BITSTREAM INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

All references to Bitstream, we, us, our, or Company refer to Bitstream Inc. and its subsidiaries. Except as otherwise noted, all reported dollar amounts are in thousands.

(1) Operations and Significant Accounting Policies

The Company is a software development company focused on bringing unique software products to a wide variety of markets. Our core software products include award-winning fonts and font rendering technologies, mobile browsing and messaging technologies, variable data publishing and web-to-print technologies, and multi-channel communications technologies.

The Company is subject to risks common to technology-based companies, including dependence on key personnel, rapid technological change, competition from alternative product offerings and larger companies, and challenges to the development and marketing of commercial products and services. The Company has also experienced net losses in the current year, as well as prior years, and as of September 30, 2010 has an accumulated deficit of approximately \$18.7 million. For a complete discussion of our business risks, see the Risk Factors under Part I, Item 1A, beginning on page 18 of the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

(a) Use of Estimates

The accompanying condensed consolidated financial statements reflect the application of certain accounting policies as described in this note and elsewhere in the accompanying condensed consolidated financial statements and notes. The preparation of the accompanying condensed consolidated financial statements requires the use of certain estimates by us in determining our assets, liabilities, revenues and expenses. Significant estimates in these financial statements include revenue recognition, valuation of intangible assets, share-based compensation, income taxes and the valuation of deferred tax assets, and the allowance for doubtful accounts receivable. Actual results may differ from these estimates.

(b) Basis of Presentation

Our unaudited condensed consolidated financial statements presented herein have been prepared pursuant to the rules of the Securities and Exchange Commission (the SEC) for quarterly reports on Form 10-Q and do not include all of the information and footnote disclosures required by generally accepted accounting principles (GAAP). The balance sheet information as of December 31, 2009 has been derived from our audited consolidated financial statements but does not include all disclosures required by GAAP. These statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended December 31, 2009 included in our Annual Report on Form 10-K, which was filed with the SEC on March 31, 2010. The condensed consolidated balance sheet as of September 30, 2010, the condensed consolidated statements of operations for the three and nine months ended September 30, 2010 and 2009, and the condensed consolidated statement of cash flows for the nine months ended September 30, 2010 and 2009, and the notes to each are unaudited, but in the opinion of management include all adjustments necessary for a fair presentation of the condensed consolidated financial position, results of operations, and cash flows of the Company for these interim periods. The results of operations for the nine months ended September 30, 2010 may not necessarily be indicative of the results to be expected for the year ending December 31, 2010.

Certain prior year amounts have been reclassified to conform with the current year's presentation. The Company evaluated subsequent events through November 15, 2010 to determine whether or not any such events required disclosure in this Form 10-Q, and determined that no such subsequent event has occurred.

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****(c) Property and Equipment***

Property and equipment are stated at cost, less accumulated depreciation and amortization. Property and equipment consists of the following:

	September 30, 2010	December 31, 2009
Equipment and computer software	\$ 1,992	\$ 1,914
Purchased software	437	425
Furniture and fixtures	612	586
Leasehold improvements	100	88
	3,141	3,013
Less Accumulated depreciation and amortization	2,519	2,370
Property and equipment, net	\$ 622	\$ 643

Depreciation expense for the three months ended September 30, 2010 and 2009 was \$80 and \$66, respectively. Depreciation expense for the nine months ended September 30, 2010 and 2009 was \$213 and \$208, respectively.

During the three and nine months ended September 30, 2010, we disposed of \$52 and \$65 of property and equipment with accumulated depreciation of \$52 and \$64 resulting in a loss on disposal of \$1 for the nine months ended September 30, 2010. The assets were no longer in service.

(d) Off-Balance Sheet Risk and Concentration of Credit Risk

Financial instruments that potentially expose the Company to concentrations of credit risk consist primarily of cash and cash equivalents, investments in marketable securities, and trade accounts receivable. The Company places a majority of its cash and cash equivalents in one highly-rated financial institution and holds its marketable securities in a custodial account at another highly-rated financial institution. The Company had not experienced significant losses related to receivables from any individual customers or groups of customers in any specific industry or by geographic area prior to January 2009. During 2009, we established reserves for certain customers affected by the economic downturn and increased our allowance for doubtful accounts from \$32 at December 31, 2008 to \$283 at December 31, 2009. During the three and nine month periods ended September 30, 2010 the Company wrote-off approximately \$1 and \$230, respectively, of the reserved accounts. The Company evaluated its accounts receivable balance at September 30, 2010 and determined that its allowance for bad debts of \$25 was adequate. Due to these factors, no additional credit risk beyond amounts provided for collection losses is believed by us to be inherent in our accounts receivable. At September 30, 2010, two customers accounted for 51% and 15% of our accounts receivable, respectively. At December 31, 2009, two customers accounted for 27% and 24% of our accounts receivable, respectively. We do not have any off-balance sheet risks as of September 30, 2010 or December 31, 2009. One customer accounted for 10% of our revenue for the three month period ended September 30, 2010. For the three months ended September 30, 2010 and for the three and nine month periods ended September 30, 2009, no single customer accounted for 10% or more of our revenue.

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****(e) Comprehensive Income (Loss)***

Comprehensive income (loss) consists of net income (loss) and adjustments to stockholders' equity for unrealized gains from investments in marketable securities classified as available-for-sale. For purposes of comprehensive income (loss) disclosures, the Company does not record tax provisions or benefits for unrealized gains or losses on investments in marketable securities as we have recorded a full valuation allowance against our deferred tax assets and are not currently recording a tax liability.

The components of comprehensive income (loss) are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net income (loss)	\$ (1,174)	\$ 519	\$ (2,257)	\$ 685
Unrealized gain on investments in marketable securities, net	192		385	
Foreign currency adjustment, net of tax of \$0		(2)		(11)
Total comprehensive income (loss)	\$ (982)	\$ 517	\$ (1,872)	\$ 674

Accumulated other comprehensive income (loss) consisted of the following:

	September 30, 2010	December 31, 2009
Unrealized gain on investments in marketable securities, net	\$ 385	\$
Foreign currency translation		(30)
Other comprehensive income (loss)	\$ 385	\$ (30)

(f) Recently Issued Accounting Standards

The Company reviews and evaluates recent pronouncements that have had or may have a significant effect on our financial statements. The Company has not included a discussion of recent pronouncements below as none are anticipated to have an impact on or are unrelated to our financial condition, results of operations, or disclosures.

Table of Contents

BITSTREAM INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(g) Fair Value of Financial Instruments

The fair value measurement rules establish a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

Under authoritative guidance fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This guidance also establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs, where available, and minimize the use of unobservable inputs when measuring fair value.

This guidance describes three levels of inputs that may be used to measure fair value:

- Level 1 Quoted prices in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset and liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

At December 31, 2009, the Company's financial assets and liabilities that were measured at fair value on a recurring basis included money market funds of \$10, short-term investments in certificates of deposit of \$114, and a restricted investment long-term of \$136, which were Level 1 financial assets. As required by authoritative guidance, assets and liabilities measured at fair value are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability. The adoption of this guidance for non-financial assets and liabilities did not have a material impact on our consolidated financial position, results of operations or cash flows.

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Assets and liabilities of the Company measured at fair value on a recurring basis are summarized as follows as of September 30, 2010:

Description	September 30, 2010	Fair Value Measurements at Reporting Date Using Quoted Prices		
		in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Money market funds	\$ 642	\$ 642	\$	\$
Certificates of deposit	250	250		
Government bonds	1,230	1,230		
Corporate bonds	6,588	6,588		
Total assets	\$ 8,710	\$ 8,710	\$	\$

Cash equivalents are short-term, highly liquid investments with original maturity dates of three months or less at the date of acquisition. Cash equivalents are carried at cost plus accrued interest, which approximates fair value. The Company's investments in marketable securities, corporate and government bonds, are classified as available-for-sale and are recorded at fair value with any unrealized gain or loss recorded as an element of stockholders' equity. Purchased interest is included in interest receivable and reported as other current assets in our condensed consolidated balance sheet. The amortized cost of debt securities in this category is adjusted for amortization of premiums and accretion of discounts to maturity. Such amortization and accretion is included in interest and other income, net of expense. The cost of securities sold is based on the specific identification method. Interest and dividends on securities classified as available-for-sale are included in interest and other income, net of expense. The fair value of investments in marketable securities is determined based on quoted market prices at the reporting date for those instruments.

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****(h) Foreign Currency Translation and Transactions***

Transaction gains (losses) for the three months ended September 30, 2010 and 2009 were \$(25) and \$18, respectively, and for the nine months ended September 30, 2010 and 2009 were \$(29) and \$45, respectively. Transaction gains were recorded as interest and other income, net in the condensed consolidated statements of operations.

