NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

SEACOAST BANKING CORPORATION OF FLORIDA AND SUBSIDIARIES

NOTE A BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U. S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U. S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three-month period ended March 31, 2013, are not necessarily indicative of the results that may be expected for the year ending December 31, 2013 or any other period. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2012.

Use of Estimates

The preparation of these condensed consolidated financial statements required the use of certain estimates by management in determining the Company's assets, liabilities, revenues and expenses. Actual results could differ from those estimates.

Specific areas, among others, requiring the application of management's estimates include determination of the allowance for loan losses, the valuation of investment securities available for sale, fair value of impaired loans, contingent liabilities, other real estate owned, and the valuation of deferred tax valuation allowance. Actual results could differ from those estimates.

NOTE B RECENTLY ISSUED ACCOUNTING STANDARDS

In February 2013, the FASB issued ASU No. 2013-04, *Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation is Fixed at the Reporting Date*. The ASU requires the measurement of obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date as the sum of the amount the reporting entity agreed to pay on the basis of its arrangement with its co-obligors as well as any additional amount that the entity expects to pay on behalf of its co-obligors. The new standard is effective retrospectively for fiscal years and interim periods within those years, beginning after December 15, 2013, and early adoption is permitted. We are currently evaluating the implications of ASU 2013-04. The Company does not expect it will have a material impact on the Company's consolidated financial statements.

Table of Contents

NOTE C BASIC AND DILUTED EARNINGS (LOSS) PER COMMON SHARE

Equivalent shares of 436,000 and 1,117,000 related to stock options, stock settled appreciation rights and warrants for each of the periods ended March 31, 2013 and 2012, respectively, were excluded from the computation of diluted EPS because they would have been anti-dilutive.

Obligations of state and political subdivisions	847	51	0	898
	\$ 637,940	\$ 7,011	\$ (1,901)	\$ 643,050
SECURITIES HELD FOR INVESTMENT				
Collateralized mortgage obligations of U.S. Government Sponsored Entities	\$ 4,687	\$ 0	\$ (92)	\$ 4,595
Private collateralized mortgage obligations	1,278	33	0	1,311
Obligations of state and political subdivisions	6,353	737	(3)	7,087
Other	1,500	49	0	1,549
	\$ 13,818	\$ 819	\$ (95)	\$ 14,542

Management changed its intent to hold the securities held for investment during the first quarter 2013 and all securities were transferred to securities available for sale to allow more flexibility in managing interest rate risk. The net carrying amount of securities transferred was \$13,818, and had net unrealized gains of \$724, resulting in an increase to securities available for sale of \$14,542. The net unrealized gains were recorded as a component of other comprehensive income during the quarter.

Proceeds from sales of securities during the three month period ended March 31, 2013 were \$11,836,000 with gross gains of \$101,000 and gross losses of \$76,000. Proceeds from sales of securities during the three month period ended March 31, 2012 were \$111,717,000 with gross gains of \$3,374,000 and gross losses of \$0.

Securities with a carrying and fair value of \$92,959,000 at March 31, 2013 were pledged as collateral for United States Treasury deposits, and other public and trust deposits. Securities with a carrying value and fair value of \$165,665,000 were pledged as collateral for repurchase agreements.

Table of Contents

The amortized cost and fair value of securities at March 31, 2013, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or repay obligations with or without call or prepayment penalties.

(Dollars in thousands)	Available for Sale	
	Amortized Cost	Fair Value
Due in less than one year	\$ 1,200	\$ 1,202
Due after one year through five years	818	842
Due after five years through ten years	1,353	1,413
Due after ten years	5,028	5,630
	8,399	9,087
Mortgage-backed securities of Government Sponsored Entities	175,283	177,401
Collateralized mortgage obligations of Government Sponsored Entities	366,890	367,872
Private collateralized mortgage obligations	92,643	93,298
No contractual maturity	1,500	1,538
	\$ 644,715	\$ 649,196

The estimated fair value of a security is determined based on market quotations when available or, if not available, by using quoted market prices for similar securities, pricing models or discounted cash flows analyses, using observable market data where available. The tables below indicate the amount of securities with unrealized losses and period of time for which these losses were outstanding at March 31, 2013 and December 31, 2012, respectively.

Table of Contents

(Dollars in thousands)	Less than 12 months		March 31, 2013 12 months or longer		Total	
	Fair	Unrealized	Fair	Unrealized	Fair	Unrealized
	Value	Losses	Value	Losses	Value	Losses
Mortgage-backed securities of U.S. Government Sponsored Entities	\$ 46,580	\$ (658)	\$ 17,898	\$ (246)	\$ 64,478	\$ (904)
Collateralized mortgage obligations of U.S. Government Sponsored Entities	188,789	(1,219)	0	0	188,789	(1,219)
Private collateralized mortgage obligations	28,118	(441)	8,298	(98)	36,416	(539)
Obligations of state and political subdivisions	0	0	125	(2)	125	(2)
Total temporarily impaired securities	\$ 263,487	\$ (2,318)	\$ 26,321	\$ (346)	\$ 289,808	\$ (2,664)

(Dollars in thousands)	Less than 12 months		December 31, 2012 12 months or longer		Total	
	Fair	Unrealized	Fair	Unrealized	Fair	Unrealized
	Value	Losses	Value	Losses	Value	Losses
Mortgage-backed securities of U.S. Government Sponsored Entities	\$ 54,289	\$ (469)	\$ 0	\$ 0	\$ 54,289	\$ (469)
Collateralized mortgage obligations of U.S. Government Sponsored Entities	150,057	(901)	4,593	(93)	154,650	(994)
Private collateralized mortgage obligations	29,969	(441)	9,221	(89)	39,190	(530)
Obligations of state and political subdivisions	0	0	125	(3)	125	(3)
Total temporarily impaired securities	\$ 234,315	\$ (1,811)	\$ 13,939	\$ (185)	\$ 248,254	\$ (1,996)

Approximately \$0.5 million of the unrealized losses pertain to private label securities secured by collateral originated in 2005 and prior. Their fair value is \$36.4 million and is attributable to a combination of factors, including relative changes in interest rates since the time of purchase and decreased liquidity for investment securities in general. The collateral underlying these mortgage investments are 30- and 15-year fixed and adjustable rate mortgage loans with low loan to values, subordination and historically have had minimal foreclosures and losses. Based on its assessment of these factors, management believes that the unrealized losses on these debt security holdings are a function of changes in investment spreads and interest rate movements and not changes in credit quality. Management expects to recover the entire amortized cost basis of these securities.

Table of Contents

At March 31, 2013, the Company also had \$2.1 million of unrealized losses on mortgage backed securities of government sponsored entities having a fair value of \$253.3 million that were attributable to a combination of factors, including relative changes in interest rates since the time of purchase and higher prepayments compressing prices as a result of the Federal Reserve's actions to maintain low interest rates. The contractual cash flows for these securities are guaranteed by U.S. government agencies and U.S. government-sponsored enterprises. Based on its assessment of these factors, management believes that the unrealized losses on these debt security holdings are a function of changes in investment spreads and interest movements and not changes in credit quality. Management expects to recover the entire amortized cost basis of these securities.

As of March 31, 2013, the Company does not intend to sell nor is it anticipated that it would be required to sell any of its investment securities that have losses. Therefore, management does not consider any investment to be other-than-temporarily impaired at March 31, 2013.

Included in other assets is \$11.2 million of Federal Home Loan Bank and Federal Reserve Bank stock stated at par value. At March 31, 2013, the Company has not identified events or changes in circumstances which may have a significant adverse effect on the fair value of the \$11.2 million of cost method investment securities.

NOTE E LOANS

Information relating to loans is summarized as follows:

(Dollars in thousands)	March 31, 2013	December 31 2012
Construction and land development	\$ 59,626	\$ 60,736

The Company utilizes an internal asset classification system as a means of reporting problem and potential problem loans. Under the Company's risk rating system, the Company classifies problem and potential problem loans as Special Mention, Substandard, and Doubtful and these loans are monitored on an ongoing basis. Substandard loans include those characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Loans classified as substandard may require a specific allowance, but generally does not exceed 30% of the principal balance. Loans classified as Doubtful, have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The principal balance of loans classified as doubtful are generally charged off. Loans that do not currently expose the Company to sufficient risk to warrant classification in one of the aforementioned categories, but possess weaknesses that deserve management's close attention are deemed to be Special Mention. Risk ratings are updated any time the situation warrants.

Table of Contents

Loans not meeting the criteria above are considered to be pass-rated loans and risk grades are recalculated at least annually by the loan relationship manager. The following tables present the risk category of loans by class of loans based on the most recent analysis performed as of March 31, 2013 and December 31, 2012:

March 31, 2013

(Dollars in thousands)	Construction & Land Development	Commercial Real Estate	Residential Real Estate	Commercial and Financial	Consumer Loans	Total

NOTE F IMPAIRED LOANS AND VALUATION ALLOWANCE FOR LOAN LOSSES

During the three months ended March 31, 2013, the total of newly identified troubled debt restructurings (TDRs) was \$1.6 million, of which \$1.0 million were accruing commercial real estate loans, \$0.1 million were accruing residential real estate mortgages, and \$0.1 million were accruing consumer loans. Loans modified, but where full collection under the modified terms is doubtful are classified as nonaccrual loans from the date of modification and are therefore excluded from the tables below.

The Company's TDR concessions granted generally do not include forgiveness of principal balances. Loan modifications are not reported in calendar years after modification if the loans were modified at an interest rate equal to the yields of new loan originations with comparable risk and the loans are performing based on the terms of the restructuring agreements.

When a loan is modified as a TDR, there is not a direct, material impact on the loans within the Consolidated Balance Sheet, as principal balances are generally not forgiven.

Table of Contents

The following table presents loans that were modified within the three months ending March 31, 2013:

(Dollars in thousands)	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Specific Reserve Recorded	Valuation Allowance Recorded
Troubled Debt Restructurings Modified					
Construction and land development	1	\$ 14	\$ 13	\$ 0	\$ 1
Residential real estate	3	138	119	0	19
Commercial real estate	2	986	866	0	120
Commercial and financial	0	0	0	0	0
Consumer	1	92	74	0	18
	7	\$ 1,230	\$ 1,072	\$ 0	\$ 158

Accruing loans that were restructured within the twelve months preceding March 31, 2013 and defaulted during the three months ended March 31, 2013 are presented in the table below. The Company considers a loan to have defaulted when it becomes 60 days or more delinquent under the modified terms, has been transferred to nonaccrual status, or has been transferred to other real estate owned. A defaulted TDR is generally placed on nonaccrual and specific allowance for loan loss is assigned in accordance with the Company's policy.

