There is a new way to receive your
Nuveen Fund updates faster than ever.
Nuveen now can link you with
electronic versions of the important
financial information we send you by regular mail.

By registering for online access via the internet, you will be able to view and save the Fund information you currently receive in the mail. This information can be stored on your computer and retrieved any time. In addition, you can select only the specific pages you want to view or print.

With this new service, you'll receive an e-mail notice the moment Fund reports are ready. This notice will contain a link to the report - all you have to do is

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

click your computer mouse on the internet address provided. You'll be saving time, as well as saving your Fund paper, printing and distribution expenses.

Registering for electronic access is easy and only takes a few minutes. (see box at right)

The e-mail address you provide is strictly confidential and will not be used for anything other than notifications of shareholder information.

And if you decide you don't like receiving your reports electronically, it's a simple process to go back to regular mail delivery.

SIGN UP TODAY--Here's what you need to do...

If your Nuveen Fund dividends are

PAID TO YOUR BROKERAGE ACCOUNT,

follow the steps outlined below:

- 1 Go to WWW.INVESTORDELIVERY.COM
- 2 Look at the address sheet that accompanied this report. Enter the personal 13-CHARACTER ENROLLMENT NUMBER imprinted near your name on the address sheet.
- 3 You'll be taken to a page with several options. Select the NEW ENROLLMENT-CREATE screen. Once there, enter your e-mail address (e.g. yourID@providerID.com), and a personal, 4-digit PIN of your choice. (Pick a number that's easy to remember.)
- 4 Click Submit. Confirm the information you just entered is correct, then click Submit again.
- 5 You should get a confirmation e-mail within 24 hours. If you do not, go back through these steps to make sure all the information is correct.
- 6 Use this same process if you need to change your registration information or cancel internet viewing.

If your Nuveen Fund dividends

COME DIRECTLY TO YOU FROM NUVEEN,

follow the steps outlined below:

- 1 Go to WWW.NUVEEN.COM
- 2 Select the Access Account tab. Select the E-REPORT ENROLLMENT section. Click on Enrollment Page.
- 3 You'll be taken to a screen that asks for your social security number and e-mail address. Fill in this information, then click Enroll.
- 4 You should get a confirmation e-mail within 24 hours. If you do not, go

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

back through these steps to make sure all the information is correct.

- 5 Use this same process if you need to change your registration information or cancel internet viewing.

SIDEBAR TEXT: "Your Nuveen Fund also features several characteristics that can help make it an essential part of your overall investment strategy."

Dear
Shareholder

I am pleased to have this opportunity to report on the recent performance of your Nuveen Fund. During the period covered by this report, your Fund continued to meet its primary objective of providing you with attractive monthly tax-free income from a portfolio of quality municipal bonds. Detailed information on your Fund can be found in the Portfolio Managers' Comments and Performance Overview sections later in this report. I urge you to take the time to read them.

In addition to providing you with steady tax-free income, your Nuveen Fund also features several characteristics that can help make it an essential part of your overall investment strategy. These include careful research, constant surveillance and judicious trading by Nuveen's seasoned portfolio management team, with every action designed to supplement income, improve Fund structure, better adapt to current market conditions or increase diversification. In turbulent times like these, prudent investors understand the importance of diversification, balance, and risk management, all attributes your Nuveen Fund can bring to your portfolio. With strong long-term performance achieved through consistent, disciplined professional management, your Nuveen Fund also illustrates the power of taking a long-term view toward financial growth and success.

Invest Well.Look Ahead.Leave Your Mark.

Today, perhaps more than ever, investors have the ability to make a lasting impact on their families and their world for generations to come. For more than 100 years, Nuveen has specialized in offering quality investments, such as the Nuveen Funds, to those seeking to accumulate and preserve wealth to establish a lasting legacy. Our mission continues to be to provide assistance to you and your financial advisor by offering investment services and products that can help you leave your mark. We thank you for continuing to choose Nuveen Investments as your partner as you work toward that goal.

