Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Principles of Consolidation and Basis of Presentation

Global Indemnity plc (Global Indemnity or the Company) was incorporated on March 9, 2010 and is domiciled in Ireland. Global Indemnity replaced the Company s predecessor; United America Indemnity, Ltd., as the ultimate parent company as a result of a re-domestication transaction. See Note 2 below for details regarding the re-domestication. United America Indemnity, Ltd. was incorporated on August 26, 2003, and is domiciled in the Cayman Islands. United America Indemnity, Ltd. is now a subsidiary of the Company and an Irish tax resident. The Company s Class A ordinary shares are publicly traded on the NASDAQ Global Select Market. On July 6, 2010, the Company changed its trading symbol on the NASDAQ Global Select Market from INDM to GBLI.

The interim consolidated financial statements are unaudited, but have been prepared in conformity with GAAP, which differs in certain respects from those principles followed in reports to insurance regulatory authorities. The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The unaudited consolidated financial statements include all adjustments that are, in the opinion of management, of a normal recurring nature and are necessary for a fair statement of results for the interim periods. Results of operations for the quarters ended March 31, 2011 and 2010 are not necessarily indicative of the results of a full year. The accompanying notes to the unaudited consolidated financial statements should be read in conjunction with the notes to the consolidated financial statements contained in the Company s 2010 Annual Report on Form 10-K.

The consolidated financial statements include the accounts of Global Indemnity and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

The Company s wholly owned business trust subsidiaries, United National Group Capital Trust I (UNG Trust I) and United National Group Capital Statutory Trust II (UNG Trust II), are not consolidated pursuant to the Financial Accounting Standards Board (FASB) Accounting Standards Codification (the Codification). The Company s business trust subsidiaries have issued \$30.0 million in floating rate capital securities (Trust Preferred Securities) and \$0.9 million of floating rate common securities. The sole assets of the Company s business trust subsidiaries are \$30.9 million of junior subordinated debentures issued by the Company, which have the same terms with respect to maturity, payments, and distributions as the Trust Preferred Securities and the floating rate common securities.

2. Redomestication

In February 2010, the Company s Board of Directors approved a plan for the Company to re-domesticate from the Cayman Islands to Ireland. At a special shareholders meeting held on May 27, 2010, the Company s shareholders voted in favor of completing the re-domestication proposal pursuant to which all United America Indemnity, Ltd. ordinary shares would be cancelled and all holders of such shares would receive ordinary shares of Global Indemnity plc, a newly formed Irish company that was incorporated on March 9, 2010, on a one-for-two basis (two United America Indemnity, Ltd. shares exchanged for one Global Indemnity plc share). The re-domestication transaction was completed on July 2, 2010, following approval from the Grand Court of the Cayman Islands, at which time Global Indemnity plc replaced United America Indemnity, Ltd. as the ultimate parent company, and United America Indemnity, Ltd. became a wholly-owned subsidiary of Global Indemnity plc. Shares of United America Indemnity, Ltd. previously traded on the NASDAQ Global Select Market under the symbol INDM. Shares of the Irish company, Global Indemnity plc, began trading on the NASDAQ Global Select Market on July 6, 2010 under the symbol GBLI.

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

3. Profit Enhancement Initiative

On November 2, 2010, we committed to a Profit Enhancement Initiative with respect to our U.S. Insurance Operations. The plan was initiated on November 4, 2010, and is part of our efforts to streamline our operations in response to the continuing impact of the domestic recession as well as the competitive landscape within the excess and surplus lines market. This initiative is intended to enhance profitability and earnings by aligning corporate overhead costs with changes in our business. In the fourth quarter of 2010, the Company reduced its U.S. based census by approximately 25%, closed underperforming U.S. facilities, and supplemented staffing in Bermuda and in Ireland. All action items relating to this initiative were implemented by December 31, 2010.

The total cost of implementing this initiative was recorded in our consolidated statements of operations within our Insurance Operations segment in the fourth quarter of 2010. Components of the initiative included: (1) employee termination and severance charges of \$1.71 million; (2) expenses of \$1.53 million relating to discontinuing use of leased office space, net of expected sublease income; (3) restructuring expenses of \$0.63 million for related asset and leasehold improvement impairments; and (4) expenses of \$2.91 million relating to the curtailment of our workers compensation product initiative, consisting of a minimum ceded premium charge of \$1.48 million on our workers compensation reinsurance treaty and \$1.43 million in asset impairments.

The following table summarizes charges incurred in 2010 by expense type and the remaining liability as of December 31, 2010 and March 31, 2011:

(Dollars in thousands)	Employee Termination	Operating Leases	Asset Impairments	Workers Compensation	Total
Charges incurred in 2010	\$ 1,711	\$ 1,532	\$ 631	\$ 2,907	\$ 6,781
Cash payments for 2010 actions	(758)			(985)	(1,743)
Non-cash adjustments	176		(631)	(1,430)	(1,885)
Liability at December 31, 2010	\$ 1,129	\$ 1,532	\$	\$ 492	\$ 3,153
Cash payments for 2010 actions	(504)			(492)	(996)
Non-cash adjustments		(190)			(190)
Liability at March 31, 2011	\$ 625	\$ 1,342	\$	\$	\$ 1,967

There were no charges incurred related to the Profit Enhancement Initiative in our statement of operations for the periods ended March 31, 2011 or 2010.

4. Investments

The Company's investments in fixed maturities, preferred stock, and common stock are classified as available for sale and are carried at their fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair values of the Company's available for sale portfolio, other invested assets, are determined on the basis of quoted market prices where available. If quoted market prices are not available, the Company uses third party pricing services to assist in determining fair value. In many instances, these services examine the pricing of similar instruments to estimate fair value. The Company purchases bonds with the expectation of holding them to their maturity; however, changes to the portfolio are sometimes required to assure it is appropriately matched to liabilities. In addition, changes in financial market conditions and tax considerations may cause the Company to sell an investment before it matures. Corporate loans have stated maturities; however, they generally do not reach their final maturity due to borrowers refinancing. The difference between amortized cost and fair value of the Company's available for sale investments, excluding the Company's convertible bond and convertible preferred stock portfolios, net of the effect of deferred income taxes, is

reflected in accumulated other comprehensive income in shareholders' equity and, accordingly, has no effect on net income other than for the credit loss component of impairments deemed to be other than temporary. The difference between amortized cost and fair value of the convertible bonds and convertible preferred stocks is included in income.

Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The Company's investments in other invested assets are comprised of limited liability partnership interests and a mutual fund. Partnership interests where we owned more than 3% at any time are carried at their fair value. The change in the difference between amortized cost and fair value of partnership interests of 3% ownership or greater, net of the effect of deferred income taxes, is reflected in income. The mutual fund and partnership interests of less than 3% ownership are carried at their fair value. The change in the difference between amortized cost and the fair value of the mutual fund and partnership interests of less than 3% ownership, net of the effect of deferred income taxes, is reflected in accumulated other comprehensive income in shareholders' equity and, accordingly, has no effect on net income other than for impairments deemed to be other than temporary.

The amortized cost and estimated fair value of investments were as follows as of March 31, 2011 and December 31, 2010:

(Dollars in thousands)	Amortized	Gross	Gross	Estimated	Other than

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The Company regularly performs various analytical valuation procedures with respect to its investments, including reviewing each fixed maturity security in an unrealized loss position to assess whether the security is a candidate for credit loss. Specifically, the Company considers credit rating, market price, and issuer specific financial information, among other factors, to assess the likelihood of collection of all principal and interest as contractually due. Securities for which the Company determines that a credit loss is likely are subjected to further analysis through discounted cash flow testing to estimate the credit loss to be recognized in earnings, if any. The specific methodologies and significant assumptions used by asset class are discussed below. Upon identification of such securities and periodically thereafter, a detailed review is performed to determine whether the decline is considered other than temporary. This review includes an analysis of several factors, including but not limited to, the credit ratings and cash flows of the securities and the magnitude and length of time that the fair value of such securities is below cost.

For fixed maturities, the factors considered in reaching the conclusion that a decline below cost is other than temporary include, among others, whether:

- (1) the issuer is in financial distress;
- (2) the investment is secured;
- (3) a significant credit rating action occurred;
- (4) scheduled interest payments were delayed or missed;
- (5) changes in laws or regulations have affected an issuer or industry;
- (6) the investment has an unrealized loss and was identified by the Company's Investment Manager as an investment to be sold before recovery or maturity; and
- (7) the investment failed cash flow projection testing to determine if anticipated principal and interest payments will be realized.

According to the most recent accounting guidance, for debt securities in an unrealized loss position, the Company is required to assess whether the Company has the intent to sell the debt security or more likely than not will be required to sell the debt security before the anticipated recovery. If either of these conditions is met, the Company must recognize an other than temporary impairment with the entire unrealized loss being recorded through earnings. For debt securities in an unrealized loss position not meeting these conditions, the Company assesses whether the impairment of a security is other than temporary. If the impairment is deemed to be other than temporary, the Company must separate the other than temporary impairment into two components: the amount representing the credit loss and the amount related to all other factors, such as changes in interest rates. The credit loss represents the portion of the amortized book value in excess of the net present value of the projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment. The credit loss component of the other than temporary impairment is recorded through earnings, whereas the amount relating to factors other than credit losses are recorded in other comprehensive income, net of taxes.

For equity securities, management carefully reviews all securities with unrealized losses and further focuses on securities that have either:

- (1) persisted for more than twelve consecutive months or
- (2) the value of the investment has been 20% or more below cost for six continuous months or more to determine if the security should be impaired.

The amount of any write-down, including those that are deemed to be other than temporary, is included in earnings as a realized loss in the period in which the impairment arose.

The following is a description, by asset type, of the methodology and significant inputs that the Company used to measure the amount of credit loss recognized in earnings, if any:

U.S. treasury and agency obligations As of March 31, 2011, gross unrealized losses related to U.S. treasury and agency obligations were \$0.004 million. All unrealized losses have been in an unrealized loss position for less than twelve months. All of these securities are rated AAA. The Company's investment manager's analysis for this sector includes on-site visits and meetings with officials in addition to the standard rigorous analysis that determines the financial condition of the issuer.

Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Obligations of states and political subdivisions As of March 31, 2011, gross unrealized losses related to obligations of states and political subdivisions were \$0.6 million. Of this amount, \$0.07 million has been in an unrealized loss position for twelve months or greater. These securities are rated investment grade. The Company's investment manager's analysis for this sector includes on-site visits and meetings with officials in addition to the standard rigorous analysis that determines the financial condition of the issuer.

Mortgage-backed securities As of March 31, 2011, gross unrealized losses related to mortgage-backed securities were \$0.14 million. Of this amount, \$0.02 million has been in an unrealized loss position for twelve months or greater. All of these securities are rated AA+. The Company's investment manager models each mortgage-backed security to project principal losses under downside, base, and upside scenarios for the economy and home prices. The primary assumption that drives the security and loan level modeling is the Home Price Index (HPI) projection. The Company's investment manager first projects HPI at the national level, then at the Metropolitan Statistical Area (MSA) level based on the historical relationship between the individual MSA HPI and the national HPI, using inputs from its macroeconomic team, mortgage portfolio management team, and structured analyst team. The model utilizes loan level data and borrower characteristics including FICO score, geographic location, original and current loan size, loan age, mortgage rate and type (fixed rate / interest-only / adjustable rate mortgage), issuer / originator, residential type (owner occupied / investor property), dwelling type (single family / multi-family), loan purpose, level of documentation, and delinquency status as inputs.

Asset backed securities (ABS) As of March 31, 2011, gross unrealized losses related to asset backed securities were \$0.1 million. Of this amount, \$0.05 million has been in an unrealized loss position for twelve months or greater. These securities are rated investment grade. The weighted average credit enhancement for the Company's asset backed portfolio is 29.8. The Company's investment manager analyzes every ABS transaction on a stand-alone basis. This analysis involves a thorough review of the collateral, prepayment, and structural risk in each transaction. Additionally, their analysis includes an in-depth credit analysis of the originator and servicer of the collateral. The Company's investment manager projects an expected loss for a deal given a set of assumptions specific to the asset type. These assumptions are used to calculate at what level of losses that the deal will incur a dollar of loss. The major assumptions used to calculate this ratio are loss severities, recovery lags, and no advances on principal and interest.

Commercial mortgage-backed securities (CMBS) As of March 31, 2011, gross unrealized losses related to CMBS were \$0.2 million. All unrealized losses have been in an unrealized loss position for less than twelve months. All of these securities are rated AAA. The weighted average credit enhancement for the Company's CMBS portfolio is 23.2. This represents the percentage of pool losses that can occur before a mortgage-backed security will incur its first dollar of principle losses. For the Company's CMBS portfolio, a loan level analysis is utilized where every underlying CMBS loan is re-underwritten based on the Company's investment manager's internally generated set of assumptions that reflect their expectation for the future path of the economy. In the analysis, the focus is centered on stressing the significant variables that influence commercial loan defaults and collateral losses in CMBS deals. These variables include: (1) occupancies are projected to drop; (2) capitalization rates vary by property type and are forecasted to return to more normalized levels as the capital markets repair and capital begins to flow again; and (3) property value was stressed by using projected property performance and projected capitalization rates. Term risk is triggered if projected debt service coverage rate falls below 1x. Balloon risk is triggered if a property's projected performance does not satisfy new, tighter mortgage standards.

Corporate bonds and loans As of March 31, 2011, gross unrealized losses related to corporate bonds and loans were \$0.6 million. Of this amount, \$0.004 million has been in an unrealized loss position for twelve months or greater. All of these securities are rated below investment grade. The Company's investment manager's analysis for this sector includes maintaining detailed financial models that include a projection of each issuer's future financial performance, including prospective debt servicing capabilities, capital structure composition, and the value of the collateral. The analysis incorporates the macroeconomic environment, industry conditions in which the issuer operates, issuer's current competitive position, vulnerability to changes in the competitive environment, regulatory environment, issuer

liquidity, issuer commitment to bondholders, issuer creditworthiness, and asset protection. Part of the process also includes running downside scenarios to evaluate the expected likelihood of default as well as potential losses in the event of default.

Foreign bonds As of March 31, 2011, gross unrealized losses related to foreign bonds were \$0.05 million. All unrealized losses have been in an unrealized loss position for less than twelve months. These securities are rated investment grade. The Company's investment manager maintains financial models for the Company's bond issuers. These models include a projection of each issuer's future financial performance including prospective debt servicing capabilities and capital structure composition. The analysis incorporates the macroeconomic environment, industry conditions in which the issuer operates, issuer's current competitive position, vulnerability to changes in the competitive environment, regulatory environment, issuer liquidity, issuer commitment to bondholders, issuer creditworthiness, and asset protection.

Common stocks As of March 31, 2011, gross unrealized losses related to common stock were \$1.39 million. Of this amount, \$0.03 million has been in an unrealized loss position for twelve months or greater. To determine if an other than temporary impairment of an equity security has occurred, the Company considers, among other things, the severity and duration of the decline in fair value of the equity security. The Company also examines other factors to determine if the equity security could recover its value in a reasonable period of time.

