PACWEST BANCORP

(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)

33-0885320
(I.R.S. Employer
Identification No.)

10250 Constellation Blvd., Suite 1640
Los Angeles, California
(Address of Principal Executive Offices)

90067
(Zip Code)

Registrant's telephone number, including area code: **(310) 286-1144**

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class
Common stock, \$.01 par value per share

Name of Each Exchange on Which Registered
The Nasdaq Stock Market, LLC

Securities registered pursuant to Section 12(g) of the Act: **None**

Edgar Filing: PACWEST BANCORP - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

PART I

ITEM 1. BUSINESS

General

PacWest Bancorp is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. Our principal business is to serve as the holding company for our banking subsidiary, Pacific Western Bank, which we refer to as Pacific Western or the Bank. When we say "we", "our" or the "Company", we mean the Company on a consolidated basis with the Bank. When we refer to "PacWest" or to the holding company, we are referring to the parent company on a stand-alone basis.

PacWest Bancorp was formerly known as First Community Bancorp. At a special meeting of the Company's shareholders held on April 23, 2008, the shareholders approved the reincorporation of the Company in Delaware from California and the change of the Company's name to PacWest Bancorp from First Community Bancorp. The reincorporation became effective on May 14, 2008. In connection with the reincorporation and name change, the Company also changed its ticker symbol on the NASDAQ Global Select Market to "PACW." Other than the name change, change in ticker symbol and change in corporate domicile, the reincorporation did not result in any change in the business, physical location, management, assets, liabilities or total stockholders' equity of the Company, nor did it result in any change in location of the Company's employees, including the Company's management. Additionally, the reincorporation did not alter any shareholder's percentage ownership interest or number of shares owned in the Company. The stockholders' equity section of the accompanying consolidated financial statements has been restated retroactively to give effect to the reincorporation. Such reclassification had no effect on the results of operations or the total amount of stockholders' equity.

Recent Transactions

During 2010, we completed the following transactions:

In December, we sold \$74.9 million in non-covered adversely classified loans, of which \$17.6 million were nonaccrual loans and \$43.7 million were performing restructured loans.

In August, we acquired Los Padres Bank in an FDIC-assisted transaction, which included \$437.1 million in loans and \$752.2 million in deposits. We recorded \$47.3 million in goodwill in connection with this acquisition.

In July, we purchased \$234.1 million of performing loans secured by Southern California real estate.

In March, holders of the Series A warrants issued in August 2009 exercised them. We issued 1,348,040 shares of common stock for net proceeds of approximately \$26.6 million after expenses. Subsequently, in August, the Series B warrants issued in August 2009 expired unexercised.

In February, we sold \$323.6 million in non-covered adversely classified loans, of which \$110.5 million were nonaccrual loans and \$105.1 million were performing restructured loans.

During 2009, we completed the following transactions:

In December, we filed a registration statement with the Securities and Exchange Commission ("SEC") to offer to sell, from time to time, shares of common stock, preferred stock, depositary shares, and warrants for an aggregate initial offering price up to \$350 million. The registration statement was declared effective January 8, 2010.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

In August, we acquired Affinity Bank in an FDIC-assisted transaction, which included \$675.6 million in loans and \$868.2 million in deposits. We recorded a gain of \$67.0 million in connection with this transaction.

In August, we sold in a direct placement to institutional investors 2.7 million shares of common stock for \$50 million, and issued to each investor two warrants, Series A and Series B, exercisable for common shares at \$20.20 per share, with expiration dates in March 2010 and August 2010, respectively.

In June, we filed a registration statement with the SEC to offer to sell, from time to time, shares of stock for an aggregate initial offering price up to \$150 million. The registration statement was declared effective June 30, 2009, but terminated when the \$350 million shelf registration became effective on January 8, 2010.

In January, we issued 3,846,153 common shares at \$26.00 per share for total cash consideration of approximately \$100 million in a private placement to CapGen Capital Group II LP.

See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Overview" and Notes 3, 4, 6 and 18 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data" for further information regarding recent transactions.

Banking Business

Pacific Western is a full-service commercial bank offering a broad range of banking products and services including: accepting time and demand deposits; originating loans, including commercial, real estate construction, real estate miniperm, SBA guaranteed and consumer loans; and providing other business-oriented products. We have 77 full-service community banking branches. Our operations are primarily located in Southern California and the Bank focuses on conducting business with small to medium size businesses and the owners and employees of those businesses. The majority of our loans are secured by the real estate collateral of such businesses. We extend credit to customers located primarily in counties we serve. We also provide asset-based lending and factoring of accounts receivable to small businesses located throughout Arizona, California, and the Pacific Northwest through BFI Business Finance, or BFI, based in San Jose, California and First Community Financial, or FCF, based in Phoenix, Arizona. Special services, including international banking services, multi-state deposit services and investment services, or requests beyond the lending limits of the Bank can be arranged through correspondent banks. The Bank also issues ATM and debit cards, has a network of branded ATMs and offers access to ATM networks through other major service providers. We provide access to customer accounts via a 24-hour seven day a week toll-free automated telephone customer service and a secure online banking service.

At December 31, 2010 our assets totaled \$5.5 billion, of which gross non-covered loans totaled \$3.2 billion, or 57% of assets, and covered loans totaled \$908.6 million, or 16% of assets. At this date, the non-covered loans were composed of approximately 22% in commercial loans, 64% in commercial real estate loans, 8% in residential real estate loans, 3% in commercial real estate construction loans, 2% in residential real estate construction loans, and 1% in consumer and other loans. These percentages include some foreign loans, primarily to entities, and on a limited basis to individuals, with business in Mexico, representing 1% of non-covered loans.

We are committed to maintaining premier, relationship-based community banking in Southern California serving the needs of those businesses in our marketplace, as well as serving the needs of growing businesses that may not yet meet the credit standards of the Bank through tightly controlled asset-based lending and factoring of accounts receivable. We compete actively for deposits, and emphasize solicitation of noninterest-bearing deposits. In managing the top line of our business, we focus on making quality loans and gathering low-cost deposits to maximize our net interest margin, as

Table of Contents

net interest income accounted for 84% of our net revenues (net interest income plus noninterest income) in 2010. The strategy for serving our target markets is the delivery of a finely-focused set of value-added products and services that satisfy the primary needs of our customers, emphasizing superior service and relationships over transaction volume or low pricing.

We generate our revenue primarily from the interest received on the various loan products and investment securities and fees from providing deposit services, foreign exchange services and extending credit. Our major operating expenses are the interest paid by the Bank on deposits and borrowings, employee compensation and general operating expenses. The Bank relies on a foundation of locally generated deposits to fund loans. Our Bank has a relatively low cost of funds due to a high percentage of noninterest-bearing and low cost deposits to total deposits. Our operations, similar to other financial institutions with operations predominately focused in Southern California, are significantly influenced by economic conditions in Southern California, including the strength of the real estate market, the fiscal and regulatory policies of the federal and state government and the regulatory authorities that govern financial institutions. See " Supervision and Regulation." Through our offices located in Northern California and our asset-based lending operations with production and marketing offices located in Arizona, Northern California, and the Pacific Northwest, we are also subject to the economic conditions affecting these markets.

Lending Activities

Through the Bank, the Company concentrates its lending activities in four principal areas:

(1) ***Real Estate Loans.*** Real estate loans are comprised of construction loans, miniperms loans collateralized by first or junior deeds of trust on specific commercial properties and equity lines of credit. The properties collateralizing real estate loans are principally located in our primary market areas of Los Angeles, Orange, San Bernardino, Riverside, San Diego, Ventura, Santa Barbara and San Luis Obispo counties in California and the neighboring communities. Construction loans are comprised of loans on commercial, residential and income producing properties that generally have terms of less than two years and typically bear an interest rate that floats with the Bank's base rate or another established index. Miniperms loans finance the purchase and/or ownership of commercial properties, including owner-occupied and income producing properties. Miniperms loans are generally made with an amortization schedule ranging from 15 to 25 years with a lump sum balloon payment due in one to ten years. Equity lines of credit are revolving lines of credit collateralized by junior deeds of trust on residential real properties. They generally bear a rate of interest that floats with the Bank's base rate or the prime rate and have maturities of ten years. From time to time, we purchase participation interests in loans originated by other financial institutions. These loans are subject generally to the same underwriting criteria and approval process as loans originated directly by us.

The Bank's real estate portfolio is subject to certain risks, including, but not limited to: (i) the effects of economic downturns in the Southern California economy and in general; (ii) interest rate increases; (iii) reduction in real estate values in Southern California and in general; (iv) increased competition in pricing and loan structure; (v) the borrower's ability to refinance or payoff the balloon or line of credit at maturity; and (vi) environmental risks, including natural disasters. In addition to the foregoing, construction loans are also subject to project specific risks including, but not limited to: (a) construction costs being more than anticipated; (b) construction taking longer than anticipated; (c) failure by developers and contractors to meet project specifications; (d) disagreement between contractors, subcontractors and developers; (e) demand for completed projects being less than anticipated; (f) buyers being unable to secure financing; and (g) loss through foreclosure.

When underwriting loans, we strive to reduce the exposure to such risks by (i) reviewing each loan request and renewal individually, (ii) using a dual signature approval system for the approval of each loan request for loans over a certain dollar amount, (iii) adhering to written loan policies, including,

Table of Contents

among other factors, minimum collateral requirements, maximum loan-to-value ratio requirements, cash flow requirements and personal guarantees, (iv) obtaining independent third party appraisals which are reviewed by the Bank's appraisal department, (v) obtaining external independent credit reviews, (vi) evaluating concentrations as a percentage of capital and loans, and (vii) conducting environmental reviews, where appropriate. With respect to construction loans, in addition to the foregoing, we attempt to mitigate project specific risks by:

(a) implementing a controlled disbursement process for loan proceeds in accordance with an agreed upon schedule; (b) conducting project site visits; and (c) adhering to release-price schedules to ensure the prices for which newly-built units to be sold are sufficient to repay the Bank. The risks related to buyer inability to secure financing and loss through foreclosure are not controllable. We review each loan request on the basis of our ability to recover both principal and interest in view of the inherent risks.

(2) **Commercial Loans.** Commercial loans, both domestic and foreign, are made to finance operations, to provide working capital, or for specific purposes such as to finance the purchase of assets, equipment or inventory. Since a borrower's cash flow from operations is generally the primary source of repayment, our policies provide specific guidelines regarding required debt coverage and other important financial ratios. Commercial loans include lines of credit and commercial term loans. Lines of credit are extended to businesses or individuals based on the financial strength and integrity of the borrower and guarantor(s) and generally (with some exceptions) are collateralized by short-term assets such as accounts receivable, inventory, equipment or real estate and have a maturity of one year or less. Such lines of credit bear an interest rate that floats with the Bank's base rate, LIBOR or another established index. Commercial term loans are typically made to finance the acquisition of fixed assets, refinance short-term debt originally used to purchase fixed assets or, in rare cases, to finance the purchase of businesses. Commercial term loans generally have terms from one to five years. They may be collateralized by the asset being acquired or other available assets and bear interest rates which either float with the Bank's base rate, LIBOR or another established index or remain fixed for the term of the loan.

The Bank's portfolio of commercial loans is subject to certain risks, including, but not limited to: (i) the effects of economic downturns in the Southern California economy; (ii) interest rate increases; (iii) deterioration of the value of the underlying collateral; and (iv) the deterioration of a borrower's or guarantor's financial capabilities. We strive to reduce the exposure to such risks through: (a) reviewing each loan request and renewal individually; (b) using a dual signature approval system; (c) adhering to written loan policies; (d) obtaining external independent credit reviews, and (e) in the case of certain commercial loans to Mexican or foreign entities, third party insurance which limits our exposure to anywhere from 20 to 30 percent of the underlying loan. In addition, loans based on short-term asset values and factoring arrangements are monitored on a daily, weekly, monthly or quarterly basis and may include lockbox or control account arrangements. In general, the Bank receives and reviews financial statements and other documents of borrowing customers on an ongoing basis during the term of the relationship and responds to any deterioration noted.

(3) **SBA Loans.** SBA loans are made through programs designed by the federal government to assist the small business community in obtaining financing from financial institutions that are given government guarantees as an incentive to make the loans. Our SBA loans fall into two categories, loans originated under the SBA's 7a Program ("7a Loans") and loans originated under the SBA's 504 Program ("504 Loans"). SBA 7a Loans are commercial business loans generally made for the purpose of purchasing real estate to be occupied by the business owner, providing working capital, and/or purchasing equipment, accounts receivable or inventory. SBA 504 Loans are collateralized by commercial real estate and are generally made to business owners for the purpose of purchasing or improving real estate for their use and for equipment used in their business. Due to declining SBA loan origination and loan sale opportunities, we suspended our loan sale operation during 2008 and reduced staff accordingly.

Table of Contents

SBA lending is subject to federal legislation that can affect the availability and funding of the program. From time to time, this dependence on legislative funding causes limitations and uncertainties with regard to the continued funding of such programs, which could potentially have an adverse financial impact on our business.

The Bank's portfolio of SBA loans is subject to certain risks, including, but not limited to: (i) the effects of economic downturns in the Southern California economy; (ii) interest rate increases; (iii) deterioration of the value of the underlying collateral; and (iv) the deterioration of a borrower's or guarantor's financial capabilities. We strive to reduce the exposure of such risks through: (a) reviewing each loan request and renewal individually; (b) using a dual signature approval system; (c) adhering to written loan policies; (d) adhering to SBA written policies and regulations; (e) obtaining independent third party appraisals which are reviewed by the Bank's appraisal department; and (f) obtaining independent credit reviews. In addition, SBA loans normally require monthly installment payments of principal and interest and therefore are continually monitored for past due conditions. In general, the Bank receives and reviews financial statements and other documents of borrowing customers on an ongoing basis during the term of the relationship and responds to any deterioration noted.

(4) **Consumer Loans.** Consumer loans include personal loans, auto loans, boat loans, home improvement loans, revolving lines of credit and other loans typically made by banks to individual borrowers. The Bank's consumer loan portfolio is subject to certain risks, including: (i) amount of credit offered to consumers in the market; (ii) interest rate increases; and (iii) consumer bankruptcy laws which allow consumers to discharge certain debts. We strive to reduce the exposure to such risks through the direct approval of all consumer loans by: (a) reviewing each loan request and renewal individually; (b) using a dual signature approval system; (c) adhering to written credit policies; and (d) obtaining external independent credit reviews.

As part of our efforts to achieve long-term stable profitability and respond to a changing economic environment in Southern California and in other areas where we operate, we constantly evaluate a variety of options to augment our traditional focus by broadening the services and products we provide. Possible avenues of growth include more branch locations, expanded days and hours of operation and new types of loan and deposit products. To date, we have not expanded into areas of brokerage, annuity, insurance or similar investment products and services and have concentrated primarily on the core businesses of accepting deposits, making loans and extending credit.

Business Concentrations

No individual or single group of related accounts is considered material in relation to our total assets or deposits of the Bank, or in relation to the overall business of the Company. However, approximately 77% of our non-covered loan portfolio at December 31, 2010 consisted of real estate-related loans, including construction loans, miniperm loans, commercial real estate mortgage loans and commercial loans secured by commercial real estate. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Financial Condition Non-covered Loans." Since our business activities are currently focused primarily in Southern California, with the majority of our business concentrated in Los Angeles, Orange, Riverside, San Bernardino, San Diego, Ventura, Santa Barbara and San Luis Obispo Counties, our results of operations and financial condition are dependent upon the general trends in the Southern California economies and, in particular, the residential and commercial real estate markets. The concentration of our operations in Southern California exposes us to greater risk than other banking companies with a wider geographic base in the event of catastrophes, such as earthquakes, fires and floods in this region. We conduct foreign lending activities including commercial and real estate lending, consisting predominantly of loans to individuals or entities located in Mexico. At December 31, 2010, our foreign loans consisted of approximately 1% of our non-covered loan portfolio. Such foreign loans are denominated in U.S. dollars and most are collateralized by assets located in the United States or are guaranteed or insured by businesses located

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

in the United States. We have continued to allow our foreign loan portfolio to repay in the ordinary course of business without making any new privately-insured foreign loans other than those under existing commitments.

Strategic Evolution and Acquisition Strategy

The Company was organized on October 22, 1999 as a California corporation for the purpose of becoming a bank holding company and to acquire all the outstanding capital stock of Rancho Santa Fe National Bank. Since that time, we have grown through a series of business acquisitions. Most recently, in August 2010 we purchased certain assets and assumed certain liabilities of Los Padres Bank from the FDIC, as receiver of Los Padres Bank.

The following chart summarizes the acquisitions completed since our inception, some of which are described in more detail below. See also Note 3 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data" in Part II of this Annual Report on Form 10-K for further details regarding our acquisitions.

Date	Institution/Company Acquired
(1) May 2000	Rancho Santa Fe National Bank
(2) May 2000	First Community Bank of the Desert
(3) January 2001	Professional Bancorp, Inc.
(4) October 2001	First Charter Bank
(5) January 2002	Pacific Western National Bank
(6) March 2002	W.H.E.C., Inc.
(7) August 2002	Upland Bank
(8) August 2002	Marathon Bancorp
(9) September 2002	First National Bank
(10) January 2003	Bank of Coronado
(11) August 2003	Verdugo Banking Company
(12) March 2004	First Community Financial Corporation
(13) April 2004	Harbor National Bank
(14) August 2005	First American Bank
(15) October 2005	Pacific Liberty Bank
(16) January 2006	Cedars Bank
(17) May 2006	Foothill Independent Bancorp
(18) October 2006	Community Bancorp Inc.
(19) June 2007	Business Finance Capital Corporation
(20) November 2008	Security Pacific Bank (deposits only)
(21) August 2009	Affinity Bank
(22) August 2010	Los Padres Bank

Security Pacific Bank Deposit Acquisition

On November 7, 2008, we assumed \$427.5 million in deposits from the FDIC as receiver of Security Pacific Bank, or SPB, formerly a Los Angeles-based bank. We assumed all insured and uninsured deposits and paid a 2% premium of approximately \$5.1 million related to the non-brokered deposit base of \$258 million. The estimated brokered deposits as of the assumption date totaled \$169 million. Such deposit assumption was net of acquiring cash, certificates of deposit in other financial institutions, federal funds sold, securities, and loans secured by assumed deposits. As part of the SPB deposit acquisition we also purchased an additional \$31 million in loans. The Security Pacific Bank acquisition was made to expand our presence in the Los Angeles area and to gain experience with FDIC-assisted transactions.

Table of Contents

Affinity Bank Acquisition

On August 28, 2009, we acquired substantially all of the assets of Affinity Bank, including all loans, and assumed substantially all of its liabilities, including the insured and uninsured deposits and excluding certain brokered deposits, from the FDIC in an FDIC-assisted transaction, which we refer to as the Affinity acquisition. Pacific Western (i) acquired \$675.6 million in loans, \$22.9 million in foreclosed assets, \$175.4 million in investments and \$371.5 million in cash and other assets, and (ii) assumed \$868.2 million in deposits, \$305.8 million in borrowings, and \$32.6 million in other liabilities. In connection with the Affinity acquisition, the FDIC made a cash payment to Pacific Western of \$87.2 million. We entered into a loss sharing agreement with the FDIC, whereby the FDIC agreed to cover a substantial portion of any future losses on acquired loans, other real estate owned and certain investment securities. Under the terms of such loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on the first \$234 million of losses on covered assets and absorb 95% of losses and receive 95% of loss recoveries on covered assets exceeding \$234 million. The loss sharing agreement is in effect for 5 years for commercial assets (non-residential loans, OREO and certain securities) and 10 years for residential loans from the August 28, 2009 acquisition date. The loss recovery provisions are in effect for 8 years for commercial assets and 10 years for residential loans from the acquisition date. We refer to the acquired assets subject to the loss sharing agreement collectively as "covered assets." Affinity was a full service commercial bank headquartered in Ventura, California that operated 10 branch locations in California. We made this acquisition to expand our presence in California.

Los Padres Bank Acquisition

On August 20, 2010, we acquired certain assets of Los Padres Bank, including all loans, and assumed substantially all of its liabilities, including all deposits, from the FDIC in an FDIC-assisted acquisition, which we refer to as the Los Padres acquisition. Pacific Western (i) acquired \$437.1 million in loans, \$33.9 million in other real estate owned, \$44.3 million in investments, and \$261.5 million in cash and other assets and (ii) assumed \$752.2 million in deposits, \$70.0 million in borrowings, and \$1.9 million in other liabilities. In connection with the Los Padres acquisition, the FDIC made a cash payment to Pacific Western of \$144.0 million. Other than a deposit premium of \$3.4 million, we paid no cash or other consideration to acquire Los Padres. We entered into a loss sharing agreement with the FDIC, whereby the FDIC agreed to cover a substantial portion of any future losses on acquired loans, with the exception of consumer loans, and other real estate owned. Under the terms of such loss sharing agreement, the FDIC is obligated to reimburse the Bank for 80% of losses with respect to the covered assets. The Bank will reimburse the FDIC for 80% of recoveries with respect to losses for which the FDIC paid the Bank 80% reimbursement under the loss sharing agreement. The loss sharing arrangement for single family covered assets and commercial (non-single family) covered assets is in effect for 10 years and 5 years, respectively, from the acquisition date, and the loss recovery provisions are in effect for 10 years and 8 years, respectively, from the acquisition date. We refer to the acquired assets subject to the loss sharing agreement collectively as "covered assets." Los Padres was a federally chartered savings bank headquartered in Solvang, California that operated 14 branches, including 11 branches in California (three in Ventura County, four in Santa Barbara County, and four in San Luis Obispo County) and three branches in Arizona (Maricopa County). After office consolidations in February 2011, there are nine remaining former Los Padres offices with eight in California and one in Arizona. We made this acquisition to expand our presence in the Central Coast of California.

Competition

The banking business in California, and specifically in the Bank's primary service areas, is highly competitive with respect to originating loans, acquiring deposits and providing other banking services. The market is dominated by commercial banks in Southern California with assets between \$500 million

Table of Contents

and \$25 billion, including ourselves, and a few banking giants with a large number of offices and full-service operations over a wide geographic area. In recent years, competition has increased from institutions not subject to the same regulatory restrictions as domestic banks and bank holding companies. Those competitors include savings and loan associations, brokerage houses, insurance companies, mortgage companies, credit unions, credit card companies, and other financial and non-financial institutions and entities.

Economic factors, along with legislative and technological changes, will have an ongoing impact on the competitive environment within the financial services industry. We work to anticipate and adapt to dynamic competitive conditions whether it may be developing and marketing innovative products and services, adopting or developing new technologies that differentiate our products and services, cross marketing, or providing highly personalized banking services. We strive to distinguish ourselves from other community banks and financial services providers in our marketplace by providing an extremely high level of service to enhance customer loyalty and to attract and retain business. However, we can provide no assurance as to the effectiveness of these efforts on our future business or results of operations, as to our continued ability to anticipate and adapt to changing conditions, and as to sufficiently improving our services and/or banking products in order to successfully compete in our primary service areas.

Employees

As of February 28, 2011, the Company had 929 full time equivalent employees.

Financial and Statistical Disclosure

Certain of our statistical information is presented within "Item 6. Selected Financial Data," "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Item 7A. Qualitative and Quantitative Disclosure About Market Risk." This information should be read in conjunction with the consolidated financial statements contained in "Item 8. Financial Statements and Supplementary Data."

Supervision and Regulation

General

The banking and financial services business in which we engage is highly regulated. Such regulation is intended, among other things, to protect the interests of customers, including depositors. These regulations are not, however, generally charged with protecting the interests of our shareholders or creditors. Described below are the material elements of selected laws and regulations applicable to PacWest and its subsidiaries. The descriptions are not intended to be complete and are qualified in their entirety by reference to the full text of the statutes and regulations described. Changes in applicable law or regulations, and in their application by regulatory agencies, cannot be predicted, but they may have a material effect on the business and results of PacWest and its subsidiaries. The commercial banking business is also influenced by the monetary and fiscal policies of the federal government and the policies of the Federal Reserve Bank, or FRB. The FRB implements national monetary policies (with the dual mandate of price stability and maximum employment) by its open-market operations in United States Government securities, by adjusting the required level of and paying interest on reserves for financial intermediaries subject to its reserve requirements and by varying the discount rates applicable to borrowings by depository institutions. The actions of the FRB in these areas influence the growth of bank loans, investments and deposits and also affect interest rates charged on loans and paid on deposits. Indirectly, such actions may also impact the ability of non-bank financial institutions to compete with the Bank. The nature and impact of any future changes in monetary policies cannot be predicted.

Table of Contents

The events of the past few years have led to numerous new laws in the United States and internationally for financial institutions. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act" or "Dodd-Frank"), which was enacted in July 2010, significantly restructures the financial regulatory regime in the United States, including through the creation of a new systemic risk oversight body, the Financial Stability Oversight Council ("FSOC"). The FSOC will oversee and coordinate the efforts of the primary U.S. financial regulatory agencies (including the FRB, the SEC, the Commodity Futures Trading Commission and the FDIC) in establishing regulations to address financial stability concerns. In addition to the framework for systemic risk oversight implemented through the FSOC, the Dodd-Frank Act broadly affects the financial services industry by creating a resolution authority, mandating higher capital and liquidity requirements, requiring banks to pay increased fees to regulatory agencies, and through numerous other provisions aimed at strengthening the sound operation of the financial services sector. As discussed further throughout this section, many aspects of Dodd-Frank are subject to further rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on PacWest or across the industry.

Bank Holding Company Regulation

As a bank holding company, PacWest is registered with and subject to regulation by the FRB under the Bank Holding Company Act of 1956, as amended, or the BHCA. FRB policy historically has required bank holding companies to act as a source of financial strength to their bank subsidiaries and to commit capital and financial resources to support those subsidiaries in circumstances where it might not otherwise do so. The Dodd-Frank Act codifies this policy as a statutory requirement. Similarly, under the cross-guarantee provisions of the Federal Deposit Insurance Act, the FDIC can hold any FDIC-insured depository institution liable for any loss suffered or anticipated by the FDIC in connection with (i) the default of a commonly controlled FDIC-insured depository institution or (ii) any assistance provided by the FDIC to such a commonly controlled institution. Under the BHCA, we are subject to periodic examination by the FRB. We are also required to file with the FRB periodic reports of our operations and such additional information regarding the Company and its subsidiaries as the FRB may require. Pursuant to the BHCA, we are required to obtain the prior approval of the FRB before we acquire all or substantially all of the assets of any bank or ownership or control of voting shares of any bank if, after giving effect to such acquisition, we would own or control, directly or indirectly, more than 5 percent of such bank.

Under the BHCA, we may not engage in any business other than managing or controlling banks or furnishing services to our subsidiaries that the FRB deems to be so closely related to banking as "to be a proper incident thereto." We are also prohibited, with certain exceptions, from acquiring direct or indirect ownership or control of more than 5 percent of the voting shares of any company unless the company is engaged in banking activities or the FRB determines that the activity is so closely related to banking as to be a proper incident to banking. The FRB's approval must be obtained before the shares of any such company can be acquired and, in certain cases, before any approved company can open new offices.

The BHCA and regulations of the FRB also impose certain constraints on the redemption or purchase by a bank holding company of its own shares of stock.

Additionally, bank holding companies that meet certain eligibility requirements prescribed by the BHCA and elect to operate as financial holding companies may engage in, or own shares in companies engaged in, a wider range of nonbanking activities, including securities and insurance activities and any other activity that the FRB, in consultation with the Secretary of the Treasury, determines by regulation or order is financial in nature, incidental to any such financial activity or complementary to any such financial activity and does not pose a substantial risk to the safety or soundness of depository institutions or the financial system generally. As of the date of this filing, we do not operate as a financial holding company.

Table of Contents

Our earnings and activities are affected by legislation, by regulations and by local legislative and administrative bodies and decisions of courts in the jurisdictions in which we and the Bank conduct business. For example, these include limitations on the ability of the Bank to pay dividends to us and our ability to pay dividends to our shareholders. It is the policy of the FRB that bank holding companies should pay cash dividends on common stock only out of income available over the past year and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. The policy provides that bank holding companies should not maintain a level of cash dividends that undermines the bank holding company's ability to serve as a source of strength to its banking subsidiaries. Various federal and state statutory provisions limit the amount of dividends that subsidiary banks and savings associations can pay to their holding companies without regulatory approval. In addition to these explicit limitations, the federal regulatory agencies have general authority to prohibit a banking subsidiary or bank holding company from engaging in an unsafe or unsound banking practice. Depending upon the circumstances, the agencies could take the position that paying a dividend would constitute an unsafe or unsound banking practice. Further, as discussed below under "Regulation of the Bank", a bank holding company such as the Company is required to maintain minimum ratios of Tier 1 capital and total capital to total risk-weighted assets, and a minimum ratio of Tier 1 capital to total adjusted quarterly average assets as defined in such regulations. The level of our capital ratios may affect our ability to pay dividends. See "Item 5. Market for Registrant's Common Equity and Related Stockholder Matters Dividends" and Note 19 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

Banking subsidiaries of bank holding companies are also subject to certain restrictions imposed by federal law in dealings with their holding companies and other affiliates. Subject to certain exceptions set forth in the Federal Reserve Act, a bank can make a loan or extend credit to an affiliate, purchase or invest in the securities of an affiliate, purchase assets from an affiliate, accept securities of an affiliate as collateral for a loan or extension of credit to any person or company, issue a guarantee or accept letters of credit on behalf of an affiliate only if the aggregate amount of the above transactions of such subsidiary does not exceed 10 percent of such subsidiary's capital stock and surplus on an individual basis or 20 percent of such subsidiary's capital stock and surplus on an aggregate basis. Such transactions must be on terms and conditions that are consistent with safe and sound banking practices. A bank holding company and its subsidiaries generally may not purchase a "low-quality asset," as that term is defined in the Federal Reserve Act, from an affiliate. Such restrictions also prevent a holding company and its other affiliates from borrowing from a banking subsidiary of the holding company unless the loans are secured by collateral. The Dodd-Frank Act significantly expands the coverage and scope of the limitations on affiliate transactions within a banking organization.

The FRB has cease and desist powers over parent bank holding companies and non-banking subsidiaries where the action of a parent bank holding company or its non-financial institutions represent an unsafe or unsound practice or violation of law. The FRB has the authority to regulate debt obligations, other than commercial paper, issued by bank holding companies by imposing interest ceilings and reserve requirements on such debt obligations.

Regulation of the Bank

The Bank is extensively regulated under both federal and state law.

Various requirements and restrictions under federal and state law affect the operations of the Bank. Federal and state statutes and regulations relate to many aspects of the Bank's operations, including standards for safety and soundness, reserves against deposits, interest payable on certain deposit products, investments, mergers and acquisitions, borrowings, dividends, locations of branch offices, fair lending requirements, Community Reinvestment Act activities and loans to affiliates.

Table of Contents

Further, each of the Company and the Bank is required to maintain certain levels of capital. The FRB and the FDIC have substantially similar risk-based capital ratio and leverage ratio guidelines for banking organizations. The guidelines are intended to ensure that banking organizations have adequate capital given the risk levels of assets and off-balance sheet financial instruments. Under the guidelines, banking organizations are required to maintain minimum ratios for Tier 1 capital and total capital to risk-weighted assets (including certain off-balance sheet items, such as letters of credit). For purposes of calculating the ratios, a banking organization's assets and some of its specified off-balance sheet commitments and obligations are assigned to various risk categories. A depository institution's or holding company's capital, in turn, is classified in one of three tiers, depending on type:

Core Capital (Tier 1). Tier 1 capital includes common equity, retained earnings, qualifying non-cumulative perpetual preferred stock, a limited amount of qualifying cumulative perpetual stock at the holding company level, minority interests in equity accounts of consolidated subsidiaries, and qualifying trust preferred securities less goodwill, most intangible assets and certain other assets.

Supplementary Capital (Tier 2). Tier 2 capital includes, among other things, perpetual preferred stock and trust preferred securities not meeting the Tier 1 definition, qualifying mandatory convertible debt securities, qualifying subordinated debt, and allowances for possible credit losses, subject to limitations.

Market Risk Capital (Tier 3). Tier 3 capital includes qualifying unsecured subordinated debt.

The following are the regulatory capital guidelines and the actual capitalization levels for Pacific Western and the Company as of December 31, 2010. Regulatory capital requirements limit the amount of deferred tax assets that may be included when determining the amount of regulatory capital. Deferred tax asset amounts in excess of the calculated limit are deducted from regulatory capital. At December 31, 2010, such amount was \$51.0 million. No assurance can be given that the regulatory capital deferred tax asset limitation will not increase in the future. There was no limitation on the Bank's regulatory capital due to deferred tax assets.

	December 31, 2010			
	Adequately Capitalized	Well Capitalized	Pacific Western Bank	PacWest Bancorp Consolidated
Tier 1 leverage capital ratio	4.00%	5.00%	8.51%	8.54%
Tier 1 risk-based capital ratio	4.00%	6.00%	12.71%	12.68%
Total risk-based capital ratio	8.00%	10.00%	13.99%	13.96%

The Company issued subordinated debentures to trusts that were established by us or entities we have acquired, which, in turn, issued trust preferred securities, which totaled \$123.0 million at December 31, 2010. These securities are currently included in our Tier I capital for purposes of determining the Company's Tier I and total risk-based capital ratios. The Board of Governors of the Federal Reserve System, which is the holding company's banking regulator, has promulgated a modification of the capital regulations affecting trust preferred securities. Although this modification was scheduled to be effective on March 31, 2009, the Federal Reserve postponed the effective date to March 31, 2011. At that time, the Company will be allowed to include in Tier I capital an amount of trust preferred securities equal to no more than 25% of the sum of all core capital elements, which is generally defined as shareholders' equity less goodwill, net of any related deferred income tax liability. The regulations currently in effect through December 31, 2010, limit the amount of trust preferred securities that can be included in Tier I capital to 25% of the sum of core capital elements without a deduction for goodwill. We have determined that our Tier I capital ratios would remain above the well-capitalized level had the modification of the capital regulations been in effect at December 31, 2010. We expect that our Tier I capital ratios will be at or above the existing well-capitalized levels on

Table of Contents

March 31, 2011, the first date on which the modified capital regulations must be applied. While our existing trust preferred securities are grandfathered, Dodd-Frank precludes new issuances from qualifying as Tier 1 capital.

The FDIC and FRB risk-based capital guidelines are based upon the 1988 Capital Accord ("Basel I") of the Basel Committee on Banking Supervision (the "Basel Committee"). The Basel Committee is a committee of central banks and bank supervisors/regulators from the major industrialized countries that develops broad policy guidelines that each country's supervisors can use to determine the supervisory policies they apply. After working on revisions for a number of years, in June 2004, the Basel Committee released the final version of its proposed new capital framework, with an update in November 2005 ("Basel II"). Basel II proposes two approaches for setting capital standards for credit risk: an internal ratings-based approach tailored to individual institutions' circumstances (which for many asset classes is itself broken into a "foundation" approach and an "advanced" or "A-IRB" approach, the availability of which is subject to additional restrictions) and a standardized approach that bases risk weightings on external credit assessments to a much greater extent than permitted in existing risk-based capital guidelines. Basel II also would set capital requirements for operational risk and refine the existing capital requirements for market risk exposures.

The U.S. banking and thrift agencies are developing proposed revisions to their existing capital adequacy regulations and standards based on Basel II. In December 2006, the agencies issued a notice of proposed rulemaking setting forth a definitive proposal for implementing Basel II in the United States that would apply only to internationally active banking organizations defined as those with consolidated total assets of \$250 billion or more or consolidated on-balance sheet foreign exposures of \$10 billion or more but that other U.S. banking organizations could elect but would not be required to apply. In November 2007, the agencies adopted a definitive final rule for implementing Basel II in the United States that would apply only to internationally active banking organizations, or "core banks" defined as those with consolidated total assets of \$250 billion or more or consolidated on-balance sheet foreign exposures of \$10 billion or more. The final rule was effective on April 1, 2008.

The Company is not required to comply with Basel II and we have not adopted the Basel II approach.

In June 2008, the U.S. banking and thrift agencies announced a proposed rule that would provide all non-core banking organizations (that is, banking organizations not required to adopt the advanced approaches) with the option to adopt a way to determine required regulatory capital that is more risk sensitive than the current Basel I-based rules, yet is less complex than the advanced approaches in the final rule. The proposed standardized framework addresses (i) expanding the number of risk-weight categories to which credit exposures may be assigned; (ii) using loan-to-value ratios to risk weight most residential mortgages to enhance the risk sensitivity of the capital requirement; (iii) providing a capital charge for operational risk using the Basic Indicator Approach under the international Basel II capital accord; (iv) emphasizing the importance of a bank's assessment of its overall risk profile and capital adequacy; and (v) providing for comprehensive disclosure requirements to complement the minimum capital requirements and supervisory process through market discipline. This new proposal will replace the agencies' earlier Basel I-A proposal, issued in December 2006.