Sincerely,

/S/ Timothy R. Schwertfeger

Nuveen Arizona, Michigan, Ohio and Texas Closed-End Exchange-Traded Funds
(NAZ, NFZ, NUM, NMP, NUO, NXI, NTX)

Portfolio Managers' Comments

Portfolio managers Mike Davern and Rick Huber examine national and state economic conditions, key investment strategies, and the performance of the Nuveen Municipal Closed-End Exchange-Traded Funds for Arizona, Michigan, Ohio, and Texas. With nine years of investment management experience, Mike has managed NAZ, NUM, NMP, and NTX since 1998; he added the Nuveen Arizona Dividend Advantage Fund (NFZ) upon its inception in January 2001. Rick, who has 16 years of investment experience, assumed portfolio management responsibility for NUO in March 2001. At that time, he also added the new Nuveen Dividend Advantage Fund for Ohio (NXI).

WHAT FACTORS HAD THE GREATEST INFLUENCE ON THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

The two major factors affecting the economy and the municipal market over the twelve months ended July 31, 2001, were the Federal Reserve's shift in interest rate policy from tightening to easing short-term interest rates and the general slowdown in economic growth. In January 2001, the Fed embarked on a series of rate cuts designed to stimulate the sluggish U.S. economy. During the first seven months of the year, the Fed announced six rate reductions totaling 275 basis points, bringing the target federal funds rate by the end of the reporting period to 3.75%, its lowest point since 1994. (Following the end of the period covered in this report, the Fed reduced the target rate by another 25 basis points on August 21, lowering the rate to 3.50%.) The consensus among market observers is that the Fed is prepared to continue easing rates as long as signs of a significant economic slowdown remain.

In the municipal market, these conditions, combined with tight municipal supply during 2000, helped many bonds perform well. As 2001 got underway, the Fed's cuts created a more favorable rate environment for both new municipal issuance and refundings, which totaled \$154.2 billion nationwide during the first seven months of the year, an increase of 39% over January-July 2000.

On the demand side, municipal bonds continued to be highly sought after by individual investors looking for diversification, income, and an alternative to a volatile stock market. During July 2001, the Investment Company Institute reported that net new inflows to municipal bond funds outpaced inflows to both equity and money market funds, reaching some of their highest levels since 1997. Institutional demand has also strengthened this year. In general, improving supply and strong demand helped to keep municipal bond prices higher than they were twelve months ago, while municipal yields were correspondingly lower. Nevertheless, we believe the municipal market continues to represent good value. As of July 31, 2001, long-term municipal yields were almost 98% of 30-year Treasury yields, compared with 101% in July 2000.

MIKE, HOW WAS THE MARKET ENVIRONMENT IN ARIZONA, MICHIGAN, AND TEXAS?

First of all, on a percentage basis, the increase in municipal issuance in each of these three states exceeded the national average for the first seven months of the year. During this period, Arizona issued \$2.64 billion in new bonds, up 70% over the first seven months of 2000, compared with an increase of 39% in the

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

broad municipal market. Municipal issuance in Michigan totaled \$4.93 billion, for an increase of 104%, while Texas, the second largest issuer in the nation, saw \$13.58 billion in new issuance, up 80% over the same period in 2000. Even with these increases, municipal supply failed to keep pace with the strong demand for bonds issued in these three states. This, in turn, helped to support and drive municipal prices higher, a trend we expect to continue.

In Arizona, despite slowing job growth in a number of sectors, the state economy grew at the third fastest rate in the nation, behind Nevada and Colorado. This trend is expected to persist, as Arizona's low business costs continue to attract service firms, especially financial companies, and retail distribution centers. The state also expects to see continued growth in the technology sector, although at a more moderate rate. Planned expansion by several high-tech firms should add

thousands of jobs to the already healthy economy of metropolitan Phoenix. As of July 2001, Arizona's unemployment rate was 4.7%, ahead of the current national average of 4.5% and up from 4.3% in July 2000. Even with the current pace of economic growth, per capita income levels in the state slightly lagged the national average, due in part to Arizona's large retiree population. However, the continued in-migration of these retirees, as well as younger residents, helped to provide support for the state's real estate market.