The Company recorded the following other than temporary impairments (OTTI) on its investment portfolio for the quarters ended March 31, 2011 and 2010:

(Dollars in thousands)	Quarters Ended	
	March 31,	
	2011	2010
Fixed maturities:		
OTTI losses, gross	\$	\$ (89)
Portion of loss recognized in other comprehensive income (pre-tax)		47

Subprime and Alt-A Investments

The Company had approximately \$2.9 million and \$3.0 million worth of investment exposure through subprime and Alt-A investments as of March 31, 2011 and December 31, 2010, respectively. An Alt-A investment is one which is backed by a loan that contains limited documentation. As of March 31, 2011, approximately \$0.2 million of those investments were rated AAA by Standard & Poor's, \$0.2 million were rated BBB- to AA, and \$2.5 million were rated below investment grade. As of December 31, 2010, approximately \$0.2 million of those investments were rated AAA by Standard & Poor's, \$0.2 million were rated BBB- to AA, and \$2.6 million were rated below investment grade. There were no impairments on these investments during the quarter ended March 31, 2011 and \$0.04 million of impairments on these investments during the year ended December 31, 2010.

Insurance Enhanced Municipal Bonds

As of March 31, 2011, the Company held insurance enhanced municipal bonds of approximately \$115.9 million, which represented approximately 6.7% of the Company's total cash and invested assets. These securities had an average rating of AA. Approximately \$47.4 million of these bonds are pre-refunded with U.S. treasury securities, of which \$35.1 million are backed by financial guarantors, meaning that funds have been set aside in escrow to satisfy the future interest and principal obligations of the bond. Of the remaining \$68.5 million of insurance enhanced municipal bonds, \$32.5 million would have carried a lower credit rating had they not been insured. The following table provides a breakdown of the ratings for these municipal bonds with and without insurance.

(Dollars in thousands) Rating	Ratings with Insurance	Ratings without Insurance
AAA	\$ 145	\$
AA	27,569	10,418
A	422	16,271
BBB	2,493	3,940
NR	1,881	1,881
Total	\$ 32,510	\$ 32,510

A summary of the Company's insurance enhanced municipal bonds that are backed by financial guarantors, including the pre-refunded bonds that are escrowed in U.S. government obligations, as of March 31, 2011 is as follows:

(Dollars in thousands) Financial Guarantor	Total	Pre-refunded Securities	Government Guaranteed Securities	Exposure Net of Pre-refunded & Government Guaranteed Securities
Ambac Financial Group	\$ 11,258	\$ 5,721	\$	\$ 5,537
Financial Guaranty Insurance Company	2,454	2,454		
Financial Security Assurance, Inc.	42,621	15,122		27,499
Municipal Bond Insurance Association	39,920	11,025		28,895
Federal Housing Association	2,259		2,259	

Edgar Filing: Global Indemnity plc - Form 10-Q

Government National Housing Association	3,684	789	2,895	
Permanent School Fund Guaranty	1,373		1,373	
Total backed by financial guarantors	103,569	35,111	6,527	61,931
Other credit enhanced municipal bonds	12,283	12,283		
Total	\$ 115,852	\$ 47,394	\$ 6,527	\$ 61,931

In addition to the \$115.9 million of insurance enhanced municipal bonds, the Company also held insurance enhanced asset-backed and credit securities with a market value of approximately \$32.4 million, which represented approximately 1.9% of the Company's total invested assets. The financial guarantors of the Company's \$32.4 million of insurance enhanced asset-backed and credit securities include Financial Guaranty Insurance Company (\$0.8 million), Municipal Bond Insurance Association (\$13.1 million), Ambac (\$2.5 million), Financial Security Assurance, Inc. (\$5.0 million), Assured Guaranty Insurance Group (\$5.8 million), and Other (\$5.2 million).

The Company had no direct investments in the entities that have provided financial guarantees or other credit support to any security held by the Company at March 31, 2011.

Bonds Held on Deposit

Certain cash balances, cash equivalents, and bonds available for sale were deposited with various governmental authorities in accordance with statutory requirements or were held in trust pursuant to intercompany reinsurance agreements. The estimated fair values of bonds available for sale and on deposit or held in trust were as follows as of March 31, 2011 and December 31, 2010:

(Dollars in thousands)	Estimated Fair Value	
	March 31, 2011	December 31, 2010
On deposit with governmental authorities	\$ 43,400	\$ 43,656
Intercompany trusts held for the benefit of U.S. policyholders	601,160	609,242
Held in trust pursuant to third party requirements	96,625	68,900
Held in trust pursuant to U.S. regulatory requirements for the benefit of U.S. policyholders	5,941	5,871
Total	\$ 747,126	\$ 727,669

5. Fair Value Measurements

The Company elected to apply the fair value option within its limited partnership investment portfolio to an investment where the Company previously owned more than a 3% interest. The fair value of this investment was \$1.1 million as of December 31, 2010. During the quarter ended March 31, 2011, the Company liquidated its remaining interest in this limited partnership.

During the quarters ended March 31, 2011 and 2010, the Company recognized the following gains (losses), net of taxes, due to changes in the value of these investments.

(Dollars in thousands)	Quarter Ended March 31,	
	2011	2010
Limited partnership > 3% ownership	\$ 53	\$ (29)

These gains (losses) are reflected on the consolidated statement of operations as equity in net income (loss) of partnerships, net of taxes.

The fair value option was not elected for the Company's investments in limited partnerships with less than a 3% ownership interest.

The accounting standards related to fair value measurements define fair value, establish a framework for measuring fair value, outline a fair value hierarchy based on inputs used to measure fair value, and enhance disclosure requirements for fair value measurements. These standards do not change existing guidance as to whether or not an instrument is carried at fair value. The Company has determined that its fair value measurements are in accordance with the requirements of these accounting standards.

The Company's invested assets are carried at their fair value and are categorized based upon a fair value hierarchy:

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets that the Company has the ability to access at the measurement date.

Level 2 inputs utilize other than quoted prices included in Level 1 that are observable for the similar assets, either directly or indirectly.

Level 3 inputs are unobservable for the asset, and include situations where there is little, if any, market activity for the asset.

Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset.

Both observable and unobservable inputs may be used to determine the fair value of positions that the Company has classified within the Level 3 category. As a result, the unrealized gains and losses for invested assets within the Level 3 category presented in the tables below may include changes in fair value that are attributed to both observable (e.g., changes in market interest rates) and unobservable (e.g., changes in unobservable long-dated volatilities) inputs.

The following tables present information about the Company's invested assets measured at fair value on a recurring basis as of March 31, 2011 and December 31, 2010, and indicate the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value.

As of March 31, 2011 (Dollars in thousands)	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Fixed maturities:				
U.S. treasury and agency obligations	\$ 66,076	\$ 48,878	\$	\$ 114,954
Obligations of states and political subdivisions		245,463		245,463
Mortgage-backed securities		343,100		343,100
Commercial mortgage-backed securities		38,185		38,185
Asset-backed securities		113,581		113,581
Corporate bonds and loans		548,693		548,693
Foreign corporate bonds		53,741		53,741
Total fixed maturities	66,076	1,391,641		1,457,717
Preferred shares		2,346		2,346
Common shares	154,325			154,325
Other invested assets			16,724	16,724
Total invested assets	\$ 220,401	\$ 1,393,987	\$ 16,724	\$ 1,631,112

As of December 31, 2010 (Dollars in thousands)	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Fixed maturities:				
U.S. treasury and agency obligations	\$ 89,187	\$ 113,503	\$	\$ 202,690
Obligations of states and political subdivisions		245,012		245,012
Mortgage-backed securities		249,080		249,080
Commercial mortgage-backed securities		38,733		38,733
Asset-backed securities		115,099		115,099
Corporate bonds and loans		532,784		532,784
Foreign corporate bonds		60,994		60,994
Total fixed maturities	89,187	1,355,205		1,444,392
Preferred shares		2,252		2,252

Edgar Filing: Global Indemnity plc - Form 10-Q

Common shares	145,274			145,274
Other invested assets			5,380	5,380
Total invested assets	\$ 234,461	\$ 1,357,457	\$ 5,380	\$ 1,597,298

The securities classified as Level 1 in the above table consist of U.S. Treasuries and equity securities actively traded on an exchange.

The securities classified as Level 2 in the above table consist primarily of fixed maturity securities. Based on the typical trading volumes and the lack of quoted market prices for fixed maturities, security prices are derived through recent reported trades for identical or similar securities making adjustments through the reporting date based upon available market observable information. If there are no recent reported trades, matrix or model processes are used to develop a security price where future cash flow expectations are developed based upon collateral performance and discounted at an estimated market rate. Included in the pricing of asset-backed securities, collateralized mortgage obligations, and mortgage-backed securities are estimates of the rate of future prepayments of principal over the remaining life of the securities. Such estimates are derived based on the characteristics of the underlying structure and prepayment speeds previously experienced at the interest rate levels projected for the underlying collateral. For corporate loans, price quotes from multiple dealers along with recent reported trades for identical or similar securities are used to develop prices.

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

There were no significant transfers between Level 1 and Level 2 during the quarters ended March 31, 2011 or 2010. The following table presents changes in Level 3 investments measured at fair value on a recurring basis for the quarter ended March 31, 2011:

Quarter Ended March 31, 2011 (Dollars in thousands)	Other Invested Assets
Beginning balance at January 1, 2011	\$ 5,380
Total gains (realized / unrealized):	
Included in equity in net income of partnership	81
Included in accumulated other comprehensive income	2,585
Purchases	10,025
Sales	(1,347)
Ending balance at March 31, 2011	\$ 16,724
Net unrealized losses included in net income for the period related to assets still held at March 31, 2011	\$

The amount is comprised of \$7.1 million related to investments in limited partnerships and \$9.6 million related to an investment in a mutual fund. The \$7.1 million related to investments in limited partnerships was comprised of securities for which there is no readily available independent market price. The estimated fair value of these limited partnerships is measured utilizing the Company's net asset value as a practical expedient for each limited partnership. Material assumptions and factors utilized in pricing these securities include future cash flows, constant default rates, recovery rates, and any market clearing activity that may have occurred since the prior month-end pricing period. The Company's investment in a mutual fund of \$9.6 million is measured utilizing the fund's net asset value. The net asset value of the fund is based on the actual market price of the assets of the portfolio, including accrued income less liabilities and provisions for accrued expenses. The fund is comprised primarily of foreign equities. However, since the Company does not have the ability to see the invested asset composition of the mutual fund on a daily basis, this investment has been classified within the Level 3 category.

The following table presents changes in Level 3 investments measured at fair value on a recurring basis for the quarter ended March 31, 2010:

Quarter Ended March 31, 2010 (Dollars in thousands)	Other Invested Assets
Beginning balance at January 1, 2010	\$ 7,999
Total losses (realized / unrealized):	
Included in equity in net loss of partnership	(44)
Included in accumulated other comprehensive income	(1,339)
Distribution	(68)
Ending balance at March 31, 2010	\$ 6,548

Net unrealized losses included in net income for the period related to assets still held at March 31, 2010 \$ (44)

The amount is comprised of \$6.5 million related to investments in limited partnerships. Of the investments in limited partnerships, \$5.4 million was comprised of securities for which there is no readily available independent market price. The estimated fair value of these limited partnerships is measured utilizing the Company's net asset value as a practical expedient for each limited partnership. Material assumptions and factors utilized in pricing these securities include future cash flows, constant default rates, recovery rates, and any market clearing activity that may have occurred since the prior month-end pricing period. Of our investments in limited partnerships, \$1.1 million was related to a limited partnership which holds convertible preferred securities of a privately held company. In February, 2011, the Company's remaining interest of \$1.1 million was liquidated.

Fair Value of Alternative Investments

Included in Other invested assets in the fair value hierarchy at March 31, 2011 are limited liability partnerships and a mutual fund measured at fair value. The following table provides the fair value and future funding commitments related to these investments at March 31, 2011.

(Dollars in thousands)	Fair Value	Future Funding Commitments
Equity Fund, LP (1)	\$ 7,147	\$ 2,544
Real Estate Fund, LP (2)		
Mutual Fund (3)	9,577	
Total	\$ 16,724	\$ 2,544

- (1) This limited partnership invests in companies, from various business sectors, whereby the partnership has acquired control of the operating business as a lead or organizing investor. The Company does not have the contractual option to redeem its limited partnership interest but receives distributions based on the liquidation of the underlying assets. The Company does not have the ability to sell or transfer its limited partnership interest without consent from the general partner.
- (2) This limited partnership invests in real estate assets through a combination of direct or indirect investments in partnerships, limited liability companies, mortgage loans, and lines of credit. The Company does not have the contractual option to redeem its limited partnership interest but receives distributions based on the liquidation of the underlying assets. The Company does not have the ability to sell or transfer its limited partnership interest without consent from the general partner. The Company continues to hold an investment in this limited partnership and has written the fair value down to zero in 2010.
- (3) This is an open-ended unincorporated mutual investment fund which seeks to generate attractive long term total returns by investing in companies which benefit from increasing levels of domestic consumption expenditure in the Asia ex Japan region. Investments will primarily be in equity securities within the consumer staples, consumer discretionary and healthcare sectors in the Asia ex Japan region; however, the approach is unconstrained and may opportunistically invest in any sector. The Company may request to redeem units of the portfolio. However, depending on the size of the redemption request, certain restrictions may apply.

Pricing

The Company's pricing vendors provide prices for all investment categories except for investments in limited partnerships. One vendor provides prices for equity securities and select fixed maturity categories including: corporate loans, commercial mortgage backed securities, high yield, investment grade, short term securities, and international fixed income securities, if any. A second vendor provides prices for other fixed maturity categories including: asset backed securities (ABS), collateralized mortgage obligations (CMO), and municipals. A third vendor provides prices for the remaining fixed maturity categories including mortgage backed securities (MBS) and treasuries. The following is a description of the valuation methodologies used by the Company's pricing vendors for investment securities carried at fair value:

Equity prices are received from all primary and secondary exchanges.

Edgar Filing: Global Indemnity plc - Form 10-Q

Corporate bonds are individually evaluated on a nominal spread or an option adjusted spread basis depending on how the market trades a security or sector. Spreads are updated each day and compared with those from the broker/dealer community and contributing firms. Issues are generally benchmarked off of the U.S. treasuries or LIBOR.

Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

For CMOs, which are categorized with mortgage-backed securities in the tables listed above, a volatility-driven, multi-dimensional single cash flow stream model or option-adjusted spread model is used. For ABSs, a single expected cash flow stream model is utilized. For both asset classes, evaluations utilize standard inputs plus new issue data, monthly payment information, and collateral performance. The evaluated pricing models incorporate security set-up, prepayment speeds, cash flows, treasury, swap curves and spread adjustments.

For municipals, a series of matrices are used to evaluate securities within this asset class. The evaluated pricing models for this asset class incorporate security set-up, sector curves, yield to worst, ratings updates, and adjustments for material events notices.

