The Fund invests primarily in debt securities issued by Ohio municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at June 30, 2011, 75.4% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.1% to 21.1% of total investments.

- Security (or a portion thereof) has been pledged to cover margin requirements on open financial futures contracts.
- Security has been issued as a leveraged residual interest bond. The stated interest rate represents the rate in effect at June 30, 2011.
- Security is subject to a shortfall agreement which may require the Fund to pay amounts to a counterparty in the event of a significant decline in the market value of the security held by the trust that issued the residual interest bond. In case of a shortfall, the maximum potential amount of payments the Fund could ultimately be required to make under the agreement is \$1,320,000. However, such shortfall payment would be reduced by the proceeds from the sale of the security held by the trust that issued the residual interest bond.

- Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be sold in certain transactions (normally to qualified institutional buyers) and remain exempt from registration. At June 30, 2011, the aggregate value of these securities is \$451,563 or 1.5% of the Fund s net assets applicable to common shares.
- (5) Security represents the municipal bond held by a trust that issues residual interest bonds.

					\$	(4,435)

The effective date represents the date on which the Fund and the counterparty to the interest rate swap contract begin interest payment accruals.

At June 30, 2011, the Fund had sufficient cash and/or securities to cover commitments under these contracts.

The Fund is subject to interest rate risk in the normal course of pursuing its investment objectives. Because the Fund holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To hedge against this risk, the Fund enters into interest rate swap contracts. The Fund also purchases and sells U.S. Treasury futures contracts to hedge against changes in interest rates.

At June 30, 2011, the aggregate fair value of derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) in an asset position and in a liability position and whose primary underlying risk exposure is interest rate risk was \$30,573 and \$18,009, respectively.

The cost and unrealized appreciation (depreciation) of investments of the Fund at June 30, 2011, as determined on a federal income tax basis, were as follows:

Aggregate cost	\$ 46,523,882
Gross unrealized appreciation Gross unrealized depreciation	\$ 1,576,390 (1,925,575)
Net unrealized depreciation	\$ (349,185)

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund s own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At June 30, 2011, the hierarchy of inputs used in valuing the Fund s investments, which are carried at value, were as follows:

			Level	
Asset Description	Level 1	Level 2	3	Total

Total	\$	(9,637)	\$	(8,372)	\$	\$	(18,009)
Futures Contracts Interest Rate Swaps	\$	(9,637)	\$	(8,372)	\$	\$	(9,637) (8,372)
Liability Description	¢.	(0.627)	¢		Ф	ф	(0.637)
Total	\$	26,636	\$	46,428,634	\$	\$	46,455,270
Futures Contracts Interest Rate Swaps	\$	26,636	\$	3,937	\$	\$	26,636 3,937
<b>Total Investments</b>	\$		\$	46,424,697	\$	\$	46,424,697
Tax-Exempt Investments	\$		\$	46,424,697	\$	\$	46,424,697

The Fund held no investments or other financial instruments as of September 30, 2010 whose fair value was determined using Level 3 inputs. At June 30, 2011, the value of investments transferred between Level 1 and Level 2, if any, during the fiscal year to date then ended was not significant.

For information on the Fund s policy regarding the valuation of investments and other significant accounting policies, please refer to the Fund s most recent financial statements included in its semiannual or annual report to shareholders.
