

HEARTLAND FINANCIAL USA INC  
Form 10-Q  
May 09, 2014

UNITED STATES SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D.C. 20549

FORM 10-Q  
 QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For quarterly period ended March 31, 2014

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For transition period \_\_\_\_\_ to \_\_\_\_\_

Commission File Number: 001-15393

HEARTLAND FINANCIAL USA, INC.  
(Exact name of Registrant as specified in its charter)

Delaware  
(State or other jurisdiction of incorporation or organization)

42-1405748  
(I.R.S. employer identification number)

1398 Central Avenue, Dubuque, Iowa 52001  
(Address of principal executive offices)(Zip Code)

(563) 589-2000  
(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).  
Yes  No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "accelerated filer," "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Act.

Edgar Filing: HEARTLAND FINANCIAL USA INC - Form 10-Q

Large accelerated filer

Accelerated Filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined by Rule 12b-2 of the Securities Exchange Act of 1934). Yes  No

Indicate the number of shares outstanding of each of the classes of Registrant's common stock as of the latest practicable date: As of May 7, 2014, the Registrant had outstanding 18,454,149 shares of common stock, \$1.00 par value per share.

HEARTLAND FINANCIAL USA, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1: BASIS OF PRESENTATION

The interim unaudited consolidated financial statements contained herein should be read in conjunction with the audited consolidated financial statements and accompanying notes to the consolidated financial statements for the fiscal year ended December 31, 2013, included in the Form 10-K of Heartland Financial USA, Inc. ("Heartland") filed with the Securities and Exchange Commission on March 14, 2014. Accordingly, footnote disclosures which would substantially duplicate the disclosure contained in the audited consolidated financial statements have been omitted.

The financial information of Heartland included herein has been prepared in accordance with U.S. generally accepted accounting principles for interim financial reporting and has been prepared pursuant to the rules and regulations for reporting on Form 10-Q and Rule 10-01 of Regulation S-X. Such information reflects all adjustments (consisting of normal recurring adjustments), that are, in the opinion of management, necessary for a fair presentation of the financial position and results of operations for the periods presented. The results of the interim period ended March 31, 2014, are not necessarily indicative of the results expected for the year ending December 31, 2014.

Earnings Per Share

Basic earnings per share is determined using net income available to common stockholders and weighted average common shares outstanding. Diluted earnings per share is computed by dividing net income available to common stockholders by the weighted average common shares and assumed incremental common shares issued. Amounts used in the determination of basic and diluted earnings per share for the three-month periods ended March 31, 2014 and 2013, are shown in the table below:

(Dollars and number of shares in thousands, except per share data)	Three Months Ended	
	March 31,	
	2014	2013
Net income attributable to Heartland	\$6,890	\$12,488
Preferred dividends and discount	(204	) (408
Net income available to common stockholders	\$6,686	\$12,080
Weighted average common shares outstanding for basic earnings per share	18,437	16,852
Assumed incremental common shares issued for common stock equivalents	288	335
Weighted average common shares for diluted earnings per share	18,725	17,187
Earnings per common share — basic	\$0.36	\$0.72
Earnings per common share — diluted	\$0.36	\$0.70
Number of antidilutive common stock equivalents excluded from diluted earnings per share computation	95	105

Stock-Based Compensation

Heartland may grant, through its Nominating and Compensation Committee (the "Compensation Committee"), non-qualified and incentive stock options, stock appreciation rights, stock awards, restricted stock, restricted stock units and cash incentive awards, under its 2012 Long-Term Incentive Plan (the "Plan"). The Plan, which was approved by stockholders in May 2012 and replaced Heartland's 2005 Long-Term Incentive Plan with respect to grants after such approval, reserved 355,616 shares of common stock at March 31, 2014, for issuance under future awards that may be granted under the Plan to employees and directors of, and service providers to, Heartland or its subsidiaries.

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 718, "Compensation-Stock Compensation" requires the measurement of the cost of employee services received in exchange for an award of equity instruments based upon the fair value of the award on the grant date. The cost of the award is based upon its fair value estimated on the date of grant and recognized in the consolidated statements of income over the vesting period of the award. The fair market value of restricted stock and restricted stock units is based on the fair value of the underlying shares of common stock on the date of grant. The fair value of stock options is estimated on the date of grant using the Black-Scholes model.

---

The amount of tax benefit (expense) related to the exercise, vesting, and forfeiture of equity-based awards reflected in additional paid-in-capital, not taxes payable, was (\$138,000) and \$16,000 during the three months ended March 31, 2014, and 2013, respectively.

#### Restricted Stock Units

The Plan permits the Compensation Committee to grant restricted stock units ("RSUs"). On March 11, 2014, the Compensation Committee granted time-based RSUs with respect to 67,065 shares of common stock and on January 22, 2013, granted time-based RSUs with respect to 72,595 shares of common stock, to selected officers. The time-based RSUs, which represent the right, without payment, to receive shares of Heartland common stock at a specified date in the future based on specific vesting conditions, vest over five years in three equal installments on the third, fourth and fifth anniversaries of the grant date, will be settled in common stock upon vesting, and will not be entitled to dividends until vested. The time-based RSUs granted in 2014 vest upon a "qualified retirement" (as defined in the RSU agreement) while the RSUs granted in 2013 allow the Compensation Committee to exercise its discretion to provide for vesting upon retirement. In both cases, the retiree is required to sign a non-solicitation and non-compete agreement as a condition to vesting.

In addition to the time-based RSUs referenced in the preceding paragraph, the Compensation Committee granted performance-based RSUs with respect to 32,645 shares of common stock on March 11, 2014, and performance-based RSUs with respect to 40,990 shares of common stock on January 22, 2013, to Heartland executives and subsidiary presidents. These performance-based RSUs vest based first on performance measures tied to Heartland's earnings and loans on December 31, 2014, for the 2014 RSUs, and earnings and assets on December 31, 2013, for the 2013 RSUs, and then on time-based vesting conditions. For the grants awarded in 2014, the portion of the RSUs earned based on performance vest on December 31, 2016, if the executive remains employed on that date, and for the grants awarded in 2013, the portion of the RSUs earned based on performance vest on December 31, 2015, subject to employment on that date.

The Compensation Committee also has the authority to issue shares in conjunction with employment agreements for executive level employees and may also elect to compensate members of the Board of Directors by awarding RSUs. During the three months ended March 31, 2014, 9,000 RSUs were granted under this authority. There were no RSUs granted during the three months ended March 31, 2013, related to employment contracts or board members.

A summary of the status of the RSUs as of March 31, 2014 and 2013, and changes during the three months ended March 31, 2014 and 2013, follows:

	2014		2013	
	Shares	Weighted-Average Grant Date Fair Value	Shares	Weighted-Average Grant Date Fair Value
Outstanding at January 1	353,070	\$ 18.48	348,897	\$ 15.75
Granted	108,710	27.29	113,585	26.86
Vested	(67,024	) 15.82	(30,288	) 13.95
Forfeited	(2,003	) 17.26	(170	) 20.64
Outstanding at March 31	392,753	\$ 21.50	432,024	\$ 19.06

Total compensation costs recorded for RSUs were \$1.1 million and \$989,000 for the three months ended March 31, 2014, and 2013, respectively. As of March 31, 2014, there were \$4.0 million of total unrecognized compensation costs related to the 2005 and 2012 Long-Term Incentive Plans for RSUs which are expected to be recognized through 2019.

## Options

Although the Plan provides authority to the Compensation Committee to grant stock options, no options were granted during the first three months of 2014 and 2013. Prior to 2009, options were typically granted annually with an expiration date ten years after the date of grant. Vesting was generally over a five-year service period with portions of a grant becoming exercisable at three years, four years, and five years after the date of grant. A summary of the status of the stock options as of March 31, 2014 and 2013, and changes during the three months ended March 31, 2014 and 2013, follows:

	2014		2013	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price
Outstanding at January 1	261,936	\$23.60	377,907	\$22.62
Granted	—	—	—	—
Exercised	(5,000	) 19.13	(9,835	) 16.69
Forfeited	(5,500	) 26.88	(1,800	) 26.68
Outstanding at March 31	251,436	\$23.62	366,272	\$22.76
Options exercisable at March 31	251,436	\$23.62	366,272	\$22.76

At March 31, 2014, the vested options totaled 251,436 shares with a weighted average exercise price of \$23.62 per share and a weighted average remaining contractual life of 2.72 years. The intrinsic value (the difference between the market price and the aggregate exercise price) for the vested options as of March 31, 2014, was \$1.1 million. The intrinsic value for the total of all options exercised during the three months ended March 31, 2014, was \$39,000.

The exercise price of stock options granted is established by the Compensation Committee, but the exercise price for the stock options may not be less than the fair market value of the shares on the date that the option is granted or, if greater, the par value of a share of stock. Each option granted is exercisable in full at any time or from time to time, subject to vesting provisions, as determined by the Compensation Committee and as provided in the option agreement, but such time may not exceed ten years from the grant date. Cash received from options exercised was \$96,000 for the three months ended March 31, 2014, and \$164,000 for the three months ended March 31, 2013.

Total compensation costs recorded for options were \$0 and \$10,000 for the three months ended March 31, 2014, and 2013, respectively. There are no unrecorded compensation costs related to options at March 31, 2014.

## Subsequent Events

Heartland had no subsequent events through the filing date of this quarterly report on Form 10-Q with the SEC.

## Effect of New Financial Accounting Standards

In July 2013, the FASB issued ASU No. 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists," to eliminate the diversity in practice and to increase the comparability of financial statements among companies. The guidance requires that a reporting entity generally must show an unrecognized tax benefit, or a portion of an unrecognized tax benefit, for a net operating loss carryforward, similar tax loss or a tax credit carryforward as a reduction of a deferred tax asset. However, the entity should present the unrecognized tax benefit as a liability and not as a reduction of a deferred tax asset if the carryforward or tax loss is not available on the financial statement date to settle any additional income tax liability that would result from the disallowance of the tax position under the applicable tax law, or the applicable tax law does not require the company to use, and the company does not intend to use, the carryforward or tax loss to settle additional income taxes resulting from the disallowance of the tax position. The guidance does not require any new

recurring disclosures because it does not affect the recognition or measurement of uncertain tax positions. Heartland adopted this standard on January 1, 2014, and the adoption did not have a material impact on the results of operations, financial position, and liquidity.

In January 2014, the FASB issued ASU 2014-01, "Accounting for Investments in Qualified Affordable Housing Projects." The amendments in ASU 2014-01 to Topic 323, "Equity Investments and Joint Ventures," provide guidance on accounting for investments by a reporting entity in flow-through limited liability entities that manage or invest in affordable housing projects that qualify for the low-income housing tax credit. The amendments permit reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in

---

proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). The amendments are effective for fiscal years, and interim periods within those years, beginning after December 31, 2014, and should be applied retrospectively to all periods presented. Early adoption is permitted. Heartland is in the process of evaluating the impact that adoption of this guidance will have on the results of operations, financial position, and liquidity.

In January 2014, the FASB issued ASU 2014-04, "Receivables-Troubled Debt Restructurings by Creditors: Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure." The amendments in ASU 2014-04 clarify that an in-substance foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (i) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (ii) the borrower conveying all interest in the residential real estate property to the creditor to satisfy the loan through completion of a deed in lieu of foreclosure or similar legal agreement. ASU 2014-04 also requires disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in loans collateralized by residential real estate property that are in the process of foreclosure. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2014, with early adoption permitted. Once adopted, an entity can elect either (i) a modified retrospective transition method or (ii) a prospective transition method. The modified retrospective transition method is applied by means of a cumulative-effect adjustment to residential mortgage loans and foreclosed residential real estate properties existing as of the beginning of the period for which the amendments of ASU 2014-04 are effective, with real estate reclassified to loans measured at the carrying value of the real estate at the date of adoption and loans reclassified to real estate measured at the lower of net carrying value of the loan or the fair value of the real estate less costs to sell at the date of adoption. The prospective transition method is applied by means of applying the amendments of ASU 2014-04 to all instances of receiving physical possession of residential real estate properties that occur after the date of adoption. Heartland does not expect the adoption of this standard to have a material impact on the results of operations, financial position, and liquidity.

#### Reclassifications

In the first quarter of 2014, Heartland revised the classification of mortgage servicing rights income from loan servicing income to gain on sale of loans held for sale. The reclassification is presented in both the current and prior reporting periods. For the three months ended March 31, 2014, \$1.4 million was reclassified from loan servicing income to gain on sale of loans held for sale. For the three months ended March 31, 2013, \$3.2 million was reclassified from loan servicing income to gain on sale of loans held for sale.

During the first quarter of 2014, Heartland revised the classification of loss on sales/valuations of other real estate and repossessed assets, net, from other real estate and loan collection expenses to a specific noninterest income classification. This reclassification is presented in both the current and prior reporting periods. For the three months ended March 31, 2014, losses of \$123,000 were reclassified from other real estate and loan collection expenses to other noninterest income. For the three months ended March 31, 2013, losses of \$502,000 were reclassified from other real estate and loan collection expenses to other noninterest income. This reclassification results in other real estate and loan collection expenses for the three months ended March 31, 2013, decreasing from \$1.3 million as previously reported to \$838,000.

These reclassifications do not have a material impact on Heartland's financial statements and do not affect the financial results. Heartland believes these reclassifications are more consistent with industry reporting practices.

## NOTE 2: SECURITIES

The amortized cost, gross unrealized gains and losses, and estimated fair values of securities available for sale as of March 31, 2014, and December 31, 2013, are summarized in the table below, in thousands:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
March 31, 2014				
U.S. government corporations and agencies	\$ 147,350	\$ 115	\$(769)	) \$ 146,696
Mortgage-backed securities	1,052,695	10,035	(13,109)	) 1,049,621
Obligations of states and political subdivisions	200,766	2,423	(3,791)	) 199,398
Total debt securities	1,400,811	12,573	(17,669)	) 1,395,715
Equity securities	5,005	36	—	) 5,041
Total	\$ 1,405,816	\$ 12,609	\$(17,669)	) \$ 1,400,756
December 31, 2013				
U.S. government corporations and agencies	\$ 220,157	\$ 147	\$(2,001)	) \$ 218,303
Mortgage-backed securities	1,156,983	9,538	(22,574)	) 1,143,947
Obligations of states and political subdivisions	277,320	1,706	(12,402)	) 266,624
Total debt securities	1,654,460	11,391	(36,977)	) 1,628,874
Equity securities	4,996	32	—	) 5,028
Total	\$ 1,659,456	\$ 11,423	\$(36,977)	) \$ 1,633,902

At both March 31, 2014, and December 31, 2013, the amortized cost of the available for sale securities is net of \$184,000 of credit related other-than-temporary impairment ("OTTI").