With its heavy reliance on manufacturing, especially automaking, the Michigan economy has been harder hit by the current economic slowdown. Weakness in the manufacturing sector nationwide and improved efficiency in the auto production process both have led to numerous job cuts in recent months. After record lows during the past two years, unemployment in Michigan spiked to 5.1% as of July 2001, above the current national average of 4.5%. Michigan's business costs were also higher than the national average, making the state less competitive in attracting new companies. However, the state has implemented aggressive economic development initiatives and plans to gradually phase out its single business tax. Michigan has also offset some job losses by continuing to diversify the state's manufacturing sector and bringing in more auto research and development firms. While the construction and service sectors are projected to lead the state's near-term employment growth, manufacturing is expected to remain the anchor of the Michigan economy. The state's strong budget performance over the past few years, combined with a low debt burden, led Moody's and Standard & Poor's to upgrade Michigan's credit rating to Aaa and AAA, respectively, last fall.

Weakness in the manufacturing and technology sectors also slowed job growth in Texas, but the state economy, which has become more diverse over the past decade, continued to show strong growth and is expected to outperform the national economy through the near term. The service sector currently accounts for 28% of the state's employment, while construction, fueled by strong housing starts, is the fastest growing sector of the Texas economy. Unemployment in the state rose over the past year to 5.4% in July 2001, up from 5.1% 12 months ago. Texas residents continued to cope with the financial aftermath of Hurricane Allison, which caused an estimated \$2 billion of damage in June, primarily in the Houston, Beaumont, and Galveston areas. Another subject of concern is the effect of the manufacturing slowdown on Mexico, since international trade is expected to remain a vital aspect of the Texas economy, driving the state's growth going forward.

RICK, WHAT ABOUT THE OHIO MARKET?

Municipal issuance was up in the Ohio market also, with the state's \$5.67 billion of new supply during January-July 2001 representing an 85% increase over the same period in 2000. Faced with one of the highest marginal income tax rates

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

in the nation, Ohio residents remained avid buyers of in-state paper. From an economic perspective, Ohio, like Michigan, continued to rely heavily on the manufacturing sector, including auto production. Again, as with its neighbor, slowdowns in this sector may place constraints on the state's economic growth over the near term. The effect of planned cutbacks in auto manufacturing would be especially pronounced in urban areas such as Cleveland, Columbus, Toledo, Dayton, and Youngstown. As of July 2001, Ohio's unemployment was 4.5%, up from 4.3% in July 2000 but on par with the current national average. While the Columbus and Cincinnati area have strong, diverse economies, the state economy as a whole is projected to continue to lag national growth due to slowing construction activity and labor shortages. Debate over school district funding remains a hotly debated issue in the state, as the Ohio Supreme Court considers the constitutionality of the state's funding formulas. The impact of these proceedings on the state's recently passed \$45 billion budget, including a \$1.4 billion increase in primary/secondary school spending, is still to be determined.

HOW DID THE NUVEEN FUNDS FOR THESE STATES PERFORM OVER THE PAST TWELVE MONTHS? For the year ended July 31, 2001, the five older Nuveen Closed-End Exchange-Traded Funds covered in this report - NAZ, NUM, NMP, NUO, and NTX - produced total annual returns on net asset value (NAV) as shown in the accompanying table. The annual returns for the

Lehman Brothers Municipal Bond Index¹ and the appropriate Lipper Peer Groups² are also presented.

	MARKET YIELD	TOTAL RETURN ON NAV	LEHMAN TOTAL RETURN ¹	LIPPER AVERAGE ²
	7/31/01	1 YEAR ENDED 7/31/01	1 YEAR ENDED 7/31/01	1 YEAR ENDED 7/31/01
		TAXABLE- EQUIVALENT ³		
NAZ	5.22%	7.91%	9.74%	10.08%
NFZ	5.37%	8.14%	NA	-
NUM	5.72%	8.60%	11.90%	10.08%
NMP	5.51%	8.29%	13.61%	10.08%
NUO	5.36%	8.31%	9.85%	10.08%
NXI	5.63%	8.73%	NA	-
NTX	5.91%	8.50%	12.74%	10.08%

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Fund in this report.

