in the comparable-store base. The increase in our store revenue was due primarily to increases in new boat sales.

Gross Profit. Gross profit increased \$5.9 million, or 7.0%, to \$90.7 million for the three months ended June 30, 2018, from \$84.8 million for the three months ended June 30, 2017. Gross profit as a percentage of revenue decreased to 25.1% for the three months ended June 30, 2018 from 25.7% for the three months ended June 30, 2017. The decrease in gross profit as a percentage of revenue was primarily the result of the significant mix shift in our revenue to new boat sales. The increase in boat sales relative to our overall revenue caused some of our higher margin brokerage, finance and insurance, and parts and accessories products, to decrease as a percentage of revenue, contributing to our overall margins decreasing accordingly.

Selling, General, and Administrative Expenses. Selling, general, and administrative expense increased \$4.5 million, or 7.6%, to \$64.1 million for the three months ended June 30, 2018, from \$59.6 million for the three months ended June 30, 2017. Selling,

general, and administrative expenses as a percentage of revenue decreased to 17.7% for the three months ended June 30, 2018 from 18.1% for the three months June 30, 2017. The increase in selling, general, and administrative expenses was primarily attributable to increased commissions resulting from increased new boat sales, increased compensation due to improved performance, a \$1.2 million increase in non-recurring unusual costs, and increased health care costs due to rising claims. The decrease in selling, general, and administrative expenses as a percentage of revenue was driven by increased efficiencies and operating leverage in the business.

Interest Expense. Interest expense increased \$602,000, or 31.7%, to \$2.5 million for the three months ended June 30, 2018 from \$1.9 million for the three months ended June 30, 2017. Interest expense as a percentage of revenue increased to 0.7% for the three months ended June 30, 2018 from 0.6% for the three months ended June 30, 2017. The increase in interest expense was primarily the result of increases in interest rates.

Income Taxes. Income tax expense decreased \$2.4 million, or 26.1%, to \$6.7 million for the three months ended June 30, 2018 from \$9.1 million for the three months ended June 30, 2017. Our effective income tax rate decreased to 27.9% for the three months ended June 30, 2018 from 39.0% for three months ended June 30, 2017. The decrease was mainly due to the passage of the Tax Cuts and Jobs Act legislation in December 2017, which lowered the federal corporate tax rate from 35% to 21%.

Nine Months Ended June 30, 2018 Compared with Nine Months Ended June 30, 2017

Revenue. Revenue increased \$67.1 million, or 8.3%, to \$868.8 million for the nine months ended June 30, 2018, from \$801.7 million for the nine months ended June 30, 2017. Of this increase, \$46.4 million was attributable to a 5.8% increase in comparable-store sales and \$20.7 million was attributable to stores acquired or opened that were not eligible for inclusion in the comparable-store base. The increase in our store revenue was due primarily to increases in new and used boat sales and our higher margin finance and insurance products, service, and storage services, which expanded as a percentage of our revenue.

Gross Profit. Gross profit increased \$20.2 million, or 10.2%, to \$219.2 million for the nine months ended June 30, 2018, from \$199.0 million for the nine months ended June 30, 2017. Gross profit as a percentage of revenue increased to 25.2% for the nine months ended June 30, 2018 from 24.8% for the nine months ended June 30, 2017. The increase in gross profit as a percentage of revenue was primarily the result of improved margins on new and used boat sales. The increase in gross profit dollars was primarily attributable to the increase in our gross margins and increases in new and used boat sales. Additionally, our higher margin finance and insurance products, service, and storage services increased as a percentage of revenue, contributing to our overall margins increasing accordingly.

Selling, General, and Administrative Expenses. Selling, general, and administrative expense increased \$11.6 million, or 7.2%, to \$173.0 million for the nine months ended June 30, 2018, from \$161.4 million for the nine months ended June 30, 2017. Selling, general, and administrative expenses as a percentage of revenue decreased to 19.9% for the nine months ended June 30, 2018 from 20.1% for the nine months June 30, 2017. The increase in selling, general, and administrative expenses was primarily attributable to increased commissions resulting from increased new boat sales, increased compensation due to improved performance, a \$1.2 million increase in non-recurring unusual costs, and increased health care costs due to rising claims. The decrease in selling, general, and administrative expenses as a percentage of revenue was driven by increased efficiencies and operating leverage in the business.

Interest Expense. Interest expense increased \$2.4 million, or 43.0%, to \$7.9 million for the nine months ended June 30, 2018 from \$5.5 million for the nine months ended June 30, 2017. Interest expense as a percentage of revenue increased to 0.9% for the nine months ended June 30, 2018 from 0.7% for the nine months ended June 30, 2017. The increase in interest expense was primarily the result of increases in interest rates.

