IndexSHENANDOAH TELECOMMUNICATIONS COMPANY AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

The interim condensed consolidated financial statements of Shenandoah Telecommunications Company and Subsidiaries (collectively, the “Company”) are unaudited. In the opinion of management, all adjustments necessary for a fair presentation of the interim results have been reflected therein. All such adjustments were of a normal and recurring nature. These statements should be read in conjunction with the consolidated financial statements and related notes in the Company’s Annual Report on Form 10-K for the year ended December 31, 2010. The balance sheet information at December 31, 2010 was derived from the audited December 31, 2010 consolidated balance sheet. Operating revenues and income from operations for any interim period are not necessarily indicative of results that may be expected for the entire year.

2. Discontinued Operations

In September 2008, the Company announced its intention to sell its Converged Services operation, and the related assets and liabilities were reclassified as held for sale in the consolidated balance sheet and the historical operating results were reclassified as discontinued operations. Depreciation and amortization on long-lived assets was also discontinued.

During 2009 and 2010, the Company determined that the fair value of Converged Services had declined. Accordingly, the Company recorded an impairment loss of \$17.5 million (\$10.7 million, net of taxes) as of March 31, 2009, and recorded an additional impairment loss of \$1.9 million (\$1.1 million, net of taxes) as of December 31, 2010, to reduce the carrying value of these assets to their estimated fair value less cost to sell. At March 31, 2011, negotiations to complete the sale continue, and there has been no change in the estimated fair value of the assets. During the first quarter of 2011, the Company made the decision to transfer service contracts for five Converged Services’ properties that were within the Shentel Cable franchised cable footprint and could be serviced by the Company’s nearby cable headends. These properties, with an aggregate net book value of approximately \$0.4 million in long-lived assets, were transferred to Shentel Cable and have been reclassified from discontinued operations for all prior periods. The Company recorded an adjustment to depreciation expense of \$0.1 million to reduce the carrying value of the assets transferred to the lower of their carrying value net of the impairment charge or the carrying value as if depreciation had been recorded on these assets at all times.

Assets and liabilities held for sale consisted of the following:

	March 31, 2011	December 31, 2010
Assets held for sale:		
Property, plant and equipment, net	\$ 6,145	\$ 6,614
Intangible assets, net	706	706
Deferred charges	1,310	1,310
Other assets	565	675
	\$ 8,726	\$ 9,305
Liabilities:		
Other liabilities	\$ 897	\$ 910

Discontinued operations included the following amounts of operating revenue and income (loss) before income taxes:

	Three Months Ended March 31,	
	2011	2010
Operating revenues	\$ 3,306	\$ 3,367
Earnings (loss) before income taxes	\$ (55)	\$ 285

3. Earnings per share

Basic net income (loss) per share was computed on the weighted average number of shares outstanding. Diluted net income (loss) per share was computed under the treasury stock method, assuming the conversion as of the beginning of the period, for all dilutive stock options. Of 533 thousand and 279 thousand shares and options outstanding at March 31, 2011 and 2010, respectively, 219 thousand and 219 thousand were anti-dilutive, respectively. These options have been excluded from the computations of diluted earnings per share for their respective period. There were no adjustments to net income for either period.

Index

4. Investments Carried at Fair Value

Investments include \$2.4 million and \$2.3 million of investments carried at fair value as of March 31, 2011 and December 31, 2010, respectively, consisting of equity, bond and money market mutual funds. These investments were acquired under a rabbi trust arrangement related to a non-qualified supplemental retirement plan maintained by the Company. During the three months ended March 31, 2011, the Company recognized \$27 thousand in net losses on dispositions of investments, recognized \$5 thousand in dividend and interest income from investments, and recognized net unrealized gains of \$98 thousand on these investments. Fair values for these investments held under the rabbi trust were determined by Level 1 quoted market prices for the underlying mutual funds.

5. Financial Instruments

Financial instruments on the consolidated balance sheets that approximate fair value include: cash and cash equivalents, receivables, investments carried at fair value, payables, accrued liabilities, and long-term debt. Due to the relatively short time frame to maturity of the Company's fixed rate debt, fair value approximates its carrying value.

The Company measures its interest rate swap at fair value based on information provided by the counterparty and recognizes it as a liability on the Company's condensed consolidated balance sheet. Changes in the fair value of the swap are recognized in interest expense, as the Company did not designate the swap agreement as a cash flow hedge for accounting purposes.

6. Segment Information

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision makers. The Company has three reportable segments, which the Company operates and manages as strategic business units organized by lines of business: (1) Wireless, (2) Wireline, and (3) Cable TV. A fourth segment, Other, primarily includes Shenandoah Telecommunications Company, the parent holding company as well as certain general and administrative costs historically charged to Converged Services that cannot be allocated to discontinued operations.