In December 2010, the Basel Committee released its final framework for strengthening international capital and liquidity regulation, now officially identified by the Basel Committee as "Basel III". Basel III, when implemented by the U.S. banking agencies and fully phased-in, will require bank holding companies and their bank subsidiaries to maintain substantially more capital, with a greater emphasis on common equity.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

The Basel III final capital framework, among other things:

introduces as a new capital measure "Common Equity Tier 1", or "CET1", specifies that Tier 1 capital consists of CET1 and "Additional Tier 1 capital" instruments meeting specified requirements, defines CET1 narrowly by requiring that most adjustments to regulatory capital measures be made to CET1 and not to the other components of capital, and expands the scope of the adjustments as compared to existing regulations;

when fully phased in on January 1, 2019, requires banks to maintain:

as a newly adopted international standard, a minimum ratio of CET1 to risk-weighted assets of at least 4.5%, plus a 2.5% "capital conservation buffer" (which is added to the 4.5% CET1 ratio as that buffer is phased in, effectively resulting in a minimum ratio of CET1 to risk-weighted assets of at least 7%);

a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, plus the capital conservation buffer (which is added to the 6.0% Tier 1 capital ratio as that buffer is phased in, effectively resulting in a minimum Tier 1 capital ratio of 8.5% upon full implementation);

a minimum ratio of Total (that is, Tier 1 plus Tier 2) capital to risk-weighted assets of at least 8.0%, plus the capital conservation buffer (which is added to the 8.0% total capital ratio as that buffer is phased in, effectively resulting in a minimum total capital ratio of 10.5% upon full implementation); and

as a newly adopted international standard, a minimum leverage ratio of 3%, calculated as the ratio of Tier 1 capital to balance sheet exposures plus certain off-balance sheet exposures (as the average for each quarter of the month-end ratios for the quarter); and

provides for a "countercyclical capital buffer", generally to be imposed when national regulators determine that excess aggregate credit growth becomes associated with a buildup of systemic risk, that would be a CET1 add-on to the capital conservation buffer in the range of 0% to 2.5% when fully implemented (potentially resulting in total buffers of between 2.5% and 5%).

The capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a ratio of CET1 to risk-weighted assets above the minimum but below the conservation buffer (or below the combined capital conservation buffer and countercyclical capital buffer, when the latter is applied) will face constraints on dividends, equity repurchases and compensation based on the amount of the short fall.

The implementation of the Basel III final framework will commence January 1, 2013. On that date, banking institutions will be required to meet the following minimum capital ratios:

3.5% CET1 to risk-weighted assets;

4.5% Tier 1 capital to risk-weighted assets; and

8.0% Total capital to risk-weighted assets.

The Basel III final framework provides for a number of new deductions from and adjustments to CET1. These include, for example, the requirement that mortgage servicing rights, deferred tax assets dependent upon future taxable income and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories

in the aggregate exceed 15% of CET1.

Table of Contents

Implementation of the deductions and other adjustments to CET1 will begin on January 1, 2014 and will be phased-in over a five-year period (20% per year). The implementation of the capital conservation buffer will begin on January 1, 2016 at 0.625% and be phased in over a four-year period (increasing by that amount on each subsequent January 1, until it reaches 2.5% on January 1, 2019).

The U.S. banking agencies have indicated informally that they expect to propose regulations implementing Basel III in mid-2011 with final adoption of implementing regulations in mid-2012. Given that the Basel III rules are subject to change, and the scope and content of capital regulations that the U.S. banking agencies may adopt under Dodd-Frank is uncertain, we cannot be certain of the impact new capital regulations will have on our capital ratios.

Historically, regulation and monitoring of bank and bank holding company liquidity has been addressed as a supervisory matter, both in the U.S. and internationally, without required formulaic measures. The Basel III final framework requires banks and bank holding companies to measure their liquidity against specific liquidity tests that, although similar in some respects to liquidity measures historically applied by banks and regulators for management and supervisory purposes, going forward will be required by regulation. One test, referred to as the liquidity coverage ratio ("LCR"), is designed to ensure that the banking entity maintains an adequate level of unencumbered high-quality liquid assets equal to the entity's expected net cash outflow for a 30-day time horizon (or, if greater, 25% of its expected total cash outflow) under an acute liquidity stress scenario. The other, referred to as the net stable funding ratio ("NSFR"), is designed to promote more medium- and long-term funding of the assets and activities of banking entities over a one-year time horizon. These requirements will incent banking entities to increase their holdings of U.S. Treasury securities and other sovereign debt as a component of assets and increase the use of long-term debt as a funding source. The LCR would be implemented subject to an observation period beginning in 2011, but would not be introduced as a requirement until January 1, 2015, and the NSFR would not be introduced as a requirement until January 1, 2018. These new standards are subject to further rulemaking and their terms may well change before implementation.

Prompt Corrective Action

The Federal Deposit Insurance Corporation Improvement Act, or FDICIA, requires each federal banking agency to take prompt corrective action to resolve the problems of insured depository institutions, including but not limited to those that fall below one or more prescribed minimum capital ratios. Pursuant to FDICIA, the FDIC promulgated regulations defining the following five categories in which an insured depository institution will be placed, based on the level of its capital ratios: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. Under the prompt corrective action provisions of FDICIA, an insured depository institution generally will be classified as undercapitalized if its total risk-based capital is less than 8% or its Tier 1 risk-based capital or leverage ratio is less than 4%. An institution that, based upon its capital levels, is classified as "well capitalized", "adequately capitalized" or "undercapitalized" may be treated as though it were in the next lower capital category if the appropriate federal banking agency, after notice and opportunity for hearing, determines that an unsafe or unsound condition or an unsafe or unsound practice warrants such treatment. At each successive lower capital category, an insured depository institution is subject to more restrictions and prohibitions, including restrictions on growth, restrictions on interest rates paid on deposits, prohibitions on payment of dividends and restrictions on the acceptance of brokered deposits. Furthermore, if a bank is classified in one of the undercapitalized categories, it is required to submit a capital restoration plan to the federal bank regulator, and the holding company must guarantee the performance of that plan.

In addition to measures taken under the prompt corrective action provisions, commercial banking organizations may be subject to potential enforcement actions by the federal or state banking agencies for unsafe or unsound practices in conducting their businesses or for violations of any law, rule,

Table of Contents

regulation or any condition imposed in writing by the agency or any written agreement with the agency. Enforcement actions may include the imposition of a conservator or receiver, the issuance of a cease-and-desist order that can be judicially enforced, the termination of insurance for deposits (in the case of a depository institution), the imposition of civil money penalties, the issuance of directives to increase capital, the issuance of formal and informal agreements, the issuance of removal and prohibition orders against institution-affiliated parties. The enforcement of such actions through injunctions or restraining orders may be based upon a judicial determination that the agency would be harmed if such equitable relief was not granted.

Deposit Insurance

Pacific Western is a state-chartered, "non-member" bank and therefore is regulated by the California Department of Financial Institutions, or DFI, and the FDIC. Pacific Western is also an FDIC insured financial institution whereby the FDIC provides deposit insurance for a certain maximum dollar amount per customer.

The Bank, as is the case with all FDIC insured banks, is subject to deposit insurance assessments as determined by the FDIC. Historically, the FDIC imposed insurance premiums based on the amount of deposits held and a risk matrix that takes into account, among other factors, a bank's capital level and supervisory rating. The Dodd-Frank Act requires the FDIC to amend its regulations to determine insurance assessments based on the average consolidated assets less the average tangible equity of the insured depository institution during the assessment period. The proposed regulations could increase the assessments paid by the Bank.

In late 2008, in an effort to strengthen confidence and encourage liquidity in the banking system, the FDIC temporarily increased the maximum amount of deposit insurance to \$250,000 per customer and adopted a number of programs, including the Transaction Account Guarantee Program. The Transaction Account Guarantee Program guaranteed the entire balance of non-interest bearing deposit transaction accounts through December 31, 2010. Institutions participating in the Transaction Account Guarantee Program were charged a 10-basis point fee on the balance of non-interest bearing deposit transaction accounts exceeding the existing deposit insurance limit of \$250,000. The cost to the Bank for participating in this program was \$794,000 for 2010 and \$452,000 for 2009. Under Dodd-Frank, the \$250,000 maximum amount was made permanent, and the unlimited protection for noninterest-bearing transaction accounts was extended to December 31, 2012 and to all insured depository institutions.

On November 12, 2009, the FDIC required insured depository institutions to prepay, on December 30, 2009, their estimated quarterly assessments for the fourth quarter of 2009, and for all of 2010, 2011, and 2012. The amount of Pacific Western's FDIC assessment prepayment was \$19.5 million, which we paid on December 30, 2009. In addition, the FDIC imposed a special assessment on all depository institutions in the second quarter of 2009; such assessment was \$2.0 million for the Bank.

The 2009 prepayments and special assessment for FDIC insurance are in contrast to the lower FDIC insurance assessment expense for Pacific Western in 2008 and 2007. Because of favorable loss experience and a healthy reserve ratio in the deposit insurance fund of the FDIC, well-capitalized and well-managed banks, including Pacific Western, paid minimal premiums for FDIC insurance during 2008 and 2007. A deposit premium refund, in the form of credit offsets, was given to banks that were in existence on December 31, 1996 and paid deposit insurance premiums prior to that date. Pacific Western utilized its credit offset to eliminate a portion of its 2008 and nearly all of its 2007 FDIC insurance assessments.

Based on the current FDIC insurance assessment methodology and including our participation in the Transaction Account Guarantee Program, our FDIC insurance assessment was \$8.1 million for 2010.

Table of Contents

Depositor Preference

The Federal Deposit Insurance Act provides that, in the event of the "liquidation or other resolution" of an insured depository institution, the claims of depositors of the institution, including the claims of the FDIC as subrogee of insured depositors, and certain claims for administrative expenses of the FDIC as a receiver, will have priority over other general unsecured claims against the institution. If an insured depository institution fails, insured and uninsured depositors, along with the FDIC, will have priority in payment ahead of unsecured, non-deposit creditors, including the parent bank holding company, with respect to any extensions of credit they have made to such insured depository institution.

Sarbanes-Oxley Act

As a publicly traded company, we are subject to the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley Act"). The principal provisions of the Sarbanes-Oxley Act, many of which have been implemented or interpreted through regulations, provide for and include, among other things: (i) the creation of an independent accounting oversight board; (ii) auditor independence provisions that restrict non-audit services that accountants may provide to their audit clients; (iii) additional corporate governance and responsibility measures, including the requirement that the chief executive officer and chief financial officer of a public company certify financial statements; (iv) the forfeiture of bonuses or other incentive-based compensation and profits from the sale of an issuer's securities by directors and senior officers in the twelve month period following initial publication of any financial statements that later require restatement; (v) an increase in the oversight of, and enhancement of certain requirements relating to, audit committees of public companies and how they interact with the Company's independent auditors; (vi) requirements that audit committee members must be independent and are barred from accepting consulting, advisory or other compensatory fees from the issuer; (vii) requirements that companies disclose whether at least one member of the audit committee is a "financial expert" (as such term is defined by the SEC) and if not discussed, why the audit committee does not have a financial expert; (viii) expanded disclosure requirements for corporate insiders, including accelerated reporting of stock transactions by insiders and a prohibition on insider trading during pension blackout periods; (ix) a prohibition on personal loans to directors and officers, except certain loans made by insured financial institutions on nonpreferential terms and in compliance with other bank regulatory requirements; (x) disclosure of a code of ethics and filing a Form 8-K for a change or waiver of such code; (xi) a range of enhanced penalties for fraud and other violations; and (xii) expanded disclosure and certification relating to an issuer's disclosure controls and procedures and internal controls over financial reporting.

As a result of the Sarbanes-Oxley Act, and its implementing regulations, we have incurred substantial costs to interpret and ensure ongoing compliance with the law and its regulations. Future changes in the laws, regulation, or policies that impact us cannot necessarily be predicted and may have a material effect on our business and earnings.

USA PATRIOT Act

The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, or the PATRIOT Act, designed to deny terrorists and others the ability to obtain access to the United States financial system, has significant implications for depository institutions, brokers, dealers and other businesses involved in the transfer of money. The PATRIOT Act, as implemented by various federal regulatory agencies, requires financial institutions, including the Company, to establish and implement policies and procedures with respect to, among other matters, anti-money laundering, compliance, suspicious activity and currency transaction reporting and due diligence on customers. The PATRIOT Act and its underlying regulations permit information sharing for counter-terrorist purposes between federal law enforcement agencies and financial institutions, as well as among financial institutions, subject to certain conditions, and require the FRB, the FDIC and

Table of Contents

other federal banking agencies to evaluate the effectiveness of an applicant in combating money laundering activities when considering applications filed under Section 3 of the BHCA or the Bank Merger Act. We regularly evaluate and continue to augment our systems and procedures to continue to comply with the PATRIOT Act and other anti-money laundering initiatives. We believe that the ongoing cost of compliance with the PATRIOT Act is not likely to be material to the Company. Failure of a financial institution to maintain and implement adequate programs to combat money laundering and terrorist financing, or to comply with all of the relevant laws or regulations, could have serious legal and reputational consequences for the institution.

Office of Foreign Assets Control Regulation

The United States has imposed economic sanctions that affect transactions with designated foreign countries, nationals and others. These are typically known as the "OFAC" rules based on their administration by the U.S. Treasury Department Office of Foreign Assets Control ("OFAC"). The OFAC-administered sanctions targeting countries take many different forms. Generally, however, they contain one or more of the following elements: (i) restrictions on trade with or investment in a sanctioned country, including prohibitions against direct or indirect imports from and exports to a sanctioned country and prohibitions on "U.S. persons" engaging in financial transactions relating to making investments in, or providing investment-related advice or assistance to, a sanctioned country; and (ii) a blocking of assets in which the government or specially designated nationals of the sanctioned country have an interest, by prohibiting transfers of property subject to U.S. jurisdiction (including property in the possession or control of U.S. persons). Blocked assets (e.g., property and bank deposits) cannot be paid out, withdrawn, set off or transferred in any manner without a license from OFAC. Failure to comply with these sanctions could have serious legal and reputational consequences.

Community Reinvestment Act

The Community Reinvestment Act of 1977, or the CRA, generally requires insured depository institutions to identify the communities they serve and to make loans and investments, offer products, and provide services designed to meet the credit needs of these communities. The CRA also requires banks to maintain comprehensive records of its CRA activities to demonstrate how it is meeting the credit needs of their communities; these documents are subject to periodic examination by the FDIC. During these examinations, the FDIC rates such institutions' compliance with CRA as "Outstanding," "Satisfactory," "Needs to Improve" or "Substantial Noncompliance." The CRA requires the FDIC to take into account the record of a bank in meeting the credit needs of the entire communities served, including low- and moderate income neighborhoods, in determining such rating. Failure of an institution to receive at least a "Satisfactory" rating could inhibit such institution or its holding company from undertaking certain activities, including acquisitions. The Bank received a CRA rating of "Satisfactory" as of its most recent examination.

Customer Information Security

The FRB and other bank regulatory agencies have adopted final guidelines for safeguarding confidential, personal customer information. These guidelines require each financial institution, under the supervision and ongoing oversight of its board of directors or an appropriate committee thereof, to create, implement and maintain a comprehensive written information security program designed to ensure the security and confidentiality of customer information, protect against any anticipated threats or hazard to the security or integrity of such information and protect against unauthorized access to or use of such information that could result in substantial harm or inconvenience to any customer. We have adopted a customer information security program to comply with such requirements.

Table of Contents

Privacy

The Gramm-Leach-Bliley Act of 1999 and the California Financial Information Privacy Act require financial institutions to implement policies and procedures regarding the disclosure of nonpublic personal information about consumers to non-affiliated third parties. In general, the statutes require explanations to consumers on policies and procedures regarding the disclosure of such nonpublic personal information, and, except as otherwise required by law, prohibit disclosing such information except as provided in the Bank's policies and procedures. Pacific Western has implemented privacy policies addressing these restrictions which are distributed regularly to all existing and new customers of the Bank.

Legislative and Regulatory Initiatives

From time to time, various legislative and regulatory initiatives are introduced in the U.S. Congress and state legislatures, as well as by regulatory agencies. Such initiatives may include proposals to expand or contract the powers of bank holding companies and depository institutions or proposals to substantially change the financial institution regulatory system. Such legislation could change banking statutes and our operating environment in substantial and unpredictable ways. If enacted, such legislation could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance among banks, savings associations, credit unions, and other financial institutions. We cannot predict whether any such legislation will be enacted, and, if enacted, the effect that it, or any implementing regulations, would have on our financial condition, results of operations or cash flows. A change in statutes, regulations or regulatory policies applicable to the Company or any of its subsidiaries could have a material effect on our business.

Hazardous Waste Clean-Up and Climate-Related Risk

Our primary exposure to environmental laws is through our lending activities and through properties or businesses we may own, lease or acquire since we are not involved in any business that manufactures, uses or transports chemicals, waste, pollutants or toxins that might have a material adverse effect on the environment. Based on a general survey of the Bank's loan portfolio, conversations with local appraisers and the type of lending currently and historically done by the Bank, we are not aware of any potential liability for hazardous waste contamination that would be reasonably likely to have a material adverse effect on the Company as of February 16, 2010. In addition, we are not aware of any physical or regulatory consequence resulting from climate change that would have a material adverse effect upon the Company.

Available Information

We maintain an Internet website at www.pacwestbancorp.com, and a website for Pacific Western at www.pacificwesternbank.com. At www.pacwestbancorp.com and via the "Investor Relations" link at the Bank's website, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act are available, free of charge, as soon as reasonably practicable after such forms are electronically filed with, or furnished to, the SEC. The public may read and copy any materials we file with the SEC at the SEC's Public Reference Room, located at 100 F Street, NE, Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet website at <http://www.sec.gov> that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. You may obtain copies of the Company's filings on the SEC site. These documents may also be obtained in print upon request by our stockholders to our Investor Relations Department.

Table of Contents

We have adopted a written code of ethics that applies to all directors, officers and employees of the Company, including our principal executive officer and senior financial officers, in accordance with Section 406 of the Sarbanes-Oxley Act of 2002 and the rules of the Securities and Exchange Commission promulgated thereunder. The code of ethics, which we call our Code of Business Conduct and Ethics, is available on our corporate website, www.pacwestbancorp.com in the section entitled "Corporate Governance." In the event that we make changes in, or provide waivers from, the provisions of this code of ethics that the SEC requires us to disclose, we intend to disclose these events on our corporate website in such section. In the Corporate Governance section of our corporate website, we have also posted the charters for our Audit Committee and our Compensation, Nominating and Governance Committee, as well as our Corporate Governance Guidelines. In addition, information concerning purchases and sales of our equity securities by our executive officers and directors is posted on our website.

Our Investor Relations Department can be contacted at PacWest Bancorp, 275 N. Brea Blvd., Brea, CA 92821, Attention: Investor Relations, telephone (714) 671-6800, or via e-mail to investor-relations@pacwestbancorp.com.

All website addresses given in this document are for information only and are not intended to be an active link or to incorporate any website information into this document.

Forward-Looking Information

This Annual Report on Form 10-K contains certain forward-looking information about the Company, which statements are intended to be covered by the safe harbor for "forward-looking statements" provided by the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact are forward-looking statements. Such statements involve inherent risks and uncertainties, many of which are difficult to predict and are generally beyond the control of the Company. We caution readers that a number of important factors could cause actual results to differ materially from those expressed in, implied or projected by, such forward-looking statements. Risks and uncertainties include, but are not limited to:

lower than expected revenues;

credit quality deterioration or pronounced and sustained reduction in real estate market values resulting in an increase in the allowance for credit losses and a reduction in earnings;

increased competitive pressure among depository institutions;

the Company's ability to complete future acquisitions and to successfully integrate such acquired entities or achieve expected benefits, synergies and/or operating efficiencies within expected time-frames or at all;

the possibility that personnel changes will not proceed as planned;

the cost of additional capital is more than expected;

a change in the interest rate environment reduces interest margins;

asset/liability repricing risks and liquidity risks;

pending legal matters may take longer or cost more to resolve or may be resolved adversely to the Company;

general economic conditions, either nationally or in the market areas in which the Company does or anticipates doing business, are less favorable than expected;

Table of Contents

environmental conditions, including natural disasters, may disrupt our business, impede our operations, negatively impact the values of collateral securing the Company's loans or impair the ability of our borrowers to support their debt obligations;

the economic and regulatory effects of the continuing war on terrorism and other events of war, including the conflicts in Iraq, Afghanistan, and neighboring countries;

legislative or regulatory requirements or changes adversely affecting the Company's business;

changes in the securities markets; and

regulatory approvals for any capital activities or payment of dividends cannot be obtained, or are not obtained on terms expected or on the anticipated schedule.

If any of these risks or uncertainties materializes or if any of the assumptions underlying such forward-looking statements proves to be incorrect, our results could differ materially from those expressed in, implied or projected by, such forward-looking statements. Therefore, readers should be mindful that forward-looking statements are not guarantees of future performance and that they are subject to known and unknown risks and uncertainties that are difficult to predict. Except as required by law, we undertake no, and hereby disclaim any, obligation to update any forward-looking statements, whether as a result of new information, changed circumstances or otherwise. For additional information concerning risks and uncertainties related to us and our operations, please refer to Items 1 through 7A of this Annual Report on Form 10-K.

ITEM 1A. RISK FACTORS

Ownership of our common stock involves risk. You should carefully consider, in addition to the other information set forth herein, the following risk factors.

Our business has been and may continue to be adversely affected by current conditions in the financial markets and economic conditions generally.

From December 2007 through June 2009, the U.S. economy was in recession and economic recovery through 2010 has been sluggish. As a result, the global financial markets have undergone and may continue to experience pervasive and fundamental disruptions. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to those issuers' underlying financial strength. While economic conditions have recently shown signs of improvement, the sustainability of an economic recovery is uncertain as business activity across a wide range of industries continues to face difficulties due to the lack of consumer spending and sustained high levels of unemployment.

A sustained weakness or further weakening in business and economic conditions generally or specifically in the principal markets in which we do business could have one or more of the following adverse effects on our business:

a decrease in the demand for loans and other products and services offered by us;

a decrease in deposit balances due to overall reductions in the accounts of customers;

a decrease in the value of our loans or other assets secured by consumer or commercial real estate;

an impairment of certain intangible assets; or

Edgar Filing: PACWEST BANCORP - Form 10-K

an increase in the number of borrowers who become delinquent, file for protection under bankruptcy laws or default on their loans or other obligations to us. An increase in the number of delinquencies, bankruptcies or defaults could result in a higher level of nonperforming assets, net charge-offs and provision for credit losses.

Table of Contents

Overall, the economic downturn has had an adverse effect on our business, and there can be no assurance that an economic recovery will be sustainable in the near term. Until conditions improve, we expect our business, financial condition and results of operations to be adversely affected.

Changes in economic conditions, in particular a worsening of the economic slowdown in Southern California, could materially and adversely affect our business.

Our business is directly impacted by factors such as economic, political and market conditions, broad trends in industry and finance, legislative and regulatory changes, and changes in government monetary and fiscal policies and inflation, all of which are beyond our control. The current economic conditions have caused a lack of consumer confidence, increased market volatility and widespread reduction of business activity generally. These circumstances may lead to a renewed increase in nonaccrual and classified loans, which generally results in a provision for credit losses and in turn reduces the Company's net earnings. The State of California continues to face fiscal challenges, the long-term effects of which on the State's economy cannot be predicted. A further deterioration in the economic conditions, whether caused by national or local concerns, could materially and adversely affect our business. In particular, further deterioration of the economic conditions in Southern California could result in the following consequences, any of which could materially and adversely affect our business: loan delinquencies may increase; problem assets and foreclosures may increase; demand for our products and services may decrease; low cost or noninterest bearing deposits may decrease; and collateral for loans made by us, especially real estate, may decline in value, in turn reducing customers' borrowing power, and reducing the value of assets and collateral associated with our existing loans. Until conditions provide for sustainable improvement, we expect our business, financial condition and results of operations to be adversely affected.

Further disruptions in the real estate market could materially and adversely affect our business.

There has been a slow-down in the real estate market due to negative economic trends and credit market disruption, the impacts of which are not yet completely known or quantified. At December 31, 2010, 64% of our non-covered loans were secured by commercial real estate, 3% were secured by commercial real estate construction projects, 2% were secured by residential real estate construction projects and 8% were secured by residential real estate. We have observed in the marketplace tighter credit underwriting and higher premiums on liquidity, both of which may continue to place downward pressure on real estate values. Any further downturn in the real estate market could materially and adversely affect our business because a significant portion of our non-covered loans are secured by real estate. Our ability to recover on defaulted non-covered loans by selling the real estate collateral would then be diminished and we would be more likely to suffer losses on defaulted non-covered loans. Substantially all of our real property collateral is located in Southern California. If there is a further decline in real estate values, especially in Southern California, the collateral for our non-covered loans would provide less security. Real estate values could be affected by, among other things, a worsening of the economic conditions, an increase in foreclosures, a decline in home sale volumes, an increase in interest rates, high levels of unemployment, earthquakes and other natural disasters particular to California.

Our business is subject to interest rate risk, and variations in interest rates may materially and adversely affect our financial performance.

Changes in the interest rate environment may reduce our profits. It is expected that we will continue to realize income from the differential or "spread" between the interest earned on loans, securities and other interest earning assets, and interest paid on deposits, borrowings and other interest bearing liabilities. Net interest spreads are affected by the difference between the maturities and repricing characteristics of interest earning assets and interest bearing liabilities. Changes in market

Table of Contents

interest rates generally affect loan volume, loan yields, funding sources and funding costs. Our net interest spread depends on many factors that are partly or completely out of our control, including competition, federal economic monetary and fiscal policies, and general economic conditions.

While an increase in the general level of interest rates may increase our loan yield, it may adversely affect the ability of certain borrowers with variable rate loans to pay the interest on and principal of their obligations. In addition, an increase in market interest rates on loans is generally associated with a lower volume of loan originations, which may reduce earnings. Following an increase in the general level of interest rates, our ability to maintain a positive net interest spreads is dependent on our ability to increase our loan offering rates, replace loan maturities with new originations, minimize increases on our deposit rates, and maintain an acceptable level and mix of funding. We cannot provide assurances that we will be able to increase our loan offering rates and continue to originate loans due to the competitive landscape in which we operate. Additionally, we cannot provide assurances that we can minimize the increases in our deposit rates while maintaining an acceptable level of deposits. Finally, we cannot provide any assurances that we can maintain our current levels of noninterest bearing deposits as customers may seek higher yielding products when rates increase.

Following a decline in the general level of interest rates, our ability to maintain a positive net interest spread is dependent on our ability to reduce the interest paid on deposits, borrowings, and other interest bearing liabilities. We cannot provide assurance that we would be able to lower the rates paid on deposit accounts to support our liquidity requirements as lower rates may result in deposit outflows.

Accordingly, changes in levels of market interest rates could materially and adversely affect our net interest spread, asset quality, loan origination volume, liquidity, and overall profitability. We cannot assure you that we can minimize our interest rate risk.

We face strong competition from financial services companies and other companies that offer banking services which could materially and adversely affect our business.

We conduct our banking operations primarily in Southern California. Increased competition in our market may result in reduced loans and deposits. Ultimately, we may not be able to compete successfully against current and future competitors. Many competitors offer the same banking services that we offer in our service area. These competitors include national banks, regional banks and other community banks. We also face competition from many other types of financial institutions, including without limitation, savings and loan institutions, finance companies, brokerage firms, insurance companies, credit unions, mortgage banks and other financial intermediaries. In particular, our competitors include several major financial companies whose greater resources may afford them a marketplace advantage by enabling them to maintain numerous banking locations and ATMs and conduct extensive promotional and advertising campaigns.

Additionally, banks and other financial institutions with larger capitalization and financial intermediaries not subject to bank regulatory restrictions have larger lending limits and are thereby able to serve the credit needs of larger customers. Areas of competition include interest rates for loans and deposits, efforts to obtain deposits, and range and quality of products and services provided, including new technology driven products and services. Technological innovation continues to contribute to greater competition in domestic and international financial services markets as technological advances enable more companies to provide financial services. We also face competition from out-of-state financial intermediaries that have opened production offices or that solicit deposits in our market areas. Should competition in the financial services industry intensify, our ability to market our products and services may be adversely affected. If we are unable to attract and retain banking customers, we may be unable to grow or maintain the levels of our loans and deposits and our results of operations and financial condition may be adversely affected.

Table of Contents

Competition from financial institutions seeking to maintain adequate liquidity places upward pressure on the rates paid on certain deposit accounts relative to the level of market interest rates during times of both decreasing and increasing market liquidity. To maintain both attractive and adequate levels of liquidity, without exhausting secondary sources of liquidity, we may incur increased deposit costs.

Several rating agencies publish unsolicited ratings of the financial performance and relative financial health of many banks, including Pacific Western, based on publicly available data. As these ratings are publicly available, a decline in the Bank's ratings may result in deposit outflows or the inability of the Bank to raise deposits in the secondary market as broker-dealers and depositors may use such ratings in deciding where to deposit their funds.

We may need to raise additional capital in the future and such capital may not be available when needed or at all.

We may need to raise additional capital in the future to provide us with sufficient capital resources and liquidity to meet our commitments and business needs. As a publicly traded company, a likely source of additional funds is the capital markets, accomplished generally through the issuance of equity, both common and preferred stock, and the issuance of subordinated debentures. Our ability to raise additional capital, if needed, will depend on, among other things, conditions in the capital markets at that time, which are outside of our control, and our financial performance. The current economic conditions and the loss of confidence in financial institutions may increase our cost of funding and limit our access to some of our customary sources of liquidity, including, but not limited to, the capital markets, inter-bank borrowings, repurchase agreements and borrowings from the discount window of the Federal Reserve.

We cannot assure you that access to such capital and liquidity will be available to us on acceptable terms or at all. Any occurrence that may limit our access to the capital markets, such as a decline in the confidence of debt purchasers, or depositors of the Bank or counterparties participating in the capital markets may materially and adversely affect our capital costs and our ability to raise capital and, in turn, our liquidity. An inability to raise additional capital on acceptable terms when needed could have a materially adverse effect on our business.

We are subject to extensive regulation which could materially and adversely affect our business.

Our operations are subject to extensive regulation by federal and state governmental authorities, and we are subject to various laws and judicial and administrative decisions imposing requirements and restrictions on part or all of our operations. The Dodd-Frank Act, enacted in July 2010, instituted major changes to the banking and financial institutions regulatory regimes in light of the recent performance of and government intervention in the financial services sector. Regulations affecting banks and other financial institutions, such as the Dodd-Frank Act, are undergoing continuous review and change frequently; the ultimate effect of such changes cannot be predicted. Because our business is highly regulated, compliance with such regulations and laws may increase our costs and limit our ability to pursue business opportunities. Also, participation in specific government stabilization programs may subject us to additional restrictions. There can be no assurance that proposed laws, rules and regulations will not be adopted in the future, which could (i) make compliance much more difficult or expensive, (ii) restrict our ability to originate, broker or sell loans or accept certain deposits, (iii) further limit or restrict the amount of commissions, interest or other charges earned on loans originated or sold by us, or (iv) otherwise materially and adversely affect our business or prospects for business.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

The recently enacted Dodd-Frank Act will have material implications for the Company and the entire financial services industry. Among other things it will or potentially could:

affect the levels of capital and liquidity with which we must operate and how we plan capital and liquidity levels;

subject us to new and/or higher fees paid to various regulatory entities, including but not limited to deposit insurance fees to the FDIC;

impact our ability to invest in certain types of entities or engage in certain activities;

restrict the nature of our incentive compensation programs for executive officers;

subject us to a new Consumer Financial Protection Bureau, with very broad rule-making and enforcement authorities; and

subject us to new and different litigation and regulatory enforcement risks.

As the Dodd-Frank Act requires that many studies be conducted and that hundreds of regulations be written in order to fully implement it, the full impact of this legislation on us, our business strategies, and financial performance cannot be known at this time, and may not be known for a number of years. However, these impacts are expected to be substantial and some of them are likely to adversely affect us and our financial performance. The Dodd-Frank Act and related regulations may also require us to invest significant management attention and resources to make any necessary changes, and could therefore also adversely affect our business, financial condition and results of operations.

Additionally, in order to conduct certain activities, including acquisitions, we are required to obtain regulatory approval. There can be no assurance that any required approvals can be obtained, or obtained without conditions or on a timeframe acceptable to us. For more information, please see the section entitled "Item 1. Business Supervision and Regulation" above.

The recent repeal of federal prohibitions on payment of interest on demand deposits could increase our interest expense.

All federal prohibitions on the ability of financial institutions to pay interest on demand deposit accounts were repealed as part of the Dodd-Frank Act. As a result, beginning on July 21, 2011, financial institutions could commence offering interest on demand deposits to compete for clients. We do not yet know what interest rates other institutions may offer. Our interest expense will increase and our net interest margin will decrease if the Bank begins offering interest on demand deposits to attract additional customers or maintain current customers, which could have a material adverse effect on our business, financial condition and results of operations.

Emergency measures designed to stabilize the U.S. financial system are beginning to wind down.

Since the middle of 2008, in addition to the programs initiated under the Emergency Economic Stabilization Act of 2008, other regulators have taken steps to attempt to stabilize and add liquidity to the financial markets. Some of these programs have begun to expire and the impact of the expiration of these programs on the financial industry and the economic recovery is unknown. A slowdown in or reversal of the economic recovery could have a material adverse effect on our business, financial condition and results of operations.

Increases in or required prepayments of FDIC insurance premiums may adversely affect our earnings.

Since 2008, higher levels of bank failures have dramatically increased resolution costs of the FDIC and depleted the deposit insurance fund. In addition, the FDIC instituted temporary programs, some of

Table of Contents

which were made permanent by the Dodd-Frank Act, to further insure customer deposits at FDIC insured banks, which have placed additional stress on the deposit insurance fund.

In order to maintain a strong funding position and restore reserve ratios of the deposit insurance fund, the FDIC has increased assessment rates of insured institutions. In addition, on November 12, 2009, the FDIC adopted a rule requiring banks to prepay three years' worth of premiums to replenish the depleted insurance fund.

Historically, the FDIC utilized a risk-based assessment system that imposed insurance premiums based upon a risk matrix that takes into account several components including but not limited to the bank's capital level and supervisory rating. The Dodd-Frank Act requires the FDIC to amend its regulations to base insurance assessments on the average consolidated assets less the average tangible equity of the insured depository institution during the assessment period. The FDIC has proposed implementing regulations which could increase the assessments paid by the Bank. In addition, the FDIC has proposed regulations that would change the way the deposit insurance assessment rate is applied to banks to a system that is risk-based.

We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. Any future increases in or required prepayments of FDIC insurance premiums may adversely affect our financial condition or results of operations.

We are exposed to transactional, country and legal risk related to our foreign loans that is in addition to risks we face on loans to U.S. based borrowers.

Approximately 1% of our non-covered loan portfolio is represented by credit we extend and loans we make to business located outside the United States, predominantly in Mexico. These loans, which include commercial loans, real estate loans and credit extensions for the financing of international trade, are subject to risks in addition to risks we face with our loans to businesses located in the United States including, but not limited to transaction risk, country risk and legal risk. While these loans are denominated in U.S. dollars, the ability of the borrower to repay may be affected by fluctuations in the borrower's home country currency relative to the U.S. dollar. Additionally, while most of our foreign loans are insured by U.S.-based institutions, guaranteed by a U.S.-based entity, or collateralized with U.S.-based assets or real property, our ability to collect in the event of default is subject to a number of conditions, as well as deductibles and co-payments with respect to insurance, and we may not be successful in obtaining partial or full repayment or reimbursement from the insurers. Furthermore, foreign laws may restrict our ability to foreclose on, take a security interest in, or seize collateral located in the foreign country.

We are exposed to risk of environmental liabilities with respect to properties to which we take title.

In the course of our business, we may own or foreclose and take title to real estate, and could be subject to environmental liabilities with respect to these properties. We may be held liable to a governmental entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination, or may be required to investigate or clean up hazardous or toxic substances, or chemical releases at a property. The costs associated with investigation or remediation activities could be substantial. In addition, as the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. If we ever become subject to significant environmental liabilities, our business, financial condition, liquidity and results of operations could be materially and adversely affected.

Table of Contents

We may not pay dividends on common stock.

Our stockholders are only entitled to receive such dividends as our Board of Directors may declare out of funds legally available for such payments. Although we have historically declared cash dividends on our common stock, we are not required to do so and may reduce or eliminate our common stock dividend in the future. Our ability to pay dividends to our stockholders is subject to the restrictions set forth in Delaware law, by our federal regulator, and by certain covenants contained in the indentures governing the trust preferred securities issued by us or entities we have acquired. Notification to the FRB is also required prior to our declaring and paying a cash dividend to our stockholders during any period in which our quarterly net earnings are insufficient to fund the dividend amount. We may not pay a dividend should the FRB object until such time as we receive approval from the FRB or no longer need to provide notice under applicable regulations. See "Item 5. Market for Registrant's Common Equity and Related Stockholder Matters - Dividends" of this Annual Report on Form 10-K for more information on these restrictions. In addition, we may be restricted by applicable law or regulation or actions taken by our regulators, or as a result of our participation in any specific government stabilization programs, now or in the future, from paying dividends to our stockholders. Accordingly, we cannot assure you that we will continue paying dividends on our common stock at current levels or at all.