The amortized cost, gross unrealized gains and losses and estimated fair values of held to maturity securities as of March 31, 2014, and December 31, 2013, are summarized in the table below, in thousands:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
March 31, 2014				
Mortgage-backed securities	\$ 5,933	\$ 245	\$(372)	) \$ 5,806
Obligations of states and political subdivisions	251,994	8,416	(3,047)	) 257,363
Total	\$ 257,927	\$ 8,661	\$(3,419)	) \$ 263,169
December 31, 2013				
Mortgage-backed securities	\$ 5,973	\$ 199	\$(321)	) \$ 5,851
Obligations of states and political subdivisions	231,525	5,801	(5,740)	) 231,586
Total	\$ 237,498	\$ 6,000	\$(6,061)	) \$ 237,437

At March 31, 2014, the amortized cost of the held to maturity securities is net of \$797,000 of credit related OTTI and \$493,000 of non-credit related OTTI. At December 31, 2013, the amortized cost of the held to maturity securities was net of \$797,000 of credit related OTTI and \$517,000 of non-credit related OTTI.

Approximately 95% of Heartland's mortgage-backed securities are issuances of government-sponsored enterprises.

The amortized cost and estimated fair value of debt securities available for sale at March 31, 2014, by contractual maturity are as follows, in thousands. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without penalties.

	Amortized Cost	Estimated Fair Value
Due in 1 year or less	\$8,858	\$8,977
Due in 1 to 5 years	94,678	94,865
Due in 5 to 10 years	83,887	82,963
Due after 10 years	160,693	159,289
Total debt securities	348,116	346,094
Mortgage-backed securities	1,052,695	1,049,621
Equity securities	5,005	5,041
Total investment securities	\$1,405,816	\$1,400,756

The amortized cost and estimated fair value of debt securities held to maturity at March 31, 2014, by contractual maturity are as follows, in thousands. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without penalties.

	Amortized Cost	Estimated Fair Value
Due in 1 year or less	\$—	\$—
Due in 1 to 5 years	12,588	13,416
Due in 5 to 10 years	42,216	43,656
Due after 10 years	197,190	200,291
Total debt securities	251,994	257,363
Mortgage-backed securities	5,933	5,806
Total investment securities	\$257,927	\$263,169

Gross gains and losses realized related to the sales of securities available for sale for the three month periods ended March 31, 2014, and 2013, are summarized as follows, in thousands:

	Three Months Ended	
	March 31, 2014	2013
Proceeds from sales	\$355,288	\$91,840
Gross security gains	2,472	3,622
Gross security losses	1,691	195

---

The following tables summarize, in thousands, the amount of unrealized losses, defined as the amount by which cost or amortized cost exceeds fair value, and the related fair value of investments with unrealized losses in Heartland's securities portfolio as of March 31, 2014, and December 31, 2013. The investments were segregated into two categories: those that have been in a continuous unrealized loss position for less than 12 months and those that have been in a continuous unrealized loss position for 12 or more months. The reference point for determining how long an investment was in an unrealized loss position was March 31, 2013, and December 31, 2012, respectively. Securities for which Heartland has taken credit-related OTTI write-downs are categorized as being "less than 12 months" or "12 months or longer" in a continuous loss position based on the point in time that the fair value declined to below the cost basis and not the period of time since the credit-related OTTI write-down.

Securities available for sale	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
March 31, 2014						
U.S. government corporations and agencies	\$ 130,411	\$(769 )	\$—	\$—	\$ 130,411	\$(769 )

Heartland reviews the investment securities portfolio on a quarterly basis to monitor its exposure to OTTI. A determination as to whether a security's decline in fair value is other-than-temporary takes into consideration numerous factors and the relative significance of any single factor can vary by security. Some factors Heartland may consider in the OTTI analysis include the length of time the security has been in an unrealized loss position, changes in security ratings, financial condition of the issuer, as well as security and industry specific economic conditions. In addition, with regard to debt securities, Heartland may also evaluate payment structure, whether there are defaulted payments or expected defaults, prepayment speeds, and the value of any underlying collateral. For certain debt securities in unrealized loss positions, Heartland prepares cash flow analyses to compare the present value of cash

flows expected to be collected from the security with the amortized cost basis of the security. During 2012, Heartland experienced deterioration in the credit support on three private label mortgage-backed securities which resulted in a credit-related OTTI loss. The underlying collateral on these securities experienced an increased level of defaults and a slowing of voluntary prepayments causing the present value of the forward expected cash flows, using prepayment and default vectors, to be below the amortized cost basis of the securities. Based on Heartland's evaluation, a \$981,000 OTTI on three private label mortgage-backed securities attributable to credit-related losses was recorded in March 2012. The other-than-temporary credit-related losses were \$797,000 in the held to maturity category and \$184,000 in the available for sale category.

---

The remaining unrealized losses on Heartland's mortgage-backed securities are the result of changes in market interest rates or widening of market spreads subsequent to the initial purchase of the securities and not related to concerns regarding the underlying credit of the issuers or the underlying collateral. It is expected that the securities will not be settled at a price less than the amortized cost of the investment. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because Heartland has the intent and ability to hold these investments until a market price recovery or to maturity and does not believe it will be required to sell the securities before maturity, these investments are not considered other-than-temporarily impaired.

Unrealized losses on Heartland's obligations of states and political subdivisions are the result of changes in market interest rates or widening of market spreads subsequent to the initial purchase of the securities. Management monitors the credit quality and financial stability of the underlying municipalities. Because the decline in fair value is attributable to changes in interest rates or widening market spreads due to insurance company downgrades and not underlying credit quality, and because Heartland has the intent and ability to hold these investments until a market price recovery or to maturity and does not believe it will be required to sell the securities before maturity, these investments are not considered other-than-temporarily impaired.

There were no gross realized gains or losses on the sale of available for sale securities with OTTI write-downs for the periods ended March 31, 2014, or December 31, 2013.

The following table shows the detail of OTTI write-downs on debt securities included in earnings and the related changes in other accumulated comprehensive income ("AOCI") for the same securities, in thousands:

	Three Months Ended March 31,	
	2014	2013
Recorded as part of gross realized losses:		
Credit related OTTI	\$—	\$—
Intent to sell OTTI	—	—
Total recorded as part of gross realized losses	—	—
Recorded directly to AOCI for non-credit related impairment:		
Residential mortgage backed securities	—	—
Accretion of non-credit related impairment	(24	) (24
Total changes to AOCI for non-credit related impairment	(24	) (24
Total OTTI losses (accretion) recorded on debt securities, net	\$(24	) \$(24

Heartland has not experienced any OTTI writedowns since the initial impairment charge in 2012.

Included in other securities at March 31, 2014, and December 31, 2013, were shares of stock in each Federal Home Loan Bank (the "FHLB") of Des Moines, Chicago, Dallas, San Francisco, Seattle, and Topeka at an amortized cost of \$12.5 million and \$15.6 million, respectively.

## NOTE 3: LOANS AND LEASES

Loans and leases as of March 31, 2014, and December 31, 2013, were as follows, in thousands:

	March 31, 2014	December 31, 2013
Loans and leases receivable held to maturity:		
Commercial	\$986,713	\$950,197
Commercial real estate	1,560,912	1,529,683
Agricultural and agricultural real estate	370,348	376,735
Residential real estate	365,162	349,349
Consumer	297,978	294,145
Gross loans and leases receivable held to maturity	3,581,113	3,500,109
Unearned discount	(136	) (168
Deferred loan fees	(3,201	) (2,989
Total net loans and leases receivable held to maturity	3,577,776	3,496,952
Loans covered under loss share agreements:		
Commercial and commercial real estate	2,292	2,314
Agricultural and agricultural real estate	502	543
Residential real estate	2,062	2,280
Consumer	610	612
Total loans covered under loss share agreements	5,466	5,749
Allowance for loan and lease losses	(38,573	) (41,685
Loans and leases receivable, net	\$3,544,669	\$3,461,016

Heartland has certain lending policies and procedures in place that are designed to provide for an acceptable level of credit risk. The board of directors reviews and approves these policies and procedures on a regular basis. A reporting system supplements the review process by providing management and the board with frequent reports related to loan production, loan quality, concentrations of credit, loan delinquencies and nonperforming loans and potential problem loans. Diversification in the loan portfolio is also a means of managing risk associated with fluctuations in economic conditions.

The commercial and commercial real estate loan portfolio includes a wide range of business loans, including lines of credit for working capital and operational purposes and term loans for the acquisition of equipment and real estate. Although most loans are made on a secured basis, loans may be made on an unsecured basis where warranted by the overall financial condition of the borrower. Terms of commercial business loans generally range from one to five years. Commercial loans and leases are primarily made based on the identified cash flow of the borrower and secondarily on the underlying collateral provided by the borrower. The collateral that Heartland requires for most of these loans and leases is based upon the discounted market value of the collateral. The primary repayment risks of commercial loans and leases are that the cash flow of the borrowers may be unpredictable, and the collateral securing these loans may fluctuate in value. Heartland seeks to minimize these risks in a variety of ways. The underwriting analysis includes credit verification, analysis of global cash flows, appraisals and a review of the financial condition of the borrower. Personal guarantees are frequently required as a tertiary form of repayment. In addition, when underwriting loans for commercial real estate, careful consideration is given to the property's operating history, future operating projections, current and projected occupancy, location and physical condition. Heartland also utilizes government guaranteed lending through the U.S. Small Business Administration and the USDA Rural Development Business and Industry Program to assist customers with longer-term funding and to reduce risk.

Agricultural loans, many of which are secured by crops, machinery and real estate, are provided to finance capital improvements and farm operations as well as acquisitions of livestock and machinery. Agricultural loans present unique credit risks relating to adverse weather conditions, loss of livestock due to disease or other factors, declines in

market prices for agricultural products and the impact of government regulations. The ultimate repayment of agricultural loans is dependent upon the profitable operation or management of the agricultural entity. In underwriting agricultural loans, lending personnel work closely with their customers to review budgets and cash flow projections for the ensuing crop year. These budgets and cash flow projections are monitored closely during the year and reviewed with the customers at least annually. Lending personnel also work closely with governmental agencies, including the Farm Service Agency, to help agricultural customers obtain credit enhancement products such as loan guarantees or interest assistance.

---

Heartland originates first-lien, adjustable-rate and fixed-rate, one-to-four-family residential real estate loans for the construction, purchase or refinancing of a single family residential property. These loans are principally collateralized by owner-occupied properties and are amortized over 10 to 30 years. Heartland typically sells longer-term, low-rate, residential mortgage loans in the secondary market with servicing rights retained. This practice allows Heartland to better manage interest rate risk and liquidity risk. The Heartland bank subsidiaries participate in lending programs sponsored by U.S. government agencies such as Veterans Administration and Federal Home Administration when justified by market conditions.

Consumer lending includes motor vehicle, home improvement, home equity and small personal credit lines. Consumer loans typically have shorter terms, lower balances, higher yields and higher risks of default than one-to-four-family residential mortgage loans. Consumer loan collections are dependent on the borrower's continuing financial stability, and are therefore more likely to be affected by adverse personal circumstances. Risk is reduced through underwriting criteria, which include credit verification, appraisals, a review of the borrower's financial condition, and personal cash flows. A security interest, with title insurance when necessary, is taken in the underlying real estate. Heartland's consumer finance subsidiaries, Citizens Finance Co. and Citizens Finance of Illinois Co., typically lend to borrowers with past credit problems or limited credit histories, which comprise approximately 25% of Heartland's total consumer loan portfolio.

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Heartland's policy is to discontinue the accrual of interest income on any loan or lease when, in the opinion of management, there is a reasonable doubt as to the timely collection of the interest and principal, normally when a loan or lease is 90 days past due. When interest accruals are deemed uncollectible, interest credited to income in the current year is reversed and interest accrued in prior years is charged to the allowance for loan and lease losses. Nonaccrual loans and leases are returned to an accrual status when, in the opinion of management, the financial position of the borrower indicates that there is no longer any reasonable doubt as to the timely payment of interest and principal.

Under Heartland's credit practices, a loan is impaired when, based on current information and events, it is probable that Heartland will be unable to collect all amounts due according to the contractual terms of the loan agreement. Loan impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, except where more practical, at the observable market price of the loan or the fair value of the collateral if the loan is collateral dependent.

---

The following table shows the balance in the allowance for loan and lease losses at March 31, 2014, and December 31, 2013, and the related loan balances, disaggregated on the basis of impairment methodology, in thousands. Loans evaluated under ASC 310-10-35 include loans on nonaccrual status and troubled debt restructurings, which are individually evaluated for impairment, and other impaired loans deemed to have similar risk characteristics. All other loans are collectively evaluated for impairment under ASC 450-20. Heartland has made no significant changes to the accounting for the allowance for loan and lease losses policy during 2014.

	Allowance For Loan and Lease Losses			Gross Loans and Leases Receivable Held to Maturity		
	Ending Balance Under ASC 310-10-35	Ending Balance Under ASC 450-20	Total	Ending Balance Evaluated for Impairment Under ASC 310-10-35	Ending Balance Evaluated for Impairment Under ASC 450-20	Total
March 31, 2014						
Commercial	\$603	\$11,030	\$11,633	\$8,172	\$978,541	\$986,713

The following table presents nonaccrual loans, accruing loans past due 90 days or more and troubled debt restructured loans not covered under loss share agreements at March 31, 2014, and December 31, 2013, in thousands. There were no nonaccrual leases, accruing leases past due 90 days or more or restructured leases at March 31, 2014, and December 31, 2013.

	March 31, 2014	December 31, 2013
Nonaccrual loans	\$26,630	\$29,313
Nonaccrual troubled debt restructured loans	5,298	13,081
Total nonaccrual loans	\$31,928	\$42,394
Accruing loans past due 90 days or more	\$—	\$24
Performing troubled debt restructured loans	\$12,548	\$19,353

The following tables provide information on troubled debt restructured loans that were modified during the three months ended March 31, 2014, and March 31, 2013, dollars in thousands:

	Three Months Ended					
	March 31, 2014			2013		
	Number of Loans	Pre- Modification Recorded Investment	Post- Modification Recorded Investment	Number of Loans	Pre- Modification Recorded Investment	Post- Modification Recorded Investment
Commercial	—	\$—	\$—	2	\$4,670	\$4,670
Commercial real estate	1	368	368	—	—	—
Total commercial and commercial real estate	1	368	368	2	4,670	4,670
Agricultural and agricultural real estate	—	—	—	3	2,576	2,576
Residential real estate	—	—	—	2	646	646
Consumer	—	—	—	—	—	—
Total	1	\$368	\$368	7	\$7,892	\$7,892

The pre-modification and post-modification recorded investment represents amounts as of the date of loan modification. Since the modifications on these loans have been only interest rate concessions and term extensions, not principal reductions, the pre-modification and post-modification recorded investment amounts are the same. At March 31, 2014, there were no commitments to extend credit to any of the borrowers with an existing troubled debt restructuring.

Heartland had no troubled debt restructured loans for which there was a payment default during the three months ended March 31, 2014, and March 31, 2013, that had been modified during the twelve-month period prior to the default.