(Dollars in thousands)	2013

Consumer	704	6	1,095	7
	\$ 80,727	\$ 480	\$ 99,894	\$ 669

Impaired loans also include loans that have been modified in troubled debt restructurings where concessions to borrowers who experienced financial difficulties have been granted. At March 31, 2013 and December 31, 2012, accruing TDRs totaled \$41.2 million and \$41.9 million, respectively.

Interest payments received on impaired loans are recorded as interest income unless collection of the remaining recorded investment is doubtful at which time payments received are recorded as reductions to principal. For the three months ended March 31, 2013 and 2012, the Company recorded \$480,000 and \$669,000, respectively, in interest income on impaired loans.

For impaired loans whose impairment is measured based on the present value of expected future cash flows, a total of \$240,000 and \$219,000, respectively, was included in interest income for the three months ended March 31, 2013 and 2012, and represents the change in present value attributable to the passage of time.

Table of Contents

Activity in the allowance for loan losses for the three-month period ended March 31, 2013 and 2012 is summarized as follows:

(Dollars in thousands)	Allowance for Loan Losses for the Three Months Ended March 31, 2013					
	Beginning Balance	Provision for Loan Losses	Charge-Offs	Recoveries	Net Charge-Offs	Ending Balance
Construction & land development	\$ 1,134	\$ 193	\$ (334)	\$ 115	\$ (219)	\$ 1,108
Commercial real estate	8,849	49	(529)	79	(450)	8,448

Table of Contents

NOTE G INCOME TAXES

The Company has recorded net deferred tax assets (DTA) of \$18.2 million at March 31, 2013. Although realization is not assured, the Company believes that the realization of the recognized current carrying value of the DTA is more likely than not based on expectations as to future taxable income and available tax planning strategies, as defined in ASC 740, which could be implemented if necessary to prevent a carryforward from expiring. The Company's credit losses are expected to moderate and as the Company generates increased taxable income, increased reliance on management's forecast of future taxable earnings should result in realization of additional future tax benefits from the net operating loss carryforwards. At March 31, 2013 the Company has approximately \$44.0 million in its deferred tax valuation allowance allocated to its deferred tax assets, primarily net operating loss carryforwards.

NOTE H EQUITY CAPITAL

The Company is well capitalized for bank regulatory purposes. To be categorized as well capitalized, the Company must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth under Capital Resources in this Report. At March 31, 2013, the Company's principal subsidiary, Seacoast National Bank, or Seacoast National, met the risk-based capital and leverage ratio requirements for well capitalized banks under the regulatory framework for prompt corrective action.

Seacoast National has agreed to maintain a Tier 1 capital (to adjusted average assets) ratio of at least 8.50% and a total risk-based capital ratio of at least 12.00% with its primary regulator, the Office of the Comptroller of the Currency (OCC). The agreement with the OCC as to minimum capital ratios does not change the Bank's status as well-capitalized for bank regulatory purposes.

The Company's Series A Preferred Stock with a par value of \$0.10 per share pays quarterly dividends of five percent or \$625,000. Quarterly dividends will increase to nine percent or \$1,125,000 beginning in the first quarter of 2014, five years from the date of issuance.

NOTE I CONTINGENCIES

The Company and its subsidiaries, because of the nature of their businesses, are at all times subject to numerous legal actions, threatened or filed. Management presently believes that none of the legal proceedings to which it is a party are likely to have a materially adverse effect on the Company's consolidated financial condition, operating results or cash flows, although no assurance can be given with respect to the ultimate outcome of any such claim or litigation.

NOTE J FAIR VALUE

In certain circumstances, fair value enables the Company to more accurately align its financial performance with the market value of actively traded or hedged assets and liabilities. Fair values enable a company to mitigate the non-economic earnings volatility caused from financial assets and financial liabilities being carried at different bases of accounting, as well as to more accurately portray the active and dynamic management of a company's balance sheet. ASC 820 provides additional guidance for estimating fair value when the volume and level of activity for

Table of Contents

an asset or liability has significantly decreased. In addition, it includes guidance on identifying circumstances that indicate a transaction is not orderly. Under ASC 820, fair value measurements for items measured at fair value on a recurring and nonrecurring basis at March 31, 2013 and 2012 included:

(Dollars in thousands)	Fair Value Measurements	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
March 31, 2013				
Available for sale securities (3)	\$ 649,196	\$ 1,202	\$ 647,994	\$ 0
Loans available for sale (4)	24,206	0	24,206	0
Loans (1)	22,601	0	10,889	11,712
Other real estate owned (2)	10,850	0	3,389	7,461
March 31, 2012				
Available for sale securities (3)	\$ 574,615	\$ 1,718	\$ 572,897	\$ 0
Loans available for sale (4)	8,214	0	8,214	0
Loans (1)	33,108	0	11,714	21,394
Other real estate owned (2)	15,530	0	2,390	13,140

- (1) See Note F. Nonrecurring fair value adjustments to loans identified as impaired reflect full or partial write-downs that are based on the loan's observable market price or current appraised value of the collateral in accordance with ASC 310.
- (2) Fair value is measured on a nonrecurring basis in accordance with ASC 360.
- (3) See Note D for further detail of fair value of individual investment categories.
- (4) Recurring fair value basis determined using observable market data.

The fair value of impaired loans which are not troubled debt restructurings is based on recent real estate appraisals less estimated costs of sale. For residential real estate impaired loans, appraised values or internal evaluation are based on the comparative sales approach. These impaired loans are considered level 2 in the fair value hierarchy. For commercial and commercial real estate impaired loans, evaluations may use either a single valuation approach or a combination of approaches, such as comparative sales, cost and/or income approach. A significant unobservable input in the income approach is the estimated capitalization rate for a given piece of collateral. At March 31, 2013 the range of capitalization rates utilized to determine fair value of the underlying collateral averaged approximately 9%. Adjustments to comparable sales may be made by an appraiser to reflect local market conditions or other economic factors and may result in changes in the fair value of an asset over time. As such, the fair value of these impaired loans is considered level 3 in the fair value hierarchy.

Fair value of available for sale securities are determined using valuation techniques for individual investments as described in Note D.

Table of Contents

When appraisals are used to determine fair value and the appraisals are based on a market approach, the fair value of other real estate owned (OREO) is classified as a level 2 input. When the fair value of OREO is based on appraisals which require significant adjustments to market-based valuation inputs or apply an income approach based on unobservable cash flows, OREO is classified as Level 3 inputs.

Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with the Company's monthly and/or quarterly valuation process.

During the three months ended March 31, 2013, there were no transfers between level 1 and level 2 assets carried at fair value.

For loans classified as level 3 the transfers in totaled \$1.5 million for the first three months of 2013, consisting of loans that became impaired during 2013. Transfers out consisted of charge offs of \$0.4 million, foreclosures migrating to OREO and other reductions (including principal payments) totaling \$1.1 million. No sales were recorded.

Charge-offs recognized upon loan foreclosures are generally offset by general or specific allocations of the allowance for loan losses and generally do not, and did not during the reported periods, significantly impact the Company's provision for loan losses.

For OREO classified as level 3 during first three months of 2013, transfers out totaled \$1.0 million consisting of valuation write-downs of \$0.1 million and sales of \$0.9 million.

Table of Contents

The carrying amount and fair value of the Company's other significant financial instruments that are not measured at fair value on a recurring basis in the balance sheet as of March 31, 2013 and 2012 is as follows:

(Dollars in thousands)	Carrying Amount	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
At March 31, 2013				
Financial Assets				
Loans, net	\$ 1,179,669	\$ 0	\$ 0	\$ 1,200,845

Deposit liabilities	1,737,459	0	0	1,740,367
Borrowings	50,000	0	55,183	0
Subordinated debt	53,610	0	32,166	0

The short maturity of Seacoast's assets and liabilities results in having a significant number of financial instruments whose fair value equals or closely approximates carrying value. Such financial instruments are reported in the following balance sheet captions: cash and cash equivalents, interest bearing deposits with other banks, federal funds purchased and securities sold under agreement to repurchase, maturing within 30 days.

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate that value at March 31, 2013 and 2012:

Securities: U.S. Treasury securities are reported at fair value utilizing Level 1 inputs. Other securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

The Company reviews the prices supplied by the independent pricing service, as well as their underlying pricing methodologies, for reasonableness and to ensure such prices are aligned with traditional pricing matrices. In general, the Company does not purchase investment portfolio securities that are esoteric or that have a complicated structure. The Company's entire portfolio consists of traditional investments, nearly all of which are U.S. Treasury obligations,

Table of Contents

federal agency bullet or mortgage pass-through securities, or general obligation or revenue based municipal bonds. Pricing for such instruments is fairly generic and is easily obtained. From time to time, the Company will validate, on a sample basis, prices supplied by the independent pricing service by comparison to prices obtained from third-party sources or derived using internal models.

Loans: Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial, mortgage, etc. Each loan category is further segmented into fixed and adjustable rate interest terms and by performing and nonperforming categories. The fair value of loans, except residential mortgages, is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risks inherent in the loan. For residential mortgage loans, fair value is estimated by discounting contractual cash flows adjusting for prepayment assumptions using discount rates based on secondary market sources. The estimated fair value is not an exit price fair value under ASC 820 when this valuation technique is used.

Loans held for sale: Fair values are based upon estimated values to be received from independent third party purchasers.

Deposit Liabilities: The fair value of demand deposits, savings accounts and money market deposits is the amount payable at the reporting date. The fair value of fixed maturity certificates of deposit is estimated using the rates currently offered for funding of similar remaining maturities.

Borrowings: The fair value of floating rate borrowings is the amount payable on demand at the reporting date. The fair value of fixed rate borrowings is estimated using the rates currently offered for borrowings of similar remaining maturities.

