QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the quarterly period ended March 31, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

Commission File Number 1-14443

Gartner, Inc.

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

04-3099750
(I.R.S. Employer
Identification Number)

P.O. Box 10212
56 Top Gallant Road
Stamford, CT

06902-7700
(Zip Code)

(Address of principal executive offices)

Registrant's telephone number, including area code: (203) 316-1111

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting
company

(Do not check if a smaller
reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2010, 96,186,715 shares of the registrant's common shares were outstanding.

See the accompanying notes to the condensed consolidated financial statements.

Table of Contents**GARTNER, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)****Note 1 Basis of Presentation**

The fiscal year of Gartner, Inc. (the Company) represents the period from January 1 through December 31. When used in these notes, the terms Company, we, us, or our refer to Gartner, Inc. and its consolidated subsidiaries. These interim condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles (GAAP) in the United States of America, as defined in the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 270 for interim financial information and with the instructions to Rule 10-01 of Regulation S-X on Form 10-Q and should be read in conjunction with the consolidated financial statements and related notes of Gartner, Inc. filed in its Annual Report on Form 10-K for the year ended December 31, 2009.

In the opinion of management, all normal recurring accruals considered necessary for a fair presentation of financial position, results of operations and cash flows at the dates and for the periods presented herein have been included. The results of operations for the three months ended March 31, 2010 may not be indicative of the results of operations for the remainder of 2010.

Principles of consolidation. The accompanying interim condensed consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries. All significant intercompany transactions and balances have been eliminated.

Use of estimates. The preparation of the accompanying interim condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities, and reported amounts of revenues and expenses. Such estimates include the valuation of accounts receivable, goodwill, intangible assets, and other long-lived assets, as well as tax accruals and other liabilities. In addition, estimates are used in revenue recognition, income tax expense, performance-based compensation charges, depreciation and amortization, and the allowance for losses. Management believes its use of estimates in the interim condensed consolidated financial statements to be reasonable.

Management evaluates its estimates on an ongoing basis using historical experience and other factors, including the general economic environment and actions it may take in the future. We adjust such estimates when facts and circumstances dictate. However, these estimates may involve significant uncertainties and judgments and cannot be determined with precision. In addition, these estimates are based on our best judgment at a point in time and as such these estimates may ultimately differ from actual results. Changes in estimates resulting from weakness in the economic environment or other factors beyond our control could be material and would be reflected in the Company's financial statements in future periods.

Note 2 Acquisitions

In December 2009 the Company acquired AMR Research, Inc. (AMR Research) and Burton Group, Inc. (Burton Group). The Company's consolidated results include the operating results of these acquisitions beginning on their respective acquisition dates. The Company recorded \$3.5 million of acquisition and integration charges related to these acquisitions in the three months ended March 31, 2010.

The Company paid a total of \$117.3 million in cash for all of the outstanding shares of AMR Research and Burton Group. The final cash purchase price is subject to certain post-close working capital adjustments, which the Company expects will be resolved in the quarterly period ending June 30, 2010. The Company considers the allocation of the purchase price to be preliminary as it relates to both the working capital adjustments and certain tax related items.

In connection with the acquisitions, the Company received contractual indemnifications from the selling shareholders for certain pre-acquisition liabilities of the acquired companies. The Company estimated these liabilities at approximately \$6.1 million. In accordance with FASB ASC Topic 805, the Company recorded a \$6.1 million receivable in Prepaid expenses and other current assets and a \$6.1 million liability in Accrued liabilities, which were included in the purchase price allocation. The Company believes the indemnification assets are fully collectible, since a portion of the sale proceeds were escrowed pending resolution of the liabilities.

Table of Contents

In March 2010, approximately \$1.5 million of these pre-acquisition liabilities were settled and paid from the escrowed funds, resulting in a reduction of \$1.5 million in both the recorded receivable and liability. The \$1.5 million settlement had no impact on the Company's results of operations, cash flows, or recorded goodwill.

Note 3 Comprehensive Income

The components of Comprehensive income include net income, foreign currency translation adjustments, realized and unrealized gains or losses on interest rate swaps, and unrealized gains and losses on defined benefit pension plans.

Amounts recorded in Comprehensive income are as follows:

	Three Months Ended March 31,	
	2010	2009
Net income:	\$ 19,403	\$ 19,996
Other comprehensive (loss) income, net of tax:		
Foreign currency translation adjustments	(2,540)	1,188
Unrealized gain on interest rate swaps	704	646
Amortization of realized gain on terminated interest rate swap	(26)	(74)
Amortization of pension unrealized gain	(59)	(44)
Other comprehensive (loss) income	(1,921)	1,716
Comprehensive income	\$ 17,482	\$ 21,712

Note 4 Computation of Earnings Per Share

The following table sets forth the reconciliation of basic and diluted earnings per share (in thousands, except per share data):

	Three Months Ended March 31,	
	2010	2009
Numerator:		
Net income used for calculating basic and diluted earnings per share	\$ 19,403	\$ 19,996
Denominator:		
Weighted average number of common shares used in the calculation of basic earnings per share	95,963	93,898
Common stock equivalents associated with stock-based compensation plans (1)	3,686	1,865
Shares used in the calculation of diluted earnings per share	99,649	95,763
Basic earnings per share	\$ 0.20	\$ 0.21
Diluted earnings per share	\$ 0.19	\$ 0.21

(1) For the three months ended March 31, 2010 and 2009, 0.5 million and

3.8 million, respectively, of common stock equivalents were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive.

Note 5 Stock-Based Compensation

The Company grants stock-based compensation awards as an incentive for employees and directors to contribute to the Company's long-term success. The Company's stock compensation awards include stock-settled stock appreciation rights, restricted stock, service- and performance-based restricted stock units, common stock equivalents, and stock options. At March 31, 2010, the Company had approximately 6.4 million shares of its common stock, par value \$.0005 per share (the Common Stock) available for awards of stock-based compensation under its 2003 Long-Term Incentive Plan.

The Company accounts for stock-based compensation in accordance with FASB ASC Topics 505 and 718, as interpreted by SEC Staff Accounting Bulletins No. 107 (SAB No. 107) and No. 110 (SAB No. 110). Stock-based compensation expense is based on the fair value of the award on the date of grant, which is recognized over the related service period, net of estimated forfeitures. The service period is the period over which the related service is performed, which is generally the same as the vesting period. At the present time, the Company issues treasury shares upon the exercise, release or settlement of stock-based compensation awards.

Table of Contents

Determining the appropriate fair value model and calculating the fair value of stock compensation awards requires the input of certain highly complex and subjective assumptions, including the expected life of the stock compensation awards and the Common Stock price volatility. In addition, determining the appropriate amount of associated periodic expense requires management to estimate the amount of employee forfeitures and the likelihood of the achievement of certain performance targets. The assumptions used in calculating the fair value of stock compensation awards and the associated periodic expense represent management's best estimates, but these estimates involve inherent uncertainties and the application of judgment. As a result, if factors change and the Company deems it necessary in the future to modify the assumptions it made or to use different assumptions, or if the quantity and nature of the Company's stock-based compensation awards changes, then the amount of expense may need to be adjusted and future stock compensation expense could be materially different from what has been recorded in the current period.

Stock-Based Compensation Expense

The Company recognized the following amounts of stock-based compensation expense by award type in the periods indicated (in millions):

Award type:	Three Months Ended March 31,	
	2010	2009
Stock appreciation rights (SARs)	\$ 1.7	\$ 1.1
Common stock equivalents (CSEs)	0.1	0.1
Restricted stock units (RSUs)	7.4	5.6
Total (1)	\$ 9.2	\$ 6.8

(1) Includes \$2.3 million and \$1.1 million, respectively, for charges determined in accordance with the Company's retirement-eligible policy.

Stock-based compensation was recognized in the Consolidated Statements of Operations as follows (in millions):

Amount recorded in:	Three Months Ended March 31,	
	2010	2009
Cost of services and product development	\$ 4.7	\$ 3.1
Selling, general and administrative	4.5	3.7
Total stock-based compensation expense	\$ 9.2	\$ 6.8

As of March 31, 2010, the Company had \$60.3 million of total unrecognized stock-based compensation cost, which is expected to be recognized as stock-based compensation expense over the remaining weighted-average service period of approximately 2.4 years.

Stock-Based Compensation Awards

The following disclosures provide information regarding the Company's stock-based compensation awards, all of which are classified as equity awards in accordance with FASB ASC Topic 505:

Stock Appreciation Rights

Stock-settled stock appreciation rights (SARs) are settled in common shares and are similar to stock options as they permit the holder to participate in the appreciation of the Common Stock. SARs may be settled in shares of Common Stock by the employee once the applicable vesting criteria have been met. SARs vest ratably over a four-year service period and expire seven years from the grant date. The fair value of SARs awards is recognized as compensation expense on a straight-line basis over four years. SARs are awarded only to the Company's executive officers.

When SARs are exercised, the number of shares of Common Stock issued is calculated as follows: (1) the total proceeds from the SARs exercise (calculated as the closing price of the Common Stock on the date of exercise less the exercise price of the SARs, multiplied by the number of SARs exercised) is divided by (2) the closing price of the Common Stock on the exercise date. The Company will withhold a portion of the share of Common Stock issued upon exercise to satisfy minimum statutory tax withholding requirements. SARs recipients do not have any of the rights of a Gartner stockholder, including voting rights and the right to receive dividends and distributions, until after actual shares of common stock are issued in respect of the award, which is subject to the prior satisfaction of the vesting and other criteria relating to such grants.

Table of Contents

A summary of the changes in SARs outstanding for the three months ended March 31, 2010, follows:

	SARs in millions	Per Share Weighted- Average Exercise Price	Per Share Weighted- Average Grant Date Fair Value	Weighted Average Remaining Contractual Term
Outstanding at December 31, 2009	2.9	\$ 15.43	\$ 6.09	4.67 years
Granted	0.5	22.06	8.27	6.87 years
Forfeited				na
Exercised	(0.3)	14.48	5.99	na
Outstanding at March 31, 2010 (1)	3.1	\$ 16.74	\$ 5.00	5.01 years
Vested and exercisable at March 31, 2010 (1)	1.2	\$ 16.90	\$ 6.49	4.17 years

na=not applicable

- (1) At March 31, 2010, SARs outstanding had an intrinsic value of \$17.2 million. SARs vested and exercisable had an intrinsic value of \$6.7 million.

The fair value of the SARs was determined on the date of grant using the Black-Scholes-Merton valuation model with the following weighted-average assumptions:

	Three Months Ended March 31,	
	2010	2009
Expected dividend yield (1)	0%	0%
Expected stock price volatility (2)	40%	50%
Risk-free interest rate (3)	2.4%	2.3%
Expected life in years (4)	4.8	4.8

- (1) The dividend yield assumption is based on the history and expectation of

the Company's dividend payouts. Historically, Gartner has not paid cash dividends on its common stock.

- (2) The determination of expected stock price volatility was based on both historical Common Stock prices and implied volatility from publicly traded options in Common Stock.
- (3) The risk-free interest rate is based on the yield of a U.S. Treasury security with a maturity similar to the expected life of the award.
- (4) The expected life in years is based on the simplified calculation provided for in SEC SAB No. 107. The simplified method determines the expected life in years based on the vesting period and contractual terms as set

forth when the award is made.

The Company continues to use the simplified method for SARs awards, as permitted by SEC SAB

No. 110, since it does not have the necessary historical exercise and forfeiture data to determine an expected life.

Restricted Stock, Restricted Stock Units, and Common Stock Equivalents

Restricted stock awards give the awardee the right to vote and to receive dividends and distributions on these shares; however, the awardee may not sell the restricted shares until all restrictions on the release of the shares have lapsed and the shares are released.

Restricted stock units (RSUs) give the awardee the right to receive Common Stock when the vesting conditions are met and the restrictions lapse, and each RSU that vests entitles the awardee to one common share. RSU awardees do not have any of the rights of a Gartner stockholder, including voting rights and the right to receive dividends and distributions, until after the common shares are released.

Common stock equivalents (CSEs) are convertible into Common Stock, and each CSE entitles the holder to one common share. Certain members of our Board of Directors receive directors' fees payable in CSEs unless they opt for cash payment. Generally, the CSEs are converted when service as a director terminates unless the director has elected an accelerated release.

The fair value of restricted stock, RSUs, and CSEs is determined on the date of grant based on the closing price of the Common Stock as reported by the New York Stock Exchange on that date. The fair value of these awards is recognized as compensation expense as

Table of Contents

follows: (i) restricted stock awards vest based on the achievement of a market condition and are expensed on a straight-line basis over approximately three years; (ii) service-based RSUs vest ratably over four years and are expensed on a straight-line basis over four years; (iii) performance-based RSUs are subject to both performance and service conditions, vest ratably over four years, and are expensed on an accelerated basis; and (iv) CSEs vest immediately and are recorded as expense on the date of grant.

A summary of the changes in restricted stock, RSUs and CSEs during the three months ended March 31, 2010, follows:

	Restricted Stock	Weighted- Average Grant Date Fair Value (1)	Restricted Stock Units (RSUs)	Weighted- Average Grant Date Fair Value (1)	Common Stock Equivalents (CSEs)	Weighted- Average Grant Date Fair Value (1)
Outstanding at December 31, 2009	200,000	\$ 7.30	3,763,805	\$ 14.57	135,224	na
Granted (2), (3)			1,084,115	22.06	4,670	\$ 22.41
Vested or released			(952,373)	15.34	(31,042)	na
Forfeited			(39,578)	16.28		na
Outstanding at March 31, 2010 (4), (5)	200,000	\$ 7.30	3,855,969	\$ 16.29	108,852	na

na=not available

(1) Per share.

(2) The 1.1 million RSUs consisted of 0.5 million performance-based RSUs awarded to executives and 0.6 million service-based RSUs awarded to non-executive employees.

The 0.5 million performance-based RSUs represent the target amount of the award. The actual number of RSUs that will ultimately be granted will be between 0% and

200% of the target amount, depending on the level of achievement of the performance metric. The performance metric is the dollar level of the Company's ending subscription-based contract value for 2010. If the specified minimum level of achievement is not met, the performance-based RSUs will be forfeited in their entirety, and any compensation expense already recorded will be reversed.

- (3) CSEs represent fees paid to directors. The CSEs vest when granted and are convertible into common shares when the director leaves the Board of Directors or earlier if the director elects to accelerate the release.
- (4) Vesting on the 200,000 shares of restricted stock held by our CEO is subject to a market condition as follows: (i) 100,000 shares will vest when the Common Stock trades at an average price of \$25 or more each

trading day for sixty consecutive trading days; and (ii) 100,000 shares will vest when the Common Stock trades at an average price of \$30 or more each trading day for sixty consecutive trading days. There is no remaining unamortized cost on these shares.

- (5) The weighted-average remaining contractual term of the RSUs is 1.7 years. The restricted stock awards and the CSEs have no defined contractual term.

Stock Options

Historically, the Company granted stock options to employees that allowed them to purchase shares of the Company's common stock at a certain price. The Company has not made significant stock option grants since 2005. All outstanding options are fully vested and there is no remaining unamortized cost. The Company received approximately \$5.9 million in cash from option exercises in the three months ended March 31, 2010.

A summary of the changes in stock options outstanding in the three months ended March 31, 2010, follows:

	Options in millions	Per Share Weighted- Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in millions)
Outstanding at December 31, 2009	4.7	\$ 10.65	3.07 years	\$ 34.8
Expired			na	na
Exercised (1)	(0.6)	10.19	na	na
Outstanding at March 31, 2010	4.1	\$ 10.71	2.89 years	\$ 47.6

na=not applicable

- (1) Options exercised during the three months ended March 31, 2010 had an intrinsic value of \$7.6 million.

Table of Contents**Employee Stock Purchase Plan**

The Company has an employee stock purchase plan (the ESPP Plan) under which eligible employees are permitted to purchase Common Stock through payroll deductions, which may not exceed 10% of an employee's compensation (or \$23,750 in any calendar year), at a price equal to 95% of the closing price of the Common Stock as reported by the New York Stock Exchange at the end of each offering period.

