(Amounts in thousands, except per share data)

1. ORGANIZATION AND BASIS OF PRESENTATION

The accompanying unaudited financial statements of Comstock Holding Companies, Inc. and subsidiaries (Comstock or the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and in accordance with the instructions to Form 10-Q and Article 8 of Regulation S-X. Such financial statements do not include all of the information and disclosures required by GAAP for complete financial statements. In our opinion, all adjustments, consisting only of normal recurring adjustments, considered necessary for a fair presentation have been included in the accompanying financial statements. For further information and a discussion of our significant accounting policies other than discussed below, refer to our audited consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Comstock Holding Companies, Inc., incorporated in 2004 as a Delaware corporation is a multi-faceted real estate development and construction services company focused in the Washington, D.C. metropolitan area (Washington D.C., Northern Virginia and Maryland suburbs of Washington D.C.). The Company has substantial experience with building a diverse range of products including multi-family units, single-family homes, townhouses, mid-rise condominiums, high-rise multi-family condominiums and mixed-use (residential and commercial) developments. References in this Form 10-Q to Comstock, Company, we, our and us refer to Comstock Holding Companies, Inc. together in each case with our subsidiaries and any predecessor entities unless the context suggests otherwise.

The Company's Class A common stock is traded on the NASDAQ Capital Market (NASDAQ) under the symbol CHCI and has no public trading history prior to December 17, 2004.

For the three months ended March 31, 2014 and 2013, comprehensive income (loss) equaled net income (loss); therefore, a separate statement of comprehensive income (loss) is not included in the accompanying consolidated financial statements.

2. REAL ESTATE INVENTORIES

Real estate inventories consist of the following:

	March 31, 2014	December 31, 2013
Land and land development costs	\$ 25,198	\$ 26,805
Cost of construction (including capitalized interest and real estate taxes)	15,877	13,038
	\$ 41,075	\$ 39,843

In the three months ended March 31, 2014 and 2013, the Company sold three and four model home units, respectively, to third parties and concurrently executed market rate leasebacks of the units. The terms of the leasebacks provided for market rate rents ranging from \$2 to \$5 monthly over 6 to 12 month leases. The Company reviewed each transaction in accordance with the guidance in ASC 840-40, *Leases Sale-Leaseback Transactions*, and determined that as seller-lessee, the Company relinquished the right to *substantially* all of the remaining use of the property sold, retaining only a minor portion of use in the model homes leased back and the leases contained no prohibitive terms of continued involvement, therefore, the Company accounted for the sale and leaseback as separate transactions in accordance with the guidance. The sale of the model homes is included within Revenue-homebuilding in the accompanying consolidated statements of operations. The rental expenses related to the model home sale-leasebacks are capitalized to Real estate inventories in accordance with ASC 970-340-25, *Real Estate Project Costs*.

3. WARRANTY RESERVE

Edgar Filing: Comstock Holding Companies, Inc. - Form 10-Q

Warranty reserves for units settled are established to cover potential costs for materials and labor with regard to warranty-type claims expected to arise during the typical one-year warranty period provided by the Company or within the two-year statutorily mandated structural warranty period for condominiums. The warranty reserve is established at the time of closing, and is calculated based upon historical warranty cost experience and current business factors. This reserve is an estimate and actual warranty costs could vary from these estimates. Variables used in the calculation of the reserve, as well as the adequacy of the reserve based on the number of homes still under warranty, are reviewed on a periodic basis. Warranty claims are directly charged to the reserve as they arise.

Table of Contents

The following table is a summary of warranty reserve activity which is included in accounts payable and accrued liabilities:

	Three Months Ended March 31,	
	2014	2013
Balance at beginning of period	\$ 510	\$ 963
Additions	38	40
Releases and/or charges incurred	(34)	(19)
Balance at end of period	\$ 514	\$ 984

4. CAPITALIZED INTEREST AND REAL ESTATE TAXES

Interest and real estate taxes incurred relating to the development of lots and parcels are capitalized to real estate inventories during the active development period, which generally commences when borrowings are used to acquire real estate assets and ends when the properties are substantially complete or the property becomes inactive. A project becomes inactive when development and construction activities have been suspended indefinitely. Interest is capitalized based on the interest rate applicable to specific borrowings or the weighted average of the rates applicable to other borrowings during the period. Interest and real estate taxes capitalized to real estate inventories are expensed as a component of cost of sales as related units are sold.