(2) Cash, Cash Equivalents and Investments in Marketable Securities

Our investments in marketable securities, corporate and government bonds, are classified as available-for-sale and are recorded at fair value with any unrealized gain or loss recorded as an element of stockholders' equity. Purchased interest is included in interest receivable and reported as other current assets in our condensed consolidated balance sheet. The amortized cost of debt securities in this category is adjusted for amortization of premiums and accretion of discounts to maturity. Such amortization and accretion is included in interest and other income, net. The cost of securities sold is based on the specific identification method. Interest and dividends on securities classified as available-for-sale are included in interest and other income, net. As of September 30, 2010 and December 31, 2009, aggregate cash and cash equivalents and investments in marketable securities consisted of:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Market Value
September 30, 2010:				
Cash and cash equivalents	\$ 4,677	\$	\$	\$ 4,677
Government bonds	1,180	50		1,230
Corporate bonds	6,253	339	(4)	6,588
Short-term investments - certificate of deposit	114			114
Restricted investment - long-term	136			136
Total	\$ 12,360	\$ 389	\$ (4)	\$ 12,745
December 31, 2009:				
Cash and cash equivalents	\$ 17,915	\$	\$	\$ 17,915
Short-term investments - certificate of deposit	114			114
Restricted investment - long-term	136			136
Total	\$ 18,165	\$	\$	\$ 18,165

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(3) Acquisition**

On June 3, 2010, the Company completed the acquisition of certain of the assets of Press-sense Ltd. (Press-sense) pursuant to terms of a Purchase and Sale Agreement dated May 31, 2010 by and among the Company, Bitstream Israel Ltd., a wholly-owned subsidiary of the Company organized under the Laws of the State of Israel and the court appointed Special Manager of Press-sense Ltd., an Israeli company in temporary liquidation under the supervision of the District Court of Haifa. The purchase price of \$6,528, including \$28 of VAT, was paid in cash. Assets purchased include all Press-sense software and know-how and related intellectual property rights (both source code and object code), some fixed and tangible assets, and all trademarks, transferable licenses and customer data. No liabilities were acquired in the transaction.

The results of operations of the Press-sense assets have been included in the condensed consolidated financial statements since June 3, 2010. Press-sense was a developer of print industry business flow automation systems. The Press-sense business will complement and expand Bitstream's Pageflex product line of enterprise brand management and web-to-print solutions to create one of the most robust end-to-end offerings of business management tools available in the marketing and print industries. By fully automating the creation, production, and back-office processes for document orders, Bitstream will provide the tools to enable its customers to maximize production efficiency, monitor and reduce costs, and increase profits.

The acquisition was accounted for using the purchase method of accounting in accordance with appropriate standards. The allocation of the purchase price is preliminary and is subject to adjustment. The Company expects to finalize the purchase accounting in the period ending December 31, 2010. The following table summarizes the preliminary allocation of the purchase price of \$6,528:

Total consideration – cash paid	\$ 6,528
Allocation of the purchase consideration	
VAT tax receivable	\$ 28
Fixed assets	80
Identifiable intangible assets	3,610
Goodwill	2,810
Total assets acquired	\$ 6,528

Goodwill was recognized for the excess purchase price over the fair value of the assets acquired. Goodwill is primarily attributable to the expected growth from synergies related to the integration of Press-sense assets acquired with the Company's Pageflex publishing software. Goodwill from the acquisition of Press-sense Ltd. assets will be included within the Company's one reporting unit and will be included in the Company's enterprise-level annual review for impairment. Goodwill is deductible for tax purposes.

The following table reflects the fair value of the acquired identifiable intangible assets and related estimates of useful lives:

	Fair Value	Useful life (Years)
Developed product technology	\$ 1,410	7.5
Customer relationships	2,200	11.5

Total	\$ 3,610
-------	----------

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents the pro forma results of the historical condensed consolidated statements of operations of the Company and Press-sense Ltd. for the three and nine month periods ended September 30, 2010 and September 30, 2009, giving effect to the merger as if it occurred on January 1, 2010 and 2009:

	Three Months Ended		Nine Months Ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Pro forma revenue	\$ 5,982	\$ 7,987	\$ 18,752	\$ 21,395
Pro forma net income (loss)	\$ (1,174)	\$ 11	\$ (3,770)	\$ (2,745)
Pro forma loss per share:				
Basic and Diluted	\$ (0.12)	\$	\$ (0.38)	\$ (0.28)
Pro forma shares outstanding:				
Basic	9,921	9,799	9,878	9,770
Diluted	9,921	10,248	9,878	9,770

The pro forma net loss and loss per share for each period presented primarily includes adjustments for amortization of intangibles, depreciation, interest income, and income taxes. This pro forma information does not purport to indicate the results that would have actually been obtained had the acquisition been completed on the assumed date, or which may be realized in the future.

(4) Goodwill & Other Intangible Assets**Goodwill**

Goodwill resulted from the acquisitions of Type Solutions, Inc. and Alaras Corporation, as well as the purchase of certain assets from Press-sense Ltd. on June 3, 2010. Goodwill was \$3,537 and \$727 at September 30, 2010 and December 31, 2009, respectively. The change in the carrying amount of goodwill for the nine months ended September 30, 2010 is as follows:

Balance January 1, 2010	\$ 727
Goodwill related to the purchase of assets from Press-sense Ltd.	2,810
Balance September 30, 2010	\$ 3,537

The Company follows the accounting and reporting requirements for goodwill and other intangible assets as required by authoritative standards. Under these standards, goodwill is not amortized, but is required to be reviewed annually for impairment, or more frequently if impairment indicators arise. The Company has determined that it does not have separate reporting units and thus goodwill is tested for impairment based upon an enterprise wide valuation. The Company has not recorded any impairment charges related to goodwill since the time of the change to the authoritative guidance which called for goodwill to be reviewed for impairment based on the results of impairment tests rather than amortized.

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Other Intangible Assets***

The carrying amounts of other intangible assets were \$3,561 and \$78 as of September 30, 2010 and December 31, 2009, respectively. Intangible assets acquired in a business combination are recorded under the purchase method of accounting at their estimated fair values at the date of acquisition. The Company amortizes other intangible assets over their estimated useful lives on a straight-line basis. Marketing-related intangibles have useful lives of five to eight years. Technology-based intangible assets have useful lives of five to twelve years. The weighted average useful life of other intangible assets is 9 years. The components of the Company's amortized intangible assets follow:

	September 30, 2010		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Marketing-related	\$ 2,292	\$ (146)	\$ 2,146
Technology-based	2,048	(633)	1,415
Total	\$ 4,340	\$ (779)	\$ 3,561

	December 31, 2009		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Marketing-related	\$ 85	\$ (81)	\$ 4
Technology-based	623	(549)	74
Total	\$ 708	\$ (630)	\$ 78

Amortization expense for marketing-related intangible assets included in marketing and selling expense for the three months ended September 30, 2010 and 2009 was \$48 and \$0, respectively. Amortization expense for technology-related intangible assets included as cost of revenue for the three months ended September 30, 2010 and 2009 was \$47 and \$0, respectively. Amortization expense for intangible assets included as general and administrative expense for the three months ended September 30, 2010 and 2009 was \$7. Amortization expense for marketing-related intangible assets included in marketing and selling expense for the nine months ended September 30, 2010 and 2009 was \$64 and \$0, respectively. Amortization expense for technology related intangible assets included as cost of revenue for the nine months ended September 30, 2010 and 2009 was \$63 and \$0, respectively. Amortization expense for intangible assets included in general and administrative expense for the nine months ended September 30, 2010 and 2009 was \$22 and \$21, respectively. Estimated amortization for succeeding years is as follows:

Estimated Amortization Expense:	
2010, remaining	\$ 198
2011	509
2012	502
2013	494
2014	489
Thereafter	1,369

Total	\$ 3,561
-------	----------

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(5) Income Per Share**

Basic income or loss per share is determined by dividing net income or loss by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share reflect the effect of the conversion of potentially dilutive securities, such as stock options, warrants, and restricted shares, based on the treasury stock method. A reconciliation of basic and diluted weighted average shares outstanding for basic and diluted earnings per share is as follows:

	Three Months		Nine Months Ended	
	Ended		September 30,	
	September 30,	September 30,	September 30,	September 30,
	2010	2009	2010	2009
Basic weighted average shares outstanding	9,921	9,799	9,878	9,770
Dilutive effect of options		435		401
Dilutive effect of unvested restricted shares		14		8
Shares used to compute diluted net income per share	9,921	10,248	9,878	10,179

In computing diluted earnings per share, common stock equivalents are not considered in periods in which a net loss is reported, as the inclusion of the common stock equivalents would be antidilutive. As a result there is no difference between the Company's basic and diluted loss per share for the three and nine month periods ended September 30, 2010. If the Company had reported a profit for the three and nine month periods ended September 30, 2010, the potential common shares would have increased the weighted average shares outstanding by 549 and 631 shares, respectively. In addition, there were unvested restricted shares and options outstanding to purchase 636 and 490 shares, respectively, for the three and nine month periods ended September 30, 2010 and 439 and 698 shares for the three and nine month periods ended September 30, 2009, respectively, that were not included in the potential common share computations because their exercise prices were greater than the market price of the Company's common stock. These common stock equivalents are antidilutive even when a profit is reported in the numerator.

