INDEPENDENT AUDITOR'S REPORT

(A free translation from the original in Spanish)

Santiago, February 27, 2018

To the Shareholders and Directors

Banco Santander Chile

We have audited the accompanying consolidated financial statements of Banco Santander Chile and its subsidiaries, which comprise the consolidated statement of financial position as of December 31, 2017 and 2016, the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and the related notes thereto.

Management's Responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting standards and instructions issued by the Superintendencia of Banks and Financial Institutions. This responsibility includes designing, implementing and maintaining internal control relevant for the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Chilean Generally Accepted Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence on the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements whether due to fraud or error. In making those risk

assessments, the auditor considers internal control relevant for the preparation and fair presentation of the consolidated financial statements of the entity in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we do not express such opinion. An audit also includes evaluating the accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Santiago, February 27, 2018

Banco Santander Chile

2

Opinion

In our opinion, the consolidated financial statements referred to above presents fairly, in all material respects, the financial position of Banco Santander Chile and its subsidiaries as of December 31, 2017 and 2016, and the results of its operations, and its cash flows for the years then ended, in accordance with accounting standards and instructions issued by the Superintendence of Banks and Financial Institutions.

The accompanying notes 1 to 39 form an integral part of these consolidated financial statements.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

CORPORATE INFORMATION

Banco Santander Chile is a banking corporation (limited company) operating under the laws of the Republic of Chile, headquartered at Bandera N°140, Santiago. The corporation provides a broad range of general banking services to its customers, ranging from individuals to major corporations. Banco Santander Chile and its subsidiaries (collectively referred to as the “Bank” or “Banco Santander Chile”) offers commercial and consumer banking services, including (but not limited to) factoring, collection, leasing, securities and insurance brokering, mutual and investment fund management, and investment banking.

Banco Santander Spain controls Banco Santander Chile through its holdings in Teatinos Siglo XXI Inversiones Ltda. and Santander Chile Holding S.A., which are controlled subsidiaries of Banco Santander Spain. As of December 31, 2017, Banco Santander Spain owns or controls directly and indirectly 99.5% of Santander Chile Holding S.A. and 100% of Teatinos Siglo XXI Inversiones Ltda. This makes Banco Santander Spain have control over 67.18% of the Bank’s shares.

a) Basis of preparation

These Consolidated Financial Statements have been prepared in accordance with the Compendium of Accounting Standards issued by the Superintendency of Banks and Financial Institutions (SBIF), the Chilean regulatory agency. Article 15 of the General Banking Law states that banks must apply accounting standards established by SBIF. For those issues not covered by the SBIF, the Bank must apply generally accepted standards issued by the Colegio de Contadores de Chile A.G (Association of Chilean Accountants), which conform with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). In the event that any discrepancies exist between IFRS and accounting standards issued by the SBIF (Compendium of Accounting Standards and Instructions), the latter shall prevail.

For purposes of these financial statements the Bank uses certain terms and conventions. References to “US\$”, “U.S. dollars” and “dollars” are to United States dollars, references to “EUR” are to European Economic Community Euro, references to “CNY” are to Chinese Yuan, references to “CHF” are to Swiss franc, references to “Chilean pesos”, “pesos” or “Ch\$” are to Chilean pesos, and references to “UF” are to Unidades de Fomento. The UF is an inflation-indexed Chilean monetary unit with a value in Chilean pesos that changes daily to reflect changes in the official Consumer Price Index (“CPI”) of the Instituto Nacional de Estadísticas (the Chilean National Institute of Statistics) for the previous month.

The Notes to the Consolidated Financial Statements contain additional information to support the figures submitted in the Consolidated Statement of Financial Position, Consolidated Statement of Income, Consolidated Statement of Comprehensive Income, Consolidated Statement of Changes in Equity and Consolidated Statement of Cash Flows for the period. These contain narrative descriptions and details of these statements in a clear, relevant, reliable and comparable manner.

b) Basis of preparation for the Consolidated Financial Statements

The Consolidated Financial Statements as of December 31, 2017 and 2016 and December 31, 2016 and for the nine-month period ended December 31, 2017 and 2016, incorporate the financial statements of the Bank entities over which the Bank has control (including structured entities); and includes the adjustments, reclassifications and eliminations needed to comply with the accounting and valuation criteria established by IFRS. Control is achieved when the Bank:

- I. has power over the investee (i.e., it has rights that grant the current capacity of managing the relevant activities of the investee)
- II. is exposed, or has rights, to variable returns from its involvement with the investee; and
- III. has the ability to use its power to affect its returns.

The Bank reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Bank has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities over the investee unilaterally. The Bank considers all relevant facts and circumstances in assessing whether or not the Bank’s voting rights in an investee are sufficient to give it power, including:

- The size of the Bank’s holding of voting rights relative to the size and dispersion of holdings of the other vote holders;

· The potential voting rights held by the Bank, other vote holders or other parties;

· The rights arising from other agreements; and

any additional facts and circumstances that indicate that the Bank has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidated Financial Statements December 2017 / Banco Santander Chile 12

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Consolidation of a subsidiary begins when the Bank obtains control over the subsidiary and ceases when the Bank loses control over the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the Consolidated Statement of Income and in the Consolidated Financial Statement of Comprehensive Income from the date the Bank gains control until the date when the Bank ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Bank and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Bank and to the non-controlling interests even if this results in the non-controlling interests having a deficit in certain circumstances.

When necessary, adjustments are made to the financial statements of the subsidiaries to ensure their accounting policies are consistent with the Bank's accounting policies. All balances and transactions between consolidated entities are eliminated.

Changes in the consolidated entities ownership interests in subsidiaries that do not result in a loss of control over the subsidiaries are accounted for as equity transactions. The carrying values of the Bank's equity and the non-controlling interests' equity are adjusted to reflect the changes to their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Bank.

In addition, third parties' shares in the Bank's consolidated equity are presented as "Non-controlling interests" in the Consolidated Statement of Changes in Equity. Their share in the income for the year is presented as "Attributable to non-controlling interest" in the Consolidated Statement of Income.

The following companies are considered entities controlled by the Bank and are therefore within the scope of consolidation:

i. Entities controlled by the Bank through participation in equity

Name of the Subsidiary	Main Activity	Place of Incorporation and operation	Percent ownership share As of December 31,					
			2017			2016		
			Direct %	Indirect %	Total %	Direct %	Indirect %	Total %
Santander Corredora de Seguros Limitada	Insurance brokerage	Santiago, Chile	99.75	0.01	99.76	99.75	0.01	99.76
Santander Corredores de Bolsa Limitada	Financial instruments brokerage	Santiago, Chile	50.59	0.41	51.00	50.59	0.41	51.00
Santander Agente de Valores Limitada	Securities brokerage	Santiago, Chile	99.03	-	99.03	99.03	-	99.03
Santander S.A. Sociedad Securitizadora	Purchase of credits and issuance of debt instruments	Santiago, Chile	99.64	-	99.64	99.64	-	99.64

The details of non-controlling interest in all the subsidiaries can be seen in Note 25 – Non-controlling interest.

i. Entities controlled by the Bank through other considerations

The following companies have been consolidated as of December 31, 2017 and 2016 based on the fact that the activities relevant on them are determined by the Bank (companies complementary to the banking sector) and therefore the Bank exercises control:

- Santander Gestión de Recaudación y Cobranza Limitada (collection services)
- Bansa Santander S.A. (management of repossessed assets and leasing of properties)

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01**SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued****iii. Associates**

An associate is an entity over which the Bank has the ability to exercise significant influence, but not control or joint control. This ability is usually represented by a share equal to or higher than 20% of the voting rights of the Company and is accounted for using the equity method.

The following companies are considered “Associates” in which the Bank accounts for its participation using the equity method:

Associates	Main activity	Place of Incorporation and operation	Percentage of ownership share	
			As of December 31, 2017	2016
			%	%
Redbanc S.A.	ATM services	Santiago, Chile	33.43	33.43
Transbank S.A.	Debit and credit card services	Santiago, Chile	25.00	25.00
Centro de Compensación Automatizado S.A.	Electronic fund transfer and compensation services	Santiago, Chile	33.33	33.33
Sociedad Interbancaria de Depósito de Valores S.A.	Repository of publically offered securities	Santiago, Chile	29.29	29.29
Cámara de Compensación de Pagos de Alto Valor S.A.	Payments clearing	Santiago, Chile	15.00	14.23
Administrador Financiero del Transantiago S.A.	Administration of boarding passes to public transportation	Santiago, Chile	20.00	20.00
Sociedad Nexus S.A.	Credit card processor	Santiago, Chile	12.90	12.90
Servicios de Infraestructura de Mercado OTC S.A.	Administration of the infrastructure for the financial market of derivative instruments	Santiago, Chile	12.07	12.07

During the year 2017, the entities Rabobank Chile in Liquidation and Banco París, assigned to Banco Santander a portion of its participation in "Sociedad Operadora de la Cámara de Compensación de pagos de Valores S.A.", with which the Bank's participation increased to 15.00%.

In the case of Nexus S.A. and Compensation Chamber for High-Value Payments S.A., Banco Santander Chile has a representative in the Board of Directors of such companies, which is why the Administration has concluded that it exercises significant influence over the same.

In the case of Market Infrastructure Services OTC S.A. The Bank participates, through its executives, actively in the administration and in the organizational process, which is why the Administration has concluded that it exerts significant influence about it.

During the fourth quarter of 2016, Banco Penta assigned to Banco Santander a portion of its interest in the companies "Sociedad Operadora de la Cámara de Compensación de pagos de Alto Valor S.A." y "Servicios de Infraestructura de Mercado OTC S.A." with which the Bank's participation increased to 14.93% and 12.07% respectively.

During the third quarter of 2016, Deutsche Bank assigned to Banco Santander a portion of its interest in the companies "Sociedad Operadora de la Cámara de Compensación de pago de Alto Valor S.A." and "Servicios de Infraestructura de Mercado OTC S.A." with which the Bank's participation increased in that opportunity to 14.84% and 11.93% respectively.

At the Extraordinary Shareholders' Meeting of Transbank S.A. held on April 21, 2016, it was agreed to increase capital of the company through the capitalization of retained earnings, through the issue of paid-up shares, and placement of payment actions for approximately \$ 4,000 million. Banco Santander Chile participated proportionally to its participation (25%), for which it subscribed and paid shares for approximately \$ 1,000 million.

iv. Share or rights in other companies

Entities over which the Bank has no control or significant influences are presented in this category. These holdings are shown at acquisition value (historical cost) less impairment, if any.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

c) Non-controlling interest

Non-controlling interest represents the portion of gains or losses and net assets which the Bank does not own, either directly or indirectly. It is presented separately in the Consolidated Statement of Income, and separately from shareholders' equity in the Consolidated Statement of Financial Position.

In the case of entities controlled by the Bank through other considerations, income and equity are presented in full as non-controlling interest, since the Bank controls them, but does not have any ownership.

d) Reporting segments

Operating segments with similar economic characteristics often exhibit similar long-term financial performance. Two or more segments can be combined only if aggregation is consistent with International Financial Reporting Standard 8 "Operating Segments" (IFRS 8) and the segments have similar economic characteristics and are similar in each of the following respects:

- i. the nature of the products and services;
- ii. the nature of the production processes;
- iii. the type or class of customers that use their products and services;
- iv. the methods used to distribute their products or services; and
- v. if applicable, the nature of the regulatory environment, for example, banking, insurance, or public utilities.

The Bank reports separately on each operating segment that exceeds any of the following quantitative thresholds:

i. its reported revenue, from both external customers and intersegment sales or transfers, is 10% or more of the combined internal and external revenue of all the operating segments.

ii. the absolute amount of its reported profit or loss is equal to or greater than 10% : (i) the combined reported profit of all the operating segments that did not report a loss; (ii) the combined reported loss of all the operating segments that reported a loss.

iii. its assets represent 10% or more of the combined assets of all the operating segments.

Operating segments that do not meet any of the quantitative threshold may be treated as segments to be reported, in which case the information must be disclosed separately if management believes it could be useful for the users of the Consolidated Financial Statements.

Information about other business activities of the segments not separately reported is combined and disclosed in the "Other segments" category.

According to the information presented, the Bank's segments were selected based on an operating segment being a component of an entity that:

i. engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses from transactions with other components of the same entity);

ii. whose operating results are regularly reviewed by the entity's chief executive officer, who makes decisions about resources allocated to the segment and assess its performance; and

iii. for which discrete financial information is available.

e) Functional and presentation currency

The Bank, in accordance with IAS 21 "Effects of Variations in Exchange Rates of the Foreign Currency", has defined as functional and presentation currency the Chilean Peso, which is the currency of the primary economic environment in which the Bank operates, it also obeys the currency that influences the structure of costs and revenues.

Therefore, all balances and transactions denominated in currencies other than the Chilean Peso are considered as "Foreign currency".

Consolidated Financial Statements December 2017 / Banco Santander Chile 15

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

f) Foreign currency transactions

The Bank performs transactions in foreign currencies, mainly the U.S. dollar. Assets and liabilities denominated in foreign currencies and held by the Bank are translated to Chilean pesos based on the representative market rate published by Reuters at 1:30 p.m. on the month end date. The rate used was Ch\$616.85 per US\$1 for December, 2017 (Ch\$666.00 per US\$1 for December, 2016).

The amount of net foreign exchange gains and losses include recognition of the effects that exchange rate variations have on assets and liabilities denominated in foreign currencies and the profits and losses on foreign exchange spot and forward transactions undertaken by the Bank.

g) Definitions and classification of financial instruments

i. Definitions

A “financial instrument” is any contract that gives rise to a financial asset of an entity, and a financial liability or equity instrument of another entity.

An “equity instrument” is a legal transaction that evidences a residual interest on the assets of an entity deducting all of its liabilities.

A “financial derivative” is a financial instrument whose value changes in response to changes with regard to an observed market variable (such as an interest rate, a foreign exchange rate, a financial instrument’s price, or a market index, including credit ratings), whose initial investment is very small compared with other financial instruments having a similar response to changes in market factors, and which is generally settled at a future date.

“Hybrid financial instruments” are contracts that simultaneously include a non-derivative host contract together with a financial derivative, known as an embedded derivative, which is not separately transferable and has the effect that some of the cash flows of the hybrid contract vary in a way similar to a stand-alone derivative. In the first semester of 2017 and during 2016, Banco Santander did not keep implicit derivatives in its portfolio.

ii. Classification of financial assets for measurement purposes

Financial assets are classified into the following specified categories: financial assets trading investments at fair value through profit or loss (FVTPL), ‘held to maturity investments’, ‘available for sale investments’ (AFS) financial assets and ‘loans and accounts receivable from customers’. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. Regular way purchases or sales of financial assets require delivery of the asset within the time frame established by regulation or convention in the marketplace.

Financial assets are initially recognized at fair value plus, in the case of financial assets that aren’t accounted for at fair value with changes in profit or loss, transaction costs that are directly attributable to the acquisition or issue.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for loans and accounts receivables other than those financial assets classified at fair value through profit or loss.

Financial assets FVTPL - Trading investments

Financial assets are classified as FVTPL when the financial asset is either held for trading or it is designated as fair value through profit or loss.

A financial asset is classified as held for trading if:

- it has been acquired with the purpose of selling it in the short term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Bank manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument

Consolidated Financial Statements December 2017 / Banco Santander Chile 16

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

A financial asset other than a financial asset held for trading may be designated as FVTPL upon initial recognition if:

such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
the financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Bank's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
it forms part of a contract containing one or more embedded derivatives, and IAS 39 permits the entire combined contract to be designated as FVTPL.

Financial assets FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised incorporates any dividend or interest earned on the financial asset and is included in the 'net income (expense) from financial operations' line item.

Held to maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Bank has the positive intent and ability to hold to maturity. Subsequent to initial recognition, held-to-maturity investments are measured at amortised cost using the effective interest method less impairment.

Available for sale investments (AFS investments)

AFS investments are non-derivatives that are either designated as AFS or are not classified as (a) loans and accounts receivable from customers, (b) held-to-maturity investments or (c) financial assets at fair value through profit or loss (trading investments).

Financial instruments held by the Bank that are traded in an active market are classified as AFS and are stated at fair value at the end of each reporting period. The Bank also has investments in financial instruments that are not traded in an active market but that are also classified as AFS investments and stated at fair value at the end of each reporting period (because the directors consider that fair value can be reliably measured). Changes in the carrying amount of AFS monetary financial assets relating to changes in foreign currency rates, interest income calculated using the effective interest method and dividends on AFS equity investments are recognised in profit or loss. Other changes in the carrying amount of available for sale investments are recognised in other comprehensive income and accumulated under the heading of "Valuation Adjustment". When the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss.

Dividends on AFS equity instruments are recognised in profit or loss when the Bank's right to receive the dividends is established.

The fair value of AFS monetary financial assets denominated in a foreign currency is determined in that foreign currency and translated as the described in f) above. The foreign exchange gains and losses that are recognised in profit or loss are determined based on the amortised cost of the monetary asset.

Loans and accounts receivables from customers

Loans and accounts receivable from customers are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and accounts receivables from customers (including loans and accounts receivable from customers and interbank loans) are measured at amortised cost using the effective interest method, less any impairment.

Interest income is recognised by applying the effective interest rate, except for short-term receivables where discounting effects are immaterial.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

iii. Classification of financial assets for presentation purposes

For presentation purposes, the financial assets are classified by their nature into the following line items in the Consolidated Financial Statements:

Cash and deposits in banks: this line includes cash balances, checking accounts and on-demand deposits with the Central Bank of Chile and other domestic and foreign financial institutions. Amounts invested as overnight deposits are included in this item and in the corresponding items. If a special item for these operations is not mentioned, they will be included along with the accounts being reported.

Cash items in process of collection: this item includes values of documents in process of transfer and balances from operations that, as agreed, are not settled the same day, and purchase of currencies not yet received.

Trading investments: this item includes financial instruments held-for-trading and investments in mutual funds which must be adjusted to their fair value.

Financial derivative contracts: financial derivative contracts with positive fair values are presented in this item. It includes both independent contracts as well as derivatives that should and can be separated from a host contract, whether they are for trading or accounted for as derivatives held for hedging, as shown in Note 6.

Trading derivatives: includes the fair value of derivatives which do not qualify for hedge accounting, including embedded derivatives separated from hybrid financial instruments.

Hedging derivatives: includes the fair value of derivatives designated as being in a hedging relationship, including the embedded derivatives separated from the hybrid financial instruments.

Interbank loans: this item includes the balances of transactions with domestic and foreign banks, including the Central Bank of Chile, other than those reflected in certain other financial asset classifications listed above.

Loans and accounts receivables from customers: these loans are non-derivative financial assets for which fixed or determined amounts are charged, that are not listed on an active market and which the Bank does not intend to sell -immediately or in the short term. When the Bank is the lessor in a lease, and it substantially transfers the risks and rewards incidental to the leased asset, the transaction is presented in loans and accounts receivable from customers while the leased asset is removed from the Bank's financial statements.

Investment instruments: are classified into two categories: held-to-maturity investments, and available-for-sale -investments. The held-to-maturity investment classification includes only those instruments for which the Bank has the ability and intent to hold to maturity. The remaining investments are treated as available for sale.

iv. Classification of financial liabilities for measurement purposes

Financial liabilities are classified as either financial liabilities FVTPL or other financial liabilities:

Financial liabilities FVTPL

As of December 31, 2017 and 2016, the Bank does not have financial liabilities with changes in results.

