RCM STRATEGIC GLOBAL GOVERNMENT FUND  
FUND HIGHLIGHTS

-----  
Annual Financial Information

RCM Strategic Global Government Fund, Inc. ("RCS" or the "Fund") is a closed-end, global bond fund. The primary objective of RCS is to generate a level of income that is higher than that generated by high-quality, intermediate-term U.S. debt securities. As a secondary objective, RCS seeks to maintain volatility in the net asset value of the shares of the Fund comparable to that of high-quality, intermediate-term U.S. debt securities. In addition, the Fund seeks capital appreciation to the extent consistent with its other investment objectives.

The Fund invests at least 65% of its assets in government securities of the United States and other countries, under normal market conditions. The securities in the investment portfolio currently have an average credit-quality rating of AA and have effective maturities generally between 3 and 10 years.

FISCAL YEAR*	JANUARY 31,		
	2002	2001	2000
Total investment income	\$33,833	\$32,962	\$34,713

RCM STRATEGIC GLOBAL GOVERNMENT FUND  
CHAIRMAN'S LETTER TO STOCKHOLDERS  
-----

[LUKE KNECHT PHOTO]

February 7, 2002

Dear Stockholders;

2001 was an eventful year for the RCM Strategic Global Government Fund, Inc. (the "Fund" or "RCS"). Once again, the Fund was able to deliver strong investment results to stockholders as reflected in a rise in the Fund's stock price from \$10.35 to \$10.90 and payment of total dividends of \$0.998 per share. A second major accomplishment during the year was the completion of the merger between the Fund and the Dresdner RCM Global Strategic Income Fund, Inc. ("DSF"), resulting in an increase of \$40,985,851 in the net assets of the Fund. As discussed more fully below, I believe the completion of this merger will provide stockholders a number of benefits in the years ahead. Finally, the acquisition of Dresdner Bank by Allianz AG in August of 2001 led to a change in the organization of Dresdner RCM's fixed income investment group. As a result, effective February 8, 2002, responsibility for the management of the Fund changed from Dresdner RCM Global Investors LLC ("Dresdner RCM" or the "investment adviser") to its affiliate Pacific Investment Management Company LLC ("PIMCO"). As more fully explained below, PIMCO is a premier bond management firm that I strongly believe is fully capable of maintaining the successful record of the Fund.

Interest rates fell across the maturity spectrum in 2001 as the Federal Reserve aggressively lowered short-term interest rates in an attempt to reinvigorate the slowing United States economy. In total, the Federal Reserve lowered short rates 11 times between January 1, 2001 and December 31, 2001. The impact of these actions on the bond market was greatest in the short and intermediate part of the yield curve. For example, the two-year treasury note's yield fell from 5.09% to 3.02% in the course of the calendar year while the ten-year treasury note's yield declined from 5.11% to 5.05%. This overall decline in yields caused the prices of most fixed income securities to rise, resulting in a favorable return for the bond market as a whole.

RCM STRATEGIC GLOBAL GOVERNMENT FUND  
CHAIRMAN'S LETTER TO STOCKHOLDERS  
-----

This favorable environment for bonds was reflected in another strong year for the Fund, which produced a 10.23% return on net asset value. This return resulted from an increase in net asset value ("NAV") from \$11.14 to \$11.20 per share at fiscal year-end in combination with payment of \$0.998 in dividends. The overall Fund return of 10.23% was again in excess of the 7.55% return of the broad bond market as measured by the Lehman Brothers Aggregate Bond Index. The favorable results reflect the investment adviser's success in managing interest rate, yield curve and sector exposures within the Fund. In a year marked by numerous high-profile bankruptcies and credit problems, I am pleased to report

## Edgar Filing: RCM STRATEGIC GLOBAL GOVERNMENT FUND INC - Form N-30D

that the Fund's emphasis on government and government-related issuers mitigated the impact of such events. The favorable environment for bonds, the high credit quality profile of the Fund and its stable dividend policy are all factors that I believe resulted in the share price of the Fund increasing from \$10.35 to \$10.90 during the course of this fiscal year. When combined with dividends received, the total return on market value for those holding Fund shares during the entire fiscal year was 15.46%.

For the twelve months ended January 31, 2002, the Fund earned total gross investment income of \$33,833M or \$1.10 per share. This is up from gross earnings in the prior fiscal year when the Fund earned \$32,962M or \$1.08 per share. The primary reason income was higher in this fiscal year was the sharp decline in short-term interest rates. While lower rates reduced the earning rate on some Fund assets such as mortgage related securities, it also positively impacted the Fund's effective cost of borrowing. The net effect was an increase in the income derived from financed mortgage holdings (mortgage TBA's). In the past fiscal year, these holdings contributed \$6,535M in income versus \$2,654M in the prior fiscal year. Net investment income for the period was \$29,780M or \$0.97 per share versus \$29,102M or \$0.95 per share in the prior fiscal year. Please refer to the MD&A for a full discussion of each of the Fund's principal areas of focus.