Subordinated debt: The fair value of the floating rate subordinated debt is estimated using discounted cash flow analysis and estimates of the Company's current incremental borrowing rate for similar instruments.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FIRST QUARTER 2013

The following discussion and analysis is designed to provide a better understanding of the significant factors related to the Company's results of operations and financial condition. Such discussion and analysis should be read in conjunction with the Company's Condensed Consolidated Financial Statements and the related notes included in this report. For purposes of the following discussion, the words the Company, we, us, and our refer to the combined entities of Seacoast Banking Corporation of Florida and its direct and indirect wholly owned subsidiaries.

EARNINGS OVERVIEW

While recent years have been difficult for the U.S. economy and for the financial services industry, the Company has been proactively positioning its business for growth by focusing on improving credit quality, de-risking the overall loan portfolio, disposing of problem assets, increasing loan production and growing core deposits. Property values in our markets began to stabilize in 2012 and are anticipated to improve in 2013, and we expect lower credit costs and costs related to foreclosure activities prospectively. As consumer confidence improves and economic conditions are more robust we also expect improved new loan demand from credit worthy borrowers. We continue to believe our targeted plan to grow our customer and commercial franchise is the best way to build shareholder value going forward.

Our net interest income decreased \$642,000 during the first quarter of 2013 compared to the same period in 2012 and our net interest margin was 18 basis points lower, principally due to the Federal Reserve's quantitative easing programs negatively impacting the interest margin, but our ability to increase loan production and core deposits partially offset the lower spreads earned. Noninterest income (excluding securities gains) also increased in the first quarter of 2013, by \$994,000, a result of growth in key activities such as mortgage banking gains, and fees earned from increased households and deposit relationships and from wealth management services. These successes are a direct result of improved tactical execution and our improved condition supporting better growth for both consumer and commercial relationships.

During the last two quarters of 2012, management began implementing a combination of actions, including additional office consolidations, revenue enhancements, further acceleration of growth initiatives and a variety of cost-saving opportunities. A decision to accelerate problem loan liquidation activities during the last half of 2012 was part of this larger review initiated to support earnings growth in 2013 and we took this action in part to take advantage of improving market conditions. As anticipated, the Company is reporting better results for the first quarter of 2013. Net income for the three months ended March 31, 2013 of \$2,044,000, compared to net income of \$240,000 for the fourth quarter of 2012 and to \$938,000 for the first quarter of 2012. Net income available to common shareholders (after preferred dividends and accretion of preferred stock discount) for 2013 totals \$1,107,000 or \$0.01 per average common diluted share, compared to fourth quarter 2012's net loss of \$697,000 or \$0.01 per average common diluted share, and net income available to common shareholders of \$1,000 or \$0.00 per average common diluted share in last year's first quarter.

Table of Contents

Implementation of our plan to reduce core operating expenses by approximately \$4.9 million annually is currently on target for 2013. Approximately \$3.3 million of the annual reduction was implemented at year-end 2012 and fully impacted the first quarter of 2013. Core operating expenses, excluding losses on other real estate owned (OREO) and asset disposition costs, were \$1,122,000 lower for the first quarter of 2013 compared to a year ago. Noncore credit related expenses for the first quarter of 2013, primarily losses on OREO and asset disposition costs, were \$1.6 million lower and in line with our predicted decline of approximately \$2.8 million for the total year 2013. For 2012, noncore credit related costs peaked in the first quarter of 2012, and declined in each subsequent quarter during 2012. In addition, the Company's loan loss provisioning was lower by \$1.4 million for 2013, when compared to 2012's first quarter.

Prospectively, two of five new loan production offices in the Orlando and Palm Beach markets opened late in the first quarter of 2013 and three remaining openings are planned to open prior to the fourth quarter of 2013. These locations are expected to support an acceleration of our loan production in 2013, and have been offset by reductions to expense from the consolidation of four full service banking offices, with those closings completed in December 2012 and January 2013. We anticipate the additional investments in locations will increase our lending capacity in our commercial and business banking lines and expand growth initiatives related to our mortgage business. The Company has committed approximately \$1.9 million for property and equipment to be depreciated over useful lives ranging from 5 to 10 years.

The Company's capital is expected to continue to increase with positive earnings. The board and management continue to review the Company's potential capital management options and currently believe that the Company's overall level of capital is sufficient. As earnings and asset quality continue to improve, we believe that more financing options will emerge for the Company when dividends can be prudently paid to the Company by its subsidiary Bank. The Company has no immediate plans to repay the Series A Preferred stock of \$50 million that was sold at auction by the U.S. Treasury to investors on April 3, 2012, ending the Company's participation in the Treasury's Troubled Asset Relief Program (TARP) Capital Purchase Program (CPP). At this time, we continue to view this capital as an important component of our capital structure.

CRITICAL ACCOUNTING ESTIMATES

The preparation of consolidated financial statements requires management to make judgments in the application of certain of its accounting policies that involve significant estimates and assumptions. These estimates and assumptions, which may materially affect the reported amounts of certain assets, liabilities, revenues and expenses, are based on information available as of the date of the financial statements, and changes in this information over time and the use of revised estimates and assumptions could materially affect amounts reported in subsequent financial statements. Management, after consultation with the Company's Audit Committee, believes the most critical accounting estimates and assumptions that involve the most difficult, subjective and complex assessments are:

the allowance and the provision for loan losses;

fair value measurements;

other than temporary impairment of securities;

realization of deferred tax assets; and

contingent liabilities.

Table of Contents

The following is a discussion of the critical accounting policies intended to facilitate a reader's understanding of the judgments, estimates and assumptions underlying these accounting policies and the possible or likely events or uncertainties known to us that could have a material effect on our reported financial information.

Allowance and Provision for Loan Losses

The information contained on pages 36-37 and 43-53 related to the Provision for Loan Losses, Loan Portfolio, Allowance for Loan Losses and Nonperforming Assets is intended to describe the known trends, events and uncertainties which could materially affect the Company's accounting estimates related to our allowance for loan losses.

Fair Value Measurements

All impaired loans are reviewed quarterly to determine if fair value adjustments are necessary based on known changes in the market and/or the project assumptions. When necessary, the As Is appraised value may be adjusted based on more recent appraisal assumptions received by the Company on other similar properties, the tax assessed market value, comparative sales and/or an internal valuation. If an updated assessment is deemed necessary and an internal valuation cannot be made, an external As Is appraisal will be obtained. If the As Is appraisal does not appropriately reflect the current fair market value, in the Company's opinion, a specific reserve is established and/or the loan is written down to the current fair market value.

Collateral dependent impaired loans are loans that are solely dependent on the liquidation of the collateral for repayment. All OREO and repossessed assets (REPO) are reviewed quarterly to determine if fair value adjustments are necessary based on known changes in the market and/or project assumptions. When necessary, the As Is appraisal is adjusted based on more recent appraisal assumptions received by the Company on other similar properties, the tax assessment market value, comparative sales and/or an internal valuation is performed. If an updated assessment is deemed necessary, and an internal valuation cannot be made, an external appraisal will be requested. Upon receipt of the As Is appraisal a charge-off is recognized for the difference between the loan amount and its current fair market value.

As Is values are used to measure fair market value on impaired loans, OREO and REPOs.

At March 31, 2013, outstanding securities designated as available for sale totaled \$649,196,000. The fair value of the available for sale portfolio at March 31, 2013 was more than historical amortized cost, producing net unrealized gains of \$4,584,000 that have been included in other comprehensive income as a component of shareholders' equity (net of taxes). The Company made no change to the valuation techniques used to determine the fair values of securities during 2013. The fair value of each security available for sale was obtained from independent pricing sources utilized by many financial institutions. The fair value of many state and municipal securities are not readily available through market sources, so fair value estimates are based on quoted market price or prices of similar instruments. Generally, the Company obtains one price for each security. However, actual values can only be determined in an arms-length transaction between a willing buyer and seller that can, and often do, vary from these reported values. Furthermore, significant changes in recorded values due to changes in actual and perceived economic conditions can occur rapidly, producing greater unrealized losses or gains in the available for sale portfolio.

Table of Contents

The credit quality of the Company's securities holdings are primarily investment grade. As of March 31, 2013, the Company's available for sale investment securities, except for approximately \$7.9 million of securities issued by states and their political subdivisions, generally are traded in liquid markets. U.S. Treasury and U.S. Government agency obligations totaled \$546.5 million, or 84.2 percent of the total available for sale portfolio. The remainder of the portfolio consists of private label securities, most secured by collateral originated in 2005 or prior years with low loan to values, and current FICO scores above 700. Generally these securities have credit support exceeding 5%. The collateral underlying these mortgage investments are primarily 30- and 15-year fixed rate, and adjustable rate mortgage loans. Historically, the mortgage loans serving as collateral for those investments have had minimal foreclosures and losses.

Other Than Temporary Impairment of Securities

Our investments are reviewed quarterly for other than temporary impairment (OTTI). The following primary factors are considered for securities identified for OTTI testing: percent decline in fair value, rating downgrades, subordination, duration, amortized loan-to-value, and the ability of the issuers to pay all amounts due in accordance with the contractual terms. Prices obtained from pricing services are usually not adjusted. Based on our internal review procedures and the fair values provided by the pricing services, we believe that the fair values provided by the pricing services are consistent with the principles of ASC 820, Fair Value Measurement. However, on occasion pricing provided by the pricing services may not be consistent with other observed prices in the market for similar securities. Using observable market factors, including interest rate and yield curves, volatilities, prepayment speeds, loss severities and default rates, the Company may at times validate the observed prices using a discounted cash flow model and using the observed prices for similar securities to determine the fair value of its securities.

Changes in the fair values, as a result of deteriorating economic conditions and credit spread changes, should only be temporary. Further, management believes that the Company's other sources of liquidity, as well as the cash flow from principal and interest payments from its securities portfolio, reduces the risk that losses would be realized as a result of a need to sell securities to obtain liquidity.

The Company also held stock in the Federal Home Loan Bank of Atlanta (FHLB) totaling \$4.9 million as of March 31, 2013, \$0.7 million less than year-end 2012's balance. The Company accounts for its FHLB stock based on the industry guidance in ASC 942, Financial Services Depository and Lending, which requires the investment to be carried at cost and evaluated for impairment based on the ultimate recoverability of the par value. We evaluated our holdings in FHLB stock at March 31, 2013 and believe our holdings in the stock are ultimately recoverable at par. We do not have operational or liquidity needs that would require redemption of the FHLB stock in the foreseeable future and, therefore, have determined that the stock is not other-than-temporarily impaired.