Over the past twelve months, the combination of tight municipal supply in 2000, an end to the Fed's interest rate increases, and generally favorable market technicals created a positive total return environment for municipal bonds. The Funds' participation in the market's gains is reflected in the total returns on NAV listed in the previous table.

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

Between July 31, 2000, and July 31, 2001, the yield on the Bond Buyer 25 Revenue Bond Index fell from 5.85% to 5.40%. In this environment of falling yields (and rising bond values), funds with longer durations⁴ would be expected to perform well. As of July 31, 2001, the durations of NAZ, NUM, NMP, and NTX ranged from 8.35 to 9.77, compared with 7.53 for the unleveraged Lehman Brothers Municipal Bond Index, while NUO's duration was 6.61. The relative performance of these five Funds was also influenced by differences in structure, including the percentage of their portfolios that is callable in the near term, as well as individual holdings. For example, the Funds' holdings of high-coupon bonds have helped them continue to provide attractive market yields, but, as these bonds approach their call dates, their short durations have affected the performance of the Funds' total returns on NAV. The two new Funds - NFZ and NXI - had durations of 13.83 and 12.91, respectively, which we believe is typical of newly established Funds. Over time, we plan to bring the durations of these two Funds more in line with other Nuveen Funds.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

All of these Funds use leverage as a way to potentially enhance the dividends paid to common shareholders. This benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R), shareholders. For example, declining short-term rates can enable the Funds to adjust the amount of income they pay to preferred shareholders, which can produce benefits for common shareholders.

During the year ended July 31, 2001, steady or falling short-term interest rates, combined with good portfolio structure, helped to support the income streams of NAZ and NUM. In addition, the lower short-term rates that resulted from the Fed easing during the first seven months of 2001 enabled us to increase the dividends of NAZ in both March and June 2001 and NTX in June 2001. (NTX had previously experienced a dividend cut in December 2000.) As of July 31, 2001, NAZ and NTX had offered shareholders 14 and 8 consecutive months of steady or increasing dividends, respectively, while NUM had provided 14 consecutive months of stable income. For NMP and NUO, however, the relatively higher short-term interest rate environment that prevailed during the last half of 2000 ultimately led to dividend cuts in each Fund in December 2000.

Regarding the two newer Funds, NFZ was launched in January 2001 and began paying dividends in April, while NXI, which was introduced in March 2001, paid its first dividends in June. Both Funds are currently providing very attractive levels of monthly tax-free income to their shareholders.

In coming months, the lower rates offered by municipal securities with shorter maturities could potentially continue to benefit the Funds' dividends by reducing the amount the Funds pay their MuniPreferred shareholders. This, in turn, could leave more Fund earnings to support common share dividends. However, this trend could be offset by the effect of bond calls on the higher-yielding securities held by these portfolios. The level of short-term rates, the number of bond calls, and the interest rates at which we can reinvest the proceeds of any calls will all influence the dividends of these Nuveen Funds over the next twelve months.

- 1 The Funds' performances are compared with that of the national Lehman Brothers Municipal Bond Index, an unleveraged index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of the Nuveen Arizona, Ohio, and Texas Funds are compared with the average annualized return of the 19 funds in the Lipper Other States Municipal Debt Funds category, while the returns of the Michigan

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

Funds are compared with the average return of the 6 funds in the Lipper Michigan category. Fund and Lipper returns assume reinvestment of dividends.

- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 30.5% plus the applicable state income tax rate. The combined federal and state tax rates used in this report are as follows: Arizona 34%, Michigan 33.5%, and Ohio 35.5%. Because Texas has no state income rate, NTX's taxable-equivalent yield is based on the federal income tax rate of 30.5%.
- 4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. Unless otherwise noted, references to duration in this commentary are intended to indicate Fund duration.