Other financial liabilities

Other financial liabilities (including loans and accounts payable) are subsequently measured at amortised cost using the effective interest method.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Classification of financial liabilities for presentation purposes

Financial liabilities are classified by their nature into the following items in the Consolidated Statement of Financial Position:

Deposits and other on-demand liabilities: this includes all on-demand obligations except for term savings accounts, which are not considered on-demand instruments in view of their special characteristics. Obligations whose payment may be required during the period are deemed to be on-demand obligations. Operations which become callable the day after the closing date are not treated as on-demand obligations.

Cash items in process of collection: this item includes balances from asset purchase operations that are not settled the same day, and sale of currencies not yet delivered.

Obligations under repurchase agreements: this includes the balances of sales of financial instruments under securities -repurchase and loan agreements. The Bank does not record as own portfolio instruments acquired under repurchase agreements.

Time deposits and other time liabilities: this shows the balances of deposit transactions in which a term at the end of which they become callable has been stipulated.

Financial derivative contracts: this includes financial derivative contracts with negative fair values (i.e. a liability of the Bank), whether they are for trading or for hedge accounting, as set forth in Note 6.

Trading derivatives: includes the fair value of derivatives which do not qualify for hedge accounting, including embedded derivatives separated from hybrid financial instruments.

Hedging derivatives: includes the fair value of derivatives designated as being in a hedging relationship, including the embedded derivatives separated from the hybrid financial instruments.

Interbank borrowings: this includes obligations due to other domestic banks, foreign banks, or the Central Bank of Chile, other than those reflected in certain other financial liability classifications listed above.

Issued debt instruments: there are three types of instruments issued by the Bank: obligations under letters of credit, subordinated bonds and senior bonds placed in the local and foreign market.

Other financial liabilities: this item includes credit obligations to persons other than domestic banks, foreign banks, or the Central Bank of Chile, for financing purposes or operations in the normal course of business.

h) Valuation of financial instruments and recognition of fair value changes

Generally, financial assets and liabilities are initially recognized at fair value, which, in the absence of evidence against it, is deemed to be the transaction price. Financial instruments, other than those measured at fair value through profit or loss, are initially recognized at fair value plus transaction costs. Subsequently, and at the end of each reporting period, financial instruments are measured with the following criteria:

i. Valuation of financial instruments

Financial assets are measured according to their fair value, gross of any transaction costs that may be incurred in the course of a sale, except for credit investments and held to maturity investments.

According to IFRS 13 *Fair Value Measurement*, “fair value” is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When measuring fair value an entity shall take into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either: (a) in the principal market for the asset or liability, or (b) in the absence of a principal market, the most advantageous market for the asset or liability. Even when there is no observable market to provide pricing information in connection with the sale of an asset or the transfer of a liability at the measurement date, the fair value measurement shall assume that the transaction takes place, considered from the perspective of a potential market participant who intends to maximize value associated with the asset or liability

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

When using valuation techniques, the Bank shall maximize the use of relevant observable inputs and minimize the use of unobservable inputs as available. If an asset or a liability measured at fair value has a bid price and an ask price, the price within the bid-ask spread that is most representative of fair value in the circumstances shall be used to measure fair value regardless of where the input is categorized within the fair value hierarchy (i.e. Level 1, 2 or 3). IFRS 13 establishes a fair value hierarchy that categorizes into three levels the inputs to valuation techniques used to measure fair value. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs).

Every derivative is recorded in the Consolidated Statements of Financial Position at fair value as previously described. This value is compared to the valuation at the trade date. If the fair value is subsequently measured positive, this is recorded as an asset, if the fair value is subsequently measured negative, this is recorded as a liability. The fair value on the trade date is deemed, in the absence of evidence to the contrary, to be the transaction price. The changes in the fair value of derivatives from the trade date are recorded in "Net income (expense) from financial operations" in the Consolidated Statement of Income.

Specifically, the fair value of financial derivatives included in the portfolios of financial assets or liabilities held for trading is deemed to be their daily quoted price. If, for exceptional reasons, the quoted price cannot be determined on a given date, the fair value is determined using similar methods to those used to measure over the counter (OTC) derivatives. The fair value of OTC derivatives is the sum of the future cash flows resulting from the instrument, discounted to present value at the date of valuation ("present value" or "theoretical close") using valuation techniques commonly used by the financial markets: "net present value" (NPV) and option pricing models, among other methods. Also, within the fair value of derivatives are included Credit Valuation Adjustment (CVA) and Debit Valuation Adjustment (DVA), all with the objective that the fair value of each instrument includes the credit risk of its counterparty and Bank's own risk. Counterparty Credit Risk (CVA) is a valuation adjustment to derivatives contracted in non-organized markets as a result of exposure to counterparty credit risk. The CVA is calculated considering the potential exposure to each counterparty in future periods. Own-credit risk (DVA) is a valuation adjustment similar to the CVA, but generated by the Bank's credit risk assumed by our counterparties. As of December 31, 2017, the CVA and DVA are Ch \$ 8,142 million and Ch \$ 15,406 million, respectively.

“Loans and accounts receivable from customers” and Held-to-maturity instrument portfolio are measured at amortized cost using the effective interest method. Amortized cost is the acquisition cost of a financial asset or liability, plus or minus, as appropriate, prepayments of principal and the cumulative amortization (recorded in the consolidated income statement) of the difference between the initial cost and the maturity amount as calculated under the effective interest method. For financial assets, amortized cost also includes any reductions for impairment or uncollectibility. For loans and accounts receivable designated as hedged items in fair value hedges, the changes in their fair value related to the risk or risks being hedged are recorded in “Net income (expense) from financial operations”.

The “effective interest rate” is the discount rate that exactly matches the initial amount of a financial instrument to all its estimated cash flows over its remaining life. For fixed-rate financial instruments, the effective interest rate incorporates the contractual interest rate established on the acquisition date. Where applicable, the fees and transaction costs that are a part of the financial return are included. For floating-rate financial instruments, the effective interest rate matches the current rate of return until the date of the next review of interest rates.

The amounts at which the financial assets are recorded represent the Bank’s maximum exposure to credit risk as at the reporting date. The Bank has also received collateral and other credit enhancements to mitigate its exposure to credit risk, which consist mainly of mortgage guarantees, equity instruments and personal securities, assets under leasing agreements, assets acquired under repurchase agreements, securities loans and derivatives.

ii.

Valuation techniques

Financial instruments at fair value, determined on the basis of price quotations in active markets, include government debt securities, private sector debt securities, equity shares, short positions, and fixed-income securities issued.

In cases where price quotations cannot be observed in available markets, the Bank’s management determines a best estimate of the price that the market would set using its own internal models. In most cases, these models use data based on observable market parameters as significant inputs however for some valuations of financial instruments, significant inputs are unobservable in the market. To determine a value for those instruments, various techniques are employed to make these estimates, including the extrapolation of observable market data.

The most reliable evidence of the fair value of a financial instrument on initial recognition usually is the transaction price, however due to lack of availability of market information, the value of the instrument may be derived from other market transactions performed with the same or similar instruments or may be measured by using a valuation technique in which the variables used include only observable market data, mainly interest rates.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

The main techniques used as of September 30, 2017 and 2016 and as of December 31, 2016 by the Bank's internal models to determine the fair value of the financial instruments are as follows:

In the valuation of financial instruments permitting static hedging (mainly forwards and swaps), the present value method is used. Estimated future cash flows are discounted using the interest rate curves of the related currencies. The interest rate curves are generally observable market data.

- ii. In the valuation of financial instruments requiring dynamic hedging (mainly structured options and other structured instruments), the Black-Scholes model is normally used. Where appropriate, observable market inputs are used to obtain factors such as the bid-offer spread, exchange rates, volatility, correlation indexes and market liquidity.

In the valuation of certain financial instruments exposed to interest rate risk, such as interest rate futures, caps and floors, the present value method (futures) and the Black-Scholes model (plain vanilla options) are used. The main inputs used in these models are observable market data, including the related interest rate curves, volatilities, correlations and exchange rates.

The fair value of the financial instruments calculated by the aforementioned internal models considers contractual terms and observable market data, which include interest rates, credit risk, exchange rates, quoted market price of shares and raw materials, volatility, prepayments and liquidity. The Bank's management considers that its valuation models are not significantly subjective, since these methodologies can be adjusted and evaluated, as appropriate, through the internal calculation of fair value and the subsequent comparison with the related actively traded price.

iii. Hedging transactions

The Bank uses financial derivatives for the following purposes:

- i. to sell to customers who request these instruments in the management of their market and credit risks;
- ii. to use these derivatives in the management of the risks of the Bank entities' own positions and assets and liabilities ("hedging derivatives"), and
- iii. to obtain profits from changes in the price of these derivatives (trading derivatives).

All financial derivatives that are not held for hedging purposes are accounted for as trading derivatives.

A derivative qualifies for hedge accounting if all the following conditions are met:

1. The derivative hedges one of the following three types of exposure:

- a. Changes in the value of assets and liabilities due to fluctuations, among others, in inflation (UF), the interest rate and/or exchange rate to which the position or balance to be hedged is subject ("fair value hedge");
- b. Changes in the estimated cash flows arising from financial assets and liabilities, commitments and highly probable forecasted transactions ("cash flow hedge");
- c. The net investment in a foreign operation ("hedge of a net investment in a foreign operation").

2. It is effective in offsetting exposure inherent in the hedged item or position throughout the expected term of the hedge, which means that:

- a. At the date of arrangement the hedge is expected, under normal conditions, to be highly effective ("prospective effectiveness").
- b. There is sufficient evidence that the hedge was actually effective during the life of the hedged item or position ("retrospective effectiveness").

Consolidated Financial Statements December 2017 / Banco Santander Chile 21

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

There must be adequate documentation evidencing the specific designation of the financial derivative to hedge
3. certain balances or transactions and how this effective hedge was expected to be achieved and measured, provided that this is consistent with the Bank's management of own risks.

The changes in the value of financial instruments qualifying for hedge accounting are recorded as follows:

For fair value hedges, the gains or losses arising on both hedging instruments and the hedged items (attributable to
a. the type of risk being hedged) are included as "Net income (expense) from financial operations" in the Consolidated Statement of Income.

For fair value hedges of interest rate risk on a portfolio of financial instruments, gains or losses that arise in
measuring hedging instruments and other gains or losses due to changes in fair value of the underlying hedged item
b. (attributable to the hedged risk) are recorded in the Consolidated Financial Statement of Income under "Net income (expense) from financial operations".

For cash flow hedges, the change in fair value of the hedging instrument is included as "Cash flow hedge" in "Other
comprehensive income", until the hedged transaction occurs, thereafter being reclassified to the Consolidated
c. Statement of Income, unless the hedged transaction results in the recognition of non-financial assets or liabilities, in which case it is included in the cost of the non-financial asset or liability.

The differences in valuation of the hedging instrument corresponding to the ineffective portion of the cash flow
d. hedging transactions are recorded directly in the Consolidated Statement of Income under "Net income (expense) from financial operations".

If a derivative designated as a hedging instrument no longer meets the requirements described above due to expiration, ineffectiveness or for any other reason, hedge accounting treatment is discontinued. When "fair value hedging" is discontinued, the fair value adjustments to the carrying amount of the hedged item arising from the hedged risk are amortized to gain or loss from that date, when applicable.

When cash flow hedges are discontinued, any cumulative gain or loss of the hedging instrument recognized under “Other comprehensive income” (from the period when the hedge was effective) remains recorded in equity until the hedged transaction occurs, at which time it is recorded in the Consolidated Statement of Income, unless the transaction is no longer expected to occur, in which case any cumulative gain or loss is recorded immediately in the Consolidated Statement of Income.

iv. Derivatives embedded in hybrid financial instruments

Derivatives embedded in other financial instruments or in other host contracts are accounted for separately as derivatives if 1) their risks and characteristics are not closely related to the host contracts, 2) a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative, and 3) provided that the host contracts are not classified as “Trading investments” or as other financial assets (liabilities) at fair value through profit or loss.

v. Offsetting of financial instruments

Financial asset and liability balances are offset, i.e., reported in the Consolidated Statements of Financial Position at their net amount, only if there is a legally enforceable right to offset the recorded amounts and the Bank intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

vi. Derecognition of financial assets and liabilities

The accounting treatment of transfers of financial assets is determined by the extent and the manner in which the risks and rewards associated with the transferred assets are transferred to third parties:

i. If the Bank transfers substantially all the risks and rewards of ownership to third parties, as in the case of unconditional sales of financial assets, sales under repurchase agreements at fair value at the date of repurchase, sales of financial assets with a purchased call option or written put option deeply out of the money, utilization of assets in which the transferor does not retain subordinated debt nor grants any credit enhancement to the new holders, and other similar cases, the transferred financial asset is derecognized from the Consolidated Statement of Financial Position and any rights or obligations retained or created in the transfer are simultaneously recorded.

ii. If the Bank retains substantially all the risks and rewards of ownership associated with the transferred financial asset, as in the case of sales of financial assets under repurchase agreements at a fixed price or at the sale price plus interest, securities lending agreements under which the borrower undertakes to return the same or similar assets, and other similar cases, the transferred financial asset is not derecognized from the Consolidated Financial Statement of Financial Position and continues to be measured by the same criteria as those used before the transfer. However, the following items are recorded:

- An associated financial liability for an amount equal to the consideration received; this liability is subsequently measured at amortized cost.

- Both the income from the transferred (but not removed) financial asset as well as any expenses incurred due to the new financial liability.

iii. If the Bank neither transfers nor substantially retains all the risks and rewards of ownership associated with the transferred financial asset—as in the case of sales of financial assets with a purchased call option or written put option that is not deeply in or out of the money, securitization of assets in which the transferor retains a subordinated debt or other type of credit enhancement for a portion of the transferred asset, and other similar cases, the following distinction is made:

If the transferor does not retain control of the transferred financial asset: the asset is derecognized from the
a. Consolidated Statement of Financial Position and any rights or obligations retained or created in the transfer are recognized.

If the transferor retains control of the transferred financial asset: it continues to be recognized in the Consolidated
Statement of Financial Position for an amount equal to its exposure to changes in value and a financial liability
b. associated with the transferred financial asset is recorded. The net carrying amount of the transferred asset and the
associated liability is the amortized cost of the rights and obligations retained, if the transferred asset is measured at
amortized cost, or the fair value of the rights and obligations retained, if the transferred asset is measured at fair
value.

Accordingly, financial assets are only derecognized from the Consolidated Statement of Financial Position when the
rights over the cash flows they generate have terminated or when all the inherent risks and rewards of ownership have
been substantially transferred to third parties. Similarly, financial liabilities are only derecognized from the
Consolidated Financial Statement Financial Position when the obligations specified in the contract are discharged or
cancelled or the contract has matured.

i) Recognizing income and expenses

The most significant criteria used by the Bank to recognize its revenues and expenses are summarized as follows:

i. Interest revenue, interest expense, and similar items

Interest revenue, expense and similar items are recorded on an accrual basis using the effective interest method.

However, when a given operation or transaction is past due by 90 days or more, when it originated from a refinancing
or renegotiation, or when the Bank believes that the debtor poses a high risk of default, the interest and adjustments
pertaining to these transactions are not recorded directly in the Consolidated Statement of Income unless they have
been actually received.

This interest and adjustments are generally referred to as “suspended” and are recorded in they are reported as part of the
complementary information thereto and as memorandum accounts (Note 23). This interest is recognized as income,
when collected.

The resumption of interest income recognition of previously impaired loans only occurs when such loans become current (i.e. payments were received such that the loans are contractually past-due for less than 90 days) or they are no longer classified under the C3, C4, C5, or C6 risk categories (for loans individually evaluated for impairment).

Consolidated Financial Statements December 2017 / Banco Santander Chile 23

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

ii. Commissions, fees, and similar items

Fee and commission income and expenses are recognized in the Consolidated Statement of Income using criteria that vary according to their nature. The main criteria are:

(1) Fee and commission income and expenses on financial assets and liabilities measured at fair value through profit or loss are recognized when they are earned or paid.

Those arising from transactions or services that are performed over a period of time are recognized over the life of these transactions or services.

(2) Those relating to services provided in a single transaction are recognized when the single transaction is performed.

iii. Non-financial income and expenses

Non-financial income and expenses are recognized for accounting purposes on an accrual basis.

j) Impairment

i. Financial assets:

A financial asset, other than that at fair value through profit and loss, is evaluated on each financial statement filing date to determine whether objective evidence of impairment exists.

A financial asset or group of financial assets will be impaired if, and only if, objective evidence of impairment exists as a result of one or more events that occurred after initial recognition of the asset (“event causing the loss”), and this event or events causing the loss have an impact on the estimated future cash flows of a financial asset or group of financial assets.

An impairment loss relating to financial assets recorded at amortized cost is calculated as the difference between the recorded amount of the asset and the present value of estimated future cash flows, discounted at the financial asset’s original effective interest rate.

Individually significant financial assets are individually tested to determine their impairment. The remaining financial assets are evaluated collectively in groups that share similar credit risk characteristics.

All impairment losses are recorded in income. Any impairment loss relating to a financial asset available for sale previously recorded in equity is transferred to profit or loss.

The reversal of an impairment loss occurs only if it can be objectively related to an event occurring after the initial impairment loss was recorded. The reversal of an impairment loss shall not exceed the carrying amount that would have been determined if no impairment loss has been recognized for the asset in prior years. The reversal is recorded in income with the exception of available for sale equity financial assets, in which case it is recorded in other comprehensive income.

ii. Non-financial assets:

The Bank’s non-financial assets, excluding investment properties, are reviewed at the reporting date to determine whether they show signs of impairment (i.e. its carrying amount exceeds its recoverable amount). If any such evidence exists, the recoverable amount of the asset is estimated, in order to determine the extent of the impairment loss.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

In connection with other assets, impairment losses recorded in prior periods are assessed at each reporting date to determine whether the loss has decreased and should be reversed. The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss shall not exceed the carrying amount that would have been determined (net of amortization or depreciation) had no impairment loss been recognized for the asset in prior years. Losses for goodwill impairment recognized through capital gains are not reversed.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

k) Property, plant, and equipment

This category includes the amount of buildings, land, furniture, vehicles, computer hardware and other fixed assets owned by the consolidated entities or acquired under finance leases. Assets are classified according to their use as follows:

i. Property, plant and equipment for own use

Property, plant and equipment for own use includes but is not limited to tangible assets received by the consolidated entities in full or partial satisfaction of financial assets representing accounts receivable from third parties which are intended to be held for continuing own use and tangible assets acquired under finance leases. These assets are presented at acquisition cost less the related accumulated depreciation and, if applicable, any impairment losses resulting from comparing the net value of each item to the respective recoverable amount.

Depreciation is calculated using the straight line method over the acquisition cost of assets less their residual value, assuming that the land on which buildings and other structures stand has an indefinite life and, therefore, is not subject to depreciation.

The Bank applies the following useful lives for the tangible assets that comprise its assets:

The consolidated entities assess at each reporting date whether there is any indication that the carrying amount of any tangible asset exceeds its recoverable amount. If this is the case, the carrying amount of the asset is reduced to its recoverable amount and future depreciation charges are adjusted in accordance with the revised carrying amount and to the new remaining useful life.

The estimated useful lives of the items of property, plant and equipment held for own use are reviewed at the end of each reporting period to detect significant changes. If changes are detected, the useful lives of the assets are adjusted by correcting the depreciation charge to be recorded in the Consolidated Statement of Income in future years on the basis of the new useful lives.

Maintenance expenses relating to tangible assets held for own use are recorded as an expense in the period in which they are incurred.

ii. Assets leased out under operating leases

The criteria used to record the acquisition cost of assets leased out under operating leases, to calculate their depreciation and their respective estimated useful lives, and to record their impairment losses, are the same as those for property, plant and equipment held for own use.