U.S. Treasuries are priced on the bid side by a market maker.

For MBSs, the pricing vendor utilizes a matrix model correlation to TBA (a forward MBS trade) or benchmarking to value a security.

Corporate loans are priced using averages of bids and offers obtained from the broker/dealer community involved in trading such loans.

The Company performs certain procedures to validate whether the pricing information received from the pricing vendors is reasonable, to ensure that the fair value determination is consistent with the most recent accounting guidance, and to ensure that its assets are properly classified in the fair value hierarchy. The Company's procedures include, but are not limited to:

Reviewing periodic reports provided by the Investment Manager that provides information regarding rating changes and securities placed on watch. This procedure allows the Company to understand why a particular security's market value may have changed.

Understanding and periodically evaluating the various pricing methods and procedures used by the

Company's pricing vendors to ensure that investments are properly classified within the fair value hierarchy.

During the quarter ended March 31, 2011, the Company has not needed to adjust quotes or prices obtained from the pricing vendors.

6. Reinsurance

The Company cedes risk to unrelated reinsurers on a pro rata (quota share) and excess of loss basis in the ordinary course of business to limit its net loss exposure on insurance contracts. Reinsurance ceded arrangements do not discharge the Company of primary liability. Moreover, reinsurers may fail to pay the Company due to a lack of reinsurer liquidity, perceived improper underwriting, losses for risks that are excluded from reinsurance coverage, and other similar factors, all of which could adversely affect the Company's financial results.

The Company had the following reinsurance balances as of March 31, 2011 and December 31, 2010:

(Dollars in thousands)	March 31, 2011	December 31, 2010
Reinsurance receivables	\$ 390,574	\$ 422,839
Collateral securing reinsurance receivables	(214,653)	(289,284)
Reinsurance receivables, net of collateral	\$ 175,921	\$ 133,555

Edgar Filing: Global Indemnity plc - Form 10-Q

Allowance for uncollectible reinsurance receivables	\$	12,742	\$	12,742
Prepaid reinsurance premiums		8,046		11,105

Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The Company regularly evaluates retention levels to ensure that the ultimate reinsurance cessions are aligned with corporate risk tolerance and capital levels. The Company's U.S. Insurance Operations' primary reinsurance treaties are as follows:

Property Catastrophe Excess of Loss The Company's current property writings create exposure to catastrophic events. To protect against these exposures, the Company purchases a property catastrophe treaty. Effective June 1, 2010, the Company renewed its property catastrophe excess of loss treaty which provides occurrence coverage for losses of \$75.0 million in excess of \$15.0 million. This treaty provides for one full reinstatement of coverage at 100% additional premium as to time and pro rata as to amount of limit reinstated. This replaces the treaty that expired on May 31, 2010, which provided identical limits of coverage.

Property Per Risk Excess of Loss Effective January 1, 2011, the Company renewed its property per risk excess of loss treaty which provides coverage of \$13.0 million per risk in excess of \$2.0 million per risk. This replaces the treaty that expired December 31, 2010, which provided coverage of \$14.0 million per risk in excess of \$1.0 million per risk. The renewal treaty provides coverage in two layers: \$3.0 million per risk in excess of \$2.0 million per risk, and \$10.0 million per risk in excess of \$5.0 million per risk. The first layer is split into two sections, each subject to a \$3.0 million limit of liability for all risks involved in one loss occurrence, and the second layer is subject to a \$10.0 million limit for all risks involved in one loss occurrence.

Professional Liability Excess of Loss Effective January 1, 2010, the Company renewed its professional liability excess of loss treaty which provides coverage of \$4.0 million per policy / occurrence in excess of \$1.0 million per policy / occurrence. This replaces the treaty that expired December 31, 2009, which provided identical limits of coverage. For 2011, it is anticipated that the exposure will be added to the casualty excess of loss treaty.

Casualty Excess of Loss Effective May 1, 2010, the Company renewed its casualty excess of loss treaty which provides coverage for \$2.0 million per occurrence in excess of \$1.0 million per occurrence for general liability and auto liability. Allocated loss adjustment expenses are included within limits. This replaces the treaty that expired April 30, 2010, which provided coverage for \$2.25 million per occurrence in excess of \$0.75 million per occurrence, with allocated loss adjustment expenses shared in proportion to losses retained and ceded.

Casualty Clash Excess of Loss Effective January 1, 2011, the Company renewed its casualty clash excess of loss treaty which provides coverage of \$10.0 million per occurrence in excess of \$3.0 million per occurrence, subject to a \$20.0 million limit for all loss occurrences. This replaces the treaty that expired December 31, 2010, which provided identical coverage.

Property Quota Share Effective January 1, 2010, the Company renewed its 40% quota share treaty related to the Penn-America property line of business. This treaty covers premiums earned in 2010 on policies written in 2009 and 2010. During 2010, the Company ceded \$14.1 million of earned premium. This treaty expired on December 31, 2010 and was not renewed.

Workers Compensation Excess of Loss Effective April 15, 2010, the Company entered into two new workers compensation excess of loss treaties. The first treaty provides coverage for \$3.0 million per occurrence in excess of \$2.0 million per occurrence, with three full reinstatements of coverage—one at no cost and two at 100% additional premium as to time and pro rata as to amount of limit reinstated. The second treaty provides coverage in three layers for \$45.0 million per occurrence in excess of \$5.0 million per occurrence. The first layer of \$5.0 million in excess of \$5.0 million provides for two full reinstatements of coverage at 100% additional premium. The second layer of \$10.0 million in excess of \$10.0 million, and the third layer of \$30.0 million in excess of \$20.0 million, provides for one full reinstatement of coverage at 100% additional premium. As discussed in Note 3 above, as part of the Profit Enhancement Initiative we curtailed our workers' compensation product initiative, which resulted in a minimum premium charge of \$1.5 million for 2010 under these contracts. These treaties are not expected to be renewed in 2011.

Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Marine Excess of Loss Effective May 24, 2010, the Company entered into a new marine excess of loss treaty which provides coverage in three layers for \$13.0 million per occurrence in excess of \$2.0 million per occurrence. The first layer of \$3.0 million in excess of \$2.0 million, and the second layer of \$5.0 million in excess of \$5.0 million, provides for two full reinstatements of coverage at 100% additional premium. The third layer of \$5.0 million in excess of \$10.0 million provides for one full reinstatement of coverage at 100% additional premium.

There were no other significant changes to any of the Company's other reinsurance treaties during the quarter ended March 31, 2011. To the extent that there may be an increase or decrease in catastrophe or casualty clash exposure in the future, the Company may increase or decrease its reinsurance protection for these exposures commensurately.

7. Income Taxes

The statutory income tax rates of the countries where the Company does business are 35.0% in the United States, 0.0% in Bermuda, 0.0% in the Cayman Islands, 0.0% in Gibraltar, 28.59% in the Duchy of Luxembourg, and 25.0% on non-trading income and 12.5% on trading income in the Republic of Ireland. The statutory income tax rate of each country is applied against the expected annual taxable income of the Company in each country to estimate the annual income tax expense. Total estimated annual income tax expense is divided by total estimated annual pre-tax income to determine the expected annual income tax rate used to compute the income tax provision. On an interim basis, the expected annual income tax rate is applied against interim pre-tax income, excluding net realized gains and losses, discrete items such as the AON settlement and limited partnership distributions, and then adding that amount to income taxes on net realized gains and losses, discrete items and limited partnership distributions. The Company's income before income taxes from the Non-U.S. Subsidiaries and U.S. Subsidiaries, including the results of the quota share agreement between Wind River Reinsurance and the Insurance Operations, for the quarters ended March 31, 2011 and 2010 were as follows:

Quarter Ended March 31, 2011: (Dollars in thousands)	Non-U.S. Subsidiaries	U.S. Subsidiaries	Eliminations	Total
Revenues:				
Gross premiums written	\$ 58,697	\$ 56,467	\$ (27,498)	\$ 87,666

Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The following tables summarize the differences between the tax provisions under accounting guidance applicable to interim financial statement periods and the expected tax provision at the weighted average tax rate:

(Dollars in thousands)	Quarters Ended March 31,			
	2011	% of Pre-Tax Income	2010	% of Pre-Tax Income
	Amount		Amount	
Expected tax provision at weighted average rate	\$ 6,553	30.7%	\$ 2,374	11.3%
Adjustments:				
Tax exempt interest	(524)	(2.5)	(519)	(2.5)
Dividend exclusion	(157)	(0.7)	(79)	(0.4)
Effective tax rate adjustment	1,698	8.0	278	1.3
Other	21	0.1	15	0.2
Income tax expense	\$ 7,591	35.6%	\$ 2,069	9.9%

The effective income tax expense rate for the quarter ended March 31, 2011 was 35.6%, compared to 9.9% for the quarter ended March 31, 2010. The increase in the effective tax rate is primarily due to the Company's settlement with AON as noted in our 2010 Form 10-K. Excluding realized gains and the AON settlement, the Company's expected annual effective tax rate is (14.6%). The effective rates differed from the weighted average expected income tax expense rates of 30.7% and 11.3% for the quarter ended March 31, 2011 and 2010, respectively, primarily due to the fact that the Company records tax based on the annualized effective tax rate, net of tax-exempt interest and dividends. The Company and some of its subsidiaries file income tax returns in the U.S. federal jurisdiction, and various states and foreign jurisdictions. The Company is no longer subject to U.S. federal tax examinations by tax authorities for tax years before 2007.

The alternative minimum tax credit carryforward was \$6.5 million and \$6.5 million as of March 31, 2011 and December 31, 2010, respectively.

The Company applies a more-likely-than-not recognition threshold for all tax uncertainties whereby it only recognizes those tax benefits that have a greater than 50% likelihood of being sustained upon examination by the taxing authorities. The Company's unrecognized tax benefits were \$0.7 million as of March 31, 2011 and December 31, 2010. If recognized, the gross unrecognized tax benefits could lower the effective income tax rate in any future period. The Company classifies all interest and penalties related to uncertain tax positions as income tax expense. As of March 31, 2011, the Company has recorded \$0.1 million in liabilities for tax-related interest and penalties on its consolidated balance sheet.

8. Liability for Unpaid Losses and Loss Adjustment Expenses

The liability for unpaid losses and loss adjustment expenses reflects the Company's best estimate for future amounts needed to pay claims and related settlement expenses and the impact of the Company's reinsurance coverage with respect to insured events. Estimating the ultimate claims liability of the Company is a complex and judgmental process, because the amounts are based on management's informed estimates and judgments using data currently available. In some cases, significant periods of time, up to several years or more, may elapse between the occurrence of an insured loss and the reporting of such to the Company. The method for determining the Company's liability for unpaid losses and loss adjustment expenses includes, but is not limited to, reviewing past loss experience and considering other factors such as industry data and legal, social, and economic developments. As additional experience and data become available, the Company's estimate for the liability for unpaid losses and loss adjustment

expenses is revised accordingly. If the Company's ultimate losses, net of reinsurance, prove to differ substantially from the amounts recorded with respect to unpaid losses and loss adjustment expenses at March 31, 2011, the related adjustments could have a material impact on the Company's future results of operations.

Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Activity in the liability for unpaid losses and loss adjustment expenses is summarized as follows:

(Dollars in thousands)	Quarters Ended March 31,	
	2011	2010
Balance at beginning of period	\$ 1,052,745	\$ 1,257,741
Less: Ceded reinsurance receivables	407,197	514,466
Net balance at beginning of period	645,548	743,275
Incurred losses and loss adjustment expenses related to:		
Current year	63,641	44,627
Prior years	(5,299)	(2,838)
Total incurred losses and loss adjustment expenses	58,342	41,789
Paid losses and loss adjustment expenses related to:		
Current year	5,123	2,660
Prior years	39,525	56,364
Total paid losses and loss adjustment expenses	44,648	59,024
Net balance at end of period	659,242	726,040
Plus: Ceded reinsurance receivables	375,846	506,601
Balance at end of period	\$ 1,035,088	\$ 1,232,641

When analyzing loss reserves and prior year development, the Company considers many factors, including the frequency and severity of claims, loss trends, case reserve settlements that may have resulted in significant development, and any other additional or pertinent factors that may impact reserve estimates.

In the first quarter of 2011, the Company reduced its prior accident year loss reserves by \$5.3 million, which consisted of a \$5.0 million reduction in general liability lines, a \$0.9 million reduction in property lines, and \$0.9 million in net reductions to other insignificant lines, offset by a \$0.7 million increase in auto liability lines and a \$0.8 million increase in workers' compensation lines:

General liability: The \$5.0 million reduction primarily consisted of reductions of \$7.0 million related to our Insurance Operations, \$5.8 million of which is from accident years 2004 through 2008 due to continued favorable emergence. Incurred losses for these segments have developed at a rate lower than the Company's historical averages. This reduction was offset by a net increase of \$2.0 million related to our Reinsurance Operations in accident years 2009 and 2010 due to loss emergence on our Marine treaties.

Property: The \$0.9 million reduction primarily related to accident year 2009 related to anticipated subrogation on a large equine mortality claim.

Auto liability: The \$0.7 million increase primarily consisted of an increase of \$0.6 million related to accident years 2009 and 2010 in our Reinsurance Operations related to a non-standard auto treaty.

Workers compensation: The \$0.8 million increase related to accident years 2009 and 2010 in our Reinsurance Operations resulting from expected losses related to adjustment premiums recorded in the first quarter of 2011.

Table of Contents

GLOBAL INDEMNITY PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

In the first quarter of 2010, the Company reduced its prior accident year loss reserves by \$2.8 million. The reduction consisted of a \$2.0 million reduction in general liability lines, a \$0.6 million reduction in professional liability lines, and a \$0.2 million reduction in property lines:

General liability: The \$2.0 million reduction primarily related to accident years 2006 and prior and was due to continued favorable emergence on Penn-America business.

Professional liability: The \$0.6 million reduction primarily consisted of net reductions of \$1.0 million related to accident years 2007 and prior for our lawyers and real estate programs due to lower severity than originally anticipated, offset by increases of \$0.4 million related to accident years 2008 and 2009 for our real estate program, where loss development was higher than expected during the quarter.

Property: The \$0.2 million reduction primarily consisted of net reductions of \$1.9 million primarily related to accident years 2002 and 2006 through 2008 due to a large subrogation recovery on a disputed claim, offset by an increase of \$1.7 million primarily related to accident year 2009 due to higher than expected claim development.

9. Related Party Transactions

Fox Paine & Company

As of March 31, 2011, Fox Paine & Company beneficially owned shares having approximately 89.5% of the Company's total outstanding voting power. Fox Paine & Company can nominate a certain number of Directors, dependent on Fox Paine & Company's percentage ownership of voting shares in the Company, for so long as Fox Paine & Company hold an aggregate of 25% or more of the voting power in the Company. Fox Paine & Company controls the election of all of our Directors due to its controlling share ownership. The Company's Chairman is a member of Fox Paine & Company. The Company relies on Fox Paine & Company to provide management services and other services related to the operations of the Company.

