INDEPENDENT BANK CORP
Form 10-Q
November 03, 2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended September 30, 2016
Commission File Number: 1-9047

Independent Bank Corp.
(Exact name of registrant as specified in its charter)

Massachusetts	04-2870273
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

Office Address: 2036 Washington Street, Hanover Massachusetts 02339
Mailing Address: 288 Union Street, Rockland, Massachusetts 02370
(Address of principal executive offices, including zip code)
(781) 878-6100
(Registrant’s telephone number, including area code)
Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No o
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes x No o
Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer	x	Accelerated Filer	o
Non-accelerated Filer	o	Smaller Reporting Company	o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No x
As of November 1, 2016, there were 26,329,185 shares of the issuer’s common stock outstanding, par value $0.01 per share.

CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Independent Bank Corp. (the “Company”) is a state chartered, federally registered bank holding company, incorporated in 1985. The Company is the sole stockholder of Rockland Trust Company (“Rockland Trust” or the “Bank”), a Massachusetts trust company chartered in 1907.

All material intercompany balances and transactions have been eliminated in consolidation. Certain previously reported amounts may have been reclassified to conform to the current year’s presentation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation of the financial statements, primarily consisting of normal recurring adjustments, have been included. Operating results for the quarter ended September 30, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016 or any other interim period.

For further information, refer to the consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015, filed with the Securities and Exchange Commission.

NOTE 2 - RECENT ACCOUNTING STANDARDS UPDATES

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 606 "Revenue from Contracts with Customers" Update No. 2014-09. Update No. 2014-09 was issued in May 2014 to address the previous revenue recognition requirements in GAAP that differ from those in International Financial Reporting Standards (IFRS). Accordingly, the FASB and the International Accounting Standards Board (IASB) initiated a joint project to clarify the principles for recognizing revenue and to develop a common revenue standard for U.S. GAAP and IFRS. The largely converged revenue recognition standards will supersede virtually all revenue recognition guidance in GAAP and IFRS. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Since the issuance of Update 2014-09, the FASB has finalized various amendments to the standard as summarized below:

FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2016-12
FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2016-10
FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2016-08.
FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2015-14.

Through Updates 2016-12, 2016-10 and 2016-08, the FASB amended its new revenue guidance on licenses of intellectual property, identification of performance obligations, collectability, noncash consideration and the presentation of sales and other similar taxes. The FASB also clarified the definition of a completed contract at transition and added a practical expedient to ease transition for contracts that were modified prior to adoption. The FASB also amended the new revenue recognition guidance on determining whether an entity is a principal or an agent in an arrangement which affects whether revenue should be reported gross or net.

Following the issuance of Update 2015-14, Update 2014-09, as amended, is effective for the Company for annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. A full or modified retrospective transition method is required. The Company's revenue is comprised of net interest income on financial assets and liabilities, which is explicitly excluded from the scope of the new guidance, and noninterest income. The Company plans to adopt the revenue recognition guidance in the first quarter of 2018 and is currently evaluating the potential impact on noninterest income on the Company's consolidated financial position, other presentation and disclosure issues, as well as evaluating its selection of transition method.

FASB ASC Topic 230 "Statement of Cash Flows" Update No. 2016-15. Update No. 2016-15 was issued in August 2016 to reduce diversity of practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments in this update provide guidance on the following eight specific cash flow issues; (1) debt prepayment or debt extinguishment costs, (2) settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing, (3) contingent consideration payments made after a business combination, (4) proceeds from the settlement of insurance claims, (5) proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies, (6) distributions received from equity method investees, (7) beneficial interests in securitization transactions, and (8) separately identifiable cash flows and application of the Predominance Principle. The amendments in this topic will provide guidance for these eight issues, thereby reducing the current and potential future diversity in practice. The amendments in this update are effective for annual periods and interim periods within those annual periods beginning after December 31, 2017. Earlier adoption is permitted, including interim reporting periods within that reporting period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. An entity that elects early adoption must adopt all of the amendments in the same period. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 326 "Financial Instruments - Credit Losses" Update No. 2016-13. Update No. 2016-13 was issued in June 2016 to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. To achieve this objective, the amendments in this update replace the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The amendments affect entities holding financial assets and net investment in leases that are not accounted for at fair value through net income. The amendments affect loans, debt securities, trade receivables, net investments in leases, off-balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The amendments in this update are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years, with earlier adoption permitted as of fiscal years beginning after December 15, 2018, including interim periods with those fiscal years. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 605 "Revenue Recognition" and Topic 815 "Derivatives and Hedging" Update No. 2016-11. Update No. 2016-11 was issued in May 2016 and is a rescission of SEC guidance because of ASU Updates 2014-09 and 2014-16 pursuant to staff announcements at the March 3, 2016 Emerging Issues Task Force meeting. The amendments in this update are effective upon adoption of Topic 606 "Revenue from Contracts with Customers." The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 718 "Compensation - Stock Compensation" Update No. 2016-09. Update No. 2016-09 was issued in March 2016 and affects all entities that issue share-based awards to their employees. This update was issued as part of the FASB’s simplification initiative. The areas for simplification in this update involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 323 "Investments -Equity Method and Joint Ventures" Update No. 2016-07. Update No. 2016-07 was issued in March 2016 and eliminates the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. Therefore, upon qualifying for the equity method of accounting, no retroactive adjustment of the investment is required. The amendments in this update require that an entity that has an available-for-sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment becomes qualified for use of the equity method. The amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 815 "Derivative and Hedging - Contingent Put and Call Options in Debt Instruments" Update No. 2016-6. Update No. 2016-6 was issued in March 2016 to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. An entity performing the assessment under the amendments in this update is required to assess the embedded call (put) options solely in accordance with the four-step decision sequence. For public entities, the amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. An entity has an option to apply

