Table of Contents**KIRKLAND'S, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****Note 1 Basis of Presentation**

Kirkland's, Inc. (the Company) is a specialty retailer of home décor and gifts with 293 stores in 30 states as of April 30, 2011. The condensed consolidated financial statements of the Company include the accounts of Kirkland's, Inc. and its wholly-owned subsidiaries, Kirkland's Stores, Inc., Kirkland's DC, Inc., Kirkland's Texas, LLC, and Kirklands.com, LLC. Significant intercompany accounts and transactions have been eliminated.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required for complete financial statements. In the opinion of management, all adjustments, including normal recurring accruals, considered necessary for a fair presentation have been included. These financial statements should be read in conjunction with the audited financial statements included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on April 14, 2011.

It should be understood that accounting measurements at interim dates inherently involve greater reliance on estimates than those at fiscal year-end. In addition, because of seasonality factors, the results of the Company's operations for the 13-week period ended April 30, 2011 are not indicative of the results to be expected for any other interim period or for the entire fiscal year. The Company's fiscal year ends on the Saturday closest to January 31, resulting in years of either 52 or 53 weeks. All references to a fiscal year refer to the fiscal year ending on the Saturday closest to January 31 of the following year.

The preparation of the condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. Actual results could differ from the estimates and assumptions used.

Changes in estimates are recognized in the period when new information becomes available to management. Areas where the nature of the estimate makes it possible that actual results could materially differ from amounts estimated include: impairment assessments on long-lived assets, inventory reserves, self-insurance reserves, income tax liabilities, stock-based compensation, gift card breakage, customer loyalty program accruals and contingent liabilities.

Note 2 Income Taxes

An estimate of the annual effective tax rate is used at each interim period based on the facts and circumstances available at that time, while the actual effective tax rate is calculated at year-end. For the 13-week period ended April 30, 2011, the Company recorded income tax expense of 38.2% of income before income taxes. In the prior year period, the Company recorded income tax expense of 40.6% of income before income taxes. The decline in the tax rate was primarily the result of a reorganization of the Company's legal entity structure, which resulted in a lower projected state tax rate.

Note 3 Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted average number of shares outstanding during each period presented, which excludes non-vested restricted stock. Diluted earnings per share is computed by dividing net income by the weighted average number of shares outstanding plus the dilutive effect of stock equivalents outstanding during the applicable periods using the treasury stock method. Diluted earnings per share reflects the potential dilution that could occur if options to purchase stock were exercised into common stock. Stock options that were not included in the computation of diluted earnings per share because to do so would have been antidilutive were 282,500 and zero shares for the 13-week periods ended April 30, 2011, and May 1, 2010, respectively.

Note 4 Commitments and Contingencies

The Company is party to pending legal proceedings and claims. Although the outcome of such proceedings and claims cannot be determined with certainty, the Company's management is of the opinion that it is unlikely that these proceedings and claims in excess of insurance coverage will have a material effect on the financial condition, operating results or cash flows of the Company.

Table of Contents

Note 5 Stock-Based Compensation

The Company maintains equity incentive plans under which it may grant non-qualified stock options, incentive stock options, restricted stock, restricted stock units, or stock appreciation rights to employees, non-employee directors and consultants.

No stock options were granted during the 13-week periods ended April 30, 2011, and May 1, 2010. Total stock-based compensation expense (a component of compensation and benefits) was \$749,000 for the 13-week period ended April 30, 2011, compared to \$380,000 for the prior year period. Compensation expense is recognized on a straight-line basis over the vesting period. There have been no material changes in the assumptions used to compute compensation expense during the current quarter.

Note 6 Related Party Transactions

In July 2009, the Company entered into an agreement with a related party vendor to purchase merchandise inventory. The vendor is considered a related party for financial reporting purposes because one of its principals is the spouse of the Company's Vice President of Merchandising. During the first quarter of fiscal 2011 and 2010, purchases from this vendor totaled approximately \$4.5 million, or 10% of total merchandise purchases and \$3.4 million, or 8% of merchandise purchases, respectively. Payable amounts outstanding to this vendor were approximately \$600,000 and \$500,000 as of April 30, 2011 and May 1, 2010, respectively. The Company's payable terms with this vendor are consistent with the terms offered by other vendors in the ordinary course of business.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Forward Looking Statements**

This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to provide an understanding of our financial condition, change in financial condition, cash flow, liquidity and results of operations. The following MD&A discussion should be read in conjunction with the condensed consolidated financial statements and notes to those statements that appear elsewhere in this Form 10-Q and in the Company's Annual Report on Form 10-K, filed April 14, 2011. The following discussion contains forward-looking statements that reflect the Company's plans, estimates and beliefs. The Company's actual results could differ materially from those discussed or referred to in the forward-looking statements. Factors that could cause or contribute to any differences include, but are not limited to, those discussed under the caption "Cautionary Statement for Purposes of the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995" and under Part II, Item 1A "Risk Factors".