Consolidated Financial Statements December 2017 / Banco Santander Chile 25

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

1) Leasing

i. Finance leases

Finance leases are leases that substantially transfer all the risks and rewards incidental to ownership of the leased asset to the lessee.

When a consolidated entity is the lessor of an asset, the sum of the present value of the lease payments receivable from the lessee, including the exercise price of the lessee's purchase option at the end of the lease term, which is equivalent to one additional lease payment and so is reasonably certain to be exercised, is recognized as lending to third parties and is therefore included under "Loans and accounts receivable from customers" in the Consolidated Statement of Financial Position.

When a consolidated entity is a lessee, it reports the cost of leased assets in the Consolidated Statement of Financial Position based on the nature of the leased asset, and simultaneously records a liability for the same amount (which is the lower of the fair value of the leased asset, and the sum of the present value of the lease payments payable to the lessor plus, if appropriate, the exercise price of the purchase option). The depreciation policy for these assets is the same as that for property, plant and equipment for own use.

In both cases, the finance income and finance expenses arising from these contracts are credited and debited, respectively, to "Interest income" and "Interest expense" in the Consolidated Statement of Income so as to achieve a constant rate of return over the lease term.

ii. Operating leases

In operating leases, ownership of the leased asset and substantially all the risks and rewards incidental thereto remain with the lessor.

When a consolidated entity is the lessor, it reports the acquisition cost of the leased assets under "Property, plant and equipment". The depreciation policy for these assets is the same as that for similar items of property, plant and equipment held for own use and revenues from operating leases is recorded on a straight line basis under "Other operating income" in the Consolidated Statement of Income.

When a consolidated entity is the lessee, the lease expenses, including any incentives granted by the lessor, are charged on a straight line basis to "Other operating expenses" in the Consolidated Statement of Income.

iii. Sale and leaseback transactions

For sale at fair value and operating leasebacks, the profit or loss generated is recorded at the time of sale. In the case of finance leasebacks, the profit or loss generated is amortized over the lease term.

m) Factored receivables

Factored receivables are valued at the amount disbursed by the Bank in exchange of invoices or other commercial instruments representing the credit which the transferor assigns to the Bank. The price difference between the amounts disbursed and the actual face value of the credits is recorded as interest income in the Consolidated Statement of Income using the effective interest method over the financing period.

When the assignment of these instruments involves no liability on the part of the assignee, the Bank assumes the risks of insolvency of the parties responsible for payment.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

n) Intangible assets

Intangible assets are identified as non-monetary assets (separately identifiable from other assets) without physical substance which arise as a result of legal or contractual rights. The Bank recognizes an intangible asset, whether purchased or self-created (at cost), when the cost of the asset can be measured reliably and it is probable that the future economic benefits that are attributable to the asset will flow to the Bank.

Intangible assets are recorded initially at acquisition or production cost and are subsequently measured at cost less any accumulated amortization and any accumulated impairment losses.

Internally developed computer software is recorded as an intangible asset if, among other requirements (basically the Bank's ability to use or sell it), it can be identified and its ability to generate future economic benefits can be demonstrated. The estimated useful life for software is 3 years.

Intangible assets are amortized on a straight-line basis over their estimated useful life; which has been defined as 36 months.

Expenditure on research activities is recorded as an expense in the year in which it is incurred and cannot be subsequently capitalized.

o) Cash and cash equivalents

The indirect method is used to prepare the cash flow statement, starting with the Bank's consolidated pre-tax income and incorporating non-cash transactions, as well as income and expenses associated with cash flows, which are classified as investing or financing activities.

The cash flow statement was prepared considering the following definitions:

- i. Cash flows: Inflows and outflows of cash and cash equivalents, such as deposits with the Central Bank of Chile, deposits in domestic banks, and deposits in foreign banks.
- ii. Operating activities: Principal revenue-producing activities performed by banks and other activities that cannot be classified as investing or financing activities.
- iii. Investing activities: The acquisition and disposal of long-term assets and other investments not included in cash and cash equivalents.
- iv. Financing Activities: Activities that result in changes in the size and composition of equity and liabilities that are not operating or investing activities.

p) Allowances for loan losses

The Bank continuously evaluates the entire loan portfolio and contingent loans, as it is established by the SBIF, to timely provide the necessary and sufficient provisions to cover expected losses associated with the characteristics of the debtors and their loans, which determine payment behavior and recovery.

The Bank has established allowances to cover probable losses on loans and account receivables in accordance with instructions issued by Superintendency of Banks and Financial Institutions (SBIF) and models of credit risk rating and assessment approved by the Board's Committee, including the amendments introduced by Circular No. 3,573 (and its further modifications) applicable as of January 1, 2016 which establishes a standard method for residential mortgage loans and complements and specifies instructions on provisions and loans classified in the impaired portfolio, and subsequent amendments.

The Bank uses the following models established by the SBIF, to evaluate its loan portfolio and credit risk:

Individual assessment - where the Bank assesses a debtor as individually significant when their loans are significant, -or when the debtor cannot be classified within a group of financial assets with similar credit risk characteristics, due to its size, complexity or level of exposure.

-Group assessment - a group assessment is relevant for analyzing a large number of transactions with small individual balances due from individuals or small companies. The Bank groups debtors with similar credit risk characteristics

giving to each group a default probability and recovery rate based on a historical analysis. The Bank has implemented standard models for mortgage loans, established in Circular N°3,573 (modified by Circular N°3,584), and internal models for commercial and consumer loans.

Consolidated Financial Statements December 2017 / Banco Santander Chile 27

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

I. Allowances for individual assessment

An individual assessment of commercial debtors is necessary according to the SBIF, in the case of companies which, due to their size, complexity or level of exposure, must be known and analyzed in detail.

The analysis of the debtor is primarily focused on their credit quality and their risk category classification of the debtor and of their respective contingent loans and loans. These are assigned to one of the following portfolio categories: Normal, Substandard and Impaired. The risk factors considered are: industry or economic sector, owners or managers, financial situation and payment ability, and payment behavior.

The portfolio categories and their definitions are as follows:

Normal Portfolio includes debtors with a payment ability that allows them to meet their obligations and i. commitments. Evaluations of the current economic and financial environment do not indicate that this will change. The classifications assigned to this portfolio are categories from A1 to A6.

Substandard Portfolio includes debtors with financial difficulties or a significant deterioration of their payment ii. ability. There is reasonable doubt concerning the future reimbursement of the capital and interest within the contractual terms, with limited ability to meet short-term financial obligations. The classifications assigned to this portfolio are categories from B1 to B4.

Impaired Portfolio includes debtors and their loans where repayment is considered remote, with a reduced or no iii. likelihood of repayment. This portfolio includes debtors who have stopped paying their loans or that indicate that they will stop paying, as well as those who require forced debt restructuring, reducing the obligation or delaying the term of the capital or interest, and any other debtor who is over 90 days overdue in his payment of interest or capital. The classifications assigned to this portfolio are categories from C1 to C6.

Normal and Substandard Compliance Portfolio

As part of individual assessment, the Bank classifies debtors into the following categories, assigning them a probability of non-performance (PNP) and severity (SEV), which result in the expected loss percentages.

Portfolio	Debtor's Category	Probability of	Severity (%)	Expected Loss (%)
		Non-Performance (%)		
Normal portfolio	A1	0.04	90.0	0.03600
	A2	0.10	82.5	0.08250
	A3	0.25	87.5	0.21875
	A4	2.00	87.5	1.75000
	A5	4.75	90.0	4.27500
	A6	10.00	90.0	9.00000
Substandard portfolio	B1	15.00	92.5	13.87500
	B2	22.00	92.5	20.35000
	B3	33.00	97.5	32.17500
	B4	45.00	97.5	43.87500

The Bank first determines all credit exposures, which includes the accounting balances of loans and accounts receivable from customers plus contingent loans, less any amount recovered through executing the financial guarantees or collateral covering the operations. The percentages of expected loss are applied to this exposure. In the case of collateral, the Bank must demonstrate that the value assigned reasonably reflects the value obtainable on disposal of the assets or equity instruments. When the credit risk of the debtor is substituted for the credit quality of the collateral or guarantor, this methodology is applicable only when the guarantor or surety is an entity qualified in a assimilable investment grade by a local or international company rating agency recognized by the SBIF. Guaranteed securities cannot be deducted from the exposure amount, only financial guarantees and collateral can be considered.

Notwithstanding the foregoing, the Bank must maintain a minimum provision of 0.5% over loans and contingent loans in the normal portfolio.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Impaired Portfolio

The impaired portfolio includes all loans and the entire value of contingent loans of the debtors that are over 90 days overdue on the payment of interest or principal of any loan at the end of the month. It also includes debtors who have been granted a loan to refinance loans over 60 days overdue, as well as debtors who have undergone forced restructuring or partial debt condonation.

The impaired portfolio excludes: a) residential mortgage loans, with payments less than 90 days overdue; and, b) loans to finance higher education according to Law 20,027, provided the breach conditions outlined in Circular No. 3,454 of December 10, 2008 are not fulfilled.

The provision for an impaired portfolio is calculated by determining the expected loss rate for the exposure, adjusting for amounts recoverable through available financial guarantees and deducting the present value of recoveries made through collection services after the related expenses.

Once the expected loss range is determined, the related provision percentage is applied over the exposure amount, which includes loans and contingent loans related to the debtor.

The allowance rates applied over the calculated exposure are as follows:

Classification	Estimated range of loss	Allowance
C1	Up to 3%	2%
C2	Greater than 3% and less than 20%	10%
C3	Greater than 20% and less than 30%	25%
C4	Greater than 30% and less than 50%	40%

C5	Greater than 50% and less than 80%	65%
C6	Greater than 80%	90%

Loans are maintained in the impaired portfolio until their payment ability is normal, notwithstanding the write off of each particular credit that meets conditions of Title II of Chapter B-2. Once the circumstances that led to classification in the Impaired Portfolio have been overcome, the debtor can be removed from this portfolio once all the following conditions are met:

- i. the debtor has no obligations of the debtor with the Bank more than 30 days overdue;
- ii. the debtor has not been granted loans to pay its obligations;
- iii. at least one of the payments include the amortization of capital;
- iv. if the debtor has made partial loan payments in the last six months, two payments have already been made;
- v. if the debtor must pay monthly installments for one or more loans, four consecutive installments have been made;
- vi. the debtor does not appear to have bad debts in the information provided by the SBIF, except for insignificant amounts.

II. Allowances for group assessments

Group assessments are used to estimate allowances required for loans with low balances related to individuals or small companies.

Group assessments require the formation of groups of loans with similar characteristics by type of debtor and loan conditions, in order to establish both the group payment behavior and the recoveries of their defaulted loans, using technically substantiated estimates and prudential criteria. The model used is based on the characteristics of the debtor, payment history, outstanding loans and default among other relevant factors.

The Bank uses methodologies to establish credit risk, based on internal models to estimate the allowances for the group-evaluated portfolio. This portfolio includes commercial loans with debtors that are not assessed individually, mortgage and consumer loans (including installment loans, credit cards and overdraft lines). These methods allow the Bank to independently identify the portfolio behavior and establish the provision required to cover losses arising during the year.

The customers are classified according to their internal and external characteristics into profiles, using a customer-portfolio model to differentiate each portfolio's risk in an appropriate manner. This is known as the profile allocation method.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

The profile allocation method is based on a statistical construction model that establishes a relationship through logistic regression between variables (for example default, payment behavior outside the Bank, socio-demographic data) and a response variable which determines the client's risk, which in this case is over 90 days overdue. Hence, common profiles are established and assigned a Probability of Non-Performance (PNP) and a recovery rate based on a historical analysis known as Severity (SEV).

Therefore, once the customers have been profiled, and the loan's profile assigned a PNP and a SEV, the exposure at default (EXP) is calculated. This exposure includes the book value of the loans and accounts receivable from the customer, plus contingent loans, less any amount that can be recovered by executing guarantees (for credits other than consumer loans).

Notwithstanding the above, on establishing provisions associated with housing loans, the Bank must recognize minimum provisions according to standard methods established by the SBIF for this type of loan. While this is considered to be a prudent minimum base, it does not relieve the Bank of its responsibility to have its own methodologies of determining adequate provisions to protect the credit risk of the portfolio.

Standard method of residential mortgage loan provisions

As of January 1, 2016 and in accordance with Circular No. 3,573 issued by the SBIF, the Bank began applying the standard method of provisions for residential mortgage loans. According to this method, the expected loss factor applicable to residential mortgage loans will depend on the default of each loan and the relationship between the outstanding principal of each loan and the value of the associated mortgage guarantee (Loans to Value, LTV) at the end of each month.

The allowance rates applied according to default and LTV are the following:

LTV Range	Days overdue at month end	0	1-29	30-59	60-89	Impaired portfolio
LTV≤40%	PNP(%)	1.0916	21.3407	46.0536	75.1614	100
	Severity (%)	0.0225	0.0441	0.0482	0.0482	0.0537
	Expected Loss (%)	0.0002	0.0094	0.0222	0.0362	0.0537
40%< LTV ≤80%	PNP(%)	1.9158	27.4332	52.0824	78.9511	100
	Severity (%)	2.1955	2.8233	2.9192	2.9192	3.0413
	Expected Loss (%)	0.0421	0.7745	1.5204	2.3047	3.0413
80%< LTV ≤90%	PNP(%)	2.5150	27.9300	52.5800	79.6952	100
	Severity (%)	21.5527	21.6600	21.9200	22.1331	22.2310
	Expected Loss (%)	0.5421	6.0496	11.5255	17.6390	22.2310
LTV >90%	PNP(%)	2.7400	28.4300	53.0800	80.3677	100
	Severity (%)	27.2000	29.0300	29.5900	30.1558	30.2436
	Expected Loss (%)	0.7453	8.2532	15.7064	24.2355	30.2436

LTV =Loan capital/Value of guarantee

If the same debtor has more than one residential mortgage loan with the Bank and one of them over 90 days overdue, all their loans shall be allocated to the impaired portfolio, calculating provisions for each them in accordance with their respective LTV.

For residential mortgage loans related to housing programs and grants from the Chilean government, the allowance rate may be weighted by a factor of loss mitigation (LM), which depends on the LTV percentage and the price of the property in the deed of sale (S), as long as the debtor has contracted auction insurance provided by the Chilean government.

III. Additional provisions

According to SBIF regulation, banks are allowed to establish provisions over the limits already described, to protect themselves from the risk of non-predictable economical fluctuations that could affect the macro-economic environment or a specific economic sector.

According to No. 10 of Chapter B-1 from the SBIF Compendium of Accounting Standards, these provisions will be recorded in liabilities, similar to provisions for contingent loans.

IV. Charge-offs

As a general rule, charge-offs should be done when the contract rights over cash flow expire. In the case of loans, even if the above does not happen, the Bank will charge-off these amounts in accordance with Title II of Chapter B-2 of the Compendium of Accounting Standards (SBIF).

These charge-offs refer to the derecognition from the Consolidated Statements of Financial Position of the respective loan, including any not yet due future payments in the case of installment loans or leasing transactions (for which partial charge-offs do not exist).

Consolidated Financial Statements December 2017 / Banco Santander Chile 30

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Charge-offs are always recorded as a charge to loan risk allowances according to Chapter B-1 of the Compendium of Accounting Regulations, no matter the reason for the charge-off. Any payment received related to a loan previously charged-off will be recognized as recovery of loan previously charged-off at the Consolidated Statement of Income.

Loan and accounts receivable charge-offs are recorded for overdue, past due, and current installments when they exceed the time periods described below since reaching overdue status:

Type of loan	Term
Consumer loans with or without collateral	6 months
Other transactions without collateral	24 months
Commercial loans with collateral	36 months
Mortgage loans	48 months
Consumer leasing	6 months
Other non-mortgage leasing transactions	12 months
Mortgage leasing (household and business)	36 months

V. Recovery of loans previously charged off and accounts receivable from customers

Any recovery on “Loans and accounts receivable from customers” previously charged-off will be recognized as a reduction in the credit risk provisions in the Consolidated Statement of Income.

Any renegotiation of a loan previously charged-off will not give rise to income, as long as the operation continues being considered as impaired. The cash payments received must be treated as recoveries of charged-off loans.

The renegotiated loan can only be included again in assets if it is no longer considered as impaired, also recognizing the capitalization income as recovery of charged-off loans.

q) Provisions, contingent assets, and contingent liabilities

Provisions are liabilities of uncertain timing or amount. Provisions are recognized in the Consolidated Statements of Financial Position when the Bank:

- i. has a present obligation (legal or constructive) as a result of past events, and
- ii. it is probable that an outflow of resources will be required to settle these obligations and the amount of these resources can be reliably measured.

Contingent assets or contingent liabilities are any potential rights or obligations arising from past events whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events that are not wholly within control of the Bank.

The Consolidated Financial Statements reflect all significant provisions for which it is estimated that the probability of having to meet the obligation is more than likely than not. Provisions are quantified using the best available information regarding the consequences of the event giving rise to them and are reviewed and adjusted at the end of accounting period. Provisions are used when the liabilities for which they were originally recognized are settled. Partial or total reversals are recognized when such liabilities cease to exist or are reduced.

Provisions are classified according to the obligation covered as follows:

- Provision for employee salaries and expenses
- Provision for mandatory dividends
- Provision for contingent loan risks
- Provisions for contingencies

r) Income taxes and deferred taxes

The Bank records, when appropriate, deferred tax assets and liabilities for the estimated future tax effects attributable to differences between the carrying amount of assets and liabilities and their tax bases. The measurement of deferred tax assets and liabilities is based on the tax rate, in accordance with the applicable tax laws, using the tax rate that applies to the period when the deferred asset and liability will be recovered or settled. The future effects of changes in tax legislation or tax rates are recorded in deferred taxes from the date on which the law is enacted or substantially enacted.

Consolidated Financial Statements December 2017 / Banco Santander Chile 31

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

s) Use of estimates

The preparation of the financial statements requires the Bank's management to make estimates and assumptions that affect the application of the accounting policies and the reported values of assets, liabilities, revenues and expenses. Actual results may differ from these estimates.

In certain cases, International Financial Reporting Standards (IFRS) require that assets or liabilities be recorded or disclosed at their fair values. The fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between informed market participants at the measurement date. When available, quoted market prices in active markets have been used as the basis for measurement. When quoted market prices in active markets are not available, the Bank has estimated such values based on the best information available, including the use of internal modeling and other valuation techniques.

The Bank has established allowances to cover cover probable losses, to estimate allowances. These allowances must be regularly reviewed taking into consideration factors such as changes in the nature and volume of the loan portfolio, trends in forecasted portfolio quality, credit quality and economic conditions that may adversely affect the borrowers' ability to pay. Increases in the allowances for loan losses are reflected as "Provision for loan losses" in the Consolidated Statement of Income.

Loans are charged-off when the contractual rights for the cash flows expire, however, for loans and accounts receivable from customers the bank will charge-off in accordance with Title II of Chapter B-2 of the Compendium of Accounting Standards issued by the SBIF. Charge-offs are recorded as a reduction of the allowance for loan losses.

The relevant estimates and assumptions made to calculate provisions are regularly reviewed by the Bank's Management to quantify certain assets, liabilities, revenues, expenses, and commitments.

Revised accounting estimates are recorded in the period in which the estimate is revised and in any affected future period.

