# Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report on Form 10-Q, the documents that it incorporates by reference and the documents into which it may be incorporated by reference may contain, and from time to time Bank of America Corporation (collectively with its subsidiaries, the Corporation) and its management may make certain statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as "expects," "anticipates," "believes," "estimates," "targets," "intends," "plans," "goal" and other similar expressions or future or conditional verbs such as "will," "may," "might," "should," "would" and "could." The forward-looking statements made represent the current expectations, plans or forecasts of the Corporation regarding the Corporation's future results and revenues, and future business and economic conditions more generally, including statements concerning: expectations regarding European and certain Asian economies; the expectation that, if the pace of improvement in the economy continues, there will be reductions in the allowance for credit losses; expected levels of net charge-offs; expectations regarding the impact of interest rate increases on future net interest income, accumulated OCI and mortgage loan originations; expectations regarding the anticipated transfers of mortgage servicing rights; expectations regarding planned actions pursuant to the Corporation's capital plan; the expectation that borrower assistance programs will not result in any incremental credit provision and that the existing allowance for credit losses is adequate to absorb any costs that have not already been recorded as charge-offs; expectations of achieving cost savings as a result of Project New BAC of \$8 billion per year on an annualized basis, or \$2 billion per quarter, by mid-2015, with \$1.5 billion in quarterly cost savings achieved by the fourth quarter of 2013; expectations regarding the impact of U.K. corporate income tax rate reductions on the Corporation's income tax expense and regulatory capital ratios; expectations that, in the fourth quarter of 2013, noninterest expense in Legacy Assets & Servicing (excluding litigation expense) will be below \$2.0 billion and the number of 60 days or more past due residential mortgage loans in the Legacy and Non-Legacy Mortgage Serviced Portfolios will decline below 375,000; the expectation that unresolved repurchase claims related to private-label securitizations will continue to increase; the resolution of representation and warranties repurchase and other claims; the possibility of additional settlements in the future: the belief that there will likely be additional requests for loan files in the future leading to repurchase claims; the possibility that the Corporation may purchase common stock and outstanding debt securities depending on prevailing market conditions, liquidity and other factors; beliefs and expectations concerning the impact of the National Mortgage Settlement, including the impact of uniform servicing standards; predictions concerning the impact of possible foreclosure delays; the possibility that the Corporation will need to register additional entities as swap dealers and major swap participants; the possibility that the Corporation will be required to restructure certain businesses as a result of final derivatives regulations that impose additional operational and compliance costs; expectations regarding the planned merger of certain pension plans, including its effect on the Corporation's regulatory capital; expectations regarding capital requirements under proposed regulatory rulemaking, including the approved final Basel 3 rules, which have not yet been published in the Federal Register, and the possibility of capital distribution-related impacts of these requirements on the Corporation; expectations that the Corporation will meet proposed Basel 3 liquidity standards within the regulatory timelines; the expectation that, if the Corporation's analytical models for capital measurement under Basel 3 are not approved by the U.S. regulatory agencies, it would likely lead to an increase in the Corporation's risk-weighted assets, which in some cases could be significant; expectations regarding benefits to be obtained from the Corporation's centralized funding strategy; estimates concerning the Corporation's additional capital requirements as a global systemically important financial institution; beliefs that default-related servicing costs peaked in late 2012 and will continue to decline in 2013; expectations regarding preferred stock dividends; the Corporation's belief that it can quickly obtain cash for certain securities, even in stressed market conditions, through repurchase agreements or outright sales; the Corporation's belief that a portion of structured liability obligations will remain outstanding beyond the earliest put or redemption date; the Corporation's anticipation that debt levels will decline due to maturities through 2013: the estimation that lifetime losses on loans originated after 2008 will be significantly less than the losses experienced with respect to vintages prior to 2009;

expectations regarding loans in the pay option portfolio; the possibility that the Corporation may add credit exposure within an industry, borrower or counterparty group by selling protection; effects of the ongoing debt crisis in certain European countries, including the expectation of continued market volatility, the expectation that the Corporation will continue to support client activities in the region and that exposures may vary over time as the Corporation monitors the situation and manages its risk profile; the expectation that net losses on derivative instruments that qualify as cash flow hedges will be reclassified into earnings during the next 12 months; the possibility that the Corporation may hedge debt securities with risk management derivatives; the expectation that the maximum potential exposure for chargebacks would not exceed the total amount of merchant transactions processed through Visa, MasterCard and Discover for the last six months; expectations regarding the Corporation's contributions to pension plans; and other matters relating to the Corporation and the securities that it may offer from time to time or steps it may take to manage the risk of these securities. The foregoing is not an exclusive list of all forward-looking statements the Corporation makes. These statements are not guarantees of future results or performance and involve certain risks, uncertainties and assumptions that are difficult to predict and are often beyond the Corporation's control. Actual outcomes and results may differ materially from those expressed in, or implied by, any of these forward-looking statements.