Table of Contents

Net sales. Net sales increased 1.0% to \$94.4 million for the first fiscal quarter of 2011 compared to \$93.5 million for the prior year period. The increase in net sales was the result of new store growth of \$8.1 million, partially offset by a \$7.2 million decrease in comparable store sales. During the first quarter of fiscal 2011, comparable store sales decreased 8.4% as compared to a 12.6% increase in the prior year period. The comparable store sales decrease was primarily due to a decrease in number of transactions and a slight decrease in the average ticket. The decrease in transactions resulted from slightly lower traffic counts and a decline in the conversion rate. The decrease in the average ticket was the result of a lower average retail selling price, partially offset by an increase in items per transaction. The strongest performing merchandise categories were art and textiles, while the weakest performing categories were wall décor, mirrors, frames, and decorative accessories.

Gross profit. The decrease in gross profit as a percentage of total revenue was primarily driven by lower merchandise margins, which decreased from 56.6% in the first quarter of fiscal 2010 to 54.9% in the first quarter of fiscal 2011. Merchandise margin is calculated as net sales minus product cost of sales. Merchandise margin excludes outbound freight, store occupancy and central distribution costs. The decrease in merchandise margin was the result of higher inbound freight costs and higher rates of promotional activity and markdowns. Store occupancy costs as a percentage of net sales increased 0.7%. This increase resulted from the decline in comparable store sales. Outbound freight costs and central distribution expenses increased as a percentage of sales primarily due to comparable store sales deleverage and an increase in diesel fuel costs as well as shipping and packaging costs associated with E-commerce.

Compensation and benefits. At the store-level, the compensation and benefits expense ratio increased over the prior year period primarily due to the negative comparable store sales performance. At the corporate level, the compensation and benefits ratio increased over the prior year period primarily due to increased stock compensation expense as a result of the impact from grants in the second quarter of 2010.

Other operating expenses. Other operating expenses increased as a percentage of net sales versus the prior year period due to increases in legal fees, credit card processing fees, and marketing expenses, as well as deleverage due to the decline in comparable store sales.

Depreciation. The increase in depreciation as a percentage of sales reflects the increase in capital expenditures during fiscal 2010 combined with relatively flat total sales.

Income tax expense. We recorded income tax expense of approximately \$2.0 million, or 38.2% of pre-tax income during the first quarter of fiscal 2011, versus approximately \$4.5 million, or 40.6% of pre-tax income, in the prior year quarter. The decrease in the tax rate was primarily the result of a reorganization of the legal entity structure of certain of the Company's subsidiaries which resulted in a lower projected state tax rate.

Net income and earnings per share. As a result of the foregoing, we reported net income of \$3.2 million, or \$0.15 per diluted share, for the first quarter of fiscal 2011 as compared to net income of \$6.5 million, or \$0.32 per diluted share, for the first quarter of fiscal 2010.

Liquidity and Capital Resources

Our principal capital requirements are for working capital and capital expenditures. Working capital consists mainly of merchandise inventories offset by accounts payable, which typically reach their peak by the end of the third quarter of each fiscal year. Capital expenditures primarily relate to new store openings; existing store expansions, remodels or relocations; and purchases of equipment or information technology assets for our stores, distribution facilities and corporate headquarters. Historically, we have funded our working capital and capital expenditure requirements with internally generated cash and borrowings under our credit facility.

Cash flows from operating activities. Net cash provided by (used in) operating activities was approximately \$2.1 million and (\$80,000) for the first quarter of fiscal 2011 and fiscal 2010, respectively. Cash flows from operating activities depend heavily on operating performance, changes in working capital and the timing and amount of payments for income taxes. The change in the amount of cash from operations as compared to the prior year period was primarily the result of a decrease in income taxes paid, partially offset by a decline in our operating performance and an increase in inventories. Cash tax payments for the first quarter of fiscal 2011 totaled approximately \$2.7 million compared to cash tax payments of \$7.6 million in the prior year period.