The following table is a summary of interest and real estate taxes incurred and capitalized and interest and real estate taxes expensed for units settled:

	Three Months Ended March 31,	
	2014	2013
Total interest incurred and capitalized	\$ 530	\$ 465
Total real estate taxes incurred and capitalized	53	76
Total interest and real estate taxes incurred and capitalized	\$ 583	\$ 541
Interest expensed as a component of cost of sales	\$ 52	\$ 904
Real estate taxes expensed as a component of cost of sales	31	105
Interest and real estate taxes expensed as a component of cost of sales	\$ 83	\$ 1,009

When a project becomes inactive, its interest, real estate taxes and indirect production overhead costs are no longer capitalized but rather expensed in the period in which they are incurred. Following is a breakdown of the interest, real estate taxes and indirect costs related to inactive projects.

	Three Months Ended March 31,	
	2014	2013
Total interest incurred and expensed for inactive projects	\$	\$ 57
Total real estate taxes incurred and expensed for inactive projects	2	33
Total production overhead incurred and expensed for inactive projects		136
	\$ 2	\$ 226

5. INCOME (LOSS) PER SHARE

The weighted average shares and share equivalents used to calculate basic and diluted income per share for the three months ended March 31, 2014 and 2013 are presented in the accompanying consolidated statements of operations. Restricted stock awards, stock options and warrants for the three months ended March 31, 2014 are included in the diluted earnings per share calculation using the treasury stock method and average market prices during the period, unless the restricted stock awards, stock options and warrants would be anti-dilutive. As a result of net losses for the three months ended March 31, 2014, approximately 367 restricted stock awards, 277 stock options and 660 warrants were excluded from the computation of diluted earnings per share because their inclusion would have been anti-dilutive. For the three months ended March 31, 2013, approximately 144 stock options and 8 warrants were excluded from the computation of diluted earnings per share because their inclusion would have been anti-dilutive.

Table of Contents

The computation of basic and diluted shares outstanding is as follows:

	Three Months Ended March 31,	
	2014	2013
Computation of basic shares outstanding		
Weighted average common shares outstanding - basic	20,935	20,524
Computation of diluted shares outstanding		
Weighted average common shares outstanding - basic	20,935	20,524
Dilutive effect of restricted stock awards		527
Dilutive effect of stock options		193
Dilutive effect of warrants		473
 Weighted average common shares outstanding - diluted	 20,935	 21,717

6. SEGMENT DISCLOSURES

We operate our business through three segments: Homebuilding, Multi-family and Real Estate Services. We are currently focused on the Washington, D.C. area market.

For our Homebuilding operations, we develop properties with the intent that they be sold either as fee-simple properties or condominiums to individual unit buyers or as investment properties sold to private or institutional investors. Our for-sale products are designed to attract first-time, early move-up, and secondary move-up buyers. We focus on products that we are able to offer for sale in the middle price points within the markets where we operate, avoiding the very low-end and high-end products.

For our Multi-family segment we focus on projects ranging from approximately 75 to 200 units in locations that are supply constrained with demonstrated demand for stabilized assets. We seek opportunities in the multi-family rental market where our experience and core capabilities can be leveraged. We will either position the assets for sale when completed or operate the asset within our own portfolio. Operating the asset for our own account affords us the flexibility of converting the units to condominiums in the future.

Our Real Estate Services segment pursues projects in all aspects of real estate management including strategic planning, land development, entitlement, property management, sales and marketing, workout and turnaround strategies, financing and general construction. We are able to provide a wide range of construction management and general contracting services to other property owners.

The following disclosure includes the Company's three reportable segments of Homebuilding, Multi-family and Real Estate Services. Each of these segments operates within the Company's single Washington, D.C. reportable geographic segment.

Net income	942	120	1,062
Total assets	41,192	877	42,069
Depreciation and amortization	182		182
Interest expense	57		57

Table of Contents

The Company allocates sales, marketing, general and administrative expenses to the individual segments based upon specifically allocable costs and, in the absence of direct allocations, based upon its estimate of time allocable to the segment or based upon overall pro rata revenue generation.