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risks, as well as the risks and uncertainties more fully discussed elsewhere in this report, under Item 1A. Risk Factors of the Corporation's 2012 Annual Report on Form 10-K, and in any of the Corporation's subsequent Securities and Exchange Commission filings: the Corporation's ability to resolve representations and warranties repurchase claims made by monolines and private-label and other investors, including as a result of any adverse court rulings, and the chance that the Corporation could face related servicing, securities, fraud, indemnity or other claims from one or more of the government-sponsored enterprises, monolines or private-label and other investors; the possibility that future representations and warranties losses may occur in excess of the Corporation's recorded liability and estimated range of possible loss for its representations and warranties exposures; the possibility that the Corporation may not collect mortgage insurance claims; the possible impact of a future FASB standard on accounting for credit losses; uncertainties about the financial stability of several countries in the EU, the risk that those countries may default on their sovereign debt or exit the EU and related stresses on financial markets, the Euro and the EU and the Corporation's exposures to such risks, including direct, indirect and operational; the possibility of future inquiries or investigations regarding pending or completed foreclosure activities; the negative impact of the Financial Reform Act on the Corporation's businesses and earnings, including as a result of additional regulatory interpretation and rulemaking and the success of the Corporation's actions to mitigate such impacts; the potential impact on debit card interchange fee revenue in connection with the U.S. District Court for the District of Columbia's ruling on July 31, 2013 regarding the Federal Reserve's rules implementing the Financial Reform Act's Durbin Amendment; adverse changes to the Corporation's credit ratings from the major credit rating agencies; estimates of the fair value of certain of the Corporation's assets and liabilities; the possibility that the European Commission will impose remedial measures in relation to its investigation of the Corporation's competitive practices; the impact of continued refund payments to customers and potential regulatory enforcement action relating to optional identity theft protection services; the impact of potential regulatory enforcement action relating to certain optional credit card debt cancellation products; unexpected claims, damages and fines resulting from pending or future litigation and regulatory proceedings; the Corporation's ability to fully realize the cost savings and other anticipated benefits from Project New BAC, including in accordance with currently anticipated timeframes; the impact on the Corporation's business, financial condition and results of operations of a potential higher interest rate environment; and other similar matters.

Forward-looking statements speak only as of the date they are made, and the Corporation undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made.

Notes to the Consolidated Financial Statements referred to in the Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) are incorporated by reference into the MD&A. Certain prior-period amounts have been reclassified to conform to current period presentation. Throughout the MD&A, the Corporation uses certain acronyms and abbreviations which are defined in the Glossary.

#### **Executive Summary**

#### **Business Overview**

The Corporation is a Delaware corporation, a bank holding company and a financial holding company. When used in this report, "the Corporation" may refer to Bank of America Corporation individually, Bank of America Corporation and its subsidiaries, or certain of Bank of America Corporation's subsidiaries or affiliates. Our principal executive offices are located in Charlotte, North Carolina. Through our banking and various nonbanking subsidiaries throughout the U.S. and in international markets, we provide a diversified range of banking and nonbanking financial services and products through five business segments: Consumer & Business Banking (CBB), Consumer Real Estate Services (CRES), Global Banking, Global Markets and Global Wealth & Investment Management (GWIM), with the remaining operations recorded in All Other. We operate our banking activities primarily under two national bank

charters: Bank of America, National Association (Bank of America, N.A. or BANA) and FIA Card Services, National Association (FIA Card Services, N.A. or FIA). At June 30, 2013, the Corporation had approximately \$2.1 trillion in assets and approximately 257,000 full-time equivalent employees.

As of June 30, 2013, we operated in all 50 states, the District of Columbia and more than 40 countries. Our retail banking footprint covers approximately 80 percent of the U.S. population and we serve approximately 51 million consumer and small business relationships with approximately 5,300 banking centers, 16,350 ATMs, nationwide call centers, and leading online and mobile banking platforms. We offer industry-leading support to more than three million small business owners. We are a global leader in corporate and investment banking and trading across a broad range of asset classes serving corporations, governments, institutions and individuals around the world.

#### Second Quarter 2013 Economic and Business Environment

In the U.S., economic growth continued but at a restrained pace in the second quarter of 2013 as the housing sector continued to show signs of further improvement, coupled with modest growth in consumer and business spending. However, the economy was adversely affected by the continued impact of lower federal government expenditures. Employment gains were moderate during the quarter, with little change in the unemployment rate. Measures of core inflation also fell during the second quarter of 2013, with core personal consumption deflator ending the quarter near one percent on an annual basis, well below the longer-term inflation target of two percent set by the Board of Governors of the Federal Reserve System (Federal Reserve).

The Federal Reserve continued its \$40 billion in monthly purchases of agency mortgage-backed securities (MBS) and \$45 billion in monthly purchases of long-term U.S. Treasury securities and maintained its forward guidance on interest rates expressed in terms of economic thresholds, which began in December 2012. Sequestration became effective on March 1, 2013, which restrained federal expenditures during the second quarter, and remained in effect at quarter-end. Despite remaining fiscal uncertainties and international economic difficulties, U.S. equities posted modest gains at the end of the second quarter. After the Federal Reserve's announcement on June 19, 2013, there was considerable market concern around potential tapering of the bond buying program. This resulted in a rise in long-term U.S. Treasury yields as the yield curve steepened during the second quarter and volatility in interest rate markets increased, which led to an extensive market sell off for interest rate sensitive products including, for example, municipal bonds and MBS.

Most European economies continued to contract during the quarter but at a diminishing pace with forward-looking indicators favoring a resumption of growth later in the year. Despite uncertainty ahead of upcoming German elections and continued political uncertainty in Greece, the Eurozone continued to demonstrate a reduced level of financial anxiety. Japan's economy continued to demonstrate signs of economic improvement, although uncertainties remain as to whether the impacts of a depreciating Yen could be sustained with the implementation of longer-term reforms. China's economic growth has slowed as the present leadership clarified a greater emphasis on other objectives such as financial reform, which has slowed the credit markets, therefore posing a risk of slowdown for bordering economies. For more information on our international exposure, see Non-U.S. Portfolio on page 116.

#### Recent Events

Common Stock Repurchases and Liability Management Actions

As disclosed in prior filings, the capital plan that the Corporation submitted to the Federal Reserve in January 2013 as part of our 2013 Comprehensive Capital Analysis and Review project (CCAR), and to which the Federal Reserve did not object, included a request to repurchase up to \$5.0 billion of common stock and redeem \$5.5 billion in preferred stock over four quarters with both beginning in the second quarter of 2013, and a continuation of the quarterly common stock dividend at \$0.01 per share. In the second quarter, we repurchased and retired 79.6 million common shares for an aggregate purchase price of approximately \$1.0 billion and redeemed our Series H and 8 preferred stock for \$5.5 billion.

In addition to the CCAR actions, during the three months ended June 30, 2013, we redeemed \$76 million of Noncumulative Perpetual Preferred Stock, Series 6 and 7 and issued approximately \$1.0 billion of Fixed-to-Floating Rate Non-Cumulative Semi-annual Preferred Stock, Series U (the Series U Preferred Stock). On August 1, 2013, we redeemed \$951 million of the Corporation's 7.25% Non-Cumulative Preferred Stock, Series J (the Series J Preferred Stock). For additional information, see Capital Management – Regulatory Capital on page 70 and Note 12 – Shareholders' Equity to the Consolidated Financial Statements.