During the past year, as the stock market remained volatile and the bond market continued to perform well, many investors turned to tax-free fixed-income investments as a way to add balance to their portfolios and reduce overall risk. As a result, the share prices of the five older Nuveen Funds improved (see the charts on the individual Performance Overview pages). As investors recognized the opportunity offered by these Funds, increased demand caused the discounts (share price below NAV) on NMP and NTX to narrow significantly over the past 12 months, while the discount on NUM moved to a slight premium (share price above NAV). Both NAZ and NUO continued to trade at premiums. The two newer Funds also benefited from strong demand and, as of July 31, 2001, were trading at prices higher than their IPO (initial public offering) prices earlier this year.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE NUVEEN FUNDS DURING THE YEAR ENDED JULY 31, 2001?

As evidenced by their twelve-month total returns on NAV, the five older Nuveen Funds were generally well structured going into this period. Despite the tight supply of new municipal issuance during 2000, the Funds continued to meet their goal of keeping assets fully invested and working for shareholders. As issuance became more plentiful in 2001, we focused on finding bonds with the potential to strengthen the Funds' long-term dividend-payment capabilities, enhance call protection, and add value and diversification to the Funds' portfolios.

Two major areas of concentration over the past twelve months involved positioning the Funds strategically for the next leg of the bond market cycle and working through the increased number of bond calls typically associated with the 10-year anniversary of a Fund's inception. In general, the five older Funds are defensively structured, which tended to somewhat constrain their performance over the past twelve months, especially as interest rates declined in 2001. However, we believe this structure will work well for the Funds as the economy regains strength.

In terms of bond calls, all five of the older Nuveen Funds reach the 10-year milestone between October 2001 and December 2002 and have already begun to experience increased call risk. Over the past twelve months, we took advantage of market conditions to substantially reduce the call exposure of these Funds. One of our goals in working through these calls was to reinvest proceeds in the most attractive bonds we could find that could support the Funds' dividends and extend call protection. In NUO, we managed to eliminate the Fund's call risk by gradually selling callable bonds as we found opportunities to enhance yield and

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

extend the Fund's duration.

As of July 31, 2001, all of the Nuveen Funds covered in this report offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 59% in NXI to 91% in NUO. Each Fund also had a portion of its assets invested in BBB and, in some cases, non-rated bonds. During the past few months, narrowing credit spreads benefited these lower-rated holdings, especially hospital bonds in the BBB and non-rated credit categories. In 1999 and 2000, credit spreads, or the difference in yield between higher-rated and lower-rated bonds, widened overall. As this trend began to reverse itself in the first quarter of 2001, lower-rated bonds generally appreciated in price. Twelve months ago, the spread between AAA and BBB hospital bonds was as much as 200 basis points, while the current spread is typically 80-90 basis points. This change is reflected in the performance of healthcare bonds during the first seven months of 2001, when they were the top sector in the municipal market.

Among the holdings benefiting from this trend were bonds issued by the Michigan State Hospital Finance Authority for Detroit Medical Center, one of top performing issues in the healthcare sector. These bonds were held by both NUM and NMP. In NTX, we added Baa3 bonds issued by Tom Green County for Shannon Health Systems, which have also performed well since our purchase. Among the BBB purchases we made for NAZ over the past year was a City of Glendale Industrial Development Authority issue for Midwestern University. In addition to good performance, these bonds enhanced the call protection of this Fund. We also took advantage of narrowing spreads to sell selected bonds into strong bids, which additionally benefited the Funds' performance. The ability to determine which bonds should be held for potential price appreciation and

which bonds should be sold illustrates the value added by Nuveen Research, which performed the credit research that enabled us to make these decisions.