7. INCOME TAX

The Company recorded valuation allowances for certain tax attributes and other deferred tax assets. Currently, sufficient uncertainty exists regarding the future realization of these deferred tax assets through future taxable income. If, in the future, the Company believes that it is more likely than not that these deferred tax benefits will be realized, the valuation allowances will be reversed. The Company has recorded a tax provision of \$74 for the three months ended March 31, 2014, based on an effective tax rate of 10%, related to statutory tax rates in the District of Columbia where the Company has no deferred tax benefit to offset the tax liability. No such provision was recorded for the three months ended March 31, 2013.

The Company currently has approximately \$118.5 million in federal and state NOLs, which based on current statutory tax rates represents approximately \$46 million in tax savings. If unused, these NOLs will begin expiring in 2028. Under Internal Revenue Code Section 382 (Section 382), if a change of ownership is triggered, the Company's NOL assets and possibly certain other deferred tax assets may be impaired. We estimate that as of March 31, 2014, the cumulative shift in ownership of the Company's stock would not cause an impairment of our NOL asset. However, if an ownership change were to occur, the Section 382 limitation would not be expected to materially impact the Company's financial position or results of operations as of March 31, 2014, because of the Company's full valuation allowance on its net deferred tax assets.

The Company has not recorded any accruals for tax uncertainties as of March 31, 2014 and 2013, respectively. We file U.S. and state and local income tax returns in jurisdictions with varying statutes of limitations. The 2010 through 2013 tax years remain subject to examination by federal and most state tax authorities that we are subject to.

8. COMMITMENTS AND CONTINGENCIES

Litigation

Currently, we are not subject to any material legal proceedings. From time to time, however, we are named as a defendant in legal actions arising from our normal business activities. Although we cannot accurately predict the amount of our liability, if any, that could arise with respect to legal actions pending against us, we do not expect that any such liability will have a material adverse effect on our financial position, operating results and cash flows. We believe that we have obtained adequate insurance coverage, rights to indemnification, or where appropriate, have established reserves in connection with these legal proceedings.

Letters of credit and performance bonds

The Company has commitments as a result of contracts entered into with certain third parties, primarily local governmental authorities, to meet certain performance criteria as outlined in such contracts. The Company is required to issue letters of credit and performance bonds to these third parties as a way of ensuring that the commitments entered into are met. The letters of credit and performance bonds issued in favor of the Company and/or its subsidiaries mature on a revolving basis, and if called into default, would be deemed material if assessed against the Company and/or its subsidiaries for the full amounts claimed. In some circumstances we have negotiated with our lenders in connection with foreclosure agreements for the lender to assume certain liabilities with respect to the letters of credit and performance bonds. We cannot accurately predict the amount of any liability that could be imposed upon the Company with respect to maturing or defaulted letters of credit or performance bonds. At March 31, 2014 and 2013, the Company had \$5.7 million and \$0.1 million in letters of credit, respectively, and \$0.8 million and \$1.0 million in performance and payment bonds, respectively, to third parties. We are required to maintain compensating balances in escrow accounts as collateral for certain letters of credit, which are funded upon settlement and release of units. The cash contained within these escrow accounts is subject to withdrawal and usage restrictions. As of March 31, 2014 and 2013, we had approximately \$152 and \$0, respectively, in these escrow accounts, which is included in Restricted cash in the consolidated balance sheets. No amounts have been drawn against the letters of credit or performance bonds.

Table of Contents**10. VARIABLE INTEREST ENTITY**

GAAP requires a variable interest entity (VIE) to be consolidated by the company which is the primary beneficiary. The primary beneficiary of a VIE is the entity that has both of the following characteristics: (a) the power to direct the activities of a VIE that most significantly impact the VIE's economic performance and (b) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. Entities determined to be VIEs, for which we are not the primary beneficiary, are accounted for under the equity method of accounting. Comstock's variable interests in VIEs may be in the form of (1) equity ownership, (2) contracts to purchase assets and/or (3) loans provided and or guaranteed to a VIE. We examine specific criteria and use judgment when determining if Comstock is the primary beneficiary of a VIE. Factors considered in determining whether we are the primary beneficiary include risk and reward sharing, experience and financial condition of other partner(s), voting rights, involvement in day-to-day capital and operating decisions and contracts to purchase assets from VIEs.

13. FAIR VALUE DISCLOSURES

The carrying amounts reported in the consolidated balance sheets for cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities are reasonable estimates of their fair values based on their short maturities.