(6) Equity-Based Compensation Expense

The Company accounts for stock-based compensation in accordance with authoritative guidance and has elected the modified prospective method, under which, stock based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense on a straight-line basis over the requisite service period, which is the vesting period.

The Company currently estimates the fair value of stock options using the Black-Scholes valuation model. Key input assumptions used to estimate the fair value of stock options include the exercise price of the award, the expected option term, the expected volatility of its stock over the option's expected term, the risk-free interest rate over the option's expected term, and its expected annual dividend yield. The Company does not anticipate paying any cash dividends in the foreseeable future and therefore uses an expected dividend yield of zero in the option valuation model. The Company is required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. The Company uses historical data to estimate pre-vesting option forfeitures and record stock-based compensation expense only for those awards that are expected to vest. The Company believes that the valuation technique and the approach utilized to develop the underlying assumptions are appropriate in calculating the fair values of our stock options. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by persons who receive equity awards. These amounts, and the amounts applicable to future quarters, are also subject to future quarterly adjustments based upon a variety of factors, which include but are not limited to, the issuance of new share-based awards.

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table summarizes the weighted average assumptions we utilized for grants of share-based awards during the three and nine months ended September 30, 2010 and 2009:

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2.0%	2009	2010	2.0%	2009
Risk-free interest rates	1.0%	2.0%	2.8%	1.0%	2.0%	2.8%
Expected dividend yield	None		None		None	
Expected term	6.2 Years		6.07 Years		6.07 Years	
Expected volatility	65.9%		73.7%		73.7%	

All options granted have a contractual ten-year term. All options granted prior to January 1, 2006 vested in equal installments on the first, second, and third year anniversaries over a three year period of continuous employee service. All options granted subsequent to January 1, 2006 vest in equal installments on the first, second, third, and fourth year anniversaries over a four year period of continuous employee service. All restricted stock awards made prior to January 1, 2010 vest in equal installments on the first, second, third, fourth and fifth year anniversaries over a five year period of continuous employee service. All restricted stock awards made subsequent to January 1, 2010 vest in 20 equal installments on the quarterly anniversaries from the date of grant over a five-year period. The risk-free interest rate utilized is based upon published U.S. Treasury yield curves at the date of the grant for the expected option term. Expected stock price volatility is based upon the historical volatility of our common stock price over the expected term of the option. We use historical exercise, forfeiture, and cancellation information to determine expected term and forfeiture rates.

The Company's results for the three months ended September 30, 2010 and 2009 include \$293 and \$216, respectively, and for the nine months ended September 30, 2010 and 2009 include \$778 and \$616, of share-based compensation within the applicable expense classification where it reports the share-based award holders' compensation expense.

The following table presents share-based compensation expense included in the Company's condensed consolidated statement of operations:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Cost of revenue-software licenses	\$ 1	\$ 1	\$ 3	\$ 3
Cost of revenue-services	10	19	47	56
Marketing and selling	5	10	30	36
Research and development	91	87	281	248
General and administrative	186	99	417	273
	\$ 293	\$ 216	\$ 778	\$ 616

Table of Contents

BITSTREAM INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(7) Commitments and Contingencies,

Lease commitments

The Company conducts its operations in leased facilities. In June 2009, the Company entered into a ten-year lease agreement for 27,000 square feet of office space with the right of first refusal on an additional 4,000 square feet in a building located in Marlborough, Massachusetts. This lease agreement commenced September 1, 2009 and obligates us to make minimum lease payments plus our pro-rata share of future real estate tax increases and certain operating expense increases above the base year. The lease payments began after three (3) rent-free months and increase by approximately 2% per annum. The remaining commitment under the lease at September 30, 2010 is approximately \$4,979. The Company records rent expense on a straight-line basis, taking into consideration the free rent period, the tenant allowance received at the outset of the lease, and annual incremental increases to the lease payments. The Company's current lease agreement also requires it to maintain a Letter of Credit in the amount of \$136 through October 31, 2019, which the Company collateralized with a certificate of deposit classified as a long-term restricted asset on the condensed consolidated balance sheet.

In July 2008, Bitstream India Pvt. Ltd., our wholly-owned subsidiary, entered into a 33-month lease agreement in Nodia, India. This lease agreement commenced May 1, 2008 and obligates the Company to make monthly payments including service taxes. The remaining commitment at September 30, 2010 is approximately \$28.

Royalties

The Company has certain royalty commitments associated with the shipment and licensing of certain products. Royalty expense is primarily based on a dollar amount per unit shipped or a percentage of the underlying revenue. Royalty expense is recorded under our cost of software license revenue on the condensed consolidated statement of operations.

Indemnification Agreements

The Company enters into standard indemnification agreements in the ordinary course of business. Pursuant to these agreements, the Company indemnifies, holds harmless, and agrees to reimburse the indemnified party for losses suffered or incurred by the indemnified party, generally business partners or customers, in connection with any U.S. patent, copyright or other intellectual property infringement claim by any third party with respect to its products. The term of these indemnification agreements is generally perpetual after execution of the agreement. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited. The Company has never incurred costs to defend lawsuits or settle claims related to these indemnification agreements. As a result, we believe the estimated fair value of these agreements is minimal.

Legal Actions

From time to time, the Company is subject to legal proceedings and claims in the ordinary course of business, including claims of infringement of third-party patents and other intellectual property rights, and claims involving commercial, employment and other matters. In accordance with generally accepted accounting principles, the Company makes a provision for a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. This provision is reviewed at least quarterly. As of September 30, 2010, there are no material pending legal proceedings to which we are a party, and no liability was recorded. Litigation is inherently unpredictable and it is possible that the Company's financial position, cash flows, or results of operations could be materially affected in any particular period by the resolution of any such contingencies or the costs involved in seeking the resolution of any such contingencies.

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(8) Income Taxes**

The Company accounts for income taxes under the liability method in accordance with authoritative guidance, under which a deferred tax asset or liability is determined based on the difference between the financial statement and the tax basis of assets and liabilities, as measured by enacted tax rates in effect when these differences are expected to reverse.

The following is a summary of the components of the provision for and (benefit from) income taxes:

	Three Months		Nine Months Ended	
	Ended September 30, 2010	2009	September 30, 2010	2009
Current:				
Federal	\$ 19	\$	\$ 25	\$
State	(24)	15	(24)	67
Foreign	133	20	157	29
Total	\$ 128	\$ 35	\$ 158	\$ 96

Foreign taxes include foreign withholding taxes from OEM license royalties from customers in countries who are a party to tax conventions with the United States including Korea, Israel and Poland, as well as foreign taxes paid by Bitstream India Pvt. Ltd., our subsidiary, in India and by Bitstream Israel Ltd. our subsidiary in Israel. Federal income tax is related to the deferred tax liability from the amortization of Goodwill for tax purposes. Federal and state tax provisions for the three and nine month periods ended September 30, 2009 included amounts in relation to the Company's income generated in the U.S., reduced by previously unused net operating loss (NOL) carry forwards and tax credits that were recorded on the balance sheet with a full valuation allowance.

At December 31, 2009, the Company had U.S. federal and state net operating loss (NOL) carryforwards of \$11,332 and \$289, respectively, of which the benefit of approximately \$8,272 and \$289, respectively, when realized, will be recorded as a credit to additional paid-in capital. The Company's NOL carryforwards begin to expire in 2020 for federal purposes. At December 31, 2009, the Company also had U.S. federal and state research and development credit (R&D Credit) carryforwards of \$1,011 and \$366, respectively. These R&D credit carryforwards begin to expire in 2010 for federal purposes and 2016 for state purposes. As of December 31, 2009, we had foreign tax credit carryforwards of \$490. These foreign tax credit carryforwards begin to expire in 2012.