For the sixth consecutive year, the Fund was able to produce income in excess of the \$.074 monthly dividend for the fiscal year and consequently was able to pay a special dividend of \$0.11 at year-end. This brought total dividend distributions for the fiscal year to \$0.998 versus \$1.014 in the prior fiscal year. In reviewing the data on the inside front cover of this report, you will note that total dividends again exceeded the reported net investment income per share. This is because the Fund is required to pay out at least 98% of taxable income as defined by the IRS and that amount was again higher than the net investment income per-share figure reported of \$0.97. Based on the beginning NAV of \$11.14 per share, the \$0.998 in dividends paid

2

RCM STRATEGIC GLOBAL GOVERNMENT FUND  
CHAIRMAN'S LETTER TO STOCKHOLDERS  
-----

represented a distribution rate of about 9.0% which was again well in excess of the yield on high-quality intermediate maturity debt obligations.

As noted above, two other significant events occurred during the Fund's fiscal year, one of which was the completion of the merger of DSF into the Fund. The merger was effective January 18, 2002 and resulted in the issuance of 3,669,726 additional RCS common shares with a value of \$40,985,851. Immediately following the merger, the total assets of the Fund were \$381,805,869. The Fund's Board of Directors supported this merger as being in the best interests of stockholders for a variety of reasons. Most immediately, the larger asset base of the Fund following the merger was projected to result in a lower overall expense structure going forward. Other projected benefits included larger average trading volume in the Fund's shares. The true impact of the merger will only be apparent over time.

The other significant event to report is the acquisition of Dresdner Bank, the parent of Dresdner RCM, by Allianz AG. The combination of these two organizations resulted in duplicative fixed income portfolio management capabilities in the combined firm. A number of options to resolve the redundancies were explored by Dresdner RCM and the Board of Directors of the Fund. In December of 2001, Dresdner RCM reached a final decision to discontinue the fixed income portfolio management operations in its San Francisco office and to seek client approval to have PIMCO assume management of all fixed income

## Edgar Filing: RCM STRATEGIC GLOBAL GOVERNMENT FUND INC - Form N-30D

client portfolios. After carefully considering the options, the Board unanimously approved PIMCO as the successor manager to the Fund. I believe that in appointing PIMCO as the successor manager, the Board has selected an adviser with a strong track record in management of other closed-end funds and demonstrated expertise in each of the Fund's principal areas of focus: U.S. mortgage-backed securities, emerging market debt and developed foreign market debt. The Fund has entered into a 150-day interim agreement with PIMCO to act as the Fund's investment manager, with the intention of seeking stockholder approval of a longer-term agreement at this year's annual meeting. The Board also approved an administrative service agreement pursuant to which PIMCO replaced State Street Bank and Trust Company as the Fund's administrator. Full details of the terms under which PIMCO will provide services to the Fund will be forthcoming in proxy material. However, it is worth noting that the asset-based fee PIMCO will charge to manage the Fund's assets going forward is approximately 8 basis points lower than the fee charged under the Fund's prior contract with Dresdner RCM.

3

### RCM STRATEGIC GLOBAL GOVERNMENT FUND CHAIRMAN'S LETTER TO STOCKHOLDERS

-----

This will be my last letter to you as Chairman of the Fund. Consistent with PIMCO's assumption of duties as the Fund's investment adviser, Mr. Brent R. Harris, a Managing Director of PIMCO with extensive experience in bond fund management, will be assuming my role as Chairman. On behalf of the Board, I thank stockholders for your continued interest in the Fund. It was indeed an eventful year in which the groundwork was laid for the future continued success of the Fund. I also wish to thank all those involved whose diligence and expertise again provided stockholders with a high-quality, steady income stream. As always, your thoughts and comments are welcome and should be directed to PIMCO's shareholder services group at 1-800-927-4648.

[/s/ Luke Knecht]

### RCM STRATEGIC GLOBAL GOVERNMENT FUND, INC. MANAGER'S DISCUSSION AND ANALYSIS

-----

**MARKET REVIEW** There is little doubt that 2001 will be remembered as one of the more volatile investing environments in recent memory. We are pleased that, despite the many challenges presented during the year, the RCM Strategic Global Government Fund, Inc. ("RCS" or the "Fund") again posted positive absolute returns for the fiscal year ended January 31, 2002. Bonds were the asset class of choice during much of the period in large part due to the ongoing deterioration of the U.S. and global economies beginning in 2000. During the fiscal period, the Fund's net asset value ("NAV") per share increased by 0.54%, and the Fund paid dividends equal to 8.91% of NAV for a total return on NAV of 10.23%. For comparison purposes, stocks (as measured by the S&P 500) returned a dismal -16.15% for the same period, while the Lehman Aggregate Bond Index Index posted a 7.55% total return.

The United States economy continued its slide which started in 2000. The National Bureau of Economic Research declared that the United States economy has been in a recession since March 2001, although the current recession doesn't fit

the widely understood description of two consecutive quarters of negative growth. Initial fourth quarter Gross Domestic Product ("GDP") was reported at 0.2% versus -1.3% for the third quarter. Other evidence supported the claim of recession. Manufacturing indicators dipped to levels not seen since the 1990 recession. The National Association of Purchasing Managers Index (NAPM, now called ISM) fell to 41.2 (levels below 50 indicate contraction), and is just now beginning to recover. The labor market exhibited weakness, with the unemployment rate hitting 5.8%, a seven-year high, and weekly jobless claims, though generally volatile, topping 500,000 during October (the highest level since 1992), then falling below 400,000, during the Fund's fourth quarter, for the first time since August 2001. The terrorist attacks of September 11 exacerbated the deteriorating economic situation with an abrupt change in investor and business sentiment. Consumer confidence fell sharply, followed by increased job layoffs and sharply reduced profit expectations. Investors fled corporate bonds on concerns that the threat of terrorism would squash consumer spending and make it harder for companies to service their debt. Likewise, investors sold equities in favor of high quality government-backed securities, particularly treasuries. It was only midway during the fourth quarter that investors began to find signs of hope and rebirth in the economy. The manufacturing sector showed signs of bottoming during the quarter, as NAPM climbed back to levels last seen in October 2000, while non-manufacturing NAPM finally reached above the key level of 50 (which indicates expansion). Confidence indicators staged a small rebound, as both the Conference Board and the University of Michigan surveys improved during the quarter. Consumer spending remained resilient, as retail sales growth improved during the