Table of Contents

the amendments in this update on either a prospective basis or a modified retrospective basis. Early adoption is permitted, including adoption in an interim period. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 815 "Derivative and Hedging - Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships" Update No. 2016-05. Update No. 2016-05 was issued in March 2016 and applies to all reporting entities for which there is a change in the counterpart to a derivative instrument that has been designated as a hedging instrument under Topic 815. The amendments in this update clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument under Topic 815 does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria (including those in paragraphs 815-20-35-14 through 35-18) continue to be met. For public entities, the amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. An entity has an option to apply the amendments in this update on either a prospective basis or a modified retrospective basis. Early adoption is permitted, including adoption in an interim period. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 842 "Leases" Update No. 2016-02. Update No. 2016-02 was issued in February 2016 and affects any entity that enters into a lease (as that term is defined in this update), with some specified scope exemptions. The core principle of this update is that a lessee should recognize in the statement of financial position a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for the lease term. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. The recognition, measurement, and presentation of expenses and cash flows arising from a lease have not significantly changed from previous GAAP. In addition, the accounting applied by a lessor is largely unchanged from that applied under previous GAAP. For public companies, the amendments in this update are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 825-10 "Financial Instruments - Overall Recognition and Measurement of Financial Assets and Financial Liabilities" Update No. 2016-01. Update No. 2016-01 was issued in January 2016 to amend the guidance in U.S. GAAP on the classification and measurement of financial instruments. Although the update retains many current requirements, it significantly revises an entity's accounting related to (1) the classification and measurement of investments in equity securities and (2) the presentation of certain fair value changes for financial liabilities measured at fair value. The update also amends certain disclosure requirements associated with the fair value of financial instruments and various other aspects of recognition, measurement, presentation and disclosure of financial instruments. For public entities, the amendments in this update are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted for only certain guidance. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Subtopic 835-30 "Interest - Imputation of Interest" Update No. 2015-03. Update No. 2015-03 was issued in April 2015 to simplify presentation of debt issuance costs. The amendments in this update require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuances costs are not affected by the amendments in this update. The amendments in this update were adopted by the Company effective January 1, 2016, with applicable prior period presentation updated as well. The adoption of this standard did not have a material impact on the Company's consolidated financial position.

Table of Contents

NOTE 3 - SECURITIES
Trading Securities

The Company had trading securities of $809,000 and $356,000 as of September 30, 2016 and December 31, 2015, respectively. These securities are held in a rabbi trust and will be used for future payments associated with the Company's non-qualified 401(k) Restoration Plan and Non-Qualified Deferred Compensation Plan.

Available for Sale and Held to Maturity Securities
The following table presents a summary of the amortized cost and gross unrealized holding gains and losses recorded in other comprehensive income and fair value of securities available for sale and securities held to maturity for the periods below:

	September 30, 2016				December 31, 2015			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(Dollars in thousands)							
Available for sale securities								
U.S. government agency securities	$24,502	$ 804	$ —	$25,306	$29,958	$ 261	$ (4)	$30,215

Single issuer trust preferred securities issued by banks	1,500	47	—	1,547	1,500	22	—	1,522
Small business administration pooled securities	32,689	1,118	—	33,807	35,291	437	(64)	35,664

Corporate debt securities	—	—	—	—	5,000	6	—	5,006
Total held to maturity securities	$430,763	$11,627	$(556)	$441,834	$477,507	$5,177	$(3,935)	$478,749
Total	$807,283	$23,210	$(1,651)	$828,842	$842,647	$10,429	$(7,078)	$845,998

When securities are sold, the adjusted cost of the specific security sold is used to compute the gain or loss on the sale.

The actual maturities of certain securities may differ from the contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. A schedule of the contractual maturities of securities available for sale and securities held to maturity as of September 30, 2016 is presented below:

Table of Contents

	Available for Sale		Held to Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(Dollars in thousands)			
Due in one year or less	$999	$1,003	$11	$11
Due after one year to five years	30,422	31,258	16,099	16,739
Due after five to ten years	86,511	89,455	24,594	25,602
Due after ten years	239,588	245,834	390,059	399,482
Total debt securities	$357,520	$367,550	$430,763	$441,834
Equity securities	$19,000	$19,458	$—	$—
Total	$376,520	$387,008	$430,763	$441,834

Inclusive in the table above is $11.9 million of callable securities in the Company's investment portfolio at September 30, 2016.

The carrying value of securities pledged to secure public funds, trust deposits, repurchase agreements and for other purposes, as required or permitted by law, was $451.7 million and $444.8 million at September 30, 2016 and December 31, 2015, respectively.

At September 30, 2016 and December 31, 2015, the Company had no investments in obligations of individual states, counties, or municipalities which exceeded 10% of stockholders' equity.