Realization of Deferred Tax Assets

At March 31, 2013, the Company had net deferred tax assets (DTA) of \$18.2 million. Although realization is not assured, management believes that realization of the carrying value of the DTA is more likely than not, based upon expectations as to future taxable income and tax planning strategies, as defined by ASC 740 Income Taxes. In comparison, at March 31, 2012 the Company had net DTAs of \$16.6 million.

Table of Contents

As a result of the losses incurred in 2010 and 2012, the Company has a three-year cumulative pretax loss. The total three-year cumulative pretax loss at March 31, 2013 is \$21.3 million and declines to \$10.4 million at June 30, 2013 and to \$1.8 million at September 30, 2013 assuming no further pretax earnings for the second and third quarters. The Company has recorded deferred tax valuation allowances of \$44.0 million, primarily related to its net operating loss (NOL) carryforwards at March 31, 2013. Should the economy continue to show improvement and the Company's earnings continue to improve as a result of lower credit costs and increasing revenues as is forecasted for 2013, increased reliance on management's forecast of future taxable earnings could result in realization of additional future tax benefits from the net operating loss carryforwards. We believe our future taxable income will ultimately allow for the recovery of the NOL, resulting in the recovery of our DTA valuation allowance.

Contingent Liabilities

The Company is subject to contingent liabilities, including judicial, regulatory and arbitration proceedings, and tax and other claims arising from the conduct of our business activities. These proceedings include actions brought against the Company and/or our subsidiaries with respect to transactions in which the Company and/or our subsidiaries acted as a lender, a financial advisor, a broker or acted in a related activity. Accruals are established for legal and other claims when it becomes probable that the Company will incur an expense and the amount can be reasonably estimated. Company management, together with attorneys, consultants and other professionals, assesses the probability and estimated amounts involved in a contingency. Throughout the life of a contingency, the Company or our advisors may learn of additional information that can affect our assessments about probability or about the estimates of amounts involved. Changes in these assessments can lead to changes in recorded reserves. In addition, the actual costs of resolving these claims may be substantially higher or lower than the amounts reserved for the claims. At March 31, 2013 and 2012, the Company had no significant accruals for contingent liabilities and had no known pending matters that could potentially be significant.

RESULTS OF OPERATIONS**NET INTEREST INCOME**

Net interest income (on a fully taxable equivalent basis) for the first quarter of 2013 totaled \$16,055,000, decreasing from 2012's fourth quarter by \$199,000 or 1.2 percent, and lower than first quarter 2012's result by \$634,000 or 3.8 percent. The first quarter had two fewer days than the fourth quarter and explains the decline of \$199,000. Lower asset yields as a result of the Federal Reserve's actions to lower interest rates and the restructuring of the investment portfolio to lower pricing risks in 2012, reduced first quarter 2013's net interest income, year over year. The following table details net interest income and margin results (on a tax equivalent basis) for the past five quarters:

(Dollars in thousands)	Net Interest Income (tax equivalent)	Net Interest Margin (tax equivalent)
First quarter 2012	\$ 16,689	3.33%
Second quarter 2012	16,052	3.17
Third quarter 2012	15,995	3.17
Fourth quarter 2012	16,254	3.22
First quarter 2013	16,055	3.15

Table of Contents

Fully taxable equivalent net interest income is a common term and measure used in the banking industry but is not a term used under generally accepted accounting principles (GAAP). We believe that these presentations of tax-equivalent net interest income and tax equivalent net interest margin aid in the comparability of net interest income arising from both taxable and tax-exempt sources over the periods presented. We further believe these non-GAAP measures enhance investors' understanding of the Company's business and performance, and facilitate an understanding of performance trends and comparisons with the performance of other financial institutions. The limitations associated with these measures are the risk that persons might disagree as to the appropriateness of items comprising these measures and that different companies might calculate these measures differently, including as a result of using different assumed tax rates. These disclosures should not be considered an alternative to GAAP.

	First Quarter 2013	Fourth Quarter 2012	Third Quarter 2012	Second Quarter 2012	First Quarter 2012
(Dollars in thousands)					
Non-taxable interest income	\$ 105	\$ 87	\$ 82	\$ 85	\$ 92
Tax Rate	35%	35%	35%	35%	35%
Net interest income (TE)	\$ 16,055	\$ 16,254	\$ 15,995	\$ 16,052	\$ 16,689
Total net interest income (not TE)	16,000	16,208	15,952	16,007	16,642
Net interest margin (TE)	3.15%	3.22%	3.17%	3.17%	3.33%
Net interest margin (not TE)	3.14	3.21	3.16	3.16	3.32

The level of nonaccrual loans, changes in the earning assets mix, and the Federal Reserve's policies lowering interest rates have been primary forces affecting net interest income and net interest margin results.

The earning asset mix changed year over year impacting net interest income. For the first quarter of 2013, average loans (the highest yielding component of earning assets) as a percentage of average earning assets totaled 60.3 percent, compared to 60.2 percent a year ago. Average securities as a percentage of average earning assets increased from 30.9 percent a year ago to 31.3 percent during the first quarter of 2013 and interest bearing deposits and other investments decreased to 8.4 percent in 2013 from 8.9 percent in 2012. While average total loans as a percentage of earning assets was generally unchanged, the mix of loans changed, with volumes related to commercial real estate representing 41.2 percent of total loans at March 31, 2013 (compared to 43.5 percent at March 31, 2012). Lower yielding residential loan balances with individuals (including home equity loans and lines, and personal construction loans) represented 50.0 percent of total loans at March 31, 2013 (versus 47.9 percent at March 31, 2012) (see Loan Portfolio).

Table of Contents

The yield on earning assets for the first quarter of 2013 was 3.43 percent, 44 basis points lower than 2012's first quarter, a reflection of the lower interest rate environment and earning asset mix. The following table details the yield on earning assets (on a tax equivalent basis) for the past five quarters:

	First Quarter 2013	Fourth Quarter 2012	Third Quarter 2012	Second Quarter 2012	First Quarter 2012
Yield	3.43%	3.53%	3.54%	3.63%	3.87%

The yield on loans decreased 34 basis points to 4.57 percent over the last twelve months with nonaccrual loans totaling \$35.2 million or 2.9 percent of total loans at March 31, 2013 (versus \$41.7 million or 3.4 percent of total loans at March 31, 2012). The yield on investment securities was lower, decreasing 83 basis points year over year to 1.98 percent for the first quarter of 2013, due to securities sold during the first six months of 2012 to reduce interest rate risk and reinvestment at lower yields and lower add-on rates as the result of Fed actions during the last half of 2012. The yield on interest bearing deposits and other investments was slightly higher at 0.54 percent for first quarter 2013, up 5 basis points compared to a year earlier.

Average earning assets for the first quarter of 2013 increased \$52.0 million or 2.6 percent compared to 2012's first quarter balance. Average loan balances for 2013 increased \$33.9 million or 2.8 percent to \$1,247.7 million, average investment securities increased \$25.0 million or 4.0 percent to \$647.9 million, and average interest bearing deposits and other investments decreased \$6.8 million or 3.8 percent to \$172.5 million.

Commercial and commercial real estate loan production for the first three months of 2013 totaled approximately \$37 million, compared to production for all of 2012 and 2011 of \$109 million and \$63 million, respectively. Improvements in commercial production resulted from a focused program to target small business segments less impacted by the lingering effects of the recession. Our strategy has been to focus on hiring commercial lenders for the larger metropolitan markets in which the Company competes, principally Orlando and Palm Beach. While commercial production improved and period-end total loans outstanding have increased by \$7.4 million or 0.6 percent since March 31, 2012, we expect a more significant growth from new commercial lender pipelines and loan closings as the year 2013 progresses. At March 31, 2013 the Company's total commercial and commercial real estate loan pipeline was \$64 million, versus \$27 million at December 31, 2012. The Company has expanded its residential mortgage loan originations and seeks to expand loans to small businesses in 2013. Opportunities to lend to consumers and business have been market share driven.

Closed residential mortgage loan production for the first quarter of 2013 totaled \$56 million, of which \$33 million was sold servicing-released. In comparison, closed residential mortgage loan production for the first, second, third and fourth quarters of 2012 totaled \$48 million, \$66 million, \$63 million and \$72 million, respectively, of which \$20 million, \$26 million, \$34 million and \$39 million was sold servicing-released. Applications for residential mortgages totaled \$105 million during the first quarter of 2013, compared to \$387 million for all of 2012. Much of our loan production has been focused on residential home mortgages, which has

Table of Contents

continued to show signs of strengthening here in our markets and across Florida. Existing home sales and home mortgage loan refinancing activity in the Company's markets have increased, but demand for new home construction is expected to slowly improve. Inventory levels for existing homes in many markets is now at a three- or four-month supply, some of the lowest levels the Company has seen since pre-recession.

During the first quarter of 2013, proceeds from the sales of securities totaled \$11.8 million (including net gains of \$25,000). In comparison, proceeds from the sales of securities totaled \$111.7 million for the first quarter of 2012 (including net gains of \$3,374,000). Management believed the securities sold had minimal opportunity to further increase in value. Securities purchases in 2013 and 2012 have been conducted principally to reinvest funds from maturities and principal repayments, as well as to reinvest excess funds (in an interest bearing deposit) at the Federal Reserve Bank, and the proceeds from sales. During the first quarter of 2013, maturities (principally pay-downs of \$45.1 million) totaled \$45.2 million and securities portfolio purchases totaled \$50.3 million. In comparison, first quarter 2012 maturities totaled \$30.3 million and securities portfolio purchases totaled \$61.3 million.