The Company incurred management fees of \$0.4 million in each of the quarters ended March 31, 2011 and 2010 as part of the annual management fee that is paid to Fox Paine & Company.

At March 31, 2011 and December 31, 2010, Wind River Reinsurance was a limited partner in Fox Paine Capital Fund, II, which is managed by Fox Paine & Company. This investment was originally made by United National Insurance Company in June 2000 and pre-dates the September 5, 2003 acquisition by Fox Paine & Company of Wind River Investment Corporation, the holding company for the Company's Predecessor Insurance Operations. The Company's investment in this limited partnership was valued at \$7.1 million and \$4.3 million at March 31, 2011 and December 31, 2010, respectively. At March 31, 2011, the Company had an unfunded capital commitment of \$2.5 million to the partnership. Distributions of \$0.15 million and \$0.07 million were received from the limited partnership during the first quarters of 2011 and 2010, respectively.

On July 2, 2010, United America Indemnity, Ltd. entered into an agreement to indemnify the affected indirect owners of the affiliates of Fox Paine & Company that were shareholders of United America Indemnity, Ltd. immediately prior to the effective date of our re-domestication to Ireland (See Note 2 for details). The agreement indemnifies them for any tax cost (including interest on tax and penalties, if any) of any triggering event and such affected indirect owners will pay us an amount equal to any tax benefits, if any, realized by them as a result of a triggering event for which they were indemnified, provided that the indirect owners will not be required to pay any amount of tax benefits in excess of the tax costs for which we have indemnified them. A sale or other disposition by these indirect owners of our ordinary shares will not constitute a triggering event for this purpose. In addition, the indemnification agreement provides that, under certain circumstances, in the event the conversion of Global Indemnity plc's Class B ordinary shares to Class A ordinary shares or a sale or other disposition of Global Indemnity plc's Class B ordinary shares is subject to Irish stamp duty, we will indemnify such affiliates of Fox Paine & Company and their transferees against such Irish stamp duty.

Cozen O'Connor

During the quarter ended March 31, 2010, the Company incurred \$0.04 million for legal services rendered by Cozen O'Connor. Stephen A. Cozen, the chairman of Cozen O'Connor, was a member of the Company's Board of Directors until his retirement effective December 31, 2010.

Validus Reinsurance, Ltd.

Validus is a participant in a quota share retrocession agreement with Wind River Reinsurance. The Company estimated that the following written premium and losses related to the quota share retrocession agreement have been assumed by Validus from Wind River Reinsurance:

(Dollars in thousands)	Quarter Ended March 31,	
	2011	2010
Ceded written premium	\$ (76)	\$ (2,401)(1)
Ceded paid losses	54	644

(1) Represents an adjustment to true up the Company's estimated amount of ceded premium to actual.

Edward J. Noonan, the chairman and chief executive officer of Validus, was a member of the Company's Board of Directors until June 1, 2007, when he resigned from the Company's Board. Validus remains a related party since the current quota share retrocession agreement between Validus and Wind River Reinsurance was put in place during the period when Mr. Noonan was a member of the Company's Board of Directors.

Frank Crystal & Company

During the quarter ended March 31, 2011, the Company paid \$0.1 million in brokerage fees to Frank Crystal & Company, an insurance broker. James W. Crystal, the chairman and chief executive officer of Frank Crystal & Company, became a member of the Company's Board of Directors effective July 6, 2010.

10. Commitments and Contingencies**Legal Proceedings**

The Company is, from time to time, involved in various legal proceedings in the ordinary course of business. The Company purchases insurance and reinsurance policies covering such risks in amounts that it considers adequate. However, there can be no assurance that the insurance and reinsurance coverage that the Company maintains is sufficient or will be available in adequate amounts or at a reasonable cost. The Company does not believe that the resolution of any currently pending legal proceedings, either individually or taken as a whole, will have a material adverse effect on the Company's business, results of operations, cash flows, or financial condition.

There is a greater potential for disputes with reinsurers who are in a runoff of their reinsurance operations. Some of the Company's reinsurers' reinsurance operations are in runoff, and therefore, the Company closely monitors those relationships. The Company anticipates that, similar to the rest of the insurance and reinsurance industry, it will continue to be subject to litigation and arbitration proceedings in the ordinary course of business.

On December 4, 2008, a federal jury in the U.S. District Court for the Eastern District of Pennsylvania (Philadelphia) returned a \$24.0 million verdict in favor of United National Insurance Company (United National), an indirect wholly owned subsidiary of the Company, against AON Corp., an insurance and reinsurance broker. On July 24, 2009, a federal judge from the U.S. District Court for the Eastern District of Pennsylvania (Philadelphia) upheld that jury verdict. In doing so, the U.S. District Judge increased the verdict to \$32.2 million by adding more than \$8.2 million in prejudgment interest. AON filed its Notice of Appeal and a Bond in the amount of \$33.0 million. Oral arguments were heard by the Appellate Court on October 26, 2010. In January, 2011, we settled with AON for \$16.3 million. We realized approximately \$7.5 million, net of income taxes and attorney's fees.

11. Share-Based Compensation Plans

During the quarter ended March 31, 2011, the Company granted 65,481 Class A ordinary shares at a weighted average grant date value of \$21.44 per share, to key employees of the Company under the Global Indemnity plc Share Incentive Plan (the Plan). Of those shares, 54,233 were subject to certain restrictions and 11,248 vested immediately. In addition, during the same period, the Company granted an aggregate of 14,171 fully vested Class A ordinary shares, subject to certain restrictions, at a weighted average grant date value of \$20.82 per share, to non-employee directors of the Company under the Plan.

12. Earnings Per Share

Earnings per share have been computed using the weighted average number of ordinary shares and ordinary share equivalents outstanding during the period. All share counts and corresponding per share market prices have been adjusted to reflect the one-for-two stock exchange of Global Indemnity plc shares for United America Indemnity, Ltd. shares as part of the re-domestication to Ireland. See Note 2 above for more information regarding the re-domestication.

The following table sets forth the computation of basic and diluted earnings per share.

(Dollars in thousands, except per share data)	Quarters Ended March 31,	
	2011	2010
Net income	\$ 13,785	\$ 18,901
<i>Basic earnings per share:</i>		
Weighted average shares outstanding basic	30,301,293	30,184,544
Net income per share	\$ 0.45	\$ 0.63
<i>Diluted earnings per share:</i>		
Weighted average shares outstanding diluted	30,338,413	30,204,420
Net income per share	\$ 0.45	\$ 0.63

A reconciliation of weighted average shares for basic earnings per share to weighted average shares for diluted earnings per share is as follows:

	Quarters Ended March 31,	
	2011	2010
Weighted average shares for basic earnings per share	30,301,293	30,184,544
Non-vested restricted stock	28,318	19,876
Options	8,802	
Weighted average shares for diluted earnings per share	30,338,413	30,204,420

The weighted average shares outstanding used to determine dilutive earnings per share for the quarters ended March 31, 2011 and 2010 do not include 305,968 and 334,020 shares, respectively, that were deemed to be anti-dilutive.

13. Segment Information

The Company manages its business through two business segments: Insurance Operations, which includes the operations of the U.S. Insurance Companies, and Reinsurance Operations, which includes the operations of Wind

River Reinsurance.

The Insurance Operations segment and the Reinsurance Operations segment follow the same accounting policies used for the Company's consolidated financial statements. For further disclosure regarding the Company's accounting policies, please see Note 4 of the notes to the consolidated financial statements in Item 8 of Part II of the Company's 2010 Annual Report on Form 10-K.

The following are tabulations of business segment information for the quarters ended March 31, 2011 and 2010.

Quarter Ended March 31, 2011:	Insurance	Reinsurance	
(Dollars in thousands)	Operations	Operations	Total
	(1)	(2)	
Revenues:			
Gross premiums written	\$ 56,467	\$ 31,199	\$ 87,666
Net premiums written	\$ 52,411	\$ 30,697	\$ 83,108
Net premiums earned	\$ 54,786	\$ 21,183	\$ 75,969
Other income	11,669		11,669
Total revenues	66,455	21,183	87,638
Losses and Expenses:			
Net losses and loss adjustment expenses	32,800	25,542	58,342
Acquisition costs and other underwriting expenses	25,178(3)	4,674	29,852
Income (loss) from segments	\$ 8,477	\$ (9,033)	(556)
Unallocated Items:			
Net investment income			14,414
Net realized investment gains			11,997
Corporate and other operating expenses			(2,780)
Interest expense			(1,752)
Income before income taxes			21,323
Income tax expense			7,591
Income before equity in net income of partnership			13,732
Equity in net income of partnership, net of tax			53
Net income			\$ 13,785
Total assets	\$ 1,632,579	\$ 669,219(4)	\$ 2,301,798

(1) Includes business ceded to Reinsurance Operations.

(2) External business only, excluding business assumed from Insurance Operations.

(3) Includes federal excise tax of \$284 relating to cessions from Insurance Operations to Reinsurance Operations.

(4) Comprised of Wind River Reinsurance's total assets less its investment in subsidiaries.

Quarter Ended March 31, 2010:	Insurance Operations	Reinsurance Operations	Total
(Dollars in thousands)	(1)	(2)	
Revenues:			
Gross premiums written	\$ 54,071	\$ 38,782	\$ 92,853
Net premiums written	\$ 43,478	\$ 38,003	\$ 81,481
Net premiums earned	\$ 49,744	\$ 21,044	\$ 70,788
Losses and Expenses:			
Net losses and loss adjustment expenses	29,714	12,075	41,789
Acquisition costs and other underwriting expenses	22,700 (3)	7,448	30,148
Income (loss) from segments	\$ (2,670)	\$ 1,521	(1,149)
Unallocated Items:			
Net investment income			14,579
Net realized investment gains			14,204
Corporate and other operating expenses			(4,896)
Interest expense			(1,739)
Income before income taxes			20,999
Income tax expense			2,069
Income before equity in net loss of partnership			18,930
Equity in net loss of partnership, net of tax			(29)
Net income			\$ 18,901
Total assets	\$ 1,775,927	\$ 640,714 (4)	\$ 2,416,641

(1) Includes business ceded to Reinsurance Operations.

(2) External business only, excluding business assumed from Insurance Operations.

(3) Includes federal excise tax of \$260 relating to cessions from Insurance Operations to Reinsurance Operations.

(4) Comprised of Wind River Reinsurance's total assets less its investment in subsidiaries.

14. Supplemental Cash Flow Information

The Company paid the following amounts in cash for net U.S. federal income taxes and interest during the quarters ended March 31, 2011 and 2010:

(Dollars in thousands)	Quarters Ended	
	2011	March 31, 2010
Net U.S. federal income taxes paid (recovered)	\$ (48)	\$
Interest paid	3,123	3,124

15. Subsequent Events

On March 23, 2011, the Company announced that David J. Myers is no longer President of Diamond State Group. The Company appointed Ronald F. Gorman as President of Diamond State Group on April 11, 2011.

On April 28, 2011, the Company announced it is evaluating potential strategic alternatives, which will include discussions with potential acquirers, and has retained Morgan Stanley & Co. Incorporated to assist with its evaluation.

In April and early May of 2011, the United States experienced severe weather from wind, hail, floods and tornados resulting in widespread property damage. We currently estimate that we have incurred pretax net losses of \$6.1 million as a result of these events. Actual losses may vary materially from our current estimates due to the inherent uncertainties resulting from several factors, including the preliminary nature of the loss data available and potential inaccuracies and inadequacies in the data provided.

GLOBAL INDEMNITY PLC

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the consolidated financial statements and accompanying notes of Global Indemnity included elsewhere in this report. Some of the information contained in this discussion and analysis or set forth elsewhere in this report, including information with respect to our plans and strategy, constitutes forward-looking statements that involve risks and uncertainties. Please see **Cautionary Note Regarding Forward-Looking Statements** at the end of this Item 2 for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained herein. For more information regarding our business and operations, please see our Annual Report on Form 10-K for the year ended December 31, 2010.

Recent Developments

On March 23, 2011, the Company announced that David J. Myers is no longer President of Diamond State Group. The Company appointed Ronald F. Gorman as President of Diamond State Group on April 11, 2011.

On April 28, 2011, the Company announced it is evaluating potential strategic alternatives, which will include discussions with potential acquirers, and has retained Morgan Stanley & Co. Incorporated to assist with its evaluation. In April and early May of 2011, the United States experienced severe weather from wind, hail, floods and tornados resulting in widespread property damage. We currently estimate that we have incurred pretax net losses of \$6.1 million as a result of these events. Actual losses may vary materially from our current estimates due to the inherent uncertainties resulting from several factors, including the preliminary nature of the loss data available and potential inaccuracies and inadequacies in the data provided.

Overview

Our Insurance Operations distribute property and casualty insurance products through a group of approximately 102 professional general agencies that have limited quoting and binding authority, as well as a number of wholesale insurance brokers who in turn sell our insurance products to insureds through retail insurance brokers. We operate predominantly in the excess and surplus lines marketplace. To manage our operations, we differentiate them by product classification. These product classifications are: 1) Penn-America, which includes property and general liability products for small commercial businesses distributed through a select network of wholesale general agents with specific binding authority; 2) United National, which includes property, general liability, and professional lines products distributed through program administrators with specific binding authority; and 3) Diamond State, which includes property, casualty, and professional lines products distributed through wholesale brokers and program administrators with specific binding authority.

Our Reinsurance Operations are comprised of the operations of Wind River Reinsurance, a Bermuda based treaty reinsurer of excess and surplus lines and specialty property and casualty insurance.

We derive our revenues primarily from premiums paid on insurance policies that we write and from income generated by our investment portfolio, net of fees paid for investment management services. The amount of insurance premiums that we receive is a function of the amount and type of policies we write, as well as of prevailing market prices.

Our expenses include losses and loss adjustment expenses, acquisition costs and other underwriting expenses, corporate and other operating expenses, interest, other investment expenses, and income taxes. Losses and loss adjustment expenses are estimated by management and reflect our best estimate of ultimate losses and costs arising during the reporting period and revisions of prior period estimates. We record losses and loss adjustment expenses based on an actuarial analysis of the estimated losses we expect to incur on the insurance policies we write. The ultimate losses and loss adjustment expenses will depend on the actual costs to resolve claims. Acquisition costs consist principally of commissions that are typically a percentage of the premiums on the insurance policies we write, net of ceding commissions earned from reinsurers and allocated internal costs. Other underwriting expenses consist primarily of personnel expenses and general operating expenses. Corporate and other operating expenses are comprised primarily of outside legal fees, other professional fees, including accounting fees, directors' fees, management fees, salaries and benefits for company personnel whose services relate to the support of corporate activities, and capital duty taxes incurred. Interest expense consists primarily of interest on senior notes payable,

junior subordinated debentures, and funds held on behalf of others.