These estimates are based on the best available information and mainly refer to:

- Allowances for loan losses (Notes 8, 9, and 30)
- Impairment losses of certain assets (Notes 7, 8, 9, 10, and 33)
- The useful lives of tangible and intangible assets (Notes 12, 13 and 33)
- The fair value of assets and liabilities (Notes 5, 6, 7, 10 and 37)
- Commitments and contingencies (Note 22)
- Current and deferred taxes (Note 14)

t) Non-current assets held for sale

Non-current assets (or a group of assets and liabilities) that expect to be recovered mainly through the sale of these items rather than through their continued use, are classified as held for sale. Immediately prior to this classification, assets (or elements of a disposable group) are valued in accordance with the Bank's policies. The assets (or disposal group) are subsequently valued at the lower of carrying amount and fair value less selling costs.

As of December 31, 2017 and 2016, did not have any non-current asses classified as held for sale.

Assets received or awarded in lieu of payment

Assets received or awarded in lieu of payment of loans and accounts receivable from clients are recognized at their fair value. A price is agreed upon by the parties through negotiation or, when the parties do not reach an agreement, at the amount at which the Bank is awarded those assets at a judicial auction. In the both cases, an independent appraisal is performed.

These assets are subsequently valued at the lower of the amount initially recorded and the net realizable value, which corresponds to its fair value (liquidity value determined through an independent appraisal) less their respective costs of sale. The difference between both are recognized in the Consolidated Statement under "Other operating expenses".

At the end of each year the Bank performs an analysis to review the “selling costs” of assets received or awarded in lieu of payments which will be applied at this date and during the following year. As of December 31, 2017 the average selling cost has been estimated at 3.4% of the appraisal value (5.1% for December 31, 2016).

Independent appraisals are obtained at least every 18 months and fair values are adjusted accordingly.

In general, it is estimated that these assets will be disposed of within a term of one year from its date of award. As set forth in article 84 of the General Banking Act, those assets that are not sold within that term are charged-off in a single installment.

Consolidated Financial Statements December 2017 / Banco Santander Chile 32

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

u) Earnings per share

Basic earnings per share are calculated by dividing the net income attributable to the equity holders of the Bank by the weighted average number of shares outstanding during the reported period.

Diluted earnings per share are calculated in a similar manner to basic earnings, but the weighted average number of outstanding shares is adjusted to take into consideration the potential diluting effect of stock options, warrants, and convertible debt.

As of December 31, 2017 and 2016, the Bank did not have any instruments that generated dilution.

v) Temporary acquisition (assignment) of assets and liabilities

Purchases or sales of financial assets under non-optional repurchase agreements at a fixed price (repos) are recorded in the Consolidated Statements of Financial Position as an financial assignment based on the nature of the debtor (creditor) under “Deposits in the Central Bank of Chile,” “Deposits in financial institutions” or “Loans and accounts receivable from customers” (“Central Bank of Chile deposits,” “Deposits from financial institutions” or “Customer deposits”).

Differences between the purchase and sale prices are recorded as financial interest over the term of the contract.

w) Assets under management and investment funds managed by the Bank

Assets owned by third parties and managed by certain companies that are within the Bank’s scope of consolidation (Santander S.A. Sociedad Securitizadora), are not included in the Consolidated Statement of Financial Position.

Management fees are included in “Fee and commission income” in the Consolidated Statement of Income.

x) Provision for mandatory dividends

As of December 31, 2017 and 2016, the Bank recorded a provision for minimum mandatory dividends. This provision is made pursuant to Article 79 of the Corporations Act, which is in accordance with the Bank’s internal policy, which requires at least 30% of net income for the period is distributed, except in the case of a contrary resolution adopted at the respective shareholders’ meeting by unanimous vote of the outstanding shares. This provision is recorded as a deduction from “Retained earnings” – “Provision for mandatory dividends” in the Consolidated Statement of Changes in Equity with offset to Provisions.

y) Employee benefits

i. Post-employment benefits – Defined Benefit Plan:

According to current collective labor agreements and other agreements, the Bank has an additional benefit available to its principal executives, consisting of a pension plan, whose purpose is to endow them with funds for a better supplementary pension upon their retirement.

Features of the Plan:

The main features of the Post-Employment Benefits Plan promoted by the Banco Santander Chile are:

- I. Aimed at the Bank’s management.
- II. The general requirement is that the beneficiary must still be employed by the Bank when reaching 60 years old.
- III. The Bank will mixed collective life and savings insurance policy for each beneficiary in the plan. Regular voluntary installments will be paid into this fund by the beneficiary and matched by the Bank.
- IV. The Bank will be responsible for granting the benefits directly.

The projected unit credit method is used to calculate the present value of the defined benefit obligation and the current service cost.

Components of defined benefit cost include:

- current service cost and any past service cost, which are recognized in profit or loss for the period;
- net interest on the liability (asset) for net defined benefit, which is recognized in profit or loss for the period;
- new liability (asset) remeasurements for net defined benefit include:
 - (a) actuarial gains and losses;
 - (b) the performance of plan assets, and;
 - (c) changes in the effect of the asset ceiling which are recognized in other comprehensive income.

Consolidated Financial Statements December 2017 / Banco Santander Chile 33

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

The liability (asset) for net defined benefit is the deficit or surplus, calculated as the difference between the present value of the defined benefit obligation less the fair value of plan assets.

Plan assets comprise the pension fund taken out by the Group with a third party that is not a related party. These assets are held by an entity legally separated from the Bank and exist solely to pay benefits to employees.

The Bank recognizes the present service cost and the net interest of the Personnel wages and expenses on the Consolidated Statement of Income. Given the plan's structure, it does not generate actuarial gains or losses. The plan's performance is established and fixed during the period; consequently, there are no changes in the asset's cap. Accordingly, there are no amounts recognized in other comprehensive income.

The post-employment benefits liability, recognized in the Consolidated Statement of Financial Position, represents the deficit or surplus in the defined benefit plans of the Bank. Any surplus resulting from the calculation is limited to the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions.

When employees leave the plan before meeting the requirements to be eligible for the benefit, contributions made by the Bank are reduced.

ii. Severance provision:

Severance provision for years of employment are recorded only when they actually occur or upon the availability of a formal and detailed plan in which the fundamental modifications to be made are identified, provided that such plan has already started to be implemented or its principal features have been publicly announced, or objective facts about its execution are known.

iii. Cash-settled share based compensation

The Bank allocates cash-settled share based compensation to executives of the Bank and its Subsidiaries in accordance with IFRS 2. The Bank measures the services received and the obligation incurred at fair value.

Until the obligation is settled, the Bank calculates the fair value at the end of each reporting period, as well as at the date of settlement, recognizing any change in fair value in the income statement for the period.

z) New accounting pronouncements

i. Adoption of new accounting standards and instructions issued both by the Superintendency of Banks and Financial Institutions and the International Accounting Standards Board

As of the issue date of these Consolidated Financial Statements, the following new accounting pronouncements have been issued by the both the SBIF and the IASB, which have been fully incorporated by the Bank and are detailed as follows:

1. Accounting Standards Issued by the SBIF

Circular No. 3,621. Compendium of Accounting Standards. Chapters B-1 and C-3. Credits guaranteed by the School Infrastructure Guarantee Fund. Complementary instructions -This circular issued on March 15, 2017 introduces the following modifications:

- The title of No. 4 of Chapter B-1 is replaced by the following: "4 Warranty, goods delivered under lease, factoring operations and School Infrastructure Guarantee fund".
- The section 4.4 "Guarantee Fund for School Infrastructure" is added to this section, for purposes of determining provisions applicable to the substitution of credit risk of direct credit for the credibility of the referred fund, assigning for this purpose category A1 .
- The following item is added: 1302.1.50 Credits for school infrastructure Law N° 20.845.

This rule is immediately applicable. *This change had no impact on the Bank.*

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Circular No. 3,615. Compendium of Accounting Standards. Chapter C-2. Report on the review of financial information - The circular issued on December 12, 2016, aims to increase the level of transparency of the Financial information provided by the banks. Therefore, the SBIF has considered it pertinent that as from June 2017, the financial statements referred to June 30 will be subject to a review report of the financial information issued by its external auditors. In accordance with NAGA No. 63, AU930, or its international equivalent, SAS No. 122, Section AU-C 930, which must be sent to the SBIF on the same day of its publication, or the immediately preceding or following bank business day.

If a bank does not have the necessary information to prepare financial statements with its respective notes within the period established in the law, it shall at least publish and send to the SBIF the Statement of Financial Position and Income Statement, adding a note with the date in which they will be available, although they must be available within the first fortnight of the following month.

In the case of the financial statements referred to as of June 30, the banks must send, by August 15, the review report of their external auditors. *A review of the required regulations has been carried out, including the respective conclusion on the consolidated intermediate financial statements reported to the SBIF.*

2. Accounting Standards issued by the International Accounting Standards Board

Amendment to IAS 12 Recognition of deferred tax assets related to unrealized losses - On January 19, 2016, the IASB issued this amendment to clarify the recognition of deferred assets related to debt instruments measured at fair value due to different recognition practices. Of deferred assets, it is clarified that:

- Unrealized losses on debt instruments measured at fair value and measures at cost for tax purposes generate a deductible temporary difference regardless of whether the holder of the debt instrument expects to recover the book value of the debt instrument by sale or use.
- The book value of an asset does not limit the estimate of probable taxable profits.

- The estimate of future taxable income excludes tax deductions from the reverse of deductible temporary differences.

This regulation is applicable as of January 1, 2017. *This change had no impact for the Bank.*

Amendment to IAS 7 Statement of Cash Flow. Disclosure Initiative - This amendment issued on January 29, 2016 improves the information provided to users of the financial statements related to the entities' financing activities. The purpose of the amendment is to provide disclosures that enable users of the financial statements to assess changes in liabilities generated from financing operations. One way to comply with this new disclosure is to provide a reconciliation between the initial and final balance in the EFE for liabilities generated from financing activities.

This regulation is applicable from January 1, 2017, with early application allowed. *The implementation of this amendment had no material impact on the Bank's consolidated financial statements.*

Annual improvements, cycle 2014-2016

Amendment to IFRS 12 Disclosures of Interest in Other Entities - Clarifies the scope of the standard by specifying that the disclosure requirements of the standard, except for paragraphs B10-B16, apply to interest on an entity listed in paragraph 5 (subsidiaries, joint ventures, associates and non-consolidated structured entities) that are classified as held for sale, held for distribution or as discontinued operations in accordance with IFRS 5 Non-current assets held for sale and discontinued operations.

The amendment to IFRS 12 is for annual periods beginning on or after 1 January 2017. *The implementation of this amendment had no material impact on the Bank's consolidated financial statements.*

New accounting standards and instructions issued by both the Superintendency of Banks and Financial Institutions and by the International Accounting Standards Board that have not come into effect as of December 31, 2017

As of the closing date of these financial statements, new International Financial Reporting Standards had been published as well as interpretations of them and SBIF rules, which were not mandatory as of September 30, 2017. Although in some cases the application is permitted by the IASB, the Bank has not made its application on that date.

1. Accounting Standards issued by the Superintendency of Banks and Financial Institutions

As of December 31, 2017, there are no new Accounting Standards issued by the Superintendency of Banks and Financial Institutions.

Consolidated Financial Statements December 2017 / Banco Santander Chile 35

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

2. Accounting Standards issued by the International Accounting Standards Board

IFRS 9, Financial Instruments -On November 12, 2009, the International Accounting Standards Board (IASB) issued IFRS 9, Financial Instruments. This Standard introduces new requirements for the classification and measurement of financial assets. IFRS 9 specifies how an entity should classify and measure its financial assets. Requires that all financial assets are classified in their entirety on the basis of the entity's business model for the management of financial assets and the characteristics of the contractual cash flows of financial assets.

On October 28, 2010, the IASB published a revised version of IFRS 9, Financial Instruments. The revised Standard retains the requirements for the classification and measurement of financial assets that was published in November 2009, but adds guidelines on the classification and measurement of financial liabilities. Likewise, it has replicated the guidelines on the recognition of financial instruments and the implementation guides related from IAS 39 to IFRS 9. These new guidelines conclude the first phase of the IASB project to replace IAS 39. The other phases, impairment and hedge accounting, have not yet been finalized.

The guidance included in IFRS 9 on the classification and measurement of financial assets has not changed from those established in IAS 39. In other words, financial liabilities will continue to be measured either at amortized cost or at fair value with changes in results. The concept of bifurcation of derivatives incorporated in a contract for a financial asset has not changed. Financial liabilities held for trading will continue to be measured at fair value with changes in results, and all other financial assets will be measured at amortized cost unless the value option is applied reasonable using the criteria currently in IAS 39.

Notwithstanding the foregoing, there are two differences with respect to IAS 39:

- The presentation of the effects of changes in fair value attributable to the credit risk of a liability; and
- The elimination of the cost exemption for liabilities derivatives to be settled through the delivery of non-traded equity instruments.

On December 16, 2011, the IASB issued Mandatory Application Date of IFRS 9 and Disclosures of the Transition, deferring the effective date of both the 2009 and 2010 versions to annual periods beginning on or after January 1, 2015. Prior to the amendments, the application of IFRS 9 was mandatory for annual periods beginning on or after 2013. The amendments change the requirements for the transition from IAS 39 Financial Instruments: Recognition and Measurement to IFRS 9. In addition, they also modify IFRS 7 Financial Instruments: Disclosures to add certain requirements in the reporting period in which the date of application of IFRS 9 is included. Finally, on July 24, 2014, it is established that the date Effective application of this rule will be for annual periods beginning on January 1, 2018.

On November 19, 2013 ASB issued "Amendment to IFRS 9: hedge accounting and amendments to IFRS 9, IFRS 7 and IAS 39", which includes a new general hedge accounting model, which is more closely aligned with risk management, providing more useful information to the users of the financial statements. On the other hand, the requirements relating to the fair value option for financial liabilities were changed to address the credit risk itself, this improvement establishes that the effects of changes in the credit risk of a liability should not affect the result of the period unless the liabilities remain to negotiate; the early adoption of this modification is permitted without the application of the other requirements of IFRS 9. In addition, it conditions the effective date of entry into force upon completion of the IFRS 9 project, allowing its adoption in the same way.

On July 24, 2014, the IASB published the final version of IFRS 9 - Financial Instruments, including the regulations already issued together with a new expected loss model and minor modifications to the classification and measurement requirements for financial assets, adding a new category of financial instruments: assets at fair value with changes in other comprehensive result for certain debt instruments. It also includes an additional guide on how to apply the business model and testing of contractual cash flow characteristics.

On October 12, 2017, "Amendment to IFRS 9: Characteristics of Anticipated Cancellation with Negative Compensation" was published, which clarifies that according to the current requirements of IFRS 9, the conditions established in Test SPPI are not met if the Bank should make a settlement payment when the client decides to terminate the credit. With the introduction of this modification, in relation to termination rights, it is allowed to measure at amortized cost (or FVOCI) in the case of negative compensation.

This regulation is effective as of January 1, 2018. Early application is allowed. The Administration in accordance with what is established by the Superintendency of Banks and Financial Institutions, will not apply this norm in advance or in the future, as long as the aforementioned Superintendency does not provide it as a mandatory standard for all banks.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

IFRS 15, Income from contracts with clients - On May 28, 2014, the IASB published IFRS 15, which aims to establish principles for reporting useful information to users of financial information about the nature, amount, timing and uncertainty of The income and cash flows generated from an entity's contracts with its customers. IFRS 15 eliminates IAS 11 Construction Contracts, IAS 18 Income, IFRIC 13 Loyalty Programs with Customers, IFRIC 15 Real Estate Construction Agreements, IFRIC 18 Transfer of Assets from Customers and SIC 31 Revenue - Exchange of Advertising Services.

This rule is effective as of January 1, 2017, however, the IASB has deferred its entry into force for annual periods beginning on or after January 1, 2018. Advance application is permitted. *Management is evaluating the potential impact of adopting this standard.*

Amendments to IFRS 10 and IAS 28 - Sale and Contribution of assets between an Investor and its associate or joint venture - On September 11, 2014, the IASB published this amendment, which clarifies the scope of the profits and losses recognized in a transaction involving an associate or joint venture, and that it depends on whether the asset sold or contribution constitutes a business. Therefore, IASB concluded that all of the gains or losses must be recognized against loss of control of a business. In addition, gains or losses arising from the sale or contribution of a non-business subsidiary (definition of IFRS 3) to an associate or joint venture must be recognized only to the extent of unrelated interests in the associate or joint venture.

This standard was initially effective as of January 1, 2016, however, on December 17, 2015, the IASB issued "Effective Date of Amendment to IFRS 10 and IAS 28" postponing indefinitely the entry into force of this standard. *The Administration will be waiting for the new validity to evaluate the potential effects of this modification.*

IFRS 16 Leases - On January 13, 2016, the IASB issued this new regulation which replaces IAS 17 Leases, IFRIC 4 Determination of whether an agreement contains a lease, SIC 15 Operating leases - incentives and SIC 27 Evacuation of the essence of Transactions that take the legal form of a lease. The main effects of this rule apply to tenant accounting, mainly because it eliminates the dual accounting model: operational or financial leasing, this means that tenants must recognize "a right to use an asset" and a liability for Lease (the present value of lease futures payments). In the case of the landlord the current practice is maintained - that is, lessors continue to classify leases as financial

and operating leases. This regulation is applicable as of January 1, 2019, with early application permitted if IFRS 15 "Customer Contract Revenue" is applied. *The Administration is evaluating the potential impact of the adoption of these regulations.*

Amendment to IFRS 2 Classification and measurement of share-based payment transactions -This amendment issued on 20 June 2016, addresses matters on which there were consultations and which the IASB decided to address, the matters are:

- Accounting of payment transactions based on shares settled in cash that include a condition of performance.
- Classification of payment transactions based on shares with balance compensation features.
- Accounting for changes in payment transactions based on shares from cash settled to liquidated in equity instruments.

This amendment is applicable as of January 1, 2018 prospectively, with early application allowed. *The Administration is evaluating the potential impact of adopting this regulation.*

Amendment to IFRS 4 Application of IFRS 9 Financial Instruments and IFRS 4 Insurance Contracts -This amendment issued on September 12, 2016 aims to address concerns about the differences between the effective date of IFRS 9 and the next new IFRS 17 insurance contract rule. This amendment provides two options for the issuing entities insurance contracts within the scope of IFRS 4:

- An option that allows entities to reclassify from profit or loss to other comprehensive income, some of the income or expenses derived from the designated financial assets; This is the so-called superposition approach.
- An optional temporary exemption from the application of IFRS 9 for entities whose main activity consists of the issue of contracts within the scope of IFRS 4; This is the so-called deferment approach.

The entity that opts to apply the overlay approach retroactively to the classification of financial assets will do so when IFRS 9 is applied for the first time, while the entity that chooses to apply the deferral approach will do so for annual periods beginning on or after January 1, 2018. *The Administration has evaluated that this rule will not have effects on the Bank's financial statements.*

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

IFRIC 22 Transactions in foreign currency and consideration received / delivered in advance -This interpretation issued on December 8, 2016, clarifies the accounting for transactions that include the receipt or payment of a anticipated consideration in a foreign currency. The Interpretation covers transactions in foreign currency when an entity recognizes an asset or a non-monetary liability derived from the payment or anticipated receipt of a consideration before that the entity recognizes the related asset, expense or income. Does not apply when an entity measures recognition of the asset, expense or income related to its fair value or to the fair value of the consideration received or paid in a date other than the date of initial recognition of the non-monetary asset or liability. In addition, it is not necessary to apply interpretation to income taxes, insurance contracts or reinsurance contracts.