The Wireless segment provides digital wireless service to a portion of a four-state area covering the region from Harrisburg, York and Altoona, Pennsylvania, to Harrisonburg, Virginia, as a Sprint PCS Affiliate of Sprint Nextel. This segment also owns cell site towers built on leased land, and leases space on these towers to both affiliates and non-affiliated service providers.

The Wireline segment provides regulated and unregulated voice services, dial-up and DSL internet access, and long distance access services throughout Shenandoah County and portions of northwestern Augusta County, Virginia, and leases fiber optic facilities throughout the northern Shenandoah Valley of Virginia, northern Virginia and adjacent areas along the Interstate 81 corridor, including portions of West Virginia and Maryland.

The Cable TV segment provides video, internet and voice services in Virginia, West Virginia and Maryland. It includes the operations acquired from JetBroadBand, LLC, since July 30, 2010, and the operations acquired from Suddenlink since November 30, 2010.

Consolidated totals	\$ 463,165	\$ 466,437

7. Income Taxes

The Company files U.S. federal income tax returns and various state and local income tax returns. With few exceptions, years prior to 2007 are no longer subject to examination. The Company is under audit in the state of Maryland for the 2007, 2008 and 2009 tax years. No other state or federal income tax audits were in process as of March 31, 2011.

8. Subsequent Events

On April 29, 2011, the Company executed the Second Amendment Agreement to its Credit Facility originally entered into in July 2010. The Second Amendment reduces the Company's interest rate margins for base rate loans and LIBOR loans by 50 basis points each, from the initial 2.50% and 3.50%, respectively, to 2.00% and 3.00%, respectively. It also reduces the Company's commitment fee from the current 0.500% on unused capacity to 0.375%. The Second Amendment also removes the provision that limited the Company's ability to borrow the full \$50 million under the Revolver Facility, increasing the Company's borrowing capacity by \$20 million. The Second Amendment made other technical revisions primarily related to the above changes.

On May 5, 2011, the Company received cash proceeds of \$0.9 million (with an additional \$0.1 million in proceeds placed in escrow for twelve months) to complete the sale, effective April 22, 2011, of service contracts for seven Converged Services' properties and related assets. The total proceeds approximate the carrying value of the assets sold.

ITEMMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
2. OPERATIONS

This management's discussion and analysis includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. When used in this report, the words "anticipate," "believe," "estimate," "expect," "intend," "plan" and similar expressions as they relate to Shenandoah Telecommunications Company or its management are intended to identify these forward-looking statements. All statements regarding Shenandoah Telecommunications Company's expected future financial position and operating results, business strategy, financing plans, forecasted trends relating to the markets in which Shenandoah Telecommunications Company operates and similar matters are forward-looking statements. We cannot assure you that the Company's expectations expressed or implied in these forward-looking statements will turn out to be correct. The Company's actual results could be materially different from its expectations because of various factors, including those discussed below and under the caption "Risk Factors" in the Company's Annual Report on Form 10-K for its fiscal year ended December 31, 2010. The following management's discussion and analysis should be read in conjunction with the Company's Annual Report on Form 10-K for its fiscal year ended December 31, 2010, including the financial statements and related notes included therein.

General

Overview. Shenandoah Telecommunications Company is a diversified telecommunications company providing both regulated and unregulated telecommunications services through its wholly owned subsidiaries. These subsidiaries provide wireless personal communications services (as a Sprint PCS Affiliate of Sprint Nextel) and local exchange telephone services, as well as cable television, video, Internet and data services, long distance, fiber optics facilities, and leased tower facilities. The Company has the following three reporting segments, which it operates and manages as strategic business units organized by lines of business:

- * The Wireless segment provides digital wireless service to a portion of a four-state area covering the region from Harrisburg, York and Altoona, Pennsylvania, to Harrisonburg, Virginia, as a Sprint PCS Affiliate of Sprint Nextel. This segment also owns cell site towers built on leased land, and leases space on these towers to both affiliates and non-affiliated service providers.

- *The Wireline segment provides regulated and unregulated voice services, dial-up and DSL internet access, and long-distance access services throughout Shenandoah County and portions of northwestern Augusta County, Virginia, and leases fiber optic facilities, throughout the northern Shenandoah Valley of Virginia, northern Virginia and adjacent areas along the Interstate 81 corridor, including portions of West Virginia and Maryland.

- * The Cable TV segment provides cable television services in Virginia, West Virginia and Maryland.

A fourth segment, Other, primarily includes Shenandoah Telecommunications Company, the parent holding company, as well as certain general and administrative costs historically charged to Converged Services that cannot be allocated to discontinued operations.

In September 2008, the Company announced its intention to sell its Converged Services operation, and the related assets and liabilities were reclassified as held for sale in the consolidated balance sheet and the historical operating results were reclassified as discontinued operations. Depreciation and amortization on long-lived assets was discontinued.