Heartland's internal rating system is a series of grades reflecting management's risk assessment, based on its analysis of the borrower's financial condition. The "pass" category consists of all loans that are not in the "nonpass" category, categorized into a range of loan grades that reflect increasing, though still acceptable, risk. Movement of risk through the various grade levels in the pass category is monitored for early identification of credit deterioration. The "nonpass" category consists of special mention, substandard, doubtful and loss loans. The "special mention" rating is attached to loans where the borrower exhibits negative financial trends due to borrower specific or systemic conditions that, if left uncorrected, threaten its capacity to meet its debt obligations. The borrower is believed to have sufficient financial flexibility to react to and resolve its negative financial situation. These credits are closely monitored for improvement or deterioration. The "substandard" rating is assigned to loans that are inadequately protected by the current sound net worth and paying capacity of the borrower and may be further at risk due to deterioration in the value of collateral pledged. Well-defined weaknesses jeopardize liquidation of the debt. These loans are still considered collectible, however, a distinct possibility exists that Heartland will sustain some loss if deficiencies are not corrected. Substandard loans may exhibit some or all of the following weaknesses: deteriorating trends, lack of earnings, inadequate debt service capacity, excessive debt and/or lack of liquidity. The "doubtful" rating is assigned to loans where identified weaknesses make collection or liquidation in full, on the basis of existing facts, conditions and values, highly questionable and improbable. These borrowers are usually in default, lack liquidity and capital, as well as, resources necessary to remain an operating entity. Specific pending events, such as capital injections, liquidations or perfection of liens on additional collateral, may strengthen the credit, thus deferring classification of the loan as loss until exact status can be determined. The "loss" rating is assigned to loans considered uncollectible. As of March 31, 2014, Heartland had no loans classified as doubtful or loss. Loans are placed on "nonaccrual" when management does not expect to collect payments of principal and interest in full or when principal or interest has been in default for a

period of 90 days or more, unless the loan is both well secured and in the process of collection.

---

The following table presents loans and leases not covered by loss share agreements by credit quality indicator at March 31, 2014, and December 31, 2013, in thousands:

	Pass	Nonpass	Total
March 31, 2014			
Commercial	\$896,019	\$90,694	\$986,713
Commercial real estate	1,401,965	158,947	1,560,912

The nonpass category in the table above is comprised of approximately 70% special mention and 30% substandard as of March 31, 2014. The percent of nonpass loans on nonaccrual status as of March 31, 2014, was 10%. As of December 31, 2013, the nonpass category in the table above was comprised of approximately 59% special mention, 38% substandard, and 3% doubtful. The percent of nonpass loans on nonaccrual status as of December 31, 2013, was 15%. Loans delinquent 30 to 89 days as a percent of total loans were 0.31% at March 31, 2014 compared to .30% at December 31, 2013. Changes in credit risk are monitored on a continuous basis and changes in risk ratings are made when identified. All impaired loans are reviewed at least annually.

The following table sets forth information regarding Heartland's accruing and nonaccrual loans and leases not covered by loss share agreements at March 31, 2014, and December 31, 2013, in thousands:

	Accruing Loans and Leases			Total Past Due	Current	Nonaccrual	Total Loans and Leases

The majority of Heartland's impaired loans are those that are nonaccrual, are past due 90 days or more and still accruing or have had their terms restructured in a troubled debt restructuring. The following tables present, for impaired loans not covered by loss share agreements and by category of loan, the unpaid contractual balance at March 31, 2014, and December 31, 2013; the outstanding loan balance recorded on the consolidated balance sheets at March 31, 2014, and December 31, 2013; any related allowance recorded for those loans as of March 31, 2014, and December 31, 2013; the average outstanding loan balance recorded on the consolidated balance sheets during the three months ended March 31, 2014, and year ended December 31, 2013; and the interest income recognized on the impaired loans during the three months ended March 31, 2014, and year ended December 31, 2013, in thousands:

On July 2, 2009, Heartland acquired all deposits of The Elizabeth State Bank in Elizabeth, Illinois through its subsidiary Galena State Bank & Trust Co. based in Galena, Illinois, in a whole bank loss sharing transaction facilitated by the FDIC. As of July 2, 2009, The Elizabeth State Bank had loans of \$42.7 million. The estimated fair value of the loans acquired was \$37.8 million.

The acquired loans and other real estate owned are covered by two loss share agreements between the FDIC and Galena State Bank & Trust Co., which affords Galena State Bank & Trust Co. significant loss protection. Under the loss share agreements, the FDIC covers 80% of the covered loan and other real estate owned losses (referred to as

covered assets) up to \$10 million and 95% of losses in excess of that amount. The term for loss sharing on non-residential real estate losses is five years with respect to losses and eight years with respect to recoveries, while the term for loss sharing on residential real estate loans is ten years with respect to losses and recoveries. The reimbursable losses from the FDIC are based on the book value of the relevant loan as determined by the FDIC at the date of the transaction. New loans made after the acquisition are not covered by the loss share agreements.

The Elizabeth State Bank acquisition was accounted for under the acquisition method of accounting in accordance with ASC 805, "Business Combinations." Purchased loans acquired in a business combination, which include loans purchased in The Elizabeth State Bank acquisition, are recorded at estimated fair value on their purchase date, but the purchaser cannot carry over the related allowance for loan and lease losses. Purchased loans are accounted for under ASC 310-30, "Loans and Debt Securities with Deteriorated Credit Quality," when the loans have evidence of credit deterioration since origination and it is probable at the date of the acquisition that Heartland will not collect all contractually required principal and interest payments. Evidence of credit quality deterioration at the purchase date included statistics such as past due and nonaccrual status.

---

Generally, acquired loans that meet Heartland's definition for nonaccrual status fall within the scope of ASC 310-30. The difference between contractually required payments at acquisition and the cash flows expected to be collected at acquisition is referred to as the nonaccretable difference which is included in the carrying value of the loans. Subsequent decreases to the expected cash flows will generally result in a provision for loan and lease losses. Subsequent increases in cash flows result in a reversal of the provision for loan and lease losses to the extent of prior charges, or a reclassification of the difference from nonaccretable to accretable with a positive impact on future interest income. Further, any excess of cash flows expected at acquisition over the estimated fair value is referred to as the accretable yield and is recognized into interest income over the remaining life of the loan when there is a reasonable expectation about the amount and timing of such cash flows.

The carrying amount of the loans covered by these loss share agreements at March 31, 2014, and December 31, 2013, consisted of purchased impaired and nonimpaired loans as summarized in the following table, in thousands:

	March 31, 2014			December 31, 2013		
	Impaired Purchased Loans	Non Impaired Purchased Loans	Total Covered Loans	Impaired Purchased Loans	Non Impaired Purchased Loans	Total Covered Loans
Commercial and commercial real estate	\$565	\$1,727	\$2,292	\$549	\$1,765	\$2,314
Agricultural and agricultural real estate	—	502	502	—	543	543
Residential real estate	—	2,062	2,062	—	2,280	2,280
Consumer loans	574	36	610	538	74	612
Total Covered Loans	\$1,139	\$4,327	\$5,466	\$1,087	\$4,662	\$5,749

On the acquisition date, the preliminary estimate of the contractually required payments receivable for all loans with evidence of credit deterioration since origination acquired in the acquisition was \$13.8 million and the estimated fair value of the loans was \$9.0 million. At March 31, 2014, and December 31, 2013, a majority of these loans were valued based upon the liquidation value of the underlying collateral, because the expected cash flows are primarily based on the liquidation of underlying collateral and the timing and amount of the cash flows could not be reasonably estimated. There was no allowance for loan and lease losses related to these ASC 310-30 loans at March 31, 2014, and December 31, 2013.

On the acquisition date, the preliminary estimate of the contractually required payments receivable for all nonimpaired loans acquired in the acquisition was \$28.9 million and the estimated fair value of the loans was \$28.7 million.

#### NOTE 4: ALLOWANCE FOR LOAN AND LEASE LOSSES

Changes in the allowance for loan and lease losses for the three months ended March 31, 2014, and March 31, 2013, were as follows, in thousands:

	Commercial	Commercial Real Estate	Agricultural	Residential Real Estate	Consumer	Unallocated	Total
Balance at December 31, 2013	\$13,099	\$14,152	\$2,992	\$3,720	\$7,722	\$—	\$41,685
Charge-offs	(6,917)	(923)	(1,511)	(149)	(1,158)	—	(10,658)
Recoveries	199	780	2	26	208	—	1,215
Provision	5,252	(999)	1,088	74	604	312	6,331
Balance at March 31, 2014	\$11,633	\$13,010	\$2,571	\$3,671	\$7,376	\$312	\$38,573
	Commercial	Commercial Real Estate	Agricultural	Residential Real Estate	Consumer	Unallocated	Total

Edgar Filing: HEARTLAND FINANCIAL USA INC - Form 10-Q

Balance at December 31, 2012	\$11,388	\$14,473	\$2,138	\$3,543	\$7,173	\$—	\$38,715
Charge-offs	(538	) (1,243	) (23	) (265	) (995	) —	(3,064
Recoveries	781	186	12	7	254	—	1,240
Provision	(2,332	) 1,774	68	(19	) 1,146	—	637
Balance at March 31, 2013	\$9,299	\$15,190	\$2,195	\$3,266	\$7,578	\$—	\$37,528

Management allocates the allowance for loan and leases losses by pools of risk within each loan portfolio. The allocation of the allowance for loan and lease losses by loan portfolio is made for analytical purposes and is not necessarily indicative of the

---

trend of future loan and lease losses in any particular category. The total allowance for loan and lease losses is available to absorb losses from any segment of the loan portfolio.

#### NOTE 5: GOODWILL, CORE DEPOSIT PREMIUM AND OTHER INTANGIBLE ASSETS

Heartland had goodwill of \$35.6 million at both March 31, 2014, and December 31, 2013. Heartland conducts its annual internal assessment of the goodwill both collectively and at its subsidiaries as of September 30.

Other intangible assets consist of core deposit intangibles, mortgage servicing rights and customer relationship intangible. The gross carrying amount of other intangible assets and the associated accumulated amortization at March 31, 2014, and December 31, 2013, are presented in the table below, in thousands:

	March 31, 2014			December 31, 2013		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Amortizing intangible assets:						
Core deposit intangibles	\$21,069	\$10,959	\$10,110	\$21,069	\$10,345	\$10,724
Mortgage servicing rights	33,134	10,990	22,144	32,160	10,372	21,788
Customer relationship intangible	1,177	741	436	1,177	730	447
Total	\$55,380	\$22,690	\$32,690	\$54,406	\$21,447	\$32,959

The following table shows the estimated future amortization expense for amortizable intangible assets, in thousands:

	Core Deposit Intangibles	Mortgage Servicing Rights	Customer Relationship Intangible	Total
Nine months ending December 31, 2014	\$1,566	\$3,237	\$32	\$4,835
Year ending December 31,				
2015	1,780	4,727	42	6,549
2016	1,575	4,052	41	5,668
2017	1,393	3,376	40	4,809
2018	1,232	2,701	39	3,972
2019	1,056	2,026	38	3,120
Thereafter	1,508	2,025	204	3,737

Projections of amortization expense for mortgage servicing rights are based on existing asset balances and the existing interest rate environment as of March 31, 2014. Heartland's actual experience may be significantly different depending upon changes in mortgage interest rates and market conditions. Mortgage loans serviced for others were \$3.11 billion and \$3.05 billion as of March 31, 2014, and December 31, 2013, respectively. The fair value of Heartland's mortgage servicing rights was estimated at \$32.0 million at both March 31, 2014, and December 31, 2013.

Heartland's mortgage servicing rights portfolio is comprised of loans serviced for the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, and the Government National Mortgage Association. The servicing rights portfolio is separated into 15- and 30-year tranches. At both March 31, 2014, and December 31, 2013, no valuation allowance was required for any of the tranches.

The fair value of mortgage servicing rights is calculated based upon a discounted cash flow analysis. Cash flow assumptions, including prepayment speeds, servicing costs and escrow earnings are considered in the calculation. The average constant prepayment rate was 10.05% and 9.65% for the March 31, 2014, and December 31, 2013, valuations,

respectively. The discount rate was 9.66% and 10.15% for the March 31, 2014, and December 31, 2013, valuations, respectively. The average capitalization rate for the first three months of 2014 ranged from 0.83% to 1.16% compared to 0.79% and 1.39% for 2013. Fees collected for the servicing of mortgage loans for others were \$2.1 million and \$1.4 million for the three months ended March 31, 2014, and March 31, 2013, respectively.

---

The following table summarizes, in thousands, the changes in capitalized mortgage servicing rights for the three month period ended March 31, 2014 and 2013:

	2014		2013	
Balance at January 1	\$21,788		\$15,653	
Originations	1,435		3,245	
Amortization	(1,079	)	(1,761	)
Valuation adjustment	—		496	
Balance at March 31	\$22,144		\$17,633	
Fair value of mortgage servicing rights	\$32,032		\$19,389	
Mortgage servicing rights, net to servicing portfolio	0.71		% 0.58	%

#### NOTE 6: DERIVATIVE FINANCIAL INSTRUMENTS

Heartland uses derivative financial instruments as part of its interest rate risk management strategy. As part of the strategy, Heartland considers the use of interest rate swaps, caps, floors and collars and certain interest rate lock commitments and forward sales of securities related to mortgage banking activities. Heartland's current strategy includes the use of interest rate swaps, interest rate lock commitments, and forward sales of mortgage securities. Heartland's objectives are to add stability to its net interest margin and to manage its exposure to movements in interest rates. The contract or notional amount of a derivative is used to determine, along with the other terms of the derivative, the amounts to be exchanged between the counterparties. Heartland is exposed to credit risk in the event of nonperformance by counterparties to financial instruments. Heartland minimizes this risk by entering into derivative contracts with large, stable financial institutions. Heartland has not experienced any losses from nonperformance by these counterparties. Heartland monitors counterparty risk in accordance with the provisions of ASC 815. In addition, interest rate-related derivative instruments generally contain language outlining collateral pledging requirements for each counterparty. Collateral must be posted when the market value exceeds certain threshold limits which are determined by credit ratings of each counterparty. Heartland was required to pledge \$4.0 million and \$5.4 million of cash as collateral at March 31, 2014, and December 31, 2013, respectively. Heartland's counterparties were required to pledge \$0 and \$540,000 at March 31, 2014, and December 31, 2013, respectively.

Heartland's derivative and hedging instruments are recorded at fair value on the consolidated balance sheets. See Note 7, "Fair Value," for additional fair value information and disclosures.

#### Cash Flow Hedges

Heartland has variable rate funding which creates exposure to variability in interest payments due to changes in interest rates. To manage the interest rate risk related to the variability of interest payments, Heartland has entered into various interest rate swap agreements. Amounts reported in accumulated other comprehensive income (loss) related to derivatives will be reclassified to interest expense as interest payments are received or made on Heartland's variable-rate liabilities. For the three months ended March 31, 2014, the change in net unrealized losses on cash flow hedges reflects changes in the fair value of the swaps and reclassification from accumulated other comprehensive income (loss) to interest expense totaling \$521,000. For the next twelve months, Heartland estimates that cash payments and reclassification from accumulated other comprehensive income (loss) to interest expense will total \$2.1 million.

