CITIZENS FINANCIAL SERVICES, INC.
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

Note 1 - Basis of Presentation

Citizens Financial Services, Inc., (individually and collectively with its direct and indirect subsidiaries, the “Company”) is a Pennsylvania corporation organized as the holding company of its wholly owned subsidiary, First Citizens National Bank (the “Bank”), and the Bank’s subsidiary, First Citizens Insurance Agency, Inc. (“First Citizens Insurance”).

The accompanying consolidated financial statements have been prepared pursuant to rules and regulations of the Securities and Exchange Commission (“SEC”) and in conformity with U.S. generally accepted accounting principles. Because this report is based on an interim period, certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted. Certain of the prior year amounts have been reclassified to conform with the current year presentation. Such reclassifications had no effect on net income or stockholders’ equity. All material inter-company balances and transactions have been eliminated in consolidation.

In the opinion of management of the Company, the accompanying interim financial statements for the quarters ended March 31, 2010 and 2009 include all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation of the financial condition and the results of operations for the period. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. The financial performance reported for the Company for the three-month period ended March 31, 2010 is not necessarily indicative of the results to be expected for the full year. This information should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended December 31, 2009.

Note 2 - Earnings per Share

The following table sets forth the computation of earnings per share. Earnings per share calculations give retroactive effect to stock dividends declared by the Company. The Company has no dilutive securities.

	Three months ended March 31,	
	2010	2009
Net income applicable to common stock	\$2,746,000	\$2,346,000
Weighted average common shares outstanding	2,870,481	2,872,476
Earnings per share	\$0.96	\$0.82

Note 3 - Income Tax Expense

Income tax expense is less than the amount calculated using the statutory tax rate, primarily as a result of tax-exempt income earned from state and municipal securities and loans and investments in tax credits.

Note 4 – Investments

The amortized cost and fair value of investment securities at March 31, 2010 and December 31, 2009 were as follows (in thousands):

5

Edgar Filing: CITIZENS FINANCIAL SERVICES INC - Form 10-Q

The following table shows the Company's gross unrealized losses and fair value of the Company's investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time, that the individual securities have been in a continuous unrealized loss position, at March 31, 2010 and December 31, 2009 (in thousands). As of March 31, 2010 and December 31, 2009, the Company owned 36 and 33

securities whose estimated fair value was less than their cost basis, respectively.

6

	Less than Twelve Months		Twelve Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
December 31, 2009						
U.S. Agency securities	\$28,665	\$ 248	\$ -	\$ -	\$28,665	\$ 248
Obligations of states and political subdivisions	\$326	\$ 120	\$ 454	\$ 42	\$11,780	\$ 162
Total securities	\$29,991	\$ 368	\$ 454	\$ 42	\$40,445	\$ 410

The Company's investment securities portfolio contains unrealized losses on mortgage-related instruments or other agency securities backed by the full faith and credit of the U. S. government. For fixed maturity investments management considers whether the present value of cash flows expected to be collected are less than the security's amortized cost basis (the difference defined as the credit loss), the magnitude and duration of the decline, the reasons underlying the decline and the Company's intent to sell the security or whether it is more likely than not that the Company would be required to sell the security before its anticipated recovery in market value, to determine whether the loss in value is other than temporary. Once a decline in value is determined to be other than temporary, if the Company does not intend to sell the security, and it is more-likely-than-not that it will not be required to sell the security, before recovery of the security's amortized cost basis, the charge to earnings is limited to the amount of credit loss. Any remaining difference between fair value and amortized cost (the difference defined as the non-credit portion) is recognized in other comprehensive income, net of applicable taxes. Otherwise, the entire difference between fair value and amortized cost is charged to earnings. For equity securities where the fair value has been significantly below cost for one year, the Company's policy is to recognize an impairment loss unless sufficient evidence is available that the decline is not other than temporary and a recovery period can be predicted. The Company has concluded that any impairment of its investment securities portfolio outlined in the above table is not other than temporary and is the result of interest rate changes, sector credit rating changes, or company-specific rating changes that are not expected to result in the non-collection of principal and interest during the period.

Proceeds from sales of securities available-for-sale for the three months ended March 31, 2010 and 2009 were \$5,855,000 and \$2,178,000, respectively. The gross gains and losses were as follows (in thousands):

	Three Months Ended	
	March 31, 2010	March 31, 2009
Gross gains	\$ 64	\$ 53
	-	37

Gross			
losses			
Net			
gains	\$	64	\$ 16

Investment securities with an approximate carrying value of \$141,270,000 and \$144,880,000 at March 31, 2010 and December 31, 2009, respectively, were pledged to secure public funds and certain other deposits.

Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. The amortized cost and estimated fair value of debt securities at March 31, 2010, by contractual maturity, are shown below (in thousands):

7

	Amortized Cost	Fair Value
Available-for-sale debt securities:		
Due in one year or less	\$ 3,816	\$ 3,879
Due after one year through five years	51,046	51,447
Due after five years through ten years	37,010	38,175
Due after ten years	119,410	122,988
Total	\$ 211,282	\$ 216,489

Note 5 – Federal Home Loan Bank (FHLB) Stock

Included in Other Assets in the Consolidated Balance Sheet is the Bank's investment in the Federal Home Loan Bank (FHLB) system, of which the Bank is a member. Members are required to own a certain amount of stock based on the level of borrowings and other factors, and may invest in additional amounts. FHLB stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment. Because this stock is viewed as a long term investment, impairment is based on ultimate recovery of par value.

As of March 31, 2010 and December 31, 2009, the Bank holds \$3,682,000 of stock in the FHLB. In December 2008, the FHLB announced that due largely to a decline in the fair value of a segment of its mortgage-backed securities portfolio, it had suspended payment of dividends on the stock and made a decision to no longer purchase "excess stock" from its members. The Bank's stock is not transferrable and can only be redeemed by the FHLB. Further deterioration in the financial condition of the FHLB may lead management to a conclusion that the cost of the Bank's stock in the FHLB is not recoverable, which would result in a charge to earnings for impairment of the Bank's holdings of the stock. As of March 31, 2010 and December 31, 2009, the investment in the FHLB is not deemed other-than-temporarily impaired based upon management's determination of the recoverability of par value.

Note 6 - Employee Benefit Plans

For a detailed disclosure on the Company's pension and employee benefits plans, please refer to Note 10 of the Company's Consolidated Financial Statements included in the 2009 Annual Report on Form 10-K.

Noncontributory Defined Benefit Pension Plan

The Bank sponsors a noncontributory defined benefit pension plan ("Pension Plan") covering substantially all employees and officers. The Bank's funding policy is to make annual contributions, if needed, based upon the funding formula developed by the plan's actuary.

The Pension Plan was amended, effective January 1, 2008, to cease eligibility for employees with a hire date of January 1, 2008 or later. In lieu of the Pension Plan, employees with a hire date of January 1, 2008 or later are eligible to receive, after meeting certain length of service requirements, an annual discretionary 401(k) plan contribution from the Bank equal to a percentage of an employee's base compensation. The contribution amount, if any, is placed in a separate account within the 401(k) plan and is subject to a vesting requirement.

The Pension Plan was also amended, effective January 1, 2008, for employees who are still eligible to participate. The amended Pension Plan requires benefits to be paid to eligible employees based primarily upon age and compensation rates during employment. Upon retirement or other termination of employment, employees can elect either an annuity benefit or a lump sum distribution of vested benefits in the Pension Plan.

The following sets forth the components of net periodic benefit costs of the Pension Plan for the three months ended March 31, 2010 and 2009, respectively (in thousands):

8

Pension Benefits

	2010	2009
Service cost	\$ 170	\$ 115
Interest cost	223	144
Expected return on plan assets	(292)	(178)
Net amortization and deferral	24	6
Net periodic benefit cost	\$ 125	\$ 87

No contributions have been made to the Pension Plan as of March 31, 2010; however, the Company expects to contribute \$500,000 to the Pension Plan in 2010.