The primary source of our income from which we pay dividends is the receipt of dividends from the Bank.

The availability of dividends from the Bank is limited by various statutes and regulations. It is possible, depending upon the financial condition of the Bank and other factors, that the FRB, the FDIC and/or the DFI could assert that payment of dividends or other payments is an unsafe or unsound practice, or that such regulatory authority may impose restrictions on the Bank's ability to pay dividends as a condition to the Bank's participation in any stabilization program. In the event the Bank is unable to pay dividends to us, it is likely that we, in turn, would have to stop paying dividends on our common stock. Our failure to pay dividends on our common stock could have a material adverse effect on the market price of our common stock. See "Item 1. Business - Supervision and Regulation" above for additional information on the regulatory restrictions to which we and the Bank are subject.

Only a limited trading market exists for our common stock which could lead to price volatility.

Our common stock trades on The NASDAQ Global Select Stock Market under the symbol "PACW" and our trading volume is modest. The limited trading market for our common stock may cause fluctuations in the market value of our common stock to be exaggerated, leading to price volatility in excess of that which would occur in a more active trading market of our common stock. In addition, even if a more active market in our common stock develops, we cannot assure you that such a market will continue or that stockholders will be able to sell their shares.

Our allowance for credit losses may not be adequate to cover actual losses.

In accordance with accounting principles generally accepted in the United States, we maintain an allowance for loan losses to provide for loan defaults and non-performance and a reserve for unfunded loan commitments which, when combined, we refer to as the allowance for credit losses. Our allowance for credit losses may not be adequate to address actual credit losses, and future provisions for credit losses could materially and adversely affect our operating results. Our allowance for credit losses is based on prior experience and an evaluation of the risks in the current portfolio. The amount of future losses is susceptible to changes in economic, operating and other conditions, including changes in interest rates that may be beyond our control, and these losses may exceed current estimates. Our federal and state regulators, as an integral part of their examination process, review our loans and allowance for credit losses. While we believe our allowance for credit losses is appropriate for the risk identified in the Company's loan portfolio, we cannot assure you that we will not further increase the

Table of Contents

allowance for credit losses, that it will be sufficient to address losses, or that regulators will not require us to increase this allowance. Any of these occurrences could materially and adversely affect our earnings. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Annual Report on Form 10-K for more information.

Our acquisitions may subject us to unknown risks.

We have completed 22 acquisitions since May 2000, including the FDIC-assisted acquisitions of Los Padres Bank in August 2010 and Affinity Bank in August 2009. Certain events may arise after the date of an acquisition, or we may learn of certain facts, events or circumstances after the closing of an acquisition, that may affect our financial condition or performance or subject us to risk of loss. These events include, but are not limited to: litigation resulting from circumstances occurring at the acquired entity prior to the date of acquisition; loan downgrades and credit loss provisions resulting from underwriting of certain acquired loans determined not to meet our credit standards; personnel changes that cause instability within a department; delays in implementing new policies or procedures or the failure to apply new policies or procedures; and other events relating to the performance of our business. Acquisitions involve inherent uncertainty and we cannot determine all potential events, facts and circumstances that could result in loss or give assurances that our investigation or mitigation efforts will be sufficient to protect against any such loss.

We are dependent on key personnel and the loss of one or more of those key personnel may materially and adversely affect our prospects.

We currently depend heavily on the services of our chairman, John Eggemeyer, our chief executive officer, Matthew Wagner, and a number of other key management personnel. The loss of Mr. Eggemeyer's or Mr. Wagner's services or that of other key personnel could materially and adversely affect our results of operations and financial condition. Our success also depends, in part, on our ability to attract and retain additional qualified management personnel. Competition for such personnel is strong in the banking industry, and we may not be successful in attracting or retaining the personnel we require.

Concentrated ownership of our common stock creates a risk of sudden changes in our share price.

As of March 4, 2011, directors and members of our executive management team owned or controlled approximately 3.7% of our common stock, excluding shares that may be issued to executive officers upon vesting of restricted stock awards. Investors who purchase our common stock may be subject to certain risks due to the concentrated ownership of our common stock. The sale by any of our large stockholders of a significant portion of that stockholder's holdings could have a material adverse effect on the market price of our common stock. In addition, the registration of any significant amount of additional shares of our common stock will have the immediate effect of increasing the public float of our common stock and any such increase may cause the market price of our common stock to decline or fluctuate significantly.

Our largest stockholder is a registered bank holding company, and the activities and regulation of such stockholder may materially and adversely affect the permissible activities of the Company.

CapGen Capital Group II LP, which we refer to as CapGen, beneficially owned approximately 10.9% of the Company as of March 4, 2011. CapGen is a registered bank holding company under the BHCA and is regulated by the FRB. Under FRB guidelines, bank holding companies must be a "source of strength" for their subsidiaries. See "Item 1. Business Supervision and Regulation Bank Holding Company Regulation" above for more information. Regulation of CapGen by the FRB may materially and adversely affect the activities and strategic plans of the Company should the FRB determine that CapGen or any other company in which either has invested has engaged in any unsafe

Table of Contents

or unsound banking practices or activities. While we have no reason to believe that the FRB is proposing to take any action with respect to CapGen that would adversely affect the Company, we remain subject to such risk.

A natural disaster could harm the Company's business.

Historically, California, in which a substantial portion of the Company's business is located, has been susceptible to natural disasters, such as earthquakes, floods and wild fires. The nature and level of natural disasters cannot be predicted and may be exacerbated by global climate change. These natural disasters could harm the Company's operations through interference with communications, including the interruption or loss of the Company's computer systems, which could prevent or impede the Company from gathering deposits, originating loans and processing and controlling its flow of business, as well as through the destruction of facilities and the Company's operational, financial and management information systems. Additionally, natural disasters could negatively impact the values of collateral securing the Company's loans and interrupt our borrowers' abilities to conduct their business in a manner to support their debt obligations, either of which could result in losses and increased provisions for credit losses.

Our decisions regarding the fair value of assets acquired, including the FDIC loss sharing asset, could be inaccurate which could materially and adversely affect our business, financial condition, results of operations, and future prospects.

Management makes various assumptions and judgments about the collectibility of the acquired loans, including the creditworthiness of borrowers and the value of the real estate and other assets serving as collateral for the repayment of secured loans. In FDIC-assisted acquisitions that include loss sharing agreements, we may record a loss sharing asset that we consider adequate to absorb future losses which may occur in the acquired loan portfolio. In determining the size of the loss sharing asset, we analyze the loan portfolio based on historical loss experience, volume and classification of loans, volume and trends in delinquencies and nonaccruals, local economic conditions, and other pertinent information. If our assumptions are incorrect, the balance of the FDIC loss sharing asset may at any time be insufficient to cover future loan losses, and credit loss provisions may be needed to respond to different economic conditions or adverse developments in the acquired loan portfolio. Any increase in future losses on loan and other assets covered by loss sharing agreements could have a negative effect on our operating results.

Our ability to obtain reimbursement under the loss sharing agreements on covered assets depends on our compliance with the terms of the loss sharing agreements.

Management must certify to the FDIC on a quarterly basis our compliance with the terms of the FDIC loss sharing agreements as a prerequisite to obtaining reimbursement from the FDIC for realized losses on covered assets. The required terms of the agreements are extensive and failure to comply with any of the guidelines could result in a specific asset or group of assets temporarily or permanently losing their loss sharing coverage. Additionally, management may decide to forgo loss share coverage on certain assets to allow greater flexibility over the management of certain assets. As of December 31, 2010, \$1.0 billion, or 18.4%, of the Company's assets were covered by the FDIC loss sharing agreements.

Under the terms of the FDIC loss sharing agreements, the assignment or transfer of the loss sharing agreement to another entity generally requires the written consent of the FDIC. Based on the manner in which assignment is defined in the agreements, each of the following requires the prior written consent of the FDIC:

1. a merger or consolidation of the Bank with and into another financial institution;

Table of Contents

2. the sale of all or substantially all of the Bank's assets to another financial institution; and
3. with respect to covered assets acquired in the Affinity acquisition, for a period of 36 months after the August 28, 2009 acquisition date
 - a. the sale by any individual shareholder, or shareholders acting in concert, of more than 9% of the outstanding shares of either the Bank or the Company;
 - b. the sale of shares by the Bank or the Company in a public or private offering that increases the number of shares outstanding of either the Bank or the Company by more than 9%.

No assurances can be given that we will manage the covered assets in such a way as to always maintain loss share coverage on all such assets.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

As of March 1, 2011, we had a total of 95 properties consisting of 77 operating branch offices, 1 annex office, 3 operations centers, 8 loan offices, and 6 other properties of which 2 are subleased. We own 8 locations and the remaining properties are leased. Almost all properties are located in Southern California. Pacific Western's principal office is located at 10250 Constellation Blvd., Suite 1640, Los Angeles, CA 90067.

For additional information regarding properties of the Company and Pacific Western, see Note 9 of Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

ITEM 3. LEGAL PROCEEDINGS

In the ordinary course of our business, we are party to various legal actions, which we believe are incidental to the operation of our business. The outcome of such legal actions and the timing of ultimate resolution are inherently difficult to predict. Because of these factors, the Company cannot provide a meaningful estimate of the range of reasonably possible outcomes of claims in the aggregate or by individual claim. In the opinion of management, based upon information currently available to us, any resulting liability is not likely to have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

ITEM 4. RESERVED

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Marketplace Designation, Sales Price Information and Holders**

Our common stock is listed on The Nasdaq Global Select Market and is traded under the symbol "PACW." The following table summarizes the high and low sale prices for each quarterly period ended since January 1, 2009 for our common stock, as quoted and reported by The Nasdaq Stock Market, or Nasdaq:

	Stock Sales Prices		Dividends Declared During Quarter
	High	Low	
2009			
First quarter	\$ 27.09	\$ 9.36	\$ 0.32
Second quarter	\$ 19.82	\$ 11.64	\$ 0.01
Third quarter	\$ 21.42	\$ 11.66	\$ 0.01
Fourth quarter	\$ 21.19	\$ 15.43	\$ 0.01
2010			
First quarter	\$ 23.70	\$ 19.03	\$ 0.01
Second quarter	\$ 24.98	\$ 18.25	\$ 0.01
Third quarter	\$ 21.81	\$ 16.85	\$ 0.01
Fourth quarter	\$ 22.07	\$ 16.56	\$ 0.01

As of March 2, 2011, the closing price of our common stock on Nasdaq was \$20.20 per share. As of that date, based on the records of our transfer agent, there were approximately 2,001 record holders of our common stock.

Dividends

Our ability to pay dividends to our stockholders is subject to the restrictions set forth in the Delaware General Corporation Law, or the DGCL. The DGCL provides that a corporation, unless otherwise restricted by its certificate of incorporation, may declare and pay dividends out of its surplus or, if there is no surplus, out of net profits for the fiscal year in which the dividend is declared and/or for the preceding fiscal year, as long as the amount of capital of the corporation is not less than the aggregate amount of the capital represented by the issued and outstanding stock of all classes having a preference upon the distribution of assets. Surplus is defined as the excess of a corporation's net assets (i.e., its total assets minus its total liabilities) over the capital associated with issuances of its common stock. Moreover, DGCL permits a board of directors to reduce its capital and transfer such amount to its surplus. In determining the amount of surplus of a Delaware corporation, the assets of the corporation, including stock of subsidiaries owned by the corporation, must be valued at their fair market value as determined by the board of directors, regardless of their historical book value. Our ability to pay dividends is also subject to certain other limitations. See "Item 1. Business Supervision and Regulation" in Part I of this Annual Report on Form 10-K and Note 19 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

Set forth in the table above are the dividends declared and paid by the Company during the two most recent fiscal years. Our ability to pay cash dividends to our stockholders is also limited by certain covenants contained in the indentures governing trust preferred securities issued by us or entities that we have acquired, and the debentures underlying the trust preferred securities. Generally the

Table of Contents

indentures provide that if an Event of Default (as defined in the indentures) has occurred and is continuing, or if we are in default with respect to any obligations under our guarantee agreement which covers payments of the obligations on the trust preferred securities, or if we give notice of any intention to defer payments of interest on the debentures underlying the trust preferred securities, then we may not, among other restrictions, declare or pay any dividends (other than a dividend payable by the Bank to the holding company) with respect to our common stock.

Notification to the FRB is also required prior to our declaring and paying a cash dividend to our stockholders during any period in which our quarterly net earnings are insufficient to fund the dividend amount. Under such circumstances, we may not pay a dividend should the FRB object until such time as we receive approval from the FRB or no longer need to provide notice under applicable regulations.

Holders of Company common stock are entitled to receive dividends declared by the Board of Directors out of funds legally available under state law governing the Company and certain federal laws and regulations governing the banking and financial services business. During 2010, 2009, and 2008, the Company paid \$1.4 million, \$11.1 million, and \$35.4 million, respectively, in cash dividends on common stock.

We can provide no assurance that we will continue to declare dividends on a quarterly basis or otherwise. The declaration of dividends by the Company is subject to the discretion of our Board of Directors. Our Board of Directors will take into account such matters as general business conditions, our financial results, projected cash flows, capital requirements, contractual, legal and regulatory restrictions on the payment of dividends by us to our stockholders or by our subsidiary to the holding company, and such other factors as our Board of Directors may deem relevant.

PacWest's primary source of income is the receipt of cash dividends from the Bank. The availability of cash dividends from the Bank is limited by various statutes and regulations. It is possible, depending upon the financial condition of the bank in question, and other factors, that the FRB, the FDIC or the DFI could assert that payment of dividends or other payments is an unsafe or unsound practice. Pacific Western is subject to restrictions under certain federal and state laws and regulations governing banks which limit its ability to transfer funds to the holding company through intercompany loans, advances or cash dividends.

Dividends paid by state banks, such as Pacific Western, are regulated by the DFI under its general supervisory authority as it relates to a bank's capital requirements. A state bank may declare a dividend without the approval of the DFI as long as the total dividends declared in a calendar year do not exceed either the retained earnings or the total of net earnings for three previous fiscal years less any dividend paid during such period. During 2010, no dividends were paid to PacWest from the Bank. As of this date and for the foreseeable future, any further cash dividends from the Bank to the Company will require DFI approval. See "Item 1. Business Supervision and Regulation," in Part I of this Annual Report on Form 10-K for further discussion of potential regulatory limitations on the holding company's receipt of funds from the Bank, as well as "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity" and Note 19 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data" for a discussion of other factors affecting the availability of dividends and limitations on the ability to declare dividends.

Table of Contents

Securities Authorized for Issuance Under Equity Compensation Plans

The following table provides information as of December 31, 2010, regarding securities issued and to be issued under our equity compensation plans that were in effect during fiscal 2010:

Plan Category	Plan Name	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)
Equity compensation plans approved by security holders	The PacWest Bancorp 2003 Stock Incentive Plan ⁽¹⁾	(2) \$		1,176,427 ⁽³⁾
Equity compensation plans not approved by security holders	None			

(1) The PacWest Bancorp 2003 Stock Incentive Plan (the "Incentive Plan") was last approved by the stockholders of the Company at our 2009 Annual Meeting of Stockholders.

(2) Amount does not include the 1,230,582 shares of unvested time-based and performance-based restricted stock outstanding as of December 31, 2010 with an exercise price of zero.

(3) The Incentive Plan permits these remaining shares to be issued in the form of options, restricted stock or SARs.

Recent Sales of Unregistered Securities and Use of Proceeds

None.

Repurchases of Common Stock

In January 2009, all participants in the Company's Directors Deferred Compensation Plan, or the DDCP, received distributions of amounts previously deferred and the DDCP was terminated. Upon termination of the DDCP 184,395 common shares were distributed to the participants.

Prior to 2009, participants in the DDCP were able to invest deferred amounts in the Company's common stock. The Company had the discretion whether to track purchases of common stock as if made, or to fully fund the DDCP via purchases of stock with deferred amounts. Purchases of Company common stock by the rabbi trust of the DDCP were considered repurchases of common stock by the Company since the rabbi trust was an asset of the Company. Actual purchases of Company common stock via the DDCP were made through open market purchases pursuant to the terms of the DDCP, which include a predetermined formula and schedule for the purchase of such stock in accordance with Rule 10b5-1 of the Securities Exchange Act of 1934. Pursuant to the terms of the DDCP, generally purchases were actually made or deemed to be made in the open market on the 15th of the month (or the next trading day) following the day on which deferred amounts were contributed to the DDCP, beginning March 15 of each year.

Table of Contents

The following table presents stock purchases made during the fourth quarter of 2010:

	Total Shares Purchased ⁽¹⁾	Average Price Per Share
October 1 - October 31, 2010		\$
November 1 - November 30, 2010	53,081	18.75
December 1 - December 31, 2010		
 Total	 53,081	 \$ 18.75

(1) Shares repurchased pursuant to net settlement by employees, in satisfaction of financial obligations incurred through the vesting of the Company's restricted stock.

Five-Year Stock Performance Graph

The following chart compares the yearly percentage change in the cumulative shareholder return on our common stock based on the closing price during the five years ended December 31, 2010, with (1) the Total Return Index for U.S. companies traded on The Nasdaq Stock Market (the "NASDAQ Composite"), (2) the Total Return Index for NASDAQ Bank Stocks (the "NASDAQ Bank Index") and (3) the Total Return Index for the KBW Regional Bank Stocks (the "KBW Regional Banking Index"). This comparison assumes \$100 was invested on December 31, 2005, in our common stock and the comparison groups and assumes the reinvestment of all cash dividends prior to any tax effect and retention of all stock dividends. PacWest's total cumulative loss was 55.6% over the five year period ending December 31, 2010 compared to a gain of 25.9% and losses of 24.7% and 44.0% for the NASDAQ Composite, NASDAQ Bank Index, and KBW Regional Banking Index, respectively.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section should be read in conjunction with the disclosure regarding "Forward-Looking Statements" set forth in "Item 1. Business Forward-Looking Statements", as well as the discussion set forth in "Item 1. Business Certain Business Risks" and "Item 8. Financial Statements and Supplementary Data," including the notes to consolidated financial statements.

Overview

We are a bank holding company registered under the Bank Holding Company Act of 1956, as amended. Our principal business is to serve as the holding company for our banking subsidiary, Pacific Western Bank, which we refer to as Pacific Western or the Bank. When we say "we", "our" or the "Company", we mean the Company on a consolidated basis with the Bank. When we refer to "PacWest" or to the holding company, we are referring to the parent company on a stand-alone basis.

Pacific Western is a full-service commercial bank offering a broad range of banking products and services including: accepting time, money market, and demand deposits; originating loans, including commercial, real estate construction, SBA guaranteed and consumer loans; and providing other business-oriented products. Our operations are primarily located in Southern California and the Bank focuses on conducting business with small to medium size businesses in our marketplace, the owners and employees of those businesses and households in and around the communities we serve. The majority of our loans are secured by the real estate collateral of such businesses. Through our asset-based lending offices we also operate in Arizona, Northern California, and the Pacific Northwest.

Over the last year, the Company's assets have grown \$204.9 million, or 3.8%, and totaled \$5.5 billion at December 31, 2010. The growth was due primarily to increases of \$450.3 million in securities available-for-sale attributable to purchases using excess liquidity and \$286.9 million in covered loans due to the FDIC-assisted acquisition of Los Padres Bank on August 20, 2010. This was offset by a \$547.9 million decline in our gross non-covered loan portfolio due mostly to the \$395.8 million sales of classified loans during 2010. At December 31, 2010, securities available-for-sale, gross non-covered loans, and covered loans totaled \$874.0 million, \$3.2 billion, and \$908.6 million, respectively, or 15.8%, 57.3%, and 16.4% of assets, respectively.

Pacific Western competes actively for deposits and emphasizes solicitation of noninterest-bearing deposits. In managing the top line of our business, we focus on loan growth, loan yield, deposit cost, and net interest margin, as net interest income accounted for 84% of our net revenues (net interest income plus noninterest income) for 2010.

We have completed 22 business acquisitions since the Company's inception in 1999, including the FDIC-assisted acquisitions of Los Padres Bank and Affinity Bank in August 2010 and 2009, respectively. These acquisitions affect the comparability of our reported financial information as the operating results of the acquired entities are included in our operating results only from their respective acquisition dates. For further information on our acquisitions, see Notes 3 and 4 in Notes to Consolidated Financial Statements included in "Item 8. Financial Statement and Supplementary Data."

Table of Contents***Non-Covered Classified Loan Sales***

During 2010, we made strategic decisions to sell \$398.5 million of non-covered classified loans to reduce credit risk, thereby strengthening the Bank's balance sheet and enhancing its ability to continue to participate in bidding on FDIC-assisted acquisitions. Such sales resulted in immediate reductions of classified loans and improved credit quality metrics. The improvement in credit quality metrics for the non-covered portfolio is shown in the following table:

	December 31, 2010	September 30, 2010	June 30, 2010	March 31, 2010	December 31, 2009
	(Dollars in thousands)				
Nonaccrual loans	\$ 94,183	\$ 105,539	\$ 108,283	\$ 99,920	\$ 240,167
New nonaccrual loans in the quarter	21,413(1)	26,543	25,136	18,096	120,446
Nonperforming assets	119,781	130,137	132,806	129,563	283,422
Performing restructured loans	89,272	143,407	76,367	51,896	181,454
Allowance for credit losses to nonaccrual loans	110.8%	95.9%	86.3%	91.5%	51.8%
Allowance for credit losses to loans, net of unearned income	3.30%	3.05%	2.93%	2.81%	3.35%

(1)

Includes two loans to one borrower with a balance of \$13.9 million

In December 2010, we sold non-covered classified loans totaling \$74.9 million for \$54.0 million in cash. Such sale resulted in a charge-off to the allowance for credit losses of \$20.9 million, of which \$6.6 million had been previously allocated to the loans sold through our allowance methodology and \$14.3 million represented the market discount necessary for the loans to be sold to the buyer. The sale was on a servicing-released basis and without recourse to Pacific Western Bank. All of the loans sold were originated by Pacific Western Bank and none were covered loans acquired in the Los Padres Bank or Affinity Bank acquisitions. The loans sold included \$17.6 million in nonaccrual loans and \$43.7 million in performing restructured loans as of September 30, 2010.

In February 2010, the Bank sold non-covered classified loans totaling \$323.6 million to an institutional buyer for \$200.6 million in cash. Such sale resulted in a charge-off to the allowance for credit losses of \$123.0 million, of which \$51.6 million had been previously allocated to the loans sold through our allowance methodology and \$71.4 million represented the market discount necessary for the loans to be sold to the buyer. The sale was on a servicing-released basis and without recourse to Pacific Western Bank. All loans sold were originated by Pacific Western Bank and none were covered loans acquired in the Affinity Bank acquisition. The loans sold included \$110.5 million in nonaccrual loans and \$105.1 million in restructured loans.

August 2010 Los Padres Acquisition

On August 20, 2010, we acquired certain assets of Los Padres Bank, including all loans, and assumed substantially all of its liabilities, including all deposits, from the FDIC in an FDIC-assisted acquisition, which we refer to as the Los Padres acquisition. Pacific Western (i) acquired \$437.1 million in loans, \$33.9 million in other real estate owned, \$44.3 million in investments, and \$261.5 million in cash and other assets, and (ii) assumed \$752.2 million in deposits, \$70.0 million in borrowings, and \$1.9 million in other liabilities. In connection with the Los Padres acquisition, the FDIC made a cash payment to Pacific Western of \$144.0 million. Other than a deposit premium of \$3.4 million, we paid no cash or other consideration to acquire Los Padres. The estimated fair value of the liabilities assumed exceeded the estimated fair value of the assets acquired and we recorded \$47.3 million of goodwill. We entered into a loss sharing agreement with the FDIC, whereby the FDIC agreed to cover a substantial portion of any future losses on the acquired loans, with the exception of consumer loans, and other real estate owned. We refer to the acquired assets subject to the loss sharing agreement collectively as "covered assets." Under the terms of such loss sharing agreement, the FDIC is obligated

Table of Contents

to reimburse the Bank for 80% of losses with respect to the covered assets. The Bank will reimburse the FDIC for 80% of recoveries with respect to losses for which the FDIC paid the Bank 80% reimbursement under the loss sharing agreement. The loss sharing arrangement for single family covered assets and commercial (non-single family) covered assets is in effect for 10 years and 5 years, respectively, from the acquisition date, and the loss recovery provisions are in effect for 10 years and 8 years, respectively, from the acquisition date. Los Padres was a federally chartered savings bank headquartered in Solvang, California that operated 14 branches, including 11 branches in California (three in Ventura County, four in Santa Barbara County, and four in San Luis Obispo County) and three branches in Arizona (Maricopa County). After office consolidations in February 2011, there are nine remaining former Los Padres offices with eight in California and one in Arizona. We made this acquisition to expand our presence in the Central Coast of California. The Los Padres operation added \$3.7 million in net earnings since its acquisition in August 2010, with \$3.3 million of such amount in the fourth quarter of 2010.

The acquisition has been accounted for under the acquisition method of accounting. The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the August 20, 2010 acquisition date. Such fair values are preliminary estimates and are subject to adjustment for up to one year after the acquisition date. The application of the acquisition method of accounting resulted in \$47.3 million of goodwill. Such goodwill represents the excess of the estimated fair value of the liabilities assumed over the estimated fair value of the assets acquired and is tax-deductible. The goodwill includes \$9.5 million related to the FDIC's settlement accounting for a wholly-owned subsidiary of Los Padres. We disagree with the FDIC's accounting for this item and are in the process of negotiating with the FDIC for resolution of this matter. Should we be successful in our negotiations, goodwill would be reduced by a cash payment to us from the FDIC of \$9.5 million. No assurance can be given, however, that we will be successful in our efforts. See Notes 3 and 4 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data" for additional information regarding the Los Padres acquisition.

July 2010 Loan Portfolio Purchase

On July 1, 2010, we purchased a \$234.1 million portfolio of 225 performing loans secured by Southern California real estate for a cash price of \$228.3 million. Such loans had a weighted average coupon interest rate of 6.15% and a weighted average maturity of 4.6 years. These loans were part of the Foothill Independent Bank loan portfolio that we acquired when we completed the Foothill Independent Bancorp acquisition in May 2006. In March 2007, we sold a 95% participating interest in these loans for cash and continued to service them and maintain the borrower relationships. When the opportunity to purchase this loan portfolio presented itself, we concluded it would be in the best interests of the Company and the Bank to make this purchase as we are familiar with the credit risk and it would deploy excess liquidity in a manner that would increase interest income and expand the net interest margin.

August 2009 Affinity Acquisition

On August 28, 2009, we acquired substantially all of the assets of Affinity Bank, including all loans, and assumed substantially all of its liabilities, including the insured and uninsured deposits and excluding certain brokered deposits, from the FDIC in an FDIC-assisted transaction, which we refer to as the Affinity acquisition. Pacific Western (i) acquired \$675.6 million in loans, \$22.9 million in foreclosed assets, \$175.4 million in investments and \$371.5 million in cash and other assets, and (ii) assumed \$868.2 million in deposits, \$305.8 million in borrowings, and \$32.6 million in other liabilities. In connection with the Affinity acquisition, the FDIC made a cash payment to Pacific Western of \$87.2 million. We entered into a loss sharing agreement with the FDIC, whereby the FDIC agreed to cover a substantial portion of any future losses on acquired loans, other real estate owned and certain investment securities. We refer to the acquired assets subject to the loss sharing agreement

Table of Contents

collectively as "covered assets." Under the terms of such loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on the first \$234 million of losses on covered assets and absorb 95% of losses and receive 95% of loss recoveries on covered assets exceeding \$234 million. The loss sharing agreement is in effect for 5 years for commercial assets (non-residential loans, OREO and certain securities) and 10 years for residential loans from the August 28, 2009 acquisition date. The loss recovery provisions are in effect for 8 years for commercial assets and 10 years for residential loans from the acquisition date. Affinity was a full service commercial bank headquartered in Ventura, California that operated 10 branch locations in California. We made this acquisition to expand our presence in California.

The acquisition has been accounted for under the acquisition method of accounting. Accordingly the acquired assets, including the FDIC loss sharing asset and identifiable intangible asset, and the assumed liabilities were recorded at their estimated fair values as of the August 28, 2009 acquisition date. The application of the acquisition method of accounting resulted in a gain of \$67.0 million (\$38.9 million after-tax). Such gain represents the excess of the estimated fair value of the assets acquired over the estimated fair value of the liabilities assumed. See Notes 3 and 4 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data" for additional information regarding the Affinity acquisition.

Key Performance Indicators

Among other factors, our operating results depend generally on the following:

The Level of Our Net Interest Income

Net interest income is the excess of interest earned on our interest-earning assets over the interest paid on our interest-bearing liabilities. The low market interest rate environment throughout 2009 and continuing in 2010 has reduced our net interest margin relative to our historical performance. A sustained low interest rate environment combined with low loan growth and high levels of marketplace liquidity may further lower both our net interest income and net interest margin going forward.

Our primary interest-earning asset is loans. Our primary interest-bearing liabilities include deposits, borrowings, and subordinated debentures. We attribute our high net interest margin to our loans-to-deposits ratio, which was approximately 88% at the end of 2010 and exceeded 100% in the prior four years, and a high level of noninterest-bearing deposits. While our deposit balances will fluctuate depending on deposit holders' perceptions of alternative yields available in the market, we attempt to minimize these variances by attracting a high percentage of noninterest-bearing deposits, which have no expectation of yield. At December 31, 2010, approximately 32% of our total deposits were noninterest-bearing. In addition to deposits, we have borrowing capacity under various credit lines which we use for liquidity needs such as funding loan demand, managing deposit flows and interim acquisition financing. This borrowing capacity is relatively flexible and has become one of the least expensive sources of funds. However, our borrowing lines are considered a secondary source of liquidity as we serve our local markets and customers with our deposit products.

Loan Growth

We generally seek new lending opportunities in the \$500,000 to \$10 million range, try to limit loan maturities for commercial loans to one year, for construction loans up to 18 months, and for commercial real estate loans up to ten years, and to price lending products so as to preserve our interest spread and net interest margin. We sometimes encounter strong competition in pursuing lending opportunities such that potential borrowers obtain loans elsewhere at lower rates than those we offer. We have continued to reduce our exposure to residential construction and foreign loans, including limiting the amount of new loans in these categories. Our ability to make new loans is dependent on economic factors in our market area, borrower qualifications, competition, and liquidity,

Table of Contents

among other items. Considering the current state of the economy in our Southern California marketplace, loan growth was not a focus area for us in 2010 and we expect this to continue in 2011.

During 2010, we executed two classified loan sales which reduced non-covered loans by \$398.5 million. This reduction, combined with repayments, resolution activities and low loan demand resulted in a decrease of \$547.9 million during 2010 in our non-covered loan portfolio. The covered loan portfolio increased \$286.9 million during 2010 due to the Los Padres acquisition and included a \$130.7 million decrease in the acquired Affinity loans.

The Magnitude of Credit Losses

We stress credit quality in originating and monitoring the loans we make and measure our success by the levels of our nonperforming assets, net charge-offs and allowance for credit losses. Our allowance for credit losses is the sum of our allowance for loan losses and our reserve for unfunded loan commitments and relates only to our non-covered loans. Provisions for credit losses are charged to operations as and when needed for both on and off balance sheet credit exposure. Loans which are deemed uncollectible are charged off and deducted from the allowance for loan losses. Recoveries on loans previously charged off are added to the allowance for loan losses. During the year ended December 31, 2010, we made a provision for credit losses totaling \$218.0 million composed of \$179.0 million on non-covered loans and \$39.0 million on covered loans. The provision for credit losses on the non-covered portfolio was based on our allowance methodology and reflected net charge-offs, the levels of nonaccrual and classified loans, classified loan sales, and the migration of loans into various risk classifications. The provision for credit losses on the covered loan portfolio reflects an increase in the covered loan allowance for credit losses resulting from credit deterioration since the acquisition dates.

We regularly review our loans to determine whether there has been any deterioration in credit quality stemming from economic conditions or other factors which may affect collectibility of our loans. Changes in economic conditions, such as inflation, unemployment, increases in the general level of interest rates, declines in real estate values and negative conditions in borrowers' businesses could negatively impact our customers and cause us to adversely classify loans and increase portfolio loss factors. An increase in classified loans generally results in increased provisions for credit losses. Any deterioration in the real estate market may lead to increased provisions for credit losses because of our concentration in real estate loans.

The Level of Our Noninterest Expense

Our noninterest expense includes fixed and controllable overhead, the major components of which are compensation, occupancy, data processing, other professional service fees and communications expense. We measure success in controlling such costs through monitoring of the efficiency ratio. We calculate the efficiency ratio by dividing noninterest expense by the sum of net interest income and noninterest income. Accordingly, a lower percentage reflects lower expenses relative to income. The consolidated efficiency ratios have been as follows:

Quarterly Period in 2010	Efficiency Ratio
First	63.8%
Second	61.4%
Third	60.8%
Fourth	67.4%

Table of Contents

The increase in the efficiency ratio for the fourth quarter of 2010 was due mostly to lower FDIC loss sharing income as covered loan credit costs declined and certain covered loans, which are carried at a discount, were resolved at amounts above their carrying values.

Critical Accounting Policies

The following discussion and analysis of financial condition and results of operations are based upon our consolidated financial statements and the notes thereto, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of the consolidated financial statements requires us to make a number of estimates and assumptions that affect the reported amounts and disclosures in the consolidated financial statements. On an ongoing basis, we evaluate our estimates and assumptions based upon historical experience and various other factors and circumstances. We believe that our estimates and assumptions are reasonable; however, actual results may differ significantly from these estimates and assumptions which could have a material impact on the carrying value of assets and liabilities at the balance sheet dates and on our results of operations for the reporting periods.

Our significant accounting policies and practices are described in Note 1 to the Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data." The accounting policies that involve significant estimates and assumptions by management, which have a material impact on the carrying value of certain assets and liabilities, are considered critical accounting policies. We have identified our policies for the allowances for credit losses, the carrying values of intangible assets, and deferred income tax assets as critical accounting policies.

Allowance for Credit Losses on Non-Covered Loans

The allowance for credit losses on non-covered loans is the combination of the allowance for loan losses and the reserve for unfunded loan commitments. The allowance for credit losses on non-covered loans relates only to loans which are not subject to loss sharing agreements with the FDIC. The allowance for loan losses is reported as a reduction of outstanding loan balances and the reserve for unfunded loan commitments is included within other liabilities. Generally, as loans are funded, the amount of the commitment reserve applicable to such funded loans is transferred from the reserve for unfunded loan commitments to the allowance for loan losses based on our allowance methodology. At December 31, 2010, the allowance for credit losses on non-covered loans totaled \$104.3 million and was comprised of the allowance for loan losses of \$98.6 million and the reserve for unfunded loan commitments of \$5.7 million. The following discussion is for non-covered loans and the allowance for credit losses thereon. Refer to " Allowance for Credit Losses on Covered Loans" for the policy on covered loans.

The provision for credit losses increased \$58.1 million to \$218.0 million for 2010 compared to 2009, while the allowance for credit losses declined \$20.0 million to \$104.3 million at December 31, 2010 compared to \$124.3 million at December 31, 2009. The increase in the provision reflects the growth of \$112.5 million in net charge-offs to \$198.9 million, attributed mostly to \$144.6 million in charge-offs from the classified loans sold during 2010. The decline in the allowance for credit losses reflected, in part, the lower level of nonaccrual loans, which decreased \$146.0 million in 2010 to \$94.2 million at December 31, 2010. This was due mostly to the sales of \$128.1 million in nonaccrual loans included in the \$398.5 million of classified loans sold in 2010.

An allowance for loan losses is maintained at a level deemed appropriate by management to adequately provide for known and inherent risks in the loan portfolio and other extensions of credit at the balance sheet date. The allowance is based upon a continuing review of the portfolio, past loan loss experience, current economic conditions which may affect the borrowers' ability to pay, and the underlying collateral value of the loans. Loans which are deemed to be uncollectible are charged off

Table of Contents

and deducted from the allowance. The provision for loan losses and recoveries on loans previously charged off are added to the allowance.

The methodology we use to estimate the amount of our allowance for credit losses is based on both objective and subjective criteria. While some criteria are formula driven, other criteria are subjective inputs included to capture environmental and general economic risk elements which may trigger losses in the loan portfolio, and to account for the varying levels of credit quality in the loan portfolios of the entities we have acquired that have not yet been captured in our objective loss factors.

Specifically, our allowance methodology contains three key elements: (i) amounts based on specific evaluations of impaired loans; (ii) amounts of estimated losses on several pools of loans categorized by risk rating and loan type; and (iii) amounts for environmental and general economic factors that indicate probable losses were incurred but were not captured through the other elements of our allowance process.