The fair value of fixed and floating rate debt is based on observable market rates (Level 2 inputs). The following table summarizes the fair value of fixed and floating rate debt and the corresponding carrying value of fixed and floating rate debt as of:

	March 31, 2014	December 31, 2013
Carrying amount	\$ 30,507	\$ 29,968
Fair value	\$ 28,684	\$ 27,943

Fair value estimates are made at a specific point in time, based on relevant market information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Non-financial assets and liabilities include items such as real estate inventories and long lived assets that are measured at fair value when acquired and on a non recurring basis thereafter. Such fair value measurements use significant unobservable inputs and are classified as Level 3.

In the quarter ended September 30, 2012, management evaluated its strategic alternatives with respect to its real estate projects classified as held for sale, Eclipse and Penderbrook, with the objective of creating additional near term liquidity. Under net settlement procedures currently applicable to our outstanding restricted stock awards for employees, upon each settlement date and election by the employees, restricted stock awards are withheld to cover the required withholding tax, which is based on the value of the restricted stock award on the settlement date as determined by the closing price of our common stock on the trading day immediately preceding the applicable settlement date. The remaining amounts are delivered to the recipient as shares of our common stock. We settled 125 restricted stock awards in the three months ended March 31, 2014, of which, 38 restricted stock awards were net settled by withholding shares, which represented the employees' minimum statutory obligation for each such employee's applicable income and other employment taxes and remitted cash totaling of \$58 to the appropriate tax authorities. The amount remitted to the tax authorities for the employees' tax obligation to the tax authorities was reflected as a financing activity in the accompanying consolidated statements of cash flows. These shares withheld by us as a result of the net settlement election are not considered issued and outstanding, thereby reducing our shares outstanding used to calculate earnings per share.

Revenue homebuilding

Edgar Filing: Comstock Holding Companies, Inc. - Form 10-Q

At March 31, 2014, we had a total of 41 units in backlog to generate future revenue of \$18.5 million as compared to \$9.2 million from 21 units at March 31, 2013, resulting in 100% increase. The number of homes delivered for the three months ended March 31, 2014 was 19 as compared to 21 homes for the same period in the prior year. Average revenue per home delivered for the three months ended March 31, 2014 was \$412 compared to \$543 for the three months ended March 31, 2013. Revenue from homebuilding decreased by \$3.6 million to \$7.8 million for the three months ended March 31, 2014 as compared to \$11.4 million for the same period in the prior year as a result of the decrease in the number of homes and the mix of units settled. For the three months ended March 31, 2014, the Company settled 19 homes (10 units at Falls Grove, 8 units at The Hampshires and 1 unit at Eastgate) as compared to 21 units (2 units at Penderbrook, 8 units at Eclipse, 6 units at the Hampshires and 5 units at Eastgate) for the three months ended March 31, 2013. In addition, our homebuilding gross margin percentage for the three months ended March 31, 2014 decreased by 2.7% to 20.1%, as compared to 22.8% for the three months ended March 31, 2013. The decrease noted in revenue and margins was a result of the decrease in the number of homes and the mix of units settled, in addition to adverse weather conditions delaying development and construction activities as compared to prior year.

Table of Contents

Revenue other

Revenue-other decreased approximately \$38 to \$123 during the three months ended March 31, 2014, as compared to \$161 for the three months ended March 31, 2013. The decrease primarily relates to revenue from rental operations, as the number of rental units at Penderbrook and Eclipse continued to decline until all units were sold in the second quarter of 2013.

Cost of sales homebuilding

Cost of sales homebuilding for the three months ended March 31, 2014 decreased by \$2.5 million to \$6.3 million, as compared to \$8.8 million for the three months ended March 31, 2013. The unit mix and number of homes settled during the quarter accounted for the decrease in the aggregate cost of sales amount.

Cost of sales other

Cost of sales other decreased approximately \$128 to \$93 for the three months ended March 31, 2014 as compared to \$221 for the three months ended March 31, 2013. As a result of the continued absorption and sale of the condominium units at Penderbrook and Eclipse, the decline in the number of units used in rental operations resulted in a decrease in cost of sales other.