5

RCM STRATEGIC GLOBAL GOVERNMENT FUND, INC.  
MANAGER'S DISCUSSION AND ANALYSIS

-----  
fourth quarter from depressed post September 11 levels. Consumers bought autos (due to successful incentive programs) and real estate (which bounced back especially in December after depressed levels earlier in 2001). Additionally, the need for inventory replenishment increased at an opportune time.

Against this backdrop of slowing growth and rising unemployment, the Federal Reserve aggressively reduced short-term interest rates during the entire fiscal year in an effort to cushion the severity of the downturn. In total, the Federal Reserve lowered the targeted Federal Funds rate 11 times during this cycle, by a total of 475 basis points to the current level of 1.75%, where it stood as of January 31, 2002. For reference, this is the lowest Federal Funds rate in the last 40 years. In the aftermath of the September 11 terrorist attacks, the Federal Reserve and other central banks around the world intervened to ensure proper liquidity in financial markets and to try to stem the effects of the attacks on confidence and to preempt future weakness in global markets.

RCS FUND REVIEW As we have indicated in past reports, RCS continues to rely on three primary bond market segments to meet stockholder income objectives: United States domestic markets, developed foreign markets, and emerging markets.

Once again, United States dollar investments constituted the majority of the Fund's holdings and were primarily concentrated in mortgage pass-through securities. As discussed previously, the United States bond market performed well during the review period. As the Federal Reserve continued to ease interest rates throughout the period, bond yields generally decreased, particularly shorter maturities. In a declining rate environment, mortgages often lag behind treasuries because of the homeowners' option to prepay or refinance their mortgages to obtain a more attractive rate. The yield curve continued to steepen, significantly improving the attractiveness of mortgages to a wide range of buyers. Demand for mortgages overwhelmed record levels of supply leading to

slight outperformance for this sector versus the broader market during the review period. The only major change in the mortgage component of the Fund's portfolio during the year was the purchase of slight premium-coupon mortgage bonds. The superb risk adjusted yield of slight premium coupon mortgages relative to discount and premium coupon mortgages was the catalyst for the restructuring. This strategy was the primary contributor to income growth in the Fund. TBA's continued to comprise a significant piece of the Fund's mortgage passthrough component. Mortgage TBA's are financed mortgage passthrough transactions with extended settlements. These types of transactions allow RCS to

6

RCM STRATEGIC GLOBAL GOVERNMENT FUND, INC.  
MANAGER'S DISCUSSION AND ANALYSIS  
-----

earn the spread between the yield on the underlying mortgage securities and short-term interest rates. During the review period, the Fund continued its use of total return swaps on indices as an efficient means to gain exposure to investment-grade corporate and commercial mortgage-backed securities. This strategy allowed the Fund to diversify its holdings in these two sectors, as well as lock in the yield spreads on those securities versus treasuries. Because of the event risk inherent in corporate bonds, especially amid the economic environment over the last year, the Fund was well-positioned to remain insulated from credit-specific event risk by holding corporate and CMBS exposure via swaps.

The second primary strategy for RCS, developed foreign markets, took the form of interest-rate swaps during the period. Interest rate swaps are an efficient means to create and manage exposure to foreign markets without assuming currency risk. We continued to hold interest rate swaps in Switzerland and Japan because of the income advantage given the relative steepness of the two countries' yield curves.

The third strategy, emerging market debt, had a terrific, though volatile, year. The JP Morgan Emerging Market Bond Index Plus achieved a 12.2% return for the period. We pre-emptively and systematically reduced the Fund's exposure to Argentina upon seeing glimpses of future difficulties in the region. The Fund's position was reduced, from almost 20% of the emerging markets component at the beginning of the year to about 2% by the end of July, to 0% when the situation flared up in the fourth quarter of 2001. Thus, the emerging market debt in RCS had lower volatility and outperformed the broad emerging market indices. In addition, the emerging market segment of the portfolio remains very well diversified across 14 countries. During the period, we took advantage of market weakness to purchase higher rated credits in Mexico, China, Korea, Malaysia and India. Although less than 11.1% of the market value of the Fund is invested in emerging market debt, over 24.6% of the Fund's income was generated through this sector because of its attractive yields.

FINANCIAL LEVERAGE Financial leverage has been an integral part of Dresdner RCM's income and duration management strategies for RCS. Financial leverage results when the Fund purchases securities with borrowed funds or otherwise achieves a similar result using derivatives, such as interest rate swaps and mortgage TBA's. Such leveraged transactions are intended to allow RCS to earn the spread between the yield of the purchased security and the cost of the borrowing, usually a function of short-term interest rates. A financed transaction may thus increase fund income to the extent of the interest rate spread. However, if short-term interest

7

RCM STRATEGIC GLOBAL GOVERNMENT FUND, INC.