Impaired loans are identified at each reporting date based on certain criteria and individually reviewed for impairment. A loan is considered impaired when it is probable that a creditor will be unable to collect all amounts due according to the original contractual terms of the loan agreement. We measure impairment of a loan based upon the fair value of the loan's collateral if the loan is collateral dependent or the present value of cash flows, discounted at the loan's effective interest rate, if the loan is not collateral-dependent. The impairment amount on a collateral-dependent loan is charged-off to the allowance and the impairment amount on a loan that is not collateral-dependent is set up as a specific reserve. Increased charge-offs generally result in increased provisions for credit losses.

Our loan portfolio, excluding impaired loans which are evaluated individually, is categorized into several pools for purposes of determining allowance amounts by loan pool. The loan pools we currently evaluate are: commercial real estate construction, residential real estate construction, SBA real estate, hospitality real estate, real estate other, commercial collateralized, commercial unsecured, SBA commercial, consumer, foreign, and asset-based. Within these loan pools, we then evaluate loans not adversely classified, which we refer to as "pass" credits, separately from adversely classified loans. The adversely classified loans are further grouped into three credit risk rating categories: "special mention," "substandard" and "doubtful," which we define as follows:

Special Mention: Loans classified as special mention have a potential weakness that requires management's attention. If not addressed, these potential weaknesses may result in further deterioration in the borrower's ability to repay the loan.

Substandard: Loans classified as substandard have a well-defined weakness or weaknesses that jeopardize the collection of the debt. They are characterized by the possibility that we will sustain some loss if the weaknesses are not corrected.

Doubtful: Loans classified as doubtful have all the weaknesses as those classified as Substandard, with the additional trait that the weaknesses make collection or repayment in full highly questionable and improbable.

For further information on classified loans, see Note 6 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

The allowance amounts for "pass" rated loans and those loans adversely classified, which are not reviewed individually, are determined using historical loss rates developed through migration analysis. The migration analysis is updated quarterly based on historic losses and movement of loans between ratings. As a result of this migration analysis and its quarterly updating, the increases we experienced in both charge-offs and adverse classifications resulted in increased loss factors. In addition, beginning with the third quarter of 2008, we shortened the allowance methodology's accumulated net charge-off

Table of Contents

look-back data from 32 quarters to 16 quarters to allow greater emphasis on current charge-off activity. Such shortening also increased the loss factors.

Finally, in order to ensure our allowance methodology is incorporating recent trends and economic conditions, we apply environmental and general economic factors to our allowance methodology including: credit concentrations; delinquency trends; economic and business conditions; the quality of lending management and staff; lending policies and procedures; loss and recovery trends; nature and volume of the portfolio; nonaccrual and problem loan trends; usage trends of unfunded commitments; and other adjustments for items not covered by other factors.

We recognize the determination of the allowance for loan losses is sensitive to the assigned credit risk ratings and inherent loss rates at any given point in time. Therefore, we perform sensitivity analyses to provide insight regarding the impact adverse changes in credit risk ratings may have on our allowance for loan losses. The sensitivity analyses have inherent limitations and is based on various assumptions as of a point in time and, accordingly, it is not necessarily representative of the impact loan risk rating changes may have on the allowance for loan losses. At December 31, 2010, in the event that 1% of our non-covered loans were downgraded one credit risk rating category for each category (e.g., 1% of the "pass" category moved to the "special mention" category, 1% of the "special mention" category moved to "substandard" category, and 1% of the "substandard" category moved to the "doubtful" category within our current allowance methodology), the allowance for credit losses would have increased by approximately \$2.0 million. In the event that 5% of our non-covered loans were downgraded one credit risk category, the allowance for credit losses would increase by approximately \$10.0 million. Given current processes employed by the Company, management believes the credit risk ratings and inherent loss rates currently assigned are appropriate. It is possible that others, given the same information, may at any point in time reach different conclusions that could be significant to the Company's financial statements. In addition, current credit risk ratings are subject to change as we continue to review loans within our portfolio and as our borrowers are impacted by economic trends within their market areas.

Management believes that the allowance for loan losses is adequate and appropriate for the known and inherent risks in our non-covered loan portfolio. In making its evaluation, management considers certain quantitative and qualitative factors including the Company's historical loss experience, the volume and type of lending conducted by the Company, the results of our credit review process, the levels of classified, criticized and nonperforming assets, regulatory policies, general economic conditions, underlying collateral values, and other factors regarding collectibility and impairment. To the extent we experience, for example, increased levels of documentation deficiencies, adverse changes in collateral values, or negative changes in economic and business conditions which adversely affect our borrowers, our classified loans may increase. Higher levels of classified loans generally result in higher allowances for loan losses.

Although we have established an allowance for loan losses that we consider adequate, there can be no assurance that the established allowance for loan losses will be sufficient to offset losses on loans in the future. Management also believes that the reserve for unfunded loan commitments is adequate. In making this determination, we use the same methodology for the reserve for unfunded loan commitments as we do for the allowance for loan losses and consider the same quantitative and qualitative factors, as well as an estimate of the probability of advances of the commitments correlated to their credit risk rating.

Allowance for Credit Losses on Covered Loans

The loans acquired in the Los Padres and Affinity acquisitions are covered by loss sharing agreements with the FDIC and we will be reimbursed for a substantial portion of any future losses. Under the terms of the Los Padres loss sharing agreement, the FDIC will absorb 80% of losses and

Table of Contents

receive 80% of loss recoveries on the covered assets. The loss sharing agreement is in effect for 10 years for single family covered assets and 5 years for commercial (non-single family) covered assets from the August 20, 2010 acquisition date. The loss recovery provisions are in effect for 10 years for single family assets and 8 years for commercial (non-single family) assets from the acquisition date. Under the terms of the Affinity loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on the first \$234 million of losses on covered assets and absorb 95% of losses and receive 95% of loss recoveries on covered assets exceeding \$234 million. The loss sharing agreement is in effect for 5 years for commercial assets (non-residential loans, OREO and certain securities) and 10 years for residential loans from the August 28, 2009 acquisition date. The loss recovery provisions are in effect for 8 years for commercial assets and 10 years for residential loans from the acquisition date.

We evaluated the acquired covered loans and elected to account for them under ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* ("ASC 310-30"), which we refer to as impaired loan accounting.

The covered loans are subject to our internal and external credit review. If deterioration in the expected cash flows results in a reserve requirement, a provision for credit losses is charged to earnings without regard to the FDIC loss sharing agreement. The portion of the estimated loss reimbursable from the FDIC will be recorded in FDIC loss sharing income and will increase the FDIC loss sharing asset. For acquired impaired loans, the allowance for loan losses is measured at the end of each financial reporting period based on expected cash flows. Decreases in the amount and changes in the timing of expected cash flows on the acquired impaired loans as of the financial reporting date compared to those previously estimated are usually recognized by recording a provision for credit losses on such covered loans. Acquired covered loans not accounted for as impaired loans totaled \$29.1 million at December 31, 2010 and are subject to our allowance for credit loss methodology. Although we estimate the required allowance for credit losses similarly to the methodology used for originated loans, we record a provision for such loan losses only when the reserve requirement exceeds any remaining credit discount on these covered loans. Please see " Financial Condition Allowance for Credit Losses on Covered Loans" and Notes 1(h) and 6 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data" for more information.

Goodwill and Other Intangible Assets

Goodwill and intangible assets arise from purchase business combinations. Goodwill and other intangible assets generated from purchase business combinations and deemed to have indefinite lives are not subject to amortization and are instead tested for impairment at least annually. Intangible assets with definite lives arising from business combinations are tested for impairment quarterly.

At December 31, 2010, we had goodwill of \$47.3 million, all of which is tax-deductible, related entirely to the Los Padres acquisition. In 2008 we determined that all of our then existing goodwill was impaired and we recorded a \$761.7 million charge to earnings to write it off. Such charge had no effect on the Company's or the Bank's cash balances or liquidity. In addition, because goodwill and other intangible assets are not included in the calculation of regulatory capital, the Company's and the Bank's well-capitalized regulatory ratios were not affected by this non-cash expense.

Our other intangible assets with definite lives include core deposit and customer relationship intangibles. The establishment and subsequent amortization of these intangible assets requires several assumptions including, among other things, the estimated cost to service deposits acquired, discount rates, estimated attrition rates and useful lives. These intangibles are being amortized over their estimated useful lives up to 10 years and tested for impairment quarterly. If the value of the core deposit intangible or the customer relationship intangible is determined to be less than the carrying value in future periods, a write-down would be taken through a charge to our earnings. The most

Table of Contents

significant element in evaluation of these intangibles is the attrition rate of the acquired deposits or loan relationships. If such attrition rate were to accelerate from that which we expected, the intangible may have to be reduced by a charge to earnings. The attrition rate related to deposit flows or loan flows is influenced by many factors, the most significant of which are alternative yields for loans and deposits available to customers and the level of competition from other financial institutions and financial services companies.

Deferred Income Tax Assets

Our deferred income tax assets arise from differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and net operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured and then established only for those items that are deemed to be realizable based on our judgment. From an accounting standpoint, we determine whether a deferred tax asset is realizable based on facts and circumstances, including the Company's current and projected future tax position, the historical level of our taxable income, and estimates of our future taxable income. In most cases, the realization of deferred tax assets is based on our future profitability. If we were to experience either reduced profitability or operating losses in a future period, the realization of our deferred tax assets may no longer be considered more likely than not that they will be realized. In such an instance, we could be required to record a valuation allowance on our deferred tax assets by charging earnings.

Non-GAAP Measurements

The Company uses certain non-GAAP financial measures to provide meaningful supplemental information regarding the Company's operational performance and to enhance investors' overall understanding of such financial performance. The discussion in this Annual Report on Form 10-K contains non-GAAP financial disclosures for tangible common equity. Tangible common equity is a non-GAAP financial measure used by investors, analysts, and bank regulatory agencies. Tangible common equity represents total equity, less any preferred equity, goodwill and intangible assets. The methodology of determining tangible common equity may differ among companies. Management reviews tangible common equity along with other measures of capital adequacy on a regular basis and has included this non-GAAP financial information, and the corresponding reconciliation to total equity, because of current interest in such information on the part of market participants.

These non-GAAP financial measures are presented for supplemental informational purposes only for understanding the Company's financial condition and operating results and should not be considered a substitute for financial information presented in accordance with United States generally accepted accounting principles (GAAP). The following table presents performance ratios in accordance with GAAP and a reconciliation of the non-GAAP financial measurements to the GAAP financial measurements.

Diluted	\$ (0.22)	\$ 0.10
Net interest margin	5.21%	5.08%
Efficiency ratio	67.4%	60.8%

Fourth Quarter of 2010 Compared to Third Quarter of 2010

We recorded a net loss of \$7.7 million for the fourth quarter of 2010 compared to net earnings of \$3.5 million for the third quarter of 2010. The fourth quarter included a \$35.3 million (\$20.5 million after-tax) credit loss provision for non-covered loans, of which \$14.3 million (\$8.3 million after-tax) was attributed to the Company's December sale of classified loans, and a \$1.9 million (\$1.1 million after tax) penalty for the early repayment of \$50 million in FHLB advances. Los Padres, which was acquired on August 20, 2010, added \$3.3 million in net earnings during the fourth quarter of 2010.

Net interest income was \$68.5 million for the fourth quarter of 2010 compared to \$65.2 million for the third quarter of 2010. The \$3.3 million increase was due mostly to a \$2.8 million increase in interest income attributable to higher average loans from the Los Padres acquisition, the accelerated accretion of purchase discount on the disposal of certain covered loans, and the higher average balance of investments due to securities purchases. Contributing to the increase in net interest income was a

Table of Contents

reduction in interest expense of \$585,000 due mainly to rate reductions on our money market and time deposit accounts and maturities of higher cost brokered deposits.

Our net interest margin for the fourth quarter of 2010 was 5.21%, an increase of 13 basis points from the 5.08% posted for the third quarter of 2010. Such improvement reflects a higher yield on average loans during the fourth quarter. The yield on average loans was 6.64% for the fourth quarter of 2010 compared to 6.59% for the prior quarter. The loan yield, earning asset yield and net interest margin are all affected by loans being placed on or removed from nonaccrual status and the acceleration of purchase discounts on covered loan pay-offs; the loan yield and net interest margin for the fourth quarter were positively impacted by 20 basis points and 16 basis points, respectively, from the combination of these items. The loan yield and net interest margin for the third quarter were positively impacted by 12 basis points and 10 basis points, respectively, from these items. The cost of interest-bearing deposits and all-in deposit cost decreased 8 basis points and 5 basis points to 0.73% and 0.50%, respectively; such decreases resulted primarily from lower rates on our deposit products and maturities of higher cost brokered deposits.

The fourth quarter provision for credit losses totaled \$37.4 million and was composed of \$35.3 million on the non-covered loan portfolio, including \$14.3 million related to the December classified loan sale, and \$2.1 million on the covered loan portfolio. The third quarter provision for credit losses totaled \$24.5 million and was composed of \$17.1 million on the non-covered loan portfolio and \$7.4 million on the covered loan portfolio. The provision on the non-covered portfolio is generated by our allowance methodology and reflects net charge-offs, the levels of nonaccrual and classified loans, loan sales activity, and the migration of loans into various risk classifications. The covered loan credit loss provision increases the covered loan allowance for credit losses and results from credit deterioration on covered loans since the acquisition dates.

The fourth quarter classified loan sale completed in December resulted in a charge-off of \$20.9 million to the allowance for loan losses, of which \$6.6 million had been previously provided through the Company's allowance methodology. The additional \$14.3 million charge-off represents the market discount in excess of the Company's allocated allowance necessary for the loans to be sold to a third party.

Noninterest income for the fourth quarter of 2010 totaled \$4.6 million compared to \$10.8 million for the third quarter of 2010. The \$6.2 million decline was due mostly to lower FDIC loss sharing income stemming from lower credit-related costs on covered loans, OREO, and a third quarter other-than-temporary impairment ("OTTI") charge on one covered investment security. There was no OTTI charge in the fourth quarter. Loss sharing income also declined due to higher FDIC loss sharing asset write-offs as covered loans, which are carried at a discount, were resolved at amounts above their carrying values. Service charges and fee income increased quarter over quarter due mostly to a full quarter of operations with Los Padres and an increase in rates charged for certain deposit services.

Noninterest expense totaled \$49.3 million for the fourth quarter of 2010 compared to \$46.2 million for the third quarter of 2010. The \$3.1 million increase was due mostly to a penalty of \$1.9 million for the early repayment of \$50 million in FHLB advances and an increase in other expense categories related to a full quarter of the Los Padres operations. Los Padres noninterest expense totaled \$4.4 million for the fourth quarter compared to \$2.1 million for the third quarter. Other professional services declined \$861,000 during the fourth quarter as the third quarter included higher consulting, legal, and due diligence costs related to acquisition activity and ongoing loan workouts.

Noninterest expense includes amortization of time-based restricted stock, which is included in compensation, and intangible asset amortization. Amortization of restricted stock totaled \$1.9 million for the fourth quarter of 2010, \$2.1 million for the third quarter of 2010 and \$8.5 million for the year ended December 31, 2010. Intangible asset amortization totaled \$2.4 million for each of the fourth and third quarters of 2010 and \$9.6 million for the year ended December 31, 2010.

Table of Contents

Net Interest Income

Net interest income, which is our principal source of income, represents the difference between interest earned on assets and interest paid on liabilities. Net interest margin is net interest income expressed as a percentage of average interest-earning assets. The following table presents, for the periods indicated, the distribution of average assets, liabilities and stockholders' equity, as well as interest income and yields earned on average interest-earning assets and interest expense and rates paid on average interest-bearing liabilities.

Edgar Filing: PACWEST BANCORP - Form 10-K

- (1) Includes nonaccrual loans and loan fees.
- (2) Yields on loans and securities have not been adjusted to a tax-equivalent basis because the impact is not material.

Net interest income is affected by changes in both interest rates and the volume of average interest-earning assets and interest-bearing liabilities. The changes in the amount and mix of average interest-earning assets and interest-bearing liabilities is referred to as a "volume change". The changes in the yields earned on average interest-earning assets and rates paid on average interest-bearing liabilities is referred to as a "rate change." The change in interest income/expense attributable to volume reflects the change in volume multiplied by the prior year's rate and the change in interest income/expense attributable to rate reflects the change in rates multiplied by the prior year's volume. The changes in interest income and expense which are not attributable specifically to either volume or

Edgar Filing: PACWEST BANCORP - Form 10-K

2010 Compared to 2009

Our net interest income and net interest margin are driven by the combination of our loan and securities volume, asset yield, high proportion of demand deposit balances to total deposits, and disciplined deposit pricing. There was no change in the Federal Funds market rate or the Bank's 4.00% lending rate during 2010.

The \$33.3 million growth in net interest income for 2010 compared to 2009 was due to a \$20.4 million increase in interest income and a \$12.9 million decline in interest expense. The increase in interest income was due to higher average balances of investment securities from the purchase of \$627.9 million of government-sponsored entity pass through securities during 2010, the interest-earning assets from the Los Padres and Affinity acquisitions, and a higher average yield on loans. The loan yield, earning asset yield and net interest margin are all affected by loans being placed on or removed from nonaccrual status and the acceleration of purchase discounts on covered loan pay-offs; the combination of these items increased interest income \$4.1 million and positively impacted the net interest margin 8 basis points in 2010. For 2009, these items reduced interest income \$4.1 million and decreased the net interest margin 9 basis points.

The decline in interest expense was due mainly to lower rates paid on deposits and borrowings and lower average borrowings. Our overall cost of average deposits was 0.59% for 2010 compared to 0.88% for 2009. Noninterest-bearing demand deposits averaged \$1.4 billion, or 32% of total average deposits for 2010 compared to \$1.2 billion, or 35% of total average deposits for 2009. For 2008, our overall cost of average deposits was 1.26% and noninterest-bearing demand deposits averaged \$1.2 billion, or 38% of total average deposits.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

The net interest margin for 2010 was 5.02%, an increase of 23 basis points when compared to 2009. The increase is due mostly to a higher yield on average loans and lower funding costs, due principally to lower rates paid on deposits and lower average borrowings.

2009 Compared to 2008

The \$3.3 million decrease in net interest income for 2009 compared to 2008 is due mostly to reduced loan interest income offset by lower funding costs. The net interest margin fell 51 basis points year over year to 4.79% for 2009 when compared to 2008. The declines are driven largely by the lower level of market interest rates.

Loan interest income decreased \$21.9 million from lower loan yields as a result of the lower level of market interest rates. Market interest rates declined during 2008 and then remained at historically low levels throughout 2009. Our base lending rate was lowered to 4.00% in December 2008 and remained at this level for 2009. The sustained lower interest rates contributed to our loan yields averaging 6.29% for 2009 compared to 7.08% for 2008. The higher level of nonaccrual loans also lowered loan interest income and loan yields. Of the \$21.9 million decline in loan interest income, net reversals of interest income on nonaccrual loans contributed \$2.4 million to this decrease; net reversals of interest income on nonaccrual loans reduced loan interest income \$4.1 million for 2009 and \$1.7 million for 2008. These reversals reduced the net interest margin 9 basis points for 2009 and 4 basis points for 2008.

We reduced interest expense \$14.7 million by lowering the rates paid on money market and time deposit products. The effect of rate reductions on time deposits was offset somewhat by higher average balances from the Security Pacific Bank and Affinity Bank acquisitions. Borrowing costs declined from lower market interest rates and lower average FHLB borrowings.

Provision for Credit Losses

The following table sets forth the details of the provision for credit losses and presents allowance for credit losses data for the years indicated. The columns titled "Increase (Decrease)" set forth the year-over-year changes between 2010 and 2009 and between 2009 and 2008.

	Year Ended December 31,				
	2010	Increase (Decrease)	2009	Increase (Decrease)	2008
(In thousands)					
Provision For Credit Losses:					
Addition to allowance for loan losses	\$ 178,878	\$ 37,268	\$ 141,610	\$ 92,610	\$ 49,000
Addition (reduction) to reserve for unfunded loan commitments	114	(176)	290	3,490	(3,200)

Allowance for credit losses to non-covered loans, net of unearned income (year-end)	3.30%		3.35%		1.72%

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

The amount of the provision for credit losses in each year is a charge against earnings in that year. The provisions for credit losses are based on our allowance methodology and reflect our judgments about the adequacy of the allowance for loan losses and the reserve for unfunded loan commitments. In determining the amount of the provision, we consider certain quantitative and qualitative factors including our historical loan loss experience, the volume and type of lending we conduct, the results of our credit review process, the level and trends of classified, criticized, past due and nonaccrual loans, regulatory policies, usage trends of unfunded loan commitments, portfolio concentrations, general economic conditions, underlying collateral values, off-balance sheet exposures, and other factors regarding collectability and impairment. To the extent we experience, for example, increased levels of documentation deficiencies, adverse changes in collateral values, or negative changes in economic and business conditions which adversely affect our borrowers, our classified loans may increase. Increases in our classified loans generally result in provisions for credit losses.

We made provisions for credit losses totaling \$218.0 million during 2010, \$159.9 million during 2009, and \$45.8 million during 2008. The 2010 provision for credit losses was comprised of a \$179.0 million addition to the allowance for loan losses on the non-covered loan portfolio, a \$39.0 million addition to the covered loan allowance for credit losses, and a \$114,000 addition to the reserve for unfunded loan commitments. The 2010 provision for credit losses on non-covered loans includes \$85.7 million related to \$398.5 million of classified loans sold in 2010.

The 2009 provision for credit losses was composed of a \$141.6 million addition to the allowance for loan losses on the non-covered loan portfolio, an \$18.0 million addition to the covered loan allowance for credit losses and a \$290,000 addition to the reserve for unfunded loan commitments. The 2008 provision for credit losses was composed of a \$49.0 million addition to the allowance for loan losses and a \$3.2 million reduction to the reserve for unfunded loan commitments.

Net non-covered loans charged-off in 2010 increased by \$112.5 million to \$198.9 million when compared to 2009. Our 2010 net charge-offs are higher due primarily to \$144.6 million in charge-offs that we recorded in connection with the sales of \$398.5 million in classified loans during the year. The economic downturn has negatively impacted our borrowers and the collateral values underlying our loans. A protracted economic down cycle will increase the stress on our loan portfolio and we may continue to experience increased levels of charge-offs and provisions.

The allowance for credit losses on the non-covered loan portfolio totaled \$104.3 million, or 3.30% of non-covered loans, net of unearned income, at December 31, 2010. The allowance for credit losses totaled \$124.3 million, or 3.35% of non-covered loans, net of unearned income, at December 31, 2009. Of these amounts, the allowance for loan losses totaled \$98.6 million at December 31, 2010 and \$118.7 million at December 31, 2009.

The \$39.0 million provision for credit losses on the covered loan portfolio for 2010 reflects credit deterioration on covered loans subsequent to the acquisition dates. This provision was based on an ongoing analysis of acquired loans, which indicated a decrease in expected cash flows compared to previous estimates. Under the terms of the FDIC loss sharing agreement, the FDIC absorbs 80% of the losses reflected by the provision. As a result, \$31.2 million is included in the noninterest income caption "FDIC loss sharing income, net" and represents 80% of the credit loss provision for covered loans.

Increased provisions for credit losses may be required in the future based on loan and unfunded commitment growth, the effect changes in economic conditions, such as inflation, unemployment, market interest rate levels, and real estate values may have on the ability of our borrowers to repay their loans, and other negative conditions specific to our borrowers' businesses. See " Critical Accounting Policies," " Financial Condition Allowance for Credit Losses on Non-Covered Loans," " Financial Condition Allowance for Credit Losses on Covered Loans," and Notes 1(h) and 6 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

Table of Contents**Noninterest Income**

The following table sets forth the details of noninterest income for the years indicated. The columns titled "Increase (Decrease)" set forth the year-over-year changes between 2010 and 2009 and between 2009 and 2008.

	Year Ended December 31,				
	2010	Increase (Decrease)	2009	Increase (Decrease)	2008
(In thousands)					
Noninterest Income:					
Service charges on deposit accounts	\$ 11,561	\$ (447)	\$ 12,008	\$ (1,006)	\$ 13,014
Other commissions and fees	7,291	340	6,951	(326)	7,277
Other-than-temporary-impairment loss on securities	(874)	(874)			
FDIC loss sharing income, net	28,330	12,016	16,314	16,314	
Increase in cash surrender value of life insurance	1,440	(139)	1,579	(841)	2,420
Gain from Affinity acquisition		(66,989)	66,989	66,989	
Loss on sale of loans				303	(303)
Other income	1,036	(1,030)	2,066	47	2,019
Total noninterest income	\$ 48,784	\$ (57,123)	\$ 105,907	\$ 81,480	\$ 24,427

2010 Compared to 2009

Noninterest income declined in 2010 to \$48.8 million from the \$105.9 million earned in 2009. The \$57.1 million decrease was due mainly to the \$67.0 million gain on the Affinity acquisition recorded in August 2009; there was no similar gain in 2010. The 2010 overall decline compared to 2009 was offset partially by an increase of \$12.0 million in FDIC loss sharing income to \$28.3 million. The increase in FDIC loss sharing income for 2010 was attributable mostly to the FDIC's share of the \$21.0 million increase in the provision for credit losses on covered loans. Another factor contributing to the decline in noninterest income was an \$874,000 other-than-temporary impairment loss that we recorded in 2010 on one covered investment security due to deteriorating cash flows and significant delinquency of the underlying loan collateral. This impairment loss was offset partially by related FDIC loss sharing income of \$699,000. Service charges on deposit accounts decreased \$447,000 due mostly to a decrease in NSF handling fees because fewer checks were drawn against accounts with insufficient funds. The decline in other income is attributed to the receipt of a death benefit in 2009; there were no such benefits received in 2010.

Income from the cash surrender value of bank owned life insurance (BOLI) policies was lower for 2010 compared to 2009 and for 2009 when compared to 2008 due mostly to lower yields for our life insurance policies, which is in line with lower market interest rates. As of December 31, 2010, we owned \$22.1 million in separate account BOLI policies and \$44.1 million in general account BOLI policies. Our crediting rate, or yield for our life insurance policies, changes quarterly and is determined by the performance of the underlying investments. The income is recognized as an appreciation of the cash surrender value of life insurance policies. It is noncash income and not subject to income tax. The tax-equivalent yield for our life insurance policies was 3.76% during 2010, 4.07% during 2009, and 6.03% during 2008.

2009 Compared to 2008

Noninterest income increased \$81.5 million for the year ended December 31, 2009 to \$105.9 million from the \$24.4 million earned during 2008. The increase is due mostly to the \$67.0 million gain from the Affinity acquisition that occurred on August 28, 2009 coupled with FDIC loss sharing income of \$16.3 million.

Table of Contents*Noninterest Expense*

The following table sets forth the details of noninterest expense for the years indicated. The columns titled "Increase (Decrease)" set forth the year-over-year changes between 2010 and 2009 and between 2009 and 2008.

	Year Ended December 31,				
	2010	Increase (Decrease)	2009	Increase (Decrease)	2008
(Dollars in thousands)					
Noninterest Expense:					
Compensation	\$ 87,483	\$ 9,310	\$ 78,173	\$ 5,988	\$ 72,185
Occupancy	27,639	1,256	26,383	1,852	24,531
Data processing	8,538	1,592	6,946	714	6,232
Other professional services	8,567	1,653	6,914	374	6,540
Business development	2,463	(78)	2,541	(503)	3,044
Communications	3,329	397	2,932	(219)	3,151
Insurance and assessments	9,685	380	9,305	5,782	3,523
Other real estate owned, net	14,770	(8,552)	23,322	21,104	2,218
Intangible asset amortization	9,642	95	9,547	(73)	9,620
Goodwill write-off				(761,701)	761,701
Other expense	16,687	3,546	13,141	(49)	13,190
Total noninterest expense	\$ 188,803	\$ 9,599	\$ 179,204	\$ (726,731)	\$ 905,935

2010 Compared to 2009

Noninterest expense increased \$9.6 million year-over-year to \$188.8 million for 2010. The growth in most expense categories was due primarily to higher overhead costs related to the Affinity and Los Padres acquisitions. Compensation increased \$9.3 million due to the acquisitions and severance costs. Excluding employees gained in the Los Padres acquisition, we reduced our workforce by approximately 5% and paid \$1.0 million in severance at the end of the third quarter of 2010; the annual pre-tax savings from these departures is approximately \$3.6 million. Occupancy costs increased \$1.3 million due mostly to the 10 branches added in the Affinity acquisition and 14 branches added in the Los Padres acquisition. Other professional services increased \$1.7 million due mostly to higher legal costs related to loan workout activity and consulting fees for acquisitions. For acquisitions completed after January 1, 2009, acquisition related costs, such as legal, accounting valuation and other professional fees, necessary to effect a business combination, are charged to earnings in periods in which the costs are incurred. We incurred and charged to expense approximately \$900,000 and \$600,000 of such costs in 2010 and 2009, respectively, which are included in other professional fees. Other expense increased \$3.5 million due mostly to a \$1.2 million increase in loan-related costs, \$2.7 million in penalties for early repayment of \$175 million in FHLB advances in 2010, and lower reorganization charges of \$1.2 million. There were no FHLB prepayment penalties in 2009. The elevated loan-related costs were attributed to ongoing workout efforts. The 2009 reorganization charges totaled \$1.2 million and related to a first quarter staff reduction, premises costs for the closing of two banking offices in the second quarter, and additional rent for a discontinued acquired office. OREO costs declined \$8.6 million due mostly to higher net gains on sales and lower write-downs and costs in 2010.

Noninterest expense includes (i) amortization of time-based restricted stock, which vests either in increments over a three to five year period or at the end of such period and is included in compensation expense and (ii) intangible asset amortization, which is related to customer deposit and customer relationship intangible assets. Amortization of restricted stock totaled \$8.5 million and

Table of Contents

\$8.2 million for the years ended December 31, 2010 and 2009, respectively. Intangible asset amortization was \$9.6 million and \$9.5 million for 2010 and 2009, respectively.

2009 Compared to 2008

Noninterest expense for the year ended December 31, 2009 totaled \$179.2 million compared to \$905.9 million for the same period in 2008. The \$726.7 million decrease is due mostly to the \$761.7 million goodwill write-off in 2008. The remaining \$35.0 million increase in noninterest expense is due to higher OREO costs of \$21.1 million, higher deposit insurance costs of \$5.8 million and higher compensation costs of \$6.0 million. OREO costs reflect higher levels of writedowns on the portfolio, which totaled \$17.8 million, due to the declining real estate market and increased holding costs during the year. The increased deposit insurance costs relate to higher FDIC deposit insurance premiums generally, plus the cost to participate in the Transaction Account Guarantee Program and the second quarter of 2009 special FDIC deposit insurance assessment of \$2.0 million. Compensation costs increased year-over-year due to increased staff levels from our acquisitions and higher compensation expense from restricted stock awards.

Compensation expense included \$8.2 million for 2009 and \$930,000 for 2008 in amortization expense for shares of time-based and performance-based restricted stock awarded to employees. Time-based restricted stock vests either in increments over a three to five year period. Performance-based restricted stock vests when the Company attains specific long-term financial targets. Beginning with the fourth quarter of 2007, the amortization of certain performance-based restricted stock awards was suspended. During the fourth quarter of 2008 we concluded it was improbable that the financial targets would be met for the performance-based stock awards. Accordingly, we reversed the accumulated amortization on those awards through a credit of \$4.5 million to compensation expense. If and when the attainment of such performance targets is deemed probable in future periods, a catch-up adjustment will be recorded and amortization of such performance-based restricted stock will begin again. The total amount of unrecognized compensation expense related to the performance-based restricted stock for which amortization was suspended and reversed totaled \$26.6 million.

Income Taxes

Effective income tax rates were 43.0%, 45.5%, and 2.8% for the years ended December 31, 2010, 2009, and 2008, respectively. The difference in the effective tax rates between the annual periods relates mainly to the level of tax credits and tax deductions and the amount of tax exempt income recorded in each of the years. The 2008 effective rate was lowered by the goodwill write-off, the majority of which was not deductible for tax purposes. For further information on income taxes, see Note 14 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

Less: unearned income	(4,380)		(5,999)		(8,593)		(9,508)		(12,868)	
Loans, net of unearned income	3,161,055		3,707,383		3,987,891		3,949,218		4,189,543	
Less: allowance for loan losses	(98,653)		(118,717)		(63,519)		(52,557)		(52,908)	
Total net non-covered loans	\$ 3,062,402		\$ 3,588,666		\$ 3,924,372		\$ 3,896,661		\$ 4,136,635	
Loans held for sale ⁽¹⁾	\$		\$		\$		\$ 63,565		\$ 173,319	

(1)

Loans held for sale, consisting of SBA 504 and 7(a) loans, were transferred into the regular portfolio during the second quarter of 2008, when the SBA loan sale operations was suspended. Loans held for sale at December 31, 2007 include \$54.1 million of SBA 504 loans, which are real estate mortgage loans, and \$9.4 million of SBA 7(a) loans, which are commercial loans.

During 2010 our gross non-covered loans declined \$547.9 million due primarily to \$398.5 million in classified loans sold during the year. The decline was offset partially by the \$234.1 million purchase of performing loans in July 2010. The non-covered portfolio continues to decline as a result of repayments, foreclosures, charge-offs and the stagnant economy which causes both a low demand for loans and fewer acceptable lending opportunities. Real estate construction loans declined \$260.8 million, real estate mortgage loans declined \$149.0 million, and commercial loans declined \$130.9 million. We continued to reduce our exposure to real estate construction. The real estate construction category at December 31, 2010 includes commercial real estate construction loans totaling \$107.1 million compared to \$265.6 million at the end of 2009 and residential real estate construction loans totaling \$72.4 million at the end of 2010 compared to \$174.7 million at December 31, 2009.

Our non-covered foreign loans totaled \$22.6 million at December 31, 2010 and were primarily to individuals and entities located in Mexico. All of our non-covered foreign loans are denominated in U.S. dollars and the majority is collateralized by assets located in the United States or guaranteed or insured by businesses located in the United States. In addition to our outstanding non-covered foreign loans, our non-covered foreign loan commitments totaled \$17.2 million at December 31, 2010. We continued to allow our non-covered foreign loan portfolio to repay in the ordinary course of business without making any new privately-insured non-covered foreign loans other than those under existing commitments.

Table of Contents

Non-Covered Classified Loan Sales

During 2010, we made strategic decisions to sell \$398.5 million of non-covered classified loans to reduce credit risk, thereby strengthening the Bank's balance sheet and enhancing its ability to continue to participate in bidding on FDIC-assisted acquisitions. Such sales resulted in immediate reductions of classified loans and improved credit quality metrics. The improvement in credit quality metrics for the non-covered portfolio is shown in the following table:

	December 31, 2010	September 30, 2010	June 30, 2010	March 31, 2010	December 31, 2009
(Dollars in thousands)					
Nonaccrual loans	\$ 94,183	\$ 105,539	\$ 108,283	\$ 99,920	\$ 240,167
New nonaccrual loans in the quarter	\$ 21,413(1)	\$ 26,543	\$ 25,136	\$ 18,096	\$ 120,446
Nonperforming assets	\$ 119,781	\$ 130,137	\$ 132,806	\$ 129,563	\$ 283,422
Performing restructured loans	\$ 89,272	\$ 143,407	\$ 76,367	\$ 51,896	\$ 181,454
Allowance for credit losses to nonaccrual loans	110.8%	95.9%	86.3%	91.5%	51.8%
Allowance for credit losses to loans, net of unearned income	3.30%	3.05%	2.93%	2.81%	3.35%

(1)

Includes two loans to one borrower with a balance of \$13.9 million, of which \$6.9 million was subsequently charged off and a 100% specific reserve was established for the remaining amount.

In December 2010, we sold non-covered classified loans totaling \$74.9 million for \$54.0 million in cash. Such sale resulted in a charge-off to the allowance for credit losses of \$20.9 million, of which \$6.6 million had been previously allocated to the loans sold through our allowance methodology and \$14.3 million represented the market discount necessary for the loans to be sold to the buyer. The sale was on a servicing-released basis and without recourse to Pacific Western Bank. All loans sold were originated by Pacific Western Bank and none were covered loans acquired in the Los Padres Bank or Affinity Bank acquisitions. The loans sold included \$17.6 million in nonaccrual loans and \$43.7 million in performing restructured loans as of September 30, 2010.

In February 2010, the Bank sold non-covered classified loans totaling \$323.6 million to an institutional buyer for \$200.6 million in cash. Such sale resulted in a charge-off to the allowance for credit losses of \$123.0 million, of which \$51.6 million had been previously allocated to the loans sold through our allowance methodology and \$71.4 million represented the market discount necessary for the loans to be sold to the buyer. The sale was on a servicing-released basis and without recourse to Pacific Western Bank. All loans sold were originated by Pacific Western Bank and none were acquired in the Affinity Bank acquisition. The loans sold included \$110.5 million in nonaccrual loans and \$105.1 million in restructured loans.

The decisions to enter into these transactions were made shortly before the sale dates and after the immediately preceding reporting periods. Therefore, the loans were not accounted for as being held for sale prior to the transaction.