Other-Than-Temporary Impairment ("OTTI")

The Company continually reviews investment securities for the existence of OTTI, taking into consideration current market conditions, the extent and nature of changes in fair value, issuer rating changes and trends, the credit worthiness of the obligor of the security, volatility of earnings, current analysts' evaluations, the Company's intent to sell the security, or whether it is more likely than not that the Company will be required to sell the debt security before its anticipated recovery, as well as other qualitative factors. The term "other-than-temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment.

The following tables show the gross unrealized losses and fair value of the Company's investments in an unrealized loss position, which the Company has not deemed to be OTTI, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position:

	September 30, 2016						
		Less than 12 months		12 months or longer		Total	
	# of holdings	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(Dollars in thousands)

The Company does not intend to sell these investments and has determined based upon available evidence that it is more likely than not that the Company will not be required to sell the security before the recovery of its amortized cost basis. As a result, the Company does not consider these investments to be OTTI. The Company made this determination by reviewing various qualitative and quantitative factors regarding each investment category, such as current market conditions, extent and nature of changes in fair value, issuer rating changes and trends, volatility of earnings, and current analysts' evaluations.

As a result of the Company's review of these qualitative and quantitative factors, the causes of the impairments listed in the table above by category are as follows at September 30, 2016:

- Agency Mortgage-Backed Securities and Agency Collateralized Mortgage Obligations: These portfolios have contractual terms that generally do not permit the issuer to settle the securities at a price less than the current par value of the investment. The decline in market value of these securities is attributable to changes in interest rates and not credit quality. Additionally, these securities are either implicitly or explicitly guaranteed by the U.S. Government or one of its agencies.
- Single Issuer Trust Preferred Securities: This portfolio consists of two securities, one of which is below investment grade. The unrealized loss on these securities is attributable to the illiquid nature of the trust preferred market in the current economic environment. Management evaluates various financial metrics for the issuers, including regulatory capital ratios of the issuers.
- Pooled Trust Preferred Securities: This portfolio consists of one below investment grade security which is performing. The unrealized loss on this security is attributable to the illiquid nature of the trust preferred market in the current economic and regulatory environment. Management evaluates collateral credit and instrument structure, including current and expected deferral and default rates and timing. In addition, discount rates are determined by evaluating comparable spreads observed currently in the market for similar instruments.
- Equity Securities: This portfolio consists of mutual funds and other equity investments. During some periods, the mutual funds in the Company's investment portfolio may have unrealized losses resulting from market fluctuations as well as the risk premium associated with that particular asset class. For example, emerging market equities tend to trade at a higher risk premium than U.S. government bonds and thus, will fluctuate to a greater degree on both the upside and the downside. In the context of a well-diversified portfolio, however, the correlation amongst the various asset classes represented by the funds serves to minimize downside risk. The Company evaluates each mutual fund in the portfolio regularly and measures performance on both an absolute and relative basis. A reasonable recovery period for positions with an unrealized loss is based on management's assessment of general economic data, trends within a particular asset class, valuations, earnings forecasts and bond durations. The Company has the ability and intent to hold these equity securities until a recovery of fair value.

Table of Contents

The following table shows the total OTTI that the Company recorded for the periods indicated:

	Three Months Ended September 30		Nine Months Ended September 30	
	2016	2015	2016	2015
	(Dollars in thousands)			
Gross change in OTTI recorded on certain investments	$ —	$ —	$ —	$ 84
Portion of OTTI recognized in OCI	—	—	—	(84)
Total credit related OTTI recognized in earnings	$ —	$ —	$ —	$ —

The following table shows the cumulative credit related component of OTTI for the periods indicated:

For the purpose of estimating the allowance for loan losses, management segregates the loan portfolio into the portfolio segments detailed in the above tables. Each of these loan categories possesses unique risk characteristics that are considered when determining the appropriate level of allowance for each segment. Some of the risk characteristics unique to each loan category include:

Commercial Portfolio

- Commercial and Industrial: Loans in this category consist of revolving and term loan obligations extended to business and corporate enterprises for the purpose of financing working capital and/or capital investment. Collateral generally consists of pledges of business assets including, but not limited to: accounts receivable, inventory, plant and equipment, or real estate, if applicable. Repayment sources consist of primarily, operating cash flow, and secondarily, liquidation of assets.

- Commercial Real Estate: Loans in this category consist of mortgage loans to finance investment in real property such as multi-family residential, commercial/retail, office, industrial, hotels, educational and healthcare facilities and other specific

19

Table of Contents

use properties. Loans are typically written with amortizing payment structures. Collateral values are determined based upon third party appraisals and evaluations. Loan to value ratios at origination are governed by established policy and regulatory guidelines. Repayment sources consist of primarily, cash flow from operating leases and rents, and secondarily, liquidation of assets.

- Commercial Construction: Loans in this category consist of short-term construction loans, revolving and nonrevolving credit lines and construction/permanent loans to finance the acquisition, development and construction or rehabilitation of real property. Project types include residential 1-4 family, condominium and multi-family homes, commercial/retail, office, industrial, hotels, educational and healthcare facilities and other specific use properties. Loans may be written with nonamortizing or hybrid payment structures depending upon the type of project. Collateral values are determined based upon third party appraisals and evaluations. Loan to value ratios at origination are governed by established policy and regulatory guidelines. Repayment sources vary depending upon the type of project and may consist of sale or lease of units, operating cash flows or liquidation of other assets.
- Small Business: Loans in this category consist of revolving, term loan and mortgage obligations extended to sole proprietors and small businesses for purposes of financing working capital and/or capital investment. Collateral generally consists of pledges of business assets including, but not limited to, accounts receivable, inventory, plant and equipment, or real estate if applicable. Repayment sources consist primarily of operating cash flows, and secondarily, liquidation of assets.