The cost of average interest-bearing liabilities in the first quarter of 2013 decreased 4 basis points to 0.38 percent from fourth quarter 2012 and was 30 basis points lower than for the first quarter of 2012, reflecting the lower interest rate environment and improved deposit mix. The following table details the cost of average interest bearing liabilities for the past five quarters:

	First Quarter 2013	Fourth Quarter 2012	Third Quarter 2012	Second Quarter 2012	First Quarter 2012
Rate	0.38%	0.42%	0.49%	0.59%	0.68%

During the first quarter of 2013, the Company's retail core deposit focus has continued to produce strong growth in core deposit customer relationships. The improved deposit mix and lower rates paid on interest bearing deposits during 2013 (and last several quarters) reduced the overall cost of total deposits to 0.17 percent for the first quarter of 2013, 29 basis points lower than the same quarter a year ago. A significant component favorably affecting the Company's net interest margin, the average balances of lower cost interest bearing deposits (NOW, savings and money market) totaled 76.0 percent of total average interest bearing deposits for the first quarter of 2013, an improvement compared to the average of 67.0 percent a year ago. The average rate for lower cost interest bearing deposits for 2013 was 0.09 percent, down by 11 basis points from 2012's first quarter rate. Certificate of deposit (CD) rates paid were also lower for the first quarter of 2013, averaging 0.69 percent, a 67 basis point decrease compared to the first quarter a year ago. Average CDs (the highest cost component of interest bearing deposits) were 24.0 percent of interest bearing deposits for the first quarter of 2013, compared to 33.0 percent for 2012, with ending balances down to 23.5 percent for CDs as of March 31, 2013. Prospectively, with interest rates predicted to remain low through 2013, reductions in interest bearing deposit costs will be more challenging to produce due to more limited re-pricing opportunities.

Average deposits totaled \$1,733.0 million during the first quarter of 2013, and were \$33.5 million higher compared to first quarter 2012, even with a planned reduction of time deposits occurring. Average aggregate amounts for NOW, savings and money market balances increased

Table of Contents

\$86.7 million or 9.6 percent to \$987.3 million for 2013 compared to the first quarter of 2012, average noninterest bearing deposits increased \$78.4 million or 22.1 percent to \$433.8 million for 2013 compared to 2012, and average CDs decreased by \$131.6 million or 29.7 percent to \$311.9 million over the same period. With the low interest rate environment and lower CD rate offerings available, customers have been more complacent and are leaving more funds in lower cost average balances in savings and other liquid deposit products that pay no interest or a lower interest rate.

Average short-term borrowings have been principally comprised of sweep repurchase agreements with customers of Seacoast National, which increased \$13.2 million to \$160.6 million or 8.9 percent for the first quarter of 2013 as compared to 2012 for the same period. With balances typically peaking during the fourth and first quarters each year, public fund clients with larger balances have the most significant influence on average sweep repurchase agreement balances outstanding during the year. Other borrowings are comprised of subordinated debt of \$53.6 million related to trust preferred securities issued by trusts organized by the Company, and advances from the FHLB of \$50.0 million. No changes have occurred to other borrowings since year-end 2009.

Prospectively, we expect our net interest margin to grow as our lending initiatives produce improved results and our problem loan liquidation activities are concluded. We are positioned for stronger earnings performance with a more typical yield curve and as excess liquidity is deployed into higher earning assets. The focus the last three plus years on achieving increased household growth year over year should produce future organic revenue growth, as the long term value of core household relationships are revealed, as more products are sold and fees earned, and as normalized interest rates return as the economy improves.

PROVISION FOR LOAN LOSSES

Management determines the provision for loan losses charged to operations by continually analyzing and monitoring delinquencies, nonperforming loans and the level of outstanding balances for each loan category, as well as the amount of net charge-offs, and by estimating losses inherent in its portfolio. While the Company's policies and procedures used to estimate the provision for loan losses charged to operations are considered adequate by management, factors beyond the control of the Company, such as general economic conditions, both locally and nationally, make management's judgment as to the adequacy of the provision and allowance for loan losses necessarily approximate and imprecise (see Nonperforming Assets and Allowance for Loan Losses).

The provision for loan losses is the result of a detailed analysis estimating an appropriate and adequate allowance for loan losses. The analysis includes the evaluation of impaired loans as prescribed under FASB Accounting Standards Codification (ASC) 310, Receivables as well as, an analysis of homogeneous loan pools not individually evaluated as prescribed under ASC 450, Contingencies. For the first quarter of 2013 we recorded a provision for loan losses of \$1.0 million, which compared to provisioning in the first, second, third and fourth quarters of 2012 of \$2.3 million, \$6.5 million, \$0.9 million and \$1.1 million, respectively. Net charge-offs for the first quarter of 2013 of \$1.5 million compared to net charge-offs of \$3.4 million, \$6.3 million, \$2.4 million, and \$2.2 million in the first, second, third and fourth quarters of 2012, respectively. Net charge-offs represented 0.49 percent of average total loans for the first three months of 2013, versus 1.16 percent of average total loans for all of 2012. Delinquency trends remain low and show continued stability (see Nonperforming Assets).

Table of Contents

Note F to the financial statements (titled "Impaired Loans and Valuation Allowance for Loan Losses") provides certain information concerning the Company's allowance and provisioning for loan losses.

NONINTEREST INCOME

Noninterest income, excluding securities gains or losses, totaled \$5,931,000 for the first quarter of 2013, \$994,000 or 20.1 percent higher than 2012's first quarter and \$322,000 or 5.7 percent above the fourth quarter 2012. Noninterest income accounted for 27.0 percent of total revenue (net interest income plus noninterest income, excluding securities gains or losses) during the first quarter of 2013, compared to 22.9 percent a year ago.

Noninterest income for the first quarter of 2013, and the fourth and first quarters of 2012, is detailed as follows:

	First Quarter 2013	Fourth Quarter 2012	First Quarter 2012
(Dollars in thousands)			
Service charges on deposits	\$ 1,551	\$ 1,677	\$ 1,461
Trust income	676	592	573
Mortgage banking fees	1,114	1,030	623
Brokerage commissions and fees	425	292	234
Marine finance fees	272	258	330
Interchange income	1,264	1,157	1,071
Other deposit-based EFT fees	98	83	99
Other income	531	520	546
Total	\$ 5,931	\$ 5,609	\$ 4,937

For the first quarter of 2013, revenues from the Company's wealth management services businesses (trust and brokerage) increased by \$294,000 or 36.4 percent year over year versus first quarter 2012, and were higher compared to the fourth quarter 2012 by \$217,000 or 24.5 percent. Included in the \$294,000 increase from a year ago, trust revenue was higher by \$103,000 or 18.0 percent and brokerage commissions and fees increased by \$191,000 or 81.6 percent. Economic uncertainty is the primary issue affecting clients of the Company's wealth management services. Higher *inter vivos* and estate fees were the primary cause for the higher trust income versus first quarter 2012, as these fees increased \$48,000 and \$46,000, respectively. The \$191,000 overall growth in brokerage commissions and fees for 2013 included increases of \$166,000 in annuity income and \$18,000 in aggregate brokerage and mutual fund commissions.

Service charges on deposits for the first quarter of 2013 were \$90,000 or 6.2 percent higher year over year versus 2012's result, and were \$126,000 or 7.5 percent lower when compared to fourth quarter 2012. Overdraft fees increased \$9,000 or 0.9 percent year over year and represented approximately 69 percent of total service charges on deposits for the first quarter 2013, slightly lower than the average of 74 percent for all of 2012. The regulators continue to review the banking industry's practices around overdraft programs and additional regulation could further reduce fee income for the Company's overdraft services. Remaining service charges on deposits increased \$81,000 or 20.3 percent to \$480,000 for first quarter 2013, compared to the first quarter a year ago. Service charge income in 2013 reflects our growing base of core deposit relationships over the past twelve months, and our emphasis to provide products meeting the needs of each customer that generate appropriate fees for the services offered.

Table of Contents

For the first quarter of 2013, fees from the non-recourse sale of marine loans totaled \$272,000, a decrease of \$58,000 or 17.6 percent compared to first quarter 2012, and slightly higher than fourth quarter 2012's result, by \$14,000 or 5.4 percent. The Seacoast Marine Division originated \$15 million in loans during the first quarter of 2013, of which 100 percent was sold. Production levels have been significantly lower since the end of 2008 and are reflective of the general economic downturn. Lower attendance at boat shows by consumers, manufacturers, and marine retailers over the past several years has resulted in lower marine sales and loan volumes. The Seacoast Marine Division is headquartered in Ft. Lauderdale, Florida with lending professionals in Florida, California, Washington and Oregon.

Greater usage of check or debit cards over the past several years by core deposit customers and an increased cardholder base has increased our interchange income. For the first quarter of 2013, interchange income increased \$193,000 or 18.0 percent compared to first quarter 2012, and was \$107,000 or 9.2 percent higher than the fourth quarter 2012's income. Other deposit-based electronic funds transfer (EFT) income was nominally lower (by \$1,000) versus a year ago and increased by \$15,000 or 18.1 percent from the fourth quarter of 2012. Interchange revenue is dependent upon business volumes transacted, as well as the fees permitted by VISA® and MasterCard®. The Dodd-Frank Act regulation is not expected to impact this source of fee revenue for Seacoast National materially, but has significantly reduced fees collected by larger financial institutions.

The Company originates residential mortgage loans in its markets, with loans processed by commissioned employees of Seacoast National. Many of these mortgage loans are referred by the Company's branch personnel. Mortgage banking fees in the first quarter of 2013 increased \$491,000 or 78.8 percent from 2012's first quarter result, and were \$84,000 or 8.2 percent higher than income for the fourth quarter of 2012. Mortgage banking revenue as a component of overall noninterest income was 18.8 percent for 2013, compared to 17.3 percent for all of 2012. Mortgage revenues are dependent upon favorable interest rates, as well as good overall economic conditions, including the volume of home sales. Residential real estate sales and activity in our markets improved during 2012 and carried over into 2013, with transactions increasing, prices firming and affordability improving. The Company was the number one originator of home purchase mortgages in Martin, St. Lucie and Indian River counties during 2012 and the first month of 2013, based on the data available to date. The Company has only had to repurchase or settle on 9 sold mortgage loans ever and believes that its processes and controls make it unlikely that it will have any material exposure in the future.

NONINTEREST EXPENSES

The Company's overhead ratio was in the low to mid 60's in years prior to the recession. Lower earnings and cyclical credit costs in 2012, 2011 and 2010 resulted in this ratio increasing to 94.6 percent, 90.1 percent, and 104.6 percent, respectively. For the first three months of 2013, the overhead ratio was 85.6 percent and total noninterest expenses were \$2,751,000 or 12.7 percent lower versus the first quarter a year ago, totaling \$18,959,000. When compared to the fourth quarter of 2012, total noninterest expenses for 2013 decreased by \$826,000 or 4.2 percent.