Earlier in 2001, we introduced new Nuveen Dividend Advantage Municipal Funds for Arizona (NFZ) and Ohio (NXI). As of July 31, 2001, both Funds were fully invested and, in our opinion, working well for share-holders. In assembling NFZ's portfolio, we focused on quality bonds in the healthcare sector, a variety of tax obligation bonds, and some multifamily housing bonds that added attractive yields to the Fund. Our largest healthcare purchase was \$2.17 million of BBB rated Arizona Health Facilities Authority revenue bonds for Catholic Healthcare West. Because the supply of Arizona municipal paper was still relatively tight while we were assembling this Fund in early 2001, we also bought a number of Puerto Rico territorial bonds that we plan to replace with Arizona paper as we find better opportunities in the market.

The supply situation was better in the Ohio municipal market by the time we were investing for NXI, enabling us to put in place the credit quality structure and capture the spreads that we had targeted. In purchasing bonds for this portfolio, we found opportunities to buy bonds offering incremental yield, including some bonds issued by Puerto Rico and the Virgin Islands. These bonds also provide excellent total return potential, especially if supply tightens again and the demand for these types of bonds increases. In the healthcare sector, we purchased several issues that also fit these criteria, including \$2.5 million of Baa1 rated Miami County Upper Valley Medical Center bonds and \$2.0 million of Parma Community Hospital bonds rated A-. In coming months, we plan to watch for opportunities to sell the territorial bonds at good prices and replace them with Ohio paper offering both yield and total return potential. As of July 31, 2001, our three largest sector weightings were limited tax obligation, general obligation and healthcare bonds.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE NUVEEN FUNDS

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

IN PARTICULAR?

Overall, our outlook for the fixed-income markets during the next 12 months continues to be positive. Demand for tax-exempt municipal bonds is anticipated to remain strong, as investors look for ways to rebalance their portfolios and reduce potential risk. If interest rates continue to fall and the pace of refundings accelerates, new municipal issuance nationwide in 2001 could exceed \$250 billion. Following the lower levels of municipal supply in both 1999 and 2000, any year-over-year increase in 2001 should still result in supply-and-demand dynamics that support municipal market prices.

Looking specifically at these Nuveen Funds, our strategic approach to bond calls over the past year improved the call protection levels of the older Nuveen Funds for the remainder of 2001, with scheduled calls ranging from none in NAZ to 11% in NUM over the next five months. As previously mentioned, all five Funds will mark their 10-year anniversaries over the next 17 months, reaching the point of the bond market cycle typically associated with an increase in call exposure. In 2002 and 2003, these Funds could see bond calls affecting as much as 19% to 37% of their portfolios, depending on market interest rates during this time. Between now and the end of 2003, the newly established NFZ has 5% of its portfolio subject to calls, while NXI has 9% call exposure over this period.

We believe all of these positions are manageable, especially given the two-year timeframe, and we foresee no problems in working through these calls. While we cannot control the direction of interest rates, we continue to work to reduce the Funds' call exposure and to actively manage all of the Funds to mitigate the longer-term effects of the bond call process.

In general, we believe these Nuveen Funds are well positioned for the market environment of the next 12 months. As value-oriented investors, we plan to remain focused on ways we can add value for our shareholders, provide support for the Funds' dividends, and watch new issuance for opportunities to purchase the research-intensive credits that fully utilize Nuveen's expertise in this area. One of our priorities will be maintaining portfolio structure that strategically positions the Funds in the event of an economic recovery. In NUO specifically, we will also be looking for opportunities to make the Fund's duration more market-neutral. Overall, we believe these Nuveen Funds will continue to play an important role in investors' long-range financial programs, providing balance and diversification, attractive tax-free income, and quality investments.

1 Taxable-equivalent yield represents the yield on a taxable investment necessary to equal the yield of the Nuveen Fund on an after-tax basis. It is calculated using the current market yield and a federal income tax rate of 30.5%. The rate shown for federal and state highlights the added value of owning shares that are also exempt from state income taxes. It is based on a combined federal and state income tax rate of 34%.