The Company continued to provide a full valuation allowance for its net deferred tax assets at September 30, 2010, as it believes it is more likely than not that the future tax benefits from accumulated net operating losses and deferred taxes will not be realized. The Company continues to assess the need for the valuation allowance at each balance sheet date based on all available evidence. However, it is possible that the more likely than not criterion could be met in future periods, which could result in the reversal of a significant portion or all of the valuation allowance, which, at that time, would be recorded as a tax benefit in the condensed consolidated statement of operations.

Table of Contents**BITSTREAM INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In June 2006, the FASB issued authoritative guidance clarifying the criteria that an individual tax position must satisfy for some or all of the benefits of that position to be recognized in a company's financial statements. The Company adopted this guidance on January 1, 2007, the implementation of which did not have a material impact on the Company's consolidated financial statements, results of operations or cash flows. At the adoption date of January 1, 2007, and also at December 31, 2009 and September 30, 2010, the Company had no unrecognized tax benefits.

The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. As of September 30, 2010, the Company had no accrued interest or penalties related to uncertain tax positions. The Company's 2005 through 2009 tax years remain open to examination by the major taxing jurisdictions to which it is subject. The Company has determined that it is more likely than not that the deferred tax assets will not be realized, therefore, a valuation allowance has reduced the deferred tax assets to zero.

(9) Geographical Reporting

The Company reports revenue and income under one reportable segment. Company management assesses operating results on an aggregate basis to make decisions about the allocation of resources. Revenue by geography is based on the billing address of the customer. The following tables set forth revenue and long-lived assets by geographic area:

	Three Months		Nine Months Ended	
	Ended		September 30,	
	September 30,	2009	2010	2009
	2010	2009	2010	2009
*Revenue:				
United States	\$ 4,616	\$ 4,687	\$ 13,628	\$ 12,987
United Kingdom (UK)	416	345	1,251	899
Korea	625	121	688	179
Other (Countries less than 5% individually, by Region)				
Europe, excluding UK	131	212	532	705
Asia, excluding Korea	9	55	92	468
Other, including Canada	185	240	434	672
Total revenue	\$ 5,982	\$ 5,660	\$ 16,625	\$ 15,910

* If revenue attributable to a specific country is greater than 5% in any period, revenue attributable to that country is disclosed for all periods. E-commerce credit card revenue is all included as attributable to the United States.

Long-lived tangible assets by geographic area are as follows:

	September 30,	December 31,
	2010	2009
United States	\$ 534	\$ 626
Israel	62	
India	26	17
Total	\$ 622	\$ 643

Table of Contents

**PART I, ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS**

The following discussion should be read in conjunction with the unaudited condensed consolidated financial statements and notes thereto. All references to Bitstream, we, us, our, or Company refer to Bitstream Inc. and its subsidiaries. Except as otherwise noted, all reported dollar amounts are in thousands.

OVERVIEW

The Company is a software development company focused on bringing unique software products to a wide variety of markets. Our core software products include award-winning fonts and font rendering technologies; mobile browsing technologies; and variable data publishing; Web-to-print and multi-channel communications technologies.

Mobile Browsing Technologies. BOLT provides a consistent, full desktop-style browsing experience on almost any handset. Based upon the Company's ThunderHawk technology, BOLT was released into private beta in January 2009, and through March 2010, BOLT has been installed over 5 million times by mobile phone users looking for a better mobile browsing experience. The BOLT mobile browser offers faithful rendering of Web pages and it is the only browser for mobile phones of all types to support streaming video from popular media sharing sites such as YouTube and MySpace. Compatible with most handsets that support the J2ME or BREW/BMP operating systems, BOLT's advanced features include W3C based widget support, direct Twitter integration, six levels of magnification, international localization, copy/paste, FOTA updates, and additional usability features such as auto-complete url, save page, secure browsing, patented split-screen minimap, password manager, rss subscriptions, automatic socket support, history and keypad shortcuts. BOLT is a WebKit based cloud-computing mobile browser. This cloud computing architecture is the key to BOLT's capabilities. Web pages are first loaded by the BOLT servers, then transcoded and sent to the BOLT mobile browser client on handsets. This client/server approach maintains the integrity of Web page layouts, reduces packet consumption on data networks, dramatically improves page load speeds, and enables advanced features such as video streaming.

Fonts and Font Rendering Technologies. Bitstream is a leading developer of font technology solutions that enable developers to display high-quality text in any language for any device or application. We work with partners from around the world to provide complete text composition and font rendering solutions for consumer electronics devices, mobile handsets, set-top boxes, digital TVs, printers, graphics and software applications, and embedded systems. Our solutions include Bitstream Panorama for text composition and Font Fusion® for font rendering. Bitstream font technology supports all international languages. With our technology, developers can render any scalable industry-standard and compact font format. Developers rely on Bitstream for complete font solutions, including a certified Simplified Mainland Chinese font, MobileFonts, the Tiresias Screenfont, the Closed Captioned TV (CCTV) Font Set, the TV Font Pack, delta-hinted screen fonts, and compact stroke-based Asian fonts. Bitstream also delivers high-quality font solutions for developers, ad agencies, graphic designers, desktop publishers, corporations, small businesses, and home office users. Our world-renowned library includes over 1,000 high-quality fonts in OpenType, TrueType, and PostScript Type 1 formats for Windows, Macintosh, Unix, and Linux. We also sell our fonts and fonts from other foundries and designers on MyFonts.com SM, a showcase of the world's fonts available from one easy-to-use website. MyFonts.com provides the largest collection of fonts ever assembled for on-line delivery, and offers easy ways to find and purchase fonts on-line. MyFonts also offers unique typographic resources for research and reference, including WhatTheFont SM, a unique font identifier that accepts image files of fonts uploaded by users, analyzes the images, and then displays the fonts on the MyFonts.com site that most closely match the font shapes captured in the image. WhatTheFont is also available as an iPhone application.

Variable Data Publishing, Web-to-print, and Multi-channel Communications Technologies. The Pageflex® product line from Bitstream enables companies across the globe to communicate their marketing messages more easily and effectively. It is the technology of choice for brand management, web-to-print applications, and sophisticated personalized communications based on customer information. We pioneered flexible variable data software in 1997

Table of Contents

and have been a technology innovator in the document customization arena ever since. The platform produces rich, creative, award-winning document designs that look like they were given the individual attention of a graphic designer but were, in reality, created on-the-fly with Pageflex variable publishing technology. Print service providers, marketing service providers, corporate marketers, and publishers use Pageflex products to ensure design integrity and brand control while empowering local users to customize and personalize print collateral, email campaigns, and 1-to-1 marketing Web sites. Pageflex Persona is desktop software that produces personalized print and email documents using data from a database. Pageflex Studio ID is a plug-in to Adobe InDesign for producing personalized print pieces. Pageflex Storefront is a turnkey solution for producing web portals for document customization and online purchasing of print documents. Pageflex Server provides an enterprise solution for high-volume document customization driven by a database or requests from a web site. Pageflex Campaign Manager lets companies develop personal conversations with their customers in print, email, and online. And finally, Pageflex Chart works with these Pageflex products to add dynamic charts and graphs to print documents. Pageflex products enable companies worldwide to streamline their document production processes, communicate more personally with their customers, and control their brand and market messaging while enabling their remote employees, franchises, and consumers to use a self-serve model to order customized communications.

Business flow automation systems. On June 3, 2010, the Company completed the acquisition of certain of the assets of Press-sense Ltd. (Press-sense). Press-sense was a developer of print industry business flow automation systems. The Press-sense business will complement and expand Bitstream's Pageflex product line of enterprise brand management and web-to-print solutions to create one of the most robust end-to-end offerings of business management tools available in the marketing and print industries. By fully automating the creation, production, and back-office processes for document orders, Bitstream will provide the tools to enable its customers to maximize production efficiency, monitor and reduce costs, and increase profits.

CRITICAL ACCOUNTING POLICIES

The Company has identified the policies below as critical to its business operations and the understanding of its results of operations. The impact and any associated risks related to these policies on our business operations is discussed throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations where such policies affect the Company's reported and expected financial results. Note that our preparation of this Quarterly Report on Form 10-Q requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of our financial statements, and the reported amounts of revenue and expenses during the reporting period. There can be no assurance that actual results will not differ from those estimates.

Revenue Recognition

We derive revenue from the license of our software products, consulting, and support and maintenance services. We recognize revenue when persuasive evidence of an agreement exists, the product has been delivered or services have been provided, the fee is fixed or determinable, and collection of the fee is probable.