For the commercial portfolio it is the Company’s policy to obtain personal guarantees for payment from individuals holding material ownership interests of the borrowing entities.

Consumer Portfolio

- Residential Real Estate: Residential mortgage loans held in the Company’s portfolio are made to borrowers who demonstrate the ability to make scheduled payments with full consideration to underwriting factors such as current and expected income, employment status, current assets, other financial resources, credit history and the value of the collateral. Collateral consists of mortgage liens on 1-4 family residential properties. The Company does not originate or purchase sub-prime loans.
- Home Equity: Home equity loans and lines are made to qualified individuals and are primarily secured by senior or junior mortgage liens on owner-occupied 1-4 family homes, condominiums or vacation homes. The home equity loan has a fixed rate and is billed in equal payments comprised of principal and interest. The home equity line of credit has a variable rate and is billed in interest-only payments during the draw period. At the end of the draw period, the home equity line of credit is billed as a percentage of the principal balance plus all accrued interest. Additionally, the Company has the option of renewing the line of credit for additional draw periods. Borrower qualifications include favorable credit history combined with supportive income requirements and combined loan to value ratios within established policy guidelines.
- Other Consumer: Other consumer loan products include personal lines of credit and amortizing loans made to qualified individuals for various purposes such as education, debt consolidation, personal expenses or overdraft protection. Borrower qualifications include favorable credit history combined with supportive income and collateral requirements within established policy guidelines. These loans may be secured or unsecured.

Credit Quality

The Company continually monitors the asset quality of the loan portfolio using all available information. Based on this information, loans demonstrating certain payment issues or other weaknesses may be categorized as delinquent, impaired, nonperforming and/or put on nonaccrual status. Additionally, in the course of resolving such loans, the Company may choose to restructure the contractual terms of certain loans to match the borrower’s ability to repay the loan based on their current financial condition. If a restructured loan meets certain criteria, it may be categorized as a troubled debt restructuring (“TDR”).

The Company reviews numerous credit quality indicators when assessing the risk in its loan portfolio. For the commercial portfolio, the Company utilizes a 10-point commercial risk-rating system, which assigns a risk-grade to each borrower based on a number of quantitative and qualitative factors associated with a commercial loan transaction. Factors considered include industry and market conditions, position within the industry, earnings trends, operating cash flow, asset/liability values, debt capacity, guarantor strength, management and controls, financial reporting, collateral, and other considerations. The risk-ratings categories are defined as follows:

- 1- 6 Rating — Pass: Risk-rating grades “1” through “6” comprise those loans ranging from ‘Substantially Risk Free’ which indicates borrowers are of unquestioned credit standing and the pinnacle of credit quality, well established companies with a very strong financial condition, and loans fully secured by cash collateral, through ‘Acceptable Risk’, which indicates borrowers may exhibit declining earnings, strained cash flow, increasing or above average leverage and/or weakening market fundamentals that indicate below average asset quality, margins and market share. Collateral coverage is protective.

Table of Contents

- 7 Rating — Potential Weakness: Borrowers exhibit potential credit weaknesses or downward trends deserving management's close attention. If not checked or corrected, these trends will weaken the Company's asset and position. While potentially weak, currently these borrowers are marginally acceptable; no loss of principal or interest is envisioned.
- 8 Rating — Definite Weakness Loss Unlikely: Borrowers exhibit well defined weaknesses that jeopardize the orderly liquidation of debt. Loan may be inadequately protected by the current net worth and paying capacity of the obligor or by the collateral pledged, if any. Normal repayment from the borrower is in jeopardy, although no loss of principal is envisioned. However, there is a distinct possibility that a partial loss of interest and/or principal will occur if the deficiencies are not corrected. Collateral coverage may be inadequate to cover the principal obligation.
- 9 Rating — Partial Loss Probable: Borrowers exhibit well defined weaknesses that jeopardize the orderly liquidation of debt with the added provision that the weaknesses make collection of the debt in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Serious problems exist to the point where partial loss of principal is likely.
- 10 Rating — Definite Loss: Borrowers deemed incapable of repayment. Loans to such borrowers are considered uncollectible and of such little value that continuation as active assets of the Company is not warranted.

The credit quality of the commercial loan portfolio is actively monitored and any changes in credit quality are reflected in risk-rating changes. Risk-ratings are assigned or reviewed for all new loans, when advancing significant additions to existing relationships (over $50,000), at least quarterly for all actively managed loans, and any time a significant event occurs, including at renewal of the loan.

The Company utilizes a comprehensive strategy for monitoring commercial credit quality. Borrowers are required to provide updated financial information at least annually which is carefully evaluated for any changes in credit quality. Larger loan relationships are subject to a full annual credit review by an experienced credit analysis group. Additionally, the Company retains an independent loan review firm to evaluate the credit quality of the commercial loan portfolio. The independent loan review process achieves significant penetration into the commercial loan portfolio and reports the results of these reviews to the Audit Committee of the Board of Directors on a quarterly basis.