#### Final Basel 3 Rules and Proposed Supplementary Leverage Ratio

In July 2013, U.S. banking regulators approved the final Basel 3 rules (Basel 3). While not yet published in the Federal Register, Basel 3 will be effective January 1, 2014. Various aspects of Basel 3 will be subject to multi-year transition periods ending December 31, 2018 and Basel 3 generally continues to be subject to further evaluation and interpretation by the U.S. banking regulators. Basel 3 will materially change our Tier 1 common, Tier 1 and Total capital calculations. Basel 3 introduces new minimum capital ratios and buffer requirements, changes the composition of regulatory capital, expands and modifies the calculation of risk-weighted assets for credit and market risk (the Advanced Approach), revises the adequately capitalized minimum requirements under the Prompt Corrective Action framework and introduces, effective January 1, 2015, a Standardized Approach for the calculation of risk-weighted assets, which will replace the Basel 1 - 2013 Rules. Under Basel 3, we will be required to calculate regulatory capital ratios and risk-weighted assets under both the Standardized and Advanced Approaches. The approach that yields the lower ratio is to be used to assess capital adequacy including under the Prompt Corrective Action framework. The Prompt Corrective Action framework establishes categories of capitalization, including "well-capitalized," based on regulatory ratio requirements. U.S. banking regulators are required to take certain mandatory actions depending on the category of capitalization, with no mandatory actions required for "well-capitalized" banking entities. We continue to evaluate the impact of both the Standardized and Advanced Approaches on us. The Basel 3 Advanced Approach requires approval by the U.S. regulatory agencies of analytical models used as part of capital measurement. If these models are not approved, it would likely lead to an increase in our risk-weighted assets, which in some cases could be significant.

In addition, in July 2013, the U.S. banking regulators also proposed changes to the capital ratio requirements that would be effective beginning in 2018. Under the proposed rule, the largest bank holding companies (BHCs), including the Corporation, would be required to maintain a minimum supplementary leverage ratio of three percent, plus a supplementary leverage buffer of two percent, for a total of five percent. If the Corporation does not maintain the supplementary leverage buffer at a level greater than or equal to two percent, it would be subject to limitations on returning capital distributions to its shareholders, whether through dividends, stock repurchases or otherwise. The proposed rule would also require insured depository institutions of such BHCs, which for the Corporation would include primarily BANA and FIA, to have a six percent supplementary leverage ratio to be considered "well capitalized." The proposal is not yet final and, when finalized, could have provisions significantly different from those currently proposed. For additional information, see Capital Management – Regulatory Capital on page 72.

#### Impact of U.K. Corporate Income Tax Rate Reduction

On July 17, 2013, the United Kingdom (U.K.) 2013 Finance Bill was enacted, which reduced the U.K. corporate income tax rate by three percent to 20 percent. Two percent of the reduction will become effective on April 1, 2014 and the additional one percent reduction on April 1, 2015. These reductions will favorably affect income tax expense on future U.K. earnings but also require the Corporation to remeasure, in the period of enactment, its U.K. net deferred tax assets using the lower tax rates. As a result, in the three months ending September 30, 2013, the Corporation will record a charge to income tax expense of approximately \$1.1 billion in aggregate for these reductions. Because our deferred tax assets in excess of a certain amount are disallowed in calculating regulatory capital, this charge will not impact our capital ratios. For additional information, see Note 21 – Subsequent Event to the Consolidated Financial Statements.

#### MBIA Settlement

On May 7, 2013, we entered into a comprehensive settlement with MBIA Inc. and certain of its affiliates (MBIA) to resolve all outstanding litigation between the parties, as well as other claims between the parties, including outstanding and potential claims from MBIA related to alleged representations and warranties breaches and other claims involving certain first- and second-lien residential mortgage-backed securities (RMBS) trusts for which MBIA provided financial guarantee insurance, certain of which claims were the subject of litigation (MBIA Settlement). Under the MBIA Settlement, all pending litigation between the parties was dismissed and each party received a global release of those claims.

Under the MBIA Settlement, all pending litigation between the parties was dismissed and each party received a global release of those claims. The Corporation made a settlement payment to MBIA of \$1.565 billion in cash and transferred to MBIA approximately \$95 million in fair market value of notes issued by MBIA and previously held by the Corporation. The Corporation was fully reserved at March 31, 2013 for the MBIA Settlement. In addition, MBIA issued to the Corporation warrants to purchase up to approximately 4.9 percent of MBIA's currently outstanding common stock, at an exercise price of \$9.59 per share, which may be exercised at any time prior to May 2018. In addition, the Corporation provided a senior secured \$500 million credit facility to an affiliate of MBIA.

The parties also terminated various credit default swaps (CDS) transactions entered into between the Corporation and an MBIA-affiliate, LaCrosse Financial Products, LLC, and guaranteed by MBIA, which constituted all of the outstanding CDS protection agreements purchased by the Corporation from MBIA on commercial mortgage-backed securities (CMBS). Collectively, those CDS transactions had a notional value of \$7.4 billion and a fair value of \$813 million as of March 31, 2013. The parties also terminated certain other trades in order to close out positions between the parties; the termination of these trades did not have a material impact on the Corporation's financial statements. For additional information, see Off-Balance Sheet Arrangements and Contractual Obligations – Representations and Warranties on page 58 and Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements.

