QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-11398

CPI AEROSTRUCTURES, INC.

(Exact name of registrant as specified in its charter)

New York 11-2520310
(IRS
(State or other Employer
jurisdiction Identification
Number)

of
incorporation
or
organization)

91 Heartland Blvd., Edgewood, NY 11717
(Address of principal executive offices) (zip code)

(631) 586-5200

(Registrant's telephone number including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer	Accelerated filer
Non-accelerated filer	Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 4, 2016 the number of shares of common stock, par value \$.001 per share, outstanding was 8,736,114.

**NOTES TO CONDENSED FINANCIAL STATEMENTS
(UNAUDITED)**

1. INTERIM FINANCIAL STATEMENTS

The condensed financial statements of CPI Aerostructures, Inc. (the “Company”) as of September 30, 2016 and for the three months and nine months ended September 30, 2016 and 2015 have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). Certain information and note disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to those rules and regulations, although the Company believes that the disclosures made are adequate to make the information not misleading.

The condensed balance sheet at December 31, 2015 has been derived from the audited financial statements at that date, but does not include all of the information and notes required by accounting principles generally accepted in the United States for complete financial statements. All adjustments that, in the opinion of management, are necessary for a fair presentation for the periods presented have been reflected. Such adjustments are of a normal, recurring nature. It is suggested that these condensed financial statements be read in conjunction with the financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015. The results of operations for interim periods are not necessarily indicative of the operating results to be expected for the full year or any other interim period.

The Company maintains its cash in four financial institutions. The balances are insured by the Federal Deposit Insurance Corporation. From time to time, the Company’s balances may exceed these limits. As of September 30, 2016, the Company had \$536,000 of uninsured balances. The Company limits its credit risk by selecting financial institutions considered to be highly creditworthy.

The Company predominantly recognizes revenue from contracts over the contractual period under the percentage-of-completion (“POC”) method of accounting. Under the POC method of accounting, sales and gross profit are recognized as work is performed based on the relationship between actual costs incurred and total estimated costs at the completion of the contract. Recognized revenues that will not be billed under the terms of the contract until a later date are recorded as an asset captioned “Costs and estimated earnings in excess of billings on uncompleted contracts.” Contracts where billings to date have exceeded recognized revenues are recorded as a liability captioned “Billings in excess of costs and estimated earnings on uncompleted contracts.” Changes to the original estimates may be required during the life of the contract. Estimates are reviewed monthly and the effect of any change in the estimated gross margin percentage for a contract is reflected in cost of sales in the period the change becomes known. The use of the POC method of accounting involves considerable use of estimates in determining revenues, costs and profits and in assigning the amounts to accounting periods. As a result, there can be a significant disparity between earnings (both

for accounting and tax purposes) as reported and actual cash received during any reporting period. The Company continually evaluates all of the issues related to the assumptions, risks and uncertainties inherent with the application of the POC method of accounting; however, it cannot be assured that estimates will be accurate. If estimates are not accurate or a contract is terminated, the Company is required to adjust revenue in later periods. Furthermore, even if estimates are accurate, there may be a shortfall in cash flow and the Company may need to borrow money, or seek access to other forms of liquidity, to fund its work in process or to pay taxes until the reported earnings materialize as actual cash receipts.

**NOTES TO CONDENSED FINANCIAL STATEMENTS
(UNAUDITED)**

When changes are required for the estimated total revenue on a contract, these changes are recognized with an inception-to-date effect in the current period. Also, when estimates of total costs to be incurred exceed estimates of total revenue to be earned, a provision for the entire loss on the contract is recorded in the period in which the loss is determined.

In June 2014, the Company concluded that the long-term future of the A-10 was uncertain when the U.S. Department of Defense released its 2015 Budget Request that called for the retirement of the entire A-10 fleet. In addition, the Company estimated that the A-10 program would be terminated prior to the completion of the Company's orders, which was through ship set 173 instead of the expected 242 ship sets that the contract initially permitted. At that time the Company recorded a change in estimate which reduced the estimated revenue on the program to about 41% of the original estimate. The adjustment aggregated approximately \$47.7 million. From June 2014 through December 2015 the Company revised estimates, based on the best available information each quarter, to properly account for the program. The Company's estimate in March 2015 assumed that the program would be canceled at approximately 135 ship sets. In addition to revenue earned based on parts shipped, the Company would be entitled to compensation upon early termination of the program ("Termination Liability") for certain costs incurred. The amount of Termination Liability varies based on exactly when the program is canceled and the amount of costs incurred through the date of termination. In June and September 2015, the Company estimated costs based on the best information available at each period and made adjustments as needed, including deferring certain costs based on the Termination Liability. During the three months ended March 31, 2016, and prior to the filing of the Company's Form 10-K for the year ended December 31, 2015, the Company had information that the United States Air Force ("USAF") was intending to increase the number of ship sets on order for the A-10. Because of the expectation that the USAF would increase its orders, the Company projected that its current order of A-10 parts would not be cancelled before ship set 173. An increase in the number of ship sets on order would improve the Company's estimated gross margin on the overall program. In the December 31, 2015 financial statements the Company did not adjust gross margin of the program for this potential order, as Company couldn't determine if the realization of the new order was probable and that the improved margin would be realized.

In April 2016, the Company became aware that the USAF had reevaluated its position and as such had deferred any decision regarding increasing the orders on the A-10 program. These changes in position by the USAF were supported by communications from Boeing, the Company's customer.

Based on the above facts, the Company believes that it is not probable that there will be any future orders on the A-10 beyond the 173 currently on order. As a result of the information that management became aware of in April 2016, for the quarter ended March 31, 2016 the Company estimated that the A-10 program would run through the conclusion of its current purchase order with Boeing at ship set number 173. There is no justification for the deferral of any expenses incurred or expected to be incurred related to the contract under POC or any authoritative guidance in

GAAP, nor is there any justification of increasing estimated revenue on the program as the recovery of such amounts is not deemed probable. The change in estimate resulted in a reduction of revenue of approximately \$8.9 million and an increase in cost of sales of approximately \$4.6 million, for an aggregate charge of approximately \$13.5 million in the quarter ended March 31, 2016.