In March, 2009, the Company recorded an impairment loss of \$17.5 million (\$10.7 million, net of taxes) to reduce the carrying value of these assets to their estimated fair value less cost to sell. In December 2010, the Company

recorded an additional impairment charge of \$1.9 million (\$1.1 million, net of tax), to reduce the carrying value of these assets to their revised estimated fair value less cost to sell. In March, 2011, the Company transferred service contracts for five properties from Converged Services to Shentel Cable, as these properties are located in the Company's franchise cable footprint as a result of the JetBroadBand acquisition. Operating results for these properties have been reclassified as continuing operations for all periods presented, and the Company recorded an adjustment to depreciation expense of \$0.1 million to reduce the carrying value of assets transferred to the lower of their carrying value net of the impairment charge or the carrying value as if depreciation had been recorded on these assets at all times. At March 31, 2011, negotiations to complete the sale of the remaining assets continue, and there has been no change in the estimated fair value of these assets.

Index

Acquisition of Virgin Mobile Customers and Initiation of Prepaid Wireless Sales

In July 2010, the Company acquired the right to receive a share of revenues from approximately 50,000 Virgin Mobile customers in our service area, and effective July 11, 2010, the Company began selling Virgin Mobile and Boost prepaid products and services. The Company expects to incur significant costs of acquisition (including handset subsidies, commissions, and other sales and marketing costs) in the month of customer activation. Due to expensing all costs of acquisition in the month of acquisition, the Company expects that the sale of prepaid products and services will have a net negative impact on operating results until the base of customers is sufficient such that the aggregate monthly revenue less recurring expenses exceeds the up-front costs for new activations.

Cable Acquisitions

On July 30, 2010, the Company completed the acquisition of cable operations and subscribers from JetBroadBand for approximately \$148 million in cash. The acquired cable operations offer video, high speed Internet and voice services representing approximately 66,000 revenue generating units in southern Virginia and southern West Virginia. The acquired networks pass approximately 115,000 homes. The operating results of the acquired cable operations are now included in the Company's Cable Television segment, significantly impacting that segment's operating revenues and expenses in subsequent periods.

On November 30, 2010, the Company completed the acquisition of two small cable systems from Suddenlink for \$4.5 million. These systems are located in West Virginia and Maryland, pass approximately 7,000 homes and represented approximately 4,200 revenue generating units.

Results of Operations

Three Months Ended March 31, 2011 Compared with the Three Months Ended March 31, 2010

Consolidated Results

The Company's consolidated results from continuing operations for the first quarter of 2011 and 2010 are summarized as follows:

(in thousands)

	Three Months Ended		Change	
	2011	2010	\$	%
Operating revenues	\$ 60,428	\$ 41,597	\$ 18,831	45.3
Operating expenses	53,337	30,079	23,258	77.3
Operating income	7,091	11,518	(4,427)	(38.4)
Interest expense	(1,819)	(310)	(1,509)	486.8
Other income (expense)	93	21	68	323.8
Income before taxes	5,365	11,229	(5,864)	(52.2)
Income tax expense	2,305	4,648	2,343	50.4
Net income from continuing operations	\$ 3,060	\$ 6,581	\$ (3,521)	(53.5)

Index

Operating revenues

For the three months ended March 31, 2011, operating revenues increased \$18.8 million, or 45.3%. The increase was primarily due to incremental cable segment revenues of \$11.7 million resulting from the cable acquisitions which occurred in the latter half of 2010, and to \$4.4 million in incremental net revenues from prepaid PCS customers. Postpaid PCS revenues increased \$1.2 million over the first quarter of 2010, while cable revenues in the markets acquired in 2008 increased \$0.9 million over the first quarter of 2010. All other revenues increased \$0.5 million, net, in the first quarter of 2011 over the first quarter of 2010.

Operating expenses

For the three months ended March 31, 2011, operating expenses increased \$23.3 million, or 77.3%, compared to the 2010 period. The cable operations acquired in 2010 incurred \$15.0 million of operating expenses in the first quarter of 2011, while costs associated with prepaid PCS offerings totaled \$5.5 million. The incremental costs of the cable operations acquired in 2008 accounted for \$1.3 million of the year over year increase. Costs related to the expansion of the wireless network and the provision of high-speed wireless internet data access services added \$0.5 million in incremental site rent, power and backhaul costs, and \$0.2 million in additional depreciation expense. All other operating expenses increased \$0.7 million in the first quarter of 2011, compared to the first quarter of 2010.

Interest expense

The increase in interest expense resulted from the increased borrowings used to fund the JetBroadband cable acquisition in 2010.