Heartland executed an interest rate swap transaction on April 5, 2011, with an effective date of April 20, 2011, and an expiration date of April 20, 2016, to effectively convert \$15.0 million of its newly issued variable rate amortizing debt to fixed rate debt. For accounting purposes, this swap transaction is designated as a cash flow hedge of the changes in cash flows attributable to changes in one-month LIBOR, the benchmark interest rate being hedged, associated with the interest payments made on an amount of Heartland's debt principal equal to the then-outstanding swap notional

amount. At inception, Heartland asserted that the underlying principal balance would remain outstanding throughout the hedge transaction making it probable that sufficient LIBOR-based interest payments would exist through the maturity date of the swap.

Heartland entered into three forward-starting interest rate swap transactions during 2009 to effectively convert Heartland Financial Statutory Trust IV, V and VII, which are variable interest rate subordinated debentures, to fixed interest rate debt. During the first quarter of 2014, the interest rate swap transaction on Heartland Financial Statutory Trust IV expired. Prior to the expiration of the swap, Heartland entered into a new forward-starting interest rate swap to replace the expiring swap. In addition, Heartland added two new forward starting interest rate swap transactions to effectively convert Morrill Statutory Trust I and Morrill Statutory Trust II, which total \$16.6 million, from variable interest rate subordinated debentures to fixed interest

---

rate debt. For accounting purposes, these five swap transactions are designated as cash flow hedges of the changes in cash flows attributable to changes in LIBOR, the benchmark interest rate being hedged, associated with the interest payments made on \$85.0 million of Heartland's subordinated debentures that reset quarterly on a specified reset date. At inception, Heartland asserted that the underlying principal balance would remain outstanding throughout the hedge transaction making it probable that sufficient LIBOR-based interest payments would exist through the maturity date of the swaps.

The table below identifies the balance sheet category and fair values of Heartland's derivative instruments designated as cash flow hedges at March 31, 2014, and December 31, 2013, in thousands:

	Notional Amount	Fair Value	Balance Sheet Category	Receive Rate	Weighted Average Pay Rate	Maturity
March 31, 2014						
Interest rate swap	\$11,388	\$(406)	) Other Liabilities	2.910	% 5.140	% 04/20/2016
Interest rate swap	25,000	62	) Other Assets	0.233	% 2.255	% 03/17/2021
Interest rate swap	20,000	(1,393)	) Other Liabilities	0.236	% 3.220	% 03/01/2017
Interest rate swap	20,000	(1,668)	) Other Liabilities	0.240	% 3.355	% 01/07/2020
Interest rate swap	10,000	45	) Other Assets	0.235	% 1.674	% 03/26/2019
Interest rate swap	10,000	45	) Other Assets	0.233	% 1.658	% 03/18/2019
December 31, 2013						
Interest rate swap	\$11,719	\$(457)	) Other Liabilities	2.917	% 5.140	% 04/20/2016
Interest rate swap	25,000	(146)	) Other Liabilities	0.244	% 2.580	% 03/17/2014
Interest rate swap	20,000	(1,507)	) Other Liabilities	0.239	% 3.220	% 03/01/2017
Interest rate swap	20,000	(1,587)	) Other Liabilities	0.243	% 3.355	% 01/07/2020

The table below identifies the gains and losses recognized on Heartland's derivative instruments designated as cash flow hedges for the three months ended March 31, 2014, and March 31, 2013, in thousands:

	Effective Portion			Ineffective Portion		
	Recognized in OCI Amount of Gain (Loss)	Reclassified from AOCI into Income Category	Amount of Gain (Loss)	Recognized in Income on Derivatives Category	Amount of Gain (Loss)	
March 31, 2014						
Interest rate swap	\$51	Interest Expense	\$(65)	) Other Income	\$—	
Interest rate swap	146	Interest Expense	(146)	) Other Income	—	
Interest rate swap	62	Interest Expense	—	) Other Income	—	
Interest rate swap	114	Interest Expense	(151)	) Other Income	—	
Interest rate swap	(81)	) Interest Expense	(159)	) Other Income	—	
Interest rate swap	45	Interest Expense	—	) Other Income	—	
Interest rate swap	45	Interest Expense	—	) Other Income	—	
March 31, 2013						
Interest rate swap	\$66	Interest Expense	\$(71)	) Other Income	\$—	
Interest rate swap	143	Interest Expense	(142)	) Other Income	—	
Interest rate swap	131	Interest Expense	(142)	) Other Income	—	
Interest rate swap	247	Interest Expense	(150)	) Other Income	—	

Mortgage Derivatives

Heartland also has entered into interest rate lock commitments to originate residential mortgage loans held for sale and forward commitments to sell residential mortgage loans and mortgage backed securities that are considered derivative instruments. The fair value of these commitments is recorded on the consolidated balance sheets with the changes in fair value recorded in the consolidated statements of income as a component of gains on sale of loans held for sale. These derivative contracts are

---

designated as free standing derivative contracts and are not designated against specific assets and liabilities on the consolidated balance sheets or forecasted transactions and therefore do not qualify for hedge accounting treatment.

The table below identifies the balance sheet category and fair values of Heartland's derivative instruments not designated as hedging instruments at March 31, 2014, and December 31, 2013, in thousands:

	Balance Sheet Category	Notional Amount	Fair Value
March 31, 2014			
Interest rate lock commitments (mortgage)	Other Assets	\$92,583	\$2,993
Forward commitments	Other Assets	108,333	238
Forward commitments	Other Liabilities	98,823	(307)
December 31, 2013			
Interest rate lock commitments (mortgage)	Other Assets	\$63,370	\$1,809
Forward commitments	Other Assets	117,637	1,206
Forward commitments	Other Liabilities	53,277	(133)

The table below identifies the income statement category of the gains and losses recognized in income on Heartland's derivative instruments not designated as hedging instruments for the three months ended March 31, 2014, and March 31, 2013, in thousands:

	Income Statement Category	Year-to-Date Gain (Loss) Recognized
March 31, 2014		
Interest rate lock commitments (mortgage)	Gains on sale of loans held for sale	\$1,882
Forward commitments	Gains on sale of loans held for sale	(1,142)
March 31, 2013		
Interest rate lock commitments (mortgage)	Gains on sale of loans held for sale	\$(3,161)
Forward commitments	Gains on sale of loans held for sale	372

#### NOTE 7: FAIR VALUE

Heartland utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Securities available for sale, trading securities and derivatives are recorded in the consolidated balance sheets at fair value on a recurring basis. Additionally, from time to time, Heartland may be required to record at fair value other assets on a nonrecurring basis such as loans held for sale, loans held to maturity and certain other assets including, but not limited to, mortgage servicing rights and other real estate owned. These nonrecurring fair value adjustments typically involve application of lower of cost or fair value accounting or write-downs of individual assets.

#### Fair Value Hierarchy

Under ASC 820, assets and liabilities are grouped at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 — Valuation is based upon quoted prices for identical instruments in active markets.

Level 2 — Valuation is based upon quoted prices for similar instruments in active markets, or similar instruments in markets that are not active, and model-based valuation techniques for all significant assumptions are observable in the market.

Level 3 — Valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

---

The following is a description of valuation methodologies used for assets and liabilities recorded at fair value on a recurring or non-recurring basis.

#### Assets

##### Securities Available for Sale and Held to Maturity

Securities available for sale are recorded at fair value on a recurring basis. Securities held to maturity are generally recorded at cost and are recorded at fair value only to the extent a decline in fair value is determined to be other-than-temporary. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, as well as U.S. Treasury securities. Level 2 securities include U.S. government and agency securities, mortgage-backed securities and private collateralized mortgage obligations, municipal bonds and corporate debt securities. Level 3 securities consist primarily of Z-TRANCHE mortgage-backed securities. On a quarterly basis, a secondary independent pricing service is used for a sample of securities to validate the pricing from Heartland's primary pricing service.

##### Trading Assets

Trading assets are recorded at fair value and consist of securities held for trading purposes. The valuation method for trading securities is the same as the methodology used for securities classified as available for sale.

##### Loans Held for Sale

Loans held for sale are carried at the lower of cost or fair value on an aggregate basis. The fair value of loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, Heartland classifies loans held for sale subjected to nonrecurring fair value adjustments as Level 2.

##### Loans Held to Maturity

Heartland does not record loans held to maturity at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with ASC 310. The fair value of impaired loans is measured using one of the following impairment methods: 1) the present value of expected future cash flows discounted at the loan's effective interest rate or 2) the observable market price of the loan or the fair value of the collateral if the loan is collateral dependent. In accordance with ASC 820, impaired loans measured at fair value are classified as nonrecurring Level 3 in the fair value hierarchy.

##### Mortgage Servicing Rights

Mortgage servicing rights assets represent the value associated with servicing residential real estate loans that have been sold to outside investors with servicing retained. Heartland uses the amortization method (i.e., the lower of amortized cost or estimated fair value measured on a nonrecurring basis), not fair value measurement accounting, to determine the carrying value of its mortgage servicing rights. The fair value for servicing assets is determined through discounted cash flow analysis and utilizes discount rates, prepayment speeds and delinquency rate assumptions as inputs. All of these assumptions require a significant degree of management estimation and judgment. Mortgage servicing rights are subject to impairment testing. The carrying values of these rights are reviewed quarterly for impairment based upon the calculation of fair value as performed by an outside third party. For purposes of measuring impairment, the rights are stratified into certain risk characteristics including note type and note term. If the valuation model reflects a fair value less than the carrying value, mortgage servicing rights are adjusted to fair value through a valuation allowance. Heartland classifies mortgage servicing rights as nonrecurring with Level 3 measurement inputs.

#### Derivative Financial Instruments

Heartland's current interest rate risk strategy includes interest rate swaps. The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. To comply with the provisions of ASC 820, Heartland incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, Heartland has considered the impact of netting any applicable credit enhancements, such as collateral postings, thresholds, mutual puts, and guarantees.

---

Although Heartland has determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of March 31, 2014, and December 31, 2013, Heartland has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, Heartland has determined that its derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

#### Interest rate lock commitments

Heartland uses an internal valuation model that relies on internally developed inputs to estimate the fair value of its interest rate lock commitments which is based on unobservable inputs that reflect management's assumptions and specific information about each borrower. Interest rate lock commitments are classified in Level 3 of the fair value hierarchy.

#### Forward commitments

The fair value of forward commitments are estimated using an internal valuation model, which includes current trade pricing for similar financial instruments in active markets that Heartland has the ability to access and are classified in Level 2 of the fair value hierarchy.

#### Other Real Estate Owned

Other real estate owned ("OREO") represents property acquired through foreclosures and settlements of loans. Property acquired is carried at the fair value of the property at the time of acquisition (representing the property's cost basis), plus any acquisition costs, or the estimated fair value of the property, less disposal costs. Heartland considers third party appraisals, as well as independent fair value assessments from realtors or persons involved in selling OREO, in determining the fair value of particular properties. Accordingly, the valuation of OREO is subject to significant external and internal judgment. Heartland periodically reviews OREO to determine if the fair value of the property, less disposal costs, has declined below its recorded book value and records any adjustments accordingly. OREO is classified as nonrecurring Level 3.

---

The table below presents Heartland's assets and liabilities that are measured at fair value on a recurring basis as of March 31, 2014, and December 31, 2013, in thousands, aggregated by the level in the fair value hierarchy within which those measurements fall:

	Total Fair Value	Level 1	Level 2	Level 3
March 31, 2014				
Assets				
Trading securities	\$—	\$—	\$—	\$—
Securities available for sale				
U.S. government corporations and agencies	146,696	2,555	144,141	—

Equity securities	5,028	—	5,028	—
Interest rate lock commitments	1,809	—	—	1,809
Forward commitments	1,206	—	1,206	—
Total assets at fair value	\$1,638,718	\$5,885	\$1,627,726	\$5,107
Liabilities				
Derivative financial instruments	\$3,697	\$—	\$3,697	\$—
Forward commitments	133	—	133	—
Total liabilities at fair value	\$3,830	\$—	\$3,830	\$—

As of March 31, 2014, Heartland revised the classification of interest rate lock commitments from previous filings. In previous filings, interest rate lock commitments were classified as Level 2 under ASC 820. The resulting change in presentation does not have a material impact on the financial statements and did not affect the method by which Heartland estimates fair value, nor the resulting fair values.

The tables below present Heartland's assets that are measured at fair value on a nonrecurring basis, in thousands:

Fair Value Measurements at March 31, 2014

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Losses
Collateral dependent impaired loans:					
Commercial	\$440	\$—	\$—	\$440	\$153
Commercial real estate	6,585	—	—	6,585	583
Agricultural and agricultural real estate	4,926	—	—	4,926	1,510
Residential real estate	2,764	—	—	2,764	—
Consumer	2,613	—	—	2,613	—
Total collateral dependent impaired loans	\$17,328	\$—	\$—	\$17,328	\$2,246
Other real estate owned	\$28,083	\$—	\$—	\$28,083	\$123

Fair Value Measurements at December 31, 2013

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Losses
Collateral dependent impaired loans:					
Commercial	\$7,229	\$—	\$—	\$7,229	\$919
Commercial real estate	7,749	—	—	7,749	1,881
Agricultural and agricultural real estate	13,062	—	—	13,062	—
Residential real estate	3,396	—	—	3,396	—
Consumer	1,763	—	—	1,763	—
Total collateral dependent impaired loans	\$33,199	\$—	\$—	\$33,199	\$2,800
Other real estate owned	\$29,852	\$—	\$—	\$29,852	\$2,799

The following tables present additional quantitative information about assets measured at fair value and for which Heartland has utilized Level 3 inputs to determine fair value, in thousands:

	Quantitative Information About Level 3 Fair Value Measurements			
	Fair Value at 3/31/14	Valuation Technique	Unobservable Input	Range (Weighted Average)
Z-TRANCHE Securities	\$4,330	Discounted cash flows	Pretax discount rate Actual defaults Actual deferrals	7.00 - 8.50% 12.71-20.14% (15.52%) 6.25-22.35% (11.32%)
Interest rate lock commitments	2,993	Discounted cash flows	Closing ratio	(1)
Collateral dependent impaired loans:				
Commercial	440	Modified appraised value	Third party appraisal Appraisal discount	(2) (2)
Commercial real estate	6,585	Modified appraised value	Third party appraisal Appraisal discount	(2) (2)
Agricultural and agricultural real estate	4,926	Modified appraised value	Third party appraisal Appraisal discount	(2) (2)
Residential real estate	2,764	Modified appraised value	Third party appraisal Appraisal discount	(2) (2)
Consumer	2,613	Modified appraised value	Third party appraisal Appraisal discount	(2) (2)
Other real estate owned	28,083	Modified appraised value	Third party appraisal Appraisal discount	(2)

(1) The significant unobservable input used in the fair value measurement is the closing ratio, which represents the percentage of loans currently in a lock position which management estimates will ultimately close. The closing ratio calculation takes into consideration historical data and loan-level data; therefore providing a range would not be meaningful. The closing ratio at March 31, 2014 was 85%.

(2) Third party appraisals are obtained as to the value of the underlying asset, but disclosure of this information would not provide meaningful information, as the range will vary widely from loan to loan. Types of discounts considered included age of the appraisal, local market conditions, current condition of the property, and estimated sales costs. These discounts will also vary from loan to loan, thus providing range would not be meaningful.