2 The Fund also paid shareholders a capital gains distribution in December 2000 of \$0.0061 per share.

Financial Statements

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state funds (the "Funds") covered in this report and their corresponding exchange symbols are Nuveen Arizona Premium Income Municipal Fund, Inc. (NAZ), Nuveen Arizona Dividend Advantage Municipal Fund (NFZ), Nuveen Michigan Quality Income Municipal Fund, Inc. (NUM), Nuveen Michigan Premium Income Municipal Fund, Inc. (NMP), Nuveen Ohio Quality Income Municipal Fund, Inc. (NUO), Nuveen Ohio Dividend Advantage Municipal Fund (NXI) and Nuveen Texas Quality Income Municipal Fund (NTX). Arizona Premium Income (NAZ), Michigan Quality Income (NUM), Michigan Premium Income (NMP), Ohio Quality Income (NUO) and Texas Quality Income (NTX) are traded on the New York Stock Exchange while Arizona Dividend Advantage (NFZ) and Ohio Dividend Advantage (NXI) are traded on the American Stock Exchange. Prior to the commencement of operations of Arizona Dividend Advantage (NFZ) and Ohio Dividend Advantage (NXI), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company and the recording of the organization expenses (\$15,000) and their reimbursement by Nuveen Investments, also a wholly owned subsidiary of The John Nuveen Company.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state. The Funds are registered under the Investment Company Act of 1940 as closed-end management investment companies.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors/Trustees of the Funds may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At July 31, 2001, Texas Quality Income (NTX) had outstanding when-issued purchase commitments of \$2,443,251. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income is determined on the basis of interest accrued, adjusted for amortization of premiums and accretion of discounts on long-term debt securities.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its share holders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Funds. All monthly tax-exempt income dividends paid during the fiscal year ended July 31, 2001, have been designated Exempt Interest Dividends.

Notes to Financial Statements (continued)

Dividends and Distributions to Shareholders

Tax-exempt net investment income is declared monthly as a dividend and payment is made or reinvestment is credited to shareholder accounts after month-end. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set by the auction agent. The number of shares outstanding, by Series and in total, for each Fund is as follows:

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

	ARIZONA PREMIUM INCOME (NAZ)	ARIZONA DIVIDEND ADVANTAGE (NFZ)	MICHIGAN QUALITY INCOME (NUM)	MICHIGAN PREMIUM INCOME (NMP)	OHIO QUALITY INCOME (NUO)	OHIO DIVIDEND ADVANTAGE (NXI)
Number of shares:						
Series M	--	--	--	840	680	--
Series T	--	480	--	--	--	--
Series W	--	--	--	--	--	1,240
Series Th	1,200	--	3,200	1,400	1,400	--
Series Th2	--	--	--	--	1,000	--
Series F	--	--	560	--	--	--
Total	1,200	480	3,760	2,240	3,080	1,240

Effective March 16, 2001, Arizona Dividend Advantage (NFZ) issued 480 Series T, \$25,000 stated value Preferred shares.

Effective May 18, 2001, Ohio Dividend Advantage (NXI) issued 1,240 Series W, \$25,000 stated value Preferred shares.

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the fiscal year ended July 31, 2001.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments has agreed to pay all offering costs (other than the sales load) that exceed \$.03 per Common share for Arizona Dividend Advantage (NFZ) and Ohio Dividend Advantage (NXI). Arizona Dividend Advantage's (NFZ) and Ohio Dividend Advantage's (NXI) share of offering costs (\$45,873 and \$126,237, respectively) were recorded as a reduction of the proceeds from the sale of the common shares.

Costs incurred by Arizona Dividend Advantage (NFZ) and Ohio Dividend Advantage (NXI) in connection with their offering of Preferred shares (\$262,500 and \$452,250, respectively) were recorded as a reduction of the proceeds from the sale of the Preferred shares.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

Audit Guide

In November 2000, the American Institute of Certified Public Accountants (AICPA) issued a revised version of the AICPA Audit and Accounting Guide for Investment Companies (the "Guide"). The Guide is effective for annual financial statements issued for fiscal years beginning after December 15, 2000. It is not anticipated that the adoption of the Guide will have a significant effect on the financial statements.