Income tax expense

The Company's effective tax rate on income from continuing operations increased from 41.4% in the first quarter of 2010 to 42.9% in the first quarter of 2011 due primarily to higher blended state tax rates due to the expansion of cable operations.

Net income from continuing operations

For the three months ended March 31, 2011, net income from continuing operations decreased \$3.5 million, reflecting higher costs of acquiring prepaid PCS and cable customers and the higher interest costs associated with funding the cable acquisitions.

Wireless

The Company's Wireless segment provides digital wireless service to a portion of a four-state area covering the region from Harrisburg, York and Altoona, Pennsylvania, to Harrisonburg, Virginia, through Shenandoah Personal Communications Company ("PCS"), a Sprint PCS Affiliate of Sprint Nextel. This segment also leases land on which it builds Company-owned cell towers, which it leases to affiliated and non-affiliated wireless service providers, throughout the same four-state area described above, through Shenandoah Mobile Company ("Mobile").

PCS receives revenues from Sprint Nextel for subscribers that obtain service in PCS's network coverage area. PCS relies on Sprint Nextel to provide timely, accurate and complete information to record the appropriate revenue for each financial period. Postpaid revenues received from Sprint Nextel are recorded net of certain fees retained by Sprint Nextel. These fees totaled 16.8% of net billed revenue, as defined, until June 2010, when Sprint Nextel exercised its right to re-evaluate the net service fee component, and increased the total fees retained by Sprint Nextel

to 20%. Sprint Nextel retains a 6% management fee on prepaid revenues.

Index

The following table shows selected operating statistics of the Wireless segment as of the dates shown:

	March 31, 2011	Dec. 31, 2010	March 31, 2010	Dec. 31, 2009
Wireless Segment				
Retail PCS Subscribers – Postpaid (1)	237,825	234,809	224,524	222,818

1) In 2011, the Company discovered it had been incorrectly including certain rate plans as postpaid subscribers in the latter months of fiscal 2010. Postpaid subscriber counts and net postpaid additions for 2010 have been reduced by 888 due to the correction.

2) POPS refers to the estimated population of a given geographic area and is based on information purchased from third party sources. Market POPS are those within a market area which the Company is authorized to serve under its Sprint PCS affiliate agreements, and Covered POPS are those covered by the network's service area.

3) For the three month period shown.

Index

Operating revenues

Wireless service revenue increased \$5.7 million, or 21.4%, for the three months ended March 31, 2011, compared to the comparable 2010 period. Net prepaid revenue represented \$4.5 million of this increase. Average postpaid subscribers increased 5.6% in the current quarter compared to the 2010 first quarter, contributing to a 7.0% increase in postpaid voice service revenue. Total credits against gross billed revenue, including fees retained by Sprint Nextel and bad debt write-offs, increased \$1.3 million from the first quarter of 2010, principally due to the increase in the net service fee from 8.8% to 12.0% effective June 1, 2010. Fees retained by Sprint Nextel increased by \$1.5 million, or 27.0%, while bad debt write-offs declined by \$0.4 million, or 25.5%, and all other credits increased \$0.2 million.

The increase in tower lease revenue resulted primarily from additional cell site leases.

The increase in equipment revenue resulted from a change in the mix of handsets sold between Company stores and local dealers. Total gross revenue from handset sales through these two channels was slightly higher in 2010, but more of the revenue was generated through Company stores and retained by PCS.

Cost of goods and services

Cost of goods and services increased \$3.7 million, or 37.8%, in 2011 from the first quarter of 2010. Handset costs associated with prepaid customer acquisitions generated \$2.5 million of incremental costs, while postpaid handset costs increased \$0.4 million. Costs of the expanded network coverage and expansion of EVDO coverage and capacity resulted in a \$0.5 million increase in network costs including rent for additional tower and co-location sites, power and backhaul line costs.

Selling, general and administrative

Selling, general and administrative costs increased \$2.4 million, or 59.5%, in the first quarter of 2011 over the comparable 2010 period. Costs associated with prepaid customers accounted for \$2.1 million of the increase in costs, principally marketing and selling costs. Operating taxes and other sales and marketing costs accounted for the remainder of the increase.

Depreciation and amortization

Depreciation and amortization increased \$1.0 million in 2011 over the 2010 first quarter, due to \$0.8 million of amortization of the initial purchase cost of acquired prepaid customers. The remainder of the increase resulted from capital projects for EVDO capability and new towers and cell sites placed in service since first quarter of 2010.

Cable Television

The Cable Television segment provides analog, digital and high-definition television service under franchise agreements in Virginia, West Virginia and Maryland.

The Company has been upgrading its cable systems since early 2009, and by December 2010 had completed upgrades to the systems acquired in late 2008. The Company has introduced expanded video and internet service offerings as market upgrades were completed beginning in the second half of 2009, and began introducing voice service in several upgraded markets as the first quarter of 2010 ended. The Company has continued rolling out expanded video services, internet and voice services to additional markets as upgrades have been completed.