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09 (“ASU 2014-09”), *Revenue from Contracts with Customers (Topic 606)*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. ASU 2014-09 will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard was to become effective for annual and interim periods in fiscal years beginning after December 15, 2016. In April 2015, the FASB proposed deferring the effective date of ASU 2014-09 for one year, and proposed some modifications to the original provisions. On July 9, 2015, the one year deferral of the effective date was approved, and as such ASU 2014-09 is effective for our first quarter of fiscal year 2018 using either the retrospective or cumulative effect transition method. We are evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting.

In April 2015, the FASB issued ASU 2015-03, *“Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs.”* The updated accounting guidance requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, rather than as a deferred asset.

In February 2016, the FASB issued ASU 2016-02, *“Leases (Topic 842).”* The updated guidance requires lessees to recognize lease assets and lease liabilities for most operating leases. In addition, the updated guidance requires that lessors separate lease and nonlease components in a contract in accordance with the new revenue guidance in ASU 2014-09. The updated guidance is effective for interim and annual periods beginning after December 15, 2018. The Company is currently evaluating the effect on its consolidated financial statements.

**NOTES TO CONDENSED FINANCIAL STATEMENTS
(UNAUDITED)**

2. stock-based compensation

The Company accounts for compensation expense associated with stock options and restricted stock units (“RSUs”) based on the fair value of the options and units on the date of grant.

The Company’s net income for the nine months ended September 30, 2016 and 2015 includes approximately \$564,500 and \$491,500, respectively, of non-cash compensation expense related to the Company’s stock compensation grants. On January 1, 2016, the Company granted 53,882 RSUs to its board of directors as partial compensation for the 2016 year. On January 1, 2015, the Company granted 51,349 RSUs to its board of directors as partial compensation for the 2015 year. RSUs granted to our board of directors vest straight line on a quarterly basis over a one year period. The non-cash compensation expense related to all of the Company’s stock-based compensation arrangements is recorded as a component of selling, general and administrative expenses.

On August 2, 2016, the Company granted a total of 98,645 shares of common stock to various employees. In the event that any of these employees voluntarily terminates his employment prior to certain dates, portions of the shares may be forfeited. In addition, if certain Company performance criterion are not achieved, portions of these shares may be forfeited. These shares will be expensed at various periods through March 2019 based upon the service and performance thresholds. For the three months ended September 30, 2016, approximately \$60,700 of compensation expense is included in selling, general and administrative expenses and approximately \$12,400 of compensation expense is included in cost of sales for this grant.

The estimated fair value of each RSU and common share granted was determined based on the fair value of the Company’s common stock on the date of grant.

A summary of the status of the Company’s stock option plans as of September 30, 2016 and changes during the nine months ended September 30, 2016 is as follows:

Options	Weighted average exercise	Weighted average remaining	Aggregate intrinsic value
---------	---------------------------------	----------------------------------	---------------------------------

Edgar Filing: CPI AEROSTRUCTURES INC - Form 10-Q

		price	contractual term (in years)	
Outstanding at beginning of period	269,983	\$ 11.29		
Forfeited	(55,000)	15.27		
Outstanding and vested at end of period	214,983	\$ 10.27	1.34	\$ 11,850

During the nine months ended September 30, 2016, no stock options were granted or exercised.

The intrinsic value of all options exercised during the nine months ended September 30, 2015 was approximately \$230,500.

**NOTES TO CONDENSED FINANCIAL STATEMENTS
(UNAUDITED)**

3. Derivative Instruments and Fair Value

Our use of derivative instruments has been to hedge interest rates. These derivative contracts are entered into with a financial institution. We do not use derivative instruments for trading purposes and we have procedures in place to monitor and control their use.

We record these derivative financial instruments on the condensed balance sheets at fair value. For derivative instruments that are designated and qualify as a cash flow hedge, the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income (loss) and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings.

Any ineffective portion of the gain or loss on the derivative instrument for a cash flow hedge is recorded in the results of operations immediately. For derivative instruments not designated as hedging instruments, the gain or loss is recognized in the results of operations immediately.

In March 2012, the Company entered into interest rate swaps with the objective of reducing our exposure to cash flow volatility arising from interest rate fluctuations associated with certain debt. The notional amount, maturity date, and currency of these contracts match those of the underlying debt. The Company has designated these interest rate swap contracts as cash flow hedges. The Company measures ineffectiveness by comparing the cumulative change in the forward contract with the cumulative change in the hedged item. The interest rate swap contract was terminated as of March 24, 2016. The Company paid approximately \$4,000 at termination to settle the swap contract.

In May 2016, the Company entered into a new interest rate swap with the objective of reducing our exposure to cash flow volatility arising from interest rate fluctuations associated with certain debt. The notional amount, maturity date, and currency of this contract match those of the underlying debt. The Company has designated this interest rate swap contract as a cash flow hedge. The Company measures ineffectiveness by comparing the cumulative change in the forward contract with the cumulative change in the hedged item. As of September 30, 2016, we had a net deferred loss associated with cash flow hedges of approximately \$72,000 due to the interest rate swap, which was included in Other Liabilities.

Edgar Filing: CPI AEROSTRUCTURES INC - Form 10-Q

As of December 31, 2015, we had a net deferred loss associated with cash flow hedges of approximately \$4,500 due to the interest rate swap, which was included in Other Liabilities.

Fair Value

At September 30, 2016 and December 31, 2015, the fair values of cash, accounts receivable, accounts payable and accrued expenses approximated their carrying values because of the short-term nature of these instruments.

	September 30, 2016	
	Carrying Amount	Fair Value
Debt		
Short-term borrowings and long-term debt	\$32,359,069	\$32,359,069

	December 31, 2015	
	Carrying Amount	Fair Value
Debt		
Short-term borrowings and long-term debt	\$25,195,452	\$25,195,452

We estimated the fair value of debt using market quotes and calculations based on market rates.