	Quantitative Information About Level 3 Fair Value Measurements			
	Fair Value at 12/31/13	Valuation Technique	Unobservable Input	Range (Weighted Average)
Z-TRANCHE Securities	\$3,298	Discounted cash flows	Pretax discount rate	7.00 - 9.00%
			Actual defaults	12.50-28.20% (20.80%)
			Actual deferrals	6.10-16.00% (11.10%)
Interest rate lock commitments	1,809	Discounted cash flows	Closing ratio	(1)
Collateral dependent impaired loans:				
Commercial	7,229	Modified appraised value	Third party appraisal	(2)
			Appraisal discount	(2)
Commercial real estate	7,749	Modified appraised value	Third party appraisal	(2)
			Appraisal discount	(2)
Agricultural and agricultural real estate	13,062	Modified appraised value	Third party appraisal	(2)
			Appraisal discount	(2)
Residential real estate	3,396	Modified appraised value	Third party appraisal	(2)
			Appraisal discount	(2)
Consumer	1,763	Modified appraised value	Third party appraisal	(2)
			Appraisal discount	(2)
Other real estate owned	29,852	Modified appraised value	Third party appraisal	(2)
			Appraisal discount	

(1) The significant unobservable input used in the fair value measurement is the closing ratio, which represents the percentage of loans currently in a lock position which management estimates will ultimately close. The closing ratio calculation takes into consideration historical data and loan-level data; therefore providing a range would not be meaningful. The closing ratio at December 31, 2013 was 87%.

(2) Third party appraisals are obtained as to the value of the underlying asset, but disclosure of this information would not provide meaningful information, as the range will vary widely from loan to loan. Types of discounts considered included age of the appraisal, local market conditions, current condition of the property, and estimated sales costs. These discounts will also vary from loan to loan, thus providing range would not be meaningful.

The changes in fair value of the Z-TRANCHE, a Level 3 asset, that is measured on a recurring basis is summarized in the following table, in thousands:

	For the Three Months Ended March 31, 2014	For the Year Ended December 31, 2013
Balance at January 1,	\$3,298	\$4,089
Total gains (losses):		
Included in earnings	—	(1,587 )
Included in other comprehensive income	1,062	826
Purchases, issuances, sales and settlements:		
Purchases	—	—
Sales	(30	) (30 )
Settlements	—	—
Balance at period end	\$4,330	\$3,298

The changes in fair value of the interest rate lock commitments, which are Level 3 financial instruments and are measured on a recurring basis, are summarized in the following table, in thousands:

	For the Three Months Ended March 31, 2014	For the Year Ended December 31, 2013
Balance at January 1,	\$1,809	\$9,353
Total gains (losses) included in earnings	1,882	(10,518 )
Settlements	(698	) 2,974
Balance at period end	\$2,993	\$1,809

For the three months ended March 31, 2014, \$3.0 million of gains are included in gains (losses) on sales of loans held for sale attributable to interest rate lock commitments held at March 31, 2014. For the year ended December 31, 2013, \$1.8 million of losses are included in gains (losses) of loans held for sale attributable to interest rate lock commitments held at December 31, 2013.

The tables below summarize the estimated fair value of Heartland's financial instruments as defined by ASC 825 as of March 31, 2014, and December 31, 2013, in thousands. The carrying amounts in the following tables are recorded in the consolidated balance sheets under the indicated captions. In accordance with ASC 825, the assets and liabilities that are not financial instruments are not included in the disclosure, such as the value of the mortgage servicing rights, premises, furniture and equipment, goodwill and other intangibles and other liabilities.

Heartland does not believe that the estimated information presented herein is representative of the earnings power or value of Heartland. The following analysis, which is inherently limited in depicting fair value, also does not consider any value associated with either existing customer relationships or the ability of Heartland to create value through loan origination, deposit gathering or fee generating activities. Many of the estimates presented herein are based upon the use of highly subjective information and assumptions and, accordingly, the results may not be precise. Management believes that fair value estimates may not be comparable between financial institutions due to the wide range of permitted valuation techniques and numerous estimates which must be made. Furthermore, because the disclosed fair value amounts were estimated as of the balance sheet date, the amounts actually realized or paid upon maturity or settlement of the various financial instruments could be significantly different.

	Fair Value Measurements at March 31, 2014				
	Carrying Amount	Estimated Fair Value	Quoted Prices	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
			in Active Markets for Identical Assets (Level 1)

Cash and Cash Equivalents — The carrying amount is a reasonable estimate of fair value due to the short-term nature of these instruments.

Time Deposits in Other Financial Institutions — The carrying amount is a reasonable estimate of fair value due to the short-term nature of these instruments.

Securities — For securities either held to maturity, available for sale or trading, fair value equals quoted market price if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities. For Level 3 securities, Heartland utilizes independent pricing provided by third party vendors or brokers.

Other Investments — Fair value measurement of other investments, which consists primarily of FHLB stock, are based on their redeemable value, which is at cost due to the restrictions placed on their transferability. The market for these

securities is restricted to the issuer of the stock and subject to impairment evaluation.

---

**Loans and Leases** — The fair value of loans is estimated using an entrance price concept by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. The fair value of impaired loans is measured using the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of the underlying collateral. The fair value of loans held for sale is estimated using quoted market prices.

**Interest Rate Lock Commitments** — The fair value of interest rate lock commitments is estimated using an internal valuation model, which includes grouping the interest rate lock commitments by interest rate and terms, applying an estimated closing ratio based on historical experience, and then multiplying by quoted investor prices determined to be reasonably applicable to the loan commitment groups based on interest rate, terms, and rate lock expiration dates of the loan commitment group.

**Forward Commitments** — The fair value of these instruments is estimated using an internal valuation model, which includes current trade pricing for similar financial instruments.

**Derivative Financial Instruments** — The fair value of all derivatives is estimated based on the amount that Heartland would pay or would be paid to terminate the contract or agreement, using current rates and, when appropriate, the current creditworthiness of the counter-party.

**Deposits** — The fair value of demand deposits, savings accounts and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities. If the fair value of the fixed maturity certificates of deposit is calculated at less than the carrying amount, the carrying value of these deposits is reported as the fair value.

**Short-term and Other Borrowings** — Rates currently available to Heartland for debt with similar terms and remaining maturities are used to estimate fair value of existing debt.

**Commitments to Extend Credit, Unused Lines of Credit and Standby Letters of Credit** — Based upon management's analysis of the off balance sheet financial instruments, there are no significant unrealized gains or losses associated with these financial instruments based upon review of the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties.

#### NOTE 8: SEGMENT REPORTING

Heartland has identified two operating segments for purposes of financial reporting: community and other banking and retail mortgage banking. These segments were determined based on the products and services provided or the type of customers served and are consistent with the information used by Heartland's key decision makers to make operating decisions and to assess Heartland's performance. The following tables present financial information from Heartland's operating segments for the three-month period ended March 31, 2014, and 2013, in thousands.

	Three Months Ended			2013		
	March 31,			2013

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### SAFE HARBOR STATEMENT

This document (including information incorporated by reference) contains, and future oral and written statements of Heartland and its management may contain, forward-looking statements within the meaning of such term in the Private Securities Litigation Reform Act of 1995 with respect to the financial condition, results of operations, plans, objectives, future performance and business of Heartland. Forward-looking statements, which may be based upon beliefs, expectations and assumptions of Heartland's management and on information currently available to management, are generally identifiable by the use of words such as "believe", "expect", "anticipate", "plan", "intend", "estimate", "may", "will", "would", "could", "should" or other similar expressions. Although Heartland has made these statements based on management's experience and best estimate of future events, there may be events or factors that management has not anticipated, and the accuracy and achievement of such forward-looking statements and estimates are subject to a number of risks, including those identified in our Annual Report on Form 10-K for the year ended December 31, 2013. Additionally, all statements in this document, including forward-looking statements, speak only as of the date they are made, and Heartland undertakes no obligation to update any statement in light of new information or future events.

### CRITICAL ACCOUNTING POLICIES

The preparation of financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, income and expenses. These estimates are based upon historical experience and on various other assumptions that management believes are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. The estimates and judgments that management believes have the most effect on Heartland's reported financial position and results of operations are described as critical accounting policies in Heartland's Annual Report on Form 10-K for the year ended December 31, 2013. There have been no significant changes in the critical accounting policies or the assumptions and judgments utilized in applying these policies since the year ended December 31, 2013.

### OVERVIEW

Heartland's results of operations depend primarily on net interest income, which is the difference between interest income from interest earning assets and interest expense on interest bearing liabilities. Noninterest income, which includes service charges and fees, loan servicing income, trust income, brokerage and insurance commissions, securities gains and gains on sale of loans held for sale, also affects Heartland's results of operations. Heartland's principal operating expenses, aside from interest expense, consist of the provision for loan and lease losses, salaries and employee benefits, occupancy and equipment costs, professional fees, FDIC insurance premiums, advertising and other real estate and loan collection expenses.

Net income available to common stockholders was \$6.7 million, or \$0.36 per diluted common share, for the quarter ended March 31, 2014, compared to \$12.1 million, or \$0.70 per diluted common share, for the first quarter of 2013. Return on average common equity was 7.41% and return on average assets was 0.47% for the first quarter of 2014, compared to 15.18% and 1.00%, respectively, for the same quarter in 2013.

Earnings for the first quarter of 2014 were \$5.7 million lower than the first quarter of 2013, primarily as a result of a \$5.7 million increase in provision for loan and lease losses. This increase was primarily the result of a charge-off on one significant credit during the first quarter of 2014. Positively affecting net income for the quarter was a \$9.9

million increase in net interest income, largely due to strong loan growth, the acquisition of Morrill & Janes Bank and Trust Company completed during the last quarter of 2013 and a lower cost of funds. This improvement was offset by a \$6.8 million decrease in gains on sale of loans held for sale, resulting from weaker mortgage loan volumes, and a \$6.2 million increase in noninterest expenses, primarily due to the added expenses of Morrill & Janes Bank and Trust Company.

Total assets were \$5.75 billion at March 31, 2014, a decrease of \$176.6 million since December 31, 2013. Securities represented 29% of total assets at March 31, 2014, compared to 32% at year-end 2013, as a portion of the proceeds from maturities, paydowns and sales were used to fund loan growth.

Total loans and leases held to maturity were \$3.58 billion at March 31, 2014, compared to \$3.50 billion at year-end 2013, an increase of \$80.8 million or 9% annualized. All of the loan growth this quarter was organic with commercial and commercial real estate loans representing the largest portion.

---

Total deposits remained relatively flat at \$4.66 billion as of March 31, 2014, compared to \$4.67 billion at year-end 2013. The composition of Heartland's deposits remained favorable as no-cost demand deposits as a percentage of total deposits was 26% at March 31, 2014, while higher-cost certificates of deposit as a percentage of total deposits was 19% at March 31, 2014.

Common stockholders' equity was \$375.6 million at March 31, 2014, compared to \$357.8 million at year-end 2013. Book value per common share was \$20.36 at March 31, 2014, compared to \$19.44 at year-end 2013. Heartland's unrealized losses on securities available for sale, net of applicable taxes, were \$2.9 million at March 31, 2014, compared to \$15.1 million at December 31, 2013.

## RESULTS OF OPERATIONS

### Net Interest Income

Net interest margin, expressed as a percentage of average earning assets, was 3.92% during the first quarter of 2014 compared to 3.82% during the fourth quarter of 2013 and 3.77% during the first quarter of 2013. Net interest margin benefited from loan growth, better asset mix, improved yield on securities and a continued decrease in deposit costs. With deposit rates at close to the bottom of their manageable range and reinvestment rates on maturing securities at dramatically lower levels, the sustainability of net interest margin as a percentage at current levels will be contingent on management's ability to shift dollars from the securities portfolio into the loan portfolio. Management believes net interest margin in dollars will continue to increase as the amount of earning assets grows.

On a tax-equivalent basis, interest income in the first quarter of 2014 was \$59.6 million compared to \$50.0 million in the first quarter of 2013. The increase in interest income in the first quarter of 2014, as compared to the first quarter of 2013, was due to an increase in average earning assets, as the interest rate earned on those assets remained relatively consistent. The average interest rate earned on total earning assets was 4.58% during the first quarter of 2014 compared to 4.60% during the first quarter of 2013. Average earning assets increased \$874.2 million or 20% during the first quarter of 2014 compared to the first quarter of 2013, with approximately \$840.0 million attributable to the two acquisitions completed during the fourth quarter of 2013. The composition of average earning assets shifted to a more favorable mix as loans, generally a higher-yielding asset, comprised 67% of total average earning assets during the first quarter of 2014 compared to 64% during the first quarter of 2013.

Interest expense for the first quarter of 2014 was \$8.7 million, a decrease of \$359,000 or 4% from \$9.0 million in the first quarter of 2013. Even though average interest bearing liabilities increased \$677.1 million or 20% for the quarter ended March 31, 2014, as compared to the same quarter in 2013, the average interest rate paid on Heartland's interest bearing deposits and borrowings declined 21 basis points, decreasing from 1.07% in the first quarter of 2013 to 0.86% in the first quarter of 2014. Contributing to this improvement in interest expense was a continued favorable change in the mix of deposits. Average savings balances, the lowest cost interest-bearing deposits, as a percentage of total average interest bearing deposits was 74% during the first quarter of 2014, compared to 69% for the first quarter of 2013. Additionally, the average interest rate paid on savings deposits was 0.33% during the first quarter of 2014 compared to 0.34% during the first quarter of 2013 and the average interest rate paid on time deposits was 1.21% during the first quarter of 2014 compared to 1.61% during the first quarter of 2013. Management continues to look for opportunities to reduce Heartland's funding costs. The greatest potential resides in the certificates of deposit portfolio with approximately \$100 million maturing per quarter at average interest rates around 1.30%. For the past several months, the average renewal interest rate on maturing certificates of deposit has been ranging between 0.40% and 0.65%. The rates currently paid on Heartland's non-maturity deposits are effectively approaching a floor and management believes there is less flexibility to pay lower rates on these deposits in the future.

Net interest income on a tax-equivalent basis totaled \$51.0 million during the first quarter of 2014, an increase of \$10.1 million or 25% from the \$40.9 million recorded during the first quarter of 2013.

Heartland attempts to manage its balance sheet to minimize the effect that a change in interest rates has on its net interest margin. Heartland plans to continue to work toward improving both its earning assets and funding mix through targeted organic growth strategies, which management believes will result in additional net interest income. Heartland believes its net interest income simulations reflect a well-balanced and manageable interest rate posture. Approximately 40% of Heartland's commercial and agricultural loan portfolios consist of floating rate loans that reprice based upon a change in the national prime or LIBOR interest rate. Since nearly 65% of these floating rate loans have interest rate floors that are currently in effect, an upward movement in LIBOR or the national prime interest rate would not have an immediate positive effect on Heartland's interest income. Item 3 of this Form 10-Q contains additional information about the results of Heartland's most recent net interest income simulations. Note 6 to the quarterly consolidated financial statements contains a detailed discussion of the derivative instruments Heartland has utilized to manage its interest rate risk.