The Company closed on the acquisition of cable operations from JetBroadBand effective July 30, 2010, and Suddenlink effective November 30, 2010. The acquired cable operations offer video, high speed Internet and voice services representing approximately 70,000 revenue generating units in Virginia, West Virginia and Maryland. The acquired networks pass approximately 122,000 homes. The Cable segment results include the operating results of the acquired operations from July 30, 2010 and November 30, 2010, forward, respectively.

Index

Fiber Route Miles	1,809	1,389	403	403

- 1) In March 2011, the Company transferred five properties from its converged services subsidiary to Shentel Cable. Operating results for these 5 properties had been included in discontinued operations in prior periods. The Company has reclassified their operating results to continuing operations for all prior periods, and the customer counts for prior periods have been revised to include customers at these properties. As of December 31, 2010, these properties included 233 video customers, 449 internet customers, and 14 voice customers. Customer counts for prior periods were not significantly different for these properties. The Company also increased the number of internet customers as of December 31, 2010 by 503 customers, due to a computational error. In July 2010, the Company acquired cable operations covering approximately 115 thousand video homes passed, 101 thousand high-speed internet available homes, and 85 thousand voice available homes. These systems served approximately 41 thousand video subscribers, 21 thousand high-speed internet subscribers, and 3 thousand voice subscribers. In December 2010, the Company acquired two small systems covering approximately 7 thousand video homes passed, approximately 3 thousand video customers and 1 thousand high-speed internet customers.
- 2) Homes and businesses are considered passed (“homes passed”) if we can connect them to our distribution system without further extending the transmission lines. Homes passed is an estimate based upon the best available information.
- 3) Generally, a dwelling or commercial unit with one or more television sets connected to our distribution system counts as one video customer. Where video or internet services are provided on a bulk basis, such as to hotels and some multi-dwelling units, the revenue charged to the customer is divided by the rate for comparable service in the local market to determine the number of customer equivalents included in the customer counts shown above.
- 4) Penetration is calculated by dividing the number of customers by the number of homes passed or available homes, as appropriate.
- 5) Digital video customers are those who receive any level of video service via digital transmission. A dwelling with one or more digital set-top boxes counts as one digital video customer. Digital video penetration is calculated by dividing the number of digital video customers by total video customers.
- 6) Homes and businesses are considered available (“available homes”) if we can connect them to our distribution system without further upgrading the transmission lines and if we offer the service in that area. Homes passed in

Shenandoah County are excluded from available homes as we do not offer high-speed internet or voice services over our co-axial distribution network in this market.

7) Revenue generating units are the sum of video, digital video, voice and high-speed internet customers. Consistent with industry practices, each digital video customer counts as two revenue generating units.

Operating revenues

The cable operations acquired in 2010 generated \$10.1 million of the change in service revenue shown above. Legacy cable operations, which included the cable operations acquired in 2008, generated the balance of the increase. All but \$0.1 million of the change in equipment and other revenues was generated by the cable operations acquired in 2010.

Operating expenses

The cable operations acquired in 2010 generated \$15.0 million of the increase in segment operating expenses shown above. Legacy cable operations generated the balance of \$1.2 million in operating expenses, principally costs of acquiring customers, network costs and incremental depreciation costs on network upgrades placed in service since first quarter of 2010.

Operating expenses are expected to continue at elevated levels until all networks are upgraded by the third quarter of 2012, and for a period of time thereafter while enhanced services marketing efforts continue in recently upgraded markets.

Index

Wireline

The Wireline segment is comprised of several subsidiaries providing telecommunications services. Through these subsidiaries, this segment provides regulated and unregulated voice services, dial-up and DSL internet access, and long distance access services throughout Shenandoah County and in portions of northwestern Augusta County, Virginia, and leases fiber optic facilities throughout the northern Shenandoah Valley of Virginia, northern Virginia and adjacent areas along the Interstate 81 corridor, including portions of West Virginia and Maryland.

Operating revenues

Operating revenues increased \$0.7 million overall in the first quarter of 2011 from the first quarter of 2010, including \$0.2 million in revenue from a local rate increase implemented in early 2010, with the remainder primarily increased charges to affiliates for fiber to PCS towers, and network access charges for internet backhaul and telephone services to affiliates such as Shentel Cable.

Operating expenses

Operating expenses overall increased \$0.4 million, or 4.6%, primarily reflecting increased costs of obtaining service from third parties to provide voice services to Shentel Cable, related to the increase in facilities lease revenue shown above.

Index

Non-GAAP Financial Measure

In managing our business and assessing our financial performance, management supplements the information provided by financial statement measures prepared in accordance with GAAP with adjusted OIBDA, which is considered a “non-GAAP financial measure” under SEC rules.

