OPTION GRANTS IN LAST FISCAL YEAR

The following table sets forth information with respect to stock options granted during our fiscal year ended December 31, 2004, to each of the executive officers named in the Summary Compensation Table above. The percentage of total options granted to the Company's employees and directors in the last fiscal year is based on options granted to purchase an aggregate of 959,000 shares of Common Stock during fiscal 2004.

The amounts shown as Potential Realizable Value represent hypothetical gains that could be achieved for the respective options if exercised at the end of the option term. These gains are based on assumed rates of stock price appreciation of 5% and 10% compounded annually from the date the respective options were granted to their expiration date. The gains shown are net of the option exercise price, but do not include deductions for taxes or other expenses associated with the exercise. Actual gains, if any, on stock option exercises will depend on the future performance of the Common Stock, the optionee's continued employment through the option period and the date on

which the options are exercised. The 5% and 10% assumed annual rates of compounded stock price appreciation are mandated by rules of the SEC and do not represent the Company's estimate or projection of the future price of the Company's Common Stock.