Income Taxes. Income tax expense decreased \$1.8 million, or 14.7%, to \$10.6 million for the nine months ended June 30, 2018 from \$12.4 million for the nine months ended June 30, 2017. Our effective income tax rate decreased to 27.6% for the nine months ended June 30, 2018 from 38.7% for nine months ended June 30, 2017. The decrease was mainly due to the passage of the Tax Cuts and Jobs Act legislation in December 2017, which lowered the federal corporate tax rate from 35% to 21%, and the utilization of Hurricane Irma and Hurricane Harvey Employee Retention Credits, partially offset by the re-measurement of our beginning deferred tax assets and liabilities which resulted in an additional charge to income tax expense for the period of \$889,000.

Liquidity and Capital Resources

Our cash needs are primarily for working capital to support operations, including new and used boat and related parts inventories, off-season liquidity, and growth through acquisitions and new store openings. Acquisitions and new store openings remain important strategies to our company, and we have recently completed certain acquisitions, and we plan to accelerate our growth through these strategies. However, we cannot predict when unfavorable economic or financial conditions will return or the

duration of such conditions. We regularly monitor the aging of our inventories and current market trends to evaluate our current and future inventory needs. We also use this evaluation in conjunction with our review of our current and expected operating performance and expected business levels to determine the adequacy of our financing needs.

These cash needs have historically been financed with cash generated from operations and borrowings under the Amended Credit Facility. Our ability to utilize the Amended Credit Facility to fund operations depends upon the collateral levels and compliance with the covenants of the Amended Credit Facility. Any turmoil in the credit markets and weakness in the retail markets may interfere with our ability to remain in compliance with the covenants of the Amended Credit Facility and therefore our ability to utilize the Amended Credit Facility to fund operations. As of June 30, 2018, we were in compliance with all covenants under the Amended Credit Facility. We currently depend upon dividends and other payments from our dealerships and the Amended Credit Facility to fund our current operations and meet our cash needs. As 100% owner of each of our dealerships, we determine the amounts of such distributions subject to applicable law, and currently, no agreements exist that restrict this flow of funds from our dealerships.

For the nine months ended June 30, 2018, cash provided by operating activities was approximately \$52.3 million, and for the nine months ended June 30, 2017, cash used in operating activities was approximately \$5.7 million. For the nine months ended June 30, 2018, cash provided by operating activities was primarily related to our net income adjusted for non-cash expenses such as depreciation and amortization expense, deferred income tax provision, and stock-based compensation expense, decreases in inventory driven by inventory optimization efforts, insurance proceeds received as a result of Hurricane Irma, and increases in customer deposits and accrued expenses and other long-term liabilities, partially offset by increases in accounts receivable and decreases in accounts payable. For the nine months ended June 30, 2017, cash used in operating activities was primarily related to an increase of inventory driven by timing of boats received, increases in accounts receivable, and decreases in customer deposits, partially offset by increases in accounts payable and accrued expenses, as well as our net income adjusted for non-cash expenses such as depreciation and amortization expense, deferred income tax provision, along with stock-based compensation expense.

For the nine months ended June 30, 2018 and 2017, cash used in investing activities was approximately \$12.4 million and \$30.1 million, respectively. For the nine months ended June 30, 2018, cash used in investing activities was primarily used to purchase property and equipment associated with improving existing retail facilities, purchase inventory and property and equipment associated with business acquisitions, and make capital improvements as a result of Hurricane Irma. For the nine months ended June 30, 2017, cash used in investing activities was primarily used to purchase inventory and property and equipment associated with business acquisitions and property and equipment associated with improving existing retail facilities.

For the nine months ended June 30, 2018, cash used in financing activities was approximately \$19.8 million, and for the nine months ended June 30, 2017, cash provided by financing activities was approximately \$56.2 million. For the nine months ended June 30, 2018, cash used in financing activities was primarily attributable to a decrease in net short-term borrowings as a result of decreased inventory levels, contingent consideration payments from acquisitions, and repurchase of common stock under the share repurchase program, partially offset by proceeds from the issuance of common stock from our stock based compensation plans. For the nine months ended June 30, 2017, cash provided by financing activities was primarily attributable to net short-term borrowings as a result of increased inventory levels and proceeds from the issuance of common stock from our stock based compensation plans, partially offset by the repurchase of common stock under the share repurchase program.