**NOTES TO CONDENSED FINANCIAL STATEMENTS
(UNAUDITED)**

The following table presents the fair values of those financial liabilities measured on a recurring basis as of September 30, 2016 and December 31, 2015:

Description	Total	Fair Value Measurements September 30, 2016		
		Quoted Prices in Active Markets for Identical assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Interest Rate Swap, net	\$72,000	—	\$72,000	—
Total	\$72,000	—	\$72,000	—

Description	Total	Fair Value Measurements December 31, 2015		
		Quoted Prices in Active Markets for Identical assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Interest Rate Swap, net	\$4,453	—	\$4,453	—
Total	\$4,453	—	\$4,453	—

The fair value of the Company's interest rate swap was determined by comparing the fixed rate set at the inception of the transaction to the "replacement swap rate," which represents the market rate for an offsetting interest rate swap with the same notional amounts and final maturity date. The market value is then determined by calculating the present value of the interest differential between the contractual swap and the replacement swap.

4. COSTS AND ESTIMATED EARNINGS ON UNCOMPLETED CONTRACTS

Costs and estimated earnings in excess of billings on uncompleted contracts consist of:

	September 30, 2016		
	U.S.		
	Government	Commercial	Total
Costs incurred on uncompleted			
Contracts	\$ 330,307,949	\$ 146,911,809	\$ 477,219,758
Estimated earnings	35,177,233	55,943,864	91,121,097
Sub-total	365,485,182	202,855,673	568,340,855
Less billings to date	318,086,991	155,340,784	473,427,775
Costs and estimated earnings in excess of billings on uncompleted			
contracts	\$ 47,398,191	\$ 47,514,889	\$ 94,913,080

	December 31, 2015		
	U.S.		
	Government	Commercial	Total
Costs incurred on uncompleted			
Contracts	\$ 349,458,368	\$ 123,078,356	\$ 472,536,724
Estimated earnings	62,718,792	49,539,299	112,258,091
Sub-total	412,177,160	172,617,655	584,794,815
Less billings to date	353,601,903	128,745,963	482,347,866
Costs and estimated earnings in excess of billings on uncompleted			
contracts	\$ 58,575,257	\$ 43,871,692	\$ 102,446,949

The above amounts are included in the accompanying balance sheets under the following captions at September 30, 2016 and December 31, 2015:

September 30, 2016	December 31, 2015
\$ 95,743,826	\$ 102,622,387

Edgar Filing: CPI AEROSTRUCTURES INC - Form 10-Q

Costs and estimated earnings in excess of billings on uncompleted contracts		
Billings in excess of costs and estimated earnings on uncompleted contracts	(830,746) (175,438)
Totals	\$ 94,913,080	\$ 102,446,949

U.S. Government Contracts includes contracts directly with the U.S. Government and Government subcontracts.

**NOTES TO CONDENSED FINANCIAL STATEMENTS
(UNAUDITED)**

Revisions in the estimated gross profits on contracts and contract amounts are made in the period in which the circumstances requiring the revisions occur. During the nine months ended September 30, 2016, the effect of such revisions in total estimated contract profits resulted in a decrease to the total gross profit to be earned on the contracts of approximately \$1,627,000 from that which would have been reported had the revised estimates been used as the basis of recognition of contract profits in prior years, excluding the effect of the A-10 contract. During the nine months ended September 30, 2015, the effect of such revisions was a decrease to total gross profit of approximately \$333,000.

Although management believes it has established adequate procedures for estimating costs to uncompleted open contracts, it is possible that additional significant costs could occur on contracts prior to completion.

5. income (Loss) PER COMMON
SHARE

Basic income (loss) per common share is computed using the weighted average number of common shares outstanding. Diluted income (loss) per common share for the nine month periods ended September 30, 2016 and 2015 is computed using the weighted-average number of common shares outstanding adjusted for the incremental shares attributed to outstanding options to purchase common stock, as well as unvested RSUs. Incremental shares of 48,469 were used in the calculation of diluted income per common share in the three months ended September 30, 2016. Incremental shares of 179,983 were not used in the calculation of diluted income per common share in the three month period ended September 30, 2016, as their exercise price was in excess of the Company's average stock price for the respective period and, accordingly, these shares are not assumed to be exercised for the diluted earnings per share calculation, as they would be anti-dilutive. No incremental shares were used in the calculation of diluted income (loss) per common share in the nine month period ended September 30, 2016, as the effect of incremental shares would be anti-dilutive.

Incremental shares of 97,839 were used in the calculation of diluted income per common share in the three months ended September 30, 2015. Incremental share of 235,649 were not used in the calculation of diluted income per common share in the three month period ended September 30, 2015, as their exercise price was in excess of the Company's average stock price for the respective period and, accordingly, these shares are not assumed to be exercised for the diluted earnings per share calculation, as they would be anti-dilutive. Incremental shares of 142,056 were used in the calculation of diluted income per common share in the nine months ended September 30, 2015. Incremental shares of 165,766 were not used in the calculation of diluted income per common share in the nine month period ended September 30, 2015, as their exercise price was in excess of the Company's average stock price for the respective period and, accordingly, these shares are not assumed to be exercised for the diluted earnings per share calculation, as they would be anti-dilutive.

6. Line of credit

On December 5, 2012, the Company entered into an Amended and Restated Credit Agreement (“Restated Agreement”) with Sovereign Bank, now called Santander Bank, N.A. (“Santander”), as the sole arranger, administrative agent and collateral agent, and Valley National Bank. The Restated Agreement provided for a revolving credit loan (“Revolving Facility”) commitment of \$35 million.

On March 24, 2016, the Company entered into a Credit Agreement with BankUnited, N.A. as the sole arranger, administrative agent and collateral agent, and Citizens Bank N.A. (the “BankUnited Facility”). The BankUnited Facility provides for a revolving credit loan commitment of \$30 million (the “Revolving Loan”) and a \$10 million term loan (“Term Loan”). The proceeds of the BankUnited Facility were used to pay off all amounts outstanding under the Santander Term Loan and the Revolving Facility. The Revolving Loan bears interest at a rate based upon a pricing grid, as defined in the agreement.

