CRYPTOLOGIC AND WILLIAM HILL EXTEND AGREEMENT AND  
ADD POKER TO ONLINE SUITE OF GAMES  
Extended agreement reaffirms strong relationship;  
New game targets large untapped gaming market

February 24, 2003 (Toronto, ON) - CryptoLogic Inc., a leading software developer to the Internet gaming and e-commerce industries, reaffirmed the relationship with William Hill - one of the UK's largest betting organizations - through the extension of the existing agreement between its subsidiary, WagerLogic, and William Hill until 2006 for both casino and poker game offerings. William Hill has committed to exclusively use the WagerLogic powered online poker solution until 2006 and certain online casino offerings until 2004.

"Online poker is a rapidly emerging growth market. Our poker offering provides an excellent opportunity for us to gain a leadership position with William Hill, one of the first land-based brands offering interactive poker," said Lewis Rose, CryptoLogic's interim President and CEO. "Our priority is to create value and drive incremental revenue and profitability for our customers as the market leader in online gaming. We have delivered these results with William Hill - first with the success of its online casino since inception, and now with poker."

"We are delighted that William Hill has reaffirmed its confidence in and commitment to the WagerLogic relationship by extending its contract with us," added John Kemp, Director of Client Services at WagerLogic.

In partnership with WagerLogic, William Hill has established one of the most profitable casinos on the Web. And by leveraging its trusted reputation and extensive customer base now with WagerLogic's multi-player poker technology, William Hill is expected to repeat that success in online poker.

"WagerLogic's sophisticated poker solution will allow William Hill to increase customer loyalty with a broader suite of games and expand into a growing, high-revenue market," said William Hill's Bill Haygarth, Managing Director of E-Commerce. "William Hill brings trust and critical mass - key to building a large and successful poker community, as well as a perfect cross marketing opportunity with our extensive sports betting facilities. Together with WagerLogic and CryptoLogic, we are now in our fourth year of achieving strong results from our online business. Today's announcement reaffirms our commitment to our partnership going forward."

Poker is played more than any other card game in the world. While there are only a handful of sites for online poker play, and even fewer land-based brands in this segment, table poker already accounts for approximately 5% of the \$3.5 billion online gaming market.

popular Texas Hold'em and 7-Card Stud games and enables players to play in their preferred currency - US dollars, British pounds sterling or euros. High quality graphics, a chat feature and WagerLogic's exceptional level of support and service round out this leading multi-player poker offering.

WagerLogic Poker incorporates anti-collusion features to flag suspicious activity and poker experts monitoring hands to ensure fair play. In addition, a proprietary user-friendly log viewer allows players to track each hand they play.