Table of Contents

During the third quarter of 2012 management's organizational structure was streamlined and the Company announced the consolidation of four offices, resulting in severance and other organizational costs of \$839,000 and branch consolidation costs of \$232,000 impacting overhead for the third quarter of 2012. An additional \$491,000 in organizational and branch consolidation costs impacted the fourth quarter of 2012. Through these decisions and other cost reduction measures expected to take effect in 2013, and our tactical plans to increase loan production this year, we anticipate improved earnings for 2013.

Salaries and wages totaling \$7,470,000 were \$415,000 or 5.9 percent higher for the first quarter of 2013 compared to first quarter 2012, and were \$128,000 or 1.8 percent higher than fourth quarter 2012. Compared to the first quarter of 2012, commission payments for 2013 related to revenues generated from wealth management and lending production increased \$180,000 or 41.3 percent. More than offsetting were lower incentive payments of \$225,000 or 41.9 percent, with long-term stock incentives comprising \$126,000 of this decrease. Base salaries were higher for the first quarter of 2013 by \$567,000 or 9.0 percent, reflecting additional commercial relationship managers and credit support personnel hired during the past twelve months and staff added to the compliance and risk management departments. With lending production improving, an additional \$144,000 was deferred from salaries for loans closed during the first quarter of 2013 versus a year ago. Totalling only \$33,000, severance payments for positions eliminated during the first quarter of 2013 were much lower than during the last couple quarters of 2012 when organizational changes were occurring. No executive cash incentive compensation has been paid in 2013 or 2012.

In the first quarter of 2013, employee benefits costs increased by \$213,000 or 10.6 percent to \$2,223,000 from a year ago, and were \$363,000 or 19.5 percent higher when compared to fourth quarter 2012. Matching 401K contributions associated with employee salary deferrals have been limited over the last few years, but were \$49,000 higher during the first quarter of 2013 compared to the first quarter of 2012. Higher costs of \$113,000 for our self-funded health care plan were recorded as well compared to first quarter a year ago, due to higher claims and utilization. With the expiration of the 2 percent temporary reduction in social security tax (FICA) as of January 1, 2013, payroll taxes increased \$54,000 in the first quarter of 2013 versus first quarter 2012. The Company has met with its self-funded plan provider and discussed possible impacts of U.S. Health Care Reform and determined that costs are expected to increase 2.0 to 3.5 percent in 2014 related to implementation of new coverage.

Outsourced data processing costs totaled \$1,498,000 for the first quarter of 2013, a decrease of \$223,000 or 13.0 percent from a year ago and \$406,000 or 21.3 percent from the fourth quarter of 2012. Seacoast National utilizes third parties for its core data processing systems. Outsourced data processing costs are directly related to the number of transactions processed. A decrease in core data processing costs of \$188,000 during the first quarter of 2013 was the primary cause for the decrease in total data processing costs versus 2012's first quarter costs. The Company's contract with its existing core data processor was renegotiated as of January 1, 2013 for a term of 5 1/2 years, with costs negotiated lower and with annual savings expected for 2013. In addition, interchange processing costs and other electronic funds transfer related costs (aggregated) were \$61,000 lower for the first quarter of 2013, versus a year ago. Partially offsetting, software licensing and maintenance were higher year over year, increasing by \$11,000 and \$15,000, respectively. We are anticipating improvements and enhancements to be related to mobile remote deposit captures, and other digital products and services through our core data processor during 2013 and 2014, which will increase our outsourced data processing costs.

Table of Contents

Telephone and data line expenditures, including electronic communications with customers and between branch locations and personnel, as well as third party data processors, decreased nominally to \$285,000 for the first quarter of 2013 when compared to first quarter 2012. Improved systems and monitoring of services utilized, including placing limits for cell phone reimbursements, as well as reducing the number telephone lines has reduced our communication costs, and these costs should continue to be lower prospectively.

Total occupancy, furniture and equipment expenses for the first quarter of 2013 decreased \$61,000 or 2.6 percent year over year versus 2012's first quarter to \$2,316,000. Expenses for first quarter 2013 were \$572,000 lower compared to the fourth quarter of 2012, due to branch consolidation costs of \$407,000 recorded during the fourth quarter of 2012. The branch consolidations will favorably impact expense prospectively, but are anticipated to be partially offset by the opening of five new loan production offices in the second and third quarter of 2013 in the Orlando and Palm Beach markets.

For the first quarter of 2013, marketing expenses, including sales promotion costs, ad agency production and printing costs, newspaper and radio advertising, and other public relations costs associated with the Company's efforts to market products and services, decreased by \$477,000 or 51.5 percent to \$449,000, when compared to the first quarter of 2012. In addition, marketing expenses were lower by \$258,000 or 36.5 percent when compared to the fourth quarter of 2012. Marketing expenses reflect a focused campaign in our markets targeting the customers of competing financial institutions and promoting our brand. Direct mail activities, donations (and sponsorships), sales promotions, and aggregate media costs for television and newspaper advertising have been lower during the first quarter of 2013 versus a year ago, decreasing \$136,000, \$82,000, \$44,000, and \$206,000, respectively. Production and printing costs were limited as well during 2013, decreasing \$18,000 and \$48,000 from the first quarter a year ago. Partially offsetting, costs initiated in 2012 to promote lending in Orlando and Palm Beach under our new Accelerate brand were incremental, and summed to \$35,000 for 2013.

Legal and professional fees continue to trend lower, decreasing by \$980,000 or 55.2 percent from a first quarter a year ago to \$796,000 for the first quarter of 2013, and by \$318,000 or 28.5 percent compared to the fourth quarter of 2012. Included in legal fees for the first quarter of 2012 were fees of approximately \$235,000 for the U.S. Treasury's sale of its investment in Series A Preferred Stock, auctioned and concluded on April 3, 2012. Partially offsetting were higher CPA fees of \$92,000 for the first quarter of 2013, reflecting amounts for outsourcing of most internal audit activities which the Company had not fully transitioned to until late in the first quarter of 2012. Prospectively, legal fees can be expected to continue to be lower as problem assets continue to decline.

The FDIC assessment for the first quarter of 2013 totaled \$717,000, compared to first, second, third and fourth quarter 2012's assessments of \$706,000, \$707,000, \$695,000 and \$697,000, respectively, respectively. On July 30, 2013, Seacoast National expects to receive a refund of premiums prepaid at the end of 2009 (less premiums calculated and paid since year end 2009, and minus the March 31 and June 30, 2013 insurance premiums). At March 31, 2013, the prepaid amount for FDIC insurance summed to \$3.9 million. Although the severity of bank failures and their impact on the FDIC's Deposit Insurance Fund have been less than predicted, Seacoast National remains exposed to possible higher FDIC insurance costs.

Net losses on other real estate owned (OREO) and repossessed assets, and asset disposition expenses associated with the management of OREO and repossessed assets (aggregated) totaled

Table of Contents

\$857,000 for the first quarter of 2013. In comparison, these costs totaled \$2,486,000, \$1,158,000, \$925,000 and \$357,000 for the first, second, third and fourth quarters of 2012, respectively. These costs moderated in 2011 and declined further in 2012. OREO balances have declined by 30.1 percent since March 31, 2012, and total \$10.9 million at March 31, 2013. Of the \$857,000 total for 2013, asset disposition costs summed to \$290,000 and losses on OREO and repossessed assets totaled \$567,000. The Company expects these costs to be lower during the remainder of 2013 as property values are improving.

Other noninterest expenses decreased slightly (by \$16,000) to \$2,348,000 for the first quarter of 2013 when compared to 2012's first quarter expenses, and were \$275,000 or 10.5 percent lower when compared to fourth quarter 2012. More significant changes for 2013 year over year from first quarter 2012 included bank meeting costs (up \$106,000) and director meeting fees (up \$84,000), partially offset by a lower check printing costs (down \$46,000) and losses related to robberies, fraud, etc. (down \$127,000).

CAPITAL RESOURCES

The Company's equity capital at March 31, 2013 totaled \$166.7 million and the ratio of shareholders' equity to period end total assets was 7.57 percent, compared with 7.88 percent at March 31, 2012, and 7.62 percent at December 31, 2012. Seacoast's management uses certain non-GAAP financial measures in its analysis of the Company's capital adequacy. Seacoast's management uses this measure to assess the quality of capital and believes that investors may find it useful in their analysis of the Company. This capital measure is not necessarily comparable to similar capital measures that may be presented by other companies.

The Company's capital position remains strong, meeting the general definition of well capitalized, with a total risk-based capital ratio of 18.26 percent at March 31, 2013, slightly lower than March 31, 2012's ratio of 18.62 percent and slightly higher than 18.33 percent at December 31, 2012. The Bank is currently in compliance with its formal agreement with the OCC as to minimum capital ratios. (See Note H)

The Company and Seacoast National are subject to various general regulatory policies and requirements relating to the payment of dividends, including requirements to maintain adequate capital above regulatory minimums. The appropriate federal bank regulatory authority may prohibit the payment of dividends where it has determined that the payment of dividends would be an unsafe or unsound practice. The Company is a legal entity separate and distinct from Seacoast National and its other subsidiaries, and the Company's primary source of cash and liquidity, other than securities offerings and borrowings, is dividends from its bank subsidiary. Prior OCC approval presently is required for any payments of dividends from Seacoast National to the Company.

The OCC and the Federal Reserve have policies that encourage banks and bank holding companies to pay dividends from current earnings, and have the general authority to limit the dividends paid by national banks and bank holding companies, respectively, if such payment may be deemed to constitute an unsafe or unsound practice. If, in the particular circumstances, either of these federal regulators determined that the payment of dividends would constitute an unsafe or unsound banking practice, either the OCC or the Federal Reserve may, among other things, issue a cease and desist order prohibiting the payment of dividends by Seacoast National or us, respectively. Under a recently adopted Federal Reserve policy, the board of directors of a

Table of Contents

bank holding company must consider different factors to ensure that its dividend level is prudent relative to the organization's financial position and is not based on overly optimistic earnings scenarios such as any potential events that may occur before the payment date that could affect its ability to pay, while still maintaining a strong financial position. As a general matter, the Federal Reserve has indicated that the board of directors of a bank holding company, such as Seacoast, should consult with the Federal Reserve and eliminate, defer, or significantly reduce the bank holding company's dividends if: (i) its net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends; (ii) its prospective rate of earnings retention is not consistent with its capital needs and overall current and prospective financial condition; or (iii) it will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios.