GLOBAL INDEMNITY PLC

Critical Accounting Estimates and Policies

Our consolidated financial statements are prepared in conformity with GAAP, which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates and assumptions. We believe that of our significant accounting policies, the following may involve a higher degree of judgment and estimation.

Liability for Unpaid Losses and Loss Adjustment Expenses

Although variability is inherent in estimates, we believe that the liability for unpaid losses and loss adjustment expenses reflects our best estimate for future amounts needed to pay losses and related loss adjustment expenses and the impact of our reinsurance coverages with respect to insured events.

In developing loss and loss adjustment expense (loss or losses) reserve estimates for our Insurance Operations, our actuaries perform detailed reserve analyses each quarter. To perform the analysis, the data is organized at a reserve category level. A reserve category can be a line of business such as commercial automobile liability, or it can be a particular type of claim such as construction defect. The reserves within a reserve category level are characterized as either short-tail or long-tail. Most of our business can be characterized as medium to long-tail. For long-tail business, it will generally be several years between the time the business is written and the time when all claims are settled. Our long-tail exposures include general liability, professional liability, products liability, commercial automobile liability, and excess and umbrella. Short-tail exposures include property, commercial automobile physical damage, and equine mortality. For further discussion about our product classifications, see General Business Segments Our Insurance Operations in Item 1 of Part I of our 2010 Annual Report on Form 10-K. Each of our product classifications contain both long-tail and short-tail exposures. Every reserve category is analyzed by our actuaries each quarter. The analyses generally include reviews of losses gross of reinsurance and net of reinsurance.

In addition to our internal reserve analysis, independent external actuaries perform a detailed review of our reserves during the second and fourth quarters and performed an additional, higher level review as of March 31, 2011. We do not rely upon the review of the independent actuaries to develop our reserves; however, the data is used to corroborate the analysis performed by the in-house actuarial staff.

Loss reserve estimates for our Reinsurance Operations are developed by independent, external actuaries. The data for this analysis is organized by treaty and treaty year. As with our reserves for our Insurance Operations, reserves for our Reinsurance Operations are characterized as short-tail through long-tail. Most of our business can be characterized as medium to long-tail. Long-tail exposures include workers compensation, professional liability, and excess and umbrella liability. Short-tail exposures are primarily catastrophe exposed property accounts. Every treaty is reviewed each quarter, both gross and net of reinsurance.

The methods that we use to project ultimate losses for long-tail through short-tail exposures include, but are not limited to, the following:

Paid Development method;

Incurred Development method;

Expected Loss Ratio method;

Bornhuetter-Ferguson method using premiums and paid loss;

Bornhuetter-Ferguson method using premiums and incurred loss; and

Average Loss method.

Table of Contents**GLOBAL INDEMNITY PLC**

The Paid Development method estimates ultimate losses by reviewing paid loss patterns and applying them to accident years with further expected changes in paid loss. Selection of the paid loss pattern requires analysis of several factors including the impact of inflation on claims costs, the rate at which claims professionals make claim payments and close claims, the impact of judicial decisions, the impact of underwriting changes, the impact of large claim payments and other factors. Claim cost inflation itself requires evaluation of changes in the cost of repairing or replacing property, changes in the cost of medical care, changes in the cost of wage replacement, judicial decisions, legislative changes and other factors. Because this method assumes that losses are paid at a consistent rate, changes in any of these factors can impact the results. Since the method does not rely on case reserves, it is not directly influenced by changes in the adequacy of case reserves.

For many reserve categories, paid loss data for recent periods may be too immature or erratic for accurate predictions. This situation often exists for long-tail exposures. In addition, changes in the factors described above may result in inconsistent payment patterns. Finally, estimating the paid loss pattern subsequent to the most mature point available in the data analyzed often involves considerable uncertainty for long-tail reserve categories.

The Incurred Development method is similar to the Paid Development method, but it uses case incurred losses instead of paid losses. Since this method uses more data (case reserves in addition to paid losses) than the Paid Development method, the incurred development patterns may be less variable than paid development patterns. However, selection of the incurred loss pattern requires analysis of all of the factors listed in the description of the Paid Development method. In addition, the inclusion of case reserves can lead to distortions if changes in case reserving practices have taken place and the use of case incurred losses may not eliminate the issues associated with estimating the incurred loss pattern subsequent to the most mature point available.

The Expected Loss Ratio method multiplies premiums by an expected loss ratio to produce ultimate loss estimates for each accident year. This method may be useful if loss development patterns are inconsistent, losses emerge very slowly, or there is relatively little loss history from which to estimate future losses. The selection of the expected loss ratio requires analysis of loss ratios from earlier accident years or pricing studies and analysis of inflationary trends, frequency trends, rate changes, underwriting changes, and other applicable factors.

The Bornhuetter-Ferguson method using premiums and paid losses is a combination of the Paid Development method and the Expected Loss Ratio method. This method normally determines expected loss ratios similar to the method used for the Expected Loss Ratio method and requires analysis of the same factors described above. The method assumes that only future losses will develop at the expected loss ratio level. The percent of paid loss to ultimate loss implied from the Paid Development method is used to determine what percentage of ultimate loss is yet to be paid.

The use of the pattern from the Paid Development method requires consideration of all factors listed in the description of the Paid Development method. The estimate of losses yet to be paid is added to current paid losses to estimate the ultimate loss for each year. This method will react very slowly if actual ultimate loss ratios are different from expectations due to changes not accounted for by the expected loss ratio calculation.

The Bornhuetter-Ferguson method using premiums and incurred losses is similar to the Bornhuetter-Ferguson method using premiums and paid losses except that it uses case incurred losses. The use of case incurred losses instead of paid losses can result in development patterns that are less variable than paid development patterns. However, the inclusion of case reserves can lead to distortions if changes in case reserving practices have taken place, and the method requires analysis of all the factors that need to be reviewed for the Expected Loss Ratio and Incurred Development methods.

The Average Loss method multiplies a projected number of ultimate claims by an estimated ultimate average loss for each accident year to produce ultimate loss estimates. Since projections of the ultimate number of claims are often less variable than projections of ultimate loss, this method can provide more reliable results for reserve categories where loss development patterns are inconsistent or too variable to be relied on exclusively. In addition, this method can more directly account for changes in coverage that impact the number and size of claims. However, this method can be difficult to apply to situations where very large claims or a substantial number of unusual claims result in volatile average claim sizes. Projecting the ultimate number of claims requires analysis of several factors including the rate at which policyholders report claims to us, the impact of judicial decisions, the impact of underwriting changes and other factors. Estimating the ultimate average loss requires analysis of the impact of large losses and claim cost trends based on changes in the cost of repairing or replacing property, changes in the cost of medical care, changes in the cost of

wage replacement, judicial decisions, legislative changes and other factors.

Table of Contents**GLOBAL INDEMNITY PLC**

For many exposures, especially those that can be considered long-tail, a particular accident year may not have a sufficient volume of paid losses to produce a statistically reliable estimate of ultimate losses. In such a case, our actuaries typically assign more weight to the Incurred Development method than to the Paid Development method. As claims continue to settle and the volume of paid losses increases, the actuaries may assign additional weight to the Paid Development method. For most of our reserve categories, even the incurred losses for accident years that are early in the claim settlement process will not be of sufficient volume to produce a reliable estimate of ultimate losses. In these cases, we will not assign any weight to the Paid and Incurred Development methods and will use the Bornhuetter-Ferguson and Expected Loss Ratio methods. For short-tail exposures, the Paid and Incurred Development methods can often be relied on sooner primarily because our history includes a sufficient number of years to cover the entire period over which paid and incurred losses are expected to change. However, we may also use the Expected Loss Ratio, Bornhuetter-Ferguson and Average Loss methods for short-tail exposures.

Generally, reserves for long-tail lines use the Expected Loss Ratio method for the most recent accident year, shift to the Bornhuetter-Ferguson methods for the next two years, and then shift to the Incurred and/or Paid Development method. Claims related to umbrella business are usually reported later than claims for other long-tail lines. For umbrella business, the Expected Loss Ratio and Bornhuetter-Ferguson methods are used for as many as six years before shifting to the Incurred Development method. Reserves for short-tail lines use the Bornhuetter-Ferguson methods for the most recent accident year and shift to the Incurred and/or Paid Development method in subsequent years.

For other more complex reserve categories where the above methods may not produce reliable indications, we use additional methods tailored to the characteristics of the specific situation. Such reserve categories include losses from construction defects and asbestos and environmental losses (A&E).

For construction defect losses, our actuaries organize losses by the year in which they were reported. To estimate losses from claims that have not been reported, various extrapolation techniques are applied to the pattern of claims that have been reported to estimate the number of claims yet to be reported. This process requires analysis of several factors including the rate at which policyholders report claims to us, the impact of judicial decisions, the impact of underwriting changes and other factors. An average claim size is determined from past experience and applied to the number of unreported claims to estimate reserves for these claims.

Establishing reserves for A&E and other mass tort claims involves considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage. The insurance industry continues to receive a substantial number of asbestos-related bodily injury claims, with an increasing focus being directed toward other parties, including installers of products containing asbestos rather than against asbestos manufacturers. This shift has resulted in significant insurance coverage litigation implicating applicable coverage defenses or determinations, if any, including but not limited to, determinations as to whether or not an asbestos-related bodily injury claim is subject to aggregate limits of liability found in most comprehensive general liability policies. In response to these continuing developments, management increased gross and net A&E reserves during the second quarter of 2008 to reflect its best estimate of A&E exposures. In 2009, one of our insurance companies was dismissed from a lawsuit seeking coverage from it and other unrelated insurance companies. The suit involved issues related to approximately 3,900 existing asbestos related bodily injury claims and future claims. The dismissal was the result of a settlement of a disputed claim related to accident year 1984. The settlement is conditioned upon certain legal events occurring which will trigger financial obligations by the insurance company. Management will continue to monitor the developments of the litigation to determine if any additional financial exposure is present.

Reserve analyses performed by our internal and external actuaries result in actuarial point estimates. The results of the detailed reserve reviews were summarized and discussed with our senior management to determine the best estimate of reserves. This group considered many factors in making this decision. The factors included, but were not limited to, the historical pattern and volatility of the actuarial indications, the sensitivity of the actuarial indications to changes in paid and incurred loss patterns, the consistency of claims handling processes, the consistency of case reserving

practices, changes in our pricing and underwriting, and overall pricing and underwriting trends in the insurance market.

Table of Contents**GLOBAL INDEMNITY PLC**

Management's best estimate at March 31, 2011 was recorded as the loss reserve. Management's best estimate is as of a particular point in time and is based upon known facts, our actuarial analyses, current law, and our judgment. This resulted in carried gross and net reserves of \$1,035.1 million and \$659.2 million, respectively, as of March 31, 2011. A breakout of our gross and net reserves, excluding the effects of our intercompany pooling arrangements and intercompany stop loss and quota share reinsurance agreements, as of March 31, 2011 is as follows:

(Dollars in thousands)	Gross Reserves		
	Case	IBNR (1)	Total
Insurance Operations	\$ 342,476	\$ 597,722	\$ 940,198
Reinsurance Operations	26,781	68,109	94,890
Total	\$ 369,257	\$ 665,831	\$ 1,035,088

	Net Reserves (2)		
	Case	IBNR (1)	Total
Insurance Operations	\$ 219,822	\$ 345,720	\$ 565,542
Reinsurance Operations	26,660	67,040	93,700
Total	\$ 246,482	\$ 412,760	\$ 659,242

(1) Losses incurred but not reported, including the expected future emergence of case reserves.

(2) Does not include reinsurance receivable on paid losses.

We continually review these estimates and, based on new developments and information, we include adjustments of the estimated ultimate liability in the operating results for the periods in which the adjustments are made. The establishment of loss and loss adjustment expense reserves makes no provision for the possible broadening of coverage by legislative action or judicial interpretation, or the emergence of new types of losses not sufficiently represented in our historical experience or that cannot yet be quantified or estimated. We regularly analyze our reserves and review pricing and reserving methodologies so that future adjustments to prior year reserves can be minimized. However, given the complexity of this process, reserves require continual updates and the ultimate liability may be higher or lower than previously indicated. Changes in estimates for loss and loss adjustment expense reserves are recorded in the period that the change in these estimates is made. See Note 8 of the notes to the consolidated financial statements in Item 1 of Part I of this report for details concerning the changes in the estimate for incurred loss and loss adjustment expenses related to prior accident years.

The detailed reserve analyses that our internal and external actuaries complete use a variety of generally accepted actuarial methods and techniques to produce a number of estimates of ultimate loss. We determine our best estimate of ultimate loss by reviewing the various estimates and assigning weight to each estimate given the characteristics of the reserve category being reviewed. The reserve estimate is the difference between the estimated ultimate loss and the losses paid to date. The difference between the estimated ultimate loss and the case incurred loss (paid loss plus case reserve) is considered to be IBNR. IBNR calculated as such includes a provision for development on known cases (supplemental development) as well as a provision for claims that have occurred but have not yet been reported (pure IBNR).

In light of the many uncertainties associated with establishing the estimates and making the assumptions necessary to establish reserve levels, we review our reserve estimates on a regular basis and make adjustments in the period that the need for such adjustments is determined. The anticipated future loss emergence continues to be reflective of historical

patterns, and the selected development patterns have not changed significantly from those underlying our most recent analyses.

The key assumptions fundamental to the reserving process are often different for various reserve categories and accident years. Some of these assumptions are explicit assumptions that are required of a particular method, but most of the assumptions are implicit and cannot be precisely quantified. An example of an explicit assumption is the pattern employed in the Paid Development method. However, the assumed pattern is itself based on several implicit assumptions such as the impact of inflation on medical costs and the rate at which claim professionals close claims. Loss frequency is a measure of the number of claims per unit of insured exposure, and loss severity is a measure of the average size of claims. Each reserve segment has an implicit frequency and severity for each accident year as a result of the various assumptions made.

Table of Contents**GLOBAL INDEMNITY PLC**

Previous reserve analyses have resulted in our identification of information and trends that have caused us to increase or decrease our frequency and severity assumptions in prior periods and could lead to the identification of a need for additional material changes in loss and loss adjustment expense reserves, which could materially affect our results of operations, equity, business and insurer financial strength and debt ratings. Factors affecting loss frequency include, among other things, the effectiveness of loss controls and safety programs and changes in economic activity or weather patterns. Factors affecting loss severity include, among other things, changes in policy limits and deductibles, rate of inflation and judicial interpretations. Another factor affecting estimates of loss frequency and severity is the loss reporting lag, which is the period of time between the occurrence of a loss and the date the loss is reported to us. The length of the loss reporting lag affects our ability to accurately predict loss frequency (loss frequencies are more predictable for short-tail lines) as well as the amount of reserves needed for IBNR.