Notes to
Financial Statements (continued)

6. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

Under the Funds' (excluding Arizona Dividend Advantage's (NFZ) and Ohio Dividend Advantage's (NXI)) investment management agreements with the Adviser, each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets of each Fund as follows:

AVERAGE DAILY NET ASSETS	MANAGEMENT FEE
For the first \$125 million	.6500 of 1%
For the next \$125 million	.6375 of 1
For the next \$250 million	.6250 of 1
For the next \$500 million	.6125 of 1
For the next \$1 billion	.6000 of 1
For the next \$3 billion	.5875 of 1
For net assets over \$5 billion	.5750 of 1

Under Arizona Dividend Advantage's (NFZ) and Ohio Dividend Advantage's (NXI) investment management agreements with the Adviser, each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets of each Fund as follows:

AVERAGE DAILY NET ASSETS	MANAGEMENT FEE
For the first \$125 million	.6500 of 1%
For the next \$125 million	.6375 of 1
For the next \$250 million	.6250 of 1
For the next \$500 million	.6125 of 1

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

For the next \$1 billion .6000 of 1
 For net assets over \$2 billion .5750 of 1
 =====

The Adviser has agreed to waive part of its management fees or reimburse certain expenses of Arizona Dividend Advantage (NFZ) in an amount equal to .30% of the average daily net assets for the period from the Fund's commencement of operations through January 31, 2006, .25% of the average daily net assets for the year ended January 31, 2007, .20% of the average daily net assets for the year ended January 31, 2008, .15% of the average daily net assets for the year ended January 31, 2009, .10% of the average daily net assets for the year ended January 31, 2010, and .05% of the average daily net assets for the year ended January 31, 2011. The Adviser has not agreed to reimburse Arizona Dividend Advantage (NFZ) for any portion of its fees and expenses beyond January 31, 2011.

The Adviser has agreed to waive part of its management fees or reimburse certain expenses of Ohio Dividend Advantage (NXI) in an amount equal to .30% of the average daily net assets for the period from the Fund's commencement of operations through March 31, 2006, .25% of the average daily net assets for the year ended March 31, 2007, .20% of the average daily net assets for the year ended March 31, 2008, .15% of the average daily net assets for the year ended March 31, 2009, .10% of the average daily net assets for the year ended March 31, 2010, and .05% of the average daily net assets for the year ended March 31, 2011. The Adviser has not agreed to reimburse Ohio Dividend Advantage (NXI) for any portion of its fees and expenses beyond March 31, 2011.

The fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Directors/Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser.

7. COMPOSITION OF NET ASSETS

We have audited the accompanying statements of net assets, including the portfolios of investments, of Nuveen Arizona Premium Income Municipal Fund, Inc., Nuveen Arizona Dividend Advantage Municipal Fund, Nuveen Michigan Quality Income Municipal Fund, Inc., Nuveen Michigan Premium Income Municipal Fund, Inc., Nuveen Ohio Quality Income Municipal Fund, Inc., Nuveen Ohio Dividend Advantage Municipal Fund and Nuveen Texas Quality Income Municipal Fund as of July 31, 2001, and the related statements of operations, changes in net assets and the financial highlights for the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of investments owned as of July 31, 2001, by correspondence with the custodian and brokers or other alternative procedures where broker confirmations were not available. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Edgar Filing: NUVEEN TEXAS QUALITY INCOME MUNICIPAL FUND - Form N-30D

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen Arizona Premium Income Municipal Fund, Inc., Nuveen Arizona Dividend Advantage Municipal Fund, Nuveen Michigan Quality Income Municipal Fund, Inc., Nuveen Michigan Premium Income Municipal Fund, Inc., Nuveen Ohio Quality Income Municipal Fund, Inc., Nuveen Ohio Dividend Advantage Municipal Fund and Nuveen Texas Quality Income Municipal Fund at July 31, 2001, and the results of their operations, changes in their net assets and financial highlights for the periods indicated therein in conformity with accounting principles generally accepted in the United States.