Multiple-element arrangements:

We recognize revenue under multiple-element arrangements using the residual method when vendor-specific objective evidence (VSOE) of fair value exists for all of the undelivered elements under the arrangement. Under the residual method, the arrangement consideration is first allocated to undelivered elements based on vendor-specific objective evidence of the fair value for each element and the residual amount is allocated to the delivered elements. Arrangement consideration allocated to undelivered elements is deferred and recognized as revenue when the elements are delivered, if all other revenue recognition criteria are met. We have established sufficient vendor-specific objective evidence for the value of our consulting, training, and other services, based on the price charged when these elements are sold separately. VSOE of the fair value of maintenance services may also be determined based on a substantive renewal clause, if any, within a customer contract. Accordingly, software license revenue is recognized under the residual method in arrangements in which software is licensed with maintenance, consulting, training or other services.

Table of Contents

License Revenue

We receive and recognize licensing fees and royalty revenue from: (1) Original Equipment Manufacturer (OEM) and Independent Software Vendor (ISV) customers for font rendering and page composition technologies; (2) direct and indirect licenses of software publishing applications for the creation, enhancement, management, transport, viewing and printing of electronic information; (3) direct sales of custom design and consulting services to end users such as graphic artists, desktop publishers, corporations and resellers; and (4) sales of fonts and publishing applications to foreign customers primarily through distributors and resellers.

Certain OEM and ISV customers pay royalties only upon the sublicensing of our products to end-users. We recognize revenue in such transactions in the period when sublicenses to end users are reported to us by our OEM or ISV customers. We recognize revenue from guaranteed minimum royalty licenses upon delivery of the software license when no further obligations of the Company exist. In certain guaranteed minimum royalty licenses, we will enter into extended payment programs with creditworthy customers. We recognize revenue related to extended payment programs is recognized when payment becomes due to the Company.

We recognize license revenue from the resale of our products through various resellers. Resellers may sell our products in either an electronic format or CD format. Revenue is recognized if collection is probable, upon notification from the reseller that it has sold the product, or for a CD product, upon delivery of the software.

Revenue from end user product sales is recognized upon delivery of the software and when collection is probable. Revenue related to extended payment programs is recognized when payment becomes due to the Company. End user sales include e-commerce revenue generated from our websites from the licensing of Bitstream fonts, subscription licenses for our browser, licensing of fonts developed by third parties and from fees received from referring customers to other sites for which we have referral agreements. Referral income for the three and nine months ended September 30, 2010 was \$11 and \$34, respectively. Referral income for the three and nine months ended September 30, 2009 was \$9 and \$31, respectively. There are minimal costs associated with the referral program, and primarily represent the time to load copies of the fonts provided by each participating foundry for addition to the MyFonts.com database. We expense those costs as incurred.

Service Revenue

Professional services include custom design and development and training. We recognize professional services revenue under software development contracts as services are provided for per diem contracts or by using the percentage-of-completion method of accounting for long-term fixed price contracts. Provisions for any estimated losses on contracts are made in the period in which such losses become probable.

We recognize revenue from support and maintenance agreements ratably over the term of the agreement.

Deferred revenue includes unearned software support and maintenance revenue, advance billings under contracts, and advanced billings for unrecognized revenue from licenses.

Cost of revenue from software licenses consists primarily of royalties paid to third party developers and foundries whose products we sell, and costs to distribute the product, including the cost of the media on which it is delivered. Cost of revenue from services consists primarily of costs associated with customer support, consulting and custom product development services.

We generally warrant that our products will function substantially in accordance with documentation provided to customers for approximately 90 days following initial delivery. We have not incurred any material expenses related to warranty claims.

Table of Contents

Stock-based Compensation

We account for stock-based compensation in accordance with authoritative guidance and have elected the modified-prospective method, under which prior periods are not revised for comparative purposes. Under the fair value recognition provisions of this statement, stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense on a straight-line basis over the requisite service period, which is the vesting period.

We currently use the Black-Scholes option pricing model to determine the fair value of stock options and awards. The determination of the fair value of stock-based payment awards on the date of grant using an option-pricing model is affected by our stock price as well as assumptions regarding a number of complex and subjective variables. These variables include our expected stock price volatility over the term of the awards, actual and projected employee stock option exercise behaviors, risk-free interest rate and expected dividends.

We estimate the expected term of options granted by calculating the average term from our historical stock option exercise experience. We estimate the volatility of our common stock by historical volatility. We base the risk-free interest rate that we use in the option pricing model on zero-coupon yields implied from U.S. Treasury issues with remaining terms similar to the expected term on the options. We do not anticipate paying any cash dividends in the foreseeable future and therefore use an expected dividend yield of zero in the option pricing model. We are required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. We use historical data to estimate pre-vesting option forfeitures and record stock-based compensation expense only for those awards that are expected to vest.

If factors change and we employ different assumptions for estimating stock-based compensation expense in future periods or if we decide to use a different valuation model, stock-based compensation expense in future periods may differ significantly from what we have recorded in the current period and could materially affect our operating income, net income and net income per share.

The Black-Scholes option-pricing model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable, characteristics not present in our option grants and awards. Existing valuation models, including the Black-Scholes and lattice binomial models, may not provide reliable measures of the fair values of our stock-based compensation. Consequently, there is a risk that our estimates of the fair values of our stock-based compensation awards on the grant dates may bear little resemblance to the actual values realized upon the exercise, expiration, early termination or forfeiture of those stock-based payments in the future. Certain stock-based payments, such as employee stock options, may expire worthless or otherwise result in zero intrinsic value as compared to the fair values originally estimated on the grant date and reported in our financial statements. Alternatively, value may be realized from these instruments that are significantly higher than the fair values originally estimated on the grant date and reported in our financial statements. There currently is no market-based mechanism or other practical application to verify the reliability and accuracy of the estimates stemming from these valuation models, nor is there a means to compare and adjust the estimates to actual values.

The application of these principles using authoritative guidance may be subject to further interpretation and refinement over time. There are significant differences among valuation models, and there is a possibility that we will adopt different valuation models in the future. This may result in a lack of consistency in future periods and materially affect the fair value estimate of stock-based payments. It may also result in a lack of comparability with other companies that use different models, methods and assumptions.

Impairment of Long-Lived Assets

In accordance with authoritative guidance, we test recorded goodwill for impairment. Goodwill is tested for impairment based upon an enterprise wide valuation under one reporting unit. We conducted impairment testing as of December 31, 2009 and determined that the fair value of the enterprise was greater than its carrying value. Although none of the goodwill was impaired, there can be no assurance that, upon completion of a future review, a material impairment charge will not be required.

Table of Contents**Accounts Receivable**

We perform ongoing credit evaluations of our customers and adjust credit limits based upon payment history and the customer's current credit worthiness, as determined by our review of their current credit information. We continuously monitor collections and payments from customers and maintain a provision for estimated credit losses based on our historical experience and any specific customer collection issues that we identify. While such credit losses have historically been within our expectations and appropriate reserves have been established, we increased these reserves throughout 2009, and subsequently wrote-off several accounts during the nine months ended September 30, 2010, as the downturn in the global economy has affected our customers and made collections from certain customers difficult. See Note 1(d) Off-Balance Sheet Risk and Concentration of Credit Risk. We cannot guarantee that our credit loss rates will not continue to worsen or that we will experience credit loss rates approximating those that we have experienced in the past.

Income Taxes

As part of the process of preparing consolidated financial statements we are required to estimate our income taxes in each of the jurisdictions in which we operate. This process involves estimating actual current tax exposure together with assessing temporary differences resulting from differing treatment of items, such as deferred revenue, for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included within our consolidated balance sheet. We must then assess the likelihood that we will recover our deferred tax assets from future taxable income and, to the extent we believe recovery unlikely, we must establish a valuation allowance. To the extent we establish a valuation allowance or increase this allowance in a period, we must include an expense within the tax provision in the statement of operations. Determination of our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets requires significant management judgment. We have fully reserved against our tax assets due to uncertainties related to our ability to utilize our deferred tax assets, primarily consisting of certain net operating losses carried forward and foreign tax credits, before they expire. We base our valuation allowance on our estimates of taxable income by jurisdiction in which we operate and the period over which our deferred tax assets will be recoverable. The determination of the valuation allowance requires us to make estimates, which we cannot guarantee will prove to be accurate.