July 2010 Loan Portfolio Purchase

On July 1, 2010, we purchased a \$234.1 million portfolio of 225 performing loans secured by Southern California real estate for a cash price of \$228.3 million. Such loans had a weighted average coupon interest rate of 6.15% and a weighted average maturity of 4.6 years. These loans were part of the Foothill Independent Bank loan portfolio that we acquired when we completed the Foothill Independent Bancorp acquisition in May 2006. In March 2007, we sold a 95% participating interest in these loans for cash and continued to service them and maintain the borrower relationships. When the opportunity to purchase this loan portfolio presented itself, we concluded it would be in the best interests of the Company and the Bank to make this purchase as we are familiar with the credit risk and it would deploy excess liquidity in a manner that would increase interest income and expand the net interest margin.

Table of Contents

Covered Loans

Los Padres Bank Acquisition

On August 20, 2010, we acquired certain assets of Los Padres Bank, including all loans, and assumed substantially all of its liabilities, including all deposits, from the FDIC in an FDIC-assisted acquisition, which we refer to as the Los Padres acquisition. We entered into a loss sharing agreement with the FDIC, whereby the FDIC agreed to cover a substantial portion of any future losses on acquired loans, with the exception of consumer loans, and other real estate owned. Under the terms of such loss sharing agreement, the FDIC is obligated to reimburse the Bank for 80% of losses with respect to the covered assets. The Bank will reimburse the FDIC for 80% of recoveries with respect to losses for which the FDIC paid the Bank 80% reimbursement under the loss sharing agreement. The loss sharing arrangement for single family covered assets and commercial (non-single family) covered assets is in effect for 10 years and 5 years, respectively, from the acquisition date, and the loss recovery provisions are in effect for 10 years and 8 years, respectively, from the acquisition date. We refer to the loans acquired in the Los Padres acquisition and subject to the loss sharing agreement as "covered loans." We refer to the acquired assets subject to the loss sharing agreement collectively as "covered assets."

Affinity Acquisition

On August 28, 2009, Pacific Western Bank acquired certain assets and liabilities of Affinity Bank from the FDIC in an FDIC-assisted transaction. We entered into a loss sharing agreement with the FDIC, whereby the FDIC agreed to cover a substantial portion of any future losses on acquired loans, other real estate owned and certain investment securities. Under the terms of such loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on the first \$234 million of losses on covered assets and absorb 95% of losses and receive 95% of loss recoveries on covered assets exceeding \$234 million. The loss sharing agreement is in effect for 5 years for commercial assets (non-residential loans, OREO and certain securities) and 10 years for residential loans from the August 28, 2009 acquisition date. The loss recovery provisions are in effect for 8 years for commercial assets and 10 years for residential loans from the acquisition date. We refer to the loans acquired in the Affinity acquisition and subject to the loss sharing agreement as "covered loans". We refer to the acquired assets subject to the loss sharing agreement collectively as "covered assets."

At the acquisition dates, we estimated the fair values of the Los Padres and Affinity covered loans to be \$436.3 million and \$675.6 million, respectively. Fair value of acquired loans is determined using a discounted cash flow model based on assumptions about the amount and timing of principal and interest payments, estimated prepayments, estimated default rates, estimated loss severity in the event of defaults, and current market rates. Estimated credit losses are included in the determination of fair value; therefore, an allowance for loan losses is not recorded on the acquisition date.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

The following table reflects the net carrying value of the covered loans as of the dates indicated:

Loan Category	December 31,	
	2010	2009
	(In thousands)

Covered loans, net of discount	941,840	639,686
Less: allowance for loan losses	(33,264)	(18,000)
Covered loans, net	\$ 908,576	\$ 621,686

We account for loans under ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* ("acquired impaired loan accounting") when (i) we acquire loans deemed to be impaired when there is evidence of credit deterioration since the origination and it is probable at the date of acquisition that we would be unable to collect all contractually required payments and (ii) as a general policy election for non-impaired loans that we acquire in a distressed bank acquisition. We may refer to acquired loans accounted for under ASC 310-30 as "acquired impaired loans." In connection with the Affinity acquisition, we applied acquired impaired loan accounting to all of the covered loans. In connection with the Los Padres acquisition, we applied acquired impaired loan accounting to \$405.6 million of the covered loans. We also acquired in the Los Padres acquisition \$31.5 million of revolving credit agreements, mainly home equity loans and commercial asset-based lines of credit, where the borrower had revolving privileges; we accounted for such loans in accordance with accounting requirements for purchased non-impaired loans. GAAP excludes revolving credit agreements, such as home equity lines and credit card loans, from acquired impaired loan accounting requirements.

For acquired impaired loans, we (i) calculated the contractual amount and timing of undiscounted principal and interest payments (the "undiscounted contractual cash flows") and (ii) estimated the amount and timing of undiscounted expected principal and interest payments (the "undiscounted expected cash flows"). Under acquired impaired loan accounting, the difference between the undiscounted contractual cash flows and the undiscounted expected cash flows is the nonaccretable difference. The nonaccretable difference represents an estimate of the loss exposure of principal and interest related to the covered acquired impaired loans portfolio and such amount is subject to change over time based on the performance of such covered loans. The carrying value of covered acquired impaired loans is reduced by payments received, both principal and interest, and increased by the portion of the accretable yield recognized as interest income.

The excess of undiscounted expected cash flows at acquisition over the initial fair value of acquired impaired loans is referred to as the "accretable yield" and is recorded as interest income over the estimated life of the loans using the effective yield method if the timing and amount of the future cash flows is reasonably estimable. The accretable yield changes over time due to both accretion and as actual and expected cash flows vary from the acquisition date estimated cash flows. The accretable yield is measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the loans. The remaining

Table of Contents

undiscounted expected cash flows are calculated at each financial reporting date based on information then currently available. Subsequent to acquisition, the Company aggregates loans into pools of loans with common credit risk characteristics such as loan type and risk rating. Increases in expected cash flows over those previously estimated increase the accretable yield and are recognized as interest income prospectively. Decreases in the amount and changes in the timing of expected cash flows compared to those previously estimated decrease the accretable yield and usually result in a provision for loan losses and the establishment of an allowance for loan losses.

Under acquired impaired loan accounting, purchased loans are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when expected cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans as long as there is an expectation that the estimated cash flows will be received. If the timing and amount of cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans and interest income may be recognized on a cash basis or as a reduction of the principal amount outstanding.

The following table summarizes the changes in the carrying amount of covered acquired impaired loans and accretable yield on those loans for the periods indicated:

	Covered Acquired Impaired Loans	
	Carrying Amount	Accretable Yield
	(In thousands)	
Balance, January 1, 2009	\$	\$
Addition from the Affinity acquisition	675,616	(248,174)
Accretion	17,622	17,622
Payments received	(53,552)	
Decrease in expected cash flows		4,106
Provision for credit losses	(18,000)	
Balance, December 31, 2009	621,686	(226,446)
Addition from the Los Padres acquisition	405,619	(144,168)
Accretion	52,539	52,539
Payments received	(161,312)	
Decrease in expected cash flows		27,410
Provision for credit losses	(39,046)	
Balance, December 31, 2010	\$ 879,486	\$ (290,665)

The table above excludes the purchased non-impaired loans from the Los Padres acquisition, which totaled \$29.1 million at December 31, 2010.

The undiscounted contractual cash flows, undiscounted cash flows expected to be collected, and the estimated fair value of the Los Padres covered acquired impaired loan portfolio as of the acquisition date were \$694.5 million, \$549.8 million, and \$405.6 million, respectively.

At December 31, 2010, the weighted average remaining contractual life of the covered loan portfolio was 9 years.

Table of Contents***Loan Interest Rate Sensitivity***

The following table presents contractual maturity and repricing information for the indicated covered and non-covered loans at December 31, 2010:

Loan Category	One Year Or Less	Repricing or Maturing In Over		Total
		One to Five Years	Over Five Years	
(In thousands)				
Non-covered domestic:				
Real estate mortgage	\$ 482,368	\$ 858,541	\$ 933,824	\$ 2,274,733
Commercial	399,878	206,409	57,270	663,557

 Reserve for unfunded loan commitments, end of year	 \$ 5,675	 \$ 5,561	 \$ 5,271	 \$ 8,471	 \$ 8,271

The following table allocates the allowance for loan losses based on our judgment of inherent losses in the respective loan portfolio categories. At December 31, 2010, the portion of the allowance allocated to individual portfolio categories includes an amount for both imprecision and uncertainty to better reflect our view of risk. Nonetheless, the allowance for loan losses is available to absorb any losses without restriction.

	Allocation of Allowance for Loan Losses						Total

% of loans to total loans	79%		18%	1%	2%		100%

(1) For further information on allowance allocations, see Note 6 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

(2) The allocation for the real estate construction loan portfolio was not separately available and is included in the real estate mortgage loan portfolio allocation.

Edgar Filing: PACWEST BANCORP - Form 10-K

The allowance amount allocated to the commercial loan category increased during 2010 in consideration of the elevated risk profile of this category. The allowance amount allocated to the construction loan category decreased during 2010 in consideration of reduced exposure within that category and significant reduction in the size of that loan portfolio.

Table of Contents**Allowance for Credit Losses on Covered Loans**

For a discussion of our policy and methodology on the allowance for credit losses on covered loans, see "Critical Accounting Policies Allowance for Credit Losses on Covered Loans." For further information on the allowance for credit losses on covered loans, see Note 6 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

The following table presents the changes in our allowance for credit losses on covered loans for the years indicated:

	Year Ended December 31,	
	2010	2009
	(In thousands)	
Allowance for credit losses on covered loans, beginning of year	\$ 18,000	\$
Provision	39,046	18,000
Charge-offs, net	(23,782)	

Allowance for credit losses on covered loans, end of year	\$ 33,264	\$ 18,000
---	-----------	-----------

Non-Covered Nonperforming Assets

The following table sets forth certain information with respect to our non-covered nonaccrual loans and other real estate owned. For the periods presented, we did not have any non-covered loans past due 90 days or more and still accruing.

	December 31,				
	2010	2009	2008	2007	2006
	(Dollars in thousands)				
Non-covered nonaccrual loans	\$ 94,183	\$ 240,167	\$ 63,470	\$ 22,473	\$ 22,095
Non-covered other real estate owned	25,598	43,255	41,310	2,736	
Total non-covered nonperforming assets	\$ 119,781	\$ 283,422	\$ 104,780	\$ 25,209	\$ 22,095
Non-covered performing restructured loans	\$ 89,272	\$ 181,454	\$ 12,637	\$ 1,942	\$
Non-covered nonaccrual loans to non-covered loans, net of deferred fees and costs, including loans held for sale	2.98%	6.48%	1.59%	0.56%	0.51%
Non-covered nonperforming assets to non-covered loans, including loans held for sale, and non-covered other real estate owned	3.76%	7.56%	2.60%	0.63%	0.51%

During 2010, non-covered nonperforming assets declined by \$163.6 million to \$119.8 million at December 31, 2010, due mainly to lower nonaccrual loans. The drop in nonaccrual loans was attributable primarily to \$398.5 million of non-covered classified loans sold in 2010, of which \$128.1 million were nonaccrual loans and \$148.8 million were performing restructured loans. All nonaccrual loans are considered impaired and are evaluated individually for loss exposure. At December 31, 2010, approximately \$12.4 million of the allowance for credit losses was allocated to nonaccrual loans.

Edgar Filing: PACWEST BANCORP - Form 10-K

	\$ 94,183	3.0%	\$ 240,167	6.5%	\$ 3,734	\$ 8,493

(1) Excludes covered loans from the Los Padres and Affinity acquisitions.

The net decrease in non-covered nonaccrual loans during 2010 is composed of additions of \$91.2 million, reductions, payoffs and return to accrual status of \$46.4 million, sales of \$127.3 million, charge-offs of \$31.1 million, and foreclosures of \$32.4 million.

Included in the non-covered nonaccrual loans at December 31, 2010 are \$15.9 million of SBA related loans representing 17% of total non-covered nonaccrual loans at that date. The SBA 504 loans are secured by first trust deeds on owner-occupied business real estate with loan-to-value ratios of generally 50% or less at the time of origination. SBA 7(a) loans are secured by borrowers' real estate and/or business assets and are covered by an SBA guarantee of up to 85% of the loan amount. The SBA guaranteed portion on the 7(a) and Express loans shown above is \$5.6 million. At December 31, 2010, the SBA loan portfolio totaled \$106.9 million and was composed of \$75.3 million in SBA 504 loans and \$31.6 million in SBA 7(a) and Express loans.

At December 31, 2010, 73% of the nonaccrual loan total was represented by:

1. SBA-related loans of \$15.9 million. One loan for \$3 million was repaid in full in February 2011.
2. Two loans collateralized by land in Ventura County, California totaling \$23.3 million. We expect to foreclose on these loans by the end of the first quarter of 2011.

3.

One loan for \$5.7 million secured by an out-of-state shopping center. This loan has been written down to its underlying collateral value based on the most recent appraisal and a court appointed receiver is managing the property. We expect to take physical possession and ownership of the property during the second quarter of 2011.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

4. A hotel-secured loan totaling \$4.2 million. Since the loan was placed on nonaccrual, operating income from the property has improved and it is projected to return to profitability.
5. Four industrial warehouse loans to the same borrower totaling \$5.8 million.
6. One residential loan for \$6.4 million. The loan is collateralized by 2nd trust deeds on two single family residences in Beverly Hills, California. On March 1, 2011, the borrower put the two properties in bankruptcy.
7. Two unsecured loans to the same borrower totaling \$6.9 million after a fourth quarter charge-off of \$6.9 million. The borrower notified the Bank in the fourth quarter that his cash flow was no longer sufficient to service the debt; at that time the charge-off was recorded and a 100% specific reserve was established for the remaining loan amount.

Non-covered performing restructured loans declined by \$92.2 million during 2010, to \$89.3 million at December 31, 2010. The decline was attributable primarily to the sales of \$148.8 million in such loans as part of the classified loan sales in 2010. At December 31, 2010, we had \$69.7 million in real estate mortgage loans, \$18.1 million in real estate construction loans, and \$1.5 million in commercial loans that were accruing interest under the terms of troubled debt restructurings. The majority of our loan restructurings relates to commercial real estate lending and involves lowering the interest rate and/or a change to interest-only payments for a period of time. In these cases, we do not typically forgive principal or extend the maturity date as part of the loan modification.

The majority of the performing restructured loans were on accrual status prior to the loan modifications and have remained on accrual status after the loan modifications due to the borrowers making payments before and after the restructurings. In these circumstances, generally, a borrower may have had a fixed rate loan that they continued to repay, but may be having cash flow difficulties. In an effort to work with certain borrowers, we have agreed to interest rate reductions to reflect the lower market interest rate environment and/or interest-only payments for a period of time. As a result of the current economic environment in our market areas, we anticipate loan restructurings to continue during 2011.

The following table presents the non-covered OREO by property type as of the dates indicated:

Property Type	December 31,	
	2010	2009
(In thousands)		
Commercial real estate	\$ 18,205	\$ 28,478
Construction and land development	4,650	7,514
Single family residence	2,743	7,263
 Total non-covered OREO	 \$ 25,598	 \$ 43,255

Non-covered OREO declined \$17.7 million in 2010 due to foreclosures totaling \$36.8 million, write-downs of \$12.3 million and sales totaling \$42.2 million.

Covered Nonperforming Assets

Loans accounted for under ASC 310-30 are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans. If the timing and amount of future cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans and interest income is not recognized until the timing and amount of future cash flows can be reasonably estimated.

Table of Contents

The following table presents a summary of covered loans that would normally be considered nonaccrual except for the accounting requirements regarding acquired impaired loans and other real estate owned covered by the loss sharing agreement ("covered nonaccrual loans" and "covered OREO"; collectively, "covered nonperforming assets") as of the dates indicated:

	December 31,	
	2010	2009
	(In thousands)	
Covered nonaccrual loans	\$ 142,964	\$ 87,653
Covered OREO	55,816	27,688
Total covered nonperforming assets	\$ 198,780	\$ 115,341
Covered performing restructured loans	\$ 14,255	\$ 13,566

Loan Portfolio Risk Elements

The increased level of nonaccrual loans over the last several years is due to the economy and its effect on our borrowers. Certain industries and collateral types have been more affected than others. Our real estate loan portfolio is predominantly commercial and as such does not include any higher-risk residential mortgage loans such as option ARM or subprime mortgage loans. Our portfolio does include mortgage loans on commercial property. Commercial mortgage loan repayments rely on either the sale of the underlying collateral or the income producing potential of the collateral. Ultimately, though, due to the loan amortization period being greater than the contractual loan term, the borrower may be required to refinance the loan, either with us or another lender, or sell the underlying collateral in order to payoff the loan.

We have \$229.1 million of non-covered commercial real estate mortgage loans maturing over the next 12 months. In the event we refinance any of these loans because the borrowers are unable to obtain financing elsewhere due to the inability of banks in our market area to make loans, such loans may be considered troubled debt restructurings even though they were performing throughout their terms. Higher levels of troubled debt restructurings may lead to increased classified assets and credit loss provisions.

Investment Portfolio

Our investment activities are designed to assist in maximizing income consistent with quality and liquidity requirements, to supply collateral to secure public funds on deposit and lines of credit, and to provide a means for balancing market and credit risks through changing economic times. Our portfolio consists primarily of U.S. government agency obligations, obligations of government-sponsored entities, obligations of states and political subdivisions, private-label collateralized mortgage obligations ("CMOs") and FHLB stock.

During 2010, we purchased \$627.9 million of government-sponsored entity pass through securities utilizing our excess liquidity. During 2009, we acquired \$158.8 million of investment securities at their estimated fair value in the Affinity acquisition including \$55.3 million of "private-label" CMOs which are covered by a FDIC loss sharing agreement. The remaining acquired securities were predominately government or government-sponsored entity CMOs.

Edgar Filing: PACWEST BANCORP - Form 10-K

Total	\$ 338,806	\$ (8,165)	\$ 6,533	\$ (1,636)	\$ 345,339	\$ (9,801)	\$ 244,419	\$ (5,416)

We reviewed the securities that were in a continuous loss position less than 12 months and longer than 12 months at December 31, 2010, and concluded that their losses were a result of the level of market interest rates relative to the types of securities and not a result of the underlying issuers' abilities to repay. Accordingly, we determined that the securities were temporarily impaired. Additionally, we have the ability to hold these securities until their fair values recover to their costs, and therefore did not recognize the temporary impairment in the consolidated statements of earnings (loss).

During 2010, we determined that one covered private label collateralized mortgage obligation security was fully impaired due to deteriorating cash flows and significant delinquency of the underlying loan collateral and recorded an other-than-temporary impairment loss of \$874,000 in the consolidated statement of earnings (loss). This loss was offset by FDIC loss sharing income of \$699,000, which represented the FDIC's share of the loss.

At December 31, 2010, the Company had a \$55.0 million investment in Federal Home Loan Bank of San Francisco (FHLB) stock carried at cost. In January 2009, the FHLB announced that it suspended excess FHLB stock redemptions and dividend payments. Since this announcement, the FHLB has declared and paid five cash dividends, though at rates less than that paid in the past, and repurchased \$6.0 million of our excess stock. We evaluated the carrying value of our FHLB stock investment at December 31, 2010 and determined that it was not impaired. Our evaluation considered the long-term nature of the investment, the liquidity position of the FHLB, the actions being taken by the FHLB to address its regulatory situation, and our intent and ability to hold this investment for a period of time sufficient to recover our recorded investment.

Time deposits, excluding brokered	1,148,125	890,673	257,452
Total deposits, excluding brokered	4,565,960	3,913,296	652,664
Time deposits, brokered	83,738	181,273	(97,535)
Total deposits	\$ 4,649,698	\$ 4,094,569	\$ 555,129

Deposits of foreign customers located primarily in Mexico included above \$ 145,058 \$ 135,091 \$ 9,967

During 2010, deposits increased by \$555.1 million to \$4.6 billion at December 31, 2010, due primarily to core deposit growth and the acquisition of Los Padres, whose branches had deposits of \$360.7 million at December 31, 2010. The increase in deposits was offset partially by a \$97.5 million reduction in brokered deposits. Included in brokered time deposits are \$47.5 million at the end of 2010 and \$74.6 million at the end of 2009 of customer deposits that were subsequently participated with other FDIC insured financial institutions through the CDARS program as a means to provide FDIC deposit insurance coverage for the full amount of our customers' deposits.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

When Los Padres and brokered deposits are excluded, the net deposit increase during 2010 was \$292.0 million summarized as follows:

Deposit Category	Increase During 2010 (In thousands)
Noninterest-bearing deposits	\$ 131,049
Interest checking deposits	14,538
Money market deposits	83,749
Savings deposits	9,970
Total core deposits	239,306
Time deposits, excluding brokered	52,681
Total deposits increase, excluding Los Padres and brokered deposits	\$ 291,987

We increased noninterest-bearing demand and money market deposits during 2010 due to a combination of new deposit relationships and increased deposits from our existing customers. We started 2010 with nearly 61,000 noninterest-bearing accounts and ended the year with approximately 68,100 noninterest-bearing accounts, of which 3,900 related to former Los Padres offices. Competition for deposits among banks and financial institutions in our Southern California market area was robust in 2010 and is expected to continue through 2011. Our deposit gathering activities may be negatively impacted by two of our business practices. First, we generally price our deposits lower than our competitors. Second, since a good portion of our deposits are tied to lending relationships, the economic downturn in Southern California may lead to lower loan production and loss of existing customers. To mitigate these challenges, we actively review our deposit offerings to provide the optimum mix of service, product and rate, and continually seek new deposits through various programs.

For time deposits of \$100,000 or more, the following table presents a summary of maturities for the time periods indicated:

December 31, 2010	Due in 3 Months or Less	Due in Over 3 Months Through 6 Months	Due in Over 6 Months Through 12 Months	Due in Over 12 Months	Total
	(In thousands)				
Time deposits, \$100,000 or more	\$ 178,704	\$ 91,832	\$ 149,511	\$ 374,978	\$ 795,025

Borrowings

The Bank has various lines of credit available. These include the ability to borrow funds from time to time on a long-term, short-term or overnight basis from the FHLB of San Francisco, the FRB or other financial institutions. The maximum amount that we could borrow under our credit lines with the FHLB at December 31, 2010 was \$1.4 billion, of which \$1.2 billion was available on that date. The maximum amount that we could borrow under our secured credit line with the FRB at December 31, 2010 was \$373.3 million, all of which was available on that date. The FHLB lines are secured by a blanket lien on certain qualifying loans in our loan portfolio which are not pledged to the FRB and a portion of our available-for-sale investment securities. The FRB line is secured by a blanket lien on certain qualifying loans that are not pledged to the FHLB.

At December 31, 2010, our borrowings included \$225.0 million in term FHLB advances and \$129.6 million of subordinated debentures. At December 31, 2009, our borrowings included \$542.8 million in term FHLB advances and \$129.8 million of subordinated debentures. The \$317.8 million decline in

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

FHLB advances during 2010 was due to \$135.0 million in maturities, \$125.0 million that were prepaid in April 2010, for which we paid a \$726,000 prepayment penalty, and \$50.0 million that were prepaid in December 2010, for which we incurred a \$1.9 million penalty. We prepaid the \$175.0 million in FHLB advances during 2010 to lower excess liquidity and improve our net interest margin.

The following table summarizes information about our FHLB advances outstanding at December 31, 2010 and 2009:

Maturity Date	December 31, 2010		December 31, 2009	
	Amount	Rate	Amount	Rate
(Dollars in thousands)

January 11, 2018	25,000	2.61%	25,000	2.61%
Unamortized premium			7,763 ⁽³⁾	
Total FHLB advances	\$ 225,000		\$ 542,763	

(1) FHLB advances assumed in the Affinity acquisition, of which \$125 million were prepaid in April 2010, for which we incurred a \$0.7 million penalty charged to earnings at that time.

(2) Prepaid in December 2010 with a penalty of \$1.9 million charged to earnings at that time.

(3) Represented the fair value adjustment on FHLB advances assumed in the Affinity acquisition which was eliminated when the Affinity FHLB advances were repaid in 2010.

Capital Resources

We have access to the capital markets to raise funds, which is accomplished generally through the issuance of equity, both common and preferred stock, and the issuance of subordinated debentures. We may use the proceeds to invest in our business through organic growth or other acquisitions. We also have the ability to invest in our Company through stock repurchase programs, which we have elected to do from time to time.

On December 22, 2009, we filed a registration statement with the SEC to offer to sell, from time to time, shares of common stock, preferred stock, and other equity linked securities for an aggregate initial offering price of up to \$350 million. This registration statement was declared effective on January 8, 2010. Proceeds from any offering under this registration statement are anticipated to be used to fund future acquisitions of banks and financial institutions and for general corporate purposes.

On August 25, 2009, we sold in a direct placement to institutional investors 2.7 million shares of common stock for \$50 million, or a per share price of \$18.36 which was the closing price of PacWest's common stock on Monday, August 24, 2009. In addition to the issuance of the common shares, PacWest issued to each investor two warrants exercisable for common shares worth up to an additional \$54 million in the aggregate with an exercise price of \$20.20 per share, or 110% of the price per share

Table of Contents

at which the initial \$50 million was sold. The Series A warrants had a six month term and originally expired on March 1, 2010; such warrants were exercised on March 1, 2010 for a total of \$27.2 million in cash and we issued 1,348,040 shares of common stock. The net proceeds from the warrant exercises totaled \$26.6 million after expenses. The 1,361,657 Series B warrants issued in August 2009 with a strike price of \$20.20 expired in August 2010 without being exercised. The common shares were sold and the warrants were issued under our \$150 million shelf registration statement, which became effective in June 2009 but subsequently terminated upon the effective declaration of our \$350 million shelf registration statement on January 8, 2010.

On January 14, 2009, we issued in a private placement to CapGen Capital Group II LP 3,846,153 PacWest common shares at \$26 per share for total cash consideration of approximately \$100 million. CapGen Capital Group II LP has registered as a bank holding company and as a result of the investment it owned approximately 11% of PacWest outstanding common stock, excluding unvested restricted stock, as of December 31, 2010.

Bank regulatory agencies measure capital adequacy through standardized risk-based capital guidelines which compare different levels of capital (as defined by such guidelines) to risk-weighted assets and off-balance sheet obligations. Banks and bank holding companies considered to be "adequately capitalized" are required to maintain a minimum total risk-based capital ratio of 8% of which at least 4.0% must be Tier 1 capital. Banks and bank holding companies considered to be "well capitalized" must maintain a minimum leverage ratio of 5% and a minimum risk-based capital ratio of 10% of which at least 6.0% must be Tier 1 capital.

The following table presents regulatory capital requirements and our regulatory capital ratios at December 31, 2010. Regulatory capital requirements limit the amount of deferred tax assets that may be included when determining the amount of regulatory capital. Deferred tax asset amounts in excess of the calculated limit are deducted from regulatory capital. At December 31, 2010, such amount was \$51.0 million. No assurance can be given that the regulatory capital deferred tax asset limitation will not increase in the future.

	December 31, 2010		
	Well Capitalized Requirement	Pacific Western Bank	PacWest Bancorp Consolidated
Tier 1 leverage capital ratio	5.00%	8.51%	8.54%
Tier 1 risk-based capital ratio	6.00%	12.71%	12.68%
Total risk-based capital ratio	10.00%	13.99%	13.96%

As of December 31, 2010, we exceeded each of the capital requirements of the FRB and were deemed to be "well capitalized." In addition, as of December 31, 2010, Pacific Western exceeded the capital requirements to be "well capitalized." For further information on regulatory capital, see Note 19 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

The Company issued subordinated debentures to trusts that were established by us or entities we have acquired, which, in turn, issued trust preferred securities, which totaled \$123.0 million at December 31, 2010. These securities are currently included in our Tier I capital for purposes of determining the Company's Tier I and total risk-based capital ratios. The Board of Governors of the Federal Reserve System, which is the holding company's banking regulator, has promulgated a modification of the capital regulations affecting trust preferred securities. Although this modification was scheduled to be effective on March 31, 2009, the Federal Reserve postponed the effective date to March 31, 2011. At that time, the Company will be allowed to include in Tier I capital an amount of trust preferred securities equal to no more than 25% of the sum of all core capital elements, which is

Table of Contents

generally defined as shareholders' equity less goodwill, net of any related deferred income tax liability. The regulations currently in effect through December 31, 2010, limit the amount of trust preferred securities that can be included in Tier I capital to 25% of the sum of core capital elements without a deduction for goodwill. We have determined that our Tier I capital ratios would remain above the well-capitalized level had the modification of the capital regulations been in effect at December 31, 2010. We expect that our Tier I capital ratios will be at or above the existing well-capitalized levels on March 31, 2011, the first date on which the modified capital regulations must be applied. While our existing trust preferred securities are grandfathered under the Dodd-Frank Wall Street Reform and Consumer Protection Act that was enacted in July 2010, new issuances will not qualify as Tier I capital.

Interest payments on subordinated debentures made by the Company are considered dividend payments under FRB regulations. As such, notification to the FRB is required prior to our paying such interest during any period in which our quarterly net earnings are insufficient to fund the interest due. Should the FRB object to payment of interest on the subordinated debenture we would not be able to make the payments until approval is received or we no longer need to provide notice under applicable regulations.

Liquidity

The goals of our liquidity management are to ensure the ability of the Company to meet its financial commitments when contractually due and to respond to other demands for funds such as the ability to meet the cash flow requirements of customers who may be either depositors wanting to withdraw funds or borrowers who may need assurance that sufficient funds will be available to meet their credit needs. We have an Executive Asset/Liability Management Committee, or Executive ALM Committee, which is comprised of members of senior management and responsible for managing balance sheet and off-balance sheet commitments to meet the needs of customers while achieving our financial objectives. Our Executive ALM Committee meets regularly to review funding capacities, current and forecasted loan demand, and investment opportunities.

Historically, the Bank's primary liquidity source has been its core deposit base. In addition, the Bank relies on collateralized FHLB advances as one of its sources of affordable and immediately available liquidity. The level of such wholesale funding is monitored based on the Bank's liquidity requirements, and we maintain what we believe to be an acceptable level of this collateralized borrowing capacity. The Bank's secured borrowing capacity with the FHLB was \$1.4 billion, of which \$1.2 billion was available as of December 31, 2010. In addition to the secured borrowing relationship with the FHLB, and to meet short term liquidity needs, the Bank maintains adequate balances in liquid assets, which include cash and due from banks, Federal Funds sold, interest-earning deposits in other financial institutions, and unpledged investment securities available-for-sale. The Bank also maintains a secured line of credit with the FRB, which had a borrowing capacity of \$373.3 million and no amounts outstanding at December 31, 2010. In addition to its secured lines of credit, the Bank also maintains unsecured lines of credit, subject to availability, of \$92.0 million with correspondent banks for purchase of overnight funds.

The disruption in the financial credit and liquidity markets in 2009 and 2008 had the effect of decreasing overall liquidity in the marketplace. We have augmented our funding needs with collateralized FHLB borrowings and large denomination time deposits. During 2010, however, liquidity returned to the marketplace and we repaid FHLB advances with excess liquidity and allowed brokered deposits to mature without renewal. At December 31, 2010, the Bank had \$36.2 million of these large denomination time deposits. In addition, we have \$47.5 million of customer deposits that were subsequently participated with other FDIC insured financial institutions through the CDARS program as a means to provide FDIC deposit insurance coverage for the full amount of our participating customers' deposits.

Table of Contents

To meet short-term liquidity needs, the Bank maintains what we believe are adequate balances in cash, interest-earning deposits in other financial institutions and investment securities with a maturity or duration of five years or less. Our on balance sheet liquidity ratio, calculated as liquid assets (cash, interest-earning deposits in financial institutions and unpledged investment securities available-for-sale) as a percent of total deposits, was 18.1% as of December 31, 2010 and 11.2% at December 31, 2009. We built-up the Bank's on-balance sheet liquidity in order to have more flexibility during the current economic cycle.

Holding Company Liquidity

The primary sources of liquidity for the Company, on a stand-alone basis, include dividends from the Bank and our ability to raise capital, issue subordinated debt and secure outside borrowings. The ability of the Company to obtain funds for the payment of dividends to our stockholders and for other cash requirements is largely dependent upon the Bank's earnings. Pacific Western is subject to restrictions under certain federal and state laws and regulations which limit its ability to transfer funds to the Company through intercompany loans, advances or cash dividends.

Dividends paid by state banks, such as Pacific Western, are regulated by the DFI under its general supervisory authority as it relates to a bank's capital requirements. A state bank may declare a dividend without the approval of the DFI as long as the total dividends declared in a calendar year do not exceed either the retained earnings or the total of net profits for three previous fiscal years less any dividends paid during such period. During 2010, PacWest received no dividends from the Bank. For the foreseeable future, any dividends from the Bank to the Company require DFI approval. See also Note 19 in Notes to the Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data".

At December 31, 2010, the Company had, on a stand-alone basis, approximately \$24.1 million in cash on deposit at the Bank. Management believes this amount of cash along with other sources of liquidity is sufficient to fund the Company's 2011 cash flow needs. See related discussion of liquidity sources at " Capital Resources".

Contractual Obligations

The known contractual obligations of the Company at December 31, 2010 are as follows:

	December 31, 2010				Total
	Due Within One Year	Due in One to Three Years	Due in Three to Five Years	Due After Five Years	
	(Dollars in thousands)				
Time deposits	\$ 717,372	\$ 511,223	\$ 3,268	\$	\$ 1,231,863
Long-term debt obligations				354,572	354,572
Operating lease obligations	16,435	27,142	18,668	14,194	76,439
Other contractual obligations	3,122				3,122
Total	\$ 736,929	\$ 538,365	\$ 21,936	\$ 368,766	\$ 1,665,996

Operating lease obligations, time deposits, and debt obligations are discussed in Notes 9, 10, and 11 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data." The other contractual obligations relate to our minimum liability associated with our data and item processing contract with a third-party provider. These contracts mature in 2011 but are expected to be renewed.

We believe that we will be able to meet our contractual obligations as they come due through the maintenance of adequate cash levels. We expect to maintain adequate cash levels through profitability.

Table of Contents

loan and securities repayment and maturity activity, and continued deposit gathering activities. We have in place various borrowing mechanisms for both short-term and long-term liquidity needs.

Off-Balance Sheet Arrangements

Our obligations also include off-balance sheet arrangements consisting of loan-related commitments, of which only a portion are expected to be funded. At December 31, 2010, our loan-related commitments, including standby letters of credit, totaled \$777.8 million. The commitments which result in a funded loan increase our profitability through net interest income. Therefore, during the year, we manage our overall liquidity taking into consideration funded and unfunded commitments as a percentage of our liquidity sources. Our liquidity sources, as described in "Liquidity," have been and are expected to be sufficient to meet the cash requirements of our lending activities. For further information on loan commitments, see Note 12 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data."

Recent Accounting Pronouncements

See Note 1 of the Notes to Consolidated Financial Statements contained in "Item 8. Financial Statements and Supplementary Data" for information on recent accounting pronouncements and their impact, if any, on our consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our market risk arises primarily from credit risk and interest rate risk inherent in our lending and financing activities. To manage our credit risk, we rely on adherence to our underwriting standards and loan policies, internal loan monitoring and periodic credit review as well as our allowance for credit losses methodology, all of which are administered by the Bank's credit administration department and overseen by the Company's Credit Risk Committee. To manage our exposure to changes in interest rates, we perform asset and liability management activities which are governed by guidelines pre-established by our Executive ALM Committee, and approved by our Asset/Liability Management Committee of the Board of Directors, which we refer to as our Board ALCO. Our Executive ALM Committee monitors our compliance with our asset/liability policies. These policies focus on providing sufficient levels of net interest income while considering capital constraints and acceptable levels of interest rate exposure and liquidity.

Market risk sensitive instruments are generally defined as derivatives and other financial instruments, which include investment securities, loans, deposits, and borrowings. At December 31, 2010 and 2009, we had not used any derivatives to alter our interest rate risk profile or for any other reason. However, both the repricing characteristics of our fixed rate loans and floating rate loans, the significant percentage of noninterest-bearing deposits compared to interest-earning assets, and the callable features in certain borrowings, may influence our interest rate risk profile. Our financial instruments include loans receivable, Federal funds sold, interest-earning deposits in financial institutions, Federal Home Loan Bank stock, investment securities, deposits, borrowings and subordinated debentures.

We measure our interest rate risk position on at least a quarterly basis using three methods: (i) net interest income simulation analysis; (ii) market value of equity modeling; and (iii) traditional gap analysis. The results of these analyses are reviewed by the Executive ALM Committee and the Board ALCO quarterly. If hypothetical changes to interest rates cause changes to our simulated net present value of equity and/or net interest income outside our pre-established limits, we may adjust our asset and liability mix in an effort to bring our interest rate risk exposure within our established limits.