The following table details the amount of outstanding principal balances relative to each of the risk-rating categories for the Company's commercial portfolio:

		September 30, 2016				
Category	Risk Rating	Commercial and Industrial	Commercial Real Estate	Commercial Construction	Small Business	Total
		(Dollars in thousands)				
Pass	1 - 6	$746,616	$2,648,658	$ 370,149	$ 112,442	$3,877,865

Table of Contents

For the Company's consumer portfolio, the quality of the loan is best indicated by the repayment performance of an individual borrower. However, the Company does supplement performance data with current Fair Isaac Corporation ("FICO") scores and Loan to Value ("LTV") estimates. Current FICO data is purchased and appended to all consumer loans on a quarterly basis. In addition, automated valuation services and broker opinions of value are used to supplement original value data for the residential and home equity portfolios, periodically. The following table shows the weighted average FICO scores and the weighted average combined LTV ratios as of the periods indicated below:

	September 30, 2016		December 31, 2015	
Residential portfolio				
FICO score (re-scored)(1)	743		742	
LTV (re-valued)(2)	62.7	%	61.4	%
Home equity portfolio				
FICO score (re-scored)(1)	767		765	
LTV (re-valued)(2)	56.2	%	55.8	%

(1) The average FICO scores for September 30, 2016 are based upon rescores available from August 31, 2016 and origination score data for loans booked between September 1, 2016 and September 30, 2016. The average FICO scores for December 31, 2015 are based upon rescores available from November 30, 2015 and origination score data for loans booked between December 1, 2015 and December 31, 2015.

(2) The combined LTV ratios for September 30, 2016 are based upon updated automated valuations as of March 31, 2015 and origination value data for loans booked between April 1, 2015 and September 30, 2016. The combined LTV ratios for December 31, 2015 are based upon updated automated valuations as of March 31, 2015 and actual score data for loans booked from April 1, 2015 through December 31, 2015. For home equity loans and lines in a subordinate lien position, the LTV data represents a combined LTV, taking into account the senior lien data for loans and lines.

Asset Quality

The Company's philosophy toward managing its loan portfolios is predicated upon careful monitoring, which stresses early detection and response to delinquent and default situations. Delinquent loans are managed by a team of seasoned collection specialists and the Company seeks to make arrangements to resolve any delinquent or default situation over the shortest possible time frame. As a general rule, loans more than 90 days past due with respect to principal or interest are classified as nonaccrual loans. The Company also may use discretion regarding other loans over 90 days delinquent if the loan is well secured and/or in process of collection. Set forth is information regarding the Company's nonperforming loans at the period shown:

Table of Contents

The following table shows information regarding nonaccrual loans at the dates indicated:

	September 30, 2016	December 31, 2015
	(Dollars in thousands)	
Commercial and industrial	$3,065	$ 3,699
Commercial real estate	7,399	7,856
Commercial construction	—	304
Small business	288	239
Residential real estate	7,684	8,795
Home equity	6,311	6,742
Other consumer	44	55
Total nonaccrual loans(1)	$24,791	$ 27,690

(1) Included in these amounts were $5.9 million and $5.2 million of nonaccruing TDRs at September 30, 2016 and December 31, 2015, respectively.

The following table shows information regarding foreclosed residential real estate property at the dates indicated:

	September 30, 2016	December 31, 2015
	(Dollars in thousands)	
Foreclosed residential real estate property held by the creditor	$1,384	$ 1,430
Recorded investment in mortgage loans collateralized by residential real estate property that are in the process of foreclosure	$1,557	$ 1,059

(1) Other consumer portfolio is inclusive of deposit account overdrafts recorded as loan balances.

Troubled Debt Restructurings

In the course of resolving nonperforming loans, the Bank may choose to restructure the contractual terms of certain loans. The Bank attempts to work out an alternative payment schedule with the borrower in order to avoid foreclosure actions. Any loans that are modified are reviewed by the Bank to identify if a TDR has occurred, which is when, for economic or legal reasons related to a borrower's financial difficulties, the Bank grants a concession to the borrower that it would not otherwise consider. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status and the restructuring of the loan may include the transfer of assets from the borrower to satisfy the debt, a modification of loan terms, or a combination of the two.

The following table shows the Company's total TDRs and other pertinent information as of the dates indicated:

	September 30, 2016	December 31, 2015
	(Dollars in thousands)	
TDRs on accrual status	$27,644	$ 32,849
TDRs on nonaccrual	5,910	5,225
Total TDRs	$33,554	$ 38,074
Amount of specific reserves included in the allowance for loan losses associated with TDRs	$1,515	$ 1,628
Additional commitments to lend to a borrower who has been a party to a TDR	$1,097	$ 972

The Company's policy is to have any restructured loan which is on nonaccrual status prior to being modified remain on nonaccrual status for six months subsequent to being modified before management considers its return to accrual status. If the restructured loan is on accrual status prior to being modified, it is reviewed to determine if the modified loan should remain on accrual status. Additionally, loans classified as TDRs are adjusted to reflect the changes in value of the recorded investment in the loan, if any, resulting from the granting of a concession. For all residential loan modifications, the borrower must perform during a 90 day trial period before the modification is finalized.