On May 9, 2016, the Company entered into an amendment (the “Amendment”) to the BankUnited Facility. The Amendment changes the definition of EBITDA for the Leverage Coverage Ratio Covenant for the remainder of 2016 and changes the maximum leverage ratio from 3 to 1 to 3.5 to 1 for the quarters ending June 30, 2016 and September 30, 2016. Also, the Amendment increased the interest rate on the BankUnited Facility by 50 basis points and requires the repayment of a portion of the Term Loan if and to the extent that the Company receives any contract reimbursement payments from its current Request for Equitable Adjustment with Boeing on the A-10 program.

As of September 30, 2016, the Company was in compliance with all of the financial covenants contained in the BankUnited Facility, as amended. As of September 30, 2016, the Company had \$21.9 million outstanding under the Revolving Loan bearing interest at 4.25%.

The BankUnited Facility is secured by all of our assets.

**NOTES TO CONDENSED FINANCIAL STATEMENTS
(UNAUDITED)**

7. LONG-TERM DEBT

On March 9, 2012, the Company obtained a \$4.5 million term loan from Santander to be amortized over five years (the “Santander Term Facility”). The Santander Term Facility was used to purchase tooling and equipment for new programs.

Additionally, the Company and Santander Bank entered into a five year interest rate swap agreement, in the notional amount of \$4.5 million. Under the interest rate swap, the Company pays an amount to Santander Bank representing interest on the notional amount at a fixed rate of 4.11% and receives an amount from Santander Bank representing interest on the notional amount of a rate equal to the one-month LIBOR plus 3%. The effect of this interest rate swap was the Company paying a fixed interest rate of 4.11% over the term of the Santander Term Facility.

The Santander interest rate swap agreement was terminated and the Santander Term Facility was paid off on March 24, 2016 using the proceeds from the BankUnited Facility (see Note 6).

The Company paid approximately \$154,000 of debt issuance costs of which approximately \$96,000 is included in other current assets and \$32,000 is a reduction of long-term debt.

The Term Loan had an initial amount of \$10 million, payable in monthly installments, as defined in the agreement, which matures on March 31, 2019. The maturities of the Term Loan are included in the maturities of long-term debt.

The maturities of long-term debt (excluding unamortized debt issuance costs) are as follows:

Twelve months ending September 30,	
2017	\$1,092,237
2018	1,863,842
2019	7,313,042
2020	119,490

Thereafter	31,774
	\$10,420,385

In addition to the Term Loan, included in long-term debt are capital leases and notes payable of \$628,718, including a current portion of \$175,570.

8. MAJOR CUSTOMERS

During the nine months ended September 30, 2016, the Company's three largest commercial customers accounted for 35%, 30% and 13% of revenue, respectively. During the nine months ended September 30, 2015, the Company's three largest commercial customers accounted for 22%, 19% and 18% of revenue, respectively. In addition, during the nine months ended September 30, 2016 and 2015, 1.12% and 0.84%, respectively, of revenue was directly from the U.S. Government.

At September 30, 2016, 31%, 28%, 12% and 11% of Costs and Estimated Earnings in Excess of Billings on uncompleted Contracts were from the Company's four largest commercial customers. At December 31, 2015, 26%, 23%, 13% and 11% of Costs and Estimated Earnings in Excess of Billings on Uncompleted Contracts were from the Company's four largest commercial customers.

At September 30, 2016 and December 31, 2015, 1.8% and 1.0%, respectively, of Costs and Estimated Earnings in Excess of Billings on Uncompleted Contracts were directly from the U.S. Government.

At September 30, 2016, 34%, 25% and 20% of our accounts receivable were from our three largest commercial customers. At December 31, 2015, 30%, 18% and 16% of accounts receivable were from our three largest commercial customers.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the Company’s Condensed Financial Statements and notes thereto contained in this report.

Forward Looking Statements

When used in this Form 10-Q and in future filings by us with the Securities and Exchange Commission, the words or phrases “will likely result,” “management expects” or “we expect,” “will continue,” “is anticipated,” “estimated” or similar expressions are intended to identify “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Readers are cautioned not to place undue reliance on any such forward-looking statements, each of which speaks only as of the date made. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. The risks are included in Item 1A - Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2015 and Item 2 Management’s Discussion and Analysis of Financial Condition and Results of Operations included in this Form 10-Q. We have no obligation to publicly release the result of any revisions which may be made to any forward-looking statements to reflect anticipated or unanticipated events or circumstances occurring after the date of such statements.

Business Operations

We are a manufacturer of structural aircraft parts for fixed wing aircraft and helicopters in both the commercial and defense markets. Within the global aerospace supply chain, we are either a Tier 1 supplier to aircraft Original Equipment Manufacturers (“OEMs”) or a Tier 2 subcontractor to major Tier 1 manufacturers. We also are a prime contractor to the U.S. Department of Defense, primarily the Air Force. In conjunction with our assembly operations, we provide engineering, program management, supply chain management, and Maintenance Repair & Overhaul (“MRO”) services.