We evaluated the results of our net interest income simulation and market value of equity models prepared as of December 31, 2010, the results of which are presented herein. Our net interest income

Table of Contents

simulation indicates that our balance sheet is liability sensitive as rising interest rates would result in a decline in our net interest margin. This profile is primarily a result of the increased origination of fixed rate loans and variable rate loans with initial fixed rate terms, which is driven by customer demand for fixed rate products in this low interest rate environment. Our market value of equity model indicates an asset sensitive profile suggesting a sudden sustained increase in rates would result in an increase in our estimated market value of equity. This profile is a result of the significant value placed on the Company's noninterest-bearing deposits and the assumed floors in the discount rates used to value a portion of the loan portfolio. The divergent profile between the net interest income simulation and market value of equity model is due primarily to the Company's significant amount of noninterest-bearing deposits. Static balances of noninterest bearing deposits do not impact the net interest income simulation, while at the same time the value of these deposits increase substantially in the market value of equity model when market rates are assumed to rise. In general, we view the net interest income model results as more relevant to the Company's current operating profile and manage our balance sheet based on this information.

Net Interest Income Simulation

We used a simulation model to measure the estimated changes in net interest income that would result over the next 12 months from immediate and sustained changes in interest rates as of December 31, 2010. This model is an interest rate risk management tool and the results are not necessarily an indication of our future net interest income. This model has inherent limitations and these results are based on a given set of rate changes and assumptions at one point in time. We have assumed no growth in either our total interest-sensitive assets or liabilities over the next 12 months; therefore, the results reflect an interest rate shock to a static balance sheet.

This analysis calculates the difference between net interest income forecasted using both increasing and declining interest rate scenarios and net interest income forecasted using a base market interest rate derived from the U.S. Treasury yield curve at December 31, 2010. In order to arrive at the base case, we extend our balance sheet at December 31, 2010 one year and reprice any assets and liabilities that would contractually reprice or mature during that period using the products' pricing as of December 31, 2010. Based on such repricings, we calculate an estimated net interest income and net interest margin.

The repricing relationship for each of our assets and liabilities includes many assumptions. For example, many of our assets are floating rate loans, which are assumed to reprice to the same extent as the change in market rates according to their contracted index except for floating rate loans tied to our base lending rate which are assumed to reprice upward only after the first 75 basis point increase in market rates. This assumption is due to the fact that we reduced our base lending rate 100 basis points when the Federal Reserve lowered the Federal Funds benchmark rate by 175 basis points in the fourth quarter of 2008. Some loans and investment vehicles include the opportunity of prepayment (imbedded options) and the simulation model uses national indexes to estimate these prepayments and reinvest these proceeds at current simulated yields. Our deposit products reprice at our discretion and are assumed to reprice more slowly in a rising or declining interest rate environment, usually repricing less than the change in market rates. Also, a callable option feature on certain borrowings will reprice differently in a rising interest rate environment than in a declining interest rate environment. The effects of certain balance sheet attributes, such as fixed-rate loans, floating rate loans that have reached their floors and the volume of noninterest-bearing deposits as a percentage of earning assets, impact our assumptions and consequently the results of our interest rate risk management model. Changes that could vary significantly from our assumptions include loan and deposit growth or contraction, changes in the mix of our earning assets or funding sources, the performance of covered loans accounted for under the expected cash flow method, and future asset/liability management decisions, all of which may have significant effects on our net interest income.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

The simulation analysis does not account for all factors that impact this analysis, including changes by management to mitigate the impact of interest rate changes or the impact a change in interest rates may have on our credit risk profile, loan prepayment estimates and spread relationships which can change regularly. In addition, the simulation analysis does not make any assumptions regarding loan fee income, which is a component of our net interest income and tends to increase our net interest margin. In 2010, loan fee income increased our net interest margin by 10 basis points. Management reviews the model assumptions for reasonableness on a quarterly basis.

The following table presents as of December 31, 2010, forecasted net interest income and net interest margin for the next 12 months using a base market interest rate and the estimated change to the base scenario given immediate and sustained upward and downward movements in interest rates of 100, 200 and 300 basis points.

December 31, 2010 Interest Rate Scenario	Estimated Net Interest Income	Percentage Change From Base	Estimated Net Interest Margin	Estimated Net Interest Margin Change From Base
(Dollars in thousands)				
Up 300 basis points	\$ 252,604	(5.7)%	4.97%	(0.30)%
Up 200 basis points	\$ 252,778	(5.6)%	4.97%	(0.30)%
Up 100 basis points	\$ 256,650	(4.2)%	5.05%	(0.22)%
BASE CASE	\$ 267,804		5.27%	
Down 100 basis points	\$ 264,694	(1.2)%	5.21%	(0.06)%
Down 200 basis points	\$ 258,784	(3.4)%	5.09%	(0.18)%
Down 300 basis points	\$ 258,848	(3.3)%	5.09%	(0.18)%

The net interest income simulation model prepared as of December 31, 2010 suggests our balance sheet is liability sensitive. Liability sensitivity indicates that in a rising interest rate environment, our net interest margin would decrease. Due to the historically low market interest rates as of December 31, 2010, the "down" scenarios are not considered meaningful and are excluded from the following discussion. The liability sensitive profile is due mostly to the mix of fixed rate loans to total loans in the loan portfolio relative to our amount of interest-bearing deposits that would reprice as interest rates change. Although \$2.2 billion of the \$4.1 billion of total loans in the portfolio have variable interest rate terms, only \$674 million of those variable rate loans will reprice within twelve months. The remaining variable rate loans will behave as if they have fixed rates in the short run because of the effect of interest rate floors and hybrid ARM loan pricing structures of mini-perm commercial real estate loans, which generally contain initial fixed rate terms ranging from three to five years before becoming variable rate.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

The following table presents as of December 31, 2009, forecasted net interest income and net interest margin for the next 12 months using a base market interest rate and the estimated change to the base scenario given immediate and sustained upward and downward movements in interest rates of 100, 200 and 300 basis points.

December 31, 2009 Interest Rate Scenario	Estimated Net Interest Income	Percentage Change From Base	Estimated Net Interest Margin	Estimated Net Interest Margin Change From Base
(Dollars in thousands)				
Up 300 basis points	\$ 235,261	(4.2)%	4.76%	(0.21)%
Up 200 basis points	\$ 232,941	(5.1)%	4.71%	(0.26)%
Up 100 basis points	\$ 234,086	(4.7)%	4.74%	(0.23)%
BASE CASE	\$ 245,543		4.97%	
Down 100 basis points	\$ 242,272	(1.3)%	4.90%	(0.07)%
Down 200 basis points	\$ 243,519	(0.8)%	4.92%	(0.05)%
Down 300 basis points	\$ 239,548	(2.4)%	4.85%	(0.12)%

Market Value of Equity

We measure the impact of market interest rate changes on the net present value of estimated cash flows from our assets, liabilities and off-balance sheet items, defined as the market value of equity, using a simulation model. This simulation model assesses the changes in the market value of our interest-sensitive financial instruments that would occur in response to an instantaneous and sustained increase or decrease in market interest rates of 100, 200 and 300 basis points. This analysis assigns significant value to our noninterest-bearing deposit balances. The projections are by their nature forward-looking and therefore inherently uncertain, and include various assumptions regarding cash flows and interest rates. This model is an interest rate risk management tool and the results are not necessarily an indication of our actual future results. Actual results may vary significantly from the results suggested by the market value of equity table. Loan prepayments and deposit attrition, changes in the mix of our earning assets or funding sources, and future asset/liability management decisions, among others, may vary significantly from our assumptions. The base case is determined by applying various current market discount rates to the estimated cash flows from the different types of assets, liabilities and off-balance sheet items existing at December 31, 2010.

The following table shows the projected change in the market value of equity for the set of rate shocks presented as of December 31, 2010:

December 31, 2010 Interest Rate Scenario	Estimated Market Market Value	Dollar Change From Base	Percentage Change From Base	Percentage of Total Assets	Ratio of Estimated Market Value to Book Value
(Dollars in thousands)					
Up 300 basis points	\$ 595,178	\$ 10,763	1.8%	10.8%	124.3%
Up 200 basis points	\$ 639,595	\$ 55,180	9.4%	11.6%	133.6%
Up 100 basis points	\$ 622,514	\$ 38,099	6.5%	11.3%	130.0%
BASE CASE	\$ 584,415			10.6%	122.1%
Down 100 basis points	\$ 517,807	\$ (66,608)	(11.4)%	9.4%	108.1%
Down 200 basis points	\$ 464,710	\$ (119,705)	(20.5)%	8.4%	97.1%
Down 300 basis points	\$ 434,424	\$ (149,991)	(25.7)%	7.9%	90.7%

The results of our market value of equity model indicate an asset sensitive interest rate risk profile in 2010 demonstrated by the increase in the market value of equity in the "up" interest rate scenarios compared to the "base case". Given the historically low market interest rates as of December 31, 2010,

Table of Contents

the "down" scenarios at December 31, 2010 are not considered meaningful and are excluded from the following discussion.

Our asset sensitive position as of December 31, 2010 is due primarily to the significant value placed on the Company's noninterest-bearing deposits and the assumed floors in the discount rates used to value a portion of the loan portfolio. The discount rate used to value our loan portfolio is derived from the expected offering rate for each loan type with a similar term and credit risk profile. In a rising rate environment management does not expect to increase our offering rates on certain loan products to the same extent as market rates until the fully indexed offering rate exceeds the current pricing floor and in turn our loans are not projected to lose significant value in the up 100 basis point and up 200 basis point scenarios. Conversely, the discount rates for our liabilities are expected to immediately change when market rates change. Therefore our liabilities are expected to immediately increase in value as rates rise thereby increasing the estimated market value of equity in the rising rate scenario.

The following table shows the projected change in the market value of equity for the set of rate shocks presented as of December 31, 2009:

December 31, 2009 Interest Rate Scenario	Estimated Market Market Value	Dollar Change From Base	Percentage Change From Base	Percentage of Total Assets	Ratio of Estimated Market Value to Book Value
(Dollars in thousands)					
Up 300 basis points	\$ 602,312	\$ 13,252	2.2%	11.3%	118.9%
Up 200 basis points	\$ 638,917	\$ 49,857	8.5%	12.0%	126.1%
Up 100 basis points	\$ 626,717	\$ 37,657	6.4%	11.8%	123.7%
BASE CASE	\$ 589,060			11.1%	116.2%
Down 100 basis points	\$ 551,319	\$ (37,741)	(6.4)%	10.4%	108.8%
Down 200 basis points	\$ 506,685	\$ (82,375)	(14.0)%	9.5%	100.0%
Down 300 basis points	\$ 474,890	\$ (114,170)	(19.4)%	8.9%	93.7%

Gap Analysis

As part of the interest rate risk management process we use a gap analysis. A gap analysis provides information about the volume and repricing characteristics and relationship between the amounts of interest-sensitive assets and interest-bearing liabilities at a particular point in time. An effective interest rate strategy attempts to match the volume of interest sensitive assets and interest bearing liabilities repricing over different time intervals. The main focus of this interest rate management tool is the gap sensitivity identified as the cumulative one year gap.

Edgar Filing: PACWEST BANCORP - Form 10-K

Table of Contents

The following table illustrates the volume and repricing characteristics of our balance sheet at December 31, 2010 over the indicated time intervals:

December 31, 2010	Amounts Maturing or Repricing In				Non Interest Rate Sensitive	Total
	3 Months Or Less	Over 3 Months to 12 Months	Over 1 Year to 5 Years	Over 5 Years		
(Dollars in thousands)						
ASSETS						
Cash and deposits in financial institutions	\$ 26,267	\$	\$ 115	\$	\$ 82,170	\$ 108,552
Investment securities	12,432	23,500	21,972	871,152		929,056
Loans, net of unearned income	1,328,626	479,553	1,187,005	1,107,711		4,102,895
Other assets					388,518	388,518
Total assets	\$ 1,367,325	\$ 503,053	\$ 1,209,092	\$ 1,978,863	\$ 470,688	\$ 5,529,021
LIABILITIES AND STOCKHOLDERS' EQUITY						
Noninterest-bearing demand deposits	\$	\$	\$	\$	\$ 1,465,562	\$ 1,465,562
Interest-bearing checking, money market and savings	1,952,273					1,952,273
Time deposits	320,057	397,315	514,491			1,231,863
Borrowings				225,000		225,000
Subordinated debentures	108,250			18,558	2,764	129,572
Other liabilities					45,954	45,954
Stockholders' equity					478,797	478,797
Total liabilities and stockholders' equity	\$ 2,380,580	\$ 397,315	\$ 514,491	\$ 243,558	\$ 1,993,077	\$ 5,529,021
Period gap	\$ (1,013,255)	\$ 105,738	\$ 694,601	\$ 1,735,305	\$ (1,522,389)	
Cumulative interest-earning assets	\$ 1,367,325	\$ 1,870,378	\$ 3,079,470	\$ 5,058,333		
Cumulative interest-bearing liabilities	\$ 2,380,580	\$ 2,777,895	\$ 3,292,386	\$ 3,535,944		
Cumulative gap	\$ (1,013,255)	\$ (907,517)	\$ (212,916)	\$ 1,522,389		
Cumulative interest-earning assets to cumulative interest-bearing liabilities	57.4%	67.3%	93.5%	143.1%		
Cumulative gap as a percent of:						
Total assets	(18.3)%	(16.4)%	(3.9)%	27.5%		
Interest-earning assets	(20.1)%	(18.0)%	(4.2)%	30.3%		

All amounts are reported at their contractual maturity or repricing periods, except for \$55.0 million in FHLB stock which is shown as a longer-term repricing investment because of the FHLB's suspended/reduced stock redemptions and dividend payments. This analysis makes certain assumptions as to interest rate sensitivity of savings and NOW accounts which have no stated maturity and have had very little price fluctuation in the past three years. Money market accounts are repriced at management's discretion and generally are more rate sensitive.

Edgar Filing: PACWEST BANCORP - Form 10-K

The preceding table indicates that we had a negative one-year cumulative gap of \$907.5 million at December 31, 2010, an increase of \$184.7 million from the \$722.8 million negative one-year gap position at December 31, 2009. The growth in the negative gap is attributable mostly to a decline in

Table of Contents

one-year assets of \$354.2 million, reflecting a decrease in one-year loans of \$284.6 million. Partially offsetting this was a decline in one-year liabilities of \$169.5 million, reflecting decreases of \$222.1 million and \$180.0 million in one-year time deposits and FHLB advances, respectively, and an increase of \$232.6 million in interest-bearing checking, money market and savings. This gap position suggests that we are liability sensitive and if rates were to increase, our net interest margin would most likely decrease. The ratio of interest-earning assets to interest-bearing liabilities maturing or repricing within one year at December 31, 2010 was 67.3%. This one-year gap position indicates that interest expense is likely to be affected to a greater extent than interest income for any changes in interest rates within one year from December 31, 2010.

Borrowings included two long-term FHLB advances totaling \$225.0 million at December 31, 2010, with maturity dates of 2017 and 2018, which contain quarterly call options and are currently callable by the FHLB. While the FHLB may call the advances to be repaid for any reason, they are likely to be called if market interest rates, for borrowings of similar remaining term, are higher than the advances' stated rates on the call dates. If the advances are called by the FHLB, there is no prepayment penalty. Should our FHLB advances be called, we would evaluate the funding opportunities available at that time, including new secured borrowings from the FHLB at the then market rates. As borrowing rates are currently lower than our contract rates, we do not expect our secured FHLB borrowings to be called. We may repay the advances with a prepayment penalty at any time.

The gap table has inherent limitations and actual results may vary significantly from the results suggested by the gap table. The gap table is unable to incorporate certain balance sheet characteristics or factors. The gap table assumes a static balance sheet and, accordingly, looks at the repricing of existing assets and liabilities without consideration of new loans and deposits that reflect a more current interest rate environment. Unlike the net interest income simulation, however, the interest rate risk profile of certain deposit products and floating rate loans that have reached their floors cannot be captured effectively in a gap table. Although the table shows the amount of certain assets and liabilities scheduled to reprice in a given time frame, it does not reflect when or to what extent such repricings may actually occur. For example, interest-bearing checking, money market and savings deposits are shown to reprice in the first 3 months, but we may choose to reprice these deposits more slowly and incorporate only a portion of the movement in market rates based on market conditions at that time. Alternatively, a loan which has reached its floor may not reprice even though market interest rates change causing such loan to act like a fixed rate loan regardless of its scheduled repricing date. The gap table as presented cannot factor in the flexibility we believe we have in repricing deposits or the floors on our loans.

We believe the estimated effect of a change in interest rates is better reflected in our net interest income and market value of equity simulations which incorporate many of the factors mentioned.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of PacWest Bancorp, including its consolidated subsidiaries, is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to the Company's management and Board of Directors regarding the preparation and fair presentation of published financial statements in accordance with U.S. generally accepted accounting principles. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management maintains a comprehensive system of controls intended to ensure that transactions are executed in accordance with management's authorization, assets are safeguarded, and financial records are reliable. Management also takes steps to see that information and communication flows are effective and to monitor performance, including performance of internal control procedures.

As of December 31, 2010, PacWest Bancorp management assessed the effectiveness of the Company's internal control over financial reporting based on the framework established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has determined that the Company's internal control over financial reporting as of December 31, 2010, is effective.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements should they occur. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the control procedures may deteriorate.

KPMG LLP, the independent registered public accounting firm that audited the Company's consolidated financial statements included in this Annual Report on Form 10-K, has issued a report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2010. The report, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2010, is included in this Item under the heading "Report of Independent Registered Public Accounting Firm."

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors
PacWest Bancorp:

We have audited the accompanying consolidated balance sheets of PacWest Bancorp and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of earnings (loss), changes in stockholders' equity and comprehensive income (loss), and cash flows for each of the years in the three-year period ended December 31, 2010. We also have audited PacWest Bancorp's internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). PacWest Bancorp's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying management's report on internal control over financial reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of PacWest Bancorp and subsidiaries as of December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also in our opinion, PacWest Bancorp maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control Integrated Framework* issued by COSO.

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

PacWest Bancorp is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. Our principal business is to serve as a holding company for our banking subsidiary, Pacific Western Bank, which we refer to as "Pacific Western" or the "Bank." When we say "we", "our" or the "Company", we mean the Company on a consolidated basis with the Bank. When we refer to "PacWest" or to the holding company, we are referring to the parent company on a stand-alone basis.

We have completed 22 acquisitions since May 2000 including the merger whereby the former Rancho Santa Fe National Bank and First Community Bank of the Desert became wholly-owned subsidiaries of the Company in a pooling-of-interests transaction. All other acquisitions have been accounted for using the purchase method of accounting and, accordingly, their operating results have been included in the consolidated financial statements from their respective dates of acquisition. See Notes 3 and 4 for more information about our acquisitions.

Pacific Western is a full-service commercial bank offering a broad range of banking products and services. We accept time and demand deposits, fund loans including real estate, construction, SBA and commercial loans, and offer other business oriented banking products. Although our operations are primarily located in Southern California, we expanded our presence in California's Central Coast with the FDIC-assisted acquisition of Los Padres Bank on August 20, 2010. The Bank focuses on conducting business with small to medium sized businesses in our marketplace and the owners and employees of those businesses. The majority of our loans are secured by the real estate collateral of such businesses. We gained through our FDIC-assisted acquisitions three banking offices in the San Francisco Bay area and one office in Arizona. Our asset-based lending function operates in Arizona, California, and the Pacific Northwest.

We generate our revenue primarily from interest received on loans and, to a lesser extent, from interest received on investment securities, and fees received in connection with deposit services, extending credit and other services offered, including foreign exchange services. Our major operating expenses are the interest paid by the Bank on deposits and borrowings, compensation and general operating expenses. The Bank relies on a foundation of locally generated deposits. The Bank has a relatively low cost of funds due to high balances of noninterest-bearing and low cost deposits.

Our operations, like those of other financial institutions operating in Southern California, are significantly influenced by economic conditions in Southern California, including local economies, the strength of the real estate market, and the fiscal and regulatory policies of the federal and state government and the regulatory authorities that govern financial institutions. With our operations in Arizona, Northern California, and the Pacific Northwest, we are also subject to the economic conditions affecting those markets. No individual or single group of related accounts is considered material in relation to our total assets or deposits of the Bank, or in relation to the overall business of the Company. However, approximately 75% of our covered and non-covered loan portfolio at December 31, 2010 consisted of real estate related loans, including construction loans, commercial real estate mortgage loans and commercial loans secured by commercial real estate.

There has been a slow-down in the real estate market due to negative economic trends and credit market disruption, the impacts of which are not yet completely known or quantified. We have observed tighter credit underwriting and higher premiums on liquidity, both of which may continue to place downward pressure on real estate values. A continued downturn or any further deterioration in the real

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

estate market could materially and adversely affect our business because a significant portion of our loans are secured by real estate. Our ability to recover on defaulted loans by selling the real estate collateral would then be diminished and we would be more likely to suffer losses on defaulted loans. Substantially all of our real property collateral is located in Southern California. Consequently, our results of operations and financial condition are dependent upon the general trends in the Southern California economies and, in particular, the residential and commercial real estate markets.

Real estate values could be affected by, among other things, a worsening of economic conditions, an increase in foreclosures, a decline in home sale volumes, an increase in interest rates, earthquakes and other natural disasters particular to California. Further, we may experience an increase in the number of borrowers who become delinquent, file for protection under bankruptcy laws or default on their loans or other obligations to us given a sustained weakness or weakening in business and economic conditions generally or specifically in our principal markets in which we do business. An increase in the number of delinquencies, bankruptcies or defaults could result in a higher level of nonperforming assets, net charge-offs and provision for credit losses.

(a) Basis of Presentation

The accounting and reporting policies of the Company are in accordance with U.S. generally accepted accounting principles, which we may refer to as U.S. GAAP. All significant intercompany balances and transactions have been eliminated.

(b) Use of Estimates

Management of the Company has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period to prepare these consolidated financial statements in conformity with U.S. GAAP. Actual results could differ from those estimates. Material estimates subject to change in the near term include, among other items, the allowances for credit losses, the carrying value of other real estate owned, the carrying value of intangible assets, the carrying value of the FDIC loss sharing asset, and the realization of deferred tax assets.

(c) Reclassifications

Certain prior year amounts have been reclassified to conform to the current year's presentation.

(d) Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, cash and cash equivalents consist of cash, due from banks, interest-earning deposits in financial institutions, and federal funds sold. Generally, federal funds are sold for one-day periods. Interest-earning assets in financial institutions represent cash held at the Federal Reserve Bank, the majority of which is immediately available.

(e) Investment Securities and Securities Available-for-Sale

We determine the classification of securities at the time of purchase. If we have the intent and the ability at the time of purchase to hold securities until maturity, they are classified as held-to-maturity.

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Investment securities held-to-maturity are stated at amortized cost. Securities to be held for indefinite periods of time, but not necessarily to be held-to-maturity or on a long-term basis, are classified as available-for-sale and carried at estimated fair value with unrealized gains or losses reported as a separate component of stockholders' equity in accumulated other comprehensive income, net of applicable income taxes. Securities available-for-sale include securities that management intends to use as part of its asset/liability management strategy and that may be sold in response to changes in interest rates, prepayment risk and other related factors. Securities are individually evaluated for appropriate classification when acquired; consequently, similar types of securities may be classified differently depending on factors existing at the time of purchase.

The carrying values of all securities are adjusted for amortization of premiums and accretion of discounts over the period to maturity of the related security using the interest method. Realized gains or losses on the sale of securities, if any, are determined using the amortized cost of the specific securities sold. If a decline in the fair value of a security below its amortized cost is judged by management to be other than temporary, the cost basis of the security is written down to its fair value and the amount of the write-down is included in operations.

Investments in Federal Home Loan Bank, or FHLB, stock are carried at cost because they can only be redeemed at par and are required investments based on measurements of the Bank's assets and/or borrowing levels.

(f) Loans Held for Sale and Servicing Assets

Loans held for sale include loans originated or purchased for resale. Loans originated or purchased for resale include the principal amount outstanding net of unearned income, and are carried at the lower of cost or fair value on an aggregate basis. A decline in the aggregate fair value of the loans below their aggregate carrying amount is recognized through a charge to earnings in the period of such decline. Unearned income on these loans is taken into earnings when the loans are sold. At December 31, 2010 and 2009, the Company had no loans held for sale.

Gains or losses resulting from sales of loans are recognized at the date of settlement and are based on the difference between the cash received and the carrying value of the related loans less related transaction costs. A transfer of financial assets in which control is surrendered is accounted for as a sale to the extent that consideration other than beneficial interests in the transferred assets is received in the exchange. Assets, liabilities, derivative financial instruments or other retained interests issued or obtained through the sale of financial assets are measured at estimated fair value, if practicable.

The most common retained interest related to the loan sales we have made is a servicing asset. Servicing assets are amortized in proportion to and over the period of estimated future net servicing income. The amortization of the servicing asset and the servicing income are included in noninterest income in the consolidated statement of earnings (loss). The fair value of the servicing assets is estimated by discounting the future cash flows using market-based discount rates and prepayment speeds. Our servicing asset is evaluated regularly for impairment. We stratify the servicing asset based on the original term to maturity and the year of origination of the underlying loans for purposes of measuring impairment. The risk is that loans prepay faster than anticipated and the fair value of the asset declines. If the fair value of the servicing asset is less than the amortized carrying value, the asset is considered impaired and an impairment charge will be taken against earnings. At December 31, 2010

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

and 2009, the servicing asset totaled \$1.6 million and \$1.9 million, respectively, and related to the servicing of approximately \$82.5 million and \$92.6 million in SBA loans, respectively. The servicing asset is included in other assets on the consolidated balance sheets.

(g) Loans and Loan Fees

As a result of the Los Padres and Affinity acquisitions, we have a class of loans that are covered by loss sharing agreements with the FDIC which we refer to as "covered loans." When we refer to non-covered loans, which we may also refer to as legacy loans, we are referring to loans not covered by our loss sharing agreements with the FDIC.

Non-covered loans. Non-covered loans are stated at the principal amount outstanding, net of any unearned discount or unamortized premium. Interest income is recorded on the accrual basis in accordance with the terms of the respective loan and includes prepayment penalties. Loans are considered delinquent when principal or interest payments are past due 30 days or more; delinquent loans may remain on accrual status between 30 days and 89 days past due. Loans on which the accrual of interest has been discontinued are designated as nonaccrual loans. The accrual of interest on loans is discontinued when principal or interest payments are past due 90 days or when, in the opinion of management, there is a reasonable doubt as to collectibility in the normal course of business. When loans are placed on nonaccrual status, all interest previously accrued but not collected is reversed against current period interest income. Income on nonaccrual loans is subsequently recognized only to the extent that cash is received and the loan's principal balance is deemed collectible. Loans are restored to accrual status when the loans become both well-secured and are in the process of collection. Nonrefundable loan fees and related direct costs associated with the origination or purchase of loans are deferred and netted against outstanding loan balances. The net deferred fees or costs are recognized as an adjustment to interest income over the contractual life of the loans using the interest method or taken into income when the related loans are paid off or sold. The amortization of loan fees or costs is discontinued when a loan is placed on nonaccrual status.

Covered loans. We refer to "covered loans" as those loans that we acquired in the Los Padres and Affinity acquisitions for which we will be reimbursed for a substantial portion of any future losses on them under the terms of the FDIC loss sharing agreements. We account for loans under ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* ("acquired impaired loan accounting") when (i) we acquire loans deemed to be impaired when there is evidence of credit deterioration since their origination and it is probable at the date of acquisition that we would be unable to collect all contractually required payments and (ii) as a general policy election for non-impaired loans that we acquire in a distressed bank acquisition. We may refer to acquired loans accounted for under ASC 310-30 as "acquired impaired loans." In connection with the Affinity acquisition, we applied acquired impaired loan accounting to all of the covered loans. In connection with the Los Padres acquisition, we applied acquired impaired loan accounting to \$405.6 million of the covered loans. We also acquired in the Los Padres acquisition \$31.5 million of revolving credit agreements, mainly home equity loans and commercial asset-based lines of credit, where the borrower had revolving privileges; we accounted for such loans in accordance with accounting requirements for purchased non-impaired loans. GAAP excludes revolving credit agreements, such as home equity lines and credit card loans, from acquired impaired loan accounting requirements.

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

For acquired impaired loans, we (i) calculated the contractual amount and timing of undiscounted principal and interest payments (the "undiscounted contractual cash flows") and (ii) estimated the amount and timing of undiscounted expected principal and interest payments (the "undiscounted expected cash flows"). Under acquired impaired loan accounting, the difference between the undiscounted contractual cash flows and the undiscounted expected cash flows is the nonaccretable difference. The nonaccretable difference represents an estimate of the loss exposure of principal and interest related to the covered acquired impaired loans portfolio and such amount is subject to change over time based on the performance of such covered loans. The carrying value of covered acquired impaired loans is reduced by payments received, both principal and interest, and increased by the portion of the accretable yield recognized as interest income.

The excess of expected cash flows at acquisition over the initial fair value of acquired impaired loans is referred to as the "accretable yield" and is recorded as interest income over the estimated life of the loans using the effective yield method if the timing and amount of the future cash flows is reasonably estimable. Subsequent to acquisition, the Company aggregates loans into pools of loans with common credit risk characteristics such as loan type and risk rating. Increases in expected cash flows over those previously estimated increase the accretable yield and are recognized as interest income prospectively. Decreases in the amount and changes in the timing of expected cash flows compared to those previously estimated decrease the accretable yield and usually result in a provision for loan losses and the establishment of an allowance for loan losses. As the accretable yield increases or decreases from changes in cash flow expectations, the offset is a decrease or increase to the nonaccretable difference. The accretable yield is measured at each financial reporting date based on information then currently available and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the loans.

Under acquired impaired loan accounting, purchased loans are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when expected cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans as long as there is an expectation that the estimated cash flows will be received. If the timing and amount of cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans.

(h) Impaired Loans and Allowances for Credit Losses

Impaired loans. A loan is considered impaired when it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired loans include loans on nonaccrual status and performing restructured loans. Income from loans on nonaccrual status is recognized to the extent cash is received and when the loan's principal balance is deemed collectible. Depending on a particular loan's circumstances, we measure impairment of a loan based upon either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral less estimated costs to sell if the loan is collateral-dependent. The impairment amount on a collateral-dependent loan is charged-off to the allowance and the impairment amount on a loan that is not collateral-dependent is set up as a specific reserve.

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Troubled Debt Restructurings. A loan is classified as a troubled debt restructuring when we grant a concession to a borrower experiencing financial difficulties. These concessions may include a reduction of the interest rate, principal or accrued interest, extension of the maturity date or other actions intended to minimize potential losses. Loans restructured at a rate equal to or greater than that of a new loan with comparable risk at the time the loan is modified may be excluded from restructured loan disclosures in years subsequent to the restructuring if the loans are in compliance with their modified terms. A loan that has been placed on nonaccrual that is subsequently restructured will usually remain on nonaccrual status until the borrower is able to demonstrate repayment performance in compliance with the restructured terms for a sustained period, typically for six months. A restructured loan may return to accrual status sooner based on other significant events or mitigating circumstances. A loan that has not been placed on nonaccrual may be restructured and such loan may remain on accrual status after such restructuring. In these circumstances, the borrower has made payments before and after the restructuring. Generally, this restructuring involves a reduction in the loan interest rate and/or a change to interest-only payments for a period of time. The restructured loan is considered impaired despite the accrual status and a specific reserve is calculated based on the present value of expected cash flows discounted at the loan's effective interest rate.

Allowance for Credit Losses on Non-Covered Loans. The allowance for loan losses on non-covered loans and the reserve for unfunded loan commitments when combined are referred to as the allowance for credit losses. The allowance for credit losses on non-covered loans relates only to loans which are not subject to FDIC loss sharing agreements. The allowance for loan losses is reported as a reduction of outstanding loan balances and the reserve for unfunded loan commitments is included within other liabilities. The following discussion is for non-covered loans and the allowance for credit losses thereon. Refer to "Allowance for Credit Losses on Covered Loans" for the policy on covered loans.

The allowance for loan losses is maintained at a level deemed appropriate by management to adequately provide for known and inherent risks in the loan portfolio and other extensions of credit. The allowance is based upon a continuing review of the portfolio, past loan loss experience, current economic conditions which may affect the borrowers' ability to pay, and the underlying collateral value of the loans. Loans which are deemed to be uncollectible are charged off and deducted from the allowance. The provision for loan losses and recoveries on loans previously charged off are added to the allowance.

The methodology we use to estimate the amount of our allowance for credit losses is based on both objective and subjective criteria. While some criteria are formula driven, other criteria are subjective inputs included to capture environmental and general economic risk elements which may trigger losses in the loan portfolio, and to account for the varying levels of credit quality in the loan portfolios of the entities we have acquired that have not yet been captured in our objective loss factors.

Specifically, our allowance methodology contains three key elements: (i) amounts based on specific evaluations of impaired loans; (ii) amounts of estimated losses on several pools of loans categorized by risk rating and loan type; and (iii) amounts for environmental and general economic factors that indicate probable losses were incurred but were not captured through the other elements of our allowance process.

Impaired loans are identified at each reporting date based on certain criteria and such loans over \$250,000 are individually reviewed for impairment. A loan is considered impaired when it is probable

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

that a creditor will be unable to collect all amounts due according to the original contractual terms of the loan agreement. We measure impairment of a loan based upon the fair value of the loan's collateral if the loan is collateral dependent or the present value of cash flows, discounted at the loan's effective interest rate, if the loan is not collateral-dependent. The impairment amount on a collateral-dependent loan is charged-off to the allowance and the impairment amount on a loan that is not collateral-dependent is set up as a specific reserve. Increased charge-offs generally result in increased provisions for credit losses.

Our loan portfolio, excluding impaired loans which are evaluated individually, is categorized into several pools for purposes of determining allowance amounts by loan pool. The loan pools we currently evaluate are: commercial real estate construction, residential real estate construction, SBA real estate, hospitality real estate, real estate other, commercial collateralized, commercial unsecured, SBA commercial, consumer, foreign, and asset-based. Within these loan pools, we then evaluate loans not adversely classified, which we refer to as "pass" credits, separately from adversely classified loans. The adversely classified loans are further grouped into three credit risk rating categories: "special mention," "substandard" and "doubtful," which we define as follows:

Special Mention: Loans classified as special mention have a potential weakness that requires management's attention. If not addressed, these potential weaknesses may result in further deterioration in the borrower's ability to repay the loan.

Substandard: Loans classified as substandard have a well-defined weakness or weaknesses that jeopardize the collection of the debt. They are characterized by the possibility that we will sustain some loss if the weaknesses are not corrected.

Doubtful: Loans classified as doubtful have all the weaknesses as those classified as Substandard, with the additional trait that the weaknesses make collection or repayment in full highly questionable and improbable.

The allowance amounts for "pass" rated loans and those loans adversely classified, which are not reviewed individually, are determined using historical loss rates developed through migration analysis. The migration analysis is updated quarterly based on historic losses and movement of loans between ratings.

Finally, in order to ensure our allowance methodology is incorporating recent trends and economic conditions, we apply environmental and general economic factors to our allowance methodology including: credit concentrations; delinquency trends; economic and business conditions; the quality of lending management and staff; lending policies and procedures; loss and recovery trends; nature and volume of the portfolio; nonaccrual and problem loan trends; usage trends of unfunded commitments; and other adjustments for items not covered by other factors.

We recognize the determination of the allowance for loan losses is sensitive to the assigned credit risk ratings and inherent loss rates at any given point in time. Therefore, we perform sensitivity analyses to provide insight regarding the impact adverse changes in risk ratings may have on our allowance for loan losses. Our sensitivity analyses do not imply any expectation of future deterioration in our loans' risk ratings and they do not necessarily reflect the nature and extent of future changes in the allowance for loan losses due to the numerous quantitative and qualitative factors considered in

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

determining our allowance for loan losses. Given current processes employed by the Company, management believes the risk ratings and inherent loss rates currently assigned are appropriate.

We believe that the allowance for loan losses is adequate. In making this determination, we consider certain quantitative and qualitative factors including our historical loan loss experience, the volume and type of lending conducted by the Company, the results of our credit review process, the amounts of classified, criticized and nonperforming assets, regulatory policies, general economic conditions, underlying collateral values, and other factors regarding the collectibility of loans in our portfolio.

We also believe that the reserve for unfunded loan commitments is adequate. In making this determination, we use the same methodology for the reserve for unfunded loan commitments as we do for the allowance for loan losses and consider the same quantitative and qualitative factors, as well as off-balance sheet exposures and an estimate of the probability of drawdown of loan commitments correlated to their credit risk rating.

Our federal and state banking regulators, as an integral part of their examination process, periodically review the Company's allowance for credit losses. Our regulators may require the Company to recognize additions to the allowance based on their judgments related to information available to them at the time of their examinations.

Allowance for Credit Losses on Covered Loans. Covered loans are subject to our internal and external credit review. If and when credit deterioration occurs subsequent to the acquisition dates, a provision for credit losses for acquired impaired loans will be charged to earnings for the full amount without regard to the FDIC loss sharing agreements. The portion of the loss on covered loans reimbursable from the FDIC is recorded in noninterest income as "FDIC loss sharing income, net" and increases the FDIC loss sharing asset. The allowance for loan losses on acquired impaired loans is measured at each financial reporting period, or measurement date, based on expected cash flows. Decreases in expected cash flows on the acquired impaired loans as of the measurement date compared to previously estimated are usually recognized by recording a provision for credit losses on acquired impaired loans.