Adjusted OIBDA is defined by us as operating income (loss) before depreciation and amortization, adjusted to exclude the effects of: certain non-recurring transactions; impairment of assets; share based compensation expense; business acquisition costs; and pension settlement and curtailment expenses. Adjusted OIBDA should not be construed as an alternative to operating income as determined in accordance with GAAP as a measure of operating performance.

In a capital-intensive industry such as telecommunications, management believes that adjusted OIBDA and the associated percentage margin calculations are meaningful measures of our operating performance. We use adjusted OIBDA as a supplemental performance measure because management believes it facilitates comparisons of our operating performance from period to period and comparisons of our operating performance to that of other companies by excluding potential differences caused by the age and book depreciation of fixed assets (affecting relative depreciation expenses) as well as the other items described above for which additional adjustments were made. In the future, management expects that the Company may again report adjusted OIBDA excluding these items and may incur expenses similar to these excluded items. Accordingly, the exclusion of these and other similar items from our non-GAAP presentation should not be interpreted as implying these items are non-recurring, infrequent or unusual.

While depreciation and amortization are considered operating costs under generally accepted accounting principles, these expenses primarily represent the current period allocation of costs associated with long-lived assets acquired or constructed in prior periods, and accordingly may obscure underlying operating trends for some purposes. By isolating the effects of these expenses and other items that vary from period to period without any correlation to our underlying performance, or that vary widely among similar companies, management believes adjusted OIBDA facilitates internal comparisons of our historical operating performance, which are used by management for business planning purposes, and also facilitates comparisons of our performance relative to that of our competitors. In addition, we believe that adjusted OIBDA and similar measures are widely used by investors and financial analysts as measures of our financial performance over time, and to compare our financial performance with that of other companies in our industry.

Adjusted OIBDA has limitations as an analytical tool, and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. These limitations include the following:

- it does not reflect capital expenditures;
- the assets being depreciated and amortized will often have to be replaced in the future and adjusted OIBDA does not reflect cash requirements for such replacements;
 - it does not reflect costs associated with share-based awards exchanged for employee services;
 - it does not reflect interest expense necessary to service interest or principal payments on indebtedness;
 - it does not reflect expenses incurred for the payment of income taxes and other taxes; and
- other companies, including companies in our industry, may calculate adjusted OIBDA differently than we do, limiting its usefulness as a comparative measure.

In light of these limitations, management considers adjusted OIBDA as a financial performance measure that supplements but does not replace the information reflected in our GAAP results.

The following table shows adjusted OIBDA for the three months ended March 31, 2011 and 2010:

(in thousands)

	Three Months Ended March 31,	
	2011	2010
Adjusted OIBDA	\$ 21,339	\$ 19,987

21

Index

The following table reconciles adjusted OIBDA to operating income, which we consider to be the most directly comparable GAAP financial measure, for the three months ended March 31, 2011 and 2010:

(in thousands)

	Three Months Ended March 31,	
	2011	2010
Operating income	\$ 7,091	\$ 11,518
Plus depreciation and amortization	13,938	8,327
OIBDA	21,029	19,845
Plus share based compensation expense	310	142
Adjusted OIBDA	\$ 21,339	\$ 19,987

Liquidity and Capital Resources

The Company has four principal sources of funds available to meet the financing needs of its operations, capital projects, debt service, investments and potential dividends. These sources include cash flows from operations, existing balances of cash and cash equivalents, the liquidation of investments and borrowings. Management routinely considers the alternatives available to determine what mix of sources are best suited for the long-term benefit of the Company.

Sources and Uses of Cash. The Company generated \$18.0 million of net cash from operations in the first three months of 2011, compared to \$16.0 million in the first three months of 2010. Net income decreased from first quarter 2010 to first quarter 2011, principally due to non-cash items such as depreciation, amortization and provisions for bad debt.

Indebtedness. As of March 31, 2011, the Company's indebtedness totaled \$192.1 million, with an annualized overall weighted average interest rate of approximately 4.11%. The balance included \$6.4 million fixed at 7.37% (the Fixed Term Loan Facility, described further below), and \$185.1 million (the Term Loan A Facility) at a variable rate of 3.77% as of March 31, 2011, that resets monthly based on one month LIBOR plus a base rate of 3.50% currently. The Company has an outstanding interest rate swap that effectively fixes the interest rate on one-third of the Term Loan A balance at the 3.50% base rate plus 1.00% through July 31, 2013. The Company has \$30 million in immediate availability under the Revolving Facility, as well as additional capacity under the Incremental Term Loan facilities, entered into in 2010. In April 2011, the Company executed an amendment to its Credit Agreement that reduced the base rate applicable to the Term Loan A Facility from 3.50% to 3.00%, and increased availability under the Revolver Facility to its full \$50 million. Based upon the current outstanding balance, the 50 basis point reduction in the interest rate margins will reduce the Company's interest charges by approximately \$0.9 million on an annualized basis.