The following table shows the modifications which occurred during the periods indicated and the change in the recorded investment subsequent to the modifications occurring:

Table of Contents

	Three Months Ended September 30, 2016			Nine Months Ended September 30, 2016

	Nine Months Ended September 30			
	2016		2015	
	Number of Contracts	Recorded Investment	Number of Contracts	Recorded Investment
	(Dollars in thousands)			
Troubled debt restructurings that subsequently defaulted				
Commercial real estate	—	$ —	2	$ 880
Commercial and industrial	—	—	3	339
Home equity	1	$ 141	—	$ —
	1	$ 141	5	$ 1,219

All TDR loans are considered impaired and therefore are subject to a specific review for impairment. The impairment analysis appropriately discounts the present value of the anticipated cash flows by the loan's contractual rate of interest in effect prior to the loan's modification. The amount of impairment, if any, is recorded as a specific loss allocation to each individual loan in the allowance for loan losses. Commercial loans (commercial and industrial, commercial construction, commercial real estate and small business loans), residential loans, and home equity loans that have been classified as TDRs and which subsequently default are reviewed to determine if the loan should be deemed collateral dependent. In such an instance, any shortfall between the value of the collateral and the carrying value of the loan is determined by measuring the recorded investment in the loan against the fair value of the collateral less costs to sell. The Company charges off the amount of any confirmed loan loss in the period when the loans, or portion of loans, are deemed uncollectible. Smaller balance consumer TDR loans are reviewed for performance to determine when a charge-off is appropriate.

Impaired Loans

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Table of Contents

Purchased Credit Impaired Loans

Certain loans acquired by the Company may have shown evidence of deterioration of credit quality since origination and it was therefore deemed unlikely that the Company would be able to collect all contractually required payments. As such, these loans were deemed to be PCI loans and the carrying value and prospective income recognition are predicated upon future cash flows expected to be collected. The following table displays certain information pertaining to PCI loans at the dates indicated:

	September 30, 2016	December 31, 2015
	(Dollars in thousands)	
Outstanding balance	$21,481	$ 23,199
Carrying amount	$19,274	$ 20,595

The following table summarizes activity in the accretable yield for the PCI loan portfolio:

	Three Months Ended September 30		Nine Months Ended September 30	
	2016	2015	2016	2015
	(Dollars in thousands)			
Beginning balance	$2,625	$2,527	$2,827	$2,974
Acquisition	—	—	—	319
Accretion	(359)	(592)	(1,188)	(2,138)
Other change in expected cash flows (1)	213	278	744	978
Reclassification from nonaccretable difference for loans which have paid off (2)	—	218	96	298
Ending balance	$2,479	$2,431	$2,479	$2,431

(1) Represents changes in cash flows expected to be collected and resulting in increased interest income as a prospective yield adjustment over the remaining life of the loan(s).
(2) Results in increased interest income during the period in which the loan paid off at amount greater than originally expected.

NOTE 5 -EARNINGS PER SHARE

Earnings per share consisted of the following components for the periods indicated:

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2016	2015	2016	2015
	(Dollars in thousands, except share and per share data)			
Net income	$20,484	$ 18,594	$59,469	$ 45,505
Weighted Average Shares				
Basic shares	26,324,316	26,200,621	26,301,340	25,774,571
Effect of dilutive securities	53,072	63,493	48,354	72,921
Diluted shares	26,377,388	26,264,114	26,349,694	25,847,492
Net income per share				
Basic EPS	$0.78	$ 0.71	$2.26	$ 1.77
Effect of dilutive securities	—	—	—	(0.01)
Diluted EPS	$0.78	$ 0.71	$2.26	$ 1.76

The following table illustrates the options to purchase common stock or shares of performance-based restricted stock that were excluded from the calculation of diluted earnings per share because they were anti-dilutive for the periods indicated:

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2016	2015	2016	2015
Stock options	4,293	—	1,441	—
Performance-based restricted stock	—	—	—	—

NOTE 6 - STOCK BASED COMPENSATION

Time Vested Restricted Stock Awards

During the nine months ended September 30, 2016, the Company made the following awards of restricted stock:

Date	Shares Granted	Plan	Grant Date Fair Value Per Share	Vesting Period
2/11/2016	51,475	2005 Employee Stock Plan	$ 41.96	Ratably over 5 years from grant date
3/1/2016	600	2005 Employee Stock Plan	$ 44.37	Ratably over 5 years from grant date
5/24/2016	8,700	2010 NonEmployee Director Stock Plan	$ 48.34	Cliff vest 5 years from grant date
9/19/2016	800	2005 Employee Stock Plan	$ 52.92	Ratably over 5 years from grant date

The fair value of the restricted stock awards is based upon the average of the high and low price at which the Company’s common stock traded on the date of grant. The holders of restricted stock awards participate fully in the rewards of stock ownership of the Company, including voting and dividend rights.

Performance-Based Restricted Stock Awards

On February 11, 2016, the Company granted 20,450 performance-based restricted stock awards to certain executive level employees. These performance-based restricted stock awards were issued from the 2005 Employee Stock Plan and were determined to have a grant date fair value per share of $41.96. The number of shares to be vested will be contingent upon the Company's attainment of certain performance measures outlined in the award agreement and will be measured as of the end of the three year performance period (January 1, 2016 - December 31, 2018). These awards will be accounted for as equity awards due to the nature of these awards and the fact that these shares will not be settled in cash.

The fair value of the performance-based restricted stock awards, assuming achievement at target, is based upon the average of the high and low price at which the Company’s common stock traded on the date of grant. The holders of these awards are not entitled to receive dividends or vote until the shares are vested.