Acquired loans not accounted for as impaired loans are subject to our allowance for credit losses methodology. Although we estimate the required allowance for credit losses similar to the methodology used for non-covered loans, we record a provision for such loan losses only when the reserve requirement exceeds any remaining credit discount on these covered loans.

(i) FDIC Loss Sharing Asset

The FDIC loss sharing asset was measured at estimated fair value on the Los Padres and Affinity acquisition dates using expected future cash flows from the FDIC and a discount rate based on a long-term risk-free interest rate plus a premium. Under the terms of the Los Padres loss sharing agreement, the FDIC is obligated to reimburse the Bank for 80% of losses with respect to the covered assets. The Bank will reimburse the FDIC for 80% of recoveries with respect to losses for which the FDIC paid the Bank 80% reimbursement under the loss sharing agreement. Under the terms of the Affinity loss sharing agreement with the FDIC, the FDIC will (a) absorb 80% of losses and receive 80% of loss recoveries on the first \$234 million of losses on covered assets and (b) absorb 95% of

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

losses and receive 95% of loss recoveries on covered assets exceeding \$234 million. An increase in the expected amount of losses on the covered assets will increase the loss sharing asset by a credit to FDIC loss sharing income, net. Recoveries on previous losses paid to us by the FDIC reduce the loss sharing asset by a charge to FDIC loss sharing income, net. Since the FDIC loss sharing asset was initially recorded at estimated fair value using a discount rate, a portion of the discount is recognized as FDIC loss sharing income in each reporting period.

(j) Land, Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation and amortization. Land is not depreciated. Depreciation and amortization is charged to noninterest expense using the straight-line method over the estimated useful lives of the assets. The estimated useful lives of furniture, fixtures and equipment range from 3 to 10 years and for buildings up to 35 years. Leasehold improvements are amortized over their estimated useful lives, or the life of the lease, whichever is shorter.

(k) Other Real Estate Owned

Non-covered OREO. Other real estate owned, or OREO, is initially recorded at the estimated fair value of the property, based on current independent appraisals obtained at the time of acquisition, less estimated costs to sell, including senior obligations such as delinquent property taxes. The excess of the recorded loan balance over the estimated fair value of the property at the time of acquisition less estimated costs to sell is charged to the allowance for loan losses. Any subsequent write downs are charged to noninterest expense and recognized through an OREO valuation allowance. Subsequent increases in the fair value of the asset less selling costs reduce the OREO valuation allowance, but not below zero, and are credited to noninterest expense. Gains and losses on the sale of foreclosed properties and operating expenses of such assets are also included in noninterest expense.

Covered OREO. Covered OREO was initially recorded at its estimated fair value on the acquisition date based on independent appraisals less estimated selling costs. Any subsequent write downs due to declines in fair value are charged to noninterest expense with a partial offset to FDIC loss sharing income for the loss reimbursement under the FDIC loss sharing agreement. Any recoveries of previous write downs are credited to noninterest expense with a corresponding charge to FDIC loss sharing income, net for the portion of the recovery that is due to the FDIC.

(l) Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled and then established only for those items that are deemed to be realizable based on our judgment. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in earnings in the period that includes the enactment date. Any interest or penalties assessed by the taxing authorities is classified in the financial statements as income tax expense. Deferred tax assets are included in other assets on the consolidated balance sheets.

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

On a quarterly basis, the Company evaluates its deferred tax assets to assess whether they are expected to be realized in the future. This determination is based on currently available facts and circumstances, including our current and projected future tax position, the historical level of our taxable income, and estimates of our future taxable income. In most cases, the realization of deferred tax assets is based on our future profitability. To the extent our deferred tax assets are no longer considered more likely than not to be realized, we could be required to record a valuation allowance on our deferred tax assets by charging earnings.

(m) Goodwill and Other Intangible Assets

Goodwill arises from business combinations and represents the excess of the purchase price over the fair value of the net assets and other identifiable intangible assets acquired. Goodwill and other intangible assets deemed to have indefinite lives generated from purchase business combinations are not subject to amortization and are instead assessed for impairment no less than annually. Impairment exists when the carrying value of the goodwill exceeds its implied fair value. Impairment charges are included in noninterest expense in the financial statements.

Intangible assets with estimable useful lives are amortized over such useful lives to their estimated residual values. Core deposit intangible assets, which we refer to as CDI, and customer relationship intangible assets, which we refer to as CRI, are recognized apart from goodwill at the time of acquisition based on market valuations prepared by independent third parties. In preparing such valuations, the third parties consider variables such as deposit servicing costs, attrition rates, and market discount rates. CDI assets are amortized to expense over their useful lives, which we have estimated to range from 7 to 10 years. CRI assets are amortized to expense over their useful lives, which we have estimated to range from 4 to 5 years. Both CDI and CRI are reviewed for impairment quarterly or earlier if events or changes in circumstances indicate that their carrying values may not be recoverable. If the recoverable amount of either CDI or CRI is determined to be less than its carrying value, we would then measure the amount of impairment based on an estimate of the intangible asset's fair value at that time. If the fair value is below the carrying value, the intangible asset is reduced to such fair value and the impairment is recognized as noninterest expense in the financial statements.

(n) Stock Incentive Plan

Compensation expense related to awards of restricted stock is based on the fair value of the underlying stock on the award date and is recognized over the vesting period using the straight-line method. The vesting of performance-based restricted stock awards and recognition of related compensation expense may occur over a shorter vesting period if financial performance targets are achieved earlier than anticipated. Amortization of unvested performance-based restricted stock is suspended when it becomes less than probable that the performance targets will be met. Amortization of unvested performance-based restricted stock is discontinued and previous amortization amounts are credited to earnings when it becomes improbable that performance targets will be met. When and if it becomes probable in the future that the performance target will be met a catch up adjustment is made and amortization begins.

Unvested restricted stock participates with common stock in any dividends declared and paid. Dividends paid on unvested restricted stock awards expected to vest and the related tax benefits are

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

included as a net reduction to stockholders' equity. Dividends paid on unvested restricted stock not expected to vest are charged to compensation expense.

(o) Business Segments

We have determined that we have one reportable business segment, banking operations.

(p) Comprehensive Income

Comprehensive income consists of net earnings and net unrealized gains (losses) on securities available-for-sale, net and is presented in the consolidated statements of stockholders' equity and comprehensive income. The components of comprehensive income are presented in Note 21.

(q) Earnings Per Share

On January 1, 2009, The *Earnings per Share* topic of the Codification under the section regarding *Special Issues Affecting Basic and Diluted EPS* (ASC 260-10-45) became effective for us. This pronouncement clarified that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends are considered participating securities and are included in the two-class method of determining basic and diluted earnings per share. All of our unvested restricted stock participates with our common stockholders in dividends. While application of the new standard had no effect on the reported amounts of net (loss) earnings for 2008, it resulted in a reduction of net earnings available to common stockholders and therefore lowered earnings per share when compared to the previous requirements. The new standard's effect on the net diluted loss per share for 2008 was an increase of \$0.02 to \$26.81 from \$26.79.

(r) Business Combinations

Business combinations are accounted for under the acquisition method of accounting in accordance with ASC 805, *Business Combinations*. Under the acquisition method the acquiring entity in a business combination recognizes 100 percent of the acquired assets and assumed liabilities, regardless of the percentage owned, at their estimated fair values as of the date of acquisition. Any excess of the purchase price over the fair value of net assets and other identifiable intangible assets acquired is recorded as goodwill. To the extent the fair value of net assets acquired, including other identifiable assets, exceed the purchase price, a bargain purchase gain is recognized. Assets acquired and liabilities assumed from contingencies must also be recognized at fair value, if the fair value can be determined during the measurement period. Results of operations of an acquired business are included in the statement of earnings from the date of acquisition. Acquisition-related costs, including conversion and restructuring charges, are expensed as incurred. We adopted this guidance as of January 1, 2009 and applied it to the Los Padres and Affinity acquisitions.

(s) Recently Issued or Adopted Accounting Standards

FASB ASC 810 Consolidation ("ASC 810") became effective for us on January 1, 2010, and was amended to change how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. The new authoritative accounting guidance requires additional disclosures about the reporting entity's involvement with variable-interest entities and any significant changes in risk exposure due to that involvement as well as its effect on the entity's financial statements. The new authoritative accounting guidance under ASC 810 was effective January 1, 2010 and did not have an impact on our financial statements.

FASB ASC 860 Transfers and Servicing ("ASC 860") was amended to enhance reporting about transfers of financial assets, including securitizations, and where companies have continuing exposure to the risks related to transferred financial assets. The new authoritative accounting guidance eliminates the concept of a "qualifying special-purpose entity" and changes the requirements for derecognizing financial assets. The new authoritative accounting guidance also requires additional disclosures about all continuing involvements with transferred financial assets including information about gains and losses resulting from transfers during the period. The new authoritative accounting guidance under ASC 860 was effective January 1, 2010 and did not have an impact on our financial statements.

In January 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2010-06, *Improving Disclosures about Fair Value Measurements*. ASU 2010-06 requires additional disclosures about fair value measurements including transfers in and out of Levels 1 and 2 and a higher level of disaggregation for the different types of financial instruments. For the reconciliation of Level 3 fair value measurements, information about purchases, sales, issuances and settlements are presented separately. This standard is effective for interim and annual reporting periods beginning after December 15, 2009 with the exception of revised Level 3 disclosure requirements which are effective for interim and annual reporting periods beginning after December 15, 2010. Comparative disclosures are not required in the year of adoption. We adopted the provisions of the standard on January 1, 2010, which did not have a material impact on our financial statements.

In April 2010, the FASB issued ASU 2010-18, *Effect of a Loan Modification When the Loan is Part of a Pool That is Accounted for as a Single Asset*. ASU 2010-18 requires that a modified loan in a pool of purchased credit-impaired loans remain in the pool even if the modification would otherwise be considered a troubled debt restructuring. An entity will continue to be required to consider whether the pool of assets in which the loan is included is impaired if expected cash flows for the pool change. A one-time election to terminate accounting for loans in a pool, which may be made on a pool-by-pool basis, is provided upon adoption of ASU 2010-18. This ASU is effective for modifications of loans accounted for within pools under ASC Subtopic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*, occurring in the first interim and annual reporting period ending on or after July 15, 2010. ASU 2010-18 is to be applied prospectively, but early application was permitted. We adopted the provisions of this ASU effective September 30, 2010; such adoption had no material effect on our financial statements.

In July 2010, the FASB issued ASU 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*. ASU 2010-20 requires additional information about credit risk exposure for financing receivables and the related allowance for loan losses including an allowance rollforward on a portfolio segment basis, the recorded investment in financing receivables on a portfolio segment basis, the nonaccrual status of financing receivables by class, impaired financing receivables by class, aging of past due receivables by class, credit quality indicators by class, troubled

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

debt restructurings information by class, and significant purchases and sales of financing receivables. ASU 2010-20 defines portfolio segment as the level at which an entity develops and documents a systematic method for determining its allowance for loan losses. Classes of financing receivables generally are a disaggregation of portfolio segments. The period end reporting requirements of ASU 2010-20 became effective for us on December 31, 2010. ASU 2010-20 disclosures that relate to activity during a reporting period will be required for us for interim and annual reporting periods beginning after December 15, 2010. ASU 2011-01, *"Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20,"* temporarily deferred the effective date for disclosures related to troubled debt restructurings to coincide with the effective date of a proposed accounting standards update related to troubled debt restructurings, which is currently expected to be effective for reporting periods ending after June 15, 2011. Adoption of the ASU 2010-20 disclosure requirements did not have a material impact on our financial statements.

ASU No. 2010-29, *"Disclosure of Supplementary Pro Forma Information for Business Combinations,"* provides clarification regarding the acquisition date that should be used for reporting the pro forma financial information disclosures required by Topic 805 when comparative financial statements are presented. ASU 2010-29 also requires entities to provide a description of the nature and amount of material, nonrecurring pro forma adjustments that are directly attributable to the business combination. ASU 2010-29 is effective for the Company prospectively for business combinations occurring after December 31, 2010.

NOTE 2 RESTRICTED CASH BALANCES

The Company is required to maintain reserve balances with the Federal Reserve Bank, or FRB. Such reserve requirements are based on a percentage of deposit liabilities and may be satisfied by cash on hand. The average reserves required to be held at the FRB for the years ended December 31, 2010 and 2009 were \$1.2 million and \$2.2 million.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 3 ACQUISITIONS**

We completed the following acquisitions during the time period of January 1, 2008 to December 31, 2010, using the acquisition method of accounting, and, accordingly, the operating results of the acquired entities have been included in our consolidated financial statements from their respective dates of acquisition.

Federally Assisted Acquisition of Los Padres Bank

Edgar Filing: PACWEST BANCORP - Form 10-K

On August 20, 2010, we acquired certain assets of Los Padres Bank, including all loans, and assumed substantially all of its liabilities, including all deposits, from the Federal Deposit Insurance Corporation ("FDIC") in an FDIC-assisted acquisition, which we refer to as the Los Padres acquisition.

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 3 ACQUISITIONS (Continued)

We entered into a loss sharing agreement with the FDIC, whereby the FDIC agreed to cover a substantial portion of any future losses on acquired loans, with the exception of consumer loans, and other real estate owned. We refer to the acquired assets subject to the loss sharing agreement collectively as "covered assets." Under the terms of such loss sharing agreement, the FDIC is obligated to reimburse the Bank for 80% of losses with respect to the covered assets. The Bank will reimburse the FDIC for 80% of recoveries with respect to losses for which the FDIC paid the Bank 80% reimbursement under the loss sharing agreement. The loss sharing arrangement for single family covered assets and commercial (non-single family) covered assets is in effect for 10 years and 5 years, respectively, from the August 20, 2010 acquisition date, and the loss recovery provisions are in effect for 10 years and 8 years, respectively, from the acquisition date.

Los Padres was a federally chartered savings bank headquartered in Solvang, California that operated 14 branches, including 11 branches in California (three in Ventura County, four in Santa Barbara County, and four in San Luis Obispo County) and three branches in Arizona (Maricopa County). After office consolidations in February 2011, there are nine remaining former Los Padres offices with eight in California and one in Arizona. We made this acquisition to expand our presence in the Central Coast of California.

The assets acquired and liabilities assumed have been accounted for under the acquisition method of accounting. The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the August 20, 2010 acquisition date. Such fair values are preliminary estimates and are subject to adjustment for up to one-year after the acquisition date. The application of the acquisition method of accounting resulted in goodwill of \$47.3 million. Such goodwill includes \$9.5 million related to the FDIC's settlement accounting for a wholly-owned subsidiary of Los Padres. We disagree with the FDIC's accounting for this item and are in process of negotiating with the FDIC to resolve this matter. Should we be successful in our negotiations, goodwill would be reduced by a cash payment to us from the FDIC of \$9.5 million. No assurance can be given, however, that we will be successful in our efforts.

Federally Assisted Acquisition of Affinity Bank

On August 28, 2009, Pacific Western Bank acquired certain assets and assumed certain liabilities of Affinity Bank from the FDIC in an FDIC-assisted acquisition. We entered into a loss sharing agreement with the FDIC, whereby the FDIC agreed to cover a substantial portion of any future losses on acquired loans, other real estate owned and certain investment securities. We refer to the acquired assets subject to the loss sharing agreement collectively as "covered assets." Under the terms of such loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on the first \$234 million of losses on covered assets and absorb 95% of losses and receive 95% of loss recoveries on covered assets exceeding \$234 million. The loss sharing agreement is in effect for 5 years for commercial assets (non-residential loans, OREO and certain securities) and 10 years for residential loans from the August 28, 2009 acquisition date. The loss recovery provisions are in effect for 8 years for commercial assets and 10 years for residential loans from the acquisition date. Affinity was a full service commercial bank headquartered in Ventura, California that operated 10 branch locations in California. We made this acquisition to expand our presence in California.

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 3 ACQUISITIONS (Continued)

The assets acquired and liabilities assumed have been accounted for under the acquisition method of accounting. The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the August 28, 2009 acquisition date. The application of the acquisition method of accounting resulted in a net after-tax gain of \$38.9 million (\$67.0 million before tax).

Security Pacific Bank Deposit Acquisition

On November 7, 2008, we assumed \$427.5 million in deposits from the FDIC as receiver of Security Pacific Bank, or SPB, formerly a Los Angeles-based bank. We assumed all insured and uninsured deposits and paid a 2% premium of approximately \$5.1 million related to the non-brokered deposit base of \$258 million. The estimated brokered deposits as of the assumption date totaled \$169 million. Such deposit assumption was net of acquiring cash, certificates of deposit in other financial institutions, federal funds sold, securities, and loans secured by assumed deposits. As part of the SPB deposit acquisition we also purchased an additional \$31 million in loans. We made this acquisition to augment our deposit base and to gain experience with FDIC-assisted transactions.

Acquisition-related charges

All of the acquisitions consummated after December 31, 2000 were completed using the acquisition method of accounting. For those acquisitions completed prior to January 1, 2009, we recorded the estimated merger-related charges associated with each acquisition as a liability at closing when the related purchase price was allocated. For each acquisition, we developed an integration plan for the Company that addressed, among other things, requirements for staffing, systems platforms, branch locations and other facilities. The remaining merger-related liability totaled \$981,000 at December 31, 2010 and represented the estimated lease payments, net of estimated sublease income, for the remaining life of leases for abandoned space. For acquisitions completed after January 1, 2009, acquisition-related costs, such as legal, accounting, valuation and other professional fees, necessary to effect a business combination, are charged to earnings in the periods in which the costs are incurred. We incurred and charged to expense approximately \$900,000 and \$600,000 of such costs in 2010 and 2009, respectively.

Unaudited Pro Forma Results of Operations

The following table presents our unaudited pro forma results of operations for the periods presented as if the Los Padres acquisition had been completed on January 1, 2009 and the Affinity acquisition had been completed on January 1, 2008. The unaudited pro forma results of operations include the historical accounts of the Company and Affinity and pro forma adjustments as may be required, including the amortization of intangibles with definite lives and the amortization or accretion of any premiums or discounts arising from fair value adjustments for assets acquired and liabilities assumed. The unaudited pro forma information is intended for informational purposes only and is not necessarily indicative of our future operating results or operating results that would have occurred had the Los Padres acquisition been completed at the beginning of 2009 and the Affinity acquisition completed at the beginning of 2008. No assumptions have been applied to the pro forma results of operations regarding possible revenue enhancements, expense efficiencies or asset dispositions.

NOTE 4 GOODWILL AND OTHER INTANGIBLE ASSETS

In connection with the Los Padres acquisition on August 20, 2010, we recorded goodwill of \$47.3 million, all of which is deductible for tax purposes. In 2008, we determined that all of our then existing goodwill was impaired and we recorded a \$761.7 million charge to write it off.

The following table presents the changes in the carrying amount of goodwill:

	Goodwill (In thousands)
Balance, January 1, 2008	\$ 761,990
Adjustments related to prior acquisitions	(289)
Write-offs	(761,701)
Balance, December 31, 2008 and 2009	
Addition from the Los Padres acquisition	47,301
Balance, December 31, 2010	\$ 47,301

Our intangible assets with definite lives are core deposit and customer relationship intangibles. These intangibles are amortized over their respective estimated useful lives to their estimated residual values and reviewed for impairment at least quarterly. The amortization expense represents the estimated decline in the value of the underlying deposits or loan customers acquired. The weighted average amortization period remaining for our core deposit and customer relationship intangibles is 2.6 years. The estimated aggregate amortization expense related to these intangible assets for each of the next five years is \$8.4 million, \$6.1 million, \$4.5 million, \$2.9 million and \$2.7 million.

Government and government-sponsored entity collateralized mortgage obligations	89,087	512	(2,702)	86,897
Covered private label collateralized mortgage obligations	52,967	713	(1,555)	52,125
Other securities	2,284			2,284
Total securities available-for-sale	\$ 423,880	\$ 5,236	\$ (5,416)	\$ 423,700

During 2010, we purchased \$627.9 million of government-sponsored entity pass through securities utilizing our excess liquidity. During 2009, in connection with the August 28, 2009 Affinity acquisition, we acquired \$158.8 million of investment securities. Such acquired securities included \$55.3 million of "private label" collateralized mortgage obligations ("CMOs") which are covered by the FDIC loss sharing agreement. The remaining securities acquired in the Affinity acquisition were predominantly government or government-sponsored entity CMOs.

At December 31, 2010, the fair value of debt securities and mortgage-backed securities issued by the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac") was approximately \$724.2 million. We do not own any equity securities issued by Fannie Mae or Freddie Mac. There were no sales of securities in 2010 and 2009. We sold \$16.5 million of Fannie Mae and Freddie Mac debt securities at a gain of \$81,000 during 2008. As of December 31, 2010 and 2009, securities available-for-sale with a carrying value of \$140.7 million and \$176.7 million were pledged as security for borrowings, public deposits and other purposes as required by various statutes and agreements.

Market valuations of our investment securities are provided by an independent third party. The fair values are determined by using several sources for valuing fixed income securities. Their techniques include pricing models that vary based on the type of asset being valued and incorporate available trade, bid and other market information. In accordance with the hierarchy established in ASC Topic 820, the market valuation sources include observable market inputs for the majority of our securities and are therefore considered Level 2 inputs for purposes of determining the fair values. The valuation techniques for the covered private label CMOs are considered Level 3. See Note 13 for information on fair value measurements and methodology.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 5 INVESTMENT SECURITIES (Continued)**

The following table presents the estimated fair values and the gross unrealized loss on securities by length of time the securities that the securities were in an unrealized loss position at the dates indicated:

	December 31, 2010						December 31, 2009	
	Less than 12 months		12 months or longer		Total		Less than 12 months	
	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses
	(In thousands)							
Government-sponsored entity debt securities	\$	\$	\$	\$	\$	\$	\$ 35,626	\$ (319)
Residential mortgage-backed securities:								
Government and government-sponsored entity pass through securities	321,537	(7,366)			321,537	(7,366)	113,621	(840)
Government and government-sponsored entity collateralized mortgage obligations	15,690	(327)	1,553	(25)	17,243	(352)	64,661	(2,702)
Covered private label collateralized mortgage obligations	1,579	(472)	4,980	(1,611)	6,559	(2,083)	30,511	(1,555)
Total	\$ 338,806	\$ (8,165)	\$ 6,533	\$ (1,636)	\$ 345,339	\$ (9,801)	\$ 244,419	\$ (5,416)

We reviewed the securities that were in a continuous loss position less than 12 months and longer than 12 months at December 31, 2010, and concluded that their losses were a result of the level of market interest rates relative to the types of securities and not a result of the underlying issuers' abilities to repay. Accordingly, we determined that the securities were temporarily impaired. Additionally, as we have the ability to hold these securities until their fair values recover to their costs and will not likely sell them, we did not recognize the temporary impairment in the consolidated statements of earnings (loss).

During 2010, we determined that one covered private label collateralized mortgage obligation security was fully impaired due to deteriorating cash flows and significant delinquency of the underlying loan collateral and recorded an other-than-temporary impairment loss of \$874,000 in the consolidated statement of earnings (loss). This loss was offset by FDIC loss sharing income of \$699,000, which represented the FDIC's 80% share of the loss.

Mortgage-backed securities have contractual terms to maturity, but require periodic payments to reduce principal. In addition, expected maturities may differ from contractual maturities because obligors and/or issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 5 INVESTMENT SECURITIES (Continued)**

Due after five years through ten years	45,646	46,664
Due after ten years	796,590	801,893
Total securities available-for-sale	\$ 867,173	\$ 874,016

FHLB Stock

At December 31, 2010, the Company had a \$55.0 million investment in Federal Home Loan Bank of San Francisco ("FHLB") stock carried at cost. In January 2009, the FHLB announced that it suspended excess FHLB stock redemptions and dividend payments. Since this announcement, the FHLB has declared and paid five cash dividends, though at rates less than that paid in the past, and repurchased \$6.0 million of our excess stock. We evaluated the carrying value of our FHLB stock investment at December 31, 2010 and determined that it was not impaired. Our evaluation considered the long-term nature of the investment, the liquidity position of the FHLB, the actions being taken by the FHLB to address its regulatory situation, and our intent and ability to hold this investment for a period of time sufficient to recover our recorded investment.

NOTE 6 LOANS***Non-Covered Loans***

When we refer to non-covered loans we are referring to loans not covered by our FDIC loss sharing agreements.

The Company funds commercial, real estate and consumer loans to customers in the regions the Bank serves, which are mainly in Southern California. We have non-covered foreign loans which are primarily to individuals and entities located in Mexico. All of our non-covered foreign loans are denominated in U.S. dollars and the majority is collateralized by assets located in the United States or guaranteed or insured by businesses located in the United States. As of December 31, 2010 and 2009, non-covered foreign loan balances totaled \$22.6 million and \$36.2 million, respectively.

Our federal and state banking regulators, as an integral part of their examination process, periodically review the Company's loan risk rating classifications. Our regulators may require the Company to recognize rating downgrades based on their judgments related to information available to them at the time of their examinations. Risk rating downgrades generally result in higher allowances for credit losses.

At December 31, 2010, the Company had no loans that were greater than 90 days past due and still accruing interest. It is the Company's policy to discontinue accruing interest when principal or interest payments are past due 90 days or when, in the opinion of management, there is a reasonable doubt as to collectibility in the normal course of business. At December 31, 2010, we had \$12.0 million of loans 30 to 89 days past due and \$32.9 million of current loans that were on nonaccrual status based on management's judgment about the collectibility of such loans.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 6 LOANS (Continued)**

The following table presents our nonaccrual and performing non-covered loans by portfolio segment and class as of the date indicated:

Non-covered impaired loans include loans that are designated as nonaccrual or restructured and are summarized in the following table as of the dates indicated:

	December 31,	
	2010	2009
	(In thousands)	
Nonaccrual restructured loans	\$ 36,262	\$ 88,274
Other nonaccrual loans	57,921	151,893
Total non-covered nonaccrual loans	94,183	240,167
Performing restructured loans	89,272	181,454
Total non-covered impaired loans	\$ 183,455	\$ 421,621

We have commitments in the amount of \$23,000 to lend on nonaccrual loans but are under no obligation to honor such commitment as long as the loan is on nonaccrual. We have commitments in the amount of \$60,000 to lend on performing restructured loans.

Edgar Filing: PACWEST BANCORP - Form 10-K

During 2010, non-covered nonaccrual loans declined by \$146.0 million, to \$94.2 million, and non-covered performing restructured loans decreased by \$92.2 million, to \$89.3 million at December 31,

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 6 LOANS (Continued)**

2010. The drop in nonaccrual loans and performing restructured loans was attributable primarily to \$398.5 million of non-covered classified loans sold in 2010, of which \$128.1 million were nonaccrual loans and \$148.8 million were performing restructured loans.

At December 31, 2010, we had \$89.3 million in loans that were accruing interest under the terms of troubled debt restructurings. This amount consisted of \$69.7 million in real estate mortgage loans, \$18.1 million in real estate construction loans, and \$1.5 million in commercial loans. The majority of our loan restructurings relates to commercial real estate lending and involves lowering the interest rate and/or a change to interest-only payments for a period of time. In these cases, we do not typically forgive principal or extend the maturity date as part of the loan modification.

The majority of the performing restructured loans were on accrual status prior to the loan modifications and have remained on accrual status after the loan modifications due to the borrowers making payments before and after the restructurings. In these circumstances, generally, a borrower may have had a fixed rate loan that they continued to repay, but may be having cash flow difficulties. In an effort to work with certain borrowers, we have agreed to interest rate reductions to reflect the lower market interest rate environment and/or interest-only payments for a period of time. As a result of the current economic environment in our market areas, we anticipate loan restructurings to continue during 2011.

The following table summarizes our non-covered nonaccrual and performing impaired loans:

	Year Ended December 31,		
	2010	2009	2008
	(In thousands)		
Nonaccrual loans:			
Average balance	\$ 66,070	\$ 165,445	\$ 58,165
Interest income recorded	1,775	7,967	4,478
Interest income foregone	4,130	7,262	2,201
Performing impaired loans:			
Average balance	48,561	69,249	1,897
Interest income recorded	5,081	10,599	1,076
			121

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 6 LOANS (Continued)**

The Company measures its impaired loans by using the estimated fair value of the collateral, less estimated costs to sell, including senior obligations such as delinquent property taxes, if the loan is collateral-dependent and the present value of the expected future cash flows discounted at the loan's effective interest rate if the loan is not collateral-dependent. The Company recognizes income from non-covered impaired loans on an accrual basis unless the loan is on nonaccrual status. Income from loans on nonaccrual status is recognized to the extent cash is received and the loan's principal balance is deemed collectible. For the years ended December 31, 2010, 2009, and 2008 no interest income was recorded on non-covered impaired loans during the time such loans were on nonaccrual status.

The following table summarizes non-covered impaired loans and any related impairment allowance as of the dates indicated:

	December 31,			
	2010		2009	
	Recorded Investment	Impairment Allowance	Recorded Investment	Impairment Allowance
(In thousands)				
With impairment allowance:				
Real estate loans	\$ 139,528	\$ 5,018	\$ 220,055	\$ 28,330
Other loans	34,907	9,960	14,496	2,094
Without impairment allowance:				
Real estate loans	1,993		144,547	
Other loans	7,027		42,523	
Total	\$ 183,455	\$ 14,978	\$ 421,621	\$ 30,424

The recorded investment in a loan reflects the contractual amount due from the borrower reduced by charge-offs and any participation amount sold to a third party. The Company's policy is to charge-off to the allowance the impairment amount on a collateral-dependent loan and to set up as a specific reserve the impairment amount on a loan that is not collateral-dependent.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 6 LOANS (Continued)***Covered Loans*

We refer to the loans acquired in the Los Padres and Affinity acquisitions subject to loss sharing agreements with the FDIC as "covered loans" as we will be reimbursed for a substantial portion of any future losses on them under the terms of the agreements. At the August 20, 2010 Los Padres acquisition date and the August 28, 2009 Affinity acquisition date, we estimated the fair values of the Los Padres and Affinity covered loans to be \$436.3 million and \$675.6 million, respectively. Fair value of acquired loans is determined using a discounted cash flow model using assumptions about the amount and timing of principal and interest payments, estimated prepayments, estimated default rates, estimated loss severity in the event of defaults, and current market rates. Estimated credit losses are included in the determination of fair value; therefore, an allowance for loan losses is not recorded on the acquisition date.

The following table reflects the carrying values of covered loans as of the dates indicated:

Loan Category	December 31,	
	2010	2009
	(In thousands)	
Multi-family	\$ 417,277	\$ 263,944
Commercial real estate	342,642	311,298
Single family	151,874	17,078
Construction and land	91,740	121,735
Commercial and industrial	40,013	21,340
Home equity lines of credit	8,248	6,565
Consumer	947	575
Total gross covered loans	1,052,741	742,535
Less: discount	(110,901)	(102,849)
Covered loans, net of discount	941,840	639,686
Less: allowance for loan losses	(33,264)	(18,000)
Covered loans, net	\$ 908,576	\$ 621,686

The undiscounted contractual cash flows, undiscounted cash flows expected to be collected, and the estimated fair value of the Los Padres covered acquired impaired loan portfolio as of the acquisition date were \$694.5 million, \$549.8 million, and \$405.6 million, respectively.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 6 LOANS (Continued)**

The following table summarizes the changes in the carrying amount of covered acquired impaired loans and accretible yield on those loans for the periods indicated:

	Covered Acquired Impaired Loans	
	Carrying Amount	Accretible Yield
	(In thousands)	
Balance, January 1, 2009	\$	\$
Addition from the Affinity acquisition	675,616	(248,174)
Accretion	17,622	17,622
Payments received	(53,552)	
Decrease in expected cash flows		4,106
Provision for credit losses	(18,000)	
Balance, December 31, 2009	621,686	(226,446)
Addition from the Los Padres acquisition	405,619	(144,168)
Accretion	52,539	52,539
Payments received	(161,312)	
Decrease in expected cash flows		27,410
Provision for credit losses	(39,046)	
Balance, December 31, 2010	\$ 879,486	\$ (290,665)

The table above excludes the covered loans from the Los Padres acquisition which are accounted for as non-impaired loans and total \$29.1 million at December 31, 2010.

The following table presents changes in our allowance for credit losses on covered loans for the years indicated:

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 6 LOANS (Continued)**

The following table presents the credit risk rating categories for covered loans by portfolio segment as of the date indicated. Nonclassified loans are those with a credit risk rating of either pass or special mention, while classified loans are those with a credit risk rating of either substandard or doubtful. It should be noted, however, that these loans are covered by loss sharing agreements with the FDIC.

	December 31, 2010		
	Nonclassified	Classified	Total
	(In thousands)		
Real estate mortgage	\$ 622,837	\$ 180,944	\$ 803,781
Real estate construction	21,370	51,729	73,099
Commercial	14,630	16,219	30,849
Consumer	722	125	847
Total covered loans	\$ 659,559	\$ 249,017	\$ 908,576

Our federal and state banking regulators, as an integral part of their examination process, periodically review the Company's loan classifications. Our regulators may require the Company to recognize rating downgrades based on their judgments related to information available to them at the time of their examinations.

NOTE 8 FDIC LOSS SHARING ASSET

The following table presents changes in the FDIC loss sharing asset for the years indicated:

	Year Ended December 31,	
	2010	2009
	(In thousands)	
FDIC loss sharing asset, beginning of year	\$ 112,817	\$
Additions due to acquisitions	71,204	107,718
FDIC share of additional losses	31,799	15,614
Cash payments received from FDIC	(93,786)	(10,966)
Net accretion ⁽¹⁾	(5,682)	451

Edgar Filing: PACWEST BANCORP - Form 10-K

FDIC loss sharing asset, end of year \$ 116,352 \$ 112,817

(1) Amount includes accretion of the loss sharing asset and reductions due to loan pay-downs or loan disposals at amounts above the carrying values of such covered loans.

128

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 9 PREMISES AND EQUIPMENT, NET**

The following table presents the components of premises and equipment as of the dates indicated:

	December 31,	
	2010	2009
	(In thousands)	
Land	\$ 3,537	\$ 2,897
Buildings	5,815	4,985
Furniture, fixtures and equipment	26,268	24,035
Leasehold improvements	23,495	22,466
Premises and equipment, gross	59,115	54,383
Less: accumulated depreciation and amortization	(36,537)	(31,837)
Premises and equipment, net	\$ 22,578	\$ 22,546

Depreciation and amortization expense was \$5.1 million, \$5.5 million, and \$5.4 million for the years ended December 31, 2010, 2009, and 2008, respectively.

We have obligations under a number of noncancelable operating leases for premises and equipment. The following table presents future minimum rental payments under noncancelable operating leases as of December 31, 2010:

Estimated Lease Payments for Year Ending December 31	Amount
	(In thousands)
2011	\$ 16,435
2012	14,493
2013	12,649
2014	10,600
2015	8,068
Thereafter	14,194
Total	\$ 76,439

Total gross rental expense for the years ended December 31, 2010, 2009, and 2008 was \$16.8 million, \$15.0 million, and \$13.5 million, respectively. Most of the leases provide that the Company pay maintenance, insurance and certain other operating expenses applicable to the leased premises in addition to the monthly rental payments.

Total rental income for the years ended December 31, 2010, 2009, and 2008 was approximately \$518,000, \$441,000, and \$424,000, respectively. The future minimum rental payments to be received under noncancelable subleases are \$2.1 million.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 10 DEPOSITS**

The following table presents the components of interest-bearing deposits as of the dates indicated:

	December 31,	
	2010	2009
	(In thousands)	
Interest-bearing checking deposits	\$ 494,617	\$ 439,694

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 11 BORROWINGS AND SUBORDINATED DEBENTURES*****Borrowings***

The Bank has established secured and unsecured lines of credit. We may borrow funds from time to time on a term or overnight basis from the FHLB, the FRB, or other financial institutions.

Federal Funds Arrangements with Commercial Banks. As of December 31, 2010, 2009, and 2008, the Bank had unsecured lines of credit with correspondent banks, subject to availability, in the amount of \$52.0 million, \$117.0 million, and \$155.0 million. These lines are renewable annually and have no unused commitment fees. As of December 31, 2010, 2009, and 2008, there were no balances outstanding.

FRB Secured Line of Credit. The Bank established a secured line of credit with the FRB during 2008. The secured borrowing capacity is collateralized by liens covering \$470.9 million of our construction and commercial loans not already pledged to the FHLB as described below. As of December 31, 2010, our secured FRB borrowing capacity was \$373.3 million. As of December 31, 2010 and 2009 and during such periods, there were no balances outstanding.

FHLB Secured Lines of Credit. The borrowing arrangements with the FHLB are based on two separate FHLB programs and are collateralized by a portion of our securities available-for-sale and by a blanket lien covering the majority of our real estate secured loans. At December 31, 2010, approximately \$3.1 billion of real estate and commercial loans and securities with a carrying value of \$107.4 million are pledged to secure our FHLB lines of credit.