# Edgar Filing: RCM STRATEGIC GLOBAL GOVERNMENT FUND INC - Form N-30D

## MANAGER'S DISCUSSION AND ANALYSIS

-----

rates increase, that spread is likely to narrow and could even result in a negative spread. Further, when a fund's manager employs financial leverage in managing the fund's portfolio, the value of an investment in that fund will be more volatile and all other risks of investing tend to be compounded. In particular, the use of financed securities transactions increases the fund's overall duration risk (i.e., the risk of declining values due to increased interest rates), and, if the cost of the borrowing is variable, creates an increased sensitivity of the Fund to rising short-term interest rates. Stockholders of the Fund are thus exposed to greater risks than they would be if leverage were not employed, including the possibility that amounts available for distribution as dividends will decrease if the income derived from leveraged securities is not sufficient to cover the costs of the financing, as well as the likelihood of greater volatility in the net asset value and potentially greater volatility in the market value of Fund shares. A closed-end fund's use of leveraged transactions is limited by law.

To manage overall duration risk, RCS sells U.S. Treasury bonds on a forward commitment basis. RCS averaged 32.3 million in bonds sold forward during the period. At January 31, 2002, there were \$77.6 million in similar positions.

Financed mortgage-backed securities, "mortgage dollar rolls," contributed \$6.5 million in income, or 19.3% of the Fund's total income, in the annual period on average volume of \$311.1 million. The income contribution appears on the Statement of Operations as Fee Income. At January 31, 2002, there were \$350.4 million in mortgage dollar rolls. As required by SEC pronouncements, the Fund has segregated \$278.5 million in high-quality, liquid assets to meet any contractual obligations under the mortgage dollar rolls.

Since 1994 RCS has used interest-rate swaps/total return swaps for managing income, duration and exposure to changing short-term interest rates. RCS averaged \$137.1 million in notional interest rate swaps. The income from swaps was \$2.4 million and is included in the Fund's interest income. At January 31, 2002, there were \$115.0 million in notional interest rate swaps based on developed foreign and domestic mortgage interest rates. During the period, RCS entered into \$65.0 million notional U.S. interest rate swaps that served to lock the cost of financing on mortgage dollar roll positions. Under these interest rate swaps, RCS was entitled to receive a short-term interest rate and was obligated to pay a longer-term interest rate on a notional amount fixed by the contract.

8

## RCM STRATEGIC GLOBAL GOVERNMENT FUND, INC. MANAGER'S DISCUSSION AND ANALYSIS

-----

**DISCOUNT TO NET ASSET VALUE** We are pleased to report that the discount to Net Asset Value has narrowed significantly. At January 31, 2001, the discount was 7.1%, and it subsequently narrowed to 2.7% by January 31, 2002, a narrowing of 4.4% of the Fund's discount. In fact, the Fund traded at a premium to NAV several times throughout the review period. We recognize that the market price at which shares of the Fund trade is influenced by a variety of factors, many of which are beyond the control of Fund management. We believe, however, that a number of favorable factors contributed to the decline in the discount during this review period, including a continued favorable environment for bonds in light of the U.S. economic slowdown and stability in the income prospects for the Fund.

**MARKET OUTLOOK** As noted in the Chairman's Letter to Stockholders in this report,

## Edgar Filing: RCM STRATEGIC GLOBAL GOVERNMENT FUND INC - Form N-30D

Pacific Investment Management Company LLC (PIMCO) has assumed the role of the investment adviser to the Fund as of February 8, 2002. Accordingly, the market outlook section of this report reflects PIMCO's view of the investment environment ahead.

The global economy will continue to rely on the United States as the main engine of growth in 2002. Management expects the United States economy to rebound from its current recession and then settle lower, producing average growth of a modest 2% to 2.5%. In Europe, where the economic downturn has been milder, recovery will be more tepid, averaging about 1%. Japan will see more contraction in growth and continued deflation.

In the United States, business and consumer risk-taking, depressed by uncertainty after the terrorist attacks and the bursting of New Economy investment and consumption bubbles, will begin to revive and lead the upturn. Risk appetites will recover because of more abundant liquidity resulting from Federal Reserve easing; more stimulative fiscal policy; increased consumer income due to lower mortgage rates and sharply lower gasoline prices; and because there is room for corporate profits to improve in light of the deceleration of inventory de-stocking and favorable trends in the (prices received)/(prices paid) ratio.

However, investors banking on a return to the exuberant growth of the late 1990s will be disappointed. Business investment growth (other than inventory restocking), a major driver of New Economy growth, will not contribute to recovery this time. Stuck with excess capacity, corporations will continue to limit capital expenditures.

Corporate belt-tightening will not be confined to capital budgets. Under pressure from shareholders to boost stock prices, management may use layoffs and/or wage cuts to bolster

9

RCM STRATEGIC GLOBAL GOVERNMENT FUND, INC.  
MANAGER'S DISCUSSION AND ANALYSIS

-----  
profits, especially in industries where pricing power remains weak. The resulting anxiety about unemployment and incomes will limit the resurgence in consumption.

Concerns that monetary stimulus and a pickup in growth will lead to more inflation are misplaced. Management expects modest disinflation in the United States and Europe, and continued deflation in Japan, due to lower energy prices and lingering capacity overhang. Tame inflation and modest growth will result in a more range-bound interest rate environment.