The Company has no off-balance sheet arrangements (other than operating leases) and has not entered into any transactions involving unconsolidated, limited purpose entities or commodity contracts.

As of March 31, 2011, the Company was in compliance with the covenants in its credit agreements.

Capital Commitments. Capital expenditures budgeted for 2011 total approximately \$82.6 million, an increase of approximately \$26.7 million from total capital expenditures for the full year of 2010. Capital spending for 2011 will be predominantly focused in the Cable segment, reflecting upgrades to the networks and head ends acquired in the 2010 cable acquisitions. Capital spending in the Wireless and Wireline segments will largely reflect capacity increases in the Wireless segment and fiber upgrades and expansion in the Wireline segment, partly in support of

backhaul demand in the Wireless segment. Spending may shift amongst these priorities as opportunities arise.

For the first quarter of 2011, the Company spent \$16.1 million on capital projects, compared to \$9.6 million in the comparable 2010 period. Spending related to Wireless projects accounted for \$1.7 million in the first three months of 2011 for new and existing sites, while Wireline projects accounted for \$2.6 million across a variety of projects, Cable TV for \$11.5 million for plant and headend upgrades, and other projects totaling \$0.3 million, largely related to information technology projects and vehicle acquisitions.

The Company believes that cash on hand, cash flow from operations and borrowings available under the Revolving Facility will provide sufficient cash to enable the Company to fund planned capital expenditures, make scheduled principal and interest payments, meet its other cash requirements and maintain compliance with the terms of its financing agreements for at least the next 12 months. Thereafter, capital expenditures will likely continue to be required to provide increased capacity to meet the Company's expected growth in demand for its products and services and complete planned upgrades to the cable networks. The actual amount and timing of the Company's future capital requirements may differ materially from the Company's estimate depending on the demand for its products and new market developments and opportunities. The Company currently expects that it will fund its future capital expenditures and other cash needs primarily with cash on hand, from operations and borrowing capacity under the Company's existing debt facilities.

Index

The Company's cash flows from operations could be adversely affected by events outside the Company's control, including, without limitation, changes in overall economic conditions, regulatory requirements, changes in technologies, demand for its products, availability of labor resources and capital, changes in the Company's relationship with Sprint Nextel, and other conditions. The Wireless segment's operations are dependent upon Sprint Nextel's ability to execute certain functions such as billing, customer care, and collections; the subsidiary's ability to develop and implement successful marketing programs and new products and services; and the subsidiary's ability to effectively and economically manage other operating activities under the Company's agreements with Sprint Nextel. The Company's ability to attract and maintain a sufficient customer base, particularly in the newly acquired cable markets, is also critical to its ability to maintain a positive cash flow from operations. The foregoing events individually or collectively could affect the Company's results.

Recently Issued Accounting Standards

There were no recently issued accounting standards, not adopted by the Company as of March 31, 2011, that are expected to have a material impact on the Company's results of operations or financial condition.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's market risks relate primarily to changes in interest rates on instruments held for other than trading purposes. The Company's interest rate risk generally involves three components. The first component is outstanding debt with variable rates. As of March 31, 2011, the Company had \$123.4 million of variable rate debt outstanding, bearing interest at a rate of 3.77%, based upon one month LIBOR. An increase in market interest rates of 1.00% would add approximately \$1.2 million to annual interest expense. The Company has an additional \$61.7 million of debt that is fixed, through an interest rate swap, at the Company's current base rate of 3.50% plus 1.00%, through July 31, 2013, when the interest rate swap expires and the remaining outstanding balance reverts to being variable at the base rate plus one month LIBOR. The remaining approximately \$7.0 million of the Company's outstanding debt has fixed rates through maturity. Due to the relatively short time frame to maturity of this fixed rate debt, market value approximates carrying value of the fixed rate debt.

The second component of interest rate risk consists of temporary excess cash, which can be invested in various short-term investment vehicles such as overnight repurchase agreements and Treasury bills with a maturity of less than 90 days. The cash is currently invested in an institutional cash management fund that has limited interest rate risk. Management continues to evaluate the most beneficial use of these funds.

The third component of interest rate risk is marked increases in interest rates that may adversely affect the rate at which the Company may borrow funds for growth in the future. Management does not believe that this risk is currently significant because the Company's existing sources, and its commitments for future sources, of liquidity are adequate to provide cash for operations, payment of debt and funding of planned capital projects.