Stock Options

The Company has made the following awards of nonqualified options to purchase shares of common stock during the nine months ended September 30, 2016:

	Nine Months Ended September 30, 2016	
Date of grant	7/14/2016	2/20/2016
Plan	2010	2010
Options granted	5,000	5,000
Vesting period (beginning on grant date)	18 months	22 months
Expiration date	7/14/2026	2/20/2026
Expected volatility	32.28 %	32.44 %
Expected life (years)	5.5	5.5
Expected dividend yield	2.37 %	2.28 %
Risk free interest rate	1.14 %	1.29 %
Fair value per option	$ 11.46	$ 10.59

NOTE 7 - REPURCHASE AGREEMENTS

The Company can raise additional liquidity by entering into repurchase agreements at its discretion. In a security repurchase agreement transaction, the Company will generally sell a security, agreeing to repurchase either the same or substantially identical security on a specified later date, at a greater price than the original sales price. The difference between the sale price and purchase price is the cost of the proceeds, which is recorded as interest expense. The securities underlying the agreements are delivered to counterparties as security for the repurchase obligations.

Since the securities are treated as collateral and the agreement does not

Table of Contents

qualify for a full transfer of effective control, the transactions does not meet the criteria to be classified as a sale, and is therefore considered a secured borrowing transaction for accounting purposes. Payments on such borrowings are interest only until the scheduled repurchase date. In a repurchase agreement the Company is subject to the risk that the purchaser may default at maturity and not return the securities underlying the agreements. In order to minimize this potential risk, the Company either deals with established firms when entering into these transactions or with customers whose agreements stipulate that the securities underlying the agreement are not delivered to the customer and instead are held in segregated safekeeping accounts by the Company's safekeeping agents. The tables below set forth information regarding the Company’s repurchase agreements allocated by source of collateral at the dates indicated:

	September 30, 2016				
	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Up to 30 Days	30-90 Days	Greater than 90 Days	Total
	(Dollars in thousands)				
Sources of collateral					
U.S. government agency securities	$15,608	$ —	$ —	$ —	$15,608
Agency mortgage-backed securities	54,535	—	—	—	54,535
Agency collateralized mortgage obligations	70,771	—	—	—	70,771
Total borrowings	$140,914	$ —	$ —	$ —	$140,914

	December 31, 2015				
	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Up to 30 Days	30-90 Days	Greater than 90 Days	Total
	(Dollars in thousands)				
Sources of Collateral					
U.S. government agency securities	$10,157	$ —	$ —	$ —	$10,157
Agency mortgage-backed securities	69,142	—	—	—	69,142
Agency collateralized mortgage obligations	54,659	—	—	—	54,659
Total borrowings	$133,958	$ —	$ —	$ —	$133,958

Certain counterparties monitor collateral, and may request additional collateral to be posted from time to time. For further information regarding the Company's repurchase agreements see Note 9 - Balance Sheet Offsetting.

NOTE 8 - DERIVATIVE AND HEDGING ACTIVITIES

The Company’s derivative financial instruments are used to manage differences in the amount, timing, and duration of the Company’s known or expected cash receipts and its known or expected cash payments principally to manage the Company’s interest rate risk. Additionally, the Company enters into interest rate derivatives and foreign exchange contracts to accommodate the business requirements of its customers (“customer related positions”). The Company minimizes the market and liquidity risks of customer related positions by entering into similar offsetting positions with broker-dealers. Derivative instruments are carried at fair value in the Company’s financial statements. The accounting for changes in the fair value of a derivative instrument is dependent upon whether or not it qualifies as a hedge for accounting purposes, and further, by the type of hedging relationship.

The Company does not enter into proprietary trading positions for any derivatives.

Interest Rate Positions

The Company currently utilizes interest rate swap agreements as hedging instruments against interest rate risk associated with the Company's borrowings. An interest rate swap is an agreement whereby one party agrees to pay a floating rate of interest on a notional principal amount in exchange for receiving a fixed rate of interest on the same notional amount, for a predetermined period of time, from a second party. The amounts relating to the notional principal amount are not actually exchanged. The maximum length of time over which the Company is currently hedging its exposure to the variability in future cash flows for forecasted transactions related to the payment of variable interest on existing financial instruments is five years.

Table of Contents

The following table reflects the Company’s derivative positions for the periods indicated below for interest rate swaps which qualify as cash flow hedges for accounting purposes:

September 30, 2016

Notional Amount	Trade Date	Effective Date	Maturity Date		Receive (Variable) Index	Current Rate Received	Pay Fixed Swap Rate	Fair Value
(Dollars in thousands)								
$25,000	16-Feb-06	28-Dec-06	28-Dec-16		3 Month LIBOR	0.85 %	5.04 %	$ (255)
25,000	16-Feb-06	28-Dec-06	28-Dec-16		3 Month LIBOR	0.85 %	5.04 %	(255)
25,000	9-Dec-08	10-Dec-08	10-Dec-18		3 Month LIBOR	0.85 %	2.94 %	(1,068)
25,000	1-Apr-16	17-Jan-17	15-Dec-21	(1)	3 Month LIBOR	TBD	1.36 %	(208)
25,000	1-Apr-16	17-Jan-17	15-Dec-21	(1)	3 Month LIBOR	TBD	1.36 %	(207)
$125,000								$ (1,993)

December 31, 2015

Notional Amount	Trade Date	Effective Date	Maturity Date	Receive (Variable) Index	Current Rate Received	Pay Fixed Swap Rate	Fair Value
			(Dollars in thousands)				
$25,000	16-Feb-06	28-Dec-06	28-Dec-16	3 Month LIBOR	0.51 %	5.04 %	$ (1,054)
25,000	16-Feb-06	28-Dec-06	28-Dec-16	3 Month LIBOR	0.51 %	5.04 %	(1,055)
25,000	9-Dec-08	10-Dec-08	10-Dec-18	3 Month LIBOR	0.49 %	2.94 %	(1,164)
$75,000							$ (3,273)

(1) In April 2016, the Company entered into two forward starting swaps with notional amounts of $25.0 million each, with the intention of hedging $50.0 million of existing junior subordinated debentures, as the current hedges on this borrowing expire in December 2016.