The following table summarizes information about our collateralized FHLB borrowing arrangements for the years indicated:

FHLB Borrowing Data	At or For the Year Ended December 31,		
	2010	2009	2008
	(Dollars in thousands)

Total FHLB advances	\$ 225,000		\$ 542,763	

(1) FHLB advances assumed in the Affinity acquisition, of which \$125 million were prepaid in April 2010, for which we incurred a \$0.7 million penalty charged to earnings at that time.

(2) Prepaid in December 2010 with a penalty of \$1.9 million charged to earnings at that time.

(3) Represented the fair value adjustment on FHLB advances assumed in the Affinity acquisition which was eliminated when the Affinity FHLB advances were repaid in 2010.

The FHLB advances outstanding at December 31, 2010, are both term and callable advances. The maturities shown are the contractual maturities for all advances. The callable advances have all passed their initial call dates and are currently callable on a quarterly basis by the FHLB. While the FHLB may call the advances to be repaid for any reason, they are likely to be called if market interest rates, for borrowings of similar remaining term, are higher than the advances' stated rates on the call dates. We may repay the advances at any time with a prepayment penalty. In April 2010, we elected to prepay \$125.0 million in Affinity-acquired FHLB advances and incurred a \$726,000 prepayment penalty. In December 2010, we elected to prepay \$50 million in FHLB advances, for which we incurred a \$1.9 million prepayment penalty. The prepayment penalties are included in other expenses.

Subordinated Debentures

The Company had an aggregate of \$129.6 million and \$129.8 million in subordinated debentures outstanding at December 31, 2010 and 2009, respectively. The subordinated debentures outstanding at December 31, 2010 were issued in seven separate series. Each issuance had a maturity of thirty years from its date of issue. Debt issuance costs are amortized on a straight-line basis over the period to the first call date. The subordinated debentures were issued to trusts established by us or entities we have acquired, which in turn issued trust preferred securities, which totaled \$123.0 million at December 31, 2010. These trust preferred securities are presently considered Tier 1 capital for regulatory purposes.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 11 BORROWINGS AND SUBORDINATED DEBENTURES (Continued)**

With the exception of Trust I and Trust CI, the subordinated debentures are callable at par, only by the issuer, five years from the date of issuance, subject to certain exceptions. We were permitted to call the debentures in the first five years if the prepayment election related to one of the following three events: (i) a change in the tax treatment of the debentures stemming from a change in the IRS laws; (ii) a change in the regulatory treatment of the underlying trust preferred securities as Tier 1 capital; and (iii) a requirement to register the underlying trust as a registered investment company. However, redemption in the first five years was subject to a prepayment penalty. Trust I and Trust CI may not be called for 10 years from the date of issuance unless one of the three events described above has occurred and then a prepayment penalty applies. In addition, there is a prepayment penalty if either of these debentures is called 10 to 20 years from the date of their issuance and they may be called at par after 20 years.

The proceeds of the subordinated debentures were used primarily to fund several of our acquisitions and to augment regulatory capital. Interest payments on subordinated debentures made by the Company are considered dividend payments by the Federal Reserve Bank. As such, notification to the Federal Reserve Bank is required prior to paying such interest during any period for which our quarterly net earnings are insufficient to fund the dividend due. Should the FRB object to payment of interest on the subordinated debentures we would not be able to make the payments until approval is received or we no longer need to provide notice under applicable regulations.

The following table summarizes the terms of each issuance of the subordinated debentures outstanding as of December 31, 2010:

Series	Date Issued	December 31, 2010 Amount (In thousands)	Maturity Date	Earliest Call Date by Company Without Penalty	Fixed or Variable Rate	Rate Index	Current Rate ⁽²⁾	Next Reset Date
Trust CI	3/23/00	\$ 10,310	3/8/30	3/8/20	Fixed	N/A	11.00%	N/A
Trust I	9/7/00	8,248	9/7/30	9/7/20	Fixed	N/A	10.60%	N/A
Trust V	8/15/03	10,310	9/17/33	(1) Variable	LIBOR + 3.10	3.40%	3/15/10	
Trust VI	9/3/03	10,310	9/15/33	(1) Variable	LIBOR + 3.05	3.35%	3/11/10	
Trust CII	9/17/03	5,155	9/17/33	(1) Variable	LIBOR + 2.95	3.25%	3/15/10	
Trust VII	2/5/04	61,856	4/23/34	(1) Variable	LIBOR + 2.75	3.05%	4/27/11	
Trust CIII	8/15/05	20,619	9/15/35	(1) Variable	LIBOR + 1.69	1.99%	3/15/10	
Gross subordinated debentures		126,808						
Unamortized premium ⁽³⁾		2,764						
Net subordinated debentures		\$ 129,572						

(1) These debentures may be called without prepayment penalty.

(2)

Edgar Filing: PACWEST BANCORP - Form 10-K

As of January 27, 2011; excludes debt issuance costs.

(3)

This amount represents the fair value adjustment on trusts of acquired companies.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 12 COMMITMENTS AND CONTINGENCIES***Lending*

The Bank is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets. The contract or notional amounts of those instruments reflect the extent of involvement the Company has in those particular classes of financial instruments.

The following presents a summary of the financial instruments described above as of the dates indicated:

	December 31,	
	2010	2009
	(In thousands)	
Commitments to extend credit fixed	\$ 66,614	\$ 59,459
Commitments to extend credit variable	656,531	699,916
Standby letters of credit	23,707	31,203
Overdraft protection	30,904	23,861
	\$ 777,756	\$ 814,439

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Of the \$777.8 million of commitments to extend credit, \$17.2 million is related to foreign loans.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. Most guarantees will expire within one year. The Company generally requires collateral or other security to support financial instruments with credit risk.

In addition, the Company has investments in low income housing project partnerships which provide the Company income tax credits and in several small business investment companies. The investments call for capital contributions up to an amount specified in the partnership agreements. The Company had commitments to contribute capital to these entities totaling \$177,000 and \$277,000 as of December 31, 2010 and 2009, respectively.

Legal Matters

In the ordinary course of our business, we are party to various legal actions, which we believe are incidental to the operation of our business. The outcome of such legal actions and the timing of ultimate resolution are inherently difficult to predict. Because of these factors, the Company cannot provide a meaningful estimate of the range of reasonably possible outcomes of claims in the aggregate or by individual claim. In the opinion of management, based upon information currently available to us,

Table of Contents

Notes to Consolidated Financial Statements (Continued)

NOTE 12 COMMITMENTS AND CONTINGENCIES (Continued)

any resulting liability is not likely to have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

NOTE 13 FAIR VALUE OF FINANCIAL INSTRUMENTS

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value, establishes a framework for measuring fair value including a three-level valuation hierarchy, and expands disclosures about fair value measurements. Fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date reflecting assumptions that a market participant would use when pricing an asset or liability. The hierarchy uses three levels of inputs to measure the fair value of assets and liabilities as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2: Observable inputs other than Level 1, including quoted prices for similar assets and liabilities in active markets, quoted prices in less active markets, or other observable inputs that can be corroborated by observable market data, either directly or indirectly, for substantially the full term of the financial instrument. This category generally includes U.S. government and agency securities.

Level 3: Inputs to a valuation methodology that are unobservable, supported by little or no market activity, and significant to the fair value measurement. These valuation methodologies generally include pricing models, discounted cash flow models, or a determination of fair value that requires significant management judgment or estimation. This category also includes observable inputs from a pricing service not corroborated by observable market data, such as pricing private label CMOs.

We use fair value to measure certain assets on a recurring basis, primarily securities available for sale; we have no liabilities being measured at fair value. For assets and liabilities measured at the lower of cost or fair value, the fair value measurement criteria may or may not be met during a reporting period and such measurements are therefore considered "nonrecurring" for purposes of disclosing our fair value measurements. Fair value is used on a nonrecurring basis to adjust carrying values for impaired loans and other real estate owned and also to record impairment on certain assets, such as goodwill, core deposit intangibles and other long-lived assets.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 13 FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)**

The following tables present information on the assets measured and recorded at fair value on a recurring and nonrecurring basis at and for the years ended December 31, 2010 and 2009:

	Fair Value Measurement as of December 31, 2010			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(In thousands)			
Measured on a Recurring Basis:				
Securities available-for-sale:				
Government-sponsored entity debt securities	\$ 10,029	\$	\$ 10,029	\$
Municipal securities	7,566		7,566

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 13 FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)

The following is a description of the valuation methodologies used to measure our assets recorded at fair value (under ASC Topic 820) and for estimating fair value for financial instruments not recorded at fair value (under ASC Topic 825):

Cash and Due from Banks and Federal Funds Sold. The carrying amount is assumed to be the fair value because of the liquidity of these instruments.

Interest-Earning Deposits in Financial Institutions. The carrying amount is assumed to be the fair value given the short-term nature of these deposits.

FHLB stock. The fair value of FHLB stock is based on our recorded investment. In January 2009, the FHLB announced that it suspended excess FHLB stock redemptions and dividend payments. Since this announcement, the FHLB has declared and paid five cash dividends, though at rates less than that paid in the past, and repurchased \$6.0 million of our excess stock. As a result of these actions, we evaluated the carrying value of our FHLB stock investment. Based on the FHLB's most recent publicly available financial results, its capital position and its bond ratings, we concluded such investment was not impaired at either December 31, 2010 or 2009.

Securities available-for-sale. Securities available-for-sale are measured and carried at fair value on a recurring basis. Unrealized gains and losses on available-for-sale securities are reported as a component of accumulated other comprehensive income in the consolidated balance sheets. Also see note 5 for further information on unrealized gains and losses on securities available-for-sale.

In determining the fair value of the securities categorized as Level 2, we obtain a report from a nationally recognized broker-dealer detailing the fair value of each investment security we hold as of each reporting date. The broker-dealer uses observable market information to value our fixed income securities, with the primary source being a nationally recognized pricing service. The fair value of the municipal securities is based on a proprietary model maintained by the broker-dealer. We review all of the broker-dealer supplied quotes on the securities we own as of the reporting date for reasonableness based on our understanding of the marketplace and we consider any credit issues related to the bonds. As we have not made any adjustments to the market quotes provided to us and they are based on observable market data, they have been categorized as Level 2 within the fair value hierarchy.

Our covered private label CMO securities are categorized as Level 3 due in part to the inactive market for such securities. There is a wide range of prices quoted for private label CMOs among independent third party pricing services and this range reflects the significant judgment being exercised over the assumptions and variables that determine the pricing of such securities. We consider this subjectivity to be a significant unobservable input and have concluded that the private label CMOs should be categorized as a Level 3 measured asset. While the private label CMOs may be based on significant unobservable inputs, our fair value estimate was based on prices provided to us by a nationally recognized pricing service which we also use to determine the fair value of the majority of our securities portfolio. We determined the reasonableness of the fair values by reviewing assumptions at the individual security level about prepayment, default expectations, estimated severity loss factors, projected cash flows and estimated collateral performance, all of which are not directly observable in the market. During 2010, we recorded \$874,000 in losses on one covered impaired security with a fair value of zero.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 13 FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)**

Non-covered loans. As non-covered loans are not measured at fair value, the following discussion relates to estimating the fair value disclosures under ASC Topic 825. Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type and further segmented into fixed and adjustable rate interest terms and by credit risk categories. The fair value estimates do not take into consideration the value of the loan portfolio in the event the loans have to be sold outside the parameters of normal operating activities. The fair value of performing fixed rate loans is estimated by discounting scheduled cash flows through the estimated maturity using estimated market prepayment speeds and estimated market discount rates that reflect the credit and interest rate risk inherent in the loans. The estimated market discount rates used for performing fixed rate loans are the Company's current offering rates for comparable instruments with similar terms. The fair value of performing adjustable rate loans is estimated by discounting scheduled cash flows through the next repricing date. As these loans reprice frequently at market rates and the credit risk is not considered to be greater than normal, the market value is typically close to the carrying amount of these loans.

Non-covered impaired loans. Non-covered impaired loans are measured and recorded at fair value on a non-recurring basis. All of our non-covered nonaccrual loans and restructured loans are considered impaired and are reviewed individually for the amount of impairment, if any. Most of our loans are collateral dependent and, accordingly, we measure impaired loans based on the estimated fair value of such collateral. The fair value of each loan's collateral is generally based on estimated market prices from an independently prepared appraisal, which is then adjusted for the cost related to liquidating such collateral; such valuation inputs result in a nonrecurring fair value measurement that is categorized as a Level 2 measurement. When adjustments are made to an appraised value to reflect various factors such as the age of the appraisal or known changes in the market or the collateral, such valuation inputs are considered unobservable and the fair value measurement is categorized as a Level 3 measurement. The impaired loans categorized as Level 3 also include unsecured loans and other secured loans whose fair values are based significantly on unobservable inputs such as the strength of a guarantor, including an SBA government guarantee, cash flows discounted at the effective loan rate, and management's judgment. The loan balances shown in the above tables represent those nonaccrual and restructured loans for which impairment was recognized during 2010. The amounts shown as losses represent, for the loan balances shown, the impairment recognized during 2010. Of the \$94.2 million of nonaccrual loans at December 31, 2010, loans totaling \$50.7 million were written down to their fair values through charge-offs in 2010.

Covered loans. Covered loans were measured at estimated fair value on the date of acquisition. Thereafter, the fair value of covered loans is measured using the same methodology as that for non-covered loans. The above discussion for non-covered loans and non-covered impaired loans is applicable to covered loans following their acquisition date.

Other real estate owned. The fair value of foreclosed real estate, both non-covered and covered, is generally based on estimated market prices from independently prepared current appraisals or negotiated sales prices with potential buyers; such valuation inputs result in a fair value measurement that is categorized as a Level 2 measurement on a nonrecurring basis. As a matter of policy, appraisals are required annually and may be updated more frequently as circumstances require in the opinion of management. With the deterioration of real estate values during this economic downturn, appraisals have been obtained more regularly and as a result our Level 2 measurement is based on appraisals that are generally less than 9 months old. When a current appraised value is not available or management

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 13 FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)

determines the fair value of the collateral is further impaired below the appraised value as a result of known changes in the market or the collateral and there is no observable market price, such valuation inputs result in a fair value measurement that is categorized as a Level 3 measurement. To the extent a negotiated sales price or reduced listing price represents a significant discount to an observable market price, such valuation input would result in a fair value measurement that is also considered a Level 3 measurement.

SBA servicing asset. In accordance with ASC Topic 860, *Accounting for Servicing of Financial Assets*, the SBA servicing asset, included in other assets in the balance sheet, is carried at its implied fair value of \$1.6 million. The fair value of the servicing asset is estimated by discounting future cash flows using market-based discount rates and prepayment speeds. The discount rate is based on the current US Treasury yield curve, as published by the Department of the Treasury, plus a spread for the marketplace risk associated with these assets. We utilize estimated prepayment vectors using SBA prepayment information provided by Bloomberg for pools of similar assets to determine the timing of the cash flows. These nonrecurring valuation inputs are considered to be Level 3 inputs.

Deposits. Deposits are carried at historical cost. The fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, money market, savings and checking accounts, is equal to the amount payable on demand as of the balance sheet date. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities. No value has been separately assigned to the Company's long-term relationships with its deposit customers, such as a core deposit intangible.

Borrowings. Borrowings are carried at amortized cost. The fair value of fixed rate borrowings is calculated by discounting scheduled cash flows through the estimated maturity or call dates using estimated market discount rates that reflect current rates offered for borrowings with similar remaining maturities and characteristics.

Subordinated debentures. Subordinated debentures are carried at amortized cost. In accordance with ASC Topic 825, the fair value of the subordinated debentures is based on the discounted value of contractual cash flows for fixed rate securities. The discount rate is estimated using the rates currently offered for similar securities of similar maturity. The fair value of subordinated debentures with variable rates is deemed to be the carrying value.

Commitments to extend credit and standby letters of credit. The majority of our commitments to extend credit carry current market interest rates if converted to loans. Because these commitments are generally unassignable by either the borrower or us, they only have value to the borrower and us. The estimated fair value approximates the recorded deferred fee amounts and is excluded from the table above because it is not material

Limitations

Fair value estimates are made at a specific point in time and are based on relevant market information and information about the financial instrument. These estimates do not reflect income taxes or any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a portion of the Company's financial instruments, fair value estimates are based on what management believes to be

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 13 FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)**

conservative judgments regarding expected future cash flows, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimated fair values are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Since the fair values have been estimated as of December 31, 2010 and 2009, the amounts that will actually be realized or paid at settlement or maturity of the instruments could be significantly different.

NOTE 14 INCOME TAXES

The following table presents the components of income tax benefit (expense) for the years indicated:

	Year Ended December 31,		
	2010	2009	2008
	(In thousands)		
Current Income Taxes:			
Federal	\$ 7,912	\$ 10,716	\$ (20,041)
State	(3,557)	(528)	(6,476)
Total current income tax benefit (expense)	4,355	10,188	(26,517)
Deferred Income Taxes:			
Federal	27,263	(4,100)	4,322
State	15,096	1,713	2,106
Total deferred income tax benefit (expense)	42,359	(2,387)	6,428
Total income tax benefit (expense)	\$ 46,714	\$ 7,801	\$ (20,089)

The following table presents a reconciliation of the recorded income tax benefit (expense) to the amount of taxes computed by applying the applicable statutory Federal income tax rate of 35% to earnings or loss before income taxes:

	Year Ended December 31,		
	2010	2009	2008
	(In thousands)		
Computed expected income tax benefit at Federal statutory rate	\$ 38,056	\$ 6,003	\$ 247,792
State tax benefit (expense), net of federal tax benefit	7,500	770	(2,840)
Goodwill impairment			(264,935)
Increase in cash surrender value of life insurance	486	553	847
Tax credits	523	690	727
Other, net	149	(215)	(1,680)
Recorded income tax benefit (expense)	\$ 46,714	\$ 7,801	\$ (20,089)

The Company had net income taxes receivable of \$20.5 million and \$20.4 million at December 31, 2010 and 2009, respectively, on its consolidated balance sheets.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 14 INCOME TAXES (Continued)**

The Company had available at December 31, 2010, approximately \$28.6 million of unused Federal net operating loss carryforwards that may be applied against future taxable income through 2030. The Company had available at December 31, 2010, approximately \$83.2 million of unused state net operating loss carryforwards that may be applied against future taxable income through 2032. Utilization of the net operating loss and other carryforwards are subject to annual limitations set forth in Section 382 of the Internal Revenue Code.

The following table presents the tax effects of temporary differences that give rise to significant portions of deferred tax assets and deferred tax liabilities as of the dates indicated:

	December 31,	
	2010	2009
	(In thousands)	
Deferred Tax Assets:		
Book allowance for loan losses in excess of tax specific charge-offs	\$ 29,184	\$ 52,074
Interest on nonaccrual loans	1,986	3,298
Deferred compensation	4,216	4,438
Net operating losses	15,890	2,665
Premises and equipment, principally due to differences in depreciation	5,284	5,460
OREO valuation allowance	8,949	10,586
Assets acquired in FDIC-assisted acquisitions	31,787	16,205
Unrealized loss on securities available-for-sale		76
Accrued liabilities	8,137	7,768
Other	7,857	3,850
Goodwill	21,426	
Gross deferred tax assets	134,716	106,420
Deferred Tax Liabilities:		
Core deposit and customer relationship intangibles	8,061	12,606
Deferred loan fees and costs	466	428
Unrealized gain on securities available-for-sale	2,885	
FHLB stock and dividends	7,709	4,925
Unrealized income from FDIC-assisted acquisition	41,261	52,229
Gross deferred tax liabilities	60,382	70,188
Total net deferred tax asset	\$ 74,334	\$ 36,232

Based upon our taxpaying history and estimates of taxable income over the years in which the items giving rise to the deferred tax assets are deductible, management believes it is more likely than not the Company will realize the benefits of these deductible differences.

We adopted the provisions of ASC Topic 740-10, *Accounting for Uncertainty in Income Taxes* on January 1, 2007, which clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements. ASC Topic 740-10 prescribes a threshold and a measurement process for recognizing in the financial statements a tax position taken or expected to be taken in a tax return.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 14 INCOME TAXES (Continued)**

ASC Topic 740-10 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. Upon adoption we determined that the reserve for uncertain tax positions already recorded was appropriate.

Our evaluation of tax positions was performed for those tax years which remain open to audit. As of December 31, 2010, all the federal returns filed since 2007 and state returns filed since 2006 are subject to adjustment upon audit.

The following table presents a reconciliation of unrecognized net tax benefit positions for the year ended December 31, 2010:

	Unrecognized Tax Benefit Positions (In thousands)
Balance as of January 1, 2010	\$ 2,069
Payments made	(774)
Reductions due to lapse of statutes of limitations	(1,178)
Balance as of December 31, 2010	\$ 117

While it is expected that the amount of unrecognized tax benefits will change in the next twelve months, the Company does not expect this change to have a material impact on the results of operations or the financial position of the Company. We may from time to time be assessed interest or penalties by taxing authorities, although any such assessments historically have been minimal and immaterial to our financial results. In the event we are assessed for interest and/or penalties, such amounts will be classified in the financial statements as income tax expense.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 15 EARNINGS PER SHARE**

The following table presents a summary of the calculation of basic and diluted net earnings (loss) per share for the years indicated:

	Year Ended December 31,		
	2010	2009	2008
(In thousands except per share data)			
Basic Loss Per Share:			
Net loss	\$ (62,016)	\$ (9,350)	\$ (728,065)
Less: earnings allocated to unvested restricted stock ⁽¹⁾	(31)	(245)	(646)
Net loss allocated to common shares	\$ (62,047)	\$ (9,595)	\$ (728,711)
Weighted-average basic shares and unvested restricted stock outstanding	36,438.7	33,114.9	28,203.3
Less: weighted-average unvested restricted stock outstanding	(1,330.6)	(1,216.2)	(1,026.7)
Weighted-average basic shares outstanding	35,108.1	31,898.7	27,176.6
Basic loss per share	\$ (1.77)	\$ (0.30)	\$ (26.81)
Diluted Loss Per Share:			
Net loss allocated to common shares	\$ (62,047)	\$ (9,595)	\$ (728,711)
Weighted-average basic shares outstanding ⁽²⁾	35,108.1	31,898.7	27,176.6
Diluted loss per share	\$ (1.77)	\$ (0.30)	\$ (26.81)

(1) Represents cash dividends paid to holders of unvested restricted stock, net of estimated forfeitures, plus undistributed earnings amounts available to holders of unvested restricted stock, if any.

(2) Weighted average diluted shares are 35,260 shares, 32,038 shares, and 27,230 shares for 2010, 2009 and 2008, respectively; since each of these amounts are anti-dilutive, they are not used.

On January 1, 2009, the *Earnings per Share* topic of the Codification under the section regarding *Special Issues Affecting Basic and Diluted EPS* (ASC 260-10-45) became effective for us. This pronouncement clarified that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends are considered participating securities and are included in the two-class method of determining basic and diluted earnings per shares. All our unvested restricted stock participates with our common stockholders in dividends. Application of the new standard results in a reduction of net earnings available to common stockholders and lower earnings per share when compared to the previous requirements. Application of the new standard had no effect on the reported amounts of net (loss) earnings for 2008. The new standard's effect on the net diluted loss per share for 2008 was an increase of \$0.02 to \$26.81 from \$26.79.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 16 STOCK COMPENSATION PLANS**

The Company's 2003 Stock Incentive Plan, or the 2003 Plan, permits stock-based compensation awards to officers, directors, key employees and consultants. The 2003 Plan authorizes grants of stock-based compensation instruments to purchase or issue up to 5,000,000 shares of authorized but unissued Company common stock, subject to adjustments provided by the 2003 Plan. As of December 31, 2010, there were 1,176,427 shares available for grant under the 2003 Plan.

Restricted Stock

The Company began awarding time-based and performance-based restricted stock in 2003. The grants of restricted stock awards replaced the practice of granting stock options. The awarded shares of time-based restricted stock vest over a service period of three to five years from date of the grant. The awarded shares of performance-based restricted common stock vest in full or in part on the date the Compensation, Nominating and Governance, or CNG, Committee of the Board of Directors, as Administrator of the 2003 Plan, determines that the Company achieved certain financial goals established by the CNG Committee as set forth in the grant documents. Both time-based and performance-based restricted stock vest immediately upon a change in control of the Company as defined in the 2003 Plan and upon death of the employee.

The following table presents a summary of restricted stock transactions for the years indicated:

	Number of Shares	Weighted Average Fair Value on Award Date
Unvested restricted stock, December 31, 2008	1,309,586	\$ 43.01
Awarded	57,812	15.88
Shares issued by the Company upon vesting	(244,689)	37.59
Forfeited	(27,292)	40.37
Unvested restricted stock, December 31, 2009	1,095,417	42.86
Awarded	443,050	19.99
Shares issued by the Company upon vesting	(268,568)	36.78
Forfeited	(39,317)	45.82
Unvested restricted stock, December 31, 2010	1,230,582	\$ 35.86

At December 31, 2010, there were 730,582 shares of unvested time-based restricted stock and 500,000 shares of unvested performance-based restricted stock. In 2007 we determined that attainment of the financial targets related to the 2006 and 2007 awards of performance-based restricted stock within their remaining vesting horizons was less than probable and we suspended amortization of the expense related to these awards. During the fourth quarter of 2008 we further determined that attainment of the financial targets related to such performance-based restricted stock within their remaining vesting horizons was improbable and we reversed the amounts previously expensed related to these awards of \$4.5 million. If and when the attainment of such financial targets is deemed probable in future periods, a catch-up adjustment will be recorded and amortization of such performance-based restricted stock will begin again. The total amount of unrecognized compensation expense related to the performance-based restricted stock for which amortization was suspended and reversed totaled \$26.6 million at December 31, 2010. The remaining amount of the time-based restricted stock

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 16 STOCK COMPENSATION PLANS (Continued)**

amortization related to the unvested awards totaled \$13.3 million as of December 31, 2010 and will be recognized over the weighted average remaining contractual life of 1.7 years. The unvested performance-based restricted stock awarded in 2006 and 2008 expires in 2013. The unvested performance-based restricted stock awarded in 2007 expires in 2017.

Restricted stock amortization totaled \$8.5 million, \$8.2 million, and \$930,000 for the years ended December 31, 2010, 2009, and 2008, respectively, and is included in compensation expense in the accompanying consolidated statements of earnings.

The following table summarizes information about outstanding time-based and performance-based restricted stock awards at December 31, 2010:

	At Award Date		Vested		Forfeited		Outstanding at December 31, 2010			
	Number of Shares Awarded	Weighted Average Fair Value	Number of Shares Vested	Weighted Average Fair Value on Award Date	Number of Shares Forfeited	Weighted Average Fair Value on Award Date	Number of Shares Outstanding	Weighted Average Fair Value on Award Date	Weighted Average Fair Value ⁽¹⁾	Weighted Average Remaining Contractual Life
(Dollars in thousands)										
Time-based restricted stock awarded in:										
2007	96,800	\$ 51.08	51,809	\$ 50.82	20,133	\$ 52.12	24,858	\$ 50.78	531,464	0.7
2008	577,730	\$ 29.52	320,849	\$ 29.00	29,914	\$ 31.05	226,967	\$ 30.04	4,852,554	1.0
2009	57,812	\$ 15.88	17,105	\$ 15.69		\$	40,707	\$ 15.96	870,316	1.4

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 17 BENEFIT PLANS

Directors Deferred Compensation Plan

The Company had a deferred compensation plan, or the DDCP, in which some of the Company's directors and executive officers participated. The DDCP was administered by an administrative committee, which consists of certain non-director executive officers of the Company. The DDCP allowed participants to defer payment of all or a portion of their directors' fees, in the case of outside directors, or base salary, bonus or other compensation, including restricted stock awards, in the case of employee participants, for the next succeeding calendar year. Participation in the DDCP was voluntary and participants could not change their investment elections once made. Participants could elect to have their contributions used to purchase Company common stock. In December 2008 the Company elected to terminate the DDCP and in January 2009 all participants in the DDCP received distributions of amounts previously deferred, including 184,395 shares of Company common stock, and the DDCP was terminated.

401(K) Plans

The Company sponsors a defined contribution plan for the benefit of its employees. Participants are eligible to participate immediately as long as they work a minimum of 1,000 hours and are at least 21 years of age. Eligible participants may contribute up to 60% of their annual compensation, not to exceed the dollar limit imposed by the Internal Revenue Code. Employer contributions are determined annually by the Board of Directors in accordance with plan requirements and made on an annual basis. The Company may match 25% up to the first 6% of annual compensation, not to exceed the dollar limit set by the tax code.

Expense related to 401(k) contributions was \$498,000, \$430,000, and \$1.0 million for the years ended December 31, 2010, 2009, and 2008, respectively.

NOTE 18 STOCKHOLDERS' EQUITY

On December 22, 2009, we filed a registration statement with the SEC to offer to sell, from time to time, shares of common stock, preferred stock, and other equity linked securities for an aggregate initial offering price of up to \$350 million. This registration statement was declared effective on January 8, 2010. Proceeds from any offering under this registration statement are anticipated to be used to fund future acquisitions of banks and financial institutions and for general corporate purposes.

On August 25, 2009, PacWest Bancorp sold in a direct placement to institutional investors 2.7 million shares of common stock for \$50 million, or a per share price of \$18.36 which was the closing price of PacWest's common stock on Monday, August 24, 2009. In addition to the issuance of the common shares, PacWest issued to each investor two warrants exercisable for common shares worth up to an additional \$50 million in the aggregate with an exercise price of \$20.20 per share, or 110% of the price per share at which the initial \$50 million was sold. The Series A warrants had a six month term and originally expired on March 1, 2010; such warrants were exercised on March 1, 2010 for a total of \$27.2 million in cash and we issued 1,348,040 shares of common stock. The net proceeds from the warrant exercises totaled \$26.6 million after expenses. The 1,361,657 Series B warrants issued in August 2009 with a strike price of \$20.20 expired in August 2010 without being exercised. The common shares were sold and the warrants were issued under our \$150 million shelf registration statement, which became effective in June 2009, but was subsequently terminated upon the effective declaration of our \$350 million shelf registration statement on January 8, 2010.

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 18 STOCKHOLDERS' EQUITY (Continued)

On January 14, 2009, we issued in a private placement to CapGen Capital Group II LP 3,846,153 PacWest common shares at \$26 per share for total cash consideration of approximately \$100 million. CapGen Capital Group II LP has registered as a bank holding company and as a result of the investment it owned approximately 11% of PacWest outstanding common stock, excluding unvested restricted stock, as of December 31, 2010.

Subsequent to the May 2008 change of our state of incorporation to Delaware, the Company now records treasury shares for shares surrendered to the Company resulting from statutory payroll tax obligations arising from the vesting of restricted stock. During 2010, the Company purchased 94,666 treasury shares at a weighted average price of \$19.34 per share. During 2009, the Company purchased 100,770 treasury shares at a weighted average price of \$17.62 per share. During 2008, the Company purchased 12,360 treasury shares at a weighted average price of \$20.78 per share.

NOTE 19 DIVIDEND AVAILABILITY AND REGULATORY MATTERS

Holders of Company common stock are entitled to receive dividends declared by the Board of Directors out of funds legally available under state law governing the Company and certain federal laws and regulations governing the banking and financial services business. Our ability to pay dividends to our stockholders is subject to the restrictions set forth in Delaware General Corporation Law and certain covenants contained in the indentures governing trust preferred securities issued by us or entities that we have acquired. Notification to the Federal Reserve Bank is also required prior to our declaring and paying dividends on common stock during any period in which our quarterly net earnings is insufficient to fund the dividend amount. In such circumstances, we may not pay a dividend should the FRB object until such time as we receive approval from the FRB or no longer need to provide notice under applicable regulations.

It is possible, depending upon the financial condition of the Bank, and other factors, that the FRB, the FDIC or the California Department of Financial Institutions ("DFI"), could assert that payment of dividends or other payments is an unsafe or unsound practice. Pacific Western is subject to restrictions under certain federal and state laws and regulations governing banks which limit its ability to transfer funds to the holding company through intercompany loans, advances or cash dividends. Dividends paid by state banks such as Pacific Western are regulated by the DFI under its general supervisory authority as it relates to a bank's capital requirements. A state bank may declare a dividend without the approval of the DFI as long as the total dividends declared in a calendar year do not exceed either the retained earnings or the total of net earnings for three previous fiscal years less any dividend paid during such period. During 2008, PacWest received dividends of \$106.0 million from the Bank. For the foreseeable future, further dividends from the Bank to the Company will require DFI approval.

PacWest, as a bank holding company, is subject to regulation by the Board of Governors of the Federal Reserve System under the Bank Holding Company Act of 1956, as amended. The Federal Deposit Insurance Corporation Improvement Act of 1991 required that the federal regulatory agencies adopt regulations defining capital tiers for banks: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 19 DIVIDEND AVAILABILITY AND REGULATORY MATTERS (Continued)

quantitative measures of the Company's and the Bank's assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of total and Tier I capital to risk-weighted assets, and of Tier I capital to average assets ("leverage ratio"). Tier 1 Capital includes common stockholders' equity, trust preferred securities, less goodwill and certain other deductions (including a portion of servicing assets and the unrealized net gains and losses, after taxes on securities available for sale). Total risk-based capital includes Tier 1 capital and other items such as subordinated debt and the allowance for credit losses. Both measures are stated as a percentage of risk-weighted assets, which are measured based on their perceived credit risk and include certain off-balance sheet exposures, such as unfunded loan commitments and letters of credit. The Company is also subject to a leverage ratio requirement, a non risk-based asset ratio, which is defined as Tier 1 Capital as a percentage of average assets, adjusted for goodwill and other non-qualifying intangibles and other assets.

Bank holding companies considered to be "adequately capitalized" are required to maintain a minimum total risk-based capital ratio of 8% of which at least 4.0% must be Tier 1 capital and a minimum leverage ratio of 4.0%. Bank holding companies considered to be "well capitalized" must maintain a minimum risk-based capital ratio of 10.0% of which at least 6.0% must be Tier 1 capital and a minimum leverage ratio of 5%. As of December 31, 2010, the most recent notification to the regulatory agencies, the Company and the Bank are each "well capitalized" under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that management believes have changed the Company's or any of the Bank's categories.

Management believes, as of December 31, 2010, that we have met all capital adequacy requirements to which we are subject.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 19 DIVIDEND AVAILABILITY AND REGULATORY MATTERS (Continued)**

Actual capital amounts and ratios for the Company and the Bank as of December 31, 2010 and 2009 are presented in the following table. Regulatory capital requirements limit the amount of deferred tax assets that may be included when determining the amount of regulatory capital. Deferred tax asset amounts in excess of the calculated limit are deducted from regulatory capital. At December 31, 2010, such amount was \$51.0 million. No assurance can be given that the regulatory capital deferred tax asset limitation will not increase in the future. There was no limitation on the Bank's regulatory capital due to deferred tax assets.

	Actual		Well Capitalized Minimum Requirement		Excess Capital Amount
	Amount	Ratio	Amount	Ratio	
(Dollars in thousands)					
December 31, 2010

Table of Contents

PACWEST BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

NOTE 19 DIVIDEND AVAILABILITY AND REGULATORY MATTERS (Continued)

We have issued subordinated debentures to trusts that were established by us or entities we have acquired which, in turn, issued trust preferred securities, which totaled \$129.6 million and \$129.8 million at December 31, 2010 and 2009, respectively. These securities are currently included in our Tier I capital for purposes of determining the Company's Tier I and total risk-based capital ratios. The Board of Governors of the Federal Reserve System, which is the holding company's banking regulator, has promulgated a modification of the capital regulations affecting trust preferred securities. Although this modification was scheduled to be effective on March 31, 2009, the Federal Reserve postponed the effective date to March 31, 2011. At that time, the Company will be allowed to include in Tier I capital an amount of trust preferred securities equal to no more than 25% of the sum of all core capital elements, which is generally defined as shareholders' equity less goodwill, net of any related deferred income tax liability. The regulations currently in effect through December 31, 2010, limit the amount of trust preferred securities that can be included in Tier I capital to 25% of the sum of core capital elements without a deduction for goodwill. We have determined that our Tier I capital ratios would remain above the well-capitalized level had the modification of the capital regulations been in effect at December 31, 2010. We expect that our Tier I capital ratios will be at or above the existing well-capitalized levels on March 31, 2011, the first date on which the modified capital regulations must be applied.

Interest payments made by the Company to subordinated debentures are considered dividend payments by the Federal Reserve Bank. As such, notification to the Federal Reserve Bank is required prior to our intent to pay such dividends during any period in which our quarterly net earnings are not sufficient to fund the dividend due. Should the FRB object to payment of interest on the subordinated debentures we would not be able to make the payments until approval is received or we no longer need to provide notice under applicable regulations.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****NOTE 20 CONDENSED FINANCIAL INFORMATION OF PARENT COMPANY**

The parent company only condensed balance sheets as of December 31, 2010 and 2009 and the related condensed statements of net loss and condensed statements of cash flows for each of the years in the three-year period ended December 31, 2010 are presented below:
