

Edgar Filing: WORLD TRANSPORT AUTHORITY INC - Form 8-K

On November 1, 2004, World Transport Authority, Inc., an Alberta corporation, pulled the plug on the Cameron International \$1.2 million purchase order of a projected \$3.4 million long-term deal, after a series of non-performances by Cameron International. Even though Cameron International shaved the initial deposit, the Company attempted to keep the relationship on life support by continuing to accommodate Cameron even after it slowed down the payment schedule. When Cameron reneged on the final payment arrangement, the Company turned the containers around and returned them to the Philippines and MAIC, the Philippines subsidiary of the Company. This week, the Company terminated its obligation to perform under the agreement and notified Cameron of the extent of the damages the Company incurred as the result of the conduct of Cameron.

One such damage is the depletion of resources for the Company to the point where no funds were left to pay for the year-end and first quarter audit required by the SEC. Lacking funds, the Company will be temporarily suspended from trading and will go to the pink sheets.

The Company, through its Autotech International Corporation (AIC) subsidiary, is also seeking to rescind the conditional purchase of assets under a settlement agreement with WorldStar Pacific. The grounds to rescind the agreement are that the performance of AIC was conditioned on (1) payments received by Cameron International, and (2) that the assets were as they were represented to be. Both conditions were not met.

Millenium Autotech International Corporation (MAIC) is a wholly owned subsidiary of the operating subsidiary company of WTAI, AIC, which was formed in the Philippines this July to manufacture the micro-manufacturing units used for assembly of WorldStar vehicles.