If the actual levels of loss frequency and severity are higher or lower than expected, the ultimate losses will be different than management's best estimate. For most of our reserving classes, we believe that frequency can be predicted with greater accuracy than severity. Therefore, we believe management's best estimate is more sensitive to changes in severity than frequency. The following table, which we believe reflects a reasonable range of variability around our best estimate based on our historical loss experience and management's judgment, reflects the impact of changes (which could be favorable or unfavorable) in frequency and severity on our current accident year gross loss estimate of \$63.6 million for claims occurring during the quarter ended March 31, 2011:

(Dollars in thousands)	Severity Change					
		-10%	-5%	0%	5%	10%
Frequency Change	-5%	\$ (9,228)	\$ (6,205)	\$ (3,182)	\$ (159)	\$ 2,864
	-3%	(8,082)	(4,996)	(1,909)	1,177	4,264
	-2%	(7,510)	(4,391)	(1,273)	1,846	4,964
	-1%	(6,937)	(3,787)	(636)	2,514	5,664
	0%	(6,364)	(3,182)		3,182	6,364
	1%	(5,791)	(2,577)	636	3,850	7,064
	2%	(5,219)	(1,973)	1,273	4,519	7,764
	3%	(4,646)	(1,368)	1,909	5,187	8,464
	5%	(3,500)	(159)	3,182	6,523	9,864

Our net reserves for losses and loss expenses of \$659.2 million as of March 31, 2011 relate to multiple accident years. Therefore, the impact of changes in frequency and severity for more than one accident year could be higher or lower than the amounts reflected above.

Recoverability of Reinsurance Receivables

We regularly review the collectability of our reinsurance receivables, and we include adjustments resulting from this review in earnings in the period in which the adjustment arises. A.M. Best ratings, financial history, available collateral, and payment history with the reinsurers are several of the factors that we consider when judging collectability. Changes in loss reserves can also affect the valuation of reinsurance receivables if the change is related to loss reserves that are ceded to reinsurers. Certain amounts may be uncollectible if our reinsurers dispute a loss or if the reinsurer is unable to pay. If our reinsurers do not pay, we are still legally obligated to pay the loss. At March 31, 2011, our reinsurance receivables were \$390.6 million, net of an allowance for uncollectible reinsurance receivables of \$12.7 million. See Note 6 of the notes to the consolidated financial statements in Item 1 of Part I of this report for more details concerning the collectability of our reinsurance receivables.

Table of Contents

GLOBAL INDEMNITY PLC

Investments

The carrying amount of our investments approximates their estimated fair value. We regularly perform various analytical valuation procedures with respect to investments, including reviewing each fixed maturity security in an unrealized loss position to determine the amount of unrealized loss related to credit loss and the amount related to all other factors, such as changes in interest rates. The credit loss represents the portion of the amortized book value in excess of the net present value of the projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment. The credit loss component of the other than temporary impairment is recorded through earnings, whereas the amount relating to factors other than credit losses are recorded in other comprehensive income, net of taxes. During our review, we consider credit rating, market price, and issuer specific financial information, among other factors, to assess the likelihood of collection of all principal and interest as contractually due. Securities for which we determine that a credit loss is likely are subjected to further analysis to estimate the credit loss to be recognized in earnings, if any. See Note 4 of the notes to consolidated financial statements in Item 1 of Part I of this report for the specific methodologies and significant assumptions used by asset class. Upon identification of such securities and periodically thereafter, a detailed review is performed to determine whether the decline is considered other than temporary. This review includes an analysis of several factors, including but not limited to, the credit ratings and cash flows of the securities, and the magnitude and length of time that the fair value of such securities is below cost.

For an analysis of our securities with gross unrealized losses as of March 31, 2011 and December 31, 2010, and for other than temporary impairment losses that we recorded for the quarters ended March 31, 2011 and 2010, please see Note 4 of the notes to the consolidated financial statements in Item 1 of Part I of this report.

Fair Value Measurements

We categorize our assets that are accounted for at fair value in the consolidated statements into a fair value hierarchy. The fair value hierarchy is directly related to the amount of subjectivity associated with the inputs utilized to determine the fair value of these assets. See Note 5 of the notes to the consolidated financial statements in Item 1 of Part I of this report for further information about the fair value hierarchy and our assets that are accounted for at fair value.

Goodwill and Intangible Assets

The Company tests for impairment of goodwill at least annually and more frequently as circumstances warrant in accordance with applicable accounting guidance. Impairment of goodwill is recognized only if the carrying amount of the business unit, including goodwill, exceeds the fair value of the reporting unit. The amount of the impairment loss would be equal to the excess carrying value of the goodwill over the implied fair value of the reporting unit goodwill. Impairment of intangible assets with indefinite useful lives is tested at least annually and more frequently as circumstances warrant in accordance with applicable accounting guidance. Impairment of indefinite lived intangible assets is recognized only if the carrying amount of the intangible assets exceeds the fair value of said assets. The amount of the impairment loss would be equal to the excess carrying value of the assets over the fair value of said assets.

Intangible assets that are not deemed to have an indefinite useful life are amortized over their estimated useful lives. The carrying amounts of definite lived intangible assets are regularly reviewed for indicators of impairment in accordance with applicable accounting guidance. Impairment is recognized only if the carrying amount of the intangible asset is in excess of its undiscounted projected cash flows. The impairment is measured as the difference between the carrying amount and the estimated fair value of the asset.

GLOBAL INDEMNITY PLC

Taxation

We provide for income taxes in accordance with applicable accounting guidance. Our deferred tax assets and liabilities primarily result from temporary differences between the amounts recorded in our consolidated financial statements and the tax basis of our assets and liabilities.

At each balance sheet date, management assesses the need to establish a valuation allowance that reduces deferred tax assets when it is more likely than not that all, or some portion, of the deferred tax assets will not be realized. A valuation allowance would be based on all available information including our assessment of uncertain tax positions and projections of future taxable income from each tax-paying component in each jurisdiction, principally derived from business plans and available tax planning strategies. There are no valuation allowances as of March 31, 2011 or December 31, 2010. The deferred tax asset balance is analyzed regularly by management. Based on these analyses, we have determined that our deferred tax asset is recoverable. Projections of future taxable income incorporate several assumptions of future business and operations that are apt to differ from actual experience. If, in the future, our assumptions and estimates that resulted in our forecast of future taxable income for each tax-paying component prove to be incorrect, a valuation allowance may be required. This could have a material adverse effect on our financial condition, results of operations, and liquidity.

On an interim basis, we book our tax provision using the expected full year effective tax rate. Forecasts which compute taxable income and taxes expected to be incurred in the jurisdictions where we do business are prepared several times per year. The effective tax rate is computed by dividing forecasted income tax expense not including net realized investment gains (losses), discrete items such as the AON settlement and limited partnership distributions by forecasted pre-tax income not including net realized investment gains (losses), discrete items and limited partnership distributions. Changes in pre-tax and taxable income in the jurisdictions where we do business can change the effective tax rate. To compute our income tax expense on an interim basis, we apply our expected full year effective tax rate against our pre-tax income excluding net realized investment gains (losses), discrete items and limited partnership distributions and then add actual tax on net realized investment gains (losses), discrete items and limited partnership distributions to that result.

We apply a more likely than not recognition threshold for all tax uncertainties, only allowing the recognition of those tax benefits that have a greater than 50% likelihood of being sustained upon examination by the taxing authorities. Please see Note 7 of the notes to the consolidated financial statements in Item 1 of Part I of this report for a discussion of our tax uncertainties.

Our Business Segments

We manage our business through two business segments: Insurance Operations, which includes the operations of the U.S. Insurance Companies, and Reinsurance Operations, which are the operations of Wind River Reinsurance.

We evaluate the performance of our Insurance Operations and Reinsurance Operations segments based on gross and net premiums written, revenues in the form of net premiums earned and commission and fee income, and expenses in the form of (1) net losses and loss adjustment expenses, (2) acquisition costs, and (3) other underwriting expenses. For a description of our segments, see *Business Segments* in Item 1 of Part I in our 2010 Annual Report on Form 10-K.

Table of Contents**GLOBAL INDEMNITY PLC**

The following table sets forth an analysis of financial data for our segments during the periods indicated:

(Dollars in thousands)	Quarters Ended	
	2011	2010
		March 31,
Insurance Operations premiums written:		
Gross premiums written	\$ 56,467	\$ 54,071
Ceded premiums written	4,056	10,593
Net premiums written	\$ 52,411	\$ 43,478
Reinsurance Operations premiums written:		
Gross premiums written	\$ 31,199	\$ 38,782
Ceded premiums written	502	779
Net premiums written	\$ 30,697	\$ 38,003
Revenues: (1)		
Insurance Operations	\$ 66,455	\$ 49,744
Reinsurance Operations	21,183	21,044
Total revenues	\$ 87,638	\$ 70,788
Expenses: (2)		
Insurance Operations (3)	\$ 57,978	\$ 52,414
Reinsurance Operations	30,216	19,523
Total expenses	\$ 88,194	\$ 71,937
Income (loss) from segments:		
Insurance Operations	\$ 8,477	\$ (2,670)
Reinsurance Operations	(9,033)	1,521
Total income from segments	\$ (556)	\$ (1,149)
Insurance combined ratio analysis: (4)		
Insurance Operations		
Loss ratio	59.9	59.7
Expense ratio	46.0	45.6
Combined ratio	105.9	105.3

Reinsurance Operations		
Loss ratio	120.6	57.4
Expense ratio	22.1	35.4
Combined ratio	142.7	92.8
Consolidated		
Loss ratio	76.8	59.0
Expense ratio	39.3	42.6
Combined ratio	116.1	101.6

- (1) Excludes net investment income and net realized investment gains, which are not allocated to our segments.
- (2) Excludes corporate and other operating expenses and interest expense, which are not allocated to our segments.
- (3) Includes excise tax of \$284 and \$260 for the quarters ended March 31, 2011 and 2010, respectively, related to cessions from our Insurance Operations to our Reinsurance Operations.
- (4) Our insurance combined ratios are non-GAAP financial measures that are generally viewed in the insurance industry as indicators of underwriting profitability. The loss ratio is the ratio of net losses and loss adjustment expenses to net premiums earned. The expense ratio is the ratio of acquisition costs and other underwriting expenses to net premiums earned. The combined ratio is the sum of the loss and expense ratios.

Table of Contents**GLOBAL INDEMNITY PLC****Results of Operations**

All percentage changes included in the text below have been calculated using the corresponding amounts from the applicable tables.

Quarter Ended March 31, 2011 Compared with the Quarter Ended March 31, 2010**Insurance Operations**

The components of income from our Insurance Operations segment and corresponding underwriting ratios are as follows:

(Dollars in thousands)	Quarters Ended March 31,		Increase / (Decrease)	
	2011	2010	\$	%
Gross premiums written	\$ 56,467	\$ 54,071	\$ 2,396	4.4%
Net premiums written	\$ 52,411	\$ 43,478	\$ 8,933	20.5%
Net premiums earned	\$ 54,786	\$ 49,744	\$ 5,042	10.1%
Other income	11,669		11,669	100.0%
Total revenues	\$ 66,455	\$ 49,744	\$ 16,711	33.6%
Losses and expenses:				
Net losses and loss adjustment expenses	32,800	29,714	3,086	10.4%
Acquisition costs and other underwriting expenses (1)	25,178	22,700	2,478	10.9%
Income (loss) from segment	\$ 8,477	\$ (2,670)	\$ 11,147	417.5%
Underwriting Ratios:				
Loss ratio:				
Current accident year	75.8	63.9	11.9	
Prior accident year	(15.9)	(4.2)	(11.7)	
Calendar year	59.9	59.7	0.2	
Expense ratio	46.0	45.6	0.4	
Combined ratio	105.9	105.3	0.6	

(1) Includes excise tax of \$284 and \$260 related to cessions from our Insurance Operations to our Reinsurance Operations for the quarters ended March 31, 2011 and 2010, respectively.

Premiums

Gross premiums written, which represent the amount received or to be received for insurance policies written without reduction for reinsurance costs or other deductions, were \$56.5 million for the quarter ended March 31, 2011, compared with \$54.1 million for the quarter ended March 31, 2010, an increase of \$2.4 million or 4.4%. The increase is primarily related to growth in Diamond State brokerage operations, offset partially by decreases in Penn-America.

Net premiums written, which equal gross premiums written less ceded premiums written, were \$52.4 million for the quarter ended March 31, 2011, compared with \$43.5 million for the quarter ended March 31, 2010, an increase of \$8.9 million or 20.5%. The increase was primarily due to the cancellation of a property quota share reinsurance treaty effective January 1, 2011 and an increase in retention related to the property excess of loss treaty which renewed January 1, 2011.

The ratio of net premiums written to gross premiums written was 92.8% for the quarter ended March 31, 2011 and 80.4% for the quarter ended March 31, 2010, an increase of 12.4 points, which was primarily due to changes in our reinsurance structure on our property business noted above.

Table of Contents**GLOBAL INDEMNITY PLC**

Net premiums earned were \$54.8 million for the quarter ended March 31, 2011, compared with \$49.7 million for the quarter ended March 31, 2010, an increase of \$5.0 million or 10.1%. The increase was primarily due to increases in net premiums written within the previous year. Property net premiums earned for the quarters ended March 31, 2011 and 2010 were \$24.2 million and \$19.3 million, respectively. Casualty net premiums earned for the quarters ended March 31, 2011 and 2010 were \$30.6 million and \$30.5 million, respectively.

Other Income

Other income was \$11.7 million and \$0.0 million for the quarters ended March 31, 2011 and 2010, respectively. Other income is comprised of fee income and \$11.5 million received from our settlement with AON, net of attorney's fees. Income from the AON settlement is non-recurring. Please see Note 10 to the consolidated financial statements in Item 1 of Part I of this report for additional details regarding income and related tax expense from this settlement.

Net Losses and Loss Adjustment Expenses

The loss ratio for our Insurance Operations was 59.9% for the quarter ended March 31, 2011 compared with 59.7% for the quarter ended March 31, 2010. The loss ratio is a non-GAAP financial measure that is generally viewed in the insurance industry as an indicator of underwriting profitability and is calculated by dividing net losses and loss adjustment expenses by net premiums earned.

The current accident year loss ratio for the quarter ended March 31, 2011 increased 11.9 points from the quarter ended March 31, 2010:

The current accident year property loss ratio increased 11.8 points from 61.2% in the quarter ended March 31, 2010 to 73.0% in the quarter ended March 31, 2011, which consists of a 9.7 point increase in the non-catastrophe loss ratio from 59.4% in the quarter ended March 31, 2010 to 69.1% in the quarter ended March 31, 2011 and a 2.1 point increase in the catastrophe loss ratio from 1.8% in the quarter ended March 31, 2010 to 3.9% in the quarter ended March 31, 2011. The increase in the non-catastrophe loss ratio is primarily due to severity from fire losses. Non-catastrophe losses were \$16.7 million and \$11.4 million for the quarters ended March 31, 2011 and 2010, respectively. The increase in the catastrophe loss ratio is primarily due to tornado losses. Catastrophe losses were \$0.9 million and \$0.3 million for the quarters ended March 31, 2011 and 2010, respectively. Property net premiums earned for the quarters ended March 31, 2011 and 2010 were \$24.2 million and \$19.3 million, respectively.