#### Performance Overview

Net income was \$4.0 billion, or \$0.32 per diluted share and \$5.5 billion, or \$0.42 per diluted share for the three and six months ended June 30, 2013 compared to \$2.5 billion, or \$0.19 and \$3.1 billion, or \$0.22 for the same periods in 2012. The results for the first half of 2013 reflect our efforts to stabilize revenue, decrease costs, strengthen the balance sheet and improve credit quality. The following highlights the most significant changes from the prior-year periods.

Net interest income on a fully taxable-equivalent (FTE) basis increased \$989 million to \$10.8 billion, and \$811 million to \$21.6 billion for the three and six months ended June 30, 2013. The increases in net interest income were primarily due to reductions in long-term debt balances, positive market-related premium amortization and hedge ineffectiveness on debt securities, improved trading-related net interest income, higher commercial loan balances and lower rates paid on deposits, partially offset by lower consumer loan balances as well as lower asset yields driven by the low rate environment. The net interest yield on a FTE basis increased 23 basis points (bps) and eight bps to 2.44 percent for both the three and six months ended June 30, 2013 due to the same factors described above.

Noninterest income decreased \$242 million to \$12.2 billion, and increased \$859 million to \$24.7 billion for the three and six months ended June 30, 2013. The significant drivers for the three-month period were lower mortgage banking income reflecting lower servicing income, partially offset by increases in investment banking income, equity investment income, and investment and brokerage services income. The year-ago period included gains of \$505 million related to liability management actions.

#### Table of Contents

The significant drivers of noninterest income for the six-month period were negative fair value adjustments on structured liabilities of \$80 million compared to \$3.4 billion, debit valuation adjustment (DVA) losses on derivatives, net of hedges, of \$15 million compared to \$1.6 billion and increases in investment banking income and investment and brokerage services income. These improvements were partially offset by lower mortgage banking income and lower gains on sales of debt securities. The year-ago period included gains of \$1.7 billion related to liability management actions.

The provision for credit losses decreased \$562 million to \$1.2 billion, and \$1.3 billion to \$2.9 billion for the three and six months ended June 30, 2013. The improvement was primarily in the home loans portfolio, due to improved portfolio trends as well as the impact of increased home prices.

Noninterest expense decreased \$1.0 billion to \$16.0 billion, and \$671 million to \$35.5 billion for the three and six months ended June 30, 2013. The decrease for the three-month period was driven by a \$604 million decrease in other general operating expense primarily due to lower litigation expense as well as a decrease in professional fees due in part to reduced Legacy Assets & Servicing expenses, and a decrease in personnel expense as we continue to streamline processes and achieve cost savings. The decrease for the six-month period was driven by the same factors described in the three-month discussion above, partially offset by higher litigation expense due in part to the MBIA Settlement.

Income tax expense was \$1.5 billion on \$5.5 billion of pre-tax income and \$2.0 billion on \$7.5 billion of pre-tax income, resulting in effective tax rates of 27.0 percent and 26.6 percent for the three and six months ended June 30, 2013. This was compared to \$684 million on \$3.1 billion of pre-tax income and \$750 million on \$3.9 billion of pre-tax income that resulted in effective tax rates of 21.7 percent and 19.4 percent for the same periods in 2012.

For additional summary information on the Corporation's results, see Financial Highlights on page 10.

#### **Financial Highlights**

#### Net Interest Income

Net interest income on a FTE basis increased \$989 million to \$10.8 billion, and \$811 million to \$21.6 billion for the three and six months ended June 30, 2013 compared to the same periods in 2012. The increases were primarily due to reductions in long-term debt balances, positive market-related premium amortization and hedge ineffectiveness on debt securities, improved trading-related net interest income, higher commercial loan balances and lower rates paid on deposits, partially offset by lower consumer loan balances as well as lower asset yields driven by the low rate environment. The net interest yield on a FTE basis increased 23 bps and eight bps to 2.44 percent for both the three and six months ended June 30, 2013 compared to the same periods in 2012 due to the same factors described above.