---

The following table sets forth certain information relating to Heartland's average consolidated balance sheets and reflects the yield on average earning assets and the cost of average interest bearing liabilities for the periods indicated, in thousands. Dividing income or expense by the average balance of assets or liabilities derives such yields and costs. Average balances are derived from daily balances, and nonaccrual loans and loans held for sale are included in each respective loan category. Assets with tax favorable treatment are evaluated on a tax-equivalent basis assuming a federal income tax rate of 35%. Tax favorable assets generally have lower contractual pre-tax yields than fully taxable assets. A tax-equivalent yield is calculated by adding the tax savings to the interest earned on tax favorable assets and dividing by the average balance of the tax favorable assets.

ANALYSIS OF AVERAGE BALANCES, TAX-EQUIVALENT YIELDS AND RATES<sup>(1)</sup>

(1) Tax-equivalent basis is calculated using an effective tax rate of 35%.

## Provision For Loan And Lease Losses

The allowance for loan and lease losses is established through a provision charged to expense to provide, in Heartland management's opinion, an appropriate allowance for loan and lease losses. The provision for loan losses was \$6.3 million for the first quarter of 2014 compared to \$637,000 for the first quarter of 2013. The first quarter 2014 provision included approximately \$4.5 million to compensate for a charge off on a single large credit.

In determining that the allowance for loan and lease losses is appropriate, management uses factors that include the overall composition of the loan portfolio, general economic conditions, types of loans, loan collateral values, past loss experience, loan delinquencies, substandard credits, and doubtful credits. For additional details on the specific factors considered, refer to the discussion of critical accounting policies set forth in Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Heartland's Annual Report on Form 10-K for the year ended December 31, 2013, and under the caption "Allowance For Loan and Lease Losses" in this report. Heartland believes the allowance for loan and lease losses as of March 31, 2014, was at a level commensurate with the overall risk exposure of the loan portfolio. However, if economic conditions should become more unfavorable, certain borrowers may experience difficulty and the level of nonperforming loans, charge-offs and delinquencies could rise and require further increases in the provision for loan and lease losses.

## Noninterest Income

The table below shows Heartland's noninterest income for the three-month periods indicated, in thousands:

	Three Months Ended				
	March 31,		Change	% Change	
	2014	2013			
Service charges and fees	\$4,896	\$4,008	\$888	22	%
Loan servicing income	1,511	126	1,385	1,099	
Trust fees	3,210	2,904	306	11	
Brokerage and insurance commissions	1,123	951	172	18	
Securities gains, net	781	3,427	(2,646)	(77)	)
Gain (loss) on trading account securities, net	(38)	) 314	(352)	) 112	
Gains on sale of loans held for sale	6,379	13,157	(6,778)	(52)	)
Loss on sales/valuations of other real estate and repossessed assets, net	(123)	) (502)	) 379	75	
Valuation adjustment on mortgage servicing rights	—	496	(496)	(100)	)
Income on bank owned life insurance	363	405	(42)	(10)	)
Other noninterest income	625	680	(55)	(8)	)
Total noninterest income	\$18,727	\$25,966	\$(7,239)	(28)	)%

During the first quarter of 2014, Heartland made reclassification changes to two components of noninterest income. These reclassifications are presented in both the current and prior reporting periods and did not affect the financial results. Heartland believes these reclassifications are more consistent with industry reporting practices. The first change was the reclassification of mortgage servicing rights income from loan servicing income to gain on sale of loans held for sale. For the three months ended March 31, 2014, \$1.4 million was reclassified from loan servicing income to gain on sale of loans held for sale. For the three months ended March 31, 2013, \$3.2 million was reclassified from loan servicing income to gain on sale of loans held for sale. The second change was the reclassification of loss on sales/valuations of other real estate and repossessed assets, net, from other real estate and loan collection expenses to a new noninterest income category. For the three months ended March 31, 2014, losses of \$123,000 were reclassified from other real estate and loan collection expenses to other noninterest income. For the three months ended March 31, 2013, losses of \$502,000 were reclassified from other real estate and loan collection

expenses to other noninterest income.

Noninterest income was \$18.7 million during the first quarter of 2014 compared to \$26.0 million during the first quarter of 2013, a decrease of \$7.3 million or 28%, primarily due to a \$6.8 million decrease in gains on sale of loans held for sale and a \$3.0 million decrease in securities and trading account securities gains. The negative impact of these decreases was partially offset by higher service charges and fees, loan servicing income, trust fees and brokerage and insurance commissions.

Service charges and fees increased \$888,000 or 22% during the quarters under comparison, with approximately \$722,000 attributable to the service charges and fees collected at Morrill & Janes Bank and Trust Company. Service charges on checking and savings accounts recorded during the first quarter of 2014 were \$1.3 million compared to \$1.1 million during the first

---

quarter of 2013, an increase of \$160,000 or 14%. Overdraft fees were \$1.4 million during the first quarter of 2014 compared to \$1.3 million during the first quarter of 2013, an increase of \$57,000 or 4%. Interchange revenue from activity on bank debit cards, along with surcharges on ATM activity, resulted in service charges and fees of \$1.7 million during the first quarter of 2014 compared to \$1.4 million during the first quarter of 2013, an increase of \$290,000 or 21%. Fees associated with credit card services were \$492,000 during the first quarter of 2014 compared to \$115,000 during the first quarter of 2013, an increase of \$377,000 or 327%. Morrill & Janes Bank and Trust Company contributed \$398,000 to these fees for credit card services during the first quarter of 2014. During the second half of 2014, Heartland will be replicating the enhanced credit card services provided by Morrill & Janes Bank and Trust Company to its other bank subsidiaries.

Loan servicing income totaled \$1.5 million during the first quarter of 2014 compared to \$126,000 during the first quarter of 2013. Loan servicing income includes the fees collected for the servicing of mortgage loans for others, which are dependent upon the aggregate outstanding balance of these loans, rather than quarterly production and sale of mortgage loans. Fees collected for the servicing of mortgage loans for others were \$2.1 million during the first quarter of 2014 compared to \$1.4 million during the first quarter of 2013, an increase of \$637,000 or 45%. The portfolio of mortgage loans serviced for others by Heartland totaled \$3.11 billion at March 31, 2014, compared to \$2.43 billion at March 31, 2013. Also included in loan servicing income is the amortization of mortgage servicing rights which was \$1.1 million during the first quarter of 2014 compared to \$1.8 million during the first quarter of 2013, a decrease of \$682,000 or 39%. As the average life of Heartland's mortgage servicing rights increased during the first quarter of 2014 to 84 months from 60 months one year ago, the monthly amortization expense was reduced.

Gains on sale of loans held for sale totaled \$6.4 million during the first quarter of 2014 compared to \$13.2 million during the first quarter of 2013, a decrease of \$6.8 million or 52%. This decrease was related to the flat or moderately increasing interest rate environment in the first quarter of 2014, as opposed to an extremely low interest rate environment in the first quarter of 2013 that encouraged mortgage loan refinancings. The volume of mortgage loans sold totaled \$150.0 million during the first quarter of 2014, a 65% decrease from the \$424.9 million sold during the first quarter of 2013. The following table summarizes Heartland's residential mortgage loan activity during the most recent five quarters, in thousands:

	As Of and For the Quarter Ended				
	3/31/2014	12/31/2013	9/30/2013	6/30/2013	3/31/2013
Mortgage Servicing Fees	\$2,067	\$1,951	\$1,903	\$1,613	\$1,430
Mortgage Servicing Rights Amortization	(1,079)	(1,766)	(1,811)	(1,976)	(1,761)
Total Residential Mortgage Loan Servicing Income	\$988	\$185	\$92	\$(363)	\$(331)
Valuation Adjustment on Mortgage Servicing Rights	\$—	\$—	\$—	\$—	\$496
Gains On Sale of Residential Mortgage Loans	\$6,341	\$2,503	\$8,665	\$12,970	\$12,886
Total Residential Mortgage Loan Applications	\$316,829	\$293,115	\$416,128	\$653,461	\$556,890
Residential Mortgage Loans Originated	\$175,249	\$232,150	\$349,012	\$470,813	\$432,974
Residential Mortgage Loans Sold	\$149,993	\$214,334	\$336,780	\$445,452	\$424,931
Residential Mortgage Loan Servicing Portfolio	\$3,107,589	\$3,045,893	\$2,887,667	\$2,679,283	\$2,428,067

Trust fees increased \$306,000 or 11% during the first quarter of 2014 compared to the same quarter in 2013. A large portion of trust fees are based upon the market value of the trust assets under management, which was \$1.74 billion at March 31, 2014, compared to \$1.46 billion at March 31, 2013. Those values fluctuate throughout the year as market conditions improve or decline.

Brokerage and insurance commissions increased \$172,000 or 18% during the first quarter of 2014 compared to the same quarter in 2013.

Securities gains totaled \$781,000 during the first quarter of 2014 compared to \$3.4 million during the first quarter of 2013, a decrease of \$2.6 million or 77%. This decrease was related to the flat or moderately increasing interest rate environment in the first quarter of 2014, as opposed to an extremely low interest rate environment in the first quarter of 2013 that encouraged rebalancing of the securities portfolio.

Trading securities contributed a net loss of \$38,000 during the first quarter of 2014 compared to a net gain of \$314,000 during the first quarter of 2013. The net gains in 2013 were primarily attributable to shares of Fannie Mae preferred stock Heartland held in its trading securities portfolio from 2008 until they were sold during the first quarter of 2014.

---

## Noninterest Expenses

The table below shows Heartland's noninterest expenses for the three-month periods indicated, in thousands:

	Three Months Ended			
	March 31,			
	2014	2013	Change	% Change
Salaries and employee benefits	\$32,319	\$29,740	\$2,579	9 %
Occupancy	4,050	3,185	865	27
Furniture and equipment	1,890	2,051	(161)	(8)
Professional fees	4,526	3,543	983	28
FDIC insurance assessments	980	902	78	9
Advertising	1,188	1,228	(40)	(3)
Intangible assets amortization	624	200	424	212
Other real estate and loan collection expenses	1,052	838	214	26
Other noninterest expenses	5,786	4,558	1,228	27
Total Noninterest Expenses	\$52,415	\$46,245	\$6,170	13 %
Efficiency ratio, fully taxable equivalent <sup>(1)</sup>	76.04	% 72.85	%	

(1) See the reconciliation of Non-GAAP measure below.

Reconciliation of Non-GAAP measure	Three Months Ended		
	March 31,		
	2014	2013	
Efficiency ratio <sup>(1)</sup>	78.75	% 75.56	%
Taxable equivalent yield adjustment	(2.71)	)% (2.71)	)%
Efficiency ratio, fully taxable equivalent <sup>(2)</sup>	76.04	% 72.85	%

(1) Efficiency ratio is defined by the Federal Reserve guidance as noninterest expense divided by the sum of net interest income plus noninterest income, excluding investment securities gains (losses), net.

(2) Efficiency ratio, fully taxable equivalent, is noninterest expense, divided by the sum of taxable equivalent net interest income plus noninterest income, excluding investment securities gains (losses), net. This efficiency ratio is presented on a taxable equivalent basis, which adjusts net interest income for the tax favored status of certain loans and investment securities. Management believes this measure to be the preferred industry measurement of net interest income as it enhances the comparability of net interest income arising from taxable and tax exempt sources, and it excludes certain specific revenue items (such as investment securities gains (losses), net). This is a non-GAAP measure.

As discussed earlier under the Noninterest Income heading of this report, losses of \$123,000 were reclassified from other real estate and loan collection expenses to other noninterest income for the three months ended March 31, 2014. For the same three months in 2013, losses of \$502,000 were reclassified from other real estate and loan collection expenses to other noninterest income. This reclassification results in other real estate and loan collection expenses for the first three months of 2013 decreasing from \$1.3 million as previously reported to \$838,000.

For the first quarter of 2014, noninterest expenses totaled \$52.4 million, an increase of \$6.2 million or 13% from the same quarter of 2013, largely due to \$4.7 million of expenses related to the two acquisitions completed during the last quarter of 2013, the largest of which was Morrill & Janes Bank and Trust Company. Excluding the effect of the acquisitions, noninterest expenses increased \$1.5 million or 3% during the first quarter of 2014 in comparison to the first quarter of 2013.

The largest component of noninterest expenses, salaries and employee benefits, increased \$2.6 million or 9% during the first quarter of 2014 as compared to the same quarter in 2013. The salaries and employee benefits at Morrill & Janes Bank and Trust Company comprised \$2.2 million of this increase. Full-time equivalent employees totaled 1,668 on March 31, 2014, of which 112 were at Morrill & Janes Bank and Trust Company, compared to 1,532 on March 31, 2013.

During the first quarter of 2014, occupancy expense increased \$865,000 or 27% when compared to the first quarter of 2013. This increase primarily resulted from the expansion of Heartland's residential loan origination operations and the acquisitions completed during the last quarter of 2013.

---

Professional fees increased \$983,000 or 28% during the first quarter of 2014 compared to the first quarter of 2013, with \$446,000 or nearly half of this increase attributable to expenses at Morrill & Janes Bank and Trust Company. Also contributing to this increase were fees associated with upgrades to the websites of Heartland's bank subsidiaries and legal fees attributable to the workout of impaired credits and the expansion of mortgage loan origination operations.

Intangible assets amortization was \$624,000 during the first quarter of 2014 compared to \$200,000 during the first quarter of 2013, an increase of \$424,000 or 212%, primarily as a result of the core deposit intangibles attributable to the Morrill & Janes Bank and Trust Company acquisition completed in the last quarter of 2013.

Other noninterest expenses increased \$1.2 million or 27% during the first quarter of 2014 compared to the first quarter of 2013, of which \$776,000 was comprised of expenses at Morrill & Janes Bank and Trust Company.

#### Income Taxes

Heartland's effective tax rate was 19.82% for the first quarter of 2014 compared to 29.39% for the first quarter of 2013. Federal low-income housing tax credits included in Heartland's effective tax rate totaled \$200,000 during both the first quarter of 2014 and 2013. Heartland's effective tax rate is also affected by the level of tax-exempt interest income which, as a percentage of pre-tax income, was 51.28% during the first quarter of 2014 compared to 23.81% during the first quarter of 2013. The tax-equivalent adjustment for this tax-exempt interest income was \$2.4 million during the first quarter of 2014 compared to \$2.3 million during the first quarter of 2013.

#### Segment Reporting

Heartland has two reportable segments: community and other banking and retail mortgage banking. Revenues from community and other banking operations consist primarily of interest earned on loans and investment securities and fees from deposit services. Retail mortgage banking operating revenues consist of interest earned on mortgage loans held for sale, gains on sales of loans into the secondary market, the servicing of mortgage loans for various investors and loan origination fee income. See Note 8 to our consolidated financial statements for further information regarding our segment reporting.