Table of Contents

Cash flows from investing activities. Net cash used in investing activities for the first quarter of fiscal 2011 consisted of \$3.1 million in capital expenditures as compared to \$2.8 million in capital expenditures for the prior year period. The capital expenditures primarily related to new store construction and information technology assets. During the first quarter of fiscal 2011, we opened three stores compared to six stores during the first quarter of fiscal 2010. We expect that capital expenditures for all of fiscal 2011 will be approximately \$23 to \$26 million, primarily to fund the leasehold improvements of new stores, make improvements in our information technology infrastructure, and maintain our investments in existing stores and our distribution center.

Cash flows from financing activities. Net cash provided by financing activities was approximately \$68,000 and \$71,000 for the first quarter of fiscal 2011 and fiscal 2010, respectively, and was related to the exercise of employee stock options as well as employee stock purchases.

Revolving credit facility. Effective October 4, 2004, we entered into a five-year senior secured revolving credit facility with a revolving loan limit of up to \$45 million. On August 6, 2007, we entered into the First Amendment to Loan and Security Agreement (the Amendment) which provided the Company with additional availability under our borrowing base through higher advance rates on eligible inventory. As a result of the Amendment, the aggregate size of the overall credit facility remained unchanged at \$45 million, but the term of the facility was extended two years making the new expiration date October 4, 2011. Amounts outstanding under the amended facility, other than First In Last Out (FILO) loans, bear interest at a floating rate equal to the 60-day LIBOR rate (0.24% at April 30, 2011) plus 1.25% to 1.50% (depending on the amount of excess availability under the borrowing base). FILO loans, which apply to the first approximately \$2 million borrowed at any given time, bear interest at a floating rate equal to the 60-day LIBOR rate plus 2.25% to 2.50% (depending on the amount of excess availability under the borrowing base). Additionally, we pay a quarterly fee to the bank equal to a rate of 0.2% per annum on the unused portion of the revolving line of credit. Borrowings under the facility are collateralized by substantially all of our assets and guaranteed by our subsidiaries. The maximum availability under the credit facility is limited by a borrowing base formula, which consists of a percentage of eligible inventory and receivables less reserves. The facility also contains provisions that could result in changes to the presented terms or the acceleration of maturity. Circumstances that could lead to such changes or acceleration include a material adverse change in the business or an event of default under the credit agreement. The facility has one financial covenant that requires the Company to maintain excess availability under the borrowing base, as defined in the credit agreement, of at least \$3.0 to \$4.5 million depending on the size of the borrowing base, at all times. We are currently progressing on the renewal or replacement of this facility.

As of April 30, 2011, we were in compliance with the covenants in the facility and there were no outstanding borrowings under the credit facility. We do not anticipate any borrowings under the credit facility during fiscal 2011.

At April 30, 2011, our balance of cash and cash equivalents was approximately \$90.3 million and the borrowing availability under our facility was \$26.9 million (net of the excess availability requirement as described above). We believe that the combination of our cash balances, line of credit availability and cash flow from operations will be sufficient to fund our planned capital expenditures and working capital requirements for at least the next twelve months.

Related Party Transactions

In July 2009, the Company entered into a Vendor Agreement with a related party vendor to purchase merchandise inventory. The vendor is considered a related party for financial reporting purposes because one of its principals is the spouse of the Company's Vice President of Merchandising. During the first quarter of fiscal 2011, the Company's purchases from this vendor totaled approximately \$4.5 million, or 10% of total merchandise purchases. During the first quarter of fiscal 2010, the Company's purchases from this vendor totaled approximately \$3.4 million, or 8% of total merchandise purchases. Payable amounts outstanding to this vendor were approximately \$600,000 as of April 30, 2011 and \$500,000 as of May 1, 2010. The Company's payable terms with this vendor are consistent with the terms offered by other vendors in the ordinary course of business.

Off-Balance Sheet Arrangements

None.

Significant Contractual Obligations and Commercial Commitments*Construction commitments*

The Company had commitments for new store construction projects totaling approximately \$1.3 million at April 30, 2011.