Total noninterest income	\$12,178		\$12,420		\$24,711		\$23,852	

Noninterest income decreased \$242 million to \$12.2 billion, and increased \$859 million to \$24.7 billion for the three and six months ended June 30, 2013 compared to the same periods in 2012. The following highlights the significant changes.

Card income decreased \$109 million and \$156 million primarily driven by decreased revenue due to the exit of consumer protection products.

Investment and brokerage services increased \$296 million and \$447 million primarily driven by higher market levels, impact of long-term assets under management (AUM) flows and increased transactional activity.

Investment banking income increased \$410 million and \$728 million due to strong debt underwriting performance, primarily within leveraged finance and investment grade, and equity underwriting performance due to significant increases in global initial public offering (IPO) markets, partially offset by a decline in advisory fees.

Equity investment income increased \$312 million and \$110 million primarily due to a gain on the sale of an equity investment in the three and six months ended June 30, 2013, partially offset by a gain on the sale of an investment in Global Markets in the same periods in 2012.

Trading account profits increased \$174 million and \$1.1 billion. Net DVA gains on derivatives were \$39 million and net DVA losses were \$15 million for the three and six months ended June 30, 2013 compared to net DVA losses of \$158 million and \$1.6 billion in the year-ago periods. Excluding net DVA, trading account profits decreased \$23 million and \$514 million primarily due to decreases in our fixed income, currencies and commodities (FICC) businesses reflecting less favorable market conditions, related to the Federal Reserve's policy announcement in June, primarily in structured credit and interest rate products.

Mortgage banking income decreased \$481 million and \$830 million primarily driven by a decrease in servicing income due to a smaller servicing portfolio and the divestiture of certain servicing business units in the prior year. The decline in the servicing portfolio was due primarily to mortgage servicing rights (MSR) sales in 2013.

#### Table of Contents

Other income (loss) decreased \$806 million to a loss of \$76 million for the three months ended June 30, 2013 compared to the same period in 2012 and improved \$276 million to a loss of \$188 million for the six months ended June 30, 2013. Fair value adjustments on structured liabilities were positive \$10 million and negative \$80 million for the three and six months ended June 30, 2013 compared to negative fair value adjustments of \$62 million and \$3.4 billion in the year-ago periods. The six months ended June 30, 2013 included a \$450 million write-down of a receivable. The prior-year periods included gains related to liability management actions of \$505 million and \$1.7 billion.

#### Provision for Credit Losses

The provision for credit losses decreased \$562 million to \$1.2 billion, and \$1.3 billion to \$2.9 billion for the three and six months ended June 30, 2013 compared to the same periods in 2012. For the three and six months ended June 30, 2013, the provision for credit losses was \$900 million and \$1.7 billion lower than net charge-offs, resulting in a reduction in the allowance for credit losses due to continued improvement in the home loans portfolio primarily as a result of increased home prices and improvement in credit card portfolios. If the pace of improvement in the economy continues, we anticipate additional reductions in the allowance for credit losses, particularly in our consumer real estate portfolios.

Net charge-offs totaled \$2.1 billion, or 0.94 percent, and \$4.6 billion, or 1.04 percent of average loans and leases for the three and six months ended June 30, 2013 compared to \$3.6 billion, or 1.64 percent, and \$7.7 billion, or 1.72 percent for the same periods in 2012. The decrease in net charge-offs was driven by credit quality improvement across all portfolios. Given the improving trend in delinquencies and other credit quality metrics, we expect net charge-offs to be below \$2.0 billion for the three months ending September 30, 2013. For more information on the provision for credit losses, see Provision for Credit Losses on page 120.

Noninterest Expense					
Table 4					
Noninterest Expense					
	Three Mont 30	hs Ended June	Six Months Ended June 30		
(Dollars in millions)	2013	2012	2013	2012	
Personnel	\$8,531	\$8,729	\$18,422	\$18,917	
Occupancy	1,109	1,117	2,263	2,259	
Equipment	532	546	1,082	1,157	
Marketing	437	449	866	914	
Professional fees	694	922	1,343	1,705	
Amortization of intangibles	274	321	550	640	
Data processing	779	692	1,591	1,548	
Telecommunications	411	417	820	817	
Other general operating	3,251	3,855	8,581	8,232	
Total noninterest expense	\$16,018	\$17,048	\$35,518	\$36,189	