Marketing and New Business

From the beginning of the current fiscal year through September 30, 2016, we received approximately \$30.4 million of new contract awards compared to \$48.0 million in the same period of 2015. Through September 30, 2016, we received \$6.1 million in prime contracts directly from the U.S. Government compared to \$12.7 in the same period of 2015. We received \$8.3 million in U.S. Government subcontract awards through the nine month period ended September 30, 2016 compared to \$12.3 during the same period in 2015. Finally, through September 30, 2016 we have

received \$16.0 million in commercial subcontract awards as compared to \$23.0 million of commercial subcontract awards in the same period in 2015. The decrease in contract awards is predominately related to the current year timing of new contract awards, specifically awards on the Cessna Citation X+.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Backlog

We produce custom assemblies pursuant to long-term contracts and customer purchase orders. Backlog consists of aggregate values under such contracts and purchase orders, excluding the portion previously included in operating revenues on the basis of percentage of completion accounting, and including estimates of future contract price escalation. Substantially all of our backlog is subject to termination at will and rescheduling, without significant penalty. Funds are often appropriated for programs or contracts on a yearly or quarterly basis, even though the contract may call for performance that is expected to take a number of years. Therefore, our funded backlog does not include the full value of our contracts. Our total backlog as of September 30, 2016 and December 31, 2015 was as follows:

Backlog (Total)	September 30, 2016	December 31, 2015
Funded	\$88,981,000	\$101,145,000
Unfunded	352,565,000	286,171,000
Total	\$441,546,000	\$387,316,000

Approximately 75% of the total amount of our backlog at September 30, 2016 was attributable to U.S. government contracts. Our backlog attributable to U.S. government contracts at September 30, 2016 and December 31, 2015 was as follows:

Backlog (Government)	September 30, 2016	December 31, 2015
Funded	\$82,821,000	\$95,048,000
Unfunded	249,847,000	181,826,000
Total	\$332,668,000	\$276,874,000

Our backlog attributable to commercial contracts at September 30, 2016 and December 31, 2015 was as follows:

Backlog (Commercial)	September 30,	December 31, 2015
-------------------------	------------------	----------------------

Edgar Filing: CPI AEROSTRUCTURES INC - Form 10-Q

	2016	
Funded	\$6,160,000	\$6,097,000
Unfunded	102,718,000	104,345,000
Total	\$108,878,000	\$110,442,000

Our unfunded backlog is primarily comprised of the long-term contracts for the G650, E-2D, F-16, T-38, F-35, HondaJet Light Business Jet, Bell AH-1Z Cessna Citation X+, Sikorsky S-92 and Embraer Phenom 300. These long-term contracts are expected to have yearly orders, which will be funded in the future.

The low level of funded backlog on commercial programs is the result of customers placing funded orders based upon expected lead time. These programs are under long-term agreements with our customers, and as such, we are protected by termination liability provisions.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Critical Accounting Policies

Revenue Recognition

We recognize revenue from our contracts over the contractual period under the percentage-of-completion (“POC”) method of accounting. Under the POC method of accounting, sales and gross profit are recognized as work is performed based on the relationship between actual costs incurred and total estimated costs at the completion of the contract. Recognized revenues that will not be billed under the terms of the contract until a later date are recorded as an asset captioned “Costs and estimated earnings in excess of billings on uncompleted contracts.” Contracts where billings to date have exceeded recognized revenues are recorded as a liability captioned “Billings in excess of costs and estimated earnings on uncompleted contracts.” Changes to the original estimates may be required during the life of the contract. Estimates are reviewed monthly and the effect of any change in the estimated gross margin percentage for a contract is reflected in cost of sales in the period the change becomes known. The use of the POC method of accounting involves considerable use of estimates in determining revenues, costs and profits and in assigning the amounts to accounting periods. As a result, there can be a significant disparity between earnings (both for accounting and tax purposes) as reported and actual cash received by us during any reporting period. We continually evaluate all of the issues related to the assumptions, risks and uncertainties inherent with the application of the POC method of accounting; however, we cannot assure you that our estimates will be accurate. If our estimates are not accurate or a contract is terminated, we will be forced to adjust revenue in later periods. Furthermore, even if our estimates are accurate, we may have a shortfall in our cash flow and we may need to borrow money, or seek access to other forms of liquidity, to fund our work in process or to pay taxes until the reported earnings materialize as actual cash receipts.

When adjustments are required for the estimated total revenue on a contract, these changes are recognized with an inception-to-date effect in the current period. Also, when estimates of total costs to be incurred exceed estimates of total revenue to be earned, a provision for the entire loss on the contract is recorded in the period in which the loss is determined.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations

Non-GAAP Financial Measures

We prepare and publicly release quarterly unaudited financial statements prepared in accordance with U.S. GAAP. We also are disclosing and discuss certain non-GAAP financial measures in our public releases. The non-GAAP financial measures that we disclose are adjusted earnings (arrived at by eliminating the Company’s A-10 Program with Boeing from reported results). Adjusted earnings is a key metric that we have used in evaluating our financial performance. Adjusted earnings is considered a non-GAAP financial measure as defined by Regulation G promulgated by the SEC under the Securities Act of 1933, as amended. We consider adjusted earnings important in evaluating our financial performance on a consistent basis across various periods. Due to the significance of the non-cash and non-recurring change in estimate recognized in the nine months ended September 30, 2016, adjusted earnings enables the Company’s Board of Directors and management to monitor and evaluate the business on a consistent basis. We use adjusted earnings as a measure, among others, to analyze and evaluate financial and strategic planning decisions regarding future operating decisions and investments. The presentation of adjusted earnings should not be construed as an inference that the Company’s future results will be unaffected by unusual or non-recurring items or by non-cash items, such as changes in estimates. This non-GAAP measure should be considered in addition to, rather than as a substitute for, pre-tax income, net income and cash flows from operating activities.

Revenue

Revenue for the three months ended September 30, 2016 was \$22,110,829 compared to \$26,790,881 for the same period last year, a decrease of \$4,680,052 or 17.5%. This decrease is predominately the result of an approximately \$3,469,000 decrease in revenue on our E-2D program. This was the result of the timing of work on program’s multiyear order.

Revenue for the nine months ended September 30, 2016 was \$57,061,826 compared to \$68,611,766 for the same period last year, a decrease of \$11,549,940 or 16.8%. The decrease is predominately the result of the change in estimate on the A-10 program described below.

In June 2014, the Company concluded that the long term future of the A-10 was uncertain when the U.S. Department of Defense released its 2015 Budget Request that called for the retirement of the entire A-10 fleet. In addition, the Company estimated that the A-10 program would be terminated prior to the completion of the Company's orders, which was through ship set 173 instead of the expected 242 ship sets that the contract initially permitted. At that time the Company recorded a change in estimate which reduced the estimated revenue on the program to about 41% of the original estimate. The adjustment aggregated approximately \$47.7 million.