For derivative instruments that are designated and qualify as cash flow hedging instruments, the effective portion of the gains or losses is reported as a component of other comprehensive income ("OCI"), and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The Company expects approximately $914,000 (pre-tax) to be reclassified to interest expense from OCI related to the Company’s cash flow hedges in the next twelve months. This reclassification is due to anticipated payments that will be made and/or received on the swaps based upon the forward curve as of September 30, 2016.

The Company recognized $61,000 and $183,000 of net amortization income that was an offset to interest expense related to previously terminated swaps for the three and nine month periods ended September 30, 2016 and 2015, respectively.

The Company had no fair value hedges as of September 30, 2016 or December 31, 2015.

Customer Related Positions

Loan level derivatives, primarily interest rate swaps, offered to commercial borrowers through the Company’s loan level derivative program do not qualify as hedges for accounting purposes. The Company believes that its exposure to commercial customer derivatives is limited because these contracts are simultaneously matched at inception with an offsetting dealer transaction. The commercial customer derivative program allows the Company to retain variable-rate commercial loans while allowing the customer to synthetically fix the loan rate by entering into a variable-to-fixed interest rate swap.

Foreign exchange contracts offered to commercial borrowers through the Company’s derivative program do not qualify as hedges for accounting purposes. The Company acts as a seller and buyer of foreign exchange contracts to accommodate its customers. To mitigate the market and liquidity risk associated with these derivatives, the Company enters into similar offsetting positions.

Table of Contents

The following table reflects the Company’s customer related derivative positions for the periods indicated below for those derivatives not designated as hedging:

	Number of Positions (1)	Notional Amount Maturing Less than 1 year	Less than 2 years	Less than 3 years	Less than 4 years	Thereafter	Total	Fair Value
	September 30, 2016 (Dollars in thousands)							
Loan level swaps								
Receive fixed, pay variable	201	$29,006	$33,125	$79,593	$79,123	$559,208	$780,055	$41,390
Pay fixed, receive variable	186	$29,006	$33,125	$79,593	$79,123	$559,208	$780,055	$(41,357)
Foreign exchange contracts								
Buys foreign currency, sells U.S. currency	24	$48,831	$—	$—	$—	$—	$48,831	$91
Buys U.S. currency, sells foreign currency	24	$48,831	$—	$—	$—	$—	$48,831	$(66)
	December 31, 2015 (Dollars in thousands)							
Loan level swaps								
Receive fixed, pay variable	171	$37,732	$34,424	$29,629	$77,041	$488,110	$666,936	$22,467
Pay fixed, receive variable	165	$37,732	$34,424	$29,629	$77,041	$488,110	$666,936	$(22,462)
Foreign exchange contracts								
Buys foreign currency, sells U.S. currency	21	$38,416	$—	$—	$—	$—	$38,416	$(354)
Buys U.S. currency, sells foreign currency	21	$38,416	$—	$—	$—	$—	$38,416	$382

(1) The Company may enter into one dealer swap agreement which offsets multiple commercial borrower swap agreements.

Mortgage Derivatives

Prior to closing and funding certain 1- 4 family residential mortgage loans, an interest rate lock commitment is generally extended to the borrower. During the period from commitment date to closing date, the Company is subject to the risk that market rates of interest may change. If market rates rise, investors generally will pay less to purchase such loans resulting in a reduction in the gain on sale of the loans or, possibly, a loss. In an effort to mitigate such risk, forward delivery sales commitments are executed, under which the Company agrees to deliver whole mortgage loans to various investors. These forward commitments carry a market price that has a strong inverse relationship to that of mortgage prices. Certain assumptions, including pull through rates and rate lock periods, are used in managing the existing and future hedges. The effectiveness of the economic hedges rely on the accuracy of these assumptions.

The change in fair value on the interest rate lock commitments and forward delivery sale commitments are recorded in current period earnings as a component of mortgage banking income. In addition, the Company has elected the fair value option to carry loans held for sale at fair value. The change in fair value of loans held for sale is recorded in current period earnings as a component of mortgage banking income in accordance with the Company's fair value election. The change in fair value associated with loans held for sale was an increase of $47,000 and a decrease of $181,000 for the three month periods ended September 30, 2016 and 2015, respectively, and increases of $60,000 and $3,000 for the nine month periods ended September 30, 2016 and 2015, respectively. These amounts were offset in earnings by the change in the fair value of mortgage derivatives. The table below presents the fair value of the Company’s derivative financial instruments as well as their classification on the balance sheet at the periods indicated:

Table of Contents

	Asset Derivatives			Liability Derivatives		
	Balance Sheet Location	Fair Value at September 30 2016	Fair Value at December 31 2015	Balance Sheet Location	Fair Value at September 30 2016	Fair Value at December 31 2015