In May 2017, we amended and restated our Inventory Financing Agreement (the "Amended Credit Facility"), originally entered into in June 2010, as subsequently amended, with Wells Fargo Commercial Distribution Finance LLC (formerly GE Commercial Distribution Finance Corporation). The May 2017 amendment and restatement extended

the maturity date of the Credit Facility to October 2020, and the Amended Credit Facility includes two additional one-year extension periods, with lender approval. The May 2017 amendment and restatement, among other things, modified the amount of borrowing availability and maturity date of the Credit Facility. The Amended Credit Facility provides a floor plan financing commitment of up to \$350.0 million, an increase from the previous limit of \$300.0 million, subject to borrowing base availability resulting from the amount and aging of our inventory.

The Amended Credit Facility has certain financial covenants as specified in the agreement. The covenants include provisions that our leverage ratio must not exceed 2.75 to 1.0 and that our current ratio must be greater than 1.2 to 1.0. The interest rate for amounts outstanding under the Amended Credit Facility is 345 basis points above the one-month LIBOR. There is an unused line fee of ten basis points on the unused portion of the Amended Credit Facility.

Advances under the Amended Credit Facility are initiated by the acquisition of eligible new and used inventory or are re-advances against eligible new and used inventory that have been partially paid-off. Advances on new inventory will generally mature 1,080 days from the original invoice date. Advances on used inventory will mature 361 days from the date we acquire the used inventory. Each advance is subject to a curtailment schedule, which requires that we pay down the balance of each advance on a periodic basis starting after six months. The curtailment schedule varies based on the type and value of the inventory. The collateral

for the Amended Credit Facility is all of our personal property with certain limited exceptions. None of our real estate has been pledged for collateral for the Amended Credit Facility.

As of June 30, 2018, our indebtedness associated with financing our inventory and working capital needs totaled approximately \$232.8 million. As of June 30, 2017 and 2018, the interest rate on the outstanding short-term borrowings was approximately 4.5% and 5.1%, respectively. As of June 30, 2018, our additional available borrowings under our Amended Credit Facility were approximately \$36.2 million based upon the outstanding borrowing base availability. The aging of our inventory limits our borrowing capacity as defined curtailments reduce the allowable advance rate as our inventory ages.

Except as specified in this "Management's Discussion and Analysis of Financial Condition and Results of Operations" and in the attached unaudited condensed consolidated financial statements, we have no material commitments for capital for the next 12 months. We believe that our existing capital resources will be sufficient to finance our operations for at least the next 12 months, except for possible significant acquisitions.

Impact of Seasonality and Weather on Operations

Our business, as well as the entire recreational boating industry, is highly seasonal, with seasonality varying in different geographic markets. With the exception of Florida, we generally realize significantly lower sales and higher levels of inventories, and related short-term borrowings, in the quarterly periods ending December 31 and March 31. The onset of the public boat and recreation shows in January generally stimulates boat sales and typically allows us to reduce our inventory levels and related short-term borrowings throughout the remainder of the fiscal year. Our business could become substantially more seasonal if we acquire dealers that operate in colder regions of the United States or close retail locations in warm climates.

Our business is also subject to weather patterns, which may adversely affect our results of operations. For example, prolonged or severe winter conditions, drought conditions (or merely reduced rainfall levels) or excessive rain, may limit access to area boating locations or render boating dangerous or inconvenient, thereby curtailing customer demand for our products and services. In addition, unseasonably cool weather and prolonged or severe winter conditions may lead to a shorter selling season in certain locations. Hurricanes and other storms could result in disruptions of our operations or damage to our boat inventories and facilities, as has been the case when Florida and other markets were affected by hurricanes. Although our geographic diversity is likely to reduce the overall impact to us of adverse weather conditions in any one market area, these conditions will continue to represent potential, material adverse risks to us and our future financial performance.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

As of June 30, 2018, all of our short-term debt bore interest at a variable rate, tied to LIBOR as a reference rate. Changes in the underlying LIBOR interest rate on our short-term debt could affect our earnings. For example, a hypothetical 100 basis point increase in the interest rate on our short-term debt would result in an increase of approximately \$2.3 million in annual pre-tax interest expense. This estimated increase is based upon the outstanding balance of our short-term debt as of June 30, 2018 and assumes no mitigating changes by us to reduce the outstanding balances and no additional interest assistance that could be received from vendors due to the interest rate increase.

