Notes to Condensed Financial Statements

June 30, 2001 and 2000

(1) Basis of Presentation

The accompanying unaudited condensed financial statements have been prepared in accordance with the requirements of Form 10-Q and, therefore, do not include all information and footnotes which would be presented were such financial statements prepared in accordance with generally accepted accounting principles for annual financial statement purposes. These statements should be read in conjunction with the audited financial statements presented in the Company's Form 10-K for the year ended December 31, 2000. In the opinion of management, the accompanying financial statements reflect all adjustments which are necessary for a fair presentation of the results for the interim periods presented. Such adjustments consisted only of normal recurring items. The results of operations for the three months and six months ended June 30, 2001 are not necessarily indicative of results to be expected for the full year.

(2) Inventories

Inventories at June 30, 2001 and December 31, 2000 consist of:

	2001	2000
	----	----
Raw materials	\$1,252,847	1,082,829

(4) Earnings (Loss) per Share

Basic earnings (loss) per share are net earnings (loss) divided by the weighted average number of common shares outstanding during the period, and diluted earnings (loss) per share are net earnings (loss) divided by the sum of the weighted average plus an incremental number of shares attributable to outstanding options. Options for 107,111 shares were not used in the diluted loss calculations for the following periods because their effect was antidilutive.

Forward-Looking Statements

The following discussion may contain "forward-looking statements" that express or imply expectations of future performance, developments or occurrences. Actual events may differ materially from these expectations due to uncertainties relating to the economy, competition, demand, commodities, credit markets, energy supplies and other factors.

Swiss American Sausage Co. Meat Division

Sales by the processed meat division increased about 49% in dollars and 47% in pounds in the 1st six months of 2001 and increased 48% in dollars and 42% in pounds in the 2nd quarter of 2001, compared to the same periods of 2000. Sales in dollars increased proportionately more than in pounds because of higher selling prices reflecting higher meat costs. Swiss operated at a \$485,699 profit for the 1st six months of 2001 compared to a \$812,078 loss for the 1st six months of 2000, and at a \$160,766 profit for the 2nd quarter of 2001 compared to a \$543,450 loss for the 2nd quarter of 2000. The profit improvement resulted from increased sales and increased margins.

Royal-Angelus Macaroni Company Pasta Division

Edgar Filing: PROVENA FOODS INC - Form 10-Q

The pasta division's sales decreased about 17% in dollars and 20% pounds in the 1st half of 2001 and decreased 13% in dollars and 20% in pounds in the 2nd quarter of 2001, compared to the same periods of 2000. Royal operated at a \$349,618 loss for the 1st half of 2001 compared to a \$49,077 profit for 1st half of 2000 and a \$175,965 loss for the 2nd quarter of 2001 compared to a \$30,456 profit for the 2nd quarter of 2000. Sales and operating results were both adversely affected by competition resulting from increased industry capacity and electric utility power interruptions. The percent decreases were smaller in dollars than in pounds because of a higher proportion of lower volume-higher priced sales. Royal is negotiating employment agreements, which include stock bonuses and stock options as incentives, with new employees experienced in pasta sales and production.

5

The Company

Company sales were up 32% in the 1st half of 2001 compared to the 1st half of 2000 and were up 34% in the 2nd quarter of 2001 compared to the 2nd quarter of 2000. The Company realized a net loss of \$88,768 for the 1st half of 2000 compared to a net loss of \$620,693 a year ago and a net loss of \$98,634 for the 2nd quarter of 2001 compared to a net loss of \$387,763 a year ago. Swiss accounted for the increased sales and the reduced losses. The Company's gross margins for the 1st half and 2nd quarter of 2001 were 10.1% and 8.4%, respectively, compared to 4.3% and 1.7% a year ago. The Company's margins increased because Swiss's margins increased, with Royal's margins down as a result of sales decreasing proportionately more than production costs.

General and administrative expense was up about \$132,000 for the 1st half of 2001 and up about \$72,000 in the 2nd quarter of 2001, compared to the same periods in 2000. The increases were primarily from increased health benefit costs offset by reduced bad debt expense, with a smaller increase in office and clerical payroll offset by reduced stationery expense and outside services. Distribution expense was up about \$60,000 for the 1st half and \$15,000 for the 2nd quarter because of increased freight on increased sales plus smaller increases in travel, advertising, insurance and label design costs offset by lower salesman payroll, mileage and commissions. Net interest expense increased about \$22,000 for the 1st half of 2001 and decreased \$11,500 for the 2nd quarter of 2001 as higher borrowings under the bank line of credit offset lower interest rates on all of the Company's debt. Other income increased because of the recovery and sale of waste products at Swiss.

Meat plant employees are represented by United Food and Commercial Workers Union, Local 588, AFL-CIO, CLC under a collective bargaining agreement which expires March 31, 2002. Pasta plant employees are represented by United Food and Commercial Workers Union, Local 1428, AFL-CIO, CLC under a collective bargaining agreement which expires September 29, 2002. There has been no significant labor unrest at the Company's plants and the Company believes it has a satisfactory relationship with its employees.

Liquidity and Capital Resources

The Company has generally satisfied its normal working capital requirements with funds derived from operations and borrowings under its bank line of credit, which is part of a credit facility with Comerica Bank-California. The line of credit is payable on demand, is subject to annual review, and bears interest at a variable annual rate of 0.75% over the bank's "Base Rate." The maximum amount of the line of credit at June 30, 2001, was the lesser of \$3,000,000, or 30% of

Edgar Filing: PROVENA FOODS INC - Form 10-Q

inventories plus 80% of receivables. At June 30, 2001 the "Base Rate" was 6.75% per annum, 30% of inventories plus 80% of receivables was \$3,182,692, and the Company had \$3,500,000 of borrowings under the bank line of credit, representing an over-advance. On July 31, 2001, the bank approved an increase in the amount of the line of credit to the lesser of \$4,000,000 or 30% of inventories plus 80% of receivables, determined monthly.