PIMCO believes the Fund is well positioned to continue to achieve its primary objective of income generation. Please refer to the February 22, 2002 press release for more information on PIMCO and its capabilities in achieving the Fund's objectives. The press release can be found in the "Publications" section of the website at [www.rcsfund.com](http://www.rcsfund.com).

-----						
\$115,000						
-----						

(a) Total return swap with J.P. Morgan. The fund receives fixed interest rates quarterly. In addition, the Fund pays a fixed rate of 1.53% on the swap maturity date. At termination, the Fund will receive or pay the total return of the Lehman Brother Commercial Mortgage-Backed Securities ("CMBS") Investment Grade Index less the total return of the J.P. Morgan U.S. Treasury 7-10 Index adjusted for interest received or paid. The CMBS and U.S. Treasury 7-10 indices are broad market indices for U.S. investment-grade commercial mortgage-backed securities and U.S. treasuries. In addition, at termination the Fund is obligated to repay the fair value of quarterly income streams received.

(b) On termination date of the interest rate swap, the Fund will receive or pay an additional amount, dependent upon whether the 8-year Japanese Swap Rate is higher or lower than the Annual Fixed Payment Rate of 2.12% paid to the Fund on a quarterly basis.

(c) Floating rate based on the country's interbank offered rate, but fixed through March 15, 2001.

(d) On termination date of the interest rate swap, the Fund will receive or pay an additional amount, dependent upon whether the 8-year Swiss Swap Rate is higher or lower than the Annual Fixed Payment Rate of 4.02% paid to the Fund on a quarterly basis.

(e) Floating rate based on the country's interbank offered rate, but fixed through March 15, 2001.

## RCM STRATEGIC GLOBAL GOVERNMENT FUND NOTES TO FINANCIAL STATEMENTS

-----

### 1. SIGNIFICANT ACCOUNTING POLICIES

RCM Strategic Global Government Fund, Inc. (the "Fund") commenced investment operations on February 24, 1994, as a non-diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended. The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with generally accepted accounting principles in the United States of America.

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

**PORTFOLIO VALUATIONS:** Investment securities are stated at market value or, in the absence of market value, at fair value as determined by or under the direction of the Fund's Board of Directors. Over-the-counter securities are valued on the basis of the most recent bid price. Investments in U.S. government securities (other than short-term securities) are valued at the average of the most recent bid and ask prices in the over-the-counter market. Swap agreements are valued at fair value as determined by or under the direction of the Fund's Board of Directors. Investments that mature in sixty days or less are valued at amortized cost, which approximates market value.

**SECURITY TRANSACTIONS AND RELATED INVESTMENT INCOME:** Security transactions are recorded as of the date of purchase, sale or maturity. Realized gains and losses on security transactions are determined on an identified cost basis. Interest income, foreign taxes and expenses are accrued daily. Fees from dollar roll transactions are recognized daily on a straight-line basis over the term of the contract. The Fund accretes discount and amortizes premium to par value on securities.

In November 2000, a revised AICPA Audit and Accounting Guide, Audits of Investment Companies, was issued, and is effective for fiscal years beginning after December 15, 2000. The revised Guide requires the Fund to amortize premium and accrete discount on all fixed-income securities, and classify gains and losses realized on prepayments received on mortgage-backed securities previously included in realized gain/loss, as part of interest income. Adopting these accounting principles did not affect the Fund's net asset value as it has always been the policy of

RCM STRATEGIC GLOBAL GOVERNMENT FUND  
NOTES TO FINANCIAL STATEMENTS  
-----

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

the Fund to amortize market premiums on bonds and to classify prepayments received on mortgage-backed securities as part of investment income for financial reporting purposes.

**FOREIGN CURRENCY TRANSLATIONS AND FOREIGN INVESTMENTS:** The records of the Fund are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities, if any, are translated into U.S. dollars at current exchange rates. Purchases and sales of foreign securities and income and expenses are translated on the respective dates of such transactions. Net realized currency gains and losses arise from trade and settlement date gains and losses, sales of forward foreign currency contracts and foreign currency transactions. The Fund does not isolate the portion of unrealized foreign currency exchange fluctuation on investments. Such unrealized fluctuations are included in net unrealized appreciation or depreciation on investments.

Investing in securities of foreign companies and foreign governments involves special risks and considerations not typically associated with investing in U.S. companies and securities of the U.S. Government. These risks include revaluation of currencies and the risk of expropriation. Moreover, the markets for securities of many foreign companies and foreign governments may be less liquid and the prices of such securities may be more volatile than those of comparable U.S. companies and the U.S. Government.

**FORWARD COMMITMENTS:** The Fund may enter into forward sale commitments in which the Fund agrees on trade date to make delivery against payment for securities on a delayed delivery basis. The price and interest rate of such securities are fixed at trade date. The Fund enters into forward sale commitments to manage its portfolio duration. Realized gains and losses of forward sale commitments are recognized at the time such transactions are closed by an offsetting purchase. At January 31, 2002, the value of open forward sale commitments was \$78,334,758 and proceeds from forward commitments were \$78,851,492.