Defined Contribution Plan

The Company sponsors a voluntary 401(k) savings plan which eligible employees can elect to contribute up to the maximum amount allowable not to exceed the limits of IRS Code Sections 401(k). Under the plan, the Company also makes required contributions on behalf of the eligible employees. The Company's contributions vest immediately. Contributions by the Company totaled \$56,000 and \$49,500 for the three months ended March 31, 2010 and 2009, respectively.

Directors' Deferred Compensation Plan

The Company's directors may elect to defer all or portions of their fees until their retirement or termination from service. Amounts deferred under the plan earn interest based upon the highest current rate offered to certificate of deposit customers. Amounts deferred under the plan are not guaranteed and represent a general liability of the Company. Amounts included in interest expense on the deferred amounts totaled \$8,000 and \$9,000 for the three months ended March 31, 2010 and 2009, respectively.

Restricted Stock Plan

Effective April 18, 2006, shareholders of the Company approved the 2006 Restricted Stock Plan (the "Plan"). Employees and non-employee corporate directors are eligible to receive awards of restricted stock based upon performance related requirements. Awards granted under the Plan are in the form of the Company's common stock and are subject to certain vesting requirements including continuous employment or service with the Company. 100,000 shares of the Company's common stock have been authorized under the Plan, which terminates April 18, 2016. The Plan assists the Company in attracting, retaining and motivating employees to make substantial contributions to the success of the Company and to increase the emphasis on the use of equity as a key component of compensation.

For the three months ended March 31, 2010 and 2009, 0 and 7,526 shares of restricted stock were awarded and 2,446 and 0 shares were vested, respectively. Compensation cost related to restricted stock is recognized based on the market price of the stock at the grant date over the vesting period. Compensation expense related to restricted stock was \$27,000 and \$19,000 for the three months ended March 31, 2010 and 2009, respectively.

Supplemental Executive Retirement Plan

During 2008, the Company adopted a non-qualified supplemental executive retirement plan (“SERP”) for certain executives to compensate those executive participants in the Company’s noncontributory defined benefit pension plan whose benefits are limited by compensation limitations under current tax law. At March 31, 2010 and December 31, 2009, an obligation of \$459,000 and \$399,000, respectively, was included in other liabilities for this plan in the consolidated balance sheet. Expenses related to this plan totaled \$59,000 and \$53,000 for the three months ended March 31, 2010 and 2009.

Note 7 – Fair Value Measurements

FASB ASC Topic 820 establishes a hierarchal disclosure framework associated with the level of pricing observability utilized in measuring assets and liabilities at fair value. The three broad levels defined by FASB ASC Topic 820 hierarchy are as follows:

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities include items for which quoted prices are available but traded less frequently, and items that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level III: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

The following tables present the assets reported on the consolidated statements of financial condition at their fair value as of March 31, 2010 and December 31, 2009 by level within the fair value hierarchy. As required by FASB ASC Topic 820, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Trust preferred interest rate swap	262	262	166	166
Accrued interest payable	1,827	1,827	2,037	2,037

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions can significantly affect the estimates.

Estimated fair values have been determined by the Company using historical data, as generally provided in the Company's regulatory reports, and an estimation methodology suitable for each category of financial instruments. The Company's fair value estimates, methods and assumptions are set forth below for the Company's other financial instruments.

Cash and Cash Equivalents:

The carrying amounts for cash and due from banks approximate fair value because they have original maturities of 90 days or less and do not present unanticipated credit concerns.

Accrued Interest Receivable and Payable:

The carrying amounts for accrued interest receivable and payable approximate fair value because they are generally received or paid in 90 days or less and do not present unanticipated credit concerns.

Available-For-Sale Securities:

The fair values of available-for-sale securities are based on quoted market prices as of the balance sheet date. For certain instruments, fair value is estimated by obtaining quotes from independent dealers.

Loans:

Fair values are estimated for portfolios of loans with similar financial characteristics. The fair value of performing loans has been estimated by discounting expected future cash flows. The discount rate used in these calculations is derived from the Treasury yield curve adjusted for credit quality, operating expense and prepayment option price, and is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan. The estimate of maturity is based on the Company's historical experience with repayments for each loan classification, modified as required by an estimate of the effect of current economic and lending conditions.

Fair value for significant nonperforming loans is based on recent external appraisals. If appraisals are not available, estimated cash flows are discounted using a rate commensurate with the risk associated with the estimated cash flows. Assumptions regarding credit risk, cash flows, and discount rates are judgmentally determined using available market information and specific borrower information.

Bank Owned Life Insurance:

The carrying value of bank owned life insurance approximates fair value based on applicable redemption provisions.

Regulatory Stock:

The carrying value of regulatory stock approximates fair value based on applicable redemption provisions.

Deposits:

The fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, savings and NOW accounts, and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

The deposits' fair value estimates do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market, commonly referred to as the core deposit intangible.

Borrowed Funds:

Rates available to the Company for borrowed funds with similar terms and remaining maturities are used to estimate the fair value of borrowed funds.

Trust Preferred Interest Rate Swap:

The fair value of the trust preferred interest rate swap is based on a pricing model that utilizes a yield curve and information contained in the swap agreement.

Note 8 – Recent Accounting Pronouncements

In December 2009, the FASB issued ASU 2009-16, Accounting for Transfer of Financial Assets. ASU 2009-16 provides guidance to improve the relevance, representational faithfulness, and comparability of the information that an entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets. ASU 2009-16 is effective for annual periods beginning after November 15, 2009 and for interim periods within those fiscal years. The adoption of this guidance did not have a material impact on the Company's financial position or results of operation.

In December 2009, the FASB issued ASU 2009-17, Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities. The objective of ASU 2009-17 is to improve financial reporting by enterprises involved with variable interest entities and to provide more relevant and reliable information to users of financial statements. ASU 2009-17 is effective for annual periods beginning after November 15, 2009 and for interim periods within those fiscal years. The adoption of this guidance did not have a material impact on the Company's financial position or results of operation.

In September 2009, the FASB issued new guidance impacting Topic 820. This creates a practical expedient to measure the fair value of an alternative investment that does not have a readily determinable fair value. This guidance also requires certain additional disclosures. This guidance is effective for interim and annual periods ending after December 15, 2009. The adoption of this guidance did not have a material impact on the Company's financial position or results of operation.

In October 2009, the FASB issued ASU 2009-15, Accounting for Own-Share Lending Arrangements in Contemplation of Convertible Debt Issuance or Other Financing. ASU 2009-15 amends Subtopic 470-20 to expand accounting and reporting guidance for own-share lending arrangements issued in contemplation of convertible debt issuance. ASU 2009-15 is effective for fiscal years beginning on or after December 15, 2009 and interim periods within those fiscal years for arrangements outstanding as of the beginning of those fiscal years. The adoption of this guidance did not have a material impact on the Company's financial position or results of operation.

In January 2010, the FASB issued ASU 2010-01, Equity (Topic 505): Accounting for Distributions to Shareholders with Components of Stock and Cash – a consensus of the FASB Emerging Issues Task Force. ASU 2010-01 clarifies that the stock portion of a distribution to shareholders that allows them to elect to receive cash or stock with a potential limitation on the total amount of cash that all shareholders can elect to receive in the aggregate is considered a share issuance that is reflected in EPS prospectively and is not a stock dividend. ASU 2010-01 is effective for interim and annual periods ending on or after December 15, 2009 and should be applied on a retrospective basis. The adoption of this guidance did not have a material impact on the Company's financial position or results of operation.

In January 2010, the FASB issued ASU 2010-02, Consolidation (Topic 810): Accounting and reporting for Decreases in Ownership of a Subsidiary – a Scope Clarification. ASU 2010-02 amends Subtopic 810-10 to address implementation issues related to changes in ownership provisions including clarifying the scope of the decrease in ownership and additional disclosures. ASU 2010-02 is effective beginning in the period that an entity adopts Statement 160. If an entity has previously adopted Statement 160, ASU 2010-02 is effective beginning in the first interim or annual reporting period ending on or after December 15, 2009 and should be applied retrospectively to the first period Statement 160 was adopted. The adoption of this guidance did not have a material impact on the Company's financial position or results of operation.

In January 2010, the FASB issued ASU 2010-04, Accounting for Various Topics – Technical Corrections to SEC Paragraphs. ASU 2010-04 makes technical corrections to existing SEC guidance including the following topics: accounting for subsequent investments, termination of an interest rate swap, issuance of financial statements - subsequent events, use of residential method to value acquired assets other than goodwill, adjustments in assets and liabilities for holding gains and losses, and selections of discount rate used for measuring defined benefit obligation. ASU 2010-04 is effective January 15, 2010. The adoption of this guidance did not have a material impact on the Company's financial position or results of operation.

In January 2010, the FASB issued ASU 2010-05, Compensation – Stock Compensation (Topic 718): Escrowed Share Arrangements and the Presumption of Compensation. ASU 2010-05 updates existing guidance to address the SEC staff's views on overcoming the presumption that for certain shareholders escrowed share arrangements represent compensation. ASU 2010-05 is effective January 15, 2010. The adoption of this guidance did not have a material impact on the Company's financial position or results of operation.

In January 2010, the FASB issued ASU No. 2010-06, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements. ASU 2010-06 amends Subtopic 820-10 to clarify existing disclosures, require new disclosures, and includes conforming amendments to guidance on employers' disclosures about postretirement benefit plan assets. ASU 2010-06 is effective for interim and annual periods beginning after December 15, 2009, except for disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The adoption of this guidance is not expected to have a significant impact on the Company's financial statements.

In February 2010, the FASB issued ASU 2010-08, Technical Corrections to Various Topics. ASU 2010-08 clarifies guidance on embedded derivatives and hedging. ASU 2010-08 is effective for interim and annual periods beginning after December 15, 2009. The adoption of this guidance did not have a material impact on the Company's financial position or results of operation.

In March 2010, the FASB issued ASU 2010-11, Derivatives and Hedging. ASU 2010-11 provides clarification and related additional examples to improve financial reporting by resolving potential ambiguity about the breadth of the embedded credit derivative scope exception in ASC 815-15-15-8. ASU 2010-11 is effective at the beginning of the first fiscal quarter beginning after June 15, 2010. The Company is currently evaluating the impact the adoption of this standard will have on the Company's financial position or results of operation.

In April 2010, the FASB issued ASU 2010-13, Compensation – Stock Compensation (Topic 718): Effect of Denominating the Exercise Price of a Share-Based Payment Award in the Currency of the Market in Which the Underlying Equity Security Trades. ASU 2010-13 provides guidance on the classification of a share-based payment award as either equity or a liability. A share-based payment that contains a condition that is not a market, performance, or service condition is required to be classified as a liability. ASU 2010-13 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2010 and the Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operation.

Note 9 - Subsequent Events

On April 20, 2010, the shareholders of the Company approved increasing the number of authorized common stock shares from 10,000,000 to 15,000,000. They also approved the authorization of 3,000,000 shares of blank check preferred stock.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

We have made forward-looking statements in this document, and in documents that we incorporate by reference, that are subject to risks and uncertainties. Forward-looking statements include information concerning possible or assumed future results of operations of Citizens Financial Services, Inc., First Citizens National Bank, First Citizens Insurance Agency, Inc. or the combined Company. When we use words such as "believes," "expects," "anticipates," or similar expressions, we are making forward-looking statements. For a variety of reasons, actual results could differ materially from those contained in or implied by forward-looking statements. The Company would like to caution readers that the following important factors, among others, may have affected and could in the future affect the Company's actual results and could cause the Company's actual results for subsequent periods to differ materially from those expressed in any forward-looking statement:

- Interest rates could change more rapidly or more significantly than we expect.
- The economy could change significantly in an unexpected way, which would cause the demand for new loans and the ability of borrowers to repay outstanding loans to change in ways that our models do not anticipate.
 - The stock and bond markets could suffer a significant disruption, which may have a negative effect on our financial condition and that of our borrowers, and on our ability to raise money by issuing new securities.
- It could take us longer than we anticipate to implement strategic initiatives designed to increase revenues or manage expenses, or we may not be able to implement those initiatives at all.
 - Acquisitions and dispositions of assets could affect us in ways that management has not anticipated.
- We may become subject to new legal obligations or the resolution of litigation may have a negative effect on our financial condition.
- We may become subject to new and unanticipated accounting, tax, or regulatory practices, regulations or requirements, including the costs of compliance with such changes.
- We could experience greater loan delinquencies than anticipated, adversely affecting our earnings and financial condition. We could also experience greater losses than expected due to the ever increasing volume of information theft and fraudulent scams impacting our customers and the banking industry.
- We could lose the services of some or all of our key personnel, which would negatively impact our business because of their business development skills, financial expertise, lending experience, technical expertise and market area knowledge.
 - Exploration and drilling of the natural gas reserves in the Marcellus Shale in our market area may be affected by federal, state and local laws and regulations such as restrictions on production, permitting, changes in taxes and environmental protection, which could negatively impact our customers and, as a result, negatively impact our loan and deposit volume.

Additional factors that may affect our results are discussed in the Company's Annual Report on Form 10-K under "Item 1.A/ Risk Factors." Except as required by applicable law and regulation, we assume no obligation to update or revise any forward-looking statements after the date on which they are made.

Introduction

The following is management's discussion and analysis of the significant changes in the results of operations, capital resources and liquidity presented in its accompanying consolidated financial statements for the Company. Our Company's consolidated financial condition and results of operations consist almost entirely of the Bank's financial condition and results of operations. Management's discussion and analysis should be read in conjunction with the preceding financial statements presented under Part I. The results of operations for the three months March 31, 2010

are not necessarily indicative of the results you may expect for the full year.

Our Company currently engages in the general business of banking throughout our service area of Potter, Tioga and Bradford counties in North Central Pennsylvania and Allegany, Steuben, Chemung and Tioga counties in Southern New York. We maintain our main office in Mansfield, Pennsylvania. Presently we operate 17 banking facilities. In Pennsylvania, these offices are located in Mansfield, Blossburg, Ulysses, Genesee, Wellsboro, Troy, Sayre, Canton, Gillett, Millerton, LeRaysville, Towanda, the Wellsboro Weis Market store, and the Mansfield Wal-Mart Super Center. In New York, we have a branch office in Wellsville, Allegany County.

Risk Management

Risk identification and management are essential elements for the successful management of the Company. In the normal course of business, the Company is subject to various types of risk, including interest rate, credit, liquidity and regulatory risk.

Interest rate risk is the sensitivity of net interest income and the market value of financial instruments to the direction and frequency of changes in interest rates. Interest rate risk results from various re-pricing frequencies and the maturity structure of the financial instruments owned by the Company. The Company uses its asset/liability and funds management policy to control and manage interest rate risk.

Credit risk represents the possibility that a customer may not perform in accordance with contractual terms. Credit risk results from loans with customers and the purchasing of securities. The Company's primary credit risk is in the loan portfolio. The Company manages credit risk by adhering to an established credit policy and through a disciplined evaluation of the adequacy of the allowance for loan losses. Also, the investment policy limits the amount of credit risk that may be taken in the investment portfolio.

Liquidity risk represents the inability to generate or otherwise obtain funds at reasonable rates to satisfy commitments to borrowers and obligations to depositors. The Company has established guidelines within its asset/liability and funds management policy to manage liquidity risk. These guidelines include, among other things, contingent funding alternatives.

Reputational risk, or the risk to our business, earnings, liquidity, and capital from negative public opinion, could result from our actual or alleged conduct in a variety of areas, including legal and regulatory compliance, lending practices, corporate governance, litigation, ethical issues, or inadequate protection of customer information. We expend significant resources to comply with regulatory requirements. Failure to comply could result in reputational harm or significant legal or remedial costs. Damage to our reputation could adversely affect our ability to retain and attract new customers, and adversely impact our earnings and liquidity.

Regulatory risk represents the possibility that a change in law, regulations or regulatory policy may have a material effect on the business of the Company and its subsidiary. We can not predict what legislation might be enacted or what regulations might be adopted, or if adopted, the effect thereof on our operations.

Competition

We face strong competition in the communities that we serve from other commercial banks, savings banks, and savings and loan associations, some of which are substantially larger institutions than the Bank. In addition, insurance companies, investment-counseling firms, and other business firms and individuals offer personal and corporate trust services. We also compete with credit unions, issuers of money market funds, securities brokerage firms, consumer finance companies, mortgage brokers and insurance companies. These entities are strong competitors for virtually all types of financial services. The financial services industry continues to experience tremendous change to competitive barriers between bank and non-bank institutions. We must compete not only with traditional financial institutions, but also other business corporations that have begun to deliver competing financial services and banking services that are easily accessible through the internet. Competition for banking services is primarily based on price, nature of product,

quality of service, and convenience of location.

16

Trust and Investment Services

Our Investment and Trust Services Department offers professional trust administration, investment management services, estate planning and administration, and custody of securities. Assets held by the Company in a fiduciary or agency capacity for its customers are not included in the consolidated financial statements since such items are not assets of the Company. Revenues and fees of the Trust Department are reflected in the Company's financial statements. As of March 31, 2010 and December 31, 2009, the Trust Department had \$87.9 and \$85.9 million of assets under management, respectively. The \$2.0 million increase is primarily attributable to the continued recovery in market values of trust assets since the end of 2008.

Our Investment Representatives offer full service brokerage services and financial planning throughout the Bank's market area. Products such as mutual funds, annuities, health and life insurance are made available through our insurance subsidiary, First Citizens Insurance. Fee income from the sale of these products is reflected in the Company's financial statements as a component of non-interest income in the Consolidated Statement of Income.

Results of Operations

Overview of the Income Statement

The Company had net income of \$2,746,000 for the first three months of 2010 compared to earnings of \$2,346,000 for last year's comparable period, an increase of \$400,000 or 17.1%. Earnings per share for the first three months of 2010 were \$0.96, compared to \$0.82 last year, representing a 17.1% increase. Annualized return on assets and return on equity for the three months of 2010 were 1.50% and 18.22%, respectively, compared with 1.41% and 17.59% for last year's comparable period.

Net Interest Income

Net interest income, the most significant component of the Company's earnings, is the amount by which interest income generated from interest-earning assets exceeds interest expense on interest-bearing liabilities.

Net interest income for the first three months of 2010 was \$6,747,000, an increase of \$588,000, or 9.5%, compared to the same period in 2009. For the first three months of 2010, the provision for loan losses totaled \$305,000, an increase of \$155,000 over the comparable period in 2009. Consequently, net interest income after the provision for loan losses was \$6,442,000 compared to \$6,009,000 during the first three months of 2009.

The following table sets forth the average balances of, and the interest earned or incurred on, each principal category of assets, liabilities and stockholders' equity, the related rates, net interest income and rate "spread" created for the three months March 31, 2010 and 2009:

Net interest income as a percentage of average interest-earning assets	4.34%	4.34%
Ratio of interest-earning assets to interest-bearing liabilities	1.13	1.12

(1) Averages are based on daily averages.

(2) Includes loan origination and commitment fees.

(3) Tax exempt interest revenue is shown on a tax equivalent basis for proper comparison using a statutory federal income tax rate of 34%.

(4) Income on non-accrual loans is accounted for on a cash basis, and the loan balances are included in interest-earning assets.

(5) Interest rate spread represents the difference between the average rate earned on interest-earning assets and the average rate paid on interest-bearing liabilities.

Tax exempt revenue is shown on a tax-equivalent basis for proper comparison using a statutory, federal income tax rate of 34%. For purposes of the comparison, as well as the discussion that follows, this presentation facilitates performance comparisons between taxable and tax-free assets by increasing the tax-free income by an amount equivalent to the Federal income taxes that would have been paid if this income were taxable at the Company's 34% Federal statutory rate. The following table represents the adjustment to convert net interest income to net interest income on a fully taxable equivalent basis for the periods ending March 31, 2010 and 2009:

	For the Three Months Ended March 31	
	2010	2009
Interest and dividend income		
from investment securities (non-tax adjusted)	\$ 1,996	\$ 2,120
Tax equivalent adjustment	330	244
Interest and dividend income		
from investment securities (tax equivalent basis)	\$ 2,326	\$ 2,364
Interest and fees on loans (non-tax adjusted)	\$ 7,734	\$ 7,477
Tax equivalent adjustment	223	236
Interest and fees on loans (tax equivalent basis)	\$ 7,957	\$ 7,713
Total interest income	\$ 9,730	\$ 9,597
Total interest expense	2,983	3,438
Net interest income	6,747	6,159
Total tax equivalent adjustment	553	480
Net interest income (tax equivalent basis)	\$ 7,300	\$ 6,639

The following table shows the tax-equivalent effect of changes in volume and rate on interest income and expense.

Net interest income	\$ 538	\$ 123	\$ 661

(1) The portion of the net change attributable to both volume and rate changes, which cannot be separated, has been allocated proportionally to the change due to volume and the change due to rate prior to allocation.

Tax equivalent net interest income increased from \$6,639,000 for the 2009 three month period to \$7,300,000 in the 2010 three month period, an increase of \$661,000. The tax equivalent net interest margin was 4.34% for the first three months of 2010 and 2009.

Total interest income for the three months ended March 31, 2010, increased \$206,000 over the same period in 2009. This increase is primarily a result of an \$837,000 increase due to volume as the average balance of interest earning assets increased by \$61.8 million. There was a decrease of \$631,000 due to change in rate, as the yield on interest earning assets decreased 59 basis points from 6.59% to 6.12%.

Investment income for the three months ended March 31, 2010 decreased \$50,000 over the same period last year. The average balance of total investment securities at March 31, 2010 increased by \$28.2 million from last year, due to investment opportunities and investing excess cash, primarily the result of increased deposits.

- The average balance of taxable securities increased by \$12.8 million while tax-exempt securities increased by \$15.4 million, which had the effect of increasing interest income by \$188,000 and \$248,000, respectively, due to volume.
- This increase was offset by a decrease in the yield on the investment securities of 85 basis points from 5.40% to 4.55%, which corresponds to a decrease in interest income of \$486,000. The majority of this decrease is attributable to the change in yield on taxable securities, which experienced a decrease of 131 basis points from 5.06% to 3.75%.

The purchase of tax-exempt securities, along with municipal loans, allows us to manage our effective tax rate as well as the overall yield on our interest earning assets.

Total loan interest income increased \$244,000 for the three months ended March 31, 2010 compared to the same period last year:

- Interest income on residential mortgage loans decreased \$198,000 of which \$111,000 was due to volume and \$87,000 was due to a decrease in rate. The average balance decreased \$6.2 million due to the continuing economic recession, high unemployment rates and other negative economic factors that resulted in lower loan demand for non-conforming residential mortgages and home equity lines.
- The average balance of commercial and farm loans increased \$29.3 million from a year ago primarily due to our emphasis to grow this segment of the loan portfolio utilizing disciplined underwriting standards. This had a positive impact of \$507,000 on total interest income due to volume.

Total interest expense decreased \$455,000 for the three months ended March 31, 2010 compared with last year. This decrease is primarily due to a change in rate, accounting for a \$754,000 decrease in our interest expense. The average interest rate on interest-bearing liabilities decreased 53 basis points, from 2.53% to 2.00%. The historically low interest rates supported by the Federal Reserve and continuing economic recession had the effect of decreasing our short-term borrowing costs as well as rates on deposit products, including shorter-term certificates of deposit and rate sensitive NOW and money market accounts. Offsetting this, the average balance of interest-bearing liabilities increased \$52.7 million resulting in an increase in interest expense of \$335,000 (see also “Financial Condition – Deposits”).

- Interest expense on certificates of deposits decreased \$355,000 over the same period last year. The average balance of certificates of deposit increased \$28.9 million causing an increase in interest expense of \$293,000. Offsetting this was a decrease in the average rate on certificates of deposit from 3.50% to 2.74% resulting in a decrease in interest expense of \$648,000.
- The average balance of NOW accounts also increased \$22.1 million accounting for an increase of \$38,000 in interest expense. The change in the average rate from 87 basis points to 79 basis points, contributed to a decrease in interest expense of \$19,000 resulting in an overall increase of \$19,000.
- The average balance of borrowed funds decreased by \$4.3 million resulting in a decrease in interest expense of \$36,000. The average interest rate paid on borrowed funds also decreased by 34 basis points accounting for a decrease in interest expense of \$46,000 due to rate. Borrowed funds decreased due to the significant increase in deposits, which continued to limit our need for borrowings from the Federal Home Loan Bank.

Provision For Loan Losses

For the three month period ending March 31, 2010, we recorded a provision for loan losses of \$305,000, which represents an increase of \$155,000 over the same time period in 2009. This is the result of current economic conditions and an increase in non-performing loans as of March 31, 2010, which have impacted management's quarterly review of the allowance for loan losses (see also "Financial Condition – Allowance for Loan Losses and Credit Quality Risk").

Non-interest Income

Non-interest income for the three months ended March 31, 2010 totaled \$1,390,000, an increase of \$36,000 when compared to the same period in 2009. During the first three months of 2010, investment security gains amounted to \$64,000 compared to investment security gains of \$16,000 last year. We sold two agency bonds at a gain of \$9,000 that were likely to be called later in the year and a mortgage backed security due to favorable market conditions for a gain of \$55,000 in 2010. In 2009, we sold an agency bond at a gain of \$32,000, which was offset with a loss on the sale of bank equity shares of \$16,000.

Service charge income increased by \$41,000 and continues to be the Company's primary source of non-interest income. For the first three months of 2010, account service charges totaled \$853,000 compared to \$812,000 last year. There was a \$42,000 increase attributable to customers' usage of their debit cards due to continuing efforts on the Bank's part to encourage customers to utilize their debit cards.

The following table shows the breakdown of non-interest income for the three months ended March 31, 2010 and 2009:

(dollars in thousands)	Three months ended		Change	
	2010	2009	Amount	%
Service charges	\$ 853	\$ 812	\$ 41	5.0
Trust	146	163	(17)	(10.4)

Earnings on bank owned life insurance	124	121	3	2.5

Other	121	142	(21)	(14.8)
Total	\$ 1,390	\$ 1,354	\$ 36	2.7

21

Non-interest Expense

Non-interest expenses decreased \$44,000 or 1.0%, through March 31, 2010 compared to the same period in 2009. Salaries and employee benefits increased \$145,000 due mainly to annual merit increases effective the beginning of 2010 and increased employee insurance premiums.

FDIC Insurance decreased by \$138,000 for the three months ended March 31, 2010 compared to last year. During 2009, as a result of additional bank failures related to the economic crisis, the FDIC increased premiums and added a special assessment for insurance premiums, which resulted in a significantly higher level of fees. In lieu of an additional special assessment in the fourth quarter of 2009, the FDIC required assessments for the following three years, 2010 – 2012, to be prepaid in order to increase the monies available in the insurance fund. These prepayments will be recognized as a charge to operations over the applicable three year period.

Professional fees increased \$49,000 due to various legal and consulting costs. The \$36,000 decrease in amortization of intangibles is due to intangible assets becoming fully amortized in 2009.

The following tables reflect the breakdown of non-interest expense and professional fees for the three and three months ended March 31, 2010 and 2009:

(in thousands)	Three months ended		Change	
	March 31, 2010	March 31, 2009	Amount	%
Salaries and employee benefits	2,441	\$ 2,296	\$ 145	6.3
Occupancy	306	321	(15)	(4.7)
Furniture and equipment	106	110	(4)	(3.6)
Professional fees	180	131	49	37.4
Amortization of intangibles	4	40	(36)	(90.0)

Examinations and audits	55	51	4	7.8
Total	\$ 180	\$ 131	\$ 49	37.4

Provision For Income Taxes

The provision for income taxes was \$758,000 for the three month period ended March 31, 2010 compared to \$645,000 for the same period in 2009. The increase is primarily attributable to an increase in income before provision for income taxes of \$513,000. Through management of our municipal loan and bond portfolios, management is focused on minimizing our effective tax rate. Our effective tax rate was 21.7% and 21.6% for the first three months of 2010 and 2009, respectively, compared to the statutory rate of 34%.

We invest in three limited partnership agreements that established low-income housing projects in our market areas. As a result of these agreements, for tax purposes we have recognized \$867,000 out of a total \$913,000 of tax credits from one project in the Towanda area that began in October of 2000. We have recognized \$318,000 out of a total \$385,000 of tax credits on the second project in the Wellsboro market which was completed in November 2001. In 2005, we entered into a third limited liability partnership for a low-income housing project for senior citizens in our Sayre market area. Beginning in 2007, we have recognized \$187,000 out of a total \$574,000 of tax credits. We anticipate recognizing \$500,000 of tax credits over the next seven years, with \$164,000 expected to be recognized in 2010.

Financial Condition

Total assets were \$749.9 million at March 31, 2010, an increase of \$20.4 million, or 2.8% from \$729.5 million at December 31, 2009. Net loans increased 1.8% to \$459.5 million and investment securities increased 9.3% to \$217.0 million at March 31, 2010. Total deposits increased \$18.8 million or 3.1% to \$624.4 million since year-end 2009. Borrowed funds have decreased \$700,000 to \$53.4 million compared with \$54.1 million at year-end.

Cash and Cash Equivalents

Cash and cash equivalents totaled \$24.5 million at March 31, 2010 compared to \$31.4 million at December 31, 2009, a decrease of \$6.9 million. Non-interest-bearing cash decreased \$300,000 since year-end 2009, while interest-bearing cash decreased \$6.6 million during that same period. The increase in deposits over the first three months has been offset by the increase in investment securities and loans issued during this time. Management actively measures and evaluates its liquidity through our Asset – Liability committee and believes its liquidity needs are satisfied by the current balance of cash and cash equivalents, readily available access to traditional funding sources, Federal Home Loan Bank financing, federal funds lines with correspondent banks, brokered certificates of deposit and the portion of the investment and loan portfolios that mature within one year. Management expects that these sources of funds will permit us to meet cash obligations and off-balance sheet commitments as they come due.

Investments

Our investment portfolio increased by \$18.4 million or 9.3% from December 31, 2009 to March 31, 2010. During 2010 we purchased approximately \$24.5 million of U.S. agency obligations, \$3.0 million of U.S. Treasury notes, \$1.3 million of mortgage backed securities and \$5.3 million of state and local obligations which offset the \$6.9 million of principal repayments and \$3.1 million of calls that occurred during the quarter. We also selectively sold \$5.9 million of U.S. agency obligations and mortgage backed securities at a net gain of \$64,000. The overall market value of our investment portfolio increased approximately \$300,000 due to market fluctuations since year end. Excluding our short-term investments consisting of monies held primarily at the Federal Reserve for liquidity purposes, our investment portfolio is currently yielding 4.55% compared to 5.40% a year ago on a tax equivalent basis.

As mentioned above and seen in the table below, due to the continued economic downturn and the low interest rates, we have experienced significant prepayments of our mortgage backed securities of \$6.9 million and calls on our agency bonds of \$3.1 million. Due to the amount of cash flow from the investment portfolio as well as an increase in deposits and a lack of opportunities in other investment types, our strategy has been to reinvest funds mainly in short-term agency bonds via purchases of \$24.5 million and longer-term municipal bond purchases of \$5.3 million. We believe this strategy will enable us to reinvest cash flows in the next one to four years when we expect investment opportunities to improve.

Management continues to monitor the earnings performance and the liquidity of the investment portfolio on a regular basis. Through active balance sheet management and analysis of the securities portfolio, the Company believes it maintains sufficient liquidity to satisfy depositor requirements and various credit needs of its customers.

Loans

The Company's lending is focused in the north central Pennsylvania market and the southern tier of New York. The composition of our loan portfolio consists principally of retail lending, which includes single-family residential mortgages and other consumer lending, and commercial lending primarily to locally owned small businesses and

farms. New loans are generated primarily from direct loans to our existing customer base, with new customers generated by referrals from real estate brokers, building contractors, attorneys, accountants and existing customers.

Total loans increased approximately \$8.3 million or 1.8% during the first three months of 2010. Commercial real estate, agricultural, construction, commercial and other loans and municipal loans increased \$2.9 million, \$1.0 million, \$2.9 million, \$3.8 million and \$878,000, respectively. Residential real estate and consumer loans have decreased \$3.0 million and \$247,000, respectively.

We have continued to experience lower demand for residential real estate and consumer loans due to several economic factors. Recessionary pressures, higher unemployment, and a depressed housing market have had a negative impact on nonconforming, residential real estate mortgage and home equity loan growth. Additionally, loan demand for conforming mortgages, which the Company sells on the secondary market, has also declined from last year. Through March 31, 2010, we have sold \$0.7 million of loans in the secondary market compared to \$3.8 million through this time last year. The Company does recognize fee income for servicing these loans, which is included in non-interest income on the consolidated statement of income. The Company considers residential mortgage lending a principal business activity. Despite the current lower level of loan demand, management continues to explore new competitively priced products that are attractive to our customers, and to build technologies which make it easier and more efficient for customers to choose the Company for their mortgage needs.

Edgar Filing: CITIZENS FINANCIAL SERVICES INC - Form 10-Q

The growth in commercial real estate, agricultural, construction and commercial and other loans, despite the recessionary economic environment, reflects the Company's focus on commercial lending as a means to increase loan growth and obtain deposits from farmers and small businesses throughout our market area. We believe we have a strong team of experienced professionals and disciplined underwriting standards that enable us to meet the needs of these customers within our service area without incurring unreasonable risks.

Allowance For Loan Losses

The allowance for loan losses is maintained at a level, which in management's judgment is adequate to absorb probable future loan losses inherent in the loan portfolio. The provision for loan losses is charged against current income. Loans deemed not collectable are charged-off against the allowance while subsequent recoveries increase the allowance. The following table presents an analysis of the allowance for loan losses for the three months ended March 31, 2010 and for the years ended December 31, 2009, 2008, 2007 and 2006:

	March 31, 2010	2009	December 31, 2008	2007	2006

The following table identifies amounts of loans contractually past due 30 to 90 days and non-performing loans by loan category, as well as the change from December 31, 2009 to March 31, 2010 in non-performing loans (dollars in thousands). Non-performing loans include those loans that are contractually past due 90 days or more and non-accrual loans. Interest does not accrue on non-accrual loans. Subsequent cash payments received are applied to the outstanding principal balance or recorded as interest income, depending upon management's assessment of its ultimate ability to collect principal and interest.

The Company utilizes a disciplined and thorough loan review process based upon our internal loan policy approved by the Company's Board of Directors. The purpose of the review is to assess loan quality, analyze delinquencies, identify problem loans, evaluate potential charge-offs and recoveries, and assess general overall economic conditions in the markets served. An external independent loan review is performed on our commercial portfolio semi-annually for the Company. As part of this review, our underwriting process and loan grading system is evaluated.

Management believes it uses the best information available to make such determinations and that the allowance for loan losses is adequate as of March 31, 2010. However, future adjustments could be required if circumstances differ substantially from assumptions and estimates used in making the initial determination. A prolonged downturn in the economy, continued high unemployment rates, significant changes in the value of collateral and delays in receiving financial information from borrowers could result in increased levels of non-performing assets, charge-offs, loan loss provisions and reduction in income. Additionally, bank regulatory agencies periodically examine the Bank's allowance for loan losses. The banking agencies could require the recognition of additions to the allowance for loan losses based upon their judgment of information available to them at the time of their examination.

On a monthly basis, problem loans are identified and updated primarily using internally prepared past due reports. Based on data surrounding the collection process of each identified loan, the loan may be added or deleted from the monthly watch list. The watch list includes loans graded special mention, substandard, doubtful, and loss, as well as additional loans that management may chose to include. Watch list loans are continually monitored going forward until satisfactory conditions exist that allow management to upgrade and remove the loan. In certain cases, loans may be placed on non-accrual status or charged-off based upon management's evaluation of the borrower's ability to pay. All commercial loans, which include commercial real estate, agricultural real estate, state and political subdivision loans and other commercial loans, on non-accrual are evaluated quarterly for impairment.

The adequacy of the allowance for loan losses is subject to a formal, quarterly analysis by management of the Company. In order to better analyze the risks associated with the loan portfolio, the entire portfolio is divided into several categories. As stated above, loans on non-accrual status are specifically reviewed for impairment and given a specific reserve, if appropriate. Loans evaluated and not found to be impaired are included with other performing loans, by category, by their respective homogenous pools. For the analysis prepared as of March 31, 2010, three year average historical loss factors were calculated for each pool and applied to the performing portion of the loan category. Previously, five year averages were utilized. Management believes that using a shorter experience period better reflects more current economic impacts and loan charge-off trends. The historical loss factors for both reviewed and homogeneous pools are adjusted based upon the following qualitative factors:

- § Level of and trends in charge-offs and recoveries
- § Trends in volume, terms and nature of the loan portfolio
- § Effects of any changes in risk selection and underwriting standards and any other changes in lending and recovery policies, procedures and practices
 - § Changes in the quality of the Company's loan review system
 - § Experience, ability and depth of lending management and other relevant staff
 - § National, state, regional and local economic trends and business conditions
- § Industry conditions including the effects of external factors such as competition, legal, and regulatory requirements on the level of estimated credit losses.
 - § Existence and effect of any credit concentrations, and changes in the level of such concentrations

The balance in the allowance for loan losses was \$5,151,000 or 1.11% of total loans as of March 31, 2010 as compared to \$4,888,000 or 1.07% of loans as of December 31, 2009. The \$263,000 increase is a result of a \$305,000 provision for the first three months less net charge-offs of \$42,000. Gross charge-offs for the first three months of 2010 were \$85,000. The following table shows the distribution of the allowance for loan losses and the percentage of loans compared to total loans by loan category (dollars in thousands) as of the three months ended March 31, 2010 and for the years ended December 31, 2009, 2008, 2007 and 2006:

	March 31		2009		December 31		2007		2006	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
Real estate loans:

State & political subdivision loans	105	10.2	93	10.1	19	11.1	22	10.6	22	10.9
Unallocated	9	N/A	60	N/A	101	N/A	288	N/A	248	N/A
Total allowance for loan losses	\$ 5,151	100.0	\$ 4,888	100.0	\$ 4,378	100.0	\$ 4,197	100.0	\$ 3,876	100.0

For the three month period ending March 31, 2010, we recorded a provision for loan losses of \$305,000, which compares to \$150,000 for the same time period in 2009. The significant increase is attributable to current economic

conditions and an increase in non-performing loans in comparison to the same period last year. Non-performing loans increased \$680,000, or 10.1%, from December 31, 2009 to March 31, 2010. Approximately 80% of the Bank's non-performing loans are associated with the following five customer relationships:

28

An agricultural customer with a total loan relationship of \$3.5 million is considered non-accrual as of March 31, 2010. Included within this relationship is \$1.1 million of loans which are subject to Farm Service Agency guarantees. The current economic struggles of dairy farmers, caused primarily from decreased milk prices, have created cash flow difficulties for this customer. While we are hopeful that increased milk prices would significantly improve cash flows for this borrower, there is no certainty that this will occur. Without a sizable and sustained increase in milk prices, we will need to rely upon the collateral for repayment of interest and principal. A real estate appraisal was completed in October, 2009, which together with a collateral analysis on equipment and livestock, resulted in an updated collateral value of approximately \$4.0 million. Based upon this analysis, management determined not to allocate a specific reserve to this loan.

