DAXOR CORPORATION

NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

THREE MONTHS ENDED MARCH 31, 2003 AND 2002

In the opinion of the Company, the accompanying unaudited financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position as of March 31, 2003, and December 31, 2002, the results of operations for the three months ended March 31, 2003 and 2002 and cash flows for the three months ended March 31, 2003 and 2002.

(1) MARKETABLE SECURITIES

Upon adoption of FASB No. 115, management has determined that the company's portfolio is best characterized as "Available-For-Sale". This has resulted in the balance sheet carrying value of the company's marketable securities investments, as of March 31, 2003 and December 31, 2002 being increased approximately 73.45 % and 85.89 % respectively over its historical cost. A corresponding increase in shareholders' equity has been effectuated. In accordance with the provisions of FASB No. 115, the adjustment in shareholders' equity to reflect the company's unrealized gains has been made net of the tax effect had these gains been realized.

The following tables summarize the company's investments as of:

MANAGEMENT'S DISCUSSION AND ANALYSIS RESULTS OF OPERATIONS AND FINANCIAL CONDITION

ITEM 2.

RESULTS OF OPERATIONS

Three months ended March 31, 2003 as compared with three months ended March 31, 2002.

For the three months ended March 31, 2003 total revenues were \$737,617, up from \$661,838 in 2002. There were Capital gains in 2003 of \$35,902 vs. \$803 in 2002. Operating revenues were \$218,683 in 2003 up from \$193,063 in 2002. Sales from the BVA Division were a factor resulting in increased revenues. Dividend income in 2003 was \$479,889 with a net interest expense of \$14,507 as compared to dividend income of \$455,986 with a net interest expense of \$11,572 in 2002. In 2003, the Company had a net loss before income taxes of (\$253,035) versus \$48,320 in 2002. The Company expected operating revenues to increase more rapidly because of the increased expenses associated with the sales/marketing staff. There is a cycle which may take from 6 to 12 months from initial contact with hospitals and physicians before a sale can be consummated. In some instances, the instrument was placed on a trial basis at a facility whose only requirement was paying for kit utilization that later converted into a sale. Recent examples have been the NIH and the Mayo Clinic. The Company anticipates hiring some additional sales personnel and at the present time is able to sustain these increased expenses which are an integral part of expanding its sales. The Company believes the second quarter will show the effect of increased sales and marketing efforts.

LIQUIDITY AND CAPITAL RESOURCES

At March 31, 2003 the Company had total assets of \$39,272,928 and total liabilities of \$7,743,700 with shareholders' equity of \$31,529,228. The Company has a net pre-taxed unrealized gain of \$16,174,210 and \$ 10,674,979 of net after tax unrealized capital gains on available-for-sale securities in its portfolio. This amount is included in the calculation of Total Shareholders' Equity. The Company's stock portfolio had a market value of \$38,195,080 with short-term loans of \$1,922,605 with 4,654,584 shares outstanding.

The Company has adequate resources for the current marketing level of its Blood Volume Analyzer as well as capital to sustain its localized semen and blood banking services. The Company anticipates hiring 2 to 3 additional regional managers to the existing sales/marketing team. It is the goal of the marketing team to develop an individual sales team for each regional manager.

Edgar Filing: DAXOR CORP - Form 10-Q

The Company is also expanding its support services personnel. The decision to develop the marketing team was partially based on the anticipation of new publications in peer reviewed medical journals by current users of the Blood Volume Analyzer. The Company's goal is to establish blood volume measurement as a standard of care in multiple areas of medicine and surgery. It is hoped that the publication of research studies from leading medical facilities will enable an increase in sales in both the Blood Volume Analyzer and its associated kits.

The Company has an instrument loaner reagent plan which requires use of the Company's reserves. The equipment loaner reagent plan permits a user to make a minimal initial capital commitment. This results in a slower return on capital expenditure for the Company. The Company has established a private label leasing program called Daxor Capital through De Lage Landen. With this arrangement, Daxor

receives the net present value of the lease upon the signed completion of the installation of the equipment. The Company is evaluating blood volume instrumentation management programs for hospitals. Under such a plan, the Company would provide equipment and personnel on a sub-contract basis. The Company will use its current financial reserves primarily for developing and marketing the Blood Volume Analyzer. The Company is evaluating various options to expand blood banking services in conjunction with the use of the Blood Volume Analyzer.