**MORTGAGE DOLLAR ROLLS:** The Fund enters into dollar rolls in which the Fund sells securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (same type, same or similar interest rate and maturity) securities on a specified future date. During the roll period, the Fund forgoes principal and interest paid on the securities. The Fund accounts for dollar rolls as financing transactions. Dollar rolls enhance the Fund's yield by earning a spread between the yield on the underlying mortgage securities and short-term interest rates. The fee income earned for the period on these transactions was

RCM STRATEGIC GLOBAL GOVERNMENT FUND  
NOTES TO FINANCIAL STATEMENTS  
-----

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

\$6,535,201. At January 31, 2002, there were \$350,364,357 in dollar roll commitments on liquid mortgage pass-throughs outstanding.

**SWAP AGREEMENTS:** The Fund enters into swap agreements for investment, hedging and risk management purposes in an effort to preserve a return on a particular investment or a portion of its portfolio and as a technique for reducing or

extending duration (i.e., price sensitivity to changes in interest rates). Interest rate swaps involve the exchange of commitments to pay or receive -- e.g., an exchange of floating rate payments for fixed rate payments. Currency swaps involve the exchange of commitments to pay or receive interest based on that country's inter-bank offered rate versus the U.S. rate. Total return swaps involve the exchange of commitments to pay or receive interest and to pay or receive an amount, at termination, based upon the return of a particular index.

If forecasts of interest rates, the shape of the relevant yield curve, and other market factors, including those that may impact the indexes of the total return swaps, are incorrect, investment performance will diminish compared to what performance would have been if these investment techniques were not used. Even if the forecasts are correct, there are risks that the positions may correlate imperfectly with the asset or liability being hedged, a liquid secondary market may not always exist, or the counterparty to a transaction may default.

At January 31, 2002, the Fund had entered into swaps with \$115 million in notional amount. The swaps are U.S. dollar-denominated to avoid foreign currency exchange risk. The difference between interest rates received and paid by the Fund constitutes investment income and is shown as a component of interest income on the Statement of Operations of \$2,197,948 for the period ended January 31, 2002. Net unrealized appreciation on swap positions was \$2,959,750 at January 31, 2002.

LEVERAGE: Forward sale commitments, dollar rolls, swaps, reverse repurchase agreements and other transactions that are financed by the Fund result in leverage that the Fund employs for purposes of seeking to manage income and duration exposures of the Fund. However, the use of leverage increases the overall duration risk of the Fund, and creates an increased sensitivity of the Fund to rising short-term interest rates. The use of leverage, which is generally the economic equivalent of borrowing to purchase securities, thus creates risks of greater volatility of the net asset value and market value of Fund shares. As required by the Securities and Exchange

NOTES TO FINANCIAL STATEMENTS

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Commission, the Fund segregated \$278,525,761 in high credit quality, liquid investments against outstanding obligations, resulting in \$147,651,129 net regulatory leverage at January 31, 2002.

FEDERAL INCOME TAXES: It is the policy of the Fund to comply with the requirements for qualification as a "regulated investment company" under the Internal Revenue Code of 1986, as amended. It is also the intention of the Fund to make distributions of substantially all of its taxable income and net realized capital gains to its stockholders. Therefore, no Federal income tax provision is required. As of January 31, 2002, the Fund had capital loss carryovers of \$5,812,727, \$18,629,658, \$1,736,003, \$3,439,757 and \$28,487,803, which will expire on January 31, 2003, 2004, 2006, 2008 and 2009, respectively unless offset by future capital gains. During 2001, the Fund had a post-October loss amounting to \$4,734,255. Under current tax law, capital losses realized after October 31 may be deferred and treated as occurring on the first day of the following year.

DISTRIBUTIONS TO SHAREHOLDERS: The Fund distributes to its holders of common stock monthly dividends of net investment income. Net realized capital gains, in excess of capital loss carryovers, if any, will be distributed to the

## Edgar Filing: RCM STRATEGIC GLOBAL GOVERNMENT FUND INC - Form N-30D

stockholders at least annually. The Fund records all distributions to stockholders on the ex-dividend date. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles in the United States of America. Any such differences are due primarily to differing treatments for gains and losses, original issue discount accretion and excise tax regulations.

The tax character of distributions paid to shareholders during fiscal years ending 2002 and 2001 were as follows:

FISCAL 2002			FISCAL 2001		
ORDINARY INCOME	LONG TERM CAPITAL GAIN	TOTAL	ORDINARY INCOME	LONG TERM CAPITAL GAIN	TOTAL
\$30,454,768	--	\$30,454,768	\$30,943,021	--	\$30,943,021

As of January 31, 2002, the components of distributable earnings on a tax basis were as follows:

ORDINARY INCOME	LONG TERM CAPITAL GAIN	UNREALIZED APPRECIATION (DEPRECIATION)	TOTAL
\$2,144,751	--	\$14,637,940	\$16,782,691

### RCM STRATEGIC GLOBAL GOVERNMENT FUND NOTES TO FINANCIAL STATEMENTS

#### 1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**CASH EQUIVALENTS:** The Fund considers investments in money market funds and short-term investments to be cash equivalents.