Noninterest expense decreased \$1.0 billion to \$16.0 billion, and \$671 million to \$35.5 billion for the three and six months ended June 30, 2013 compared to same periods in 2012. The decrease for the three months ended June 30, 2013 was driven by a \$604 million decrease in other general operating expense primarily due to lower litigation expense, a \$228 million decrease in professional fees due in part to reduced default management activities in Legacy Assets & Servicing, and a \$198 million decrease in personnel expense as we continue to streamline processes and achieve cost savings. The decrease for the six months ended June 30, 2013 was driven by a \$495 million decrease in personnel expense as a result of the same factors described in the

three-month discussion above, partially offset by a \$349 million increase in other general operating expense. The increase in other general operating expense was the result of higher litigation expense due in part to the MBIA Settlement.

In connection with Project New BAC, which was first announced in the third quarter of 2011, we continue to achieve cost savings in certain noninterest expense categories as we further streamline workflows, simplify processes and align expenses with our overall strategic plan and operating principles. We expect total cost savings from Project New BAC to reach \$8 billion per year on an annualized basis, or \$2 billion per quarter, by mid-2015. We expect to achieve approximately \$1.5 billion in quarterly cost savings by the fourth quarter of 2013, representing 75 percent of the quarterly target.

#### Table of Contents

#### Income Tax Expense

Income tax expense was \$1.5 billion on \$5.5 billion of pre-tax income and \$2.0 billion on \$7.5 billion of pre-tax income, resulting in effective tax rates of 27.0 percent and 26.6 percent for the three and six months ended June 30, 2013. This was compared to \$684 million on \$3.1 billion of pre-tax income and \$750 million on \$3.9 billion of pre-tax income that resulted in effective tax rates of 21.7 percent and 19.4 percent for the same periods in 2012.

The effective tax rates for the three and six months ended June 30, 2013 were primarily driven by our recurring tax preference items and an increase in tax benefits from the 2012 non-U.S. restructurings as compared to amounts previously recognized. The effective tax rates in the year-ago periods were primarily driven by our recurring tax preference items and discrete tax benefits.

On July 17, 2013, the U.K. 2013 Finance Bill was enacted, which reduced the U.K. corporate income tax rate by three percent to 20 percent. Two percent of the reduction will become effective on April 1, 2014 and the additional one percent reduction on April 1, 2015. These reductions will favorably affect income tax expense on future U.K. earnings but also require us to remeasure, in the period of enactment, our U.K. net deferred tax assets using the lower tax rates. As a result, in the three months ending September 30, 2013, we will record a charge to income tax expense of approximately \$1.1 billion in aggregate for these reductions. Because our deferred tax assets in excess of a certain amount are disallowed in calculating regulatory capital, this charge will not impact our capital ratios.

Period-end balance sheet amounts may vary from average balance sheet amounts due to liquidity and balance sheet management activities, primarily involving our portfolios of highly liquid assets. These portfolios are designed to ensure the adequacy of capital while enhancing our ability to manage liquidity requirements for the Corporation and our customers, and to position the balance sheet in accordance with the Corporation's risk appetite. The execution of these activities requires the use of balance sheet and capital-related limits including spot, average and risk-weighted asset limits, particularly within the market-making activities of our trading businesses. One of our key regulatory metrics, Tier 1 leverage ratio, is calculated based on adjusted quarterly average total assets.

#### Assets

At June 30, 2013, total assets were approximately \$2.1 trillion, a decrease of \$86.7 billion, or four percent, from December 31, 2012. This decrease was driven by lower trading account assets due to a reduction in U.S. government and agency securities, lower debt securities driven by net sales of U.S. Treasuries, paydowns and decreases in the fair value of available-for-sale (AFS) debt securities resulting from the impact of higher interest rates, a decrease in consumer loan balances driven by continued run-off in certain portfolios as well as paydowns and charge-offs outpacing originations, and lower cash and cash equivalent balances. These decreases were partially offset by higher commercial loan balances.

Average total assets decreased \$10.0 billion for the three months ended June 30, 2013 compared to the same period in 2012 primarily driven by lower debt securities due to net sales of U.S. Treasuries, paydowns and decreases in fair value of AFS debt securities, a decrease in consumer loan balances driven by continued run-off in certain portfolios as well as paydowns and charge-offs outpacing originations, lower cash and cash equivalent balances, and lower derivative dealer assets largely due to MSR sales resulting in a decrease in derivative contracts used to hedge certain market risks on MSRs. These declines were partially offset by higher commercial loan balances and higher trading account assets primarily due to increased securities inventory and client-based activity.