Cash and Cash Equivalents and Marketable Securities

Cash equivalents are short-term, highly liquid investments with original maturity dates of three months or less at the date of acquisition. Cash equivalents are carried at cost plus accrued interest, which approximates fair value. Our investments in marketable securities (corporate and government bonds) are classified as available-for-sale and are recorded at fair value with any unrealized gain or loss recorded as an element of stockholders' equity. Purchased interest is included in interest receivable and reported as other current assets in our condensed consolidated balance sheet. The amortized cost of debt securities in this category is adjusted for amortization of premiums and accretion (loss) of discounts to maturity. Such amortization and accretion is included in interest and other income, net of expense. The cost of securities sold is based on the specific identification method. Interest and dividends on securities classified as available-for-sale are included in interest and other income, net of expense. The fair value of investments in marketable securities is determined based on quoted market prices at the reporting date for those instruments. Assumptions used require significant judgments by management. Changes in the assumptions could result in materially different estimates of fair values, resulting in additional credits and charges presented in the consolidated financial statements.

FORWARD LOOKING STATEMENTS

Certain statements in this report, other than purely historical information, including estimates, projections, statements relating to our business plans, objectives and expected operating results, and the assumptions upon which those statements are based, are forward-looking statements within the meaning of the Private Securities Litigation

Table of Contents

Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). These forward-looking statements generally are identified by the words believes, project, expects, anticipates, estimates, intends, strategy, plan, may, will, would, will be, will continue, will likely result, and similar expressions. We caution that forward-looking statements are inherently uncertain. Actual performance and results of operations may differ materially from those projected or suggested in the forward-looking statements due to certain risks and uncertainties, including, without limitation, market acceptance of our products, competition and the timely introduction of new products. Additional information concerning certain risks and uncertainties that would cause actual results to differ materially from those projected or suggested in the forward-looking statements is contained in our filings with the SEC, including those risks and uncertainties discussed under the sections entitled Special Note about Forward-Looking Statements and Part I. Item 1A. Risk Factors contained in our Annual Report on Form 10-K for the fiscal year ended December 31, 2009 filed with the SEC on March 31, 2010. The forward-looking statements contained herein represent our judgment as of the date of this report, and we caution readers not to place undue reliance on such statements. We undertake no obligation to publicly release any revisions to the forward-looking statements or reflect events or circumstances after the date of this document.

Table of Contents***License Revenue******Three months ended September 30, 2010 as compared to three months ended September 30, 2009***

The increase in revenue for the three months ended September 30, 2010 from software licenses was attributable to an increase in direct sales of \$448, or 15.7%, to \$3,303, as compared to \$2,855 for the three months ended September 30, 2009, due to an increase in sales of fonts from our e-commerce site. This increase was due to an increase in both the volume and variety of fonts sold. This increase was partially offset by decreases in software license revenue from Original Equipment Manufacturers (OEMs) and Independent Software Vendors (ISVs) of \$77, or 5.4%, to \$1,340 attributed to a reduction in new and renewed licenses for the three months ended September 30, 2010, as compared to \$1,417 for the three months ended September 30, 2009. Software license revenue from resellers decreased \$144, or 60.0%, to \$96 for the three months ended September 30, 2010, as compared to \$240 for the three months ended September 30, 2009. The decrease in reseller revenue and direct sales, excluding e-commerce sales, was due to decreases in the volume and variety of fonts and publishing products licensed during the three months ended September 30, 2010.

Nine months ended September 30, 2010 as compared to nine months ended September 30, 2009

The increase in revenue from software licenses for the nine months ended September 30, 2010 was attributable to an increase in direct sales of \$1,237, or 15%, to \$9,468, as compared to \$8,231 for the nine months ended September 30, 2009, due to an increase in sales of fonts from our e-commerce site attributed to increased volume and variety of fonts sold. This increase was partially offset by decreases in software license revenue from resellers for the nine months ended September 30, 2010 of \$371, or 54.8%, to \$306, as compared to \$677 for the nine months ended September 30, 2009. In addition reseller revenue and direct sales, excluding e-commerce sales, decreased in the volume and variety of fonts and publishing products licensed during the nine months ended September 30, 2010. Also software license revenue from OEMs and ISVs decreased \$152, or 4.4%, to \$3,301 for the nine months ended September 30, 2010, as compared to \$3,453 for the three months ended September 30, 2009. The decrease in OEM and ISV revenue for the nine month periods was due to a decrease in new licenses, as well as license renewals and royalties received under existing license agreements because of decreases in reported unit shipments by certain OEM customers. We were affected by the global economic downturn, as were our customers, including various OEMs and ISVs who report product royalties on shipments of their products. We are not able to determine at this time how these economic conditions will impact our license revenue during the remainder of 2010.

Service Revenue

Revenue from services increased \$95, or 8.3%, to \$1,243 for the three months ended September 30, 2010 as compared to \$1,148 for the three months ended September 30, 2009 due to increases in both consulting and training services and revenue from customer support contracts. Revenue from services increased slightly to \$3,550 for the nine months ended September 30, 2010 as compared to \$3,549 for the nine months ended September 30, 2009. Consulting, graphic design and training services vary with specific requirements of customers and may be affected more by economic concerns as customers may delay design changes, custom development and training. We are affected by the global economic downturn and we are not able to determine at this time how these economic concerns will impact our service revenue during the remainder of 2010.

We recognize license revenue from direct sales and licensing agreements of our products and products from third parties including e-commerce sales made via our websites, licensing agreements with OEMs and ISVs, and from the resale of our products through various resellers. We recognize reseller revenue if collection is probable, upon notification from the reseller that it has sold the product or, if for a physical product, upon delivery of the software. E-commerce sales include revenue from the licensing of Bitstream fonts and font technology, licensing of mobile browsing products, licensing of fonts and font technology developed by third parties and from fees received from referring customers to other sites for which we have referral agreements. Referral income for the three and nine months ended September 30, 2010 was \$11 and \$34, respectively. Referral income for the three and nine months ended September 30, 2009 was \$9 and \$31, respectively. There are minimal costs associated with referral revenue, and such costs primarily represent the time to load copies of the fonts provided by each participating foundry to the MyFonts.com database. We expense those costs as incurred.

Table of Contents

Cost of License Revenue

Cost of license revenue includes royalties and fees paid to third parties for the development of, or license of rights to, technology and/or unique typeface designs, and costs associated with the duplication, packaging and shipping of products. These costs include depreciation and amortization on acquired-technology from the acquisition of assets from Press-sense Ltd.

Three months ended September 30, 2010 as compared to three months ended September 30, 2009

The increase in cost of license revenue for the three months ended September 30, 2010, as compared to the three months ended September 30, 2009 was primarily due to increased direct costs, including royalty and credit card processing expenses of \$503, or 30%, to \$2,192 for the three months ended September 30, 2010, as compared to \$1,689 for the three months ended September 30, 2009. This increase resulted from increased sales of third party products including those conducted via e-commerce transactions. In addition, cost of licenses increased \$47 from the commencement of the amortization of the iWay technology acquisition in June 2010.

Nine months ended September 30, 2010 as compared to nine months ended September 30, 2009

The increase in cost of license revenue for the nine months ended September 30, 2010 as compared to the nine months ended September 30, 2009 was primarily due to increased direct costs, including royalty and credit card processing expenses of \$1,515, or 32%, to \$6,231 for the nine months ended September 30, 2010 as compared to \$4,716 for the nine months ended September 30, 2009, resulting from increased sales of third party products including e-commerce sales. We also incurred increased support infrastructure costs for our e-commerce and browsing product lines during the three and nine month periods ended September 30, 2010. Due to anticipated e-commerce revenue growth, we expect that cost of licenses as a percentage of sales for 2010 will continue at a level above that reflected in our 2009 financial statements, until such time as revenue from sales of our type, publishing and browsing technologies begins to increase relative to the increase in e-commerce revenue. Quarterly results may vary based upon the mix of products sold during any particular quarter.

Cost of Service Revenue

Cost of service revenue includes costs incurred in the fulfillment of custom orders and costs incurred in providing customer support, maintenance, and training.

Three months ended September 30, 2010 as compared to three months ended September 30, 2009

Cost of services revenue increased \$18, or 3.6%, for the three month ended September 30, 2010, as compared to the three months ended September 30, 2009 primarily due to the addition of support and consulting services for the iWay product which was acquired as part of the acquisition of the Press-sense Ltd. assets in June 2010 and the discontinuance of certain consulting resources who had been assigned to research and development projects which lowered costs of services during the first two quarters of the year.

Nine months ended September 30, 2010 as compared to nine months ended September 30, 2009

The decrease of \$150 in cost of services revenue for the nine months ended September 30, 2010, as compared to the nine months ended September 30, 2009 was primarily due to a decrease in consulting services costs of \$156, including \$40 decrease from the allocation of consulting resources to research and development projects and \$116 from the reassignment of several consultants to research and development staff positions. Our cost of services infrastructure has remained relatively constant during 2010 and we expect our variable costs to increase as the demand for these services increases and also with the addition of support and consulting services for the iWay product which was acquired as part of the acquisition of the Press-sense Ltd. assets. We expect our cost of services revenue as a percentage of revenue to increase to approximate the level attained during 2009.