Income before taxes for the community and other banking segment for the first quarter of 2014 was \$10.7 million compared to \$16.6 million for the first quarter of 2013, a \$5.8 million or 35% decrease. The decrease was primarily a result of increased provision for loan and lease losses and decreased securities gains, partially offset by increases in net interest income and the other noninterest income categories of services charges and fees, trust fees and brokerage and insurance commissions; and increased noninterest expenses, particularly in the categories of salaries and employee benefits, occupancy, and professional fees, primarily as a result of the acquisitions completed in the fourth quarter of 2013. Net interest income of \$47.9 million for the first quarter of 2014 was \$9.5 million or 25% more than the net interest income of \$38.3 million for the first quarter of 2013. Provision for loan and lease losses was \$6.3 million for the first quarter of 2014, an increase of \$5.7 million from the \$637,000 recorded during the first quarter of 2013. Noninterest income totaled \$11.4 million during the first quarter of 2014 compared to \$12.9 million during the first quarter of 2013, a \$1.5 million or 12% decrease. Noninterest expense was \$42.2 million during the first quarter of 2014 compared to \$34.0 million during the first quarter of 2013, an increase of \$8.2 million or 24%.

The retail mortgage banking segment recorded a loss before taxes of \$2.1 million for the first quarter of 2014 compared to income before taxes of \$1.2 million for the first quarter of 2013, a \$3.3 million or 278% decrease. This decrease was reflective of the change in long-term interest rates and the effect higher interest rates have on the gains on sale of loans into the secondary market. Net interest income of \$757,000 for the first quarter of 2014 was \$414,000

or 121 percent more than the net interest income of \$343,000 for the first quarter of 2013. Noninterest income totaled \$7.3 million during the first quarter of 2014 compared to \$13.1 million during the first quarter of 2013, a \$5.8 million or 44% decrease. Noninterest expense was \$10.2 million during the first quarter of 2014 compared to \$12.2 million during the first quarter of 2013, a decrease of \$2.0 million or 17%.

#### FINANCIAL CONDITION

Total assets were \$5.75 billion at March 31, 2014, a decrease of \$176.6 million since December 31, 2013, as reductions in the securities portfolio were partially used to fund loan growth.

---

## Lending Activities

Total loans and leases held to maturity were \$3.58 billion at March 31, 2014, compared to \$3.50 billion at year-end 2013, an increase of \$80.8 million or 9% annualized. All of the loan growth this quarter was organic with commercial and commercial real estate loans representing the largest portion. Heartland management expects full year loan growth for 2014 to be comparable to loan growth experienced in 2013. Commercial and commercial real estate loans, which totaled \$2.55 billion at March 31, 2014, increased \$67.7 million or 11% annualized since year-end 2013. Residential mortgage loans, which totaled \$365.2 million at March 31, 2014, increased \$15.8 million or 18% annualized since year-end 2013. Agricultural and agricultural real estate loans, which totaled \$370.3 million at March 31, 2014, decreased \$6.4 million or 7% annualized since year-end 2013. Consumer loans, which totaled \$298.0 million at March 31, 2014, increased \$3.8 million or 5% annualized since year-end 2013. Within the commercial portfolio, 36% of the new loan production was in commercial real estate, of which 75% is owner-occupied, 30% was in C&I, 15% was in loans to tax-exempt entities, 9% was in multi-family real estate and the remaining 10% was in four other categories.

The table below presents the composition of the loan portfolio as of March 31, 2014, and December 31, 2013, in thousands:

LOAN PORTFOLIO	March 31, 2014		December 31, 2013		
	Amount	Percent	Amount	Percent	
Loans and leases receivable held to maturity:					
Commercial	\$986,713	27.55	% \$950,197	27.16	%
Commercial real estate	1,560,912	43.58	1,529,683	43.70	
Agricultural and agricultural real estate	370,348	10.34	376,735	10.76	
Residential mortgage	365,162	10.21	349,349	9.98	
Consumer	297,978	8.32	294,145	8.40	
Gross loans and leases receivable held to maturity	3,581,113	100.00	% 3,500,109	100.00	%
Unearned discount	(136 )		(168 )		
Deferred loan fees	(3,201 )		(2,989 )		
Total net loans and leases receivable held to maturity	3,577,776		3,496,952		
Loans covered under loss share agreements:					
Commercial and commercial real estate	2,292	41.94	% 2,314	40.24	%
Agricultural and agricultural real estate	502	9.18	543	9.45	
Residential mortgage	2,062	37.72	2,280	39.66	
Consumer	610	11.16	612	10.65	
Total loans covered under loss share agreements	5,466	100.00	% 5,749	100.00	%
Allowance for loan and lease losses	(38,573 )		(41,685 )		
Loans and leases receivable, net	\$3,544,669		\$3,461,016		

Loans and leases secured by real estate, either fully or partially, totaled \$2.26 billion or 56% of gross loans and leases at March 31, 2014. Of the non-farm, nonresidential real estate loans, 57% are owner occupied. The largest categories within Heartland's real estate secured loans at March 31, 2014, and December 31, 2013, are listed below, in thousands:

## LOANS SECURED BY REAL ESTATE

	March 31, 2014	December 31, 2013
Residential real estate, excluding residential construction and residential lot loans	\$587,604	\$566,397
Industrial, manufacturing, business and commercial	263,150	240,502
Agriculture	199,644	199,998
Retail	153,059	154,786
Office	163,634	160,343
Land development and lots	102,744	98,157
Hotel, resort and hospitality	96,430	97,514
Multi-family	120,893	98,214
Food and beverage	72,538	73,588
Warehousing	66,625	65,724
Health services	48,887	49,070
Residential construction	39,573	36,865
All other	106,126	99,396
Loans acquired during fourth quarter 2013	236,819	272,157
Total loans secured by real estate	\$2,257,726	\$2,212,711

## Allowance For Loan and Lease Losses

The process utilized by Heartland to determine the appropriateness of the allowance for loan and lease losses is considered a critical accounting practice for Heartland. The allowance for loan and lease losses represents management's estimate of identified and unidentified probable losses in the existing loan portfolio. For additional details on the specific factors considered, refer to the critical accounting policies section of our Annual Report on Form 10-K for the year ended December 31, 2013.

Exclusive of loans covered under loss sharing agreements, the allowance for loan and lease losses at March 31, 2014, was 1.08% of loans and leases and 120.81% of nonperforming loans compared to 1.19% of loans and leases and 98.27% of nonperforming loans at December 31, 2013. The provision for loan losses was \$6.3 million for the first quarter of 2014 compared to \$637,000 for the first quarter of 2013. The first quarter 2014 provision included approximately \$4.5 million to compensate for a charge off on a single large credit.

Net charge-offs on loans during the first quarter of 2014 were \$9.4 million, up \$7.7 million as compared to the prior quarter and up \$7.6 million as compared to the first quarter of 2013. The increase was primarily due to a \$6.8 million credit which was fully charged off during the first quarter of 2014.

Nonperforming loans, exclusive of those covered under the loss sharing agreements, were \$31.9 million or 0.89% of total loans and leases at March 31, 2014, compared to \$42.4 million or 1.21% of total loans and leases at December 31, 2013. Approximately 54%, or \$17.3 million, of Heartland's nonperforming loans have individual loan balances exceeding \$1.0 million, the largest of which is \$4.5 million. These nonperforming loans, to an aggregate of 6 borrowers, were evenly distributed between Heartland's Western and Midwestern markets and are spread over five different industry classifications. The portion of Heartland's nonperforming loans covered by government guarantees was \$519,000 at March 31, 2014.

Other real estate owned was \$28.1 million at March 31, 2014, compared to \$29.9 million at December 31, 2013. Liquidation strategies have been identified for all the assets held in other real estate owned. Management continues to market these properties through an orderly liquidation process instead of a quick liquidation process in order to avoid discounts greater than the projected carrying costs.

Delinquencies in each of the loan portfolios continue to be well-managed. Loans delinquent 30 to 89 days as a percent of total loans were 0.31% at March 31, 2014, compared to 0.30% at December 31, 2013.

---

The table below presents the changes in the allowance for loan and lease losses during the periods indicated, in thousands:

ANALYSIS OF ALLOWANCE FOR LOAN AND LEASE LOSSES	Three Months Ended		
	March 31,		
	2014	2013	
Balance at beginning of period	\$41,685	\$38,715	
Provision for loan and lease losses	6,331	637

Net activity at Citizens Finance Co.	—	—	7	7
March 31, 2014	\$32,748	\$28,083	\$397	\$61,228

(1) Includes principal reductions and transfers to performing status.

#### Securities

The composition of Heartland's securities portfolio is managed to maximize the return on the portfolio while considering the impact it has on Heartland's asset/liability position and liquidity needs. Securities represented 29% of total assets at March 31, 2014, compared to 32% at year-end 2013, as a portion of the proceeds from maturities, paydowns and sales were used to fund loan growth. Total available for sale securities as of March 31, 2014, were \$1.40 billion, a decrease of \$233.1 million or 14% from \$1.63 billion at December 31, 2013.

The table below presents the composition of the securities portfolio, including trading, available for sale and held to maturity, by major category, as of March 31, 2014, and December 31, 2013, in thousands:

SECURITIES PORTFOLIO COMPOSITION	March 31, 2014		December 31, 2013		
	Amount	Percent	Amount	Percent	
U.S. government corporations and agencies	\$146,696	8.74	% \$218,303	11.52	%
Mortgage-backed securities	1,055,554	62.93	1,149,920	60.68	
Obligation of states and political subdivisions	451,392	26.91	498,149	26.29	
Other securities	23,796	1.42	28,672	1.51	
Total securities	\$1,677,438	100.00	% \$1,895,044	100.00	%

The composition of the securities portfolio changed slightly as a larger portion of the securities sales and maturities were in the lower-yielding U.S. government corporations and agency securities. The percentage of Heartland's securities portfolio comprised of mortgage-backed securities was 63% at March 31, 2014, and 61% at December 31, 2013. Approximately 95% of Heartland's mortgage-backed securities were issuances of government-sponsored enterprises at March 31, 2014. Heartland's securities portfolio had an expected duration of 4.60 years as of March 31, 2014, compared to 4.50 years at year-end 2013.

The Volcker Rule prohibits insured depository institutions and their holding companies from engaging in proprietary trading except in limited circumstances, and prohibits them from owning equity interests in excess of 3% of Tier 1 Capital in private equity and hedge funds. The Volcker Rule will not have a material impact on Heartland's investment securities portfolio.

At March 31, 2014, Heartland had \$18.8 million of other securities, including capital stock in the various Federal Home Loan Banks of which its bank subsidiaries are members and all of which were classified as other securities held at cost.

## Deposits And Borrowed Funds

Total deposits remained relatively flat at \$4.66 billion as of March 31, 2014, compared to \$4.67 billion at year-end 2013. Demand deposits totaled \$1.20 billion at March 31, 2014, a decrease of \$43.1 million or 14% annualized since year-end 2013. Also decreasing during the quarter, certificates of deposit totaled \$885.7 million at March 31, 2014, a decrease of \$6.9 million or 3% annualized. Savings deposits increased during the quarter, growing to \$2.58 billion at March 31, 2014, an increase of

---

\$46.9 million or 7% annualized. The composition of Heartland's deposits remained favorable as no-cost demand deposits as a percentage of total deposits was 26% at March 31, 2014, while higher-cost certificates of deposit as a percentage of total deposits was 19% at March 31, 2014.

Short-term borrowings generally include federal funds purchased, securities sold under agreements to repurchase, short-term FHLB advances and discount window borrowings from the Federal Reserve Bank. These funding alternatives are utilized in varying degrees depending on their pricing and availability. All of Heartland's bank subsidiaries own FHLB stock in either the Chicago, Dallas, Des Moines, Seattle, San Francisco or Topeka FHLB, enabling them to borrow funds from their respective FHLB for short- or long-term purposes under a variety of programs. The amount of short-term borrowings was \$256.3 million at March 31, 2014, compared to \$408.8 million at year-end 2013, including short-term FHLB advances of \$33.0 million at March 31, 2014 in comparison with \$105.0 million at December 31, 2013.

All of the Heartland bank subsidiaries provide retail repurchase agreements to their customers as a cash management tool, sweeping excess funds from demand deposit accounts into these agreements. This source of funding does not increase the bank's reserve requirements. Although the aggregate balance of these retail repurchase agreements is subject to variation, the account relationships represented by these balances are principally local. The balances of retail repurchase agreements were \$203.0 million at March 31, 2014, compared to \$234.7 million at December 31, 2013.

Also included in short-term borrowings are the revolving credit lines Heartland has with unaffiliated banks, primarily to provide liquidity to Heartland. On June 14, 2013, Heartland replaced its \$5.0 million unsecured revolving credit line with a \$20.0 million unsecured revolving credit line with the same unaffiliated bank. On November 12, 2013, Heartland chose not to renew one of its two revolving credit lines in the amount of \$5.0 million with an unaffiliated bank. There was no balance outstanding on Heartland's revolving credit lines at both March 31, 2014, and December 31, 2013.

Other borrowings include all debt arrangements Heartland and its subsidiaries have entered into with original maturities that extend beyond one year, including long-term FHLB borrowings, term borrowings under term notes and senior notes, and obligations under trust preferred capital securities. As of March 31, 2014, the amount of other borrowings was \$334.9 million, a decrease of \$15.2 million or 4% since year-end 2013.

Long-term FHLB borrowings with an original term beyond one year totaled \$113.5 million at both March 31, 2014, and December 31, 2013. Total long-term FHLB borrowings at March 31, 2014, had an average rate of 2.68% and an average maturity of 1.53 years. The interest rate on \$74.5 million of these advances changes quarterly at a spread over 3-month LIBOR. When considering the earliest possible call date on these advances, the average maturity is shortened to .88 years. Structured wholesale repurchase agreements totaled \$45.0 million at March 31, 2014, compared to \$60.0 million at December 31, 2013, a decrease of \$15.0 million or 25%, due to the maturity of one contract.

The outstanding balance on Heartland's amortizing term loan with an unaffiliated bank was \$11.4 million at March 31, 2014, compared to \$11.7 million at December 31, 2013. Heartland also had senior notes totaling \$37.5 million outstanding at both March 31, 2014, and December 31, 2013.

A schedule of Heartland's trust preferred offerings outstanding as of March 31, 2014, is as follows, in thousands:

	Amount Issued	Issuance Date	Interest Rate	Interest Rate as of 3/31/14 <sup>(1)</sup>	Maturity Date	Callable Date
Heartland Financial Statutory Trust III	\$20,619	10/10/2003	8.25%	8.25%	10/10/2033	06/30/2014
Heartland Financial Statutory Trust IV	25,774	03/17/2004	2.75% over LIBOR	2.98% <sup>(2)</sup>	03/17/2034	06/17/2014
Heartland Financial Statutory Trust V	20,619	01/31/2006	1.33% over LIBOR	1.57% <sup>(3)</sup>	04/07/2036	07/07/2014
Heartland Financial Statutory Trust VI	20,619	06/21/2007	6.75%	6.75% <sup>(4)</sup>	09/15/2037	06/15/2014
Heartland Financial Statutory Trust VII	20,619	06/26/2007	1.48% over LIBOR	1.71% <sup>(5)</sup>	09/01/2037	06/01/2014
Morrill Statutory Trust I	8,524	12/26/2002	3.25% over LIBOR	3.49% <sup>(6)</sup>	12/26/2032	06/26/2014
Morrill Statutory Trust II	8,086	12/17/2003	2.85% over LIBOR	3.08% <sup>(7)</sup>	12/17/2033	06/17/2014
	\$124,860					

(1) Effective weighted average interest rate as of March 31, 2014, was 5.91% due to interest rate swap transactions on the variable rate securities as discussed in Note 6 to Heartland's consolidated financial statements.