As part of the credit facility, Comerica Bank-California issued a \$4,060,000 letter of credit to support \$4,000,000 of industrial development bonds issued in 1998 for costs relating to the construction of the Company's new meat plant. The bonds bear a variable rate of interest payable monthly and set weekly at a market rate - 2.5% per annum at June 30, 2001. The Company pays a 1.5% per annum fee on the amount of the letter of credit and fees of the bond

6

trustee estimated at 0.5% of the bond principal per year. Monthly payments of bond principal into a sinking fund began May 1, 2000, totaled \$76,700 the first year and increase about 5.6% each year until May 1, 2022, when \$813,500 of remaining principal is payable in 18 equal monthly payments.

Also as part of the credit facility, the bank made four loans to the Company for the new meat plant, a \$1,280,000 real estate loan and three equipment loans totalling \$2,614,788. The real estate loan was made in December 1999, bears a fixed rate of interest of 9.1% per annum and is payable in equal monthly payments of principal and interest over its 25 year term. Each equipment loan bears a variable rate of interest and is payable in equal monthly payments of principal plus interest over its term, with issue date, initial amount, term and rate as follows: July 1999, \$1,000,000, 7 year, bank's "Base Rate"; September 1999, \$1,200,000, 7 year, bank's "Base Rate" plus 0.25%; and December 1999, \$414,788, 5 year, bank's "Base Rate" plus 0.75%.

All parts of the credit facility are secured by substantially all of the Company's assets, including accounts receivable, inventory, equipment and fixtures, the Company's two Chino buildings and the new meat plant, none of which is otherwise encumbered. The credit facility prohibits mergers, acquisitions, disposal of assets, borrowing, granting security interests, and changes of management and requires a tangible net worth greater than \$9,000,000, a debt to tangible net worth ratio less than 2 and a quick ratio greater than 0.50. The Company was in default under the quick-ratio covenant and the borrowing limit at June 30, 2001, and the bank has waived the defaults. On July 31, 2001, the bank approved modifications to the credit facility eliminating the quick ratio, reducing the minimum tangible net worth to \$8,750,000, and adding requirements of working capital not less than \$50,000 effective December 31, 2001, debt service coverage not less than 1.3 effective September 30, 2001 and quarterly dividends not exceeding the net income of the prior quarter. The Company expects to be in compliance with all covenants under the credit facility at September 30 and December 31, 2001.

Cash decreased \$41,867 in the 1st half of 2001 compared to a \$784,669 decrease in the 1st half of 2000. Operating activities used \$289,522 of cash primarily from an increase in inventories, augmented by the net loss, increases in accounts receivable and prepaid expenses, a decrease in accrued liabilities and provision for doubtful accounts, and partially offset by depreciation and amortization, an increase in accounts payable and a decrease in income taxes receivable. Inventories increased because of increased sales and increasing meat costs. Investing activities used \$119,397 of cash for modest additions to property and equipment, and financing activities produced \$367,052 of cash primarily from borrowings under the bank line reduced by payments on long term debt and dividends.

Edgar Filing: PROVENA FOODS INC - Form 10-Q

The Company expects that its operations and bank line of credit will provide adequate working capital to satisfy the normal needs of its operations for the foreseeable future, including cash flow to service its debt. Swiss has shown that it can earn a profit after the depreciation and interest expense arising from the new plant. The Company is taking steps directed toward returning Royal to profitable operations.

The Company believes that it has a good relationship with Comerica Bank-California, as evidenced by the bank making an over-advance on the line of credit to ease cash flow tensions and waiving the defaults under the financial covenants. That relationship is crucial to the Company, because the line of credit is payable on demand, the Company could not make an immediate repayment of the line of credit, and a failure to repay the line after demand would

7

render the entire credit facility in default. As a result, neither a default under a financial covenant nor the bank's waiver of such a default affects the bank's power to cause the credit facility to be in default and require that it be restructured or refinanced. The Company regards the financial covenants as check-points triggering a review by the bank, and the bank's waiver as an indication of its current intention to maintain the credit facility.

New Accounting Standards

The Financial Accounting Standards Board issued Statement of Financial Accounting Standards ("SFAS") No. 141, "Business Combinations" and SFAS No. 142, "Goodwill and Other Intangible Assets" in July 2001. SFAS No. 141 requires that business combinations initiated after June 30, 2001 be accounted for under the purchase method and not the pooling-of-interests method. SFAS No. 142, effective for fiscal years beginning after December 15, 2001, requires that goodwill no longer be amortized to earnings, but instead be reviewed for impairment. Application of these standards, in the opinion of management, will not have a material effect on the Company's financial position, results of operations or liquidity.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The industrial development bonds, the bank line of credit, and the equipment loans bear variable rates of interest (see Liquidity and Capital Resources under Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations) which tend to follow market interest rates and change the Company's interest expense in the same direction as changes in interest rates. A 1% per annum change in the rate borne by the industrial development bonds would change annual interest expense by almost \$40,000. Assuming an average bank line of credit balance of \$3,500,000 plus \$1,900,000 average principal balance of equipment loans, a 1% per annum change in the rate borne by those borrowings would change annual interest expense by \$54,000.