Since May 19, 2009, based on discussions with the Federal Reserve and a review of recently adopted Federal Reserve policies related to dividends and other distributions, cash dividends on our outstanding common stock have been suspended (and continue to be suspended at this time). The Company has paid and is current on all dividends and interest payments on its Series A Preferred Stock and trust preferred securities. The Company is required to continue to consult with the Federal Reserve and will seek approval each quarter before making payments.

We regularly consider various scenarios for repurchase of the Series A Preferred Stock, based on our outlook for earnings and asset quality. Our outlook currently suggests that repurchase of the Series A Preferred Stock in smaller installments may be a possibility. An important consideration will be the recovery of our deferred tax valuation allowance which could significantly improve our tangible common equity. Another important consideration will be the future capacity and ability of Seacoast National to pay dividends to the Company.

At March 31, 2013, the capital ratios for the Company and its subsidiary, Seacoast National, were as follows:

	Seacoast (Consolidated)	Seacoast National	Minimum to be Well Capitalized*
March 31, 2013:			
Tier 1 capital ratio	17.01%	16.54%	6%
Total risk-based capital ratio	18.26%	17.80%	10%
Tier 1 leverage ratio	9.77%	9.49%	5%

* For subsidiary bank only

Changes in rules affecting risk based capital calculations have been proposed and the Company has taken a prospective look at its ratios, finding that our ratios remain quite strong in spite of the proposed adjustments.

FINANCIAL CONDITION

Total assets increased \$32,976,000 or 1.5 percent from March 31, 2012 to \$2,202,049,000 at March 31, 2013.

Table of Contents

LOAN PORTFOLIO

Total loans (net of unearned income) were \$1,223,810,000 at March 31, 2013, \$7,418,000 or 0.6 percent more than at March 31, 2012, and \$2,271,000 or 1.9 percent less than at December 31, 2012. Loan production of \$299 million was retained in the loan portfolio during the twelve months ended March 31, 2013. The Company continues to look for opportunities to invest excess liquidity and believes the best current use is to fund loan growth. We have added 11 new commercial relationship managers over the past twelve months which will further help in increasing loan growth in 2013, and prospectively. The following table details loan portfolio composition at March 31, 2013, December 31, 2012 and March 31, 2012:

(Dollars in thousands)	March 31, 2013	December 31 2012	March 31, 2012
Construction and land development	\$ 59,626	\$ 60,736	\$ 54,018
Commercial real estate	481,468	486,828	506,560
Residential real estate	574,523	569,331	550,263
Commercial and financial	64,752	61,903	54,561
Consumer	43,248	46,930	50,789
Other loans	193	353	201
NET LOAN BALANCES	\$ 1,223,810	\$ 1,226,081	\$ 1,216,392

The Company defines commercial real estate in accordance with the guidance on Concentrations in Commercial Real Estate Lending (the Guidance) issued by the federal bank regulatory agencies in 2006, which defines commercial real estate (CRE) loans as exposures secured by land development and construction, including 1-4 family residential construction, multi-family property, and non-farm nonresidential property where the primary or a significant source of repayment is derived from rental income associated with the property (i.e. loans for which 50 percent or more of the source of repayment comes from third party, non-affiliated, rental income) or the proceeds of the sale, refinancing, or permanent financing of the property. Loans to real estate investment trusts, or REITs, and unsecured loans to developers that closely correlate to the inherent risks in CRE markets would also be considered CRE loans under the Guidance. Loans on owner occupied CRE are generally excluded.

As shown in the loan table below, construction and land development loans increased \$5.6 million or 10.4 percent to \$59.6 million from March 31, 2012. The primary cause for the increase in construction and land development loans was an increase in construction and land development loans to individuals for personal residences of \$5.5 million or 17.2 percent to \$37.4 million. Total outstanding balances for commercial construction and land development loans for residential and commercial properties was slightly higher year over year, increasing \$0.1 million from March 31, 2012.

Table of Contents

Fixed rate and adjustable rate loans secured by commercial real estate, excluding construction loans, totaled approximately \$317 million and \$164 million, respectively, at March 31, 2013, compared to \$324 million and \$182 million, respectively, a year ago.

Residential mortgage lending is an important segment of the Company's lending activities. The Company has never offered sub-prime, Alt A, Option ARM or any negative amortizing residential loans, programs or products, although we have originated and hold residential mortgage loans from borrowers with original or current FICO credit scores that are less than prime. Substantially all residential originations have been underwritten to conventional loan agency standards, including loans having balances that exceed agency value limitations. The Company selectively adds residential mortgage loans to its portfolio, primarily loans with adjustable rates. The Company's asset mitigation staff handle all foreclosure actions together with outside legal counsel and have never had foreclosure documentation or processes questioned by any party involved in the transaction.

Exposure to market interest rate volatility with respect to long-term fixed rate mortgage loans held for investment is managed by attempting to match maturities and re-pricing opportunities and through loan sales of most fixed rate product. For the first quarter of 2013, closed residential mortgage loan production totaled \$56 million, of which \$33 million of fixed rate loans were sold servicing released while adjustable products were added to the portfolio. In comparison, closed residential mortgage loan production totaled \$48 million during the first quarter of 2012, with \$20 million sold servicing released.

Adjustable and fixed rate residential real estate mortgages were higher at March 31, 2013, by \$24.2 million or 7.1 percent and \$2.0 million or 2.1 percent, respectively, compared to a year ago. At March 31, 2013, approximately \$366 million or 64 percent of the Company's residential mortgage balances were adjustable, compared to \$342 million or 62 percent at March 31, 2012. Loans secured by residential properties having fixed rates totaled approximately \$98 million at March 31, 2013, of which 15- and 30-year mortgages totaled approximately \$24 million and \$74 million, respectively. The remaining fixed rate balances were comprised of home improvement loans, most with maturities of 10 years or less, that increased \$1.8 million or 3.0 percent since

Table of Contents

March 31, 2012. In comparison, loans secured by residential properties having fixed rates totaled approximately \$96 million at March 31, 2012, with 15- and 30-year fixed rate residential mortgages totaling approximately \$26 million and \$70 million, respectively. The Company also has a small home equity line portfolio totaling approximately \$49 million at March 31, 2013, slightly lower than the \$53 million that was outstanding at March 31, 2012.

Reflecting the impact on lending of an economy beginning to heal, commercial loans increased \$10.2 million or 18.7 percent year over year and totaled \$64.8 million at March 31, 2013, compared to \$54.6 million a year ago. Commercial lending activities are directed principally towards businesses whose demand for funds are within the Company's lending limits, such as small- to medium-sized professional firms, retail and wholesale outlets, and light industrial and manufacturing concerns. Such businesses are smaller and subject to the risks of lending to small to medium sized businesses, including, but not limited to, the effects of a downturn in the local economy, possible business failure, and insufficient cash flows.

The Company also provides consumer loans (including installment loans, loans for automobiles, boats, and other personal, family and household purposes, and indirect loans through dealers to finance automobiles) which decreased \$7.6 million or 15.0 percent year over year and totaled \$43.2 million (versus \$50.8 million a year ago). In addition, real estate construction loans to individuals secured by residential properties totaled \$20.8 million (versus \$13.5 million a year ago), and residential lot loans to individuals which totaled \$16.6 million (versus \$18.4 million a year ago).

At March 31, 2013, the Company had commitments to make loans of \$146 million, compared to \$122 million at March 31, 2012.

Loan Concentrations

Over the past four years, the Company has been pursuing an aggressive program to reduce exposure to loan types that have been most impacted by stressed market conditions in order to achieve lower levels of credit loss volatility. The program included aggressive collection efforts, loan sales and early stage loss mitigation strategies focused on the Company's largest loans. Successful execution of this program has significantly reduced our exposure to larger balance loan relationships (including multiple loans to a single borrower or borrower group). Commercial loan relationships greater than \$10 million were reduced by \$313.3 million to \$75.8 million at March 31, 2013 compared with year-end 2008.

Table of Contents

Commercial Relationships Greater than \$10 Million

(Dollars in thousands)	March 31, 2013	2012	2011	December 31, 2010	2009	2008
Performing	\$ 65,497	\$ 77,321	\$ 84,610	\$ 112,469	\$ 145,797	\$ 374,241
Performing TDR*	10,336	10,431	25,494	28,286	31,152	0
Nonaccrual	0	0	0	20,913	28,525	14,873
Total	\$ 75,833	\$ 87,752	\$ 110,104	\$ 161,668	\$ 205,474	\$ 389,114
Top 10 Customer Loan Relationships	\$ 111,880	\$ 115,506	\$ 128,739	\$ 151,503	\$ 173,162	\$ 228,800

* TDR = Troubled debt restructures

Commercial loan relationships greater than \$10 million as a percent of tier 1 capital and the allowance for loan losses totaled 32.5 percent at March 31, 2013, compared with 37.5 percent at year-end 2012, 45.8 percent at year-end 2011, 66.5 percent at year-end 2010, 85.9 percent at year-end 2009, and 162.1 percent at the end of 2008.

Concentrations in total construction and development loans and total commercial real estate (CRE) loans have also been substantially reduced. As shown in the table below, under regulatory guidance for construction and land development and commercial real estate loan concentrations as a percentage of total risk based capital, Seacoast National's loan portfolio in these categories (as defined in the guidance) have improved.

	March 31, 2013	2012	2011	December 31, 2010	2009	2008
Construction and land development loans to total risk based capital	27%	28%	22%	39%	81%	206%
CRE loans to total risk based capital	157%	164%	174%	218%	274%	389%
ALLOWANCE FOR LOAN LOSSES						

Management continuously monitors the quality of the loan portfolio and maintains an allowance for loan losses it believes sufficient to absorb probable losses inherent in the loan portfolio. The allowance for loan losses declined to a total of \$21,540,000 or 1.76 percent of total loans at March 31, 2013. This amount is \$2,915,000 less than at March 31, 2012 and \$564,000 less than at December 31, 2012. The allowance for loan losses (ALLL) framework has two basic elements: specific allowances for loans individually evaluated for impairment, and a formula-based component for pools of homogeneous loans within the portfolio that have similar risk characteristics, which are not individually evaluated.