#### 2. TRANSACTIONS WITH AFFILIATES, ADMINISTRATOR AND RELATED PARTIES

Dresdner RCM Global Investors LLC, the Fund's investment manager, furnished investment advice to the Fund and received a fee at the annualized rate of 0.95% of the Fund's average daily net assets during the fiscal year ended January 31, 2002. In connection with the merger of Dresdner RCM Global Strategic Income Fund, Inc. ("DSF Fund") into the Fund, Dresdner RCM, agreed to waive its management fee in excess of a rate of 0.75% per annum for those assets of the Fund following the merger that exceeded the Fund's pre-merger net asset level. (see note 5.) Dresdner RCM, in addition, agreed to waive a portion of its management fee payable by the Fund during the first year following the merger as might be necessary to ensure that the Fund's total operating expenses for that year, plus nonrecurring merger-related expenses, would be at least \$75,000 less than what the Fund's operating expenses were projected to be using an estimated expense ratio for the Fund computed on the assumption that the merger had not occurred. For the period from January 18, 2002 through January 31, 2002, Dresdner RCM waived \$4,941 of its management fees payable by the Fund.

State Street Bank and Trust Company (the "Administrator") served as the Fund's

## Edgar Filing: RCM STRATEGIC GLOBAL GOVERNMENT FUND INC - Form N-30D

administrator and accounting agent and received an administrator fee of 0.06% on the first \$250 million of the Fund's average daily net assets, 0.03% on the next \$250 million and 0.01% on the amounts thereafter and an accounting fee of \$90,000 annually. No principal, officer or employee of the investment manager or any affiliate thereof will receive any compensation from the Fund for serving as an officer or director of the Fund. The Fund pays each of its "non interested" directors an annual fee of \$6,000 plus \$1,000 for each meeting attended.

### 3. CAPITAL SHARES

At January 31, 2002, there were 500,000,000 shares of common stock authorized at \$0.00001 par value and 34,185,526 shares outstanding, of which 3,669,726 shares were issued in exchange of DSF assets. (see note 5.)

### 4. PURCHASES AND SALES OF SECURITIES

Purchases and proceeds from sales of securities, other than obligations of the U.S. Government and its agencies, short-term securities, dollar rolls and forward commitments for the period ended January 31, 2002, aggregated \$90,498,449 and \$95,005,115, respectively. Purchases and

27

-----

### 4. PURCHASES AND SALES OF SECURITIES (CONTINUED)

proceeds from sales of obligations of the U.S. Government and its agencies, other than short-term securities, dollar rolls and forward commitments for the period ended January 31, 2002, aggregated \$1,393,376,711 and \$1,253,897,912, respectively. At January 31, 2002, the aggregate cost of investments for federal income tax purposes was \$708,563,150. Gross unrealized appreciation and depreciation of investments aggregated \$16,283,940 and \$1,646,000, respectively, resulting in net unrealized appreciation of \$14,637,940 at January 31, 2002.

### 5. MERGER

Effective January 18, 2002, in a statutory merger under Maryland law, the Fund acquired all of the assets and assumed all of the stated liabilities of Dresdner RCM Global Strategic Income Fund, Inc. ("DSF Fund"). The acquisition was accomplished by a tax-free exchange of 3,669,726 shares of the Fund (valued at \$40,985,851) for 5,977,283 shares of DSF Fund outstanding on January 18, 2002. DSF Fund's net assets at that date (\$40,985,851), included \$99,270 of unrealized appreciation and \$923,086 of cash. The aggregate net assets of the Fund and DSF Fund immediately before the merger were \$340,820,019 and \$40,985,851, respectively, resulting in aggregate net assets of the Fund of \$381,805,870 immediately after the merger.

### 6. SUBSEQUENT EVENT

Effective February 8, 2002, Pacific Investment Management Company LLC ("PIMCO"), an advisory affiliate of Dresdner RCM Global Investors LLC, assumed management responsibilities for the Fund pursuant to an interim investment management agreement. The interim investment management agreement will remain in effect for up to 150 days from its effective date, pending approval of a new investment management agreement between the Fund and PIMCO by stockholders of the Fund. The Board, including a majority of independent directors, approved the new investment management agreement with PIMCO on March 19, 2002 and expects to seek stockholder approval of the new investment management agreement at the 2002 Annual Meeting of Stockholders, which is expected to be held on or about June 21, 2002. In connection with approving the transition of Fund management to PIMCO, the Board also approved a change in the Fund's corporate name to "PIMCO Strategic Global Government Fund, Inc.", which became effective on March 19, 2002.

## Edgar Filing: RCM STRATEGIC GLOBAL GOVERNMENT FUND INC - Form N-30D

Under the terms of the interim investment management agreement approved by the Board, PIMCO will provide investment advisory services to the Fund for a fee calculated at an annual

28

rate of 0.85% of the Fund's net assets. The Board also approved an administrative services agreement pursuant to which PIMCO replaced State Street Bank and Trust Company as the Fund's administrator and provides certain administrative services to the Fund for a fee calculated at the annual rate of 0.05% of the Fund's net assets. The Fund's prior investment adviser and administrator charged fees at the approximate effective rates of 0.94% and 0.05% of average net assets for advisory and administrative services, respectively.

Pasi Hamalainen at PIMCO has been primarily responsible for the day-to-day management of the Fund's portfolio since February 8, 2002.

Mr. Hamalainen is a Managing Director, generalist portfolio manager, and a member of PIMCO'S investment committee. Mr. Hamalainen joined PIMCO in 1994.