Table of Contents**Operating Expenses:**

	Three Months Ended September 30,					
	2010	% of Revenue	2009	% of Revenue	Change	
					Dollars	Percent

General and administrative	1,207	20.2	740	13.1	467	63.1
Total operating expenses	\$ 4,209	70.4%	\$ 2,845	50.3%	\$ 1,364	47.9%

	Nine Months Ended September 30,					
	2010	% of Revenue	2009	% of Revenue	Change	
					Dollars	Percent
Marketing and selling	\$ 2,647	15.9%	\$ 2,778	17.5%	\$ (131)	(4.7)%
Research and development	5,076	30.5	3,641	22.9	1,435	39.4
General and administrative	2,994	18.0	2,195	13.8	799	36.4
Total operating expenses	\$ 10,717	64.5%	\$ 8,614	54.1%	\$ 2,103	24.4%

Marketing and Selling (M&S) Expense

Three months ended September 30, 2010 as compared to three months ended September 30, 2009

M&S expense consists primarily of salaries and benefits, commissions, travel expense and facilities costs related to sales and marketing personnel, as well as marketing program-related costs including trade shows and advertising. M&S remained relatively constant increasing 8.5% for the three months ended September 30, 2010, as compared to the three months ended September 30, 2009.

Nine months ended September 30, 2010 as compared to nine months ended September 30, 2009

The decrease in M&S expense for the nine month period ended September 30, 2010 as compared to the nine months ended September 30, 2009 was the result of a \$294 decrease in employee salaries and benefits due to temporary headcount reductions and decreased commissionable sales, partially offset by an increases of \$64 in amortization expense from the amortization of customers acquired with the acquisition of the iWay assets from Press-sense in June 2010 and \$73 from increased travel and travel-related expenses by sales and marketing personnel. We expect that our M&S expense will increase in both absolute dollars and as a percentage of revenue during the remainder of 2010, as commissionable sales increase, as we invest in new sales and marketing resources primarily for our browsing product line and with the addition of sales and marketing personnel related to the iWay product.

Table of Contents

Research and Development (R&D) Expense

Three months ended September 30, 2010 as compared to three months ended September 30, 2009

R&D expense consists primarily of salary and benefit costs, contracted third-party development costs, and facility costs related to software developers and management. The increase in R&D expense for the three months ended September 30, 2010 of \$823, as compared to the three months ended September 30, 2009 was primarily the result of an increase in personnel related costs of \$194 including salaries, benefits and facility related costs due to increases in R&D personnel for both the publishing and browsing product lines and \$571 related to the addition of R&D personnel for the iWay product.

Nine months ended September 30, 2010 as compared to nine months ended September 30, 2009

The increase in R&D expense for the nine months ended September 30, 2010 of \$1,435, as compared to the nine months ended September 30, 2009 was primarily the result of an increase in salaries and benefits of \$308 due to increases in R&D personnel for both the publishing and browsing product lines, \$753 related to the addition of R&D personnel for the iWay product, an increase of \$141 from additional services from subcontractors, an increase in the utilization of customer support and consulting personnel on internal R&D projects of \$40 and an increase in facility costs of \$171. We expect our development efforts and R&D expense to increase as compared to 2009 both in absolute dollars and as a percentage of sales during 2010.

General and Administrative (G&A) Expense

Three months ended September 30, 2010 as compared to three months ended September 30, 2009

G&A expense consists primarily of salaries, benefits, and other related costs including travel and facility expenses for finance, human resource, legal and executive personnel, legal and accounting professional services, provision for bad debts and director and officer insurance. The increase in G&A expense for the three month period ended September 30, 2010, as compared to the same period ended September 30, 2009 was primarily the result of acquisition cost associated with the purchase of assets from Press-sense Ltd. which were \$109 during the three months ended September 30, 2010. G&A expenses for the three months ended September 30, 2010 also included increases of \$191 in director fees due to the addition of three new board members during 2010 and including \$63 from the acceleration of stock award vesting for Mr. Ying upon his retirement from the board, as well as a \$203 increase in professional services including services from accounting, auditing, tax, legal and investor relations firm professionals.

Nine months ended September 30, 2010 as compared to nine months ended September 30, 2009

The increase in G&A expense for the nine month period ended September 30, 2010, as compared to the same period ended September 30, 2009 was primarily the result of acquisition cost associated with the purchase of assets from Press-sense Ltd. which were \$431 for the nine months ended September 30, 2010. G&A expenses for the nine months ended September 30, 2010 also included increases of \$247 in director fees, including \$63 from the acceleration of stock award vesting for Mr. Ying, as well as a \$300 increase in professional services including services from accounting, auditing, tax, legal and investor relations firm professionals and \$127 from an increase in the use of temporary financial personnel through an employment agency. We expect our G&A expense will decrease in absolute dollars during the fourth quarter.

Table of Contents**Other Income, Net:**

	Three Months Ended September 30,					
	2010	% of Revenue	2009	% of Revenue	Dollars	Percent
Interest and other income, net	\$ 45	0.8%	\$ 18	0.3%	\$ 27	150.0%

	Nine Months Ended September 30,					
	2010	% of Revenue	2009	% of Revenue	Dollars	Percent
Interest and other income, net	\$ 109	0.7%	\$ 53	0.3%	\$ 56	105.7%

Other income is primarily interest income earned on cash, marketable securities, and money market instruments and foreign currency transaction gains and losses. Net interest income for the three months ended September 30, 2010 and 2009 were \$61 and \$5, respectively. Net interest income for the nine months ended September 30, 2010 and 2009 were \$131 and \$13, respectively. Foreign currency transaction gains (losses) for the three months ended September 30, 2010 and 2009 were \$(25) and \$18, respectively. Transaction gains (losses) for the nine months ended September 30, 2010 and 2009 were \$(29) and \$45, respectively. Net interest income has increased, as compared to the same periods in the prior year as we have invested a portion of our cash in corporate bonds and government and agency bonds.

Provision for Income Taxes:

	Three Months Ended September 30,					
	2010	% of Revenue	2009	% of Revenue	Dollars	Percent
Provision for income taxes	\$ 128	2.1%	\$ 35	0.6%	\$ 93	265.7%

	Nine Months Ended September 30,					
	2010	% of Revenue	2009	% of Revenue	Dollars	Percent
Provision for income taxes	\$ 158	1.0%	\$ 96	0.6%	\$ 62	64.6%

Foreign taxes include foreign withholding taxes which vary with OEM license royalties from customers in countries who are a party to tax conventions with the United States including Korea, Israel and Poland, as well as, foreign taxes paid by Bitstream India Pvt. Ltd., our subsidiary in India and by Bitstream Israel Ltd. our subsidiary in Israel. Federal income tax is related to the deferred tax liability from the amortization of Goodwill for tax purposes. Federal and state tax provisions for the three and nine month periods ended September 30, 2009 included amounts in relation to the Company's income generated in the U.S., reduced by previously unused net operating loss (NOL) carry forwards and tax credits that were recorded on the balance sheet with a full valuation allowance. The following is a summary of the components of the provision for and (benefit from) income taxes:

Three Months		Nine Months

Total	\$ 128	\$ 35	\$ 158	\$ 96

Table of Contents

The Company's income tax provisions for the three and nine months ended September 30, 2010 is composed of \$6 in federal income tax related to the deferred tax liability from the amortization of Goodwill for tax purposes, and \$16 and \$24, respectively, of taxes related to foreign jurisdictions. The Company's income tax provisions for the three and nine months ended September 30, 2009 is composed of \$52 in state income taxes, and \$3 and \$9, respectively, of taxes related to foreign jurisdictions. Federal and state tax provisions for 2009 included amounts in relation to the Company's income generated in the U.S., reduced by previously unused NOL carryforwards and tax credits that were recorded on the balance sheet with a full valuation allowance.

At December 31, 2009, the Company had U.S. federal and state NOL carryforwards of \$11,332 and \$289, respectively, of which the benefit of approximately \$8,272 and \$289, respectively, when realized, will be recorded as a credit to additional paid in capital. See Note 8 Income Taxes, to our financial statements for a discussion of our income taxes.