From June 2014 through December 2015 the Company revised estimates, based on the best available information each quarter, to properly account for the program. The Company's estimate in March 2015 assumed that the program would be canceled at approximately 135 ship sets. In addition to revenue earned based on parts shipped, the Company would be entitled to compensation upon early termination of the program ("Termination Liability") for certain costs incurred. The amount of Termination Liability varies based on exactly when the program is canceled and the amount of costs incurred through the date of termination. In June and September 2015, the Company estimated costs based on the best information available at each period and made adjustments as needed, including deferring certain costs based on the Termination Liability.

During the three months ended March 31, 2016, and prior to the filing of the Company's Form 10-K for the year ended December 31, 2015, the Company had information that the United States Air Force ("USAF") was intending to increase the number of ship sets on order for the A-10. Because of the expectation that the USAF would increase its orders, the Company projected that its current order of A-10 parts would not be cancelled before ship set 173. An increase in the number of ship sets on order would improve the Company's estimated gross margin on the overall program. In the December 31, 2015 financial statements the Company did not alter gross margin of the program for this potential order, as Company couldn't determine if the realization of the new order was probable and that the improved margin would be realized.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

In April 2016, the Company became aware that the USAF had reevaluated its position and as such had deferred any decision regarding increasing the orders on the A-10 program. These changes in position by the USAF were supported by communications from Boeing, the Company’s customer.

Based on the above facts, the Company believes that, it is not probable that there will be any future orders on the A-10 beyond the 173 currently on order. As a result of the information that management became aware of in April 2016, for the quarter ended March 31, 2016 the Company estimated that the A-10 program would run through the conclusion of its current purchase order with Boeing at ship set number 173. There is no justification for the deferral of any expenses incurred or expected to be incurred related to the contract under POC or any authoritative guidance in GAAP, nor is there any justification of increasing estimated revenue on the program as the recovery of such amounts is not deemed probable. The change in estimate resulted in a reduction of revenue of approximately \$8.9 million in the quarter ended March 31, 2016.

Revenue from commercial subcontracts was \$31,170,895 for the nine months ended September 30, 2016 compared to \$31,034,309 for the nine months ended September 30, 2015, an increase of \$136,586 or 0.44%.

Inflation historically has not had a material effect on our operations.

Cost of sales

Cost of sales for the three months ended September 30, 2016 and 2015 was \$17,086,461 and \$21,194,449, respectively, a decrease of \$4,107,988 or 19.4%.

Cost of sales for the nine months ended September 30, 2016 and 2015 was \$58,642,561 and \$55,564,894, respectively, an increase of \$3,077,667 or 5.5%. The change in estimate on the A-10 program, described above, resulted in an increase in cost of sales of approximately \$4.6 million.

The components of the cost of sales were as follows:

	Three months ended		Nine months ended	
	September 30, 2016	September 30, 2015	September 30, 2016	September 30, 2015
Procurement	\$12,767,192	\$15,529,184	\$39,000,097	\$36,046,790
Labor	1,950,312	2,662,403	6,280,722	7,194,292
Factory Overhead	3,996,607	3,992,582	11,984,948	11,956,796
Other contract costs	(1,627,650)	(989,720)	1,376,794	367,016
Cost of Sales	\$17,086,461	\$21,194,449	\$58,642,561	\$55,564,894

Other contract costs for the nine months ended September 30, 2016 was \$1,376,794 compared to \$367,016 for the nine months ended September 30, 2015, an increase of \$1,009,778. Other contract costs relate to expenses recognized for changes in estimates and expenses predominately associated with loss contracts. Other contract costs are comprised predominantly of charges related to the change in estimate on the A-10 program.

Procurement for the nine months ended September 30, 2016 was \$39,000,097 compared to \$36,046,790 for the nine months ended September 30, 2015, an increase of \$2,953,307 or 8.2%. This increase is the result of high procurement on the E-2D multiyear order in the first half of 2016. Procurement for the three months ended September 30, 2016 was \$12,767,192 compared to \$15,529,184 for the three months ended September 30, 2015, a decrease of \$2,761,992 or 17.8%. The decrease is the result of the timing of procurement on the E-2D multiyear program.

Labor costs for the nine months ended September 30, 2016 was \$6,280,722 compared to \$7,194,292 for the nine months ended September 30, 2015, a decrease of \$913,570 or 12.7%. Labor costs for the three months ended September, 2016 was \$1,950,312 compared to \$2,662,403 for the three months ended September 30, 2015, a decrease of \$712,091 or 26.7%. These decreases are the result of decreases in labor on certain production programs, specifically the E-2D seats and the Cessna Citation X+ which are nearing the end of the current delivery schedules.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Gross Profit (Loss)

Gross profit (loss) for the nine months ended September 30, 2016 was a loss of \$1,580,735 compared to a profit of \$13,046,872 for the nine months ended September 30, 2015, a decrease of \$14,627,607 predominately the result of the change in estimate on the A-10 program.

Gross profit for the three months ended September 30, 2016 was \$5,024,368 compared to \$5,596,432 for the three months ended September 30, 2015, a decrease of \$572,064, predominately the result of lower revenue from the E-2D program.

Favorable/Unfavorable Adjustments to Gross Profit (Loss)

During the nine months ended September 30, 2016 and 2015, circumstances required that we make changes in estimates to various contracts. Such changes in estimates resulted in decreases in total gross profit as follows:

	Nine months ended	
	September 30, 2016	September 30, 2015
Favorable adjustments	\$235,000	\$1,116,000
Unfavorable adjustments	(1,862,000)	(1,449,000)
Net adjustments	\$(1,627,000)	\$(333,000)

During the nine months ended September 30, 2016 we had one contract which had an approximately \$270,000 unfavorable adjustment caused by excess labor and procurement costs due to difficulty in the manufacturing process. In addition, we had an approximate \$354,000 unfavorable adjustment on one contract that was canceled by the government. Also, we had 4 contracts that each had between \$140,000 and \$245,000 (cumulatively \$890,000) of unfavorable adjustments caused by excess labor costs incurred. No other individual favorable or unfavorable changes in estimates for the nine months ended September 30, 2016 were material.