PIMCO STRATEGIC GLOBAL GOVERNMENT FUND  
(FORMERLY RCM STRATEGIC GLOBAL GOVERNMENT FUND)  
INDEPENDENT AUDITOR'S REPORT  
-----

To the Board of Directors and Stockholders of the  
PIMCO Strategic Global Government Fund, Inc.  
(Formerly RCM Strategic Global Government Fund, Inc.):

In our opinion, the accompanying statement of assets and liabilities, including the portfolio of investments, and the related statements of operations, changes in net assets and cash flows, and the financial highlights present fairly, in all material respects, the financial position of the PIMCO Strategic Global Strategic Income Fund, Inc. (Formerly RCM Strategic Global Government Fund, Inc.) (the "Fund") at January 31, 2002, the results of its operations for the year then ended, the changes in its net assets, cash flows and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statements presentation. We believe that our audits, which included confirmation of securities at January 31, 2002 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

33

RCM STRATEGIC GLOBAL GOVERNMENT FUND  
DIVIDEND REINVESTMENT PLAN (UNAUDITED)

Under the Fund's Dividend Reinvestment Plan (the "Plan"), a stockholder whose shares of common stock are registered in his or her own name will have all distributions from the Fund reinvested automatically by State Street Bank and Trust Company (the "Plan Agent") as agent under the Plan, unless the stockholder elects to receive cash. Distributions with respect to shares registered in the name of a broker-dealer or other nominee (that is, in "street name") will be reinvested by the broker or nominee in additional shares under the Plan, unless that service is not provided by the broker or nominee or the stockholder elects to receive distributions in cash. Dividends and capital gains that are reinvested through the Plan will be realized as taxable income by participating stockholders, even though they will receive no cash distribution from the Fund.

When the market price of the common stock is equal to or exceeds the net asset value per share of the common stock on the dividend payment date, Plan participants will be issued shares of common stock valued at the net asset value most recently determined or, if net asset value is less than 95% of the then current market price of the common stock, at 95% of the market value.

## Edgar Filing: RCM STRATEGIC GLOBAL GOVERNMENT FUND INC - Form N-30D

If the market price of the common stock is less than the net asset value of the common stock, or if the Fund declares a dividend or capital gains distribution payable only in cash, a broker-dealer not affiliated with the Fund's principal underwriter, as purchasing agent for Plan participants (the "Purchasing Agent"), will buy common stock in the open market, for the participants' accounts. If the market price exceeds the net asset value of shares before the Purchasing Agent has completed its purchases, the Purchasing Agent is permitted to cease purchasing shares and the Fund may issue the remaining shares.

Plan participants are subject to no charge for reinvesting dividends and capital gains distributions. The Plan Agent's fees for handling the reinvestment of dividends and capital gains distributions will be paid by the Fund. No brokerage charges apply with respect to shares of common stock issued directly by the Fund. Each Plan participant will, however, bear a proportionate share of brokerage commissions incurred with respect to open market purchases made in connection with the reinvestment of dividends or capital gains distributions.

Plan participants may terminate their participation in the Plan by giving written notice to the Plan Agent. The Fund reserves the right to amend or terminate the Plan. To obtain a full description of the Plan or to obtain any other information about the Plan, please contact State Street Bank and Trust Company, P.O. Box 8209, Boston, Massachusetts 02266-8209 or call (800) 426-5523.

### RCM STRATEGIC GLOBAL GOVERNMENT FUND STOCKHOLDER MEETING RESULTS

-----  
(Unaudited)

The Annual Meeting of Stockholders of RCM Strategic Global Government Fund, Inc. (the "Fund") was held on Tuesday, November 20, 2001, and reconvened on November 26, 2001, November 28, 2001 and December 3, 2001. The number of shares issued, outstanding and eligible to vote as of the record date (October 1, 2001) was 30,515,800. Present were 29,906,576.759 shares represented by 138 proxies or 98.00% of the eligible shares tabulated. The matters voted upon by Stockholders and the resulting votes for each matter are presented below:

1. The Merger of the Fund with Dresdner RCM Global Strategic Income Fund, Inc. pursuant to an Agreement and Plan of Merger and Contingent Liquidation dated August 2, 2001 was approved. The votes were cast: For (15,383,306.991), Against (454,498.116), Abstain (852,988.652), Del N-Vote (13,215,783).
2. An Investment Management Agreement between the Fund and Dresdner RCM Global Investors LLC, with an initial term expiring on December 31, 2001, was approved. The votes were cast: For (28,622,618.395), Against (448,641.712), Abstain (835,316.652).
3. Francis E. Lundy and Gregory S. Young were re-elected to the Board of Directors, each for a term to expire in 2004 or until his successor is duly elected and qualified. The votes were cast:

Francis E. Lundy	For (29,252,220.759)	Withheld (654,356).
Gregory S. Young	For (29,250,920.759)	Withheld (655,656).

Luke D. Knecht and James M. Whitaker continued in office as Directors.

The 2002 Annual Meeting of Stockholders of the Fund is currently expected to be

Edgar Filing: RCM STRATEGIC GLOBAL GOVERNMENT FUND INC - Form N-30D

held on or about June 21, 2002. In order for a Stockholder proposal to be considered for inclusion in the Fund's proxy materials relating to the 2002 Annual Meeting, it must be received by the Secretary of the Fund, Garlin G. Flynn, at the Fund's executive offices no later than April 15, 2002. The address of the Fund's executive offices is 840 Newport Center Drive, Suite 300, Newport Beach, CA 92660.