The date of the transaction, in order to determine the exchange rate, is the date of the initial recognition of the non-monetary asset paid in advance or liabilities for deferred income. If there are several payments or receipts in advance, a date is established of transaction for each payment or receipt. IFRIC 22 is effective for annual reporting periods beginning at from January 1, 2018. Early application is allowed. *The Administration has assessed that this rule will have no effect on the financial statements of the Bank.*

Annual improvements, cycle 2014-2016

Amendment to IFRS 1 First-time Adoption of International Financial Reporting Standards -Eliminates the short-term exemptions contained in paragraphs E3-E7 (transitional provisions of Financial Instruments, Benefit to Employees and Investment Entities) of IFRS 1, and who have fulfilled the intended purpose.

Amendment to IAS 28 Investments in Associates and Joint Ventures - Clarifies that the choice to measure at fair value through profit and loss changes (FVTPL) an investment in an associate or joint venture that belongs to an entity that is a venture capital organization, or other Qualified entity, is available for each investment in an associated entity or joint venture on the basis of the investment, after the initial recognition.

The amendments to IFRS 1 and IAS 28 are effective for annual periods beginning on or after January 1, 2018. *The Administration is evaluating the potential impact of the adoption of this regulation.*

IFRS 17 Insurance contracts - This regulation issued on May 18, 2017, establishes principles for the recognition, measurement, presentation and disclosure of the insurance contracts issued. It also requires similar principles to apply to maintained reinsurance contracts and to investment contracts issued with discretionary participation components. IFRS 17 repeals IFRS 4 Insurance Contracts. IFRS 17 will be applied to annual periods beginning on or after January 1, 2021. Early application is permitted. *This standard does not apply directly to the Bank, however, the Bank has participation in insurance business and ensure that this regulation is applied correctly and timely.*

IFRIC 23 Uncertainty over Income Tax Treatments- This interpretation issued on June 7, 2017 clarifies the accounting for tax uncertainties, which are used to determine income tax, tax basis, tax losses and unused losses, when there is an uncertainty about the treatment necessary by the IAS 12 “Income Taxes”. This rule includes four points: a) If an entity accounts for tax uncertainties individually or as a whole, b) The assumptions that an entity makes about the revisions for the tax treatment established by the tax authority, c) How an entity determines a taxable gain or loss, its tax base, tax losses and unused losses and tax rates, and d) How an entity considers the changes made and their circumstances.

This interpretation will be effective for the annual periods starting on January 1, 2019. The anticipated adoption of this standard is allowed. *Management is assessing the potential impact of the adoption of this standard.*

Practice declarations – Making materiality judgements, this declaration has been issued on September, 2017 and corresponds to a guide with regard to how to make materiality judgements. This practice declaration motivates companies to apply judgement in order to prepare financial statements with information that is useful for the investors more than trying to abide with a checklist of IFRS revelations.

The objective of this is to provide useful financial information for investors as well as to other lenders regarding their decision making when supplying resources to the entity.

This practical declaration is not an IFRS and therefore entities aren't forced to abide by them, although, materiality is an omnipresent principle within IFRS.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 01

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

In practical terms this document presents definitions in relation to materiality, users and judgement, as well as providing a 4 step model for the process of materiality.

Steps	Process
Step 1 – Identify	· Identify information that has potential to be material
Step 2 – Evaluate	· Evaluate if the identified information in step 1 is material
Step 3 – Organize	· Organize the information within the financial statements draft in a way that communicates the information in a clear and concise manner
Step 4 – Review	· Review the financial statements draft to determine if all the material information has been identified and this materiality has been entirely considered from a broad perspective, in order to obtain complete financial statements

This declaration does not have an effective date because it is not a norm but a practice declaration, although it can be applied immediately. *Management will consider this declaration in the preparation of its financial statements starting from this date.*

Amendment to IAS 28 Long-Term Participations in Associates and Joint Ventures -On October 12, 2017, the IASB published this amendment to clarify that an entity would also apply IFRS 9 to a long-term participation in an associate or joint venture to which the participation method does not apply. When applying IFRS 9, the adjustments of the long-term participations arising from the application of this Standard will not be taken into account.

This amendment is effective retroactively in accordance with IAS 8 for annual periods beginning on or after January 1, 2019, except as specified in paragraphs 45G and 45J. Permit your anticipate app. If an entity applies the changes in a period that begins before, it will reveal that fact. *The Bank's Administration is evaluating the potential impact of this modification.*

Annual Improvements, cycle 2015-2017 - This amendment published on December 12, 2017 introduces the following improvements:

IFRS 3 Business Combinations / IFRS 11 Joint Agreements: deals with the prior interest in a joint operation, as a business combination in stages.

IAS 12 Income Tax: deals with the consequences in income tax of payments of classified financial instruments as heritage.

IAS 23 Loan costs: deals with the eligible costs for capitalization.

This amendment is effective for annual periods beginning on or after January 1, 2019. *The Bank's Administration will be evaluating the potential impact of this modification.*

I.- As of December 31, 2017, the following significant events have occurred and affected the Bank's operations and Consolidated Financial Statements.

a) Bylaws and The Board

On April 5, 2017, the bylaws of Banco Santander Chile, approved at the Extraordinary Shareholders' Meeting held on January 9, 2017, were published in the Official Gazette, whose minutes were reduced to a public deed on February 14, 2017, in Nancy de la Fuente Hernández's Notary of Santiago. Among others, a consolidated text of the bylaws was established and, after the reforms introduced, its essential clauses are the following:

-

Name: Banco Santander-Chile

Purpose: The execution or conclusion of all acts, contracts, businesses or operations that the laws, especially the General Law of Banks, allow the banks to perform without prejudice to extend or restrict their sphere of action in harmony with the legal provisions in force Or that are established in the future, without the need to amend the present statutes.

Capital: \$ 891,302,881,691, divided into 188,446,126,794 nominative shares, with no par value, of the same and only series.

-

Directory: Corresponds to a Board composed of 9 full members and 2 alternates.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 02

SIGNIFICANT EVENTS

At the Ordinary Shareholders' Meeting held on April 26, 2017, the Board of Directors was elected for a period of three years, consisting of nine Principal Directors and two Alternate Directors. The following persons were elected:

Principal Directors: Vittorio Corbo Lioi, Oscar von Chrismar Carvajal, Roberto Méndez Torres, Juan Pedro Santa María Pérez, Ana Dorrego de Carlos, Andreu Plaza López, Lucia Santa Cruz Sutil, Orlando Poblete Iturrate and Roberto Zahler Mayanz.

Alternate Directors: Blanca Bustamante Bravo and Raimundo Monge Zegers

II.- As of December 31, 2016, the following significant events have occurred and affected the Bank's operations and Consolidated Financial Statements.

a) Directory

At the Ordinary Shareholders' Meeting held on April 26, 2016, the appointment of titular directors, Mr. Andreu Plaza López and Mrs. Ana Dorrego de Carlos was ratified, who were appointed as titular directors at the Ordinary Meeting of the Board of Directors held on October 20, 2015.

At the Ordinary Session of the Board of Directors held on March 15, 2016, Víctor Arbulú Crousillat resigned as director. In view of his resignation and the vacancy left in at a past moment by Mr. Lisandro Serrano Spoerer, on the occasion of his resignation at the Ordinary Session of the Board of Directors held on October 20, 2015, the Board appointed Mr. Andreu Plaza López and Mrs. Ana Dorrego de Carlos. Finally, it is reported that on the occasion of the resignation of Mr. Victor Arbulú Crousillat he has been appointed as a member of the Directors and Audit Committee and in his replacement, Mr. Mauricio Larraín Garcés.

b) Use of Profits and Distribution of Dividends

At the Ordinary General Shareholders' Meeting held on April 26, 2016, Mr. Oscar von Chrismar Carvajal (First Vice-Chairman), Mr. Roberto Méndez Torres (Second Vice-President), titular directors Marco Colodro Hadjes, Lucia Santa Cruz Sutil, Ana Dorrego de Carlos, Mauricio Larraín Garcés, Juan Pedro Santa María, Orlando Poblete Iturrate, Andreu Plaza Lopez and Blanca Bustamante Bravo participated in a meeting with Mr. Vittorio Corbo Lioi as Chairman. In addition, the General Manager Mr. Claudio Melandri Hinojosa and the Manager of Strategic Planning Mr. Raimundo Monge also attend to the meeting.

According to the information presented in the Meeting mentioned above, net income for year 2015 (referred to in the financial statements "Profit attributable to equity holders of the Bank"), amounted to Ch\$ 448,878 million. It was approved to distribute 75% of said profits, which, divided by the number of shares issued, correspond to a dividend of \$ 1,78649813 per share, which began to be paid as of April 29, 2016.

Likewise, it is approved that the remaining 25% of the profits be destined to increase the Bank's reserves.

c) Appointment of External Auditors

At the Board mentioned above, it was agreed to appoint the firm PricewaterhouseCoopers Consultores, Auditores SpA, as external auditors of the Bank and its subsidiaries for 2016.

d) Capital increase of Transbank S.A.

At the Extraordinary Shareholders' Meeting of Transbank S.A. Held on April 21, 2016, it was agreed to increase the capital of the company by capitalizing the accumulated profits, through the issuance of shares redeemed for payment,

and placement of payment shares for approximately \$ 4,000 million. Banco Santander Chile participated proportionally to its participation (25%), reason why it subscribed and paid shares for approximately \$ 1 billion.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 03

REPORTING SEGMENTS

The Bank manages and measures the performance of its operations by business segments. The information disclosed in this note is not necessarily comparable to that of other financial institutions, since it is based on management's internal information system by segment.

Inter-segment transactions are conducted under normal arm's length commercial terms and conditions. Each segment's assets, liabilities, and income include items directly attributable to the segment to which they can be allocated on a reasonable basis.

In order to achieve compliance with the strategic objectives established by senior management and adapt to changing market conditions, from time to time, the Bank makes adjustments in its organization, modifications that in turn impact to a greater or lesser extent, in the way in which it is managed or managed. Thus, the present disclosure provides information on how the Bank is managed as of December 31, 2017. Regarding the information corresponding to the year 2016, it has been prepared with the current criteria at the closing of these financial statements in order to achieve the duecomparability of the figures.

The Bank has the reportable segments noted below:

Retail Banking

Consists of individuals and small to middle-sized entities (SMEs) with annual income less than Ch\$1,200 million. This segment gives customers a variety of services, including consumer loans, credit cards, auto loans, commercial loans, foreign exchange, mortgage loans, debit cards, checking accounts, savings products, mutual funds, stockbrokerage, and insurance brokerage. Additionally the SME clients are offered government-guaranteed loans, leasing and factoring.

Middle-market

This segment is made up of companies and large corporations with annual sales exceeding Ch\$1,200 million. It serves institutions such as universities, government entities, local and regional governments and companies engaged in the real estate industry who carry out projects to sell properties to third parties and annual sales exceeding Ch\$800 million with no upper limit. The companies within this segment have access to many products including commercial loans, leasing, factoring, foreign trade, credit cards, mortgage loans, checking accounts, transactional services, treasury services, financial consulting, savings products, mutual funds, and insurance brokerage. Also companies in the real estate industry are offered specialized services to finance residential projects, with the aim of expanding sales of mortgage loans.

Global Corporate Banking

This segment consists of foreign and domestic multinational companies with sales over Ch\$10,000 million. The companies within this segment have access to many products including commercial loans, leasing, factoring, foreign trade, credit cards, mortgage loans, checking accounts, transactional services, treasury services, financial consulting, investments, savings products, mutual funds and insurance brokerage.

This segment also consists of a Treasury Division which provides sophisticated financial products, mainly to companies in the Middle-market and Global Corporate Banking segments. These include products such as short-term financing and fund raising, brokerage services, derivatives, securitization, and other tailor-made products. The Treasury area may act as brokers to transactions and also manages the Bank's investment portfolio.

Corporate Activities (“Other”)

This segment mainly includes the results of our Financial Management Division, which develops global management functions, including managing inflation rate risk, foreign currency gaps, interest rate risk and liquidity risk. Liquidity risk is managed mainly through wholesale deposits, debt issuances and the Bank's available for sale portfolio. This segment also manages capital allocation by unit. These activities usually result in a negative contribution to income.

In addition, this segment encompasses all the intra-segment income and all the activities not assigned to a given segment or product with customers.

The segments' accounting policies are those described in the summary of accounting policies. The Bank earns most of its income in the form of interest income, fee and commission income and income from financial operations. To

evaluate a segment's financial performance and make decisions regarding the resources to be assigned to segments, the Chief Operating Decision Maker (CODM) bases his assessment on the segment's interest income, fee and commission income, and expenses.

AS OF DECEMBER 31, 2017 AND 2016

NOTE 07**DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGE ACCOUNTING, continued****b) Hedge accounting****Fair value hedge**

The Bank uses cross-currency swaps, interest rate swaps and call money swaps to hedge its exposure to changes in fair value of hedged items attributable to interest rates. The aforementioned hedging instruments change the effective cost of long-term issuances from a fixed interest rate to a variable interest rate.

The hedged items and hedge instruments under fair value hedges as of December 31, 2017 and 2016, classified by term to maturity are as follows:

As of December 31, 2017	Notional Amount				Total
	Within 1 year MCh\$	Between 1 and 3 years MCh\$	Between 3 and 6 years MCh\$	Over 6 years MCh\$

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 07**DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGE ACCOUNTING, continued****Cash flow hedges**

The Bank uses cross currency swaps to hedge the risk from variability of cash flows attributable to changes in the interest rates of mortgages, bonds and interbank loans at a variable rate. To cover the inflation risk in some items, both forwards as well as currency swaps are used.

The notional values of the hedged items as of December 31, 2017 and 2016, and the period when the cash flows will be generated are as follows:

	As of December 31, 2017				
	Within 1 year	Between 1 and 3 years	Between 3 and 6 years	Over 6 years	Total

Hedging instrument					
Inflows	4,900	-	-	-	4,900
Outflows	(22,586)	(11,896)	(56,107)	(115,753)	(206,342)
Net flows	(17,686)	(11,896)	(56,107)	(115,753)	(201,442)

b.3) Forecasted cash flows for exchange rate risk:

As of December 31, 2017 and 2016, the Bank did not have cash flow hedges for exchange rate risk.

The accumulated effect of the mark to market adjustment of cash flow hedges produced by hedge c) instruments used in hedged cash flow was recorded in the Consolidated Statement of Changes in Equity, specifically within Other comprehensive income, as of December 31, 2017 and 2016, and is as follows:

Hedged item	As of December 31,	
	2017	2016
	MCh\$	MCh\$
Interbank loans	(4,779)	(6,019)
Time deposits and other time liabilities	-	(294)
Issued debt instruments	(8,683)	(8,169)
Available for sale investments	(364)	12,833
Loans and accounts receivable from customers	10,264	3,937
Net flows	(3,562)	2,288

Since the inflows and outflows for both the hedged element and the hedging instrument mirror each other, the hedges are nearly 100% effective, which means that the fluctuations of fair value attributable to risk components are almost completely offset. During the year, the bank did not have any cash flow hedges of forecast transactions.

As of December 31, 2017 and 2016, the Bank recorded in the statement of income an ineffective portion 1,187 millions and 3,555 millions, respectively.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 07

In addition to credit risk allowances, there are allowances held for:

i) Country risk to cover the risk taken when holding or committing resources with any foreign country. These allowances are established according to country risk classifications as set forth in Chapter 7-13 of the Updated

Compilation of Rules, issued by the SBIF. The balances of allowances as of December 31, 2017 and 2016 are Ch\$599 million and Ch\$386 million, respectively, which are presented in liabilities of the Consolidated Statement of Financial Position.

ii) According to SBIF's regulations (compendium of Accounting Standards), the Bank has established allowances related to the undrawn available credit lines and contingent loans. The balances of allowances as of December 31, 2017 and 2016 are Ch\$15,103 million and Ch\$13,927 million, respectively, and are presented in liabilities of the Consolidated Statement of Financial Position

e) Allowances established

The instruments of Foreign Institutions include instruments sold under repurchase agreements with customers and financial institutions for a total of \$ 24,910 and \$ 0 million as of December 31, 2017 and 2016, respectively. Under the same line, there are instruments that guarantee margins for derivative transactions through the London Clearing House (LCH) for an amount of \$ 48,106 million and \$ 0 million as of December 31, 2017 and 2016, respectively. In order to comply with the initial margin specified in the European EMIR standard, instruments in guarantee with Euroclear are maintained for an amount of \$ 33,711 million and \$ 0 million as of December 31, 2017 and 2016, respectively.

As of December 31, 2017 available for sale investments included a net unrealized profit of Ch\$1,855, million, recorded as a “Valuation adjustment” in Equity, distributed between a profit of Ch\$459 million attributable to equity holders of the Bank and a profit of Ch\$1,396 million attributable to non-controlling interest.

As of December 31, 2016 available for sale investments included a net unrealized loss of Ch\$7,375 million, recorded as a “Valuation adjustment” in Equity, distributed between a profit of Ch\$6,449 million attributable to equity holders of the Bank and a profit of Ch\$926 million attributable to non-controlling interest.

Consolidated Financial Statements December 2017 / Banco Santander Chile 60

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE N°10

AVAILABLE FOR SALE INVESTMENTS, continued

Gross profits and losses realized on the sale of available for sale investments as of december 31, 2017 and 2016, are as follow.

	As of December 31,	
	2017	2016
	MCh\$	MCh\$
Sale of available for sale investments generating realized profits	6,469,344	6,522,549
Realized profits	4,867	12,333
Sale of available for sale investments generating realized losses	466,732	346,906
Realized losses	3	132

The Bank evaluated those instruments with unrealized losses as of December 31, 2017 and 2016 and concluded they were not impaired. This review consisted of evaluation the economic reason for any declines, the credit rating of the securities issuers and the bank's intention and ability to hold the securities until the unrealized loss was recovered. Based on this analysis, the Bank believes that there were no significant or prolonged declines nor changes in credit risk which would cause impairment in its investment portfolio, since most of the decline in fair value of these instruments was caused by market conditions which the Bank considers to be temporary. All of the instruments that have unrealized losses as of December 31, 2017 and 2016, were not in a continuous unrealized loss position for more than one year.

Due after 4 years but within 5 years	308	344
Due after 5 years	1,792	2,067
Total	4,244	4,921

Consolidated Financial Statements December 2017 / Banco Santander Chile 68

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 13**PROPERTY, PLANT, AND EQUIPMENT, continued****d) Operational leases - Lessee**

Some of the Bank's premises and equipment are under operating leases. Future minimum rental payments under non-cancellable leases are as follows:

	As of December	
	31,	
	2017	2016
	MCh\$	MCh\$
Due within 1 year	26,059	26,455
Due after 1 year but within 2 years	21,343	24,903
Due after 2 years but within 3 years	18,091	20,582
Due after 3 years but within 4 years	15,736	17,321
Due after 4 years but within 5 years	12,734	14,569
Due after 5 years	51,502	53,694
Total	145,465	157,524

e) As of December 31, 2017 and 2016 the Bank has no finance leases which cannot be unilaterally cancelled.

The Bank has no restriction on property, plant and equipment as of December 31, 2017 and 2016. Additionally, the f) property, plant, and equipment have not been provided as guarantees to secure compliance with financial liabilities. The Bank has no debt in connection with property, plant and equipment.