(2) Effective interest rate as of March 31, 2014, was 5.00% due to an interest rate swap transaction as discussed in Note 6 to Heartland's consolidated financial statements.

(3) Effective interest rate as of March 31, 2014, was 4.69% due to an interest rate swap transaction as discussed in Note 6 to Heartland's consolidated financial statements.

(4) Interest rate is fixed at 6.75% through June 15, 2017, then resets to 1.48% over LIBOR for the remainder of the term.

(5) Effective interest rate as of March 31, 2014, was 4.70% due to an interest rate swap transaction as discussed in Note 6 to Heartland's consolidated financial statements.

(6) Effective interest rate as of March 31, 2014, was 4.92% due to an interest rate swap transaction as discussed in Note 6 to Heartland's consolidated financial statements.

(7) Effective interest rate as of March 31, 2014, was 4.51% due to an interest rate swap transaction as discussed in Note 6 to Heartland's consolidated financial statements.

## CAPITAL REQUIREMENTS

Bank regulatory agencies have adopted capital standards by which all bank holding companies will be evaluated, including requirements to maintain certain core capital amounts included as Tier 1 capital at minimum levels relative to total assets (the "Tier 1 Leverage Capital Ratio") and at minimum levels relative to "risk-weighted assets" which is calculated by assigning value to assets, and off balance sheet commitments, based on their risk characteristics (the "Tier 1 Risk-Based Capital Ratio"), and to maintain total capital at minimum levels relative to risk-weighted assets (the "Total Risk-Based Capital Ratio"). Starting in 2015, bank holding companies will also be subject to a new Common Tier 1 Capital Ratio, and to increasing capital ratios for the other three measures based upon the new Basel III rules. Heartland and its bank subsidiaries have been, and will continue to be, managed so they meet the well-capitalized requirements under the regulatory framework for prompt corrective action. To be categorized as well capitalized under the regulatory framework, bank holding companies and banks must maintain minimum a Tier 1 Leverage Capital Ratio of 4%, a Tier 1 Risk-Based Capital Ratio of 6% and a Total Risk-Based Capital Ratio of 10%. The most recent notification from the FDIC categorized Heartland and each of its bank subsidiaries as well capitalized under the

regulatory framework for prompt corrective action, and Heartland and its bank subsidiaries would have continued to be well capitalized had the Basel III rules been effective for the period covered by such notification. There are no conditions or events since that notification that management believes have changed each institution's category.

---

Heartland's capital ratios were as follows for the dates indicated, in thousands:

CAPITAL RATIOS	March 31, 2014		December 31, 2013		
	Amount	Ratio	Amount	Ratio	
<b>Risk-Based Capital Ratios</b>					
Tier 1 capital	\$544,281	13.31	% \$537,964	13.19	%
Tier 1 capital minimum requirement	163,606	4.00	% 163,126	4.00	%
Excess	\$380,675	9.31	% \$374,838	9.19	%
Total capital	\$598,250	14.63	% \$599,038	14.69	%
Total capital minimum requirement	327,212	8.00	% 326,252	8.00	%
Excess	\$271,038	6.63	% \$272,786	6.69	%
Total risk-adjusted assets	\$4,090,156		\$4,078,154		
<b>Leverage Capital Ratios</b>					
Tier 1 capital	\$544,281	9.50	% \$537,964	9.67	%
Tier 1 capital minimum requirement <sup>(1)</sup>	229,099	4.00	% 222,432	4.00	%
Excess	\$315,182	5.50	% \$315,532	5.67	%
Average adjusted assets (less goodwill and other intangible assets)	\$5,727,483		\$5,560,796		

(1) Management of Heartland has established a minimum target leverage ratio of 4.00%. Based on Federal Reserve guidelines, a bank holding company generally is required to maintain a leverage ratio of 3.00% plus additional capital of at least 100 basis points.

Heartland filed a universal shelf registration statement with the SEC on August 28, 2013, which became effective on September 9, 2013, to register up to \$75.0 million in securities. The shelf registration statement provides Heartland with increased flexibility to raise capital, subject to SEC rules and limitations, if Heartland's board of directors decides to do so.

Common stockholders' equity was \$375.6 million at March 31, 2014, compared to \$357.8 million at December 31, 2013. Book value per common share was \$20.36 at March 31, 2014, compared to \$19.44 at year-end 2013. Changes in common stockholders' equity and book value per common share are the result of earnings, dividends paid, stock transactions and mark-to-market adjustment for unrealized gains and losses on securities available for sale. As a result of decreases in market interest rates during the first quarter of 2014, Heartland's unrealized losses on securities available for sale, net of applicable taxes, were \$2.9 million at March 31, 2014, compared to \$15.1 million at December 31, 2013.

## COMMITMENTS AND CONTRACTUAL OBLIGATIONS

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Heartland banks evaluate the creditworthiness of customers to which they extend a credit commitment on a case-by-case basis and may require collateral to secure any credit extended. The amount of collateral obtained is based upon management's credit evaluation of the counterparty. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment and income-producing commercial properties. Standby letters of credit and financial guarantees written are conditional commitments issued by the Heartland banks to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to

customers. At March 31, 2014, and December 31, 2013, commitments to extend credit aggregated \$1.23 billion and \$1.14 billion, and standby letters of credit aggregated \$34.0 million and \$39.7 million, respectively.

Contractual obligations and other commitments were presented in Heartland's Annual Report on Form 10-K for the year ended December 31, 2013. There have been no other material changes in Heartland's contractual obligations and other commitments since that report was filed.

Heartland continues to explore opportunities to expand its footprint of independent community banks. Given the current issues in the banking industry, management has changed its strategic growth initiatives from de novo banks and branching to acquisitions. Attention will be focused on markets currently served, where there would be an opportunity to grow market share,

---

achieve efficiencies and provide greater convenience for existing customers. Future expenditures relating to expansion efforts, in addition to those identified above, are not estimable at this time.

On a consolidated basis, we maintain a large balance of short-term securities that, when combined with cash from operations, we believe are adequate to meet our funding obligations.

At the parent company level, routine funding requirements consist primarily of dividends paid to stockholders, including the U.S. Treasury under the SBLF, debt service on our revolving credit arrangements and our trust preferred securities issuances, and payments for acquisitions. The parent company obtains the funding to meet these obligations from dividends collected from its subsidiaries and the issuance of debt securities. At March 31, 2014, Heartland's revolving credit agreement with an unaffiliated bank provided a maximum borrowing capacity of \$20.0 million, of which none was outstanding. This credit agreement contains specific financial covenants. At March 31, 2014, Heartland was in compliance with these covenants.

## LIQUIDITY

Liquidity refers to Heartland's ability to maintain cash flow that is adequate to meet maturing obligations and existing commitments, to withstand fluctuations in deposit levels, to fund operations and to provide for customers' credit needs. The liquidity of Heartland principally depends on cash flows from operating activities, investment in and maturity of assets, changes in balances of deposits and borrowings and its ability to borrow funds in the money or capital markets.

Operating activities provided \$9.7 million of cash during the first three months of 2014 compared to \$12.4 million of cash during the first three months of 2013. The biggest contributor to this change was the reduction in net income of \$5.7 million from \$12.6 million for the first three months of 2013 compared to \$6.9 million during the first three months of 2014.

Investing activities provided cash of \$127.1 million during the first three months of 2014 compared to using cash of \$27.0 million during the first three months of 2013. Cash used for the purchase of securities totaled \$178.0 million during the first three months of 2014 compared to \$207.5 million during the first three months of 2013. The proceeds from securities sales, paydowns and maturities were \$395.7 million during the first three months of 2014 compared to \$158.4 million during the first three months of 2013. A net increase in loans and leases used \$93.0 million of cash during the first three months of 2014 compared to providing cash of \$25.0 million during the first three months of 2013.

Financing activities used cash of \$173.4 million during the first three months of 2014 compared to \$78.9 million during the first three months of 2013. Activity in short-term borrowings used cash of \$152.5 million during the first three months of 2014 compared to using \$21.9 million of cash during the first three months of 2013. Repayment of other borrowings used cash of \$20.2 million during the first three months of 2014 compared to \$52.4 million during the first three months of 2013.

Management of investing and financing activities, and market conditions, determine the level and the stability of net interest cash flows. Management attempts to mitigate the impact of changes in market interest rates to the extent possible, so that balance sheet growth is the principal determinant of growth in net interest cash flows.

Our short-term borrowing balances are dependent on commercial cash management and smaller correspondent bank relationships and, as such, will normally fluctuate. We believe these balances, on average, to be stable sources of funds; however, we intend to rely on deposit growth and additional FHLB borrowings in the future.

In the event of short-term liquidity needs, Heartland's bank subsidiaries may purchase federal funds from each other or from correspondent banks and may also borrow from the Federal Reserve Bank. Additionally, the bank subsidiaries' FHLB memberships give them the ability to borrow funds for short- and long-term purposes under a variety of programs.

At March 31, 2014, Heartland's revolving credit agreement with an unaffiliated bank provided a maximum borrowing capacity of \$20.0 million, of which nothing had been borrowed. This credit agreement contains specific covenants, with which Heartland was in compliance on March 31, 2014.

---

## ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss arising from adverse changes in market prices and rates. Heartland's market risk is comprised primarily of interest rate risk resulting from its core banking activities of lending and deposit gathering. Interest rate risk measures the impact on earnings from changes in interest rates and the effect on current fair market values of Heartland's assets, liabilities and off-balance sheet contracts. The objective is to measure this risk and manage the balance sheet to avoid unacceptable potential for economic loss.

Management continually develops and applies strategies to mitigate market risk. Exposure to market risk is reviewed on a regular basis by the asset/liability committees of the banks and, on a consolidated basis, by Heartland's executive management and board of directors. Darling Consulting Group, Inc. has been engaged to provide asset/liability management position assessment and strategy formulation services to Heartland and its bank subsidiaries. At least quarterly, a detailed review of the balance sheet risk profile is performed for Heartland and each of its bank subsidiaries. Included in these reviews are interest rate sensitivity analyses, which simulate changes in net interest income in response to various interest rate scenarios. These analyses consider current portfolio rates, existing maturities, repricing opportunities and market interest rates, in addition to prepayments and growth under different interest rate assumptions. Selected strategies are modeled prior to implementation to determine their effect on Heartland's interest rate risk profile and net interest income. Management does not believe that Heartland's primary market risk exposures have changed significantly in the first three months of 2014.

The core interest rate risk analysis utilized by Heartland examines the balance sheet under increasing and decreasing interest scenarios that are neither too modest nor too extreme. All rate changes are ramped over a 12-month horizon based upon a parallel shift in the yield curve and then maintained at those levels over the remainder of the simulation horizon. Using this approach, management is able to see the effect that both a gradual change of rates (year 1) and a rate shock (year 2 and beyond) could have on Heartland's net interest income. Starting balances in the model reflect actual balances on the "as of" date, adjusted for material and significant transactions. Pro-forma balances remain static. This enables interest rate risk embedded within the existing balance sheet structure to be isolated from the interest rate risk often caused by growth in assets and liabilities. Due to the low interest rate environment, the simulations under a decreasing interest rate scenario were prepared using a 100 basis point shift in rates. The most recent reviews at March 31, 2014, and March 31, 2013, provided the following results, in thousands:

	2014		2013	
	Net Interest Margin	% Change From Base	Net Interest Margin	% Change From Base
Year 1				
Down 100 Basis Points	\$176,711	(0.31	)% \$146,669	(0.95
Base	\$177,265		\$148,074	)%
Up 200 Basis Points	\$179,971	1.53	% \$150,200	1.44
Year 2				%
Down 100 Basis Points	\$172,467	(2.71	)% \$141,730	(4.28
Base	\$178,891	0.92	% \$147,374	(0.47
Up 200 Basis Points	\$190,401	7.41	% \$157,820	6.58
				%

Heartland uses derivative financial instruments to manage the impact of changes in interest rates on its future interest income or interest expense. Heartland is exposed to credit-related losses in the event of nonperformance by the counterparties to these derivative instruments, but believes it has minimized the risk of these losses by entering into the contracts with large, stable financial institutions. The estimated fair market values of these derivative instruments are presented in Note 6 to the consolidated financial statements.

Heartland enters into financial instruments with off balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates and may require collateral from the borrower. Standby letters of credit are conditional commitments issued by Heartland to guarantee the performance of a customer to a third party up to a stated amount and with specified terms and conditions. These commitments to extend credit and standby letters of credit are not recorded on the balance sheet until the instrument is exercised.

---

Heartland periodically holds a securities trading portfolio that would also be subject to elements of market risk. These securities are carried on the balance sheet at fair value. At March 31, 2014, Heartland held no securities in its securities trading portfolio. At December 31, 2013, the securities held in Heartland's securities trading portfolio had a carrying value of \$1.8 million, which was less than 2% of total assets.

#### ITEM 4. CONTROLS AND PROCEDURES

Under the direction of our Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) promulgated under the Securities and Exchange Act of 1934, as amended) as of March 31, 2014. Based on that evaluation, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, in a manner that allows timely decisions regarding required disclosure.

There were no significant changes to Heartland's disclosure controls or internal controls over financial reporting during the quarter ended March 31, 2014, that have materially affected or are reasonably likely to materially affect Heartland's internal control over financial reporting.

---

## PART II

### ITEM 1. LEGAL PROCEEDINGS

There are no material pending legal proceedings to which Heartland or its subsidiaries are a party other than ordinary routine litigation incidental to their respective businesses. While the ultimate outcome of current legal proceedings cannot be predicted with certainty, it is the opinion of management that the resolution of these legal actions should not have a material effect on Heartland's consolidated financial position or results of operations.

### ITEM 1A. RISK FACTORS

There have been no material changes in the risk factors applicable to Heartland from those disclosed in Part I, Item 1A. "Risk Factors" in Heartland's 2013 Annual Report on Form 10-K. Please refer to that section of Heartland's Form 10-K for disclosures regarding the risks and uncertainties related to Heartland's business.

### ITEM 2. UNREGISTERED SALES OF ISSUER SECURITIES AND USE OF PROCEEDS

Heartland's board of directors has authorized management to acquire and hold up to 500,000 shares of common stock as treasury shares at any one time. Heartland and its affiliated purchasers made no purchases of its common stock during the three months ended March 31, 2014.

### ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

### ITEM 4. MINE SAFETY DISCLOSURES

Not applicable

### ITEM 5. OTHER INFORMATION

None.

### ITEM 6. EXHIBITS

Exhibits

31.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(a)/15d-14(a).

31.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(a)/15d-14(a).

32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