- § A real estate rental customer with a total loan relationship of \$1.1 million is considered non-accrual as of March 31, 2010. The current recessionary economic conditions have significantly impacted the cash flows from the customer's rental properties. This relationship was evaluated and found to be impaired and was written down in third quarter of 2009 by \$175,000, to the net realizable value. Based on an evaluation performed in the first quarter, a specific reserve of \$91,000 has been established for this relationship.
- § A commercial real estate property with a loan of \$500,000 is considered non-accrual due to inadequate cash flow as a result of the economy. The loan was evaluated for impairment and a specific reserve of \$11,000 was allocated to this loan.
- § A commercial customer a total relationship of \$469,000 composed of commercial real estate and other commercial loans was placed on non-accrual due to inadequate cash flows as a result of the downturn in the economy, which has had a significant impact on his modular home business. Based upon an analysis of the collateral value, management determined not to allocate a specific reserve to this loan.
- § A real estate rental customer with a total loan relationship of \$549,000 is considered non-accrual as of March 31, 2010. The current recessionary economic conditions have significantly impacted the cash flows from the customer's rental properties. Based upon an analysis of the collateral values, management determined not to allocate a specific reserve to this loan.

The increase in loans 30-89 days past due is the result of one significant commercial customer. The customer is actively selling the property with an anticipated closing during the second quarter of 2010.

We have not experienced the significant decrease in the collateral values of local residential, commercial or agricultural real estate loan portfolios as seen in other parts of the country during this current economic downturn. Real estate market values in our service area did not realize the significant, and sometimes speculative, increases as seen in other parts of the country prior to the current economic downturn. As such, the collateral value of our real estate loans has not significantly deteriorated with the downturn. In addition, our market area is predominately centered in the Marcellus Shale natural gas exploration and drilling area. These natural gas exploration and drilling activities have significantly impacted the overall interest in real estate in our market area due to the related lease and royalty revenues associated with it. The natural gas activities have had a positive impact on the value of local real estate. Due to the relatively stable or increasing collateral values in our service area, management determined not to increase the provision for loan losses and allowance for loan losses at the same magnitude as the increase in non-performing loans.

Bank Owned Life Insurance

The Company purchased bank owned life insurance to offset future employee benefit costs. As of March 31, 2010 the cash surrender value of this life insurance is \$12,791,000. The use of life insurance policies provides the bank with an asset that will generate earnings to partially offset the current costs of benefits, and eventually (at the death of the individuals) provide partial recovery of cash outflows associated with the benefits.

Premises and Equipment

Premises and equipment increased \$223,000 from \$12.2 million at December 31, 2009 to \$12.5 million at March 31, 2010, an increase of 1.8%. This occurred primarily due to the new branch construction in Wellsboro, Pennsylvania of \$379,000 during the first quarter of 2010. Expected construction costs are approximately \$1.1 million, with completion anticipated in the second quarter 2010.

Deposits

Core deposits continue to be the most significant source of funds for the Company. Deposits increased \$18.8 million or 3.1%, since December 31, 2009. The increase in deposits is due to several reasons. Our market area has been positively impacted by oil and gas exploration activities. We have developed targeted products to meet the needs of customers benefiting from this activity. The overall turbulence and volatility in the financial markets has also resulted in customers seeking more stability in their deposits. Finally, our ability to work with local municipalities to meet their business needs has resulted in increased deposits.

As of March 31, 2010, non-interest-bearing deposits, NOW accounts, savings accounts and money market accounts, have all increased by \$932,000, \$2.2 million, \$3.3 million and \$2.1 million, respectively, from December 31, 2009. Certificates of deposit also increased by \$10.4 million. The increase in certificates of deposit is primarily due to customers shifting balances from lower paying deposit accounts into CD's in order to increase their return. As mentioned, oil and gas exploration has had a significant impact on this segment as well. The Bank currently does not have any outstanding brokered certificates of deposit.

(in thousands)	March 31, 2010		December 31, 2009	
	Amount	%	Amount	%
Non-interest-bearing deposits	\$ 60,993	9.8	\$ 60,061	9.9

NOW accounts	2,174	1.6
Savings deposits	3,283	6.7
Money market deposit accounts	2,089	4.9

Certificates of deposit	10,360	3.3
Total	\$ 18,838	3.1

Borrowed Funds

Borrowed funds decreased \$700,000 during the first three months of 2010. The ability to grow deposits decreased our reliance on borrowed funds. The Company's daily cash requirements or short-term investments are primarily met by using the financial instruments available primarily through the Federal Home Loan Bank of Pittsburgh.

In December 2003, the Company formed a special purpose entity, Citizens Financial Statutory Trust I (“the Entity”), to issue \$7,500,000 of floating rate obligated mandatory redeemable securities as part of a pooled offering. The rate is determined quarterly based on the 3 month LIBOR plus 2.80%. The Entity may redeem them, in whole or in part, at face value at any time. The Company borrowed the proceeds of the issuance from the Entity in December 2003 in the form of a \$7,500,000 note payable, which is included within “Borrowed Funds” in the liabilities section of the Company’s balance sheet. Under current accounting rules, the Company’s minority interest in the Entity was recorded at the initial investment amount and is included in the other assets section of the balance sheet. The Entity is not consolidated as part of the Company’s consolidated financial statements.

In December, 2008, the Company entered into an interest rate swap agreement to convert the above mentioned floating-rate debt to fixed rate debt on a notional amount of \$7.5 million. The interest rate swap instrument involves an agreement to receive a floating rate and pay a fixed rate, at specified intervals, calculated on the agreed-upon notional amount. The differentials paid or received on interest rate swap agreements are recognized as adjustments to interest expense in the period. The interest rate swap agreement was entered into on December 17, 2008 and expires December 17, 2013. The fair value of the interest rate swap at March 31, 2010 was a liability of \$263,000 and is included within other liabilities on the Consolidated Balance Sheet.

Stockholder’s Equity

We evaluate stockholders’ equity in relation to total assets and the risks associated with those assets. The greater the capital resource, the more likely a corporation will meet its cash obligations and absorb unforeseen losses. For these reasons, capital adequacy has been, and will continue to be, of paramount importance.

Total stockholders’ equity was \$63.7 million at March 31, 2010 compared to \$61.5 million at December 31, 2009, an increase of \$2.2 million or 3.6%. Excluding accumulated other comprehensive income, stockholder’s equity increased \$2.0 million, or 3.4%. In the first three months of 2010, the Company had net income of \$2.7 million and paid dividends of \$0.7 million, representing a dividend payout ratio of 26.1%. The Company purchased 1,725 shares of treasury stock at a weighted average cost of \$26.00 per share.

All of the Company’s investment securities are classified as available-for-sale, making this portion of the Company’s balance sheet more sensitive to the changing market value of investments. Accumulated other comprehensive income increased \$164,000 from December 31, 2009 as a result of market value fluctuations.