Management does not view market risk as having a significant impact on the Company's results of operations, although future results could be adversely affected if interest rates were to increase significantly for an extended period and the Company were to require additional external financing. The Company's investments in publicly traded stock and bond mutual funds under the rabbi trust, which are subject to market risks and could experience significant swings in market values, are offset by corresponding changes in the liabilities owed to participants in the Executive Supplemental Retirement Plan. General economic conditions affected by regulatory changes, competition or other external influences may pose a higher risk to the Company's overall results.

As of March 31, 2011, the Company has \$6.4 million of cost and equity method investments. Approximately \$3.1 million was invested in privately held companies directly or through investments with portfolio managers. Most of

the companies are in an early stage of development and significant increases in interest rates could have an adverse impact on their results, ability to raise capital and viability. The Company's market risk is limited to the funds previously invested and an additional \$0.3 million committed under contracts the Company has signed with portfolio managers.

ITEM 4.CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Management, with the participation of our President and Chief Executive Officer, who is the principal executive officer, and the Vice President - Finance and Chief Financial Officer, who is the principal financial officer, conducted an evaluation of our disclosure controls and procedures, as defined by Rule 13a-15(e) under the Securities Exchange Act of 1934. The Company's principal executive officer and its principal financial officer concluded that the Company's disclosure controls and procedures were effective as of March 31, 2011.

Changes in Internal Control Over Financial Reporting

During the first quarter of 2011, there were no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Other Matters Relating to Internal Control Over Financial Reporting

Under the Company's agreements with Sprint Nextel, Sprint Nextel provides the Company with billing, collections, customer care, certain network operations and other back office services for the PCS operation. As a result, Sprint Nextel remits to the Company approximately 53% of the Company's total operating revenues. Due to this relationship, the Company necessarily relies on Sprint Nextel to provide accurate, timely and sufficient data and information to properly record the Company's revenues, and accounts receivable, which underlie a substantial portion of the Company's periodic financial statements and other financial disclosures.

Information provided by Sprint Nextel includes reports regarding the subscriber accounts receivable in the Company's markets. Sprint Nextel provides the Company with monthly accounts receivable, billing and cash receipts information on a market level, rather than a subscriber level. The Company reviews these various reports to identify discrepancies or errors. Under the Company's agreements with Sprint Nextel, the Company is entitled to only a portion of the receipts, net of items such as taxes, government surcharges, certain allocable write-offs and the 20.0% of revenue retained by Sprint Nextel. Because of the Company's reliance on Sprint Nextel for financial information, the Company must depend on Sprint Nextel to design adequate internal controls with respect to the processes established to provide this data and information to the Company and Sprint Nextel's other Sprint PCS affiliate network partners. To address this issue, Sprint Nextel engages an independent registered public accounting firm to perform a periodic evaluation of these controls and to provide a "Report on Controls Placed in Operation and Tests of Operating Effectiveness for Affiliates" under guidance provided in Statement of Auditing Standards No. 70 ("SAS 70 reports"). The report is provided to the Company on an annual basis and covers a nine-month period. The most recent report covers the period from January 1, 2010 to September 30, 2010. The most recent report indicated there were no material issues which would adversely affect the information used to support the recording of the revenues provided by Sprint Nextel related to the Company's relationship with them.

PART II.

OTHER INFORMATION

ITEM 1A.

Risk Factors

As previously discussed, our actual results could differ materially from our forward looking statements. There have been no material changes in the risk factors from those described in Part I, Item 1A of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

ITEM 2.

Unregistered Sales of Equity Securities and Use of Proceeds

The Company maintains a dividend reinvestment plan (the "DRIP") for the benefit of its shareholders. When shareholders remove shares from the DRIP, the Company issues a certificate for whole shares, pays out cash for any fractional shares, and cancels the fractional shares purchased. In conjunction with exercises of stock options, the Company periodically repurchases shares from recipients to cover some of the exercise price of the options being exercised. The following table provides information about the Company's repurchases of shares during the three months ended March 31, 2011:

	Number of Shares Purchased	Average Price Paid per Share
January 1 to January 31	7	\$ 18.53
February 1 to February 28	3	\$ 16.90
March 1 to March 31	5	\$ 16.76
Total	15	\$ 17.68

ITEM 6.

Exhibits

(a) The following exhibits are filed with this Quarterly Report on Form 10-Q:

- 10.47 Second Amendment to the Credit Agreement dated as of July 30, 2010, among Shenandoah Telecommunications Company, CoBank, ACB, Branch Banking and Trust Company, Wells Fargo Bank, N.A., and other Lenders, filed as Exhibit 10.47 to the Company's Current Report on Form 8-K dated April 29, 2011.
- 31.1 Certification of President and Chief Executive Officer pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934.
- 31.2 Certification of Vice President - Finance and Chief Financial Officer pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934.
- 32 Certifications pursuant to Rule 13a-14(b) under the Securities Exchange Act of 1934 and 18 U.S.C. § 1350.