LIQUIDITY AND CAPITAL RESOURCES

The Company has funded its operations primarily through the public sale of equity securities, cash flows from operations, cash received from the sale of our MediaBank and InterSep OPI product lines to Inso Providence Corporation in August of 1998, and cash received from the sale of our investment in DiamondSoft to Extensis in July of 2003. As of September 30, 2010, we had net working capital of \$1,703 as compared to \$16,598 at December 31, 2009. Including long-term available-for-sale marketable securities, classified as long-term due to stated maturity dates that are longer than one year, we had adjusted net working capital of \$9,795 at September 30, 2010.

Our primary source of liquidity comes from our cash, cash equivalents and investments, which totaled \$12,609 at September 30, 2010. Our investments are classified as available-for-sale and consist of securities that are readily convertible to cash, including government, government agency, and corporate bonds. Based on our current expectations, we anticipate that some portion of our existing cash, cash equivalents and investments may be consumed by operations.

Our operating activities generated (used) cash during the nine months ended September 30, 2010 and 2009 of \$(311) and \$1,532, respectively. The major components of cash used in operating activities for the nine months ended September 30, 2010 was cash used to purchase a premium on long-term marketable securities of \$948 and our loss of \$2,257 less non cash expenditures of \$1,230, partially offset by cash generated by the collection of accounts receivable of \$501, an increase in deferred revenue of \$169, and an increase in accruals of \$729. Cash from operating activities for the nine months ended September 30, 2009 was generated primarily by our net income of \$685 plus non cash expenditures of \$850 during the period.

Cash used in investing activities during the nine months ended September 30, 2010 was \$13,263 and consisted primarily of investments in marketable securities of \$8,050, the acquisition of Press-sense Ltd. of \$6,528, and purchases of property and equipment and intangible assets of \$113 and \$22, respectively. The Press-sense assets included \$80 in property and equipment, \$3,610 in intangible assets, and \$2,810 in goodwill. These uses of cash were partially offset by proceeds from the sale of marketable securities of \$1,450. Cash used in investing activities during the nine months ended September 30, 2009 was \$425 and consisted primarily of purchases of property and equipment of \$417 and additions to intangible assets of \$8.

Our financing activities for the nine months ended September 30, 2010 and 2009 provided cash of \$336 and \$413, respectively, from the exercise of stock options.

Table of Contents

As of September 30, 2010, we had no material commitments for capital expenditures.

We believe our current cash and cash equivalent and investments in marketable securities balances will be sufficient to meet our operating and capital requirements for at least the next 12 months. There can be no assurance, however, that we will not require additional financing in the future. If we were required to obtain additional financing in the future, there can be no assurance that sources of capital would be available on terms favorable to us, if at all.

We have certain royalty commitments associated with the shipment and licensing of certain products. Royalty expense is primarily based on a dollar amount per unit shipped or a percentage of the underlying revenue. Royalty expense is recorded as cost of license revenue on our Consolidated Statement of Operations.

From time to time, we evaluate potential acquisitions of products, businesses and technologies that may complement or expand our business. If we were to pursue any such transaction, we may use a portion of our working capital, the proceeds of marketable securities, or raise funding for such activities through the issuance of equity or debt securities.

Off-Balance Sheet Arrangements

We do not have any material off-balance sheet arrangements as such term is defined in Item 303(a)(4) of Regulation S-K.

Stock Repurchase Plan

We may, from time to time, as business conditions warrant, purchase stock in the open market or through private transactions and may enter into structured stock repurchase agreements with third parties. Purchases may be increased, decreased or discontinued at any time without prior notice. Any repurchase program is subject to certain repurchase conditions, including daily volume limitations, as provided under the applicable SEC safe harbor rules.

RECENT ACCOUNTING PRONOUNCEMENTS

The Company reviews and evaluates recent pronouncements that have had or may have a significant effect on our financial statements. The Company has not included a discussion of recent pronouncements below as none are anticipated to have an impact on or are unrelated to our financial condition, results of operations, or disclosures.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Derivative Financial Instruments, Other Financial Instruments and Derivative Commodity Instruments.

As of September 30, 2010, we did not participate in any derivative financial instruments or other financial and commodity instruments for which fair value disclosure would be required. Our investments include bank deposits, short-term money market accounts and investments in marketable securities including corporate bonds and government and government agency bonds that are carried on our books at fair value.

Interest Rate Sensitivity

The primary objective of our current investment activities is to preserve investment principal while maximizing income without significantly increasing risk. To meet these objectives, we invest funds not immediately required for operations only in high quality debt securities. We also limit the percentage of total investments that may be invested in any one issuer. Investments in corporate bonds as a group are also limited to a maximum percentage of our investment portfolio. We maintain a portfolio of cash equivalents and short-term and long-term investments in a variety of securities including money market funds, corporate bonds and government debt securities. These available-for-sale investments are subject to interest rate risk and may decline in value if market interest rates increase. If market interest rates increased immediately and uniformly by 10 percent from levels at September 30, 2010, the fair value of the portfolio would decline by approximately \$782. We have the ability to hold our fixed income investments until maturity, and therefore do not expect our operating results or cash flows to be affected to any significant degree by the effect of a sudden change in market interest rates on our investment portfolio.

In addition to interest rate risk, we are subject to market risk on our investments. We monitor all of our investments for impairment on a periodic basis. In the event that the carrying value of the investment exceeds its fair value and the decline in value is determined to be other than temporary, the carrying value is reduced to its current fair market value. In the absence of other overriding factors, we consider a decline in market value to be a potential indicator of an other than temporary impairment when a publicly traded stock or a debt security has traded below amortized cost for a consecutive six-month period. If an investment continues to trade below amortized cost for more than six months, and mitigating factors such as general economic and industry specific trends, including the creditworthiness of the issuer are not present, this investment would be evaluated for impairment and written down to a balance equal to the estimated fair value at the time of impairment, with the amount of the write-down recorded in Interest and other income, net, on the consolidated statements of operations. If management concludes it does not intend to sell an impaired debt security and it is not more likely than not that it will be required to sell the debt security before the recovery of its amortized cost basis, and the issuers of the securities are creditworthy, no other-than-temporary impairment is deemed to exist.

Exchange Rate Sensitivity

In countries outside the U.S., we transact business in U.S. dollars and in various other currencies. Therefore, we are subject to exposure from movements in foreign currency rates. Our exposure to currency exchange rate fluctuations has been and is expected to continue to be modest and we do not use foreign exchange option contracts or forward contracts to hedge certain operational (cash flow) exposures resulting from changes in foreign currency exchange rates. The impact of currency exchange rate movements on inter-company transactions was immaterial for the three and nine months ended September 30, 2010.

ITEM 4T. CONTROLS AND PROCEDURES

Managements evaluation of our disclosure controls and procedures.

Our principal executive officer and principal financial officer, after evaluating the effectiveness of our disclosure controls and procedures, (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act), with the participation of our management, have concluded that, as of the end of the period covered by this Quarterly Report on Form 10-Q, our disclosure controls and procedures were effective and were designed to ensure that information we are required to disclose in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure, and is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. It should be noted that any system of controls is designed to provide reasonable, but not absolute, assurances that the system will achieve its stated goals under reasonably foreseeable future circumstances. Our principal executive officer and principal financial officer have concluded that, as of such date, the Company's disclosure controls and procedures are effective at a level that provides such reasonable assurances.

Changes in internal control over financial reporting.

There was no change in our internal control over financial reporting that occurred during the quarter ended September 30, 2010 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time we are subject to legal proceedings and claims in the ordinary course of business, including claims of infringement of third-party patents and other intellectual property rights, and claims involving commercial, employment and other matters. We make a provision for a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. This provision is reviewed at least quarterly. As of September 30, 2010, there are no material pending legal proceedings to which we are a party, and no liability was recorded. Litigation is inherently unpredictable and it is possible that our financial position, cash flows, or results of operations could be materially affected in any particular period by the resolution of any such contingencies or the costs involved in seeking the resolution of any such contingencies.

ITEM 1A. RISK FACTORS

There have not been any material changes in the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2009; provided however, that the Company notes the following additional risk factor related to the Company's acquisition of the iWay product and related technology from Press-sense Ltd. acquired on June 3, 2010.

A significant portion of our iWay sales is dependent on sales to 3 OEM customers, and any loss, cancellation or delay in sales to these customers could harm our operating results. A limited number of customers have, historically, accounted for a significant portion of the iWay sales as transacted by the predecessor owner of this business and this continues under the Company's ownership following its acquisition of the Press-sense assets on June 3, 2010. Although we are working to expand our Press-sense customer base, we may continue to be subject to a customer concentration risk. Accordingly, the majority of our Press-sense revenues may continue to depend on sales of our Press-sense products to a limited number of customers for the foreseeable future. We cannot assure you that there will not be a loss or reduction in business from our existing Press-sense customers or from any other significant customer.