Impairment reversal

We evaluate all of our projects to the extent of the existence of any impairment indicators requiring evaluation to determine if recorded carrying amounts were recoverable by evaluating discount rates, sales prices, absorption and our analysis of the best approach to marketing our projects for sale. Due to a change to an individual unit retail sale model from our previous bulk sale disposition strategy for the Eclipse project, we reversed a previously recorded impairment charge of \$0.7 million during the three months ended March 31, 2013. There were no similar actions in the current year. See Note 13 to the consolidated financial statements for further discussions and the basis for the impairment reversal.

Sales and marketing

Sales and marketing expenses for the three months ended March 31, 2014 increased by \$0.1 million to \$0.5 million, as compared to \$0.4 million for the three months ended March 31, 2013. The increase in sales and marketing expenses over the same period in the prior year is directly attributable to increases in the number of active developments and marketing efforts.

General and administrative

General and administrative expenses for the three months ended March 31, 2014 increased \$0.3 million to \$1.9 million, as compared to \$1.6 million for the three months ended March 31, 2013. The increase in general and administrative expenses over the three month period is attributable to additional full time employees.

Income taxes

The Company recorded a tax provision of \$74 for the three months ended March 31, 2014, based on an effective tax rate of 10%, related to statutory tax rates in the District of Columbia where the Company has no deferred tax benefit to offset the tax liability. No such provision was recorded for the three months ended March 31, 2013.

Liquidity and Capital Resources

We require capital to operate, to make deposits on new deals, to purchase and develop land, to construct homes, to fund related carrying costs and overhead and to fund various advertising and marketing programs to generate sales. These expenditures include payroll, community engineering, entitlement, architecture, advertising, utilities and interest as well as the construction costs of our homes. Our sources of capital include, and will continue to include, funds derived from various secured and unsecured borrowings, project level equity raises cash flow from operations, which includes the sale and delivery of constructed homes, rental apartment projects, finished and raw building lots and the sale of equity and debt securities.

The Company is involved in ongoing discussions with lenders and potential equity investors in an effort to provide additional growth capital to fund various new business opportunities. We are anticipating that through a combination of current available cash on hand, the additional cash

from settlement proceeds, proceeds from debt, project level raises and the cash generated from settlements at our new communities currently under development, the Company will have sufficient financial resources to service its debt, invest in new projects, and cover its overhead/working capital through the next 12 months.

Credit Facilities

We have outstanding borrowings with various financial institutions and other lenders that have been used to finance the acquisition, development and construction of real estate property. The Company has generally financed its development and construction activities on a single or multiple project basis so it is not uncommon for each project or collection of projects the Company develops and builds to have a separate credit facility. Accordingly, the Company typically has had numerous credit facilities and lenders. Refer to Note 12 in the consolidated financial statements for details of our credit facilities and maturities of all of our borrowings.

Cash Flow

Net cash used in operating activities was \$2.6 million for the three months ended March 31, 2014. This represents a decrease from the net cash provided by operating activities of \$4.1 million for the three months ended March 31, 2013. The change is primarily attributable to the increase in cash out flow for real estate inventories as the Company continues to invest in new projects and positions itself for growth, as well as the impact of adverse weather conditions delaying the development of projects and the related construction of homes for sale.

Net cash used in financing activities was \$1.8 million for the three months ended March 31, 2014, primarily attributable to the distributions made to non-controlling interest members including preferred returns. Net cash provided by financing activities was \$1.5 million for the three months ended March 31, 2013, primarily attributable to the proceeds from the Comstock VII private placement of \$7.0 million offset by \$5.4 million net repayment of notes payable.

Seasonality

Historically, the homebuilding industry experiences seasonal fluctuations in quarterly operating results and capital requirements. We typically experience the highest new home order activity in Spring and Summer, although this activity is also highly dependent on the number of active selling communities, timing of new community openings and other market factors. Since it typically takes four to six months to construct a new home, we deliver more homes in the second half of the year as Spring and Summer home orders convert to home deliveries. Because of this seasonality, home starts, construction costs and related cash outflows have historically been highest in the second and third quarters, and the majority of cash receipts from home deliveries occur during the second half of the year. We expect this seasonal pattern to continue over the long-term, although it may be affected by volatility in the homebuilding industry.

Evaluation of Disclosure Controls and Procedures

We have evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of March 31, 2014. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of March 31, 2014.

Limitations on the Effectiveness of Controls

We do not expect that our disclosure controls and internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

Changes in Internal Control

No change has occurred in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during the quarter ended March 31, 2014, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