The Company has also complied with standards of being well capitalized mandated by the banking regulators. The Company’s primary regulators have established “risk-based” capital requirements designed to measure capital adequacy. Risk-based capital ratios reflect the relative risks associated with various assets entities hold in their portfolios. A weight category of 0% (lowest risk assets), 20%, 50%, or 100% (highest risk assets), is assigned to each asset on the balance sheet. The Company’s computed risk-based capital ratios are as follows:

(dollars in thousands)	March 31,		December 31,	
	2010		2009	
Total capital (to risk-weighted assets)	Amount	Ratio	Amount	Ratio
Company	\$65,166	13.92%	\$62,751	13.77%

Off Balance Sheet Activities

Some financial instruments, such as loan commitments, credit lines, and letters of credit are issued to meet customer financing needs. The contractual amount of financial instruments with off-balance sheet risk was as follows at March 31, 2010 (dollars in thousands):

Commitments to extend credit	\$ 83,736
Standby letters of credit	7,771
	\$ 91,507

We also offer limited overdraft protection as a non-contractual courtesy which is available to demand deposit accounts in good standing for business, personal or household use. The non-contractual amount of financial instruments with off-balance sheet risk at March 31, 2010 was \$10,928,000. The Company reserves the right to discontinue this service without prior notice.

Liquidity

Liquidity is a measure of the Company's ability to efficiently meet normal cash flow requirements of both borrowers and depositors. To maintain proper liquidity, we use funds management policies along with our investment policies to assure we can meet our financial obligations to depositors, credit customers and stockholders. Liquidity is needed to meet depositors' withdrawal demands, extend credit to meet borrowers' needs, provide funds for normal operating expenses and cash dividends, and to fund other capital expenditures.

Cash generated by operating activities, investing activities and financing activities influences liquidity management. Our Company's historical activity in this area can be seen in the Consolidated Statement of Cash Flows. The most important source of funds is the deposits that are primarily core. Repayment of principal on outstanding loans and cash flows created from the investment portfolio also a factor in liquidity management. Other sources of funding include brokered certificates of deposit and the sale of loans or investments, if needed.

The Company's use of funds is shown in the investing activity section of the Consolidated Statement of Cash Flows, where the net loan activity is presented. Other significant uses of funds include purchasing stock from the Federal Home Loan Bank (FHLB) of Pittsburgh, as well as capital expenditures. Capital expenditures during the first three months of 2010 were \$384,000, compared to \$433,000 during the same time period in 2009. Our new branch construction in Wellsboro, Pennsylvania accounted for most of the expenditure in 2010, while the construction of the new branch in Troy accounted for the expenditures in 2009.

Short-term debt from the FHLB supplements the Bank's availability of funds. The Bank achieves liquidity primarily from temporary or short-term investments in the Federal Reserve and the FHLB. The Bank has a maximum borrowing capacity at the FHLB of approximately \$253.0 million, of which \$38.0 million was outstanding at March 31, 2010. Additionally, we have a Federal funds line totaling \$10.0 million from a third party bank at market rates. This line is not drawn upon. We also have borrower in custody line with the Federal Reserve Board of approximately \$13.5 million.

Citizens Financial is a separate legal entity from the Bank and must provide for its own liquidity. In addition to its operating expenses, Citizens Financial is responsible for paying any dividends declared to its shareholders. Citizens Financial also has repurchased shares of its common stock. Citizens Financial's primary source of income is dividends received from the Bank. The Bank may not, under the National Bank Act, declare a dividend without approval of the OCC, unless the dividend to be declared by the Bank's Board of Directors does not exceed the total of: (i) the Bank's net profits for the current year to date, plus (ii) its retained net profits for the preceding two current years, less any required transfers to surplus. In addition, the Bank can only pay dividends to the extent that its retained net profits (including the portion transferred to surplus) exceed its bad debts. The Federal Reserve Board, the OCC and the FDIC have formal and informal policies which provide that insured banks and bank holding companies should generally pay dividends only out of current operating earnings, with some exceptions. The Prompt Corrective Action Rules, described above, further limit the ability of banks to pay dividends, because banks which are not classified as well capitalized or adequately capitalized may not pay dividends and no dividend may be paid which would make the Bank undercapitalized after the dividend. At March 31, 2010, Citizens Financial had liquid assets of \$5.0 million.

Interest Rate and Market Risk Management

The objective of interest rate sensitivity management is to maintain an appropriate balance between the stable growth of income and the risks associated with maximizing income through interest sensitivity imbalances and the market value risk of assets and liabilities.

Because of the nature of our operations, we are not subject to foreign currency exchange or commodity price risk and, since our Company has no trading portfolio, it is not subject to trading risk.

Currently, our Company has equity securities that represent only .2% of our investment portfolio and, therefore, equity risk is not significant.

The primary components of interest-sensitive assets include adjustable-rate loans and investments, loan repayments, investment maturities and money market investments. The primary components of interest-sensitive liabilities include maturing certificates of deposit, IRA certificates of deposit and short-term borrowings. Savings deposits, NOW accounts and money market investor accounts are considered core deposits and are not short-term interest sensitive (except for the top-tier money market investor accounts which are paid current market interest rates).

Gap analysis, one of the methods used by us to analyze interest rate risk, does not necessarily show the precise impact of specific interest rate movements on our Company's net interest income because the re-pricing of certain assets and liabilities is discretionary and is subject to competitive and other pressures. In addition, assets and liabilities within the same period may, in fact, be repaid at different times and at different rate levels. We have not experienced the kind of earnings volatility that might be indicated from gap analysis.

Our Company currently uses a computer simulation model to better measure the impact of interest rate changes on net interest income. We use the model as part of our risk management process that will effectively identify, measure, and monitor our Company's risk exposure.

We use numerous interest rate simulations employing a variety of assumptions to evaluate our interest rate risk exposure. A shock analysis during the third quarter of 2009 indicated that a 200 basis point movement in interest rates in either direction would have a minor impact on our Company's anticipated net interest income over the next twenty-four months.

Item 3-Quantitative and Qualitative Disclosure About Market Risk

In the normal course of conducting business activities, the Company is exposed to market risk, principally interest rate risk, through the operations of its banking subsidiary. Interest rate risk arises from market driven fluctuations in interest rates that affect cash flows, income, expense and values of financial instruments and was discussed previously in this Form 10-Q. Management and a committee of the Board of Directors manage interest rate risk (see also "Interest Rate and Market Risk Management").

No material changes in market risk strategy occurred during the current period. A detailed discussion of market risk is provided in the SEC Form 10-K for the period ended December 31, 2009.

Item 4T-Control and Procedures

(a) Disclosure Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the "Exchange Act"). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (the "SEC") (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes to Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the three months ended March 31, 2010 that have materially affected, or are reasonable likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1 - Legal Proceedings

Management is not aware of any litigation that would have a material adverse effect on the consolidated financial position of the Company. Any pending proceedings are ordinary, routine litigation incidental to the business of the Company and its subsidiary. In addition, no material proceedings are pending or are known to be threatened or contemplated against the Company and its subsidiary by government authorities.

Item 1A – Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, “Item 1.A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2009, which could materially affect our business, financial condition or future results. At March 31, 2010 the risk factors of the Company have not changed materially from those reported in our Annual Report on Form 10-K. However, the risks described in our Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares (or units Purchased)	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans of Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs (1) (2)
1/1/10 to 1/31/10	1,073	\$26.00	1,073	49,652
2/1/10 to 2/29/10	630	\$26.00	630	49,022
3/1/10 to 3/31/10	22	\$26.00	22	49,000
Total	1,725	\$26.00	1,725	49,000

(1) On January 7, 2006, the Company announced that the Board of Directors authorized the Company to repurchase up to 140,000 shares. The repurchases will be conducted through open-market purchases or privately negotiated transactions and will be made from time to time depending on market conditions and other factors. No time limit was placed on the duration of the share repurchase program. Any repurchased shares will be held as treasury stock and will be available for general corporate purposes.

(2) On November 17, 2009, the Board of Directors authorized a Voluntary Shareholder Buy-Back Program under which shareholders owning less than 100 shares of the Company could voluntarily sell their shares to the Company at a purchase price of \$26.00 per share. The program expired on February 4, 2010. Under this program,

1,725 shares were purchased during the 1st quarter of 2010.

Item 3 - Defaults Upon Senior Securities

Not applicable.