NOTE 14**CURRENT AND DEFERRED TAXES****a) Current taxes**

As of December 31, 2017 and 2016, the Bank recognizes taxes payable (recoverable), which is determined based on the currently applicable tax legislation. This amount is recorded net of recoverable taxes, and is shown as follows:

	As of December 31,	
	2017	2016
	MCh\$	MCh\$
Summary of current tax liabilities (assets)		
Current tax (assets)	-	-
Current tax liabilities	6,435	29,294
Total tax payable (recoverable)	6,435	29,294
(Assets) liabilities current taxes detail (net)		
Income tax (*)	145,112	145,963
Less:		
Provisional monthly payments	(136,562)	(113,700)
Credit for training expenses	(1,768)	(1,972)
Land taxes leasing	-	-
Grant credits	(968)	(1,079)
Other	621	82
Total tax payable (recoverable)	6,435	29,294

(*) As of December 31, 2017 and 2016 the tax rates were 25.5% and 24.0%

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 14**CURRENT AND DEFERRED TAXES, continued****b) Effect on income**

The effect tax expense has on income for the years ended December 31, 2017 and 2016 is comprised of the following items:

	As of December 31,	
	2017	2016
	MCh\$	MCh\$
Income tax expense		
Current tax	145,112	145,963
Credits (debits) for deferred taxes		
Origination and reversal of temporary differences	(8,178)	(39,180)
Valuation provision	5,955	-
Subtotal	142,889	106,783
Tax for rejected expenses (Article No.21)	610	336
Other	114	1
Net income tax expense	143,613	107,120

c) Effective tax rate reconciliation

The reconciliation between the income tax rate and the effective rate in calculating the tax expense as of December 31, 2017 and 2016 is as follows:

	As of December 31,			
	2017		2016	
	Tax rate	Amount	Tax rate	Amount
	%	MCh\$	%	MCh\$

Tax calculated over profit before tax	25.50	183,823	24.00	139,641
Permanent differences (1)	(3.25)	(23,399)	(5.64)	(32,817)
Penalty tax (rejected expenses)	0.08	610	0.06	336
Rate change effect (2)	(2.86)	(20,600)	0.01	86
Other	0.44	3,179	(0.02)	(126)
Effective rates and expenses for income tax	19.91	143,613	18.41	107,120

(1) It mainly corresponds to the permanent differences originated by the Monetary Correction of the Tax Own Capital.

(2) The publication of law 20,780 of September 29, 2014 increased the tax rate from the current 25.5% in the year 2017 to 27% for the year 2018 and onwards permanently.

d) Effect of deferred taxes on other comprehensive income

A summary of the separate effect of deferred tax on other comprehensive income, showing the asset and liability balances, for the periods ended December 31, 2017 and 2016 follows:

	As of	
	December 31,	
	2017	2016
	MCh\$	MCh\$
Deferred tax assets		
Available for sale investments	368	3,266
Cash flow hedges	908	-
Total deferred tax assets recognized through other comprehensive income	1,276	3,266
Deferred tax liabilities		
Available for sale investments	(841)	(5,036)
Cash flow hedges	-	(549)
Total deferred tax liabilities recognized through other comprehensive income	(841)	(5,585)
Net deferred tax balances in equity	435	(2,319)
Deferred taxes in equity attributable to equity holders of the bank	791	(2,097)
Deferred tax in equity attributable to non-controlling interests	(356)	(222)

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 14**CURRENT AND DEFERRED TAXES, continued****e) Effect of deferred taxes on income**

Below are effects of deferred taxes on assets, liabilities and income allocated for differences:

As of December 31,	2017	2016
	MCh\$	MCh\$
Deferred tax assets		
Interests and adjustments	8,645	9,473
Non-recurring charge-offs	11,651	9,891
Assets received in lieu of payment	4,073	4,625
Exchange rate adjustment	882	-
Property, plant and equipment	4,410	4,570
Provision for loan losses	172,386	174,929
Provision for expenses	73,518	67,073
Derivatives	-	-
Leased assets	98,090	71,834
Subsidiaries tax losses	5,277	9,467
	151	-
Investment valuation	-	-
Other	5,249	17,571
Total deferred tax assets	384,332	369,433
Deferred tax liabilities

NOTE 15**OTHER ASSETS**

Other assets include the following:

As of December 31,			
2017	2016		
MCh\$	MCh\$		
Assets for leasing (1)		48,099	44,840
Assets received or awarded in lieu of payment (2)			
Assets received in lieu of payment		11,677	19,825
Assets awarded at judicial sale		24,800	26,895
Provision on assets received in lieu of payment or awarded		(1,440)	(7,558)
Subtotal		35,037	39,162
Other assets			
Guarantee deposits (margin accounts) (3)		323,767	396,289
Gold investments		478	446
VAT credit		9,570	8,941
Income tax recoverable		1,381	22,244
Prepaid expenses		116,512	148,288
Assets recovered from leasing for sale		4,235	6,040
Pension plan assets		921	1,637
Accounts and notes receivable		59,574	56,624
Notes receivable through brokerage and simultaneous transactions		68,272	60,632
Other receivable assets		53,500	15,082
Other assets		33,837	40,274
Subtotal		672,047	756,497
Total		755,183	840,499

(1) Correspondence to the assets available to be delivered under the financial lease modality.

(2) The goods received in payment correspond to the goods received as payment of debts due from the customers. The set of goods that remain acquired in this way must not exceed 20% of the Bank's effective equity at any time. These assets currently represent 0.30% (0.54% as of December 31, 2016) of the Bank's effective equity.

The assets awarded in judicial auction, correspond to assets that have been acquired at judicial auction in payment of debts previously contracted with the Bank. The assets acquired at judicial auction are not subject to the above mentioned margin. These properties are assets available for sale. For most assets, the sale can be completed within one year from the date the asset is received or acquired. In case the good is not sold within a year, it must be punished.

Additionally, a provision is recorded for the difference between the initial award value plus the additions and their estimated realizable value, when the former is higher.

(3) Corresponds to a guarantee associated with a specific derivative contract. These guarantees operate when the valuation of the derivatives exceeds thresholds defined in the contract values and may be for or against the Bank.

NOTE 16

TIME DEPOSITS AND OTHER TIME LIABILITIES

As of December 31, 2017 and 2016, the composition of the item time deposits and other liabilities is as follows:

Consolidated Financial Statements December 2017 / Banco Santander Chile 75

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 17

INTERBANK BORROWINGS, continued

a) Obligation with Central Bank of Chile

Debts to the Central Bank of Chile include credit lines for renegotiation of loans and other borrowings. These credit lines were provided by the Central Bank of Chile for renegotiation of loans due to the need to refinance debt as a result of the economic recession and crisis of the banking system in the early 1980s.

The outstanding amounts owed to the Central Bank of Chile under these credit lines are as follows:

	As of December 31,	
	2017	2016
	MCh\$	MCh\$
Totals Line of credit for renegotiation with Central Bank of Chile	5	7

b) Loans from domestic financial institutions

these obligations maturities are as follows:

As of December,
2017 2016

	MCh\$	MCh\$
Due Within 1 year	480	365,436
Due Within 1 y 2 years	-	-
Due Within 2 y 3 years	-	-
Due Within 3 y 4 years	-	-
Due Within 5 years	-	-
Total loans from domestic financial institutions	480	365,436

c) Foreign obligations

	As of December	
	2017	2016
	MCh\$	MCh\$

Consolidated Financial Statements December 2017 / Banco Santander Chile 85

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 22

CONTINGENCIES AND COMMITMENTS

a) Lawsuits and legal procedures

At the date these financial statements were issued, the Bank and its affiliates were subject to certain legal actions in the normal course of their business. As of December 31, 2017, the Banks and its subsidiaries have provisions for this item of Ch\$1,214.2 million and Ch\$0 million, respectively (Ch\$1,194 million and Ch\$ 48 million as of December 31, 2016) which is included in "Provisions" in the Consolidated Statement of Financial Position as provisions for contingencies.

As of December 31, 2017, the following legal situations are pending:

Santander Corredores de Bolsa Limitada

Judgment "Echeverría with Santander Corredora" (currently Santander Corredores de Bolsa Ltda.), followed before the 21st Civil Court of Santiago, Case C-21.366-2014, on compensation for damages for faults in the purchase of shares. With regard to its actual situation as of December 31, 2017, Santander Corredores de Bolsa Limitada requested the Court to declare the proceeding abandoned due to the pending actions of the plaintiff, a situation that is pending for the Court to resolve.

Santander Corredora de Seguros Limitada

There are lawsuits amounting to UF3,790 corresponding to processes mainly for goods delivered in leasing. Our lawyers have not estimated additional material losses for these trials.

b) Contingent loans

To meet customer needs, the Bank acquired several irrevocable commitments and contingent liabilities, although these obligations should not be recognized in the Consolidated Statement of Financial Position, these contain credit risks and are therefore part of the Bank's overall risk.

The following table shows the Bank's contractual obligations to issue loans:

	As of December 31,	
	2017	2016
	MCh\$	MCh\$
Letters of credit issued	201,699	158,800
Foreign letters of credit confirmed	75,499	57,686
Performance guarantees	1,823,793	1,752,610
Personal guarantees	81,577	125,050

(*) American Depository Receipts (ADR) are certificates issued by a U.S. commercial bank to be traded on the U.S. securities markets.

b) Reserves

During the year 2017, on the occasion of the shareholders' meeting held in April, it was agreed to capitalize 30% of profits for reserves in 2016, equivalent to \$ 141,706 million (\$ 112,219 million for 2016).

c) Dividends

The distribution of dividends has been disclosed in the Consolidated Statements of Changes in Equity.

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 23**EQUITY, continued****d) Diluted earnings per share and basic earnings per share**

As of December 31, 2017 and 2016, the composition of diluted earnings per share and basic earnings per share are as follows:

	As of December 31,	
	2017	2016
	MCh\$	MCh\$
a) Basic earnings per share		
Total attributable to equity holders of the Bank	564,815	472,351
Weighted average number of outstanding shares	188,446,126,794	188,446,126,794
Basic earnings per share (in Ch\$)	2.997	2.507
b) Diluted earnings per share		
Total attributable to equity holders of the Bank	564,815	472,351
Weighted average number of outstanding shares	188,446,126,794	188,446,126,794
Assumed conversion of convertible debt	-	-
Adjusted number of shares	188,446,126,794	188,446,126,794
Diluted earnings per share (in Ch\$)	2.997	2.507

As of December 31, 2017 and 2016, the Bank does not own instruments with dilutive effects.

e) Other comprehensive income of available for sale investments and cash flow hedges:

As of December	
31,	
2017	2016
MCh\$	MCh\$

Available for sale investments		
As of January 1,	7,375	(7,093)
Gain (losses) on the re-valuation of available for sale investments, before tax	(10,384)	2,267
Reclassification from other comprehensive income to net income for the year	-	-
Net income realized	4,864	12,201
Subtotal	(5,520)	14,468
Total	1,855	7,375
Cash flow hedges		
As of January 1,	2,288	8,626
Gains (losses) on the re-valuation of cash flow hedges, before tax	(5,850)	(6,261)
Reclassification and adjustments on cash flow hedges, before tax	-	(77)
Amounts removed from equity and included in carrying amount of non-financial asset (liability) whose acquisition or assignment was hedged as a highly probable transaction	-	-
Subtotal	(5,850)	(6,338)
Total	(3,562)	2,288
Other comprehensive income, before tax	(1,707)	9,663
Income tax related to other comprehensive income components		
Income tax relating to available for sale investments	(473)	(1,770)
Income tax relating to cash flow hedges	908	(549)
Total	435	(2,319)
Other comprehensive income, net of tax	(1,272)	7,344
Attributable to:		
Equity holders of the Bank	(2,312)	6,640
Non-controlling interest	1,040	704

The Bank expects that the results included in "Other comprehensive income" will be reclassified to profit or loss when the specific conditions have been met.

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 24

CAPITAL REQUIREMENTS (BASEL)

In accordance with Chilean General Banking Law, the Bank must maintain a minimum ratio of effective equity to risk-weighted consolidated assets of 8% net of required allowances, and a minimum ratio of basic equity to consolidated total assets of 3%, net of required allowances. However, as a result of the Bank's merger in 2002, the SBIF has determined that the Bank's combined effective equity cannot be lower than 11% of its risk-weighted assets. Effective net equity is defined for these purposes as basic equity (capital and reserves) plus subordinated bonds, up to a maximum of 50% of basic equity.

Assets are allocated to different risk categories, each of which is assigned a weighting percentage according to the amount of capital required to be held for each type of asset. For example, cash, deposits in banks and financial instruments issued by the Central Bank of Chile have a 0% risk weighting, meaning that it is not necessary to hold equity to back these assets according to current regulations. Property, plant and equipment have a 100% risk weighting, meaning that a minimum capital equivalent to 11% of these assets must be held. All derivatives traded off the exchanges are also assigned a risk weighting, using a conversion factor applied to their notional values, to determine the amount of their exposure to credit risk. Off-balance-sheet contingent credits are also included for weighting purposes, as "Credit equivalents."

According to Chapter 12-1 of the SBIF's Recopilación Actualizada de Normas [Updated Compilation of Rules] effective January 2010, the SBIF changed existing regulation with the enforcement of Chapter B-3 from the Compendium of Accounting Standards, which changed the risk exposure of contingent allocations from 100% exposure to the following:

Type of contingent loan	Exposure
a) Pledges and other commercial commitments	100%
b) Foreign letters of credit confirmed	20%
c) Letters of credit issued	20%
d) Guarantees	50%
e) Interbank guarantee letters	100%
f) Available lines of credit	35%
g) Other loan commitments:	
- Higher education loans Law No. 20,027	15%

- Other	100%
h) Other contingent loans	100%

NOTE 26

INTEREST INCOME

This item refers to interest earned in the period from the financial assets whose return, whether implicitly or explicitly, is determined by applying the effective interest rate method, regardless of the value at fair value, as well as the effect of hedge accounting.

a)

Edgar Filing: BANCO SANTANDER CHILE - Form 6-K/A

For the periods ended December 31, 2017 and 2016, the income from interest income, not including income from hedge accounting, is attributable to the following items:

Items	As of December 31, 2017				2016			
	Interest	Inflation	Prepaid	Total	Interest	Inflation	Pre	Total
	MCh\$	adjustments MCh\$	fees MCh\$	MCh\$	MCh\$	adjustments MCh\$	fees MCh\$	MCh\$
Resale agreements	939	-	-	939	1,488	-	-	-
Interbank loans	969	-	-	969	295	-	-	-

Total	396,967	395,133

Benefits based on equity instruments (settled in cash)

The Bank provides certain executives of the Bank and its affiliates with a benefit of payments based on shares, which are settled in cash in accordance with the requirements of IFRS 2. The Bank measures the services received and the liability incurred, at fair value.

Until the settlement of the liability, the Bank determines the fair value of the liability at the end of each reporting period, as well as on the settlement date, recognizing any change in fair value in profit or loss for the year.

The balance corresponding to profits based on equity instruments, as of December 31, 2017 and 2016 was \$ 1,923 million and \$ 331 million, respectively.

NOTE 32

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE N°35

TRANSACTIONS WITH RELATED PARTIES

Associated and dependent entities are the Bank's "related parties", However, this also includes its "key personnel" from the executive staff (members of the Bank's Board of Directors and Managers of Banco Santander Chile and its affiliates, together with their close relatives), as well as the entities over which the key personnel could exercise significant influence or control.

The Bank also includes those companies that are part of the Santander Group worldwide as related parties, given that all of them have a common parent, i.e., Banco Santander S,A, (located in Spain).

Article 89 of the Ley de Sociedades Anónimas (Public Companies Act), which is also applicable to banks, states that any transaction with a related party must be made under equitable conditions similar to those that customarily prevail in the market.

Article 84 of the Ley General de Bancos (General Banking Act) establishes limits for loans that can be granted to related parties and prohibits lending to the Bank's directors, General Manager, or representatives.

Transactions between the Bank and its related parties are specified below and have been divided into four categories:

Santander Group companies

This category includes all the companies that are controlled by the Santander Group around the world, and hence, it also includes the companies over which the Bank exercises any degree of control (Affiliates and special-purpose entities).

Associated companies

This category includes the entities over which the Bank exercises a significant degree of influence, in accordance with section b) of Note 1, and which generally belong to the group of entities known as “business support companies”.

Key personnel

This category includes members of the Bank’s Board of Directors and managers of Banco Santander Chile and its affiliates, together with their close relatives.

Other

This category encompasses the related parties that are not included in the groups identified above and which are, in general, entities over which the key personnel could exercise significant influence or control.

The terms for transactions with related parties are equivalent to those which prevail in transactions made under market conditions or to which the corresponding considerations in kind have been attributed.

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 35**TRANSACTIONS WITH RELATED PARTIES, continued****d) Payment to Board members and key management personnel**

The compensation received by key management personnel, including Board members and all the executives holding Manager positions, is shown in the “Personnel salaries and expenses” and/or “Administrative expenses” of the Consolidated Statements of Income, and detailed as follows:

	As of	
	December 31,	
	2017	2016
	MCh\$	MCh\$
Personnel compensation	16,863	17,493
Board member`s salaries and expenses	1,199	1,269
Bonuses or gratuity	16,057	14,404
Compensation in stock	2,752	331
Training expenses	68	161
Seniority compensation	3,842	2,619
Health funds	273	285
Other personnel expenses	773	916
Pension Plans (*)	2,039	(150)
Total	43,866	37,328

(*) Part of the executives who qualified for this benefit ceased to belong to the Group for various reasons without meeting the requirements to obtain the benefit, for which the amount of the obligation decreased, generating an income for the reversal of provisions.

e) Composition of key personnel

As of December 31, 2017 and 2016, the composition of the Bank’s key personnel is as follows:

Position	N° of executives	
	As of December 31, 2017 2016	
Director	11	13
Division manager	13	17
Department manager	63	76
Manager	46	61
Total key personnel	133	167

NOTE 36

PENSION PLANS

The Bank has an additional benefit available to its principal executives, consisting of a pension plan. The purpose of the pension plan is to endow the executives with funds for a better supplementary pension upon their retirement.

For this purpose, the Bank will match the voluntary contributions made by the beneficiaries for their future pension with an equivalent contribution. The executives will be entitled to receive this benefit only when they fulfill the following conditions:

a. Aimed at the Bank's management

b. The general requisite to apply for this benefit is that the employee must be carrying out his/her duties when turning 60 years old.

c. The Bank will create a pension fund, with life insurance, for each beneficiary in the plan. Periodic contributions into this fund are made by the manager and matched by the Bank.

d. The Bank will be responsible for granting the benefits directly.

If the working relationship between the manager and the respective company ends, before s/he fulfills the abovementioned requirements, s/he will have no rights under this benefit plan.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

In the event of the executive's death or total or partial disability, s/he will be entitled to receive this benefit.

The Bank will make contributions to this benefit plan on the basis of mixed collective insurance policies whose beneficiary is the Bank. The life insurance company with whom such policies are executed is not an entity linked or related to the Bank or any other Santander Group company.

Plan Assets owned by the Bank at the end of 2017 totaled Ch\$7.919 million (Ch\$6.612 million in 2016)

The amount of the defined benefit plans has been quantified by the Bank, based on the following criteria:

Calculation method

Use of the projected unit credit method which considers each working year as generating an additional amount of rights over benefits and values each unit separately. It is calculated based primarily on fund contribution, as well as other factors such as the legal annual pension limit, seniority, age and yearly income for each unit valued individually.

Actuarial hypothesis assumptions:

Actuarial assumption with respect to demographic and financial variables are non-biased and mutually compatible with each other. The most significant actuarial hypotheses considered in the calculation were.

Assets related to the pension fund contributed by the Bank into the Seguros Euroamérica insurance company with respect to defined benefit plans are presented as net of associated commitments.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 37

FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction on the main market (or the most advantageous) at the measurement date in the current market conditions (in other words, an exit price) regardless of whether that price is directly observable or estimated by using a different valuation technique. The measurement of fair value assumes the sale transaction of an asset or the transference of the liability happens within the main asset or liability market, or the most advantageous market for the asset or liability.