The current accident year casualty loss ratio increased 12.4 points from 65.6% in the quarter ended March 31, 2010 to 78.0% in the quarter ended March 31, 2011 primarily due to a professional lines loss in a class of business that we are exiting and loss emergence in our general liability lines. Casualty net premiums earned for the quarters ended March 31, 2011 and 2010 were \$30.6 million and \$30.5 million, respectively.

The impact of changes to prior accident years is 15.9 points resulting from a reduction of net losses and loss adjustment expenses for prior accident years of \$8.7 million in the quarter ended March 31, 2011 compared to a reduction of net losses and loss adjustment expenses for prior accident years of \$2.1 million in the quarter ended March 31, 2010. When analyzing loss reserves and prior year development, we consider many factors, including the frequency and severity of claims, loss trends, case reserve settlements that may have resulted in significant development, and any other additional or pertinent factors that may impact reserve estimates.

In the first quarter of 2011, the Company reduced its prior accident year loss reserves by \$8.7 million, which consisted of a \$7.0 million reduction in general liability lines, a \$1.0 million reduction in property lines, a \$0.5 million reduction in umbrella lines, and \$0.2 million in net reductions in all other lines:

General liability: The \$7.0 million reduction primarily consisted of reductions of \$6.9 million from accident years 2004 through 2008 and 1996 and prior due to continued favorable emergence. Incurred losses for these segments have developed at a rate lower than the Company's historical averages.

Property: The \$1.0 million reduction primarily related to accident year 2009 related to anticipated subrogation on a large equine mortality claim.

Umbrella: The \$0.5 million reduction primarily related to accident years 2008 and 2003 through 2005 primarily due to continued favorable emergence.

Table of Contents**GLOBAL INDEMNITY PLC**

In the first quarter of 2010, the Company reduced its prior accident year loss reserves by \$2.1 million. The reduction consisted of a \$2.0 million reduction in general liability lines and a \$0.6 million reduction in professional liability lines, offset by a \$0.5 million increase in property lines:

General liability: The \$2.0 million reduction primarily related to accident years 2006 and prior and was due to continued favorable emergence on Penn-America business.

Professional liability: The \$0.6 million reduction primarily consisted of net reductions of \$1.0 million related to accident years 2007 and prior for our lawyers and real estate programs due to lower severity than originally anticipated, offset by increases of \$0.4 million related to accident years 2008 and 2009 for our real estate program, where loss development was higher than expected during the quarter.

Property: The \$0.5 million increase primarily consisted of an increase of \$2.4 million primarily related to accident year 2009 due to higher than expected claim development, partially offset by net reductions of \$1.9 million primarily related to accident years 2002 and 2006 through 2008 that were due to a recent large subrogation recovery on a disputed claim.

Net losses and loss adjustment expenses were \$32.8 million for the quarter ended March 31, 2011, compared with \$29.7 million for the quarter ended March 31, 2010, an increase of \$3.1 million or 10.4%. Excluding the \$8.7 million reduction of net losses and loss adjustment expenses for prior accident years in the quarter ended March 31, 2011 and the \$2.1 million reduction of net losses and loss adjustment expenses for prior accident years in the quarter ended March 31, 2010, the current accident year net losses and loss adjustment expenses were \$41.5 million and \$31.8 million for the quarters ended March 31, 2011 and 2010, respectively. This increase is primarily attributable to the increase in net premiums earned, and the factors described above.

Acquisition Costs and Other Underwriting Expenses

Acquisition costs and other underwriting expenses were \$25.2 million for the quarter ended March 31, 2011, compared with \$22.7 million for the quarter ended March 31, 2010, an increase of \$2.5 million or 10.9%. The increase is comprised of a \$2.0 million increase in acquisition costs and a \$0.5 million increase in other underwriting expenses:

The \$2.0 million increase in acquisition costs is primarily due to an increase in commissions resulting mainly from an increase in net earned premiums, a decrease in ceding commission resulting from an increase in retained business and an increase in contingent commissions related primarily to Penn-America business.

The \$0.5 million increase in other underwriting expenses is primarily due to an increase in compensation costs related to underwriting units that were acquired or formed in the middle of 2010 and overall bonus compensation, partially offset by a decrease in employee compensation related to the Profit Enhancement Initiative.

Expense and Combined Ratios

The expense ratio for our Insurance Operations was 46.0% for the quarter ended March 31, 2011, compared with 45.6% for the quarter ended March 31, 2010. The expense ratio is a non-GAAP financial measure that is calculated by dividing the sum of acquisition costs and other underwriting expenses by net premiums earned. The increase in the expense ratio is primarily due to the increase in retained Penn-America business, which has a higher commission ratio than our other business units.

The combined ratio for our Insurance Operations was 105.9% for the quarter ended March 31, 2011, compared with 105.3% for the quarter ended March 31, 2010. The combined ratio is a non-GAAP financial measure and is the sum of our loss and expense ratios. Excluding the \$8.7 million reduction of net losses and loss adjustment expenses for prior accident years in the quarter ended March 31, 2011 and the \$2.1 million reduction of net losses and loss adjustment expenses for prior accident years in the quarter ended March 31, 2010, the combined ratio increased from 109.5% for the quarter ended March 31, 2010 to 121.8% for the quarter ended March 31, 2011. See discussion of loss ratio included in *Net Losses and Loss Adjustment Expenses* above and discussion of expense ratio in preceding paragraph above for an explanation of this increase.

Table of Contents**GLOBAL INDEMNITY PLC*****Income from segment***

The factors described above resulted in income for our Insurance Operations of \$8.5 million for the quarter ended March 31, 2011, compared to a loss of \$2.7 million for the quarter ended March 31, 2010.

Reinsurance Operations

The components of income from our Reinsurance Operations segment and corresponding underwriting ratios are as follows:

(Dollars in thousands)	Quarters Ended March 31,		Increase / (Decrease)	
	2011	2010	\$	%
Gross premiums written	\$ 31,199	\$ 38,782	\$ (7,583)	(19.6%)
Net premiums written	\$ 30,697	\$ 38,003	\$ (7,306)	(19.2%)
Net premiums earned	\$ 21,183	\$ 21,044	\$ 139	0.7%
Losses and expenses:				
Net losses and loss adjustment expenses	25,542	12,075	13,467	111.5%
Acquisition costs and other underwriting expenses	4,674	7,448	(2,774)	(37.2%)

Premiums

Gross premiums written, which represent the amount received or to be received for reinsurance agreements written without reduction for reinsurance costs or other deductions, were \$31.2 million for the quarter ended March 31, 2011, compared with \$38.8 million for the quarter ended March 31, 2010, a decrease of \$7.6 million or 19.6%. The decrease was primarily due to cancellations of non-standard auto and workers compensation treaties in 2011 that were not replaced, offset partially by several new general liability treaties written in 2011.

Net premiums written, which equal gross premiums written less ceded premiums written, were \$30.7 million for the quarter ended March 31, 2011, compared with \$38.0 million for the quarter ended March 31, 2010, a decrease of \$7.3 million or 19.2%. The decrease was primarily due to the decrease of gross premiums written noted above. A significant majority of our reinsurance agreements are not retro-ceded.

The ratio of net premiums written to gross premiums written was 98.4% for the quarter ended March 31, 2011 and 98.0% for the quarter ended March 31, 2010, an increase of 0.4 points.

Net premiums earned were \$21.2 million for the quarter ended March 31, 2011, compared with \$21.0 million for the quarter ended March 31, 2010, an increase of \$0.2 million or 0.7%. Property net premiums earned for the quarters ended March 31, 2011 and 2010 were \$8.3 million and \$8.4 million, respectively. Casualty net premiums earned for the quarters ended March 31, 2011 and 2010 were \$12.9 million and \$12.6 million, respectively.

Net Losses and Loss Adjustment Expenses

The loss ratio for our Reinsurance Operations was 120.6% for the quarter ended March 31, 2011 compared with 57.4% for the quarter ended March 31, 2010. The loss ratio is a non-GAAP financial measure that is generally viewed in the insurance industry as an indicator of underwriting profitability and is calculated by dividing net losses and loss adjustment expenses by net premiums earned.

Table of Contents**GLOBAL INDEMNITY PLC**

The current accident year loss ratio for the quarter ended March 31, 2011 increased 43.4 points from the quarter ended March 31, 2010.

The current accident year property loss ratio increased 117.8 points from 45.1% in the quarter ended March 31, 2010 to 162.9% in the quarter ended March 31, 2011. This increase was primarily due to catastrophe losses of \$3.0 million and \$8.8 million during the first quarter of 2011 related to earthquakes in New Zealand and Japan, respectively. Current accident year property losses for the quarters ended March 31, 2011 and 2010 were \$13.5 million and \$3.8 million, respectively.

The current accident year casualty loss ratio decreased 4.7 points from 71.6% in the quarter ended March 31, 2010 to 66.9% in the quarter ended March 31, 2011. This decrease was primarily due to \$1.0 million in adjustment premiums booked in 2011 on a workers compensation treaty that was not renewed and therefore, had no losses incurred in the 2011 accident year. Losses were recorded related to the adjustment premiums in prior accident years as noted below.

The impact of changes to prior accident years is 16.2 points resulting from an increase in net losses and loss adjustment expenses for prior accident years of \$3.4 million in the quarter ended March 31, 2011 compared to a reduction of net losses and loss adjustment expenses for prior accident years of \$0.8 million in the quarter ended March 31, 2010. When analyzing loss reserves and prior year development, we consider many factors, including the frequency and severity of claims, loss trends, case reserve settlements that may have resulted in significant development, and any other additional or pertinent factors that may impact reserve estimates.

In the first quarter of 2011, the Company increased its prior accident year loss reserves by \$3.4 million, which consisted of a \$2.0 million increase in general liability lines, a \$0.8 million increase in workers compensation lines, and a \$0.6 million increase in auto liability lines:

General liability: The \$2.0 million increase primarily related to accident years 2009 and 2010 due to marine loss emergence that was greater than expected.

Workers compensation: The \$0.8 million increase primarily related to accident years 2009 and 2010 and is the result of expected losses recorded on adjustment premiums recorded in 2011 as discussed above.

Auto liability: The \$0.6 million increase is primarily related to accident years 2009 and 2010 resulting from greater severity on a non-standard auto treaty.

In the first quarter of 2010, the Company reduced its prior accident year loss reserves by \$0.8 million. This reduction is primarily due to a reduction of \$0.8 million in our property lines that is primarily due to a 2009 reinsurance treaty. There were also offsetting adjustments made to our general liability and professional liability lines for accident years 2007 through 2009 that resulted in no net change.

Net losses and loss adjustment expenses were \$25.5 million for the quarter ended March 31, 2011, compared with \$12.1 million for the quarter ended March 31, 2010, an increase of \$13.5 million or 111.5%. Excluding the \$3.4 million increase of net losses and loss adjustment expenses for prior accident years in the quarter ended March 31, 2011 and the \$0.8 million reduction of net losses and loss adjustment expenses for prior accident years in the quarter ended March 31, 2010, the current accident year net losses and loss adjustment expenses increased from \$12.9 million for the quarter ended March 31, 2010 to \$22.1 million for the quarter ended March 31, 2011. This increase is primarily attributable to large catastrophe losses incurred related to the New Zealand and Japan earthquakes as discussed above. Property net premiums earned for the quarters ended March 31, 2011 and 2010 were \$8.3 million and \$8.4 million, respectively. Casualty net premiums earned for the quarters ended March 31, 2011 and 2010 were \$12.9 million and \$12.6 million, respectively.

Table of Contents**GLOBAL INDEMNITY PLC*****Acquisition Costs and Other Underwriting Expenses***

Acquisition costs and other underwriting expenses were \$4.7 million for the quarter ended March 31, 2011, compared with \$7.4 million for the quarter ended March 31, 2010, a decrease of \$2.8 million or 37.2%. The decrease is due to a \$3.1 million decrease in acquisition costs and a \$0.3 million increase in other underwriting expenses:

The \$3.1 million decrease in acquisition costs is primarily due to a decrease in contingent commissions resulting from severe current accident year losses discussed above.

The \$0.3 million increase in other underwriting expenses is primarily due to an increase in compensation related to the hiring of new employees within this business unit.

Expense and Combined Ratios

The expense ratio for our Reinsurance Operations was 22.1% for the quarter ended March 31, 2011, compared with 35.4% for the quarter ended March 31, 2010. The expense ratio is a non-GAAP financial measure that is calculated by dividing the sum of acquisition costs and other underwriting expenses by net premiums earned. The decrease in the expense ratio is primarily due to the decreases in commissions noted above.

The combined ratio for our Reinsurance Operations was 142.7% for the quarter ended March 31, 2011, compared with 92.8% for the quarter ended March 31, 2010. The combined ratio is a non-GAAP financial measure and is the sum of our loss and expense ratios. Excluding the impact of a \$3.4 million increase of net losses and loss adjustment expenses for prior accident years in the quarter ended March 31, 2011 and a \$0.8 million reduction of net losses and loss adjustment expenses for prior accident years in the quarter ended March 31, 2010, the combined ratio increased from 96.4% for the quarter ended March 31, 2010 to 126.5% for the quarter ended March 31, 2011. See discussion of loss ratio included in *Net Losses and Loss Adjustment Expenses* above and discussion of expense ratio in the preceding paragraph above for an explanation of this increase.

Income (loss) from segment

The factors described above resulted in a loss from our Reinsurance Operations of \$9.0 million for the quarter ended March 31, 2011 compared to income of \$1.5 million for the quarter ended March 31, 2010.

Unallocated Corporate Items

The following items are not allocated to our Insurance Operations or Reinsurance Operations segments:

(Dollars in thousands)	Quarters Ended March 31,		Increase / (Decrease)	
	2011	2010	\$	%
Net investment income	\$ 14,414	\$ 14,579	\$ (165)	(1.1%)
Net realized investment gains	11,997	14,204	(2,207)	(15.5%)
Corporate and other operating expenses	(2,780)	(4,896)	(2,116)	(43.2%)
Interest expense	(1,752)	(1,739)	13	0.7%
Income tax expense	(7,591)	(2,069)	5,522	266.9%
Equity in net income (loss) of partnership, net of tax	53	(29)	82	282.8%

Net Investment Income

Net investment income, which is gross investment income less investment expenses, was \$14.4 million for the quarter ended March 31, 2011, compared with \$14.6 million for the quarter ended March 31, 2010, a decrease of \$0.2 million or 1.1%.

Gross investment income, excluding realized gains and losses, was \$15.5 million for the quarter ended March 31, 2011, compared with \$16.0 million for the quarter ended March 31, 2010, a decrease of \$0.5 million or 3.4%. The decrease was primarily due to lower yields on fixed maturities when compared to the corresponding period in 2010.

Edgar Filing: Global Indemnity plc - Form 10-Q

Investment expenses were \$1.1 million for the quarter ended March 31, 2011, compared with \$1.4 million for the quarter ended March 31, 2010, a decrease of \$0.3 million or 26.1%. The decrease is primarily due to trust fee reductions in the current period.