During the nine months ended September 30, 2015 we had one contract which had an approximately \$800,000 unfavorable adjustment caused by excess labor and procurement costs due to difficulty in the manufacturing process. No other individual favorable or unfavorable changes in estimates for the nine months ended September 30, 2015 were material.

In addition to the above mentioned unfavorable adjustments, we had the unfavorable adjustment of approximately, \$13.5 million related to the A-10 program described previously.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the three months ended September 30, 2016 were \$2,014,147 compared to \$1,898,965 for the three months ended September 30, 2015, an increase of \$115,182, or 6.1%. This increase is predominately the result of a \$144,000 increase in professional fees, an \$80,000 increase in employee compensation and a \$52,000 increase in marketing and advertising related to the timing of the Farnborough Air Show, offset by a decrease of \$70,000 in accrued officers’ bonus, the result of our financial performance being below amounts required for our officers to receive bonuses. The increase in employee compensation was predominately the result of the stock granted to employees in August 2016.

Selling, general and administrative expenses for the nine months ended September 30, 2016 were \$6,603,321 compared to \$5,968,123 for the nine months ended September 30, 2015, an increase of \$635,198, or 10.6%. This increase was predominately the result of an approximately \$475,000 increase in accounting and legal fees related mostly to the extended 2015 audit process and an executive compensation study and an increase in salaries of \$186,000. Additionally, we recorded a \$395,749 reserve for disputed accounts receivables with various customers. These increases were offset by a decrease in accrued officers’ bonus of approximately \$210,000.

Income (Loss) Before Provision for (Benefit from) Income Taxes

Income before provision for income taxes for the three months ended September 30, 2016 was \$2,672,065 compared to \$3,479,085 for the same period last year, a decrease of \$807,020. Loss before benefit from income taxes for the nine months ended September 30, 2016 was \$9,121,579 compared to income before provision of income taxes of \$6,375,313 for the same period last year, a decrease of \$15,496,892, predominately the result of the change in estimate on the A-10 program.

Provision for (Benefit from) Income Taxes

Provision for income taxes was \$986,000 for the three months ended September 30, 2016 and a benefit from income taxes of \$3,378,000 for the nine months ended September 30, 2016, compared to provision for income taxes of \$1,033,000 and \$2,011,000 for the three and nine months ended September 30, 2015. The benefit from income taxes recognized in the nine months ending September 30, 2016, resulted in the booking of a deferred tax asset which will

be reduced in each subsequent quarter as the Company anticipates pre-tax income each quarter. Any remaining amount at December 31, 2016 will be available to offset future income. The effective tax rate at September 30, 2015 was 34.0%. Our historical tax rates have been below the federal statutory rate because of the effect of permanent differences between book and tax deductions, predominately the R&D tax credit and the domestic production activity deduction. Beginning at December 31, 2015, we began to accrue taxes in states where we previously did not have nexus. This has increased the effective tax rate to between 35%-37%.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Net Income (Loss)

Net income for the three months ended September 30, 2016 was \$1,686,065 or \$0.19 per basic share, compared to \$2,446,085 or \$0.29 per basic share for the same period last year. Net income (loss) for the nine months ended September 30, 2016 was a loss of \$5,743,579 or \$.67 per basic share, compared to net income of \$4,364,313 or \$0.51 per basic share for the same period last year. Diluted income per share for the three months ended September 30, 2016 was \$0.19, calculated utilizing 8,692,420 average shares outstanding as adjusted for the dilutive effect of outstanding stock options and RSUs. Basic and diluted income per share for the nine months ended September 30, 2016 were the same as effects of outstanding options would be anti-dilutive. Diluted income per share for the three months ended September 30, 2015 was \$0.28, calculated utilizing 8,625,308 average shares outstanding as adjusted for the dilutive effect of outstanding stock options and RSUs. This compares to diluted income per share of \$0.51 for the nine months ended September 30, 2015 calculated utilizing 8,613,316 average shares outstanding.

Adjusted Earnings

On an as adjusted basis, which excludes the impact of the A-10 program on the Company’s financial performance for all periods presented, revenue for the three months and nine months ended September 30, 2016 was \$19.4 million and \$58.7 million, respectively, compared with \$23.9 million and \$55.8 million for the three months and nine months ended September 30, 2015, respectively. Gross profit was \$5.0 million and \$13.7 million for the three months and nine months ended September 30, 2016, respectively, compared to \$5.6 million and \$13.0 million for the three months and nine months ended September 30, 2015, respectively. Net income for the three months and nine months ended September 30, 2016 was \$1.7 million and \$3.9 million, or \$0.19 and \$0.45 per diluted share, respectively compared with \$2.4 million and \$4.4 million, or \$0.29 and \$0.51 per diluted share in the three months and nine months ended September 30, 2015, respectively.

For the Nine months ended September 30,
2016

	GAAP as Reported	Adjustments	Adjusted Earnings

Diluted earnings per share	\$0.28		\$0.28

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Liquidity and Capital Resources

General

At September 30, 2016, we had working capital of \$67,389,285 compared to \$67,292,917 at December 31, 2015, an increase of \$96,368 or 0.14%.

Cash Flow

A large portion of our cash flow is used to pay for materials and processing costs associated with contracts that are in process and which do not provide for progress payments. Costs for which we are not able to bill on a progress basis are components of “Costs and estimated earnings in excess of billings on uncompleted contracts” on our condensed balance sheets and represent the aggregate costs and related earnings for uncompleted contracts for which the customer has not yet been billed. These costs and earnings are recovered upon shipment of products and presentation of billings in accordance with contract terms.