For financial instruments with no available market prices, fair values have been estimated by using recent transactions in analogous instruments, and in the absence thereof, the present values or other valuation techniques based on mathematical valuation models sufficiently accepted by the international financial community. In the use of these models, consideration is given to the specific particularities of the asset or liability to be valued, and especially to the different kinds of risks associated with the asset or liability.

These techniques are significantly influenced by the assumptions used, including the discount rate, the estimates of future cash flows and prepayment expectations. Hence, the fair value estimated for an asset or liability may not coincide exactly with the price at which that asset or liability could be delivered or settled on the date of its valuation, and may not be justified in comparison with independent markets.

Determination of fair value of financial instruments

Below is a comparison between the value at which the Bank's financial assets and liabilities are recorded and their fair value as of December 31, 2017 and December 31, 2016:

As of December 31, 2017		As of December 31, 2016	
Book value	Fair value	Book value	Fair value

Issued debt instruments and other financial liabilities	7,335,683	7,487,591	7,566,388	8,180,322
Guarantees received (margin accounts)	408,313	408,313	480,926	480,926

Fair value is approximated to book value in the following accounts, due to their short-term nature in the following cases: cash and bank deposits, operations with liquidation in progress and buyback contracts as well as security loans.

In addition, the fair value estimates presented above do not attempt to estimate the value of the Bank's profits generated by its business activity, nor its future activities, and accordingly, they do not represent the Bank's value as a going concern.

Below is a detail of the methods used to estimate the financial instruments' fair value.

- a) Financial instruments for trading investments and available for sale investment.

The estimated fair value of these financial instruments was established using market values or estimates from an available dealer, or quoted market prices of similar financial instruments. Investments with maturities of less than 1 year are evaluated at recorded value since they are considered as having a fair value not significantly different from their recorded value, due to their short maturity term. To estimate the fair value of debt investments or representative values in these lines of businesses, we take into consideration additional variables and elements, as long as they apply, including the estimate of prepayment rates and credit risk of issuers.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 37

FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES, continued

b) Loans and accounts receivable from customers and interbank loans

Fair value of commercial, mortgage and consumer loans and credit cards is measured through a discounted cash flow (DCF) analysis. To do so, we use current market interest rates considering product, term, amount and similar loan quality. Fair value of loans with 90 days or more of delinquency are measured by means of the market value of the associated guarantee, minus the rate and term of expected payment. For variable rate loans whose interest rates change frequently (monthly or quarterly) and that are not subjected to any significant credit risk change, the estimated fair value is based on their book value.

c) Deposits

Disclosed fair value of deposits that do not bear interest and saving accounts is the amount payable at the reporting date and, therefore, equals the recorded amount. Fair value of time deposits is calculated through a discounted cash flow calculation that applies current interest rates from a monthly calendar of scheduled maturities in the market.

d) Short and long term issued debt instruments

The fair value of these financial instruments is calculated by using a discounted cash flow analysis based on the current incremental lending rates for similar types of loans having similar maturities.

e) Financial derivative contracts

The estimated fair value of financial derivative contracts is calculated using the prices quoted on the market for financial instruments having similar characteristics.

The fair value of interest rate swaps represents the estimated amount that the Bank expects to receive to cancel the contracts or agreements, considering the term structures of the interest curve, volatility of the underlying asset and credit risk of counterparties.

If there are no quoted prices from the market (either direct or indirect) for any derivative instrument, the respective fair value estimates have been calculated by using models and valuation techniques such as Black-Scholes, Hull, and Monte Carlo simulations, taking into consideration the relevant inputs/outputs such as volatility of options, observable correlations between underlying assets, counterparty credit risk, implicit price volatility, the velocity with which the volatility reverts to its average value, and the straight-line relationship (correlation) between the value of a market variable and its volatility, among others.

Measurement of fair value and hierarchy

IFRS 13 - Fair Value Measurement, provides a hierarchy of reasonable values which separates the inputs and/or valuation technique assumptions used to measure the fair value of financial instruments. The hierarchy reflects the significance of the inputs used in making the measurement. The three levels of the hierarchy of fair values are the following:

- Level 1: the inputs are quoted prices (unadjusted) on active markets for identical assets and liabilities that the Bank can access on the measurement date.
- Level 2: inputs other than the quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs are unobservable inputs for the asset or liability.

The hierarchy level within which the fair value measurement is categorized in its entirety is determined based on the lowest level of input that is significant to the fair value measurement in its entirety.

The best evidence of a financial instrument's fair value at the initial time is the transaction price (Level 1).

In cases where quoted market prices cannot be observed, Management makes its best estimate of the price that the market would set using its own internal models which in most cases use data based on observable market parameters

as a significant input (Level 2) and, in very specific cases, significant inputs not observable in market data (Level 3). Various techniques are employed to make these estimates, including the extrapolation of observable market data.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 37

FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES, continued

Financial instruments at fair value and determined by quotations published in active markets (Level 1) include:

- Chilean Government and Department of Treasury bonds

Instruments which cannot be 100% observable in the market are valued according to other inputs observable in the market (Level 2).

The following financial instruments are classified under Level 2:

Type of	Model	Description
financial instrument	used in valuation	
Mortgage and private bonds	Present Value of Cash Flows Model	<p>Internal Rates of Return (“IRRs”) are provided by RiskAmerica, according to the following criterion:</p> <p>If, at the valuation day, there are one or more valid transactions at the Santiago Stock Exchange for a given mnemonic, the reported rate is the weighted average amount of the observed rates.</p> <p>In the case there are no valid transactions for a given mnemonic on the valuation day, the reported rate is the IRR base from a reference structure, plus a spread model based on historical spread for the same item or similar ones.</p>

IRRs are provided by RiskAmerica, according to the following criterion:

Time deposits

Present Value of Cash Flows Model

If, at the valuation day, there are one or more valid transactions at the Santiago Stock Exchange for a given mnemonic, the reported rate is the weighted average amount of the observed rates.

In the case there are no valid transactions for a given mnemonic on the valuation day, the reported rate is the IRR base from a reference structure, plus a spread model based on issuer curves.

IRRs are provided by ICAP, GFI, Tradition, and Bloomberg according to this criterion:

Constant Maturity Swaps (CMS), FX and Inflation Forward (Fwd), Cross Currency Swaps (CCS), Interest Rate Swap (IRS)

Present Value of Cash Flows Model

With published market prices, a valuation curve is created by the bootstrapping method and is then used to value different derivative instruments.

Formula adjusted by the volatility smile (implicit volatility), Prices (volatility) are provided by BGC Partners, according to this criterion:

FX Options

Black-Scholes

With published market prices, a volatility surface is created by interpolation and then these volatilities are used to value options.

In limited occasions significant inputs not observable in market data are used (Level 3). To carry out this estimate, several techniques are used, including extrapolation of observable market data or a mix of observable data.

The following financial instruments are classified under Level 3:

Type of	Model	Description
financial instrument	used in valuation	
Caps/ Floors/ Swaptions	Black Normal Model for Cap/Floors and Swaptions	There is no observable input of implicit volatility.
	Black – Scholes	There is no observable input of implicit volatility.
	Hull-White	Hybrid HW model for rates and Brownian motion for FX. There is no observable input of implicit volatility.
	Implicit Forward Rate Agreement (FRA)	Start Fwd unsupported by MUREX (platform) due to the UF forward estimate.
Cross currency swap, Interest rate swap, Call money swap in Tasa Activa Bancaria (Active Bank Rate) TAB	Present Value of Cash Flows Model	Validation obtained by using the interest curve and interpolating at flow maturities, but TAB is not a directly observable variable and is not correlated to any market input.
	Present Value of Cash Flows Model	Valued by using similar instrument prices plus a charge-off rate by liquidity.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 38

RISK MANAGEMENT

Introduction and general description

The Bank, due to its activities with financial instruments is exposed to several types of risk. The main risks related to financial instruments that apply to the Bank are as follow:

Market risk: rises from holding financial instruments whose value may be affected by fluctuations in market conditions, generally including the following types of risk:

a. Foreign exchange risk: this arises as a consequence of fluctuations in market interest rates.

b. Interest rate risk: this arises as a consequence of fluctuations in market interest rates.

c. Price risk: this arises as a consequence of changes in market prices, either due to factor specific to the instrument itself or due to factors that affect all the instruments negotiated in the market.

d. Inflation risk: this arises as a consequence of changes in Chile's inflation rate, whose effect would be mainly applicable to financial instruments denominated in UFs

Credit risk: this is the risk that one of the parties to a financial instrument fails to meet its contractual obligations for reason of insolvency or inability of the individuals or legal entitles in question to continue as a going concern, causing a financial loss to the other party

Liquidity risk: is the possibility that an entity may be unable to meet its payment commitments, or that in order to meet them, it may have to raise funds with onerous terms or risk damage to its image and reputation.

Operating risk: this is a risk arising from human errors, system error, fraud or external events which may damage the Bank's reputation, may have legal or regulatory implication, or cause financial losses.

This note includes information on the Bank's exposure to these risk an on its objectives, policies, and processes involved in their measurement and management.

Risk management structure

The Board of Directors is responsible for the establishment and monitoring of the Bank's risk management structure and, to this end, has a corporate governance system in line with international recommendations and trends, adapted to the Chilean regulatory reality and adapted to best practices. advanced markets in which it operates. To better exercise this function, the Board of Directors has established the Comprehensive Risk Committee ("CIR"), whose main mission is to assist in the development of its functions related to the Bank's control and risk management. Complementing the CIR in risk management, the Board also has 3 key committees: Assets and Liabilities Committee (CAPA), Markets Committee ("CDM") and the Directors and Audit Committee ("CDA"). Each of the committees is composed of directors and executive members of the Bank's management

The CIR is responsible for developing Bank risk management policies in accordance with the guidelines of the Board of Directors, the Global Risk Department of Santander Spain and the regulatory requirements issued by the Chilean Superintendency of Banks and Financial Institutions ("SBIF"). These policies have been created mainly to identify and analyze the risk faced by the Bank, establish risk limits and appropriate controls, and monitor risks and compliance with limits. The Bank's risk management policies and systems are regularly reviewed to reflect changes in market conditions, and the products or services offered. The Bank, through the training and management of standards and procedures, aims to develop a disciplined and constructive control environment, in which all its employees understand their duties and obligations..

To fulfill its functions, the CIR works directly with the Bank's risk and control departments, whose joint objectives include:

- evaluate those risks that, due to their size, could compromise the solvency of the Bank, or that present potentially significant operational or reputation risks;

- ensure that the Bank is provided with the means, systems, structures and resources in accordance with the best practices that allow for the implementation of the strategy in risk management;

- ensure the integration, control and management of all Bank risks;

- execute the application throughout the Bank and its businesses of homogeneous risk principles, policies and metrics;

- develop and implement a risk management model in the Bank, so that the risk exposure is properly integrated in the different decision-making processes;

- identify risk concentrations and mitigation alternatives, monitor the macroeconomic and competitive environment, quantify sensitivities and the foreseeable impact of different scenarios on the positioning of risks; Y

- manage the structural liquidity risks, interest rates and exchange rates, as well as the Bank's own resources base.

Consolidated Financial Statements December 2017 / Banco Santander Chile 112

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 38

RISK MANAGEMENT (continued)

To comply with the aforementioned objectives, the Bank (Administration and ALCO) carries out several activities related to risk management, which include: calculating the risk exposures of the different portfolios and / or investments, considering mitigating factors (guarantees, netting , collaterals, etc.); calculate the probabilities of expected loss of each portfolio and / or investments; assign the loss factors to the new operations (rating and scoring); measure the risk values of the portfolios and / or investments according to different scenarios through historical simulations; establish limits to potential losses based on the different risks incurred; determine the possible impacts of structural risks in the Consolidated Statements of Results of the Bank; set the limits and alerts that guarantee the Bank's liquidity; and identify and quantify operational risks by business lines and thus facilitate their mitigation through corrective actions. The CDA is primarily responsible for monitoring compliance with the Bank's risk management policies and procedures, and for reviewing the adequacy of the risk management framework in relation to the risks the Bank faces.

Credit risk

Credit risk is the risk that one of the parties to the financial instrument contract fails to comply with its contractual obligations due to insolvency or disability of natural or legal persons and causes a financial loss in the other party. For purposes of credit risk management, the Bank consolidates all the elements and components of credit risk exposure (eg risk of individual default by creditor, innate risk of a line of business or sector, and / or geographical risk) .

Mitigation of credit risk for loans and accounts receivable

The Board of Directors has delegated responsibility for credit risk management to the Comprehensive Risk Committee (CIR) and the Bank's risk departments whose roles are summarized as follows:

- Formulation of credit policies, in consultation with the business units, covering the requirements of guarantee, credit evaluation, risk rating and presentation of reports, documents and legal procedures in compliance with the regulatory, legal and internal requirements of the Bank.

- Establish the structure of the authorization for the approval and renewal of credit applications. The Bank structures levels of credit risk by placing limits on the concentration of that risk in terms of individual debtors, groups of debtors, segments of industries and countries. The authorization limits are assigned to the respective officers of the business unit (commercial, consumption, SMEs) to be monitored permanently by the Administration. In addition, these limits are reviewed periodically. The risk assessment teams at branch level interact regularly with clients, however for large operations, the risk teams of the parent company and even the CIR, work directly with clients in the evaluation of credit risks and preparation of credit risk. credit applications. Inclusively, Banco Santander España participates in the process of approving the most significant loans, for example to clients or economic groups with debt amounts greater than US \$ 40 million.

- Limit concentrations of exposure to customers, counterparts, in geographic areas, industries (for accounts receivable or credits), and by issuer, credit rating and liquidity (for investments).

- Develop and maintain the Bank's risk classification in order to classify the risks according to the degree of exposure to financial loss faced by the respective financial instruments and with the purpose of focusing the management or risk management specifically on the associated risks.

- Review and evaluate credit risk The risk divisions of the Administration are largely independent of the commercial division of the bank and evaluate all credit risks in excess of the designated limits, prior to the approval of credits to customers or prior to the acquisition of specific investments. Credit renewals and revisions are subject to similar processes.

In the preparation of a credit request for a corporate client, the Bank verifies several parameters such as the debt service capacity (including, generally, projected cash flows), the client's financial history and / or projections for the economic sector in which it operates. The risk division is closely involved in this process. All requests contain an analysis of the client's strengths and weaknesses, a rating and a recommendation. The credit limits are not determined based on the outstanding balances of the clients, but on the direct and indirect credit risk of the financial group. For example, a limited company would be evaluated together with its subsidiaries and affiliates.

Consumer loans are evaluated and approved by their respective risk divisions (individuals, SMEs) and the evaluation process is based on an evaluation system known as Garra (Banco Santander) and Syseva of Santander Banefe, both processes are decentralized, automated and they are based on a scoring system that includes the credit risk policies implemented by the Bank's Board of Directors. The credit application process is based on the collection of information to determine the client's financial situation and ability to pay. The parameters that are used to assess the credit risk of the applicant include several variables such as: income levels, duration of current employment, indebtedness, reports of credit agencies.

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 38

RISK MANAGEMENT (contibued)

Mitigation of credit risk of other financial assets (investments, derivatives, commitments)

As part of the process of acquiring financial investments and financial instruments, the Bank considers the probability of uncollectibility of issuers or counterparties using internal and external evaluations such as independent risk evaluators of the Bank. In addition, the Bank is governed by a strict and conservative policy which ensures that the issuers of its investments and counterparties in transactions of derivative instruments are of the highest reputation.

In addition, the Bank operates with various instruments that, although they involve exposure to credit risk, are not reflected in the Consolidated Statement of Financial Position, such as: guarantees and bonds, documentary letters of credit, guarantee slips and commitments to grant loans. .

The guarantees and bonds represent an irrevocable payment obligation. In the event that a guaranteed client does not fulfill its obligations with third parties who are liable to the Bank, the latter will make the corresponding payments, so that these transactions represent the same exposure to credit risk as a common loan.

Documentary letters of credit are commitments documented by the Bank on behalf of the client that are guaranteed by the merchandise shipped to which they are related and, therefore, have a lower risk than direct indebtedness. Guarantee slips correspond to contingent commitments that are made effective only if the client does not comply with the performance of works agreed with a third party, guaranteed by them.

When it comes to commitments to grant credit, the Bank is potentially exposed to losses in an amount equivalent to the unused total of the commitment. However, the probable amount of loss is less than the unused total of the commitment. The Bank monitors the maturity of credit lines because generally long-term commitments have a higher credit risk than short-term commitments.

Maximum credit risk exposure

For financial assets recognized in the Consolidated Statement of Financial Position, exposure to credit risk is equal to their book value. For financial guarantees granted, the maximum exposure to credit risk is the maximum amount that the Bank would have to pay if the guarantee were executed.

Below is the distribution by financial asset and off-balance sheet commitments of the Bank's maximum exposure to credit risk as of December 31, 2017 and 2016, without deduction of collateral, security interests or credit improvements received

		As of December 31, 2017	2016
		Amount of exposure	Amount of exposure

Total	27,725,914	100.00%	815,773	100.00%	27,206,431	100.00%	820,311	100.00%

As December 31, 2017, the Bank does not believe that the credit quality of its other financial assets or liabilities is of sufficient significance to warrant further disclosure.

Regarding the individual evaluation portfolio, the different categories correspond to:

- Categories A or Portfolio in Normal Compliance, is one that is made up of debtors whose ability to pay them

it allows compliance with its financial obligations and commitments, and that according to the evaluation of its economic-financial situation, it is not seen that this condition changes in the short term.

- Categories B or Substandard Portfolio, is one that contemplates debtors with financial difficulties or significant worsening of their ability to pay and over which there are reasonable doubts about the total reimbursement of principal and interest in the terms agreed upon, showing a low slack to meet with your financial obligations in the short term.

- Categories C or Portfolio in Default, is made up of those debtors whose recovery is considered remote, since they show a deteriorated or no capacity to pay.

As for the group evaluation portfolios, a joint evaluation of the operations that compose it is carried out.

Refer to Note 30 for details of impaired Bank loans and their respective provisions. Also refer to the Note 19 for a breakdown of the maturities of the Bank's financial assets.

Consolidated Financial Statements December 2017 / Banco Santander Chile 115

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 38**RISK MANAGEMENT (contibued)****Exposure to credit risk in derivative contracts with abroad**

As of December 31, 2017, the Bank's foreign exposure, including the counterparty risk in the derivative portfolio, was USD 2,090 million or 4.27% of the assets. In the table below, the exposure to derivative instruments is calculated using the equivalent credit risk, which is equal to the net value of the replacement plus the maximum potential value, considering the collateral in cash, which mitigates the exposure

Below, additional details are included regarding our exposure to those countries that have a rating of 1 and that correspond to the largest exposures. The following is the exposure as of December 31, 2017, considering the fair value of the derivative instruments.

Country	Clasificación (adjusted to market)	Derivative instrument			Total exposure
		Deposits	Loans	Financial investments	
		M USD	M USD	M USD	M USD
Bolivia	3	0,00	0,06	0,00	0,06
China	2	0,00	243,95	0,00	243,95
Italia	2	0,00	2,38	0,78	3,16
México	2	0,00	0,01	0,00	0,01
Panamá	2	0,63	0,00	0,00	0,63
Perú	2	3,38	0,00	0,00	3,38
Tailandia	2	0,00	0,31	0,00	0,31
Turquía	3	0,00	9,49	0,00	9,49
Total		4,01	2,39	254,59	260,99

The total amount of this exposure to derivative instruments must be offset daily with the collateral and, therefore, the exposure to net loans is USD \$ 0.