Table of Contents

GLOBAL INDEMNITY PLC

At March 31, 2011, the Company held mortgage-backed securities with a book value of \$322.5 million. Excluding the mortgage-backed securities, the average duration of our fixed maturities portfolio was 2.2 years as of March 31, 2011, compared with 2.5 years as of March 31, 2010. Including cash and short-term investments, the average duration of our investments, excluding mortgage-backed securities, was 2.1 years as of March 31, 2011 compared to 2.3 years as of March 31, 2010. At March 31, 2011, our embedded book yield on our fixed maturities, not including cash, was 3.89% compared with 3.94% at March 31, 2010. The embedded book yield on the \$245.5 million of municipal bonds in our portfolio was 3.61% at March 31, 2011, compared to an embedded book yield of 3.81% on our municipal bond portfolio of \$200.3 million at March 31, 2010.

Net Realized Investment Gains

Net realized investment gains were \$12.0 million and \$14.2 million for the quarters ended March 31, 2011 and 2010, respectively. The net realized investment gains for the quarters ended March 31, 2011 and 2010 consist entirely of net gains relative to our fixed maturities and equity portfolios.

See Note 4 of the notes to the consolidated financial statements in Item 1 of Part I of this report for an analysis of total investment return on an after-tax basis for the quarters ended March 31, 2011 and 2010.

Corporate and Other Operating Expenses

Corporate and other operating expenses consist of outside legal fees, other professional fees, directors' fees, management fees, salaries and benefits for holding company personnel, development costs for new products, and taxes incurred which are not directly related to operations. Corporate and other operating expenses were \$2.8 million for the quarter ended March 31, 2011, compared with \$4.9 million for the quarter ended March 31, 2010, a decrease of \$2.1 million or 43.2%. The decrease is primarily due to cost savings resulting from our previously disclosed Profit Enhancement Initiative.

Interest Expense

Interest expense was \$1.8 million and \$1.7 million for the quarters ended March 31, 2011 and 2010, respectively. See Note 11 of the notes to the consolidated financial statements in Item 8 of Part II of our 2010 Annual Report on Form 10-K for details on our debt.

Income Tax Expense

Income tax expense was \$7.6 million and \$2.1 million for the quarters ended March 31, 2011 and 2010, respectively. See Note 7 of the notes to the consolidated financial statements in Item 1 of Part I of this report for a comparison of income tax expense between periods.

Equity in Net Income (Loss) of Partnerships

Equity in net income (loss) of partnerships, net of tax was income of \$0.05 million and a loss of \$0.03 million for the quarters ended March 31, 2011 and 2010, respectively, an increase of \$0.08 million.

Net Income

The factors described above resulted in net income of \$13.8 million and \$18.9 million for the quarters ended March 31, 2011 and 2010, respectively, a decrease of \$5.1 million or 27.1%.

Table of Contents

GLOBAL INDEMNITY PLC
Liquidity and Capital Resources

Sources and Uses of Funds

Global Indemnity is a holding company. Its principal asset is its ownership of the shares of its direct and indirect subsidiaries, including those of its Insurance Operations: United National Insurance Company, Diamond State Insurance Company, United National Specialty Insurance Company, United National Casualty Insurance Company, Penn-America Insurance Company, Penn-Star Insurance Company, and Penn-Patriot Insurance Company; and its Reinsurance Operations: Wind River Reinsurance.

The principal source of cash that Global Indemnity, Global Indemnity Group, Inc. and AIS need to meet their short term and long term liquidity needs, including the payment of corporate expenses, includes dividends and other permitted disbursements from their direct and indirect subsidiaries and reimbursement for equity awards granted to employees. The principal sources of funds at these direct and indirect subsidiaries include underwriting operations, investment income, and proceeds from sales and redemptions of investments. Funds are used principally by these operating subsidiaries to pay claims and operating expenses, to make debt payments, to purchase investments, and to make dividend payments. The future liquidity of Global Indemnity, Global Indemnity Group, Inc. and AIS is dependent on the ability of their subsidiaries to pay dividends. Currently, Global Indemnity, Global Indemnity Group, Inc. and AIS have no planned capital expenditures that could have a material impact on their short-term or long-term liquidity needs.

The U.S. Insurance Companies are restricted by statute as to the amount of dividends that they may pay without the prior approval of regulatory authorities. The U.S. Insurance Companies may pay dividends without advance regulatory approval only out of unassigned surplus. For 2011, the maximum amount of distributions that could be paid by the United National Insurance Companies and Penn-America Insurance Companies as dividends under applicable laws and regulations without regulatory approval is approximately \$42.4 million and \$21.4 million, respectively. The Penn-America Insurance Companies limitation includes \$7.0 million that would be distributed to United National Insurance Company or its subsidiary Penn Independent Corporation based on the December 31, 2010 ownership percentages. The U.S. Insurance Companies did not declare or pay any dividends during the quarter ended March 31, 2011.

For 2011, we believe that Wind River Reinsurance, including distributions it could receive from its subsidiaries, should have sufficient liquidity and solvency to pay dividends. Wind River Reinsurance is prohibited, without the approval of the Bermuda Monetary Authority (BMA), from reducing by 15% or more its total statutory capital as set out in its previous year s statutory financial statements, and any application for such approval must include such information as the BMA may require. Based upon the total statutory capital plus the statutory surplus as set out in its 2010 statutory financial statements that will be filed with the BMA in 2011, we believe Wind River Reinsurance could pay a dividend in 2011 of up to \$248.5 million without requesting BMA approval.

Cash Flows

Sources of operating funds consist primarily of net premiums written and investment income. Funds are used primarily to pay claims and operating expenses and to purchase investments.

Our reconciliation of net income to cash provided from operations is generally influenced by the following:

the fact that we collect premiums, net of commissions, in advance of losses paid;

the timing of our settlements with our reinsurers; and

the timing of our loss payments.

Table of Contents**GLOBAL INDEMNITY PLC**

Net cash provided by (used for) operating activities was \$7.2 million and (\$10.8) million for the quarter ended March 31, 2011 and 2010, respectively. The increase in operating cash flows of approximately \$18.1 million from the prior year was primarily a net result of the following items:

(Dollars in thousands)	Quarter Ended March 31,		Change
	2011	2010	
Net premiums collected	\$ 72,103	\$ 65,078	\$ 7,025
Net losses paid	(43,727)	(44,246)	519
Acquisition costs and other underwriting expenses	(34,739)	(45,044)	10,305
Net investment income	15,884	16,312	(428)
Net federal income taxes recovered	580	190	390
Interest paid	(3,123)	(3,123)	
Other	266	(6)	272
Net cash provided by (used for) operating activities	\$ 7,244	\$ (10,839)	\$ 18,083

See the consolidated statement of cash flows in the consolidated financial statements in Item 1 of Part I of this report for details concerning our investing and financing activities.

Liquidity

There have been no significant changes to our liquidity during the quarter ended March 31, 2011. Please see Item 7 of Part II in our 2010 Annual Report on Form 10-K for information regarding our liquidity.

Capital Resources

There have been no significant changes to our capital resources during the quarter ended March 31, 2011. Please see Item 7 of Part II in our 2010 Annual Report on Form 10-K for information regarding our capital resources.

Off Balance Sheet Arrangements

We have no off balance sheet arrangements other than the Trust Preferred Securities and floating rate common securities discussed in the Liquidity and Capital Resources sections in Item 7 of Part II of our 2010 Annual Report on Form 10-K.

Cautionary Note Regarding Forward-Looking Statements

Some of the statements under Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this report may include forward-looking statements that reflect our current views with respect to future events and financial performance that are intended to be covered by the safe harbor for forward-looking statements provided by the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements that are not historical facts. These statements can be identified by the use of forward-looking terminology such as believe, expect, may, will, should, project, plan, seek, intend, or anticipate or comparable terminology, and include discussions of strategy, financial projections and estimates and their underlying assumptions, statements regarding plans, objectives, expectations or consequences of identified transactions, and statements about the future performance, operations, products and services of the companies, including statements regarding projected annual savings and costs resulting from the Profit Enhancement Initiative. Our business and operations are and will be subject to a variety of risks, uncertainties and other factors. Consequently, actual results and experience may materially differ from those contained in any forward-looking statements. Such risks, uncertainties and other factors that could cause actual results and experience to differ from those projected include, but are not limited to, the following: (1) the ineffectiveness of our business strategy due to changes in current or future market conditions; (2) the effects of competitors' pricing policies, and of changes in laws and regulations on competition, including industry consolidation and development of competing financial products; (3) greater frequency or severity of claims and loss activity than our underwriting, reserving or investment practices have anticipated; (4) decreased level of demand for our insurance products or increased competition due to an increase in capacity of

property and casualty insurers; (5) risks inherent in establishing loss and loss adjustment expense reserves; (6) uncertainties relating to the financial ratings of our insurance subsidiaries; (7) uncertainties arising from the cyclical nature of our business; (8) changes in our relationships with, and the capacity of, our general agents, brokers, insurance companies and reinsurance companies from which we derive our business; (9) the risk that our reinsurers may not be able to fulfill obligations; (10) investment performance and credit risk; (11) risks associated with our completed re-domestication to Ireland, which may include encountering difficulties moving jurisdictions and opening new offices and functions, tax and financial expectations and advantages not materializing or changing, our stock price could decline, and Irish corporate governance and regulatory schemes could prove different or more challenging than currently expected; (12) new tax legislation or interpretations that could lead to an increase in our tax burden; (13) uncertainties relating to governmental and regulatory policies, both domestically and internationally; (14) foreign currency fluctuations; (15) impact of catastrophic events; (16) estimates of the projected annual savings and costs for the Profit Enhancement Initiative, which we made based on information available at the time the charges were recorded; (17) our subsidiaries' ability to pay dividends; and (18) uncertainties relating to ongoing or future litigation matters.

Table of Contents**GLOBAL INDEMNITY PLC**

The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are set forth in Risk Factors in Item 1A and elsewhere in our 2010 Annual Report on Form 10-K. Our forward-looking statements speak only as of the date of this report or as of the date they were made. We undertake no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

During the first quarter of 2011, positive economic fundamentals led to growing optimism over recovery in the United States throughout much of the quarter. However, geopolitical instability and events in Japan later weighed on investors. Despite this late quarter sell-off due to fallout from the earthquake in Japan, all risk segments in the fixed income market outperformed duration-equivalent government bonds. An accommodative Federal policy and steep yield curve drove investors to search for yield in the riskiest parts of the fixed income markets. High yield outperformed and within the securitized sectors, commercial mortgage-backed securities also benefitted from continued investor demand.

The investment grade fixed income portfolio continues to maintain high quality with an AA average rating, and a low duration of 2.7 years. Portfolio purchases were focused on high quality credit and U.S. mortgage backed securities (MBS). These purchases were funded primarily through portfolio sales consisting of U.S. Treasuries and U.S. Agencies.

During the quarter, the portfolio allocation to U.S. mortgages was increased. The supply/demand technicals for U.S. agency are more favorable than U.S. Treasuries. The supply for U.S. Treasuries is projected to rise dramatically as U.S. budget deficits increase, whereas U.S. agency MBS supply will decline over time.

On January 31, 2011, \$10.0 million was allocated to an Asian Consumption equity strategy. This allocation was made to take advantage of potential attractive long term total returns by investing in companies which benefit from increasing levels of consumption expenditure in the Asia ex Japan region.

There have been no other significant changes to our market risk since December 31, 2010. Please see Item 7A of Part II in our 2010 Annual Report on Form 10-K for information regarding our market risk.

Item 4. CONTROLS AND PROCEDURES**Evaluation of Disclosure Controls and Procedures**

The Company maintains disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to ensure that information required to be disclosed in the Company s reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms, and that such information is accumulated and communicated to the Company s management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. The Company s management, with the participation of the Company s Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of the Company s disclosure controls and procedures as of March 31, 2011. Based upon that evaluation and subject to the foregoing, the Company s Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2011, the design and operation of the Company s disclosure controls and procedures were effective to accomplish their objectives at the reasonable assurance level.

Changes in Internal Controls

During the quarter ended March 31, 2011 there have been no changes in our internal controls over financial reporting (as defined in Rules 13a-15(f) under the Exchange Act) that occurred that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

GLOBAL INDEMNITY PLC
PART II-OTHER INFORMATION

Item 1. Legal Proceedings

We are, from time to time, involved in various legal proceedings in the ordinary course of business, including litigation regarding claims. There is a greater potential for disputes with reinsurers who are in a runoff of their reinsurance operations. Some of our reinsurers are in a runoff of their reinsurance operations, and therefore, we closely monitor those relationships. We do not believe that the resolution of any currently pending legal proceedings, either individually or taken as a whole, will have a material adverse effect on our business, consolidated financial position or results of operations. We anticipate that, similar to the rest of the insurance and reinsurance industry, we will continue to be subject to litigation and arbitration proceedings in the ordinary course of business.

On December 4, 2008, a federal jury in the U.S. District Court for the Eastern District of Pennsylvania (Philadelphia) returned a \$24.0 million verdict in favor of United National Insurance Company (United National), an indirect wholly owned subsidiary of the Company, against AON Corp., an insurance and reinsurance broker. On July 24, 2009, a federal judge from the U.S. District Court for the Eastern District of Pennsylvania (Philadelphia) upheld that jury verdict. In doing so, the U.S. District Judge increased the verdict to \$32.2 million by adding more than \$8.2 million in prejudgment interest. AON filed its Notice of Appeal and a Bond in the amount of \$33.0 million. Oral arguments were heard by the Appellate Court on October 26, 2010. In January, 2011, we settled with AON for \$16.3 million. We realized approximately \$7.5 million, net of income taxes and attorney's fees.

Item 1A. Risk Factors

Our results of operations and financial condition are subject to numerous risks and uncertainties described in Item 1A of Part I in our 2010 Annual Report on Form 10-K, filed with the SEC on March 16, 2011. The risk factors identified therein have not materially changed.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Our Share Incentive Plan allows employees to surrender our Class A ordinary shares as payment for the tax liability incurred upon the vesting of restricted stock that was issued under the Plan. There were 5,859 shares purchased from our employees during the quarter ended March 31, 2011. All Class A ordinary shares purchased from employees by us are held as treasury stock and recorded at cost.

The following table provides information with respect to the Class A ordinary shares that were surrendered or repurchased during the quarter ended March 31, 2011:

Period (1)	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plan or Program (2)
January 1-31, 2011	1,280(3)	\$ 21.00		\$
February 1-28, 2011	4,579(3)	\$ 20.69		\$
March 1-31, 2011	504(3)	\$ 21.19		\$
Total	6,363	\$ 20.79		N/A

(1) Based on settlement date.

(2) Approximate dollar value of shares is as of the last date of the applicable month.

(3) Surrendered by employees as payment of taxes withheld on the vesting of restricted stock.

Item 5. Other Information

None.