Because the POC method of accounting requires us to use estimates in determining revenue, costs and profits and in assigning the amounts to accounting periods, there can be a significant disparity between earnings (both for accounting and tax purposes) as reported and actual cash that we receive during any reporting period. Accordingly, it is possible that we may have a shortfall in our cash flow and may need to borrow money, or to raise additional capital, until the reported earnings materialize into actual cash receipts.

At September 30, 2016, we had a cash balance of \$665,317 compared to \$1,002,023 at December 31, 2015.

Our costs and estimated earnings in excess of billings decreased by approximately \$6.9 million during the nine months ended September 30, 2016, predominately the result of the change in estimate on the A-10 program.

Several of our programs require us to expend up-front costs that may have to be amortized over a portion of production units. In the case of significant program delays and/or program cancellations, we could be required to bear impairment charges which may be material, for costs that are not recoverable. Such charges and the loss of up-front costs could have a material impact on our liquidity.

We continue to work to obtain better payment terms with our customers, including accelerated progress payment arrangements, as well as exploring alternative funding sources.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

Credit Facilities

Line of Credit

On March 24, 2016, the Company entered into a Credit Agreement with BankUnited, N.A. as the sole arranger, administrative agent and collateral agent and Citizens Bank, N.A. (the “BankUnited Facility”) The BankUnited Facility provides for a revolving credit loan commitment of \$30 million (the “Revolving Loan”) and a \$10 million term loan (“Term Loan”). The proceeds of the BankUnited Facility were used to pay off all amounts outstanding under the Santander Term Loan and the Revolving Facility. The Revolving Loan bears interest at a rate based upon a pricing grid, as defined in the agreement.

On May 9, 2016, the Company entered into an amendment (the “Amendment”) to the BankUnited Facility. The Amendment changes the definition of EBITDA for the Leverage Coverage Ratio Covenant for the remainder of 2016 and changes the maximum leverage ratio from 3 to 1 to 3.5 to 1 for the quarters ending June 30, 2016 and September 30, 2016. Also, the Amendment increased the interest rate on the BankUnited Facility by 50 basis points and requires the repayment of a portion of the Term Loan if and to the extent that the Company receives any contract reimbursement payments from its current REA with Boeing on the A-10 program.

As of September 30, 2016, the Company was in compliance with all of the covenants contained in the Restated Agreement, as amended. As of September 30, 2016, the Company had \$21.9 million outstanding under the Restated Agreement bearing interest at 4.25%.

The BankUnited Revolving Facility is secured by all of our assets.

Term Loan

On March 9, 2012, the Company obtained a \$4.5 million term loan from Santander to be amortized over five years (the “Santander Term Facility”). Santander Term Facility was used to purchase tooling and equipment for new

programs.

Additionally, the Company and Santander Bank entered into a five year interest rate swap agreement, in the notional amount of \$4.5 million. Under the interest rate swap, the Company pays an amount to Santander Bank representing interest on the notional amount at a fixed rate of 4.11% and receives an amount from Santander Bank representing interest on the notional amount of a rate equal to the one-month LIBOR plus 3%. The effect of this interest rate swap was the Company paying a fixed interest rate of 4.11% over the term of the Santander Term Facility.

The Santander interest swap agreement was terminated and the Santander Term Facility paid off on March 24, 2016 using the proceeds of the BankUnited Facility.

The BankUnited Term Loan had an initial amount of \$10 million, payable in monthly installments, as defined in the agreement, which matures on March 31, 2019. The maturities of the Term Loan are included in the maturities of long-term debt.

Contractual Obligations

For information concerning our contractual obligations, see “*Contractual Obligations*” under “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” of our Annual Report on Form 10-K for the year ended December 31, 2015.

Item 3 – Quantitative and Qualitative Disclosures About Market Risk

Management does not believe that there is any material market risk exposure with respect to derivative or other financial instruments that would require disclosure under this item.

Item 4 – Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain a system of disclosure controls and procedures that is designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, as appropriate, to allow timely decisions regarding required disclosures. Disclosure controls and procedures also include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, or persons performing similar functions, and Board of Directors, as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of December 31, 2015 and March 31, 2016. Based on this evaluation and considering the material weakness in internal control over financial reporting described below relating to the recognition of revenue related to a request for equitable adjustment, we concluded as of December 31, 2015 and March 31, 2016 that our disclosure controls and procedures were not effective at the reasonable assurance level.

A material weakness is a control deficiency or combination of control deficiencies that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. The following material weakness was identified as of December 31, 2015 and March 31, 2016: Due to an ongoing negotiation with one customer, the Company submitted a request for equitable adjustment ("REA") on a contract, as allowed under the contract. During the fourth quarter of 2015, the Company initially concluded that it had sufficient documentation to recognize revenue based upon the REA. After further evaluation, management concluded that it did not have sufficient documentation to record such revenue and therefore its review controls over this REA

were not adequate. Management has implemented practices and procedures to address the foregoing material weakness, including more timely reviews of infrequently occurring transactions, such as an REA. Additionally, the Company has increased the size and technical expertise of its accounting staff to evaluate such transactions in the future on a more timely basis.

We conducted an evaluation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of September 30, 2016 and based on this evaluation, including considering the remediation actions described above, we concluded that our disclosure controls and procedures were effective at a reasonable assurance level as of September 30, 2016.

Changes in Internal Control Over Financial Reporting

Other than as described above, there has been no changes in our internal control over financial reporting during the quarter ended September 30, 2016 that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

Part II: Other Information

Item 1 – Legal Proceedings

None.

Item 1A – Risk Factors

Material risks related to our business, financial condition and results of operations are disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2015, as filed with the SEC on March 28, 2016. There have been no material changes to such risk factors. The risk factors disclosed in our Annual Report should be carefully considered in evaluating our business because such factors may have a significant impact on our business, operating results, liquidity and financial condition.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

There have been no sales of unregistered equity securities for the nine months ended September 30, 2016.

Item 3 – Defaults Upon Senior Securities

None.

Item 4 – Mine Safety Disclosures

Not applicable.

Item 5 – Other Information

None.

Item 6 – Exhibits