Our exposure to Spain within the group is as follows:

Counterpart	Country Clasification	Derivative instruments (adjusted to market) M USD	Deposits	Loans	Financial	Total exposure M USD
			M USD	M USD	investments M USD	
Banco Santander España (*)	España 1	9,74	118,26	-	-	128,00

The total amount of this exposure to derivative instruments must be offset daily with the collateral and, therefore, the exposure to net loans is USD \$0.28.

(*) We include our exposure to the Santander branches in New York and Hong Kong as exposure to Spain.

Impairment of other financial instruments

As of December 31, 2017 and 2016, the Bank did not have significant impairments in its financial assets other than credits and / or accounts receivable.

Security interests and credit improvements

The maximum exposure to credit risk, in some cases, is reduced by guarantees, credit enhancements and other actions that mitigate the Bank's exposure. Based on this, the constitution of guarantees is a necessary but not sufficient instrument in the granting of a loan; therefore, the acceptance of risk by the Bank requires the verification of other variables or parameters such as the ability to pay or generate resources to mitigate the risk incurred.

The procedures for the management and valuation of guarantees are included in the internal risk management policy. These policies establish the basic principles for the management of credit risk, which includes the management of guarantees received in transactions with customers. In this sense, the risk management model includes assessing the existence of appropriate and sufficient guarantees that allow the recovery of the loan to be carried out when the debtor's circumstances do not allow it to meet its obligations.

The procedures used for the valuation of the guarantees are in accordance with the best practices of the market, which involve the use of valuations in real estate guarantees, market price in stock values, value of the shares in an investment fund, etc. All the collateral received must be properly instrumented and registered in the corresponding registry, as well as having the approval of the Bank's legal divisions.

Consolidated Financial Statements December 2017 / Banco Santander Chile 116

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 38**RISK MANAGEMENT (continued)**

The Bank also has rating tools that allow ordering the credit quality of operations or clients. In order to study how this probability varies, the Bank has historical databases that store the information generated internally. The qualification tools vary according to the segment of the analyzed client (commercial, consumption, SMEs, etc.).

The following is a breakdown of impaired and non-impaired financial assets that have collateral, collateral or credit enhancements associated with the Bank as of December 31, 2017 and 2016:

	As of December	
	2017	2016
	MCh\$	MCh\$
Non-impaired financial assets:		
Properties/mortgages	19,508,151	17,560,550
Investments and others	2,108,962	2,326,396
Impaired financial assets:		
Properties/mortgages	152,252	186,297
Investments and others	1,087	2,064
Total	21,770,452	20,075,307

Liquidity risk

Liquidity risk is the risk that the Bank has difficulties in complying with the obligations associated with its financial obligations.

Liquidity risk management

The Bank is exposed daily to requirements of cash funds from several banking transactions such as current account drafts, payments of term deposits, guarantee payments, disbursements of derivative operations, etc. As is inherent in banking activity, the Bank does not hold funds in cash to cover the balance of those positions, since experience shows that only a minimum level of these funds will be withdrawn, which can be foreseen with a high degree of certainty. .

The Bank's approach to liquidity management is to ensure, to the extent possible, that it always has sufficient liquidity to meet its obligations at maturity, under normal circumstances and stress conditions, without incurring unacceptable losses or risking risk. of damage to the reputation of the Bank. The Board sets limits on a minimum portion of funds to be made available to meet such payments and on a minimum level of inter-bank operations and other lending facilities that should be available to cover drafts at unexpected levels of demand, which is reviewed periodically. On the other hand, the Bank must comply with regulatory limits dictated by the SBIF for the mismatches of terms.

These limits affect the mismatches between future income and expenditure flows of the Bank considered individually and are the following:

- i. Mismatches of up to 30 days for all currencies, up to once the basic capital;
- ii. mismatches of up to 30 days for foreign currencies, up to once the basic capital; Y
- iii. mismatches of up to 90 days for all currencies, twice the basic capital.

The treasury department receives information from all the business units on the liquidity profile of its financial assets and liabilities and details of other projected cash flows derived from future businesses. According to this information, treasury maintains a portfolio of liquid assets in the short term, composed largely of liquid investments, loans and advances to other banks, to ensure that the Bank maintains sufficient liquidity. The liquidity needs of the business units are met through short-term transfers from treasury to cover any short-term fluctuation and long-term financing to address all structural liquidity requirements.

The Bank monitors its liquidity position on a daily basis, determining the future flows of its expenses and revenues. In addition, stress tests are carried out at the end of each month, for which a variety of scenarios are used, covering both normal market conditions and fluctuation conditions. The liquidity policy and procedures are subject to review and approval by the Bank's Board of Directors. Periodic reports are generated detailing the liquidity position of the Bank and its affiliates, including any exceptions and corrective measures adopted, which are regularly reviewed by the ALCO.

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 38**RISK MANAGEMENT (continued)**

The Bank is based on client (retail) and institutional deposits, bonds with banks, debt instruments and time deposits as its main sources of financing. Although most of the obligations with banks, debt instruments and time deposits have maturities of more than one year, customer and retail deposits tend to have shorter maturities and a large proportion of them are payable within 90 days. The short-term nature of these deposits increases the liquidity risk of the Bank and therefore the Bank actively manages this risk by constantly monitoring market trends and price management.

Exposure to liquidity risk

One of the key measures used by the Bank to manage liquidity risk is the proportion of net liquid assets to customer deposits. For this purpose, the net liquid assets must include cash / cash, cash equivalents and debt investments for which there is an active and liquid market minus the deposits of the banks, fixed income securities issued, loans and other commitments maturing in next month. A similar measure, but not identical, is used as a calculation to measure the Bank's compliance with the liquidity limit established by the SBIF, where the Bank determines the mismatch between its rights and obligations according to maturity according to the estimated performance. The proportions of the mismatches at 30 days in relation to capital and 90 days in relation to 2 times the capital are shown in the following table:

	As of	
	December	
	31,	2017 2016
	%	%
30 days	(48)	(15)
30 days foreign	(22)	21
90 days	(51)	(37)

Following is a breakdown, by contractual maturities, of the balances of the Bank's assets and liabilities as of December 31, 2017 and 2016, considering also those unrecognized commitments:

As of December 31, 2017	Demand	Up to 1 month	Between 1 and 3 months	Between 3 and 12 months	Between 1 and 3 years	Between 3 and 5 years	More than 5 years	Total

Net expiration Unrecognized loan / credit commitments	(4,699,580)	(2,699,385)	(1,990,942)	458,847	3,508,821	1,905,523	6,739,742	3,223,026
Guarantees and bonds	-	(9,916)	(11,591)	(39,811)	(63,731)	-	-	(125,049)
Letters of credit from abroad confirmed	-	(12,247)	(8,125)	(8,505)	(28,809)	-	-	(57,686)
Letters of documentary credits issued	-	(36,662)	(82,342)	(39,768)	(28)	-	-	(158,800)
Guarantee	-	(79,457)	(175,437)	(739,170)	(592,017)	(151,435)	(15,095)	(1,752,611)

Net maturity, including commitments	(4,699,580)	(2,837,667)	(2,268,437)	(368,407)	2,824,236	1,754,088	6,724,647	1,128,880
--	--------------------	--------------------	--------------------	------------------	------------------	------------------	------------------	------------------

The above tables show the undiscounted cash flows of the Bank's financial assets and liabilities on the estimated maturity basis. The expected cash flows of the Bank from these instruments can vary considerably compared to this analysis. For example, demand deposits are expected to remain stable or have an increasing trend, and unrecognized loan commitments are not expected to be executed all that have been arranged. In addition, the above breakdown excludes available lines of credit, since they lack contractual defined maturities.

Consolidated Financial Statements December 2017 / Banco Santander Chile 118

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 38

RISK MANAGEMENT (continued)

Market risk

Market risk arises as a consequence of the activity maintained in the markets, through financial instruments whose value may be affected by variations in market conditions, reflected in changes in the different assets and financial risk factors. The risk can be mitigated through hedges through other products (assets / liabilities or derivatives), or by undoing the operation / open position. The objective of market risk management is the management and control of exposure to market risk within acceptable parameters.

There are four major risk factors that affect market prices: interest rates, exchange rates, price, and inflation. Additionally, and for certain positions, it is also necessary to consider other risks, such as spread risk, base risk, commodity risk, volatility or correlation risk.

Market risk management

The internal management of the Bank to measure market risk is mainly based on the procedures and standards of Santander Spain, which are based on analyzing management in three main components:

- trading portfolio;
- local financial management portfolio;
- portfolio of foreign financial management.

The trading portfolio consists mainly of those investments valued at their fair value, free of any restriction for immediate sale and that are often bought and sold by the Bank with the intention of selling them in the short term in

order to benefit from the short-term price variations. The financial management portfolios include all financial investments not considered in the trading portfolio.

The general responsibility for market risk lies with the ALCO. The Bank's risk / finance department is responsible for the preparation of detailed management policies and their application in the Bank's operations in accordance with the guidelines established by the ALCO and by the Global Risk Department of Banco Santander de España.

The functions of the department in relation to the trading portfolio entail the following:

- i. apply "Value at Risk" (VaR) techniques to measure interest rate risk,
- ii. adjust the trading portfolios to the market and measure the profit and daily loss of commercial activities,
- iii. compare the real VAR with the established limits,
- iv. establish procedures to control losses in excess of predetermined limits and
- v. Provide information on the negotiation activities for the ALCO, other members of the Bank's Management, and the Global Risk Department of Santander - Spain.

The functions of the department in relation to the financial management portfolios entail the following:

- i. apply sensitivity simulations (as explained below) to measure the interest rate risk of activities in local currency and the potential loss foreseen by these simulations and
- ii. provides the respective daily reports to the ALCO, other members of the Bank's Management, and the Global Risk Department of Santander - Spain.

Market risk - Negotiation portfolio

The Bank applies VaR methodologies to measure the market risk of its trading portfolio. The Bank has a consolidated commercial position composed of fixed income investments, foreign currency trading and a minimum equity investment position. The composition of this portfolio consists essentially of bonds of the Central Bank of Chile, mortgage bonds and locally issued low-risk corporate bonds. At the end of the year, the trading portfolio did not present investments in stock portfolios.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 38

RISK MANAGEMENT (contibued)

For the Bank, the VaR estimate is made under the historical simulation methodology, which consists of observing the behavior of the losses and gains that would have occurred with the current portfolio if the market conditions of a certain historical period were in force. , from that information, infer the maximum loss with a certain level of confidence. The methodology has the advantage of accurately reflecting the historical distribution of market variables and of not requiring any specific probability distribution assumption. All VaR measures are intended to determine the distribution function for the change in the value of a given portfolio, and once this distribution is known, to calculate the percentile related to the level of confidence needed, which will be equal to the value at risk in virtue of those parameters. As calculated by the Bank, the VaR is an estimate of the maximum expected loss of the market value of a given portfolio within a 1-day horizon at a confidence level of 99.00%. It is the maximum loss of a day in which the Bank could expect to suffer in a certain portfolio with a 99.00% confidence level. In other words, it is the loss that the Bank would expect to exceed only 1.0% of the time. The VaR provides a single estimate of market risk that is not comparable from one market risk to another. The returns are calculated using a 2 year time window or at least 520 data obtained from the reference date of VaR calculation backwards in time.

The Bank does not calculate three separate VaRs. A single VaR is calculated for the entire trading portfolio, which, in addition, is segregated by type of risk. The VaR program performs a historical simulation and calculates a profit and loss statement (G & P) for 520 data points (days) for each risk factor (fixed income, currencies and variable income). The G & P of each risk factor is added and a consolidated VaR calculated with 520 data points or days. At the same time, the VaR is calculated for each risk factor based on the individual G & P calculated for each factor. Moreover, a weighted VaR is calculated in the manner described above but which gives a weight greater than the 30 most recent data points. The largest of the two VaRs is reported. In 2015 and 2014, the same VaR model was still used and there has been no change in methodology.

The Bank uses the VaR estimates to deliver a warning in case the statistically estimated losses in the trading portfolio exceed the prudent levels and, therefore, certain predetermined limits exist.

Limitations of the VaR model

When applying this calculation methodology no assumption is made about the probability distribution of changes in risk factors, simply use the changes observed historically to generate scenarios for the risk factors in which each of the positions will be valued. in portfolio

It is necessary to define a valuation function $f_j(x_i)$ for each instrument j , preferably the same one that it uses to calculate the market value and results of the daily position. This valuation function will be applied in each scenario to generate simulated prices of all the instruments in each scenario.

In addition, the VaR methodology must be interpreted considering the following limitations:

- Changes in market rates and prices may not be independent and identically distributed random variables, nor may they have a normal distribution. In particular, the assumption of normal distribution may underestimate the probability of extreme market movements;
- the historical data used by the Bank may not provide the best estimate of the joint distribution of changes in risk factors in the future, and any modification of the data may be inadequate. In particular, the use of historical data may fail to capture the risk of possible extreme and adverse market fluctuations regardless of the period of time used;
- a 1-day time horizon may not fully capture those market risk positions that can not be liquidated or hedged in one day. It would not be possible to liquidate or cover all positions in a day;
- VaR is calculated at the close of business, however trading positions may change substantially during the trading day;
- the use of 99% confidence level does not take into account, nor does it make any statement about, the losses that may occur beyond this level of trust, and
- the model as such VaR does not capture all the complex effects of the risk factors on the value of the positions or portfolios, and therefore, could underestimate the potential losses.

At no time in 2017 and 2016, the Bank exceeded the VaR limits in relation to the 3 components that make up the trading portfolio: fixed income investments, variable income investments and investments in foreign currency.

The Bank performs daily back-testing and, in general, it is discovered that trading losses exceed the estimated VaR almost one in every 100 trading days. At the same time, a limit was established for the maximum VaR that is willing to accept on the trading portfolio. In both 2017 and 2016, the Bank has remained within the maximum limit established for the VaR, even in those instances in which the real VaR exceeded the estimate.

Banco Santander Chile and Subsidiaries**Notes to the Consolidated Financial Statements**

AS OF DECEMBER 31, 2017 AND 2016

NOTE 38**RISK MANAGEMENT (contibued)**

The high, low and average levels for each component and for each year were the following:

	2017	2016
VAR	MMUSD	MMUSD
Consolidated:		
High	5.71	3.95
Low	1.56	1.08
Average	3.01	2.25
Fixed income investments:		
High	5.51	2.71
Low	1.15	0.55
Average	2.36	1.33
Variable income investments:		
High	0.01	0.03
Low	0.00	0.00
Average	0.00	0.00
Foreign currency investments		
High	4.21	3.83
Low	0.53	0.61
Average	1.71	1.91

Market risk – local and foreign financial management

The Bank's financial management portfolio includes most of the Bank's assets and non-trading liabilities, including the loan / loan portfolio. For these portfolios, investment and financing decisions are heavily influenced by the Bank's commercial strategies.

The Bank uses a sensitivity analysis to measure the market risk of local and foreign currency (not included in the trading portfolio). The Bank performs a scenario simulation which will be calculated as the difference between the present value of the flows in the chosen scenario (curve with parallel movement of 100 bp in all its tranches) and its value in the base scenario (current market). All positions in local currency indexed to inflation (UF) are adjusted by a sensitivity factor of 0.57, which represents a change in the rate curve at 57 basis points in real rates and 100 basis points in nominal rates. The same scenario is carried out for net foreign currency positions and interest rates in US dollars. The Bank has also established limits regarding the maximum loss that these types of movements in interest rates may have on capital and net financial income budgeted for the year.

To determine the consolidated limit, the foreign currency limit is added to the local currency limit for both the net financial loss limit and the capital and reserve loss limit, using the following formula:

Bound limit = square root of $a^2 + b^2 + 2ab$

a: limit in national currency.

b: limit in foreign currency.

Since it is assumed that the correlation is 0. $2ab = 0$.

Limitation of the sensitivity models

The most important assumption is the use of a change of 100 basis points in the yield curve (57 basis points for real rates). The Bank uses a change of 100 basis points given that sudden changes of this magnitude are considered realistic. The Global Risk Department of Santander Spain has also established comparable limits by country, in order to be able to compare, monitor and consolidate the market risk by country in a realistic and orderly manner.

In addition, the methodology of sensitivity simulations should be interpreted considering the following limitations:

- The simulation of scenarios assumes that the volumes remain in the Bank's Consolidated Statement of Financial Position and that they are always renewed at maturity, omitting the fact that certain considerations of credit risk and prepayments may affect the maturity of certain positions.

- This model assumes an equal change in the entire performance curve of everything and does not take into account the different movements for different maturities.

- The model does not take into account the sensitivity of volumes resulting from changes in interest rates.

- The limits to the losses of budgeted financial income are calculated on the basis of expected financial income for the year that can not be obtained, which means that the actual percentage of financial income at risk could be greater than expected.

Operating risk

Operational risk is the risk of direct or indirect losses arising from a wide variety of causes related to the Bank's processes, personnel, technology and infrastructure, and external factors that are not credit, market or liquidity, such as those related to legal or regulatory requirements. Operating risks arise from all Bank operations.

The objective of the Bank is the management of operational risk in order to mitigate economic losses and damages to the Bank's reputation with a flexible structure of internal control.

The Bank's Administration has the primary responsibility for the development and application of controls to deal with operational risks. This responsibility is supported by the overall development of the Bank's standards for operational risk management in the following areas:

- Requirements for the proper segregation of functions, including the independent authorization of operations
- Requirements for reconciliation and supervision of transactions
- Compliance with applicable legal and regulatory requirements
- Documentation of controls and procedures
- Requirements for the periodic evaluation of the applicable operational risks, and the adequacy of the controls and procedures to deal with the identified risks
- Requirements for the disclosure of operating losses and the proposed corrective measures
- Development of contingency plans
- Training and professional development / training
- Establishment of business ethics standards
- Reduction or mitigation of risks, including contracting insurance policies if they are effective.

Compliance with Bank regulations is supported by a program of periodic reviews carried out by the Bank's internal audit and whose examination results are presented internally to the management of the business unit examined and to the Directors and Audit Committee.

Concentration of risk

The Bank operates mainly in Chile, so most of its financial instruments are concentrated in that country. Refer to Note 9 of the financial statements for a breakdown of the concentration by industry of the Bank's receivables and accounts receivable.

Banco Santander Chile and Subsidiaries

Notes to the Consolidated Financial Statements

AS OF DECEMBER 31, 2017 AND 2016

NOTE 39

SUBSEQUENT EVENTS

On February 1, 2018, the Bank made a Current Bond placement corresponding to its "T-15" line for an amount of UF 5,000,000.

On February 6, 2018, the Bank made a Current Bond placement corresponding to its "T-11" line for an amount of UF 5,000,000.

During the ordinary session of the Board of Directors of Banco Santander Chile, held on February 27, 2018, the following were agreed upon:

matters:

1) On the occasion of the resignation of Mr. Vittorio Corbo Lioi as titular director, carried out during said session, who exercised

In addition, as Chairman of the Board of Directors, Mr. Claudio Melandri Hinojosa has been appointed as Chairman and Chairman of the Board of Directors of Banco Santander Chile, who will temporarily continue to hold the position of General Manager until February 28, 2018 inclusive, as permitted by article 49 N° 8 of the General Banking Law.

2) The Bank's General Manager has been appointed, as of March 1, 2018, to Mr. Miguel Mata Huerta, who currently serves as Deputy General Manager, the latter being the position that was agreed to be abolished.

There are no other subsequent events to be disclosed that occurred between January 1, 2018 and the date of issuance of these Financial Statements (February 27, 2018).

FELIPE CONTRERAS FAJARDO CLAUDIO MELANDRI HINOJOSA