Foreign Currency Exchange Rate Risk

Products purchased from European-based and Chinese-based manufacturers are transacted in U.S. dollars. Fluctuations in the U.S. dollar exchange rate may impact the retail price at which we can sell foreign products. Accordingly, fluctuations in the value of other currencies compared with the U.S. dollar may impact the price points at which we can profitably sell such foreign products, and such price points may not be competitive with other products in the United States. Thus, such fluctuations in exchange rates ultimately may impact the amount of revenue, cost of goods sold, cash flows, and earnings we recognize for such foreign products. We cannot predict the effects of exchange rate fluctuations on our operating results. In certain cases, we may enter into foreign currency cash flow hedges to reduce the variability of cash flows associated with forecasted purchases of boats and yachts from European-based and Chinese-based manufacturers. We are not currently engaged in foreign currency exchange hedging transactions to manage our foreign currency exposure. If and when we do engage in foreign currency exchange hedging transactions, there can be no assurance that our strategies will adequately protect our operating results from the effects of exchange rate fluctuations.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that material information required to be disclosed by us in Securities Exchange Act reports is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Our Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on such evaluation, such officers have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Controls

During the quarter ended June 30, 2018, there were no changes in our internal control over financial reporting that materially affected, or were reasonably likely to materially affect, our internal control over financial reporting.

Limitations on the Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures and internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Although our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

CEO and CFO Certifications

Exhibits 31.1 and 31.2 are the Certifications of the Chief Executive Officer and Chief Financial Officer, respectively. The Certifications are required in accordance with Section 302 of the Sarbanes-Oxley Act of 2002 (the "Section 302 Certifications"). This Item of this report, which you are currently reading is the information concerning the Evaluation referred to in the Section 302 Certifications and this information should be read in conjunction with the Section 302 Certifications for a more complete understanding of the topics presented.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are party to various legal actions arising in the ordinary course of business. While it is not feasible to determine the actual outcome of these actions as of June 30, 2018, we do not believe that these matters will have a material adverse effect on our unaudited condensed consolidated financial condition, result of operations, or cash flows.

ITEM 1A. RISK FACTORS

Unless otherwise noted below, there have been no material changes in the risk factors previously disclosed in our Annual Report on Form 10-K for our fiscal year ended September 30, 2017.

Our sales of yachts produced by the Azimut-Benetti Group in Italy, yachts produced by Galeon in Poland, and motor and sailing yachts produced by Sino Eagle in China expose us to international political, economic, and other risks.

Our sales of yachts produced by the Azimut-Benetti Group in Italy, yachts produced by Galeon in Poland, and yachts for our yacht charter fleet produced by Sino Eagle in China expose us to international political, economic, and other risks. Protectionist trade legislation in the United States, the European Union, Italy, Poland, or China, such as a change in current tariff structures, export or import compliance laws, or other trade policies could adversely affect our ability to import yachts from these foreign suppliers under economically favorable terms and conditions.

There have been recent changes, and future, additional changes may occur, to United States and foreign trade and tax policies, including heightened import restrictions, import and export licenses, new tariffs, trade embargoes, government sanctions, or trade barriers. Any of these restrictions could prevent or make it difficult or more costly for us to import yachts from foreign suppliers under economically favorable terms and conditions. Increased tariffs could require us to increase our prices which likely could decrease demand for our products. In addition, other countries may limit their trade with the United States or retaliate through their own restrictions and/or increased tariffs which would affect our ability to export products and therefore adversely affect our sales. Many of these challenges are present in China, a market from which we purchase products. In particular, currently proposed tariffs could affect our Chinese suppliers. While such tariffs may be delayed or cancelled before coming into effect and we have taken steps to mitigate their potential effects, such tariffs would likely increase our costs for our Chinese suppliers.

Our foreign purchase of yachts creates a number of logistical and communications challenges. The economic, political, and other risks we face resulting from these foreign purchases include the following:

- compliance with U.S. and local laws and regulatory requirements as well as changes in those laws and requirements;
- transportation delays or interruptions and other effects of less developed infrastructures;
- effects from the voter-approved exit of the United Kingdom from the European Union (often referred to as Brexit), including any resulting deterioration in economic conditions, volatility in currency exchange rates, or adverse regulatory changes;
- limitations on imports and exports;
- foreign exchange rate fluctuations;

- imposition of restrictions on currency conversion or the transfer of funds;
- the effects of issued or threatened government sanctions, tariffs and duties, trade barriers or economic restrictions, including the tariffs recently proposed by the U.S. government on various imports from China and by the Chinese government on certain U.S. goods, the scope and duration of which, if implemented, remain uncertain;
- maintenance of quality standards;
- unexpected changes in regulatory requirements;
- differing labor regulations;
- potentially adverse tax consequences;
- possible employee turnover or labor unrest;

- the burdens and costs of compliance with a variety of foreign laws; and
- political or economic instability.