Average total assets increased \$7.6 billion for the six months ended June 30, 2013 compared to the same period in 2012 primarily driven by higher commercial loan balances and higher trading account assets resulting from increased securities inventory and client-based activity. These increases were partially offset by lower consumer loan balances driven by continued run-off in certain portfolios as well as paydowns and charge-offs outpacing originations, lower cash and cash equivalent balances, and a decrease in derivative dealer assets.

Liabilities and Shareholders' Equity

At June 30, 2013, total liabilities were approximately \$1.9 trillion, a decrease of \$80.7 billion, or four percent, from December 31, 2012. This decrease was driven by lower securities sold under agreement to repurchase due to lower matched-book activity and trading inventory, lower deposits and reductions in long-term debt. These decreases were partially offset by higher short-term borrowings due to an increase in advances from the Federal Home Loan Bank (FHLB).

Average total liabilities decreased \$9.5 billion for the three months ended June 30, 2013 compared to the same period in 2012 primarily driven by reductions in long-term debt, partially offset by growth in deposits and higher trading account liabilities.

Average total liabilities increased \$5.6 billion for the six months ended June 30, 2013 compared to the same period in 2012 primarily driven by growth in deposits, higher securities loaned or sold under agreement to repurchase due to funding of trading inventory and higher trading account liabilities, partially offset by reductions in long-term debt.

At June 30, 2013, shareholders' equity was \$231.0 billion, a decrease of \$5.9 billion from December 31, 2012 driven by a decrease in the fair value of AFS debt securities resulting from the impact of higher interest rates, which is recorded in accumulated other comprehensive income (OCI), redemptions of preferred stock and common stock repurchases, partially offset by earnings and issuances of preferred stock.

Average shareholders' equity decreased \$495 million for the three months ended June 30, 2013 compared to the same period in 2012 driven by redemptions of preferred stock, a decrease in the fair value of AFS debt securities and common stock repurchases. These decreases were partially offset by earnings, common stock issued under employee benefit plans and issuances of preferred stock.

Average shareholders' equity increased \$2.0 billion for the six months ended June 30, 2013 compared to the same period in 2012 driven by earnings, common stock issued under employee benefit plans and issuances of preferred stock. These increases were partially offset by redemptions of preferred stock, a decrease in the fair value of AFS debt securities and common stock repurchases.

(1) Due to a net loss applicable to common shareholders for the third quarter of 2012, the impact of antidilutive equity instruments was excluded from diluted earnings per share and average diluted common shares.

(2) Calculated as total net income for four consecutive quarters divided by annualized average assets for four consecutive quarters.

Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures.

(3) Other companies may define or calculate these measures differently. For more information on these ratios and for corresponding reconciliations to GAAP financial measures, see Supplemental Financial Data on page 18.

(4) For more information on the impact of the purchased credit-impaired loan portfolio on asset quality, see Consumer Portfolio Credit Risk Management on page 83.

%

- <sup>(5)</sup> Includes the allowance for loan and lease losses and the reserve for unfunded lending commitments. Balances and ratios do not include loans accounted for under the fair value option. For additional exclusions from nonperforming loans, leases and foreclosed properties, see Consumer Portfolio Credit Risk Management –
- <sup>(6)</sup> Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity on page 101 and corresponding Table 41, and Commercial Portfolio Credit Risk Management Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity on page 110 and corresponding Table 50.
- (7) Primarily includes amounts allocated to the U.S. credit card and unsecured consumer lending portfolios in CBB, purchased credit-impaired loans and the non-U.S. credit card portfolio in All Other. Net charge-offs exclude \$313 million, \$839 million, \$1.1 billion and \$1.7 billion of write-offs in the purchased credit-impaired loan portfolio for the second and first quarters of 2013 and the fourth and third quarters of 2012.
- (8) These write-offs decreased the purchased credit-impaired valuation allowance included as part of the allowance for loan and lease losses. For more information on purchased credit-impaired write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 95.
- <sup>(9)</sup> There were no write-offs in the purchased credit-impaired loan portfolio for the second quarter of 2012.
- (10) Presents capital ratios in accordance with the Basel 1 2013 Rules at June 30, 2013. Basel 1 did not include the Basel 1 2013 Rules at December 31, 2012.
- n/m = not meaningful
