FOR IMMEDIATE RELEASE

BREAKTHROUGH DEAL FOR SILICOM'S SETAC:  
TIER-1 SECURITY LEADER SELECTS SETAC-BASED  
SOLUTION CREATED BY SILICOM &  
FORTUNE-100 INDUSTRY GIANT

- Deal Expected to Generate >\$3M Sales in 1st Production Year -

KFAR SAVA, Israel—August 16, 2010--Silicom Ltd. (NASDAQ and TASE: SILC) today announced that its patent-pending SETAC Server-To-Appliance-Converter solution has been selected by one of the security industry's dominant players for use in next-generation lines of security appliances to be launched in early 2011. Silicom estimates that sales related to the deal will ramp up over the next year generating revenues of over \$3 million in its first production year.

The SETAC-based appliances are a result of a co-operative effort between Silicom, the security leader, and a Fortune-100 industry giant, a pioneering developer and builder of high-performance server platforms. The Fortune-100 company will also integrate the SETAC components into its servers before delivering them to the security customer; for its part, Silicom will sell the SETAC modules and components to both of the two other participating companies.

The security leader has chosen Silicom's pioneering SETAC solution to bring a new level of functionality and flexibility to its appliances without sacrificing the use of highest-quality brand name server-grade platforms. Within these appliances, the customer will deploy Silicom's SETAC modules with 1Gbps, 10Gbps and encryption capabilities.

“This is a breakthrough, game-changing deal for Silicom - a powerful confirmation that the market is seeking a superior higher-quality branded alternative for designing and building appliance platforms,” commented Shaik Orbach, Silicom's President and CEO. “Just as important, the fact that companies of this stature are eager to act as partners in this deal confirms our overall SETAC marketing and implementation strategy.”

Mr. Orbach continued, “We are also excited that a platform developer as significant as our Fortune-100 partner has expressed interest in independently selling SETAC-based appliances and adapting the SETAC concept to additional platforms. Success in this area would be beyond the scope of this specific deal, and would obviously have result in a significant boost in our future SETAC business. As a result, we are now even more optimistic regarding the SETAC's forward momentum and its ability to drive our business to a whole new level.”

About Silicom

Silicom Ltd. is an industry-leading provider of high-performance server/appliances networking solutions. The Company's flagship products include a variety of multi-port Gigabit Ethernet, copper and fiber-optic, server adapters and innovative BYPASS adapters designed to increase throughput and availability of server-based systems, WAN Optimization and security appliances and other mission-critical gateway applications.