The first element of the ALLL analysis involves the estimation of allowance specific to individually evaluated impaired loans, including accruing and nonaccruing restructured commercial and consumer loans. In this process, a specific allowance is established for impaired loans based on an analysis of the most probable sources of repayment, including discounted cash flows, liquidation of collateral, or the market value of the loan itself. It is the Company's policy

Table of Contents

to charge off any portion of the loan deemed a loss. Restructured consumer loans are also evaluated in this element of the estimate. As of March 31, 2013, the specific allowance related to impaired loans individually evaluated totaled \$6.7 million, compared to \$8.2 million as of March 31, 2012.

The second element of the ALLL analysis, the general allowance for homogeneous loan pools not individually evaluated, is determined by applying allowance factors to pools of loans within the portfolio that have similar risk characteristics. The general allowance factors are determined using a baseline factor that is developed from an analysis of historical net charge-off experience and qualitative factors designed and intended to measure expected losses. These baseline factors are developed and applied to the various loan pools. Adjustments may be made to baseline reserves for some of the loan pools based on an assessment of internal and external influences on credit quality not fully reflected in the historical loss. These influences may include elements such as changes in concentration risk, macroeconomic conditions, and/or recent observable asset quality trends.

In addition, our analyses of the adequacy of the allowance for loan losses also takes into account qualitative factors such as credit quality, loan concentrations, internal controls, audit results, staff turnover, local market conditions and loan growth.

The Company's independent Credit Administration Department assigns all loss factors to the individual internal risk ratings based on an estimate of the risk using a variety of tools and information. Its estimate includes consideration of the level of unemployment which is incorporated into the overall allowance. In addition, the portfolio is segregated into a graded loan portfolio, residential, installment, home equity, and unsecured signature lines, and loss factors are calculated for each portfolio.

The loss factors assigned to the graded loan portfolio are based on the historical migration of actual losses by grade over 4, 8, 12, 16, 20 and 24 quarter intervals. Minimum and maximum average historical loss rates over one to five years are referenced in setting the loss factors by grade within the graded portfolio. Management uses historical loss factors as its starting point, and qualitative elements are considered to capture trends within each portion of the graded portfolio. The direction and expectations of past dues, charge-offs, nonaccruals, classified loans, portfolio mix, market conditions, and risk management controls are considered in setting loss factors for the graded portfolio. The loan loss migration indicates that the minimum and maximum average loss rates and median loss rates over the past many quarters have been declining. Also, the level of criticized and classified loans has been declining as a result of a combination of upgrades, loan payoff and loan sales, which are reducing the risk profile of the loan portfolio. Additionally, the risk profile has declined given the shift in complexion of the graded portfolio, particularly a reduced level of commercial real estate loan concentrations.

Residential and consumer (installment, secured lines, and unsecured lines) are analyzed differently as risk ratings, or grades, are not assigned to individual loans. Residential and consumer loan losses are tracked by pool and monthly histories are averaged for a rolling 12-month historical loss rate. Management believes the recent 12-month loss history is most appropriate as it best represents the vintages of loans currently in the portfolio and not the vintages that produced the significant losses in prior years. These loss factors are then adjusted by qualitative factors determined by management to reflect potential probable losses inherent in each loan pool. Qualitative factors may include various loan or property types, loan to value, concentrations and economic and environmental factors.

Table of Contents

In general, residential real estate loans originated from 2005 through 2007 had property value declines of approximately 50 percent from their original appraised values, more than the decline on loans originated in other years. Declining residential collateral value affected our actual loan losses over the three years ended December 31, 2011, but values stabilized during 2012. Residential loans that become 90 days past due are placed on nonaccrual and a specific allowance is made for any loan that becomes 120 days past due. Residential loans are subsequently written down if they become 180 days past due and such write-downs are supported by a current appraisal, consistent with current banking regulations.

Our charge-off policy meets or exceeds regulatory minimums. Losses on unsecured consumer loans are recognized at 90 days past due compared to the regulatory loss criteria of 120 days. Secured consumer loans, including residential real estate, are typically charged-off or charged down between 120 and 180 days past due, depending on the collateral type, in compliance with Federal Financial Institution Examination Council guidelines. Commercial loans and real estate loans are typically placed on nonaccrual status when principal or interest is past due for 90 days or more, unless the loan is both secured by collateral having realizable value sufficient to discharge the debt in-full and the loan is in the legal process of collection. Secured loans may be charged-down to the estimated value of the collateral with previously accrued unpaid interest reversed. Subsequent charge-offs may be required as a result of changes in the market value of collateral or other repayment prospects. Initial charge-off amounts are based on valuation estimates derived from appraisals, broker price opinions, or other market information. Generally, new appraisals are not received until the foreclosure process is completed; however, collateral values are evaluated periodically based on market information and incremental charge-offs are recorded if it is determined that collateral values have declined from their initial estimates

Management continually evaluates the allowance for loan losses methodology seeking to refine and enhance this process as appropriate, and it is likely that the methodology will continue to evolve over time.

Our Loan Review unit is independent, and performs loan reviews and evaluates a representative sample of credit extensions after the fact for appropriate individual internal risk ratings. Loan Review has the authority to change internal risk ratings and is responsible for assessing the adequacy of credit underwriting. This unit reports directly to the Directors' Loan Committee of Seacoast National's board of directors.

Net charge-offs for the three months ended March 31, 2013 totaled \$1,517,000, compared to net charges-offs of \$3,415,000 for the same period in 2012. Note F to the financial statements (titled "Impaired Loans and Allowance for Loan Losses") summarizes the Company's allocation of the allowance for loan losses to construction and land development loans, commercial and residential estate loans, commercial and financial loans, and consumer loans, and provides more specific detail regarding charge-offs and recoveries for each loan component and the composition of the loan portfolio at March 31, 2013 and 2012. Although there is no assurance that we will not have elevated charge-offs in the future, we believe that we have significantly reduced the risks in our loan portfolio and that with stabilizing market conditions, future charge-offs should decline.

The allowance as a percentage of loans outstanding was 1.76 percent at March 31, 2013, compared to 2.01 percent at March 31, 2012. The allowance for loan losses represents management's estimate of an amount adequate in relation to the risk of losses inherent in the loan portfolio. The reduced level of impaired loans and lower classified loans (special mention

Table of Contents

and substandard grades) contributed to a lower risk of loss and the lower allowance for loan losses as of March 31, 2013. The risk profile of the loan portfolio has been reduced by implementing a program to reduce the level of credit risk in the portfolio by strengthening credit management methodologies and implementing a low risk back-to-basics strategic plan for loan growth. New loan production has shifted to adjustable rate residential real estate loans, owner-occupied commercial real estate, small business loans for professionals and businesses, and consumer lending. Strategies, processes and controls are in place to ensure that new production is well underwritten and maintains a focus on smaller, diversified and lower-risk lending. Aided by initiatives embodied in new loan programs and continued aggressive collection actions, the portfolio mix has changed and has become more diversified. The improved mix is most evident by reductions in income producing commercial real estate and construction and land development loans over the last several years. Prospectively, we anticipate that the allowance will continue to decline as a percentage of loans outstanding as we continue to see improvement in our credit quality, with some offset to this perspective for more normal loan growth as business activity and the economy improve.

Concentrations of credit risk, discussed under the caption Loan Portfolio of this discussion and analysis, can affect the level of the allowance and may involve loans to one borrower, an affiliated group of borrowers, borrowers engaged in or dependent upon the same industry, or a group of borrowers whose loans are predicated on the same type of collateral. The Company's most significant concentration of credit is a portfolio of loans secured by real estate. At March 31, 2013, the Company had \$1.116 billion in loans secured by real estate, representing 91.1 percent of total loans, up slightly from \$1.111 billion but lower as a percent of total loans (versus 91.3 percent) at March 31, 2012. In addition, the Company is subject to a geographic concentration of credit because it only operates in central and southeastern Florida.

While it is the Company's policy to charge off in the current period loans in which a loss is considered probable, there are additional risks of future losses that cannot be quantified precisely or attributed to particular loans or classes of loans. Because these risks include the state of the economy, borrower payment behaviors and local market conditions as well as conditions affecting individual borrowers, management's judgment of the allowance is necessarily approximate and imprecise. The allowance is also subject to regulatory examinations and determinations as to adequacy, which may take into account such factors as the methodology used to calculate the allowance for loan losses and the size of the allowance for loan losses in comparison to a group of peer companies identified by the regulatory agencies.

In assessing the adequacy of the allowance, management relies predominantly on its ongoing review of the loan portfolio, which is undertaken both to ascertain whether there are probable losses that must be charged off and to assess the risk characteristics of the portfolio in aggregate. This review considers the judgments of management, and also those of bank regulatory agencies that review the loan portfolio as part of their regular examination process. Our bank regulators have generally agreed with our credit assessment however the regulators could seek additional provisions to our allowance for loan losses, which will reduce our earnings.

NONPERFORMING ASSETS

Nonperforming assets (NPAs) at March 31, 2013 totaled \$46,058,000 and were comprised of \$35,208,000 of nonaccrual loans and \$10,850,000 of other real estate owned (OREO), compared to \$57,246,000 at March 31, 2012 (comprised of \$41,716,000 in nonaccrual loans and \$15,530,000 of OREO). At March 31, 2013, approximately 99.1 percent of nonaccrual loans

Table of Contents

were secured with real estate, the remainder principally by marine vessels. See the tables below for details about nonaccrual loans. At March 31, 2013, nonaccrual loans have been written down by approximately \$12.4 million or 31.7 percent of the original loan balance (including specific impairment reserves).

As anticipated, the Company closed a number of OREO sales during 2012 and 2013 that reduced OREO outstanding. Compared to March 31, 2012, OREO was \$4.7 million or 30.1 percent lower at March 31, 2013. This represents the lowest level for OREO since 2008.

The table below shows the nonperforming loan inflows by quarter for 2013, 2012 and 2011:

New Nonperforming Loans (Dollars in thousands)	2013	2012	2011
First quarter	\$