At March 31, 2010, the Company had approximately 1.5 million shares available for purchase under the ESPP Plan. The ESPP Plan is considered non-compensatory under FASB ASC Topic 718, and as a result the Company does not record compensation expense related to employee share purchases. The Company received approximately \$0.8 million in cash from share purchases under the Plan in the three months ended March 31, 2010.

Note 6 Segment Information

The Company manages its business in three reportable segments: Research, Consulting and Events. Research consists primarily of subscription-based research products, access to research inquiry, as well as peer networking services and membership programs. Consulting consists primarily of consulting, measurement engagements, and strategic advisory services. Events consists of various symposia, conferences, and exhibitions.

The Company evaluates reportable segment performance and allocates resources based on gross contribution margin. Gross contribution, as presented in the table below, is defined as operating income excluding certain Cost of services and product development and Selling, general and administrative (SG&A) expenses, depreciation, acquisition and integration charges, amortization of intangibles, and Other charges. Certain bonus and fringe benefit costs included in consolidated Cost of services and product development are not allocated to segment expense. The accounting policies used by the reportable segments are the same as those used by the Company.

The Company does not identify or allocate assets, including capital expenditures, by reportable segment. Accordingly, assets are not reported by segment because the information is not available and is not reviewed in the evaluation of segment performance or in making decisions in the allocation of resources. There are no inter-segment revenues.

The following tables present information about the Company's reportable segments (in thousands):

	Research	Consulting	Events	Consolidated
Three Months Ended March 31, 2010:				
Revenues	\$ 210,673	\$ 71,639	\$ 13,521	\$ 295,833
Gross contribution	138,735	28,422	5,215	172,372
Corporate and other expenses				(143,174)
Operating income				\$ 29,198

	Research	Consulting	Events	Consolidated
Three Months Ended March 31, 2009:				
Revenues	\$ 187,688	\$ 70,319	\$ 15,526	\$ 273,533
Gross contribution	124,731	27,020	4,783	156,534
Corporate and other expenses				(122,083)
Operating income				\$ 34,451

Table of Contents

Note 7 Goodwill and Intangible Assets

Goodwill

Goodwill represents the excess of the purchase price of acquired businesses over the estimated fair value of the tangible and identifiable intangible net assets acquired. The evaluation of goodwill is performed in accordance with FASB ASC Topic 350, which requires an annual assessment of potential goodwill impairment at the reporting unit level. A reporting unit can be an operating segment or a business if discrete financial information is prepared and reviewed by management. Under the impairment test, if a reporting unit's carrying amount exceeds its estimated fair value, goodwill impairment is recognized to the extent that the reporting unit's carrying amount of goodwill exceeds the implied fair value of the goodwill. The fair value of reporting units is estimated using discounted cash flows, market multiples, and other valuation techniques.

The following table presents changes to the carrying amount of goodwill by reporting segment during the three months ended March 31, 2010 (in thousands):

	Research	Consulting	Events	Total
Balance, December 31, 2009	\$ 370,630	\$ 100,744	\$ 42,238	\$ 513,612
Foreign currency translation adjustments	(2,833)	(962)	(62)	(3,857)
Balance, March 31, 2010	\$ 367,797	\$ 99,782	\$ 42,176	\$ 509,755

Intangible Assets

	Content	Trade Name	Customer Relationships	Noncompete Agreements	Total
March 31, 2010					
Gross cost	\$ 10,634	\$ 5,758	\$ 14,910	\$ 401	\$ 31,703
Accumulated amortization	(1,772)	(288)	(8,150)	(311)	(10,521)
Net	\$ 8,862	\$ 5,470	\$ 6,760	\$ 90	\$ 21,182

	Content	Trade Name	Customer Relationships	Noncompete Agreements	Total
December 31, 2009					
Gross cost	\$ 10,634	\$ 5,758	\$ 14,910	\$ 416	\$ 31,718
Accumulated amortization			(7,315)	(290)	(7,605)
Net	\$ 10,634	\$ 5,758	\$ 7,595	\$ 126	\$ 24,113

Intangible assets are being amortized against earnings over the following periods:

	Content	Trade Name	Customer Relationships	Noncompete Agreements
Useful Life (Years)	1.5	5	4	2-5

Aggregate amortization expense related to intangible assets was \$2.9 million and \$0.4 million for the three months ended March 31, 2010 and 2009, respectively.

The estimated future amortization expense by year from purchased intangibles is as follows (in thousands):

2010 (remaining nine months)	\$ 7,605
------------------------------	----------

2011	6,525
2012	2,955
2014	2,955
2015 and thereafter	1,142
	\$ 21,182

Note 8 Debt

Credit Agreement

The Company has a Credit Agreement dated as of January 31, 2007, that provides for a \$300.0 million revolving credit facility and a five-year, \$180.0 million term loan (the "original term loan"). On April 9, 2008, the Company entered into a First Amendment with the lenders to the Credit Agreement, which provided for a new \$150.0 million term loan (the "2008 term loan"). The revolving credit facility may be increased up to an additional \$100.0 million at the discretion of the Company's lenders (the "expansion feature"), for a

Table of Contents

total revolving credit facility of \$400.0 million. However, the \$100.0 million expansion feature may or may not be available to the Company depending upon prevailing credit market conditions. To date, the Company has not sought to borrow under the expansion feature.

The following table provides information regarding amounts outstanding under the Company's Credit Agreement:

Description:	Amount Outstanding December 31, 2009 (In thousands)	Amount Outstanding March 31, 2010 (In thousands)	Annualized Effective Interest Rates March 31, 2010(3)
Original Term Loan (1)	\$ 126,000	\$ 117,000	5.94%
2008 Term Loan (1)	75,000	70,000	1.55%
Revolver (2)	128,000	180,000	1.15%
Total	\$ 329,000	\$ 367,000	

(1) During the three months ended March 31, 2010, the Company repaid \$9.0 million of the original term loan and \$5.0 million of the 2008 term loan pursuant to the loan amortization schedules.

(2) The Company had approximately \$118.6 million of available borrowing capacity on the revolver (not including the expansion feature) as of March 31, 2010.

(3) The annualized effective rate on

the original term loan consisted of the interest rate swap rate (see below) of 5.06% plus a margin of 0.88%. The effective rate on the 2008 term loan consisted of a three-month LIBOR base rate plus a margin of 1.25%, while the revolver rate consisted of a LIBOR base rate plus a margin of 0.88%.

Borrowings under the Credit Agreement carry interest rates that are either prime-based or Libor-based. Interest rates under these borrowings include a base rate plus a margin between 0.00% and 0.75% on Prime-based borrowings and between 0.625% and 1.75% on Libor-based borrowings. Generally, the Company's borrowings are Libor-based. The revolving loans may be borrowed, repaid and reborrowed until January 31, 2012, at which time all amounts borrowed must be repaid. The revolver borrowing capacity is reduced for both amounts outstanding under the revolver and for letters of credit.

The original term loan will be repaid in 18 consecutive quarterly installments which commenced on September 30, 2007, with the final payment due on January 31, 2012, and may be prepaid at any time without penalty or premium at the option of the Company. The 2008 term loan is co-terminus with the original 2007 term loan under the Credit Agreement and will be repaid in 16 consecutive quarterly installments which commenced June 30, 2008, plus a final payment due on January 31, 2012, and may be prepaid at any time without penalty or premium at the option of Gartner.

The Credit Agreement contains certain customary restrictive loan covenants, including, among others, financial covenants requiring a maximum leverage ratio, a minimum fixed charge coverage ratio, and a minimum annualized contract value ratio and covenants limiting Gartner's ability to incur indebtedness, grant liens, make acquisitions, be acquired, dispose of assets, pay dividends, repurchase stock, make capital expenditures, and make investments. A failure to comply with these covenants in the future could result in acceleration of all amounts outstanding under the Credit Agreement, which would materially impact our financial condition unless accommodations could be negotiated with our lenders. The Company was in full compliance with its financial covenants as of March 31, 2010.

Interest Rate Swap Contract

The Company has an interest rate swap contract that hedges the base interest rate risk on its original term loan. The effect of the swap is to convert the floating base rate on the term loan to a fixed rate. Under the swap terms, the Company pays a fixed rate of 5.06% on the original term loan and in return receives a three-month LIBOR rate. The three-month LIBOR rate received on the swap matches the base rate paid on the term loan since the Company optionally selects a three-month LIBOR rate on the term loan. The notional amount of the interest rate swap declines over time and constantly matches the outstanding amount of the term loan. Other critical terms of the swap and the term loan also match.

Table of Contents

The Company accounts for the interest rate swap on its original term loan as a cash flow hedge in accordance with FASB ASC Topic 815. Since the swap is hedging the forecasted interest payments on the term loan and qualifies as a cash flow hedge, changes in the fair value of the swap are recorded in Other comprehensive income as long as the swap continues to be a highly effective hedge of the base interest rate risk on the term loan. Any ineffective portion of change in the fair value of the hedge is recorded in earnings. At March 31, 2010 there was no ineffective portion of the hedge. The interest rate swap had a negative fair value of approximately \$5.8 million at March 31, 2010, which is recorded in Other comprehensive income, net of tax effect.

Letters of Credit

The Company issues letters of credit and related guarantees in the ordinary course of business to facilitate transactions with customers and others. At March 31, 2010, the Company had outstanding letters of credit and guarantees of approximately \$1.7 million.

Note 9 Equity and Stock Programs

Share Repurchases

The Company has a \$250.0 million authorized stock repurchase program, of which \$43.5 million remained available for repurchases as of March 31, 2010. Repurchases are made from time-to-time through open market purchases and are subject to the availability of stock, prevailing market conditions, the trading price of the stock, the Company's financial performance and other conditions. Repurchases are also made from time-to-time in connection with the settlement of the Company's shared-based compensation awards. Repurchases may be funded from cash flow from operations and borrowings under the Company's Credit Agreement.

The Company's share repurchase activity was as follows:

	Three Months Ended March 31,	
	2010	2009
Number of shares repurchased	1,503,700	186,694
Cost of repurchased shares (in thousands):	\$ 35,172	\$ 2,150

Note 10 Income Taxes

The provision for income taxes was \$8.2 million for the three months ended March 31, 2010 as compared to \$9.0 million in the prior year quarter. The effective tax rate was 29.6% for the three months ended March 31, 2010 and 31.1% for the same period in 2009. The decrease in the effective tax rate was primarily due to a change in the estimated mix of pre-tax income by jurisdiction.

As of March 31, 2010 and March 31, 2009, the Company had gross unrecognized tax benefits of \$14.1 million and \$16.6 million, respectively. The reduction is primarily attributable to the expiration of certain statutes of limitation offset, in part, by increases to gross unrecognized tax benefits recorded during the same period. It is reasonably possible that the gross unrecognized tax benefits will be decreased by \$0.6 million within the next 12 months due primarily to settlements of outstanding audits. As of March 31, 2010 and March 31, 2009, the Company had Other liabilities of \$13.5 million and \$14.5 million, respectively, related to long term uncertain tax positions.

The Internal Revenue Service (IRS) commenced an audit of the Company's 2007 tax year early in 2009. The audit is ongoing and the IRS has not proposed any adjustments at this time. The Company believes that it has recorded reserves sufficient to cover exposures related to such review. However, the resolution of such matters involves uncertainties and there are no assurances that the ultimate resolution will not exceed the amounts we have recorded. Additionally, the results of an audit could have a material effect on our financial position, results of operations, or cash flows in the period or periods for which that determination is made.

Note 11 Derivatives and Hedging

The Company typically enters into a limited number of derivative contracts to offset the potentially negative effects of interest rate and foreign exchange movements. The Company accounts for its outstanding derivative contracts in accordance with FASB ASC Topic 815, which requires all derivatives, whether designated as hedges or not, to be recorded on the balance sheet at fair value.

Edgar Filing: GARTNER INC - Form 10-Q

The following tables provide information regarding the Company's outstanding derivatives contracts as of March 31, 2010 and December 31, 2009 (in thousands, except for number of outstanding contracts):

14

Table of Contents

March 31, 2010

Derivative Contract Type	Number of Contract		Fair Value	Balance Sheet	Gain (Loss) Recorded in
	Outstanding	Notional			
	Contracts	Amount	Asset (Liability)	Line Item	OCI (5)
Interest Rate Swap (1)	1	\$ 117,000	\$ (5,764)	Other liabilities	\$ (3,458)
Interest Rate Swap (2)	1	105,000	(2,643)	Other liabilities	(884)
Foreign Currency Forwards (3)	14	58,500	(214)	Accrued liabilities	
Total	16	\$ 280,500	\$ (8,621)		\$ (4,342)

December 31, 2009

Derivative Contract Type	Number of Contract		Fair Value	Balance Sheet	Gain (Loss) Recorded in
	Outstanding	Notional			
	Contracts	Amount	Asset (Liability)	Line Item	OCI (5)
Interest Rate Swap (1)	1	\$ 126,000	\$ (6,594)	Other liabilities	\$ (3,956)
Interest Rate Swap (2)	1	112,500	(2,769)	Other liabilities	(1,090)
Foreign Currency Forwards (3)	19	117,296	740	Other current assets	
Total	21	\$ 355,796	\$ (8,623)		\$ (5,046)

(1) The Company designates and accounts for this interest rate swap as a cash flow hedge of debt (see Note 8 Debt).

(2) Prior to September 30, 2009, the Company accounted for this interest rate swap as a cash flow hedge of debt. On September 30,

2009, the Company discontinued hedge accounting on this interest rate swap and as a result, the remaining unrecognized loss in OCI is being amortized against earnings through the maturity of the previously hedged debt.

- (3) The Company has foreign exchange transaction risk since it typically enters into transactions in the normal course of business that are denominated in foreign currencies that differ from the local functional currencies in which the Company and its subsidiaries operate. The Company may enter into foreign currency forward exchange contracts to offset the effects of this foreign currency transaction risk. These contracts are normally short term in

duration. Both realized and unrealized gains and losses are recognized in earnings since the Company does not designate these contracts as hedges for accounting purposes.

(4) See Note 12 Fair Value Disclosures for the determination of the fair value of these instruments.

(5) Represents the amount recorded in Other comprehensive income (OCI), net of tax effect.

At March 31, 2010, the Company's derivative counterparties were all large investment grade financial institutions. The Company did not have any collateral arrangements with its derivative counterparties, and none of the derivative contracts contained credit-risk related contingent features.

The following table provides information regarding gains and losses on the Company's derivative contracts that have been recorded in the Condensed Consolidated Statements of Operations (in thousands):

Amount recorded in:	Three Months Ended March 31,	
	2010	2009
Interest expense, net (1)	\$ 2,443	\$ 1,852
Other expense (income), net (2)	726	(2,281)
Total expense (income), net	\$ 3,169	\$ (429)

(1) Includes amounts reclassified from OCI to earnings during the period for

interest rate
swap contracts.

- (2) Includes the net amount of realized and unrealized gains and losses on foreign currency forward contracts.

Table of Contents

Note 12 Fair Value Disclosures

The Company's financial instruments include cash and cash equivalents, fees receivable from customers, accounts payable, and accruals which are normally short-term in nature. The Company believes the carrying amounts of these financial instruments reasonably approximates their fair value.

At March 31, 2010, the Company had \$367.0 million of outstanding floating rate debt, which is carried at amortized cost. The Company believes the carrying amount of the debt reasonably approximates its fair value as the rate of interest on the term loans and revolver are floating rate which reflect current market rates of interest for similar instruments with comparable maturities.

FASB ASC Topic 820 provides a framework for measuring fair value and a valuation hierarchy based upon the transparency of inputs used in the valuation of an asset or liability. Classification within the hierarchy is based upon the lowest level of input that is significant to the resulting fair value measurement. The valuation hierarchy contains three levels:

Level 1 Valuation inputs are unadjusted quoted market prices for identical assets or liabilities in active markets.

Level 2 Valuation inputs are quoted prices for identical assets or liabilities in markets that are not active, quoted market prices for similar assets and liabilities in active markets and other observable inputs directly or indirectly related to the asset or liability being measured.

Level 3 Valuation inputs are unobservable and significant to the fair value measurement.

The following table presents Company assets and liabilities measured at fair value on a recurring basis (in thousands):

Description:	Fair Value March 31, 2010
Assets:	
Deferred compensation assets (1)	\$ 21,119
Liabilities:	
Interest rate swap contracts (2)	\$ 8,406
Foreign currency forward contracts (3)	214
	\$ 8,620

(1) The Company has a supplemental deferred compensation arrangement for the benefit of certain highly compensated officers, managers and other key employees. The assets consist of investments in money market

and mutual funds,
and
company-owned
life insurance.

The money
market and
mutual funds
consist of cash
equivalents or
securities traded
in active markets,
which the
Company
considers the fair
value of these
assets to be based
on a Level 1
input. The value
of the
Company-owned
life insurance is
based on
indirectly
observable prices
which the
Company
considers to be
Level 2 inputs.

- (2) The Company
has two interest
rate swap
contracts (see
Note
11 Derivatives
and Hedging). To
determine the fair
value of the
swaps, the
Company relies
on
mark-to-market
valuations
prepared by
third-party
brokers based on
observable
interest rate yield
curves.
Accordingly, the
fair value of the

swaps is determined under a Level 2 input.

- (3) The Company periodically enters into foreign currency forward exchange contracts to hedge the effects of adverse fluctuations in foreign currency exchange rates (see Note 11 Derivatives and Hedging). Valuation of the foreign currency forward contracts is based on foreign currency exchange rates in active markets; thus the Company measures the fair value of these contracts under a Level 2 input.

Note 13 Employee Benefits

Defined Benefit Pension Plans

The Company has defined-benefit pension plans in several of its international locations. Benefits paid under these plans are based on years of service and level of employee compensation. The Company accounts for material defined benefit plans in accordance with FASB ASC Topics 715 and 960. Net periodic pension expense was \$0.4 million for both the three months ended March 31, 2010 and 2009. None of these plans have plan assets as defined under FASB ASC Topic 960.

Note 14 Contingencies

We are involved in legal proceedings and litigation arising in the ordinary course of business. We believe that the potential liability, if any, in excess of amounts already accrued from all proceedings, claims and litigation will not have a material effect on our financial position or results of operations when resolved in a future period.

Table of Contents

The Company has various agreements that may obligate us to indemnify the other party with respect to certain matters. Generally, these indemnification clauses are included in contracts arising in the normal course of business under which we customarily agree to hold the other party harmless against losses arising from a breach of representations related to such matters as title to assets sold and licensed or certain intellectual property rights. It is not possible to predict the maximum potential amount of future payments under these indemnification agreements due to the conditional nature of the Company's obligations and the unique facts of each particular agreement. Historically, payments made by us under these agreements have not been material. As of March 31, 2010, the Company did not have any indemnification agreements that would require material payments.

Note 15 Subsequent Event

Our corporate headquarters is located in approximately 213,000 square feet of leased office space in three buildings located in Stamford, Connecticut. Our Stamford facility accommodates research and analysis, marketing, sales, client support, production, corporate services, executive offices, and administration. The lease for the Stamford facility was scheduled to expire in October 2010.

On April 16, 2010, the Company entered into an amended and restated lease agreement (the 2010 Lease) to renew the lease on the Stamford headquarters facility. Under the terms of the 2010 Lease, the landlord will provide up to \$25.0 million to be used to renovate the three buildings and the parking areas comprising the facility. The 2010 Lease provides for a term of fifteen years, which commences after the earlier of the completion of all of the renovations or June 1, 2012.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The purpose of the following Management's Discussion and Analysis (MD&A) is to help facilitate the understanding of significant factors influencing the quarterly operating results, financial condition and cash flows of Gartner, Inc. Additionally, the MD&A also conveys our expectations of the potential impact of known trends, events or uncertainties that may impact future results. You should read this discussion in conjunction with our condensed consolidated financial statements and related notes included in this report and in our Annual Report on Form 10-K for the year ended December 31, 2009. Historical results and percentage relationships are not necessarily indicative of operating results for future periods. References to the Company, we, our, and us in this MD&A are to Gartner, Inc. and its subsidiaries.

As previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2009, in December 2009 we acquired AMR Research, Inc. (AMR Research), and Burton Group, Inc. (Burton Group). As a result, the MD&A disclosures herein include the operating results and business measurements of these acquired businesses for the three months ended March 31, 2010, but excludes them for the three months ended March 31, 2009.

Forward-Looking Statements

In addition to historical information, this Quarterly Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are any statements other than statements of historical fact, including statements regarding our expectations, beliefs, hopes, intentions or strategies regarding the future. In some cases, forward-looking statements can be identified by the use of words such as may, will, expects, should, believes, plans, anticipa estimates, predicts, potential, continue, or other words of similar meaning. Forward-looking statements are subject risks and uncertainties that could cause actual results to differ materially from those discussed in, or implied by, the forward-looking statements. Factors that might cause such a difference include, but are not limited to, those discussed in Factors That May Affect Future Performance and elsewhere in this report and in our Annual Report on Form 10-K for the year ended December 31, 2009. Readers should not place undue reliance on these forward-looking statements, which reflect management's opinion only as of the date on which they were made. Except as required by law, we disclaim any obligation to review or update these forward-looking statements to reflect events or circumstances as they occur. Readers also should review carefully any risk factors described in other reports filed by us with the Securities and Exchange Commission.

BUSINESS OVERVIEW

Gartner, Inc. is the world's leading information technology research and advisory company that helps executives use technology to build, guide and grow their enterprises. We offer independent and objective research and analysis on the information technology, computer hardware, software, communications and related technology industries. We provide comprehensive coverage of the IT industry to approximately 10,000 client organizations, including approximately 400 of the Fortune 500 companies, across 80 countries. Our client base consists primarily of CIOs and other senior IT and executives from a wide variety of business enterprises, government agencies and the investment community.

We have three business segments: Research, Consulting and Events.

Research provides insight for CIOs, other IT executives and professionals, business leaders, technology companies and the investment community through research reports and briefings, access to our analysts, as well as peer networking services and membership programs.

Consulting consists primarily of client engagements that utilize our research insight, benchmarking data, problem-solving methodologies and hands on experience to improve the return on an organization's IT investment through assessments of cost, performance, efficiency and quality.

Events consists of various symposia, summits, and conferences focused on the IT industry as a whole, as well as IT applicable to particular industries and particular roles within an organization.

Table of Contents

BUSINESS MEASUREMENTS

We believe the following business measurements are important performance indicators for our business segments:

BUSINESS SEGMENT BUSINESS MEASUREMENTS

Research

Contract value represents the value attributable to all of our subscription-related research products that recognize revenue on a ratable basis. Contract value is calculated as the annualized value of all subscription research contracts in effect at a specific point in time, without regard to the duration of the contract.

Client retention rate represents a measure of client satisfaction and renewed business relationships at a specific point in time. Client retention is calculated on a percentage basis by dividing our current clients, who were also clients a year ago, by all clients from a year ago.

Wallet retention rate represents a measure of the amount of contract value we have retained with clients over a twelve-month period. Wallet retention is calculated on a percentage basis by dividing the contract value of clients, who were clients one year earlier, by the total contract value from a year earlier, excluding the impact of foreign currency exchange. When wallet retention exceeds client retention, it is an indication of retention of higher-spending clients, or increased spending by retained clients, or both.

Number of executive program members represents the number of paid participants in executive programs.

Consulting

Consulting backlog represents future revenue to be derived from in-process consulting, measurement and strategic advisory services engagements.

Utilization rates represent a measure of productivity of our consultants. Utilization rates are calculated for billable headcount on a percentage basis by dividing total hours billed by total hours available to bill.

Billing Rate represents earned billable revenue divided by total billable hours.

Average annualized revenue per billable headcount represents a measure of the revenue generating ability of an average billable consultant and is calculated periodically by multiplying the average billing rate per hour times the utilization percentage times the billable hours available for one year.

Events

Number of events represents the total number of hosted events completed during the period.

Number of attendees represents the number of people who attend events.

EXECUTIVE SUMMARY OF OPERATIONS AND FINANCIAL POSITION

The cornerstones of our strategy are to focus on producing extraordinary research content, deliver innovative and highly differentiated product offerings, enhance our sales capability, provide world class client service, and improve our operational effectiveness.

We had total revenues of \$295.8 million in the three months ended March 31, 2010, an increase of 8%, or \$22.3 million, compared to the prior year quarter. Revenues increased in our Research and Consulting segments but declined in Events. Excluding the impact of foreign currency translation, total revenues were up about 4%. We had net income of \$19.4 million in the first quarter of 2010, a decrease of 3% from the prior year quarter. Diluted earnings per

share was \$0.19 per share in the first quarter of 2010 compared to \$0.21 in the prior year quarter.

Research revenues were up 12% quarter-over-quarter, to \$210.7 million in the first quarter of 2010 from \$187.7 million in the prior year quarter. The contribution margin was 66% for both periods. At March 31, 2010, Research contract value was over \$864.0 million, an increase of 14% over March 31, 2009, with approximately half of the increase due to the acquisitions of AMR Research and Burton Group. Client retention was 80% and wallet retention was 89% at March 31, 2010.

Consulting revenues increased 2% in the three months ended March 31, 2010 compared to the prior year quarter, despite a 6% decline in billable headcount. The segment contribution margin improved by 2 points. Consultant utilization was 72% for both the three months ended March 31, 2010 and 2009.

Events revenues decreased 13% in the first quarter of 2010 compared to the prior year quarter. The decline was primarily due to timing as we held 9 events in the first quarter of 2010 and 12 in the first quarter of 2009. We

Table of Contents

held 7 on-going events in both quarters, with increased attendees and exhibitors in the 2010 quarter. The quarter-over-quarter segment contribution margin improved by 8 points, mostly due to higher revenues and reduced expenses at our on-going events.

For a more detailed discussion of our segment results, see Segment Results below.

Our cash and cash equivalents totaled \$105.9 million as of March 31, 2010 and we had \$118.6 million of available borrowing capacity under our revolving credit facility. We believe we have a strong cash position and adequate borrowing capacity.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements requires the application of appropriate accounting policies and the use of estimates. The policies discussed below are considered by management to be critical to an understanding of Gartner's financial statements because their application requires complex and subjective management judgments and estimates. Risks related to these critical accounting policies are described below.

Revenue recognition We recognize revenue in accordance with SEC Staff Accounting Bulletin No. 101, Revenue Recognition in Financial Statements (SAB 101), and SEC Staff Accounting Bulletin No. 104, Revenue Recognition (SAB 104). Once all required criteria for revenue recognition have been met, revenue by significant source is accounted for as follows:

Research revenues are derived from subscription contracts for research products and are deferred and recognized ratably over the applicable contract term. Fees from research reprints are recognized when the reprint is shipped.

Consulting revenues are principally generated from fixed fee and time and material engagements. Revenues from fixed fee contracts are recognized on a percentage of completion basis. Revenues from time and materials engagements are recognized as work is delivered and/or services are provided. Revenues related to contract optimization contracts are contingent in nature and are only recognized upon satisfaction of all conditions related to their payment.

Events revenues are deferred and recognized upon the completion of the related symposium, conference or exhibition.

The majority of research contracts are billable upon signing, absent special terms granted on a limited basis from time to time. All research contracts are non-cancelable and non-refundable, except for government contracts that may have cancellation or fiscal funding clauses, which have not produced material cancellations to date. It is our policy to record the entire amount of the contract that is billable as a fee receivable at the time the contract is signed with a corresponding amount as deferred revenue, since the contract represents a legally enforceable claim.

For those government contracts that permit termination, we bill the client the full amount billable under the contract but only record a receivable equal to the earned portion of the contract. In addition, we only record deferred revenue on these government contracts when cash is received. Deferred revenues attributable to government contracts were \$68.9 million and \$65.3 million at March 31, 2010 and December 31, 2009, respectively. In addition, at March 31, 2010 and December 31, 2009, we had not recognized uncollected receivables or deferred revenues relating to government contracts that permit termination of \$6.6 million and \$8.3 million, respectively.

Uncollectible fees receivable The allowance for losses is composed of a bad debt and a sales reserve. Provisions are charged against earnings, either as a reduction in revenues or an increase to expense. The measurement of likely and probable losses and the allowance for losses is based on historical loss experience, aging of outstanding receivables, an assessment of current economic conditions and the financial health of specific clients. This evaluation is inherently judgmental and requires material estimates. These valuation reserves are periodically re-evaluated and adjusted as more information about the ultimate collectibility of fees receivable becomes available. Circumstances that could cause our valuation reserves to increase include changes in our clients' liquidity and credit quality, other factors negatively impacting our clients' ability to pay their obligations as they come due, and the effectiveness of our collection efforts. The following table provides our total fees receivable, along with the related allowance for losses (in thousands):

	March 31, 2010	December 31, 2009
Total fees receivable	\$ 311,365	\$ 325,698
Allowance for losses	(8,200)	(8,100)
Fees receivable, net	\$ 303,165	\$ 317,598

Table of Contents

Impairment of goodwill and other intangible assets The evaluation of goodwill is performed in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 350, which requires goodwill to be assessed for impairment at least annually and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. In addition, an impairment evaluation of our amortizable intangible assets is performed on a periodic basis.

Our annual goodwill assessment requires us to estimate the fair values of our reporting units based on estimates of future business operations and market and economic conditions in developing long-term forecasts. If we determine that the fair value of any reporting unit is less than its carrying amount, we must recognize an impairment charge for a portion of the associated goodwill of that reporting unit against earnings in our financial statements.

Factors we consider important that could trigger a review for impairment include the following:

Significant under-performance relative to historical or projected future operating results;

Significant changes in the manner of our use of acquired assets or the strategy for our overall business;

Significant negative industry or economic trends;

Significant decline in our stock price for a sustained period; and

Our market capitalization relative to net book value.

Due to the numerous variables associated with our judgments and assumptions relating to the valuation of the reporting units and the effects of changes in circumstances affecting these valuations, both the precision and reliability of the resulting estimates are subject to uncertainty, and as additional information becomes known, we may change our estimates.

We completed our annual goodwill impairment testing in the quarter ended September 30, 2009 and concluded that the fair values of each of the Company's reporting units substantially exceeded their respective carrying values.

Accounting for income taxes As we prepare our consolidated financial statements, we estimate our income taxes in each of the jurisdictions where we operate. This process involves estimating our current tax expense together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included within our consolidated balance sheets. We record a valuation allowance to reduce our deferred tax assets when future realization is in question. We consider the availability of loss carryforwards, existing deferred tax liabilities, future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In the event we determine that we are able to realize our deferred tax assets in the future in excess of our net recorded amount, an adjustment is made to reduce the valuation allowance and increase income in the period such determination is made. Likewise, if we determine that we will not be able to realize all or part of our net deferred tax asset in the future, an adjustment to the valuation allowance is charged against income in the period such determination is made.

Accounting for stock-based compensation The Company accounts for stock-based compensation in accordance with FASB ASC Topics 505 and 718, as interpreted by SEC Staff Accounting Bulletins No. 107 (SAB No. 107) and No. 110 (SAB No. 110). The Company recognizes stock-based compensation expense, which is based on the fair value of the award on the date of grant, over the related service period, net of estimated forfeitures (see Note 5 Stock-Based Compensation in the Notes to the Condensed Consolidated Financial Statements).

Determining the appropriate fair value model and calculating the fair value of stock compensation awards requires the input of certain highly complex and subjective assumptions, including the expected life of the stock compensation awards and the Company's Common Stock price volatility. In addition, determining the appropriate amount of associated periodic expense requires management to estimate the rate of employee forfeitures and the likelihood of achievement of certain performance targets. The assumptions used in calculating the fair value of stock compensation awards and the associated periodic expense represent management's best estimates, but these estimates involve inherent uncertainties and the application of judgment. As a result, if factors change and the Company deems it necessary in the future to modify the assumptions it made or to use different assumptions, or if the quantity and nature

of the

Table of Contents

Company's stock-based compensation awards changes, then the amount of expense may need to be adjusted and future stock compensation expense could be materially different from what has been recorded in the current period.

Restructuring and other accruals We may record accruals for severance costs, costs associated with excess facilities that we have leased, contract terminations, asset impairments, and other items as a result of on-going actions we undertake to streamline our organization, reposition certain businesses and reduce ongoing costs. Estimates of costs to be incurred to complete these actions, such as future lease payments, sublease income, the fair value of assets, and severance and related benefits, are based on assumptions at the time the actions are initiated. These accruals may need to be adjusted to the extent actual costs differ from such estimates. In addition, these actions may be revised due to changes in business conditions that we did not foresee at the time such plans were approved.

We also record accruals during the year for our various employee cash incentive programs. Amounts accrued at the end of each reporting period are based on our estimates and may require adjustment as the ultimate amount paid for these incentives are sometimes not known with certainty until after year end.

RESULTS OF OPERATIONS**Overall Results**

The following table summarizes the changes in selected line items in our interim Condensed Consolidated Statements of Operation for the periods indicated (dollars in thousands):

	Three Months Ended March 31, 2010 (1)	Three Months Ended March 31, 2009	Income Increase (Decrease) In \$	Income Increase (Decrease) In %
Total revenues	\$ 295,833	\$ 273,533	\$ 22,300	8%
Costs and expenses:				
Cost of services & product development	123,046	116,644	(6,402)	(5)%
Selling, general and administrative	130,568	115,564	(15,004)	(13)%
Depreciation	6,584	6,475	(109)	(2)%
Amortization of intangibles	2,926	399	(2,527)	>(100)%
Acquisition & integration charges	3,511		(3,511)	(100)%
Operating income	29,198	34,451	(5,253)	(15)%
Interest expense, net	(3,384)	(4,180)	796	19%
Other income (expense), net	1,752	(1,246)	2,998	>100%
Provision for income taxes	8,163	9,029	866	10%
Net income	\$ 19,403	\$ 19,996	\$ (593)	(3)%

(1) Includes the operating results of AMR Research and Burton Group, which we acquired in December 2009.

Total revenues for the three months ended March 31, 2010, increased \$22.3 million, or 8%, compared to the same period in 2009. Revenues increased in our Research and Consulting segments but declined in Events. Excluding the positive impact of foreign currency, total revenues for the three months ended March 31, 2010 were up about 4% over the prior year quarter. Of the \$22.3 million revenue increase, approximately \$11.8 million was attributable to the acquired businesses of AMR Research and Burton Group.

Please refer to the section of this MD&A below entitled **Segment Results** for a further discussion of revenues and results by segment.

Cost of services and product development was 5% higher quarter-over-quarter, or \$6.4 million, with about \$4.5 million of the increase due to unfavorable foreign currency impact. The remaining increase was primarily due to increased payroll costs, to include the additional headcount related to the AMR Research and Burton Group businesses, and higher charges for stock-based

Table of Contents

compensation. Somewhat offsetting these increases were lower conference expenses due to changes in our events calendar. Cost of services and product development as a percentage of sales decreased by 1 point, to 42% from 43%, due to improved contribution margins in our Consulting and Events segments.

Selling, general and administrative (SG&A) was \$15.0 million higher quarter-over-quarter, or 13%. The unfavorable impact of foreign currency translation increased expense by about \$4.6 million. We also had approximately \$11.6 million of higher sales commissions, payroll, and other personnel charges, which includes additional headcount costs due to the AMR Research and Burton Group acquisitions, as well as higher stock-based compensation expense. Somewhat offsetting these increases were \$1.2 million in reduced charges for severance, recruiting, and other items. Depreciation expense increased 2% quarter-over-quarter. Capital spending was \$3.4 million in the first quarter of 2010 compared to \$4.5 million in the same period in 2009, a 25% decline.

Amortization of intangibles was \$2.9 million in the three months ended March 31, 2010 compared to \$0.4 million in the same period in 2009. The increase was due to the intangibles recorded related to the acquisitions of AMR Research and Burton Group in December 2009.

Acquisition and Integration Charges was \$3.5 million in the three months ended March 31, 2010. These charges relate to the acquisitions of AMR Research and Burton Group in December 2009, and include legal, consulting, severance, and other costs.

Operating Income decreased 15% quarter-over-quarter, to \$29.2 million in the three months ended March 31, 2010 compared to \$34.5 million the same period in the prior year. Operating income as a percentage of revenues declined 3 points quarter-over-quarter, primarily due to higher SG&A charges, as well as additional intangible amortization and the acquisition and integration charges related to the AMR Research and Burton Group acquisitions.

Please refer to the section of this MD&A entitled Segment Results below for a further discussion of revenues and results by segment.

Interest Expense, Net declined 19% quarter-over-quarter. The decline was mostly due to a reduction in the weighted-average amount of debt outstanding.

Other Income (Expense), Net for the three months ended March 31, 2010 primarily consisted of a \$2.4 million gain due to an insurance recovery of a prior period loss, partially offset by \$0.6 million in net foreign currency exchange losses.

Provision For Income Taxes was \$8.2 million for the three months ended March 31, 2010 as compared to \$9.0 million in the prior year quarter. The effective tax rate was 29.6% for the three months ended March 31, 2010 and 31.1% for the same period in 2009. The decrease in the effective tax rate was primarily due to a change in the estimated mix of pre-tax income by jurisdiction.

Net Income was \$19.4 million and \$20.0 million for the three months ending March 31, 2010 and 2009, respectively. Basic earnings per share declared \$0.01 per share, while diluted earnings per share was down by \$0.02 per share quarter-over-quarter due to lower net income and a higher number of diluted shares in the first quarter of 2010.

SEGMENT RESULTS

We evaluate reportable segment performance and allocate resources based on gross contribution margin. Gross contribution is defined as operating income excluding certain Cost of services and product development charges, SG&A expenses, Depreciation, Amortization of intangibles, Acquisition and integration charges, and Other charges. Gross contribution margin is defined as gross contribution as a percentage of revenues.

Table of Contents

The following sections present the results of our three segments:

Research

	As Of And For The Three Months Ended March 31, 2010 (1)	As Of And For The Three Months Ended March 31, 2009	Increase (Decrease)	Percentage Increase (Decrease)
Financial Measurements:

Exec. program members	3,825	3,573	252	7%

(1) Includes AMR Research and Burton Group, which we acquired in December 2009.

(2) Dollars in thousands.

Research revenues increased 12% on a quarter-over-quarter basis and excluding the favorable effect of foreign currency translation, revenues were up about 8%. Slightly less than half of the \$23.0 million revenue increase was attributable to the AMR Research and Burton Group businesses. The segment gross contribution margin was flat quarter-over-quarter, at 66%.

Research contract value increased \$103.7 million compared to the prior year, but excluding the impact of foreign currency translation, research contract value was up about 10%. Approximately half of the increase in contract value was attributable to the AMR Research and Burton Group businesses.

Consulting

As Of And For The Three Months	As Of And For The Three Months
---	---

	Ended March 31, 2010 (1)	Ended March 31, 2009	Increase (Decrease)	Percentage Increase (Decrease)

Average annualized revenue per billable headcount (2)	\$ 441	\$ 413	\$ 28	7%

(1) Includes AMR Research and Burton Group, which we acquired in December 2009.

(2) Dollars in thousands.

The quarter-over-quarter revenue increase was due to higher revenues in our core consulting and strategic advisory services (SAS) businesses, which was slightly offset by lower revenues in our contract optimization business. Consulting revenues decreased about 2% quarter-over-quarter adjusted for foreign currency impact. The revenue contributions from AMR Research and Burton Group in the three months ended March 31, 2010, were not significant. Excluding the favorable impact from foreign currency translation, core consulting revenues were down slightly versus the prior year, principally due to lower billable headcount which was partially offset by improved billing rates. The reduction in revenues in our contract optimization business reflects a stronger than usual quarter for this business in the 2009 quarter.

The gross contribution margin improved by 2 points quarter-over-quarter due to the higher billing rate in core consulting and additional SAS days fulfilled.

Table of Contents*Events*

	As Of And For The Three Months Ended March 31, 2010 (1)	As Of And For The Three Months Ended March 31, 2009	Increase (Decrease)	Percentage Increase (Decrease)
Financial Measurements:				
Revenues (2)	\$ 13,521	\$ 15,526	\$ (2,005)	(13)%

Business Measurements:				
Number of events	9	12	(3)	(25)%
Number of attendees	3,374	3,883	(509)	(13)%

(1) Includes AMR Research and Burton Group, which we acquired in December 2009.

(2) Dollars in thousands.

Events revenues declined 13% quarter-over-quarter but excluding the favorable impact of foreign currency translation, revenues were down about 17%.

The revenue decrease was primarily due to the timing of our events calendar and to a lesser extent, the impact of discontinued events. We held 9 events in the three months ended March 31, 2010, consisting of 7 on-going events and 2 events moved in to the quarter. Two events that had been held in the first quarter of 2009 were discontinued and 3 others were moved to another quarter in 2010. Partially offsetting the revenue decline due to timing and discontinued events was a \$0.6 million increase in revenue from our 7 on-going events, with the number of attendees up 2% and the number of exhibitors up 5%. We had higher average attendee revenue but flat average exhibitor revenue from these on-going events in the 2010 quarter.

The gross contribution margin was up 8 points quarter-over-quarter, due to higher revenue and reduced expenses at our on-going events and to a lesser extent, the discontinuing of lower margin events.

LIQUIDITY AND CAPITAL RESOURCES

We finance our operations primarily through cash generated from our on-going operating activities. As of March 31, 2010, we had \$105.9 million of cash and cash equivalents and \$118.6 million of available borrowing capacity under our revolving credit facility (not including the \$100.0 million expansion feature). Our cash and cash equivalents are held in numerous locations throughout the world, with approximately 92% held outside the United States as of March 31, 2010.

Edgar Filing: GARTNER INC - Form 10-Q

We believe that the cash we expect to earn from our on-going operating activities, our existing cash balances, and the borrowing capacity we have under our revolving credit facility will be sufficient for our expected short-term and foreseeable long-term operating needs.

The following table summarizes the changes in the Company's cash and cash equivalents (in thousands):

	Three Months Ended March 31, 2010	Three Months Ended March 31, 2009	Dollar Increase (Decrease)
Cash provided by operating activities	\$ (7,966)	\$ 14,827	\$ (22,793)
Cash used by investing activities	(15,108)	(4,536)	(10,572)
Cash provided (used) in financing activities	14,730	(79,506)	94,236
Net (decrease) increase	(8,344)	(69,215)	60,871
Effects of exchange rates	(2,317)	(1,451)	(866)
Beginning cash and cash equivalents	116,574	140,929	(24,355)
Ending cash and cash equivalents	\$ 105,913	\$ 70,263	\$ 35,650

Table of Contents*Operating*

While net income was down slightly quarter-over-quarter, our operating cash flow decreased by \$22.8 million, due to several factors. We had \$12.0 million in higher commission and incentive payments, due to our strong sales performance in the fourth quarter of 2009, as well as higher payables of \$6.5 million, which was timing related. We also paid approximately \$3.5 million in acquisition and integration payments related to the acquisitions of AMR Research and Burton Group which closed in December 2009, and we had a decline of about \$9.0 million in our other working capital accounts. Somewhat offsetting these declines were \$2.4 million in cash we received from an insurance recovery and approximately \$5.8 million in lower cash payments for severance, interest, and taxes.

Investing

We used an additional \$10.6 million of cash in the three months ended March 31, 2010 compared to the prior year quarter, due to \$11.7 million of cash paid in the first quarter of 2010 related to the acquisition of Burton Group in December 2009. We used \$3.4 million of cash for capital expenditures in 2010 compared to \$4.5 million in 2009.

Financing

Cash provided from our financing activities was \$14.7 million in the three months ended March 31, 2010, compared to cash used of \$79.5 million in the prior year quarter. On a net basis, we borrowed an additional \$38.0 million in the three months ended March 31, 2010, compared to payments of \$78.3 million in the prior year quarter. We also realized \$11.9 million from option exercises and excess tax benefits in the 2010 period compared to \$0.9 million in the 2009 period. We used an additional \$33.0 million for share repurchases in 2010, with \$35.2 million used in the first quarter of 2010 compared to \$2.2 million in the first quarter of 2009.

OBLIGATIONS AND COMMITMENTS*Credit Agreement*

At March 31, 2010, we had \$367.0 million outstanding under our Credit Agreement, which includes two amortizing term loans and a \$300.0 million revolving credit facility. The revolving credit facility may be increased up to an additional \$100.0 million at our lenders' discretion (the expansion feature), for a total revolving credit facility of \$400.0 million. However, the \$100.0 million expansion feature may or may not be available to us depending upon prevailing credit market conditions.

The term loans are being repaid in consecutive quarterly installments plus a final payment due on January 31, 2012, and may be prepaid at any time without penalty or premium at our option. The revolving loans may be borrowed, repaid and reborrowed until January 31, 2012, at which time all amounts borrowed must be repaid. See Note 8 Debt in the accompanying Notes to the interim condensed consolidated financial statements for additional information regarding the Company's Credit Agreement.

Off-Balance Sheet Arrangements

Through March 31, 2010, we have not entered into any off-balance sheet arrangements or transactions with unconsolidated entities or other persons.

Stamford Headquarters Lease Renewal

Our corporate headquarters is located in approximately 213,000 square feet of leased office space in three buildings located in Stamford, Connecticut. Our Stamford facility accommodates research and analysis, marketing, sales, client support, production, corporate services, executive offices, and administration. The lease for the Stamford facility was scheduled to expire in October 2010.

On April 16, 2010, the Company entered into an amended and restated lease agreement (the 2010 Lease) to renew the lease on the Stamford headquarters facility. Under the terms of the 2010 Lease, the landlord will provide up to \$25.0 million to be used to renovate the three buildings and the parking areas comprising the facility. The 2010 Lease provides for a term of fifteen years, which commences after the earlier of the completion of all of the renovations or June 1, 2012.

BUSINESS AND TRENDS

Our quarterly and annual revenue, operating income, and cash flow fluctuate as a result of many factors, including: the timing of our Symposium/ITxpo series that normally occurs during the fourth calendar quarter, and other events; the amount of new business generated; the mix of domestic and international business; changes in market demand for our products and services; changes in foreign currency rates; the timing of the development, introduction and marketing of

new products and services; competition in the industry; and other factors. The potential fluctuations in our operating income could cause period-to-period comparisons of operating results not to be meaningful and could provide an unreliable indication of future operating results.

Table of Contents**FACTORS THAT MAY AFFECT FUTURE PERFORMANCE**

We operate in a very competitive and rapidly changing environment that involves numerous risks and uncertainties, some of which are beyond our control. A description of the risk factors associated with our business is included under Risk Factors contained in Item 1A. of our 2009 Annual Report on Form 10-K which is incorporated herein by reference.

RECENTLY ISSUED ACCOUNTING STANDARDS

In September 2009, the FASB ratified ASC Accounting Standards Update (ASU) 2009-14, *Certain Revenue Arrangements That Include Software Elements*. Under ASU 2009-14, all tangible products containing both software and non-software components, that function together to deliver the product's essential functionality, will no longer be within the scope of rules governing Software revenue recognition (formerly known as SOP 97-2). This means that entities that sell joint hardware and software products that meet the scope exception (i.e., essential functionality) will be required to follow the guidance in ASU 2009-13 below. The Update provides a list of items to consider when determining whether the software and non-software components function together to deliver a product's essential functionality. We are currently evaluating the impact of this Update but do not believe it will have any significant impact on the Company's consolidated financial statements.

In September 2009, the FASB ratified ASU 2009-13, *Revenue Arrangements with Multiple Deliverables*. ASU 2009-13 requires companies to allocate revenue in arrangements involving multiple deliverables based on the estimated selling price of each deliverable, even though such deliverables are not sold separately either by the company itself or other vendors. ASU 2009-13 eliminates the requirement that all undelivered elements must have objective and reliable evidence of fair value before a company can recognize the portion of the overall arrangement fee that is attributable to items that already have been delivered. As a result, the new guidance is expected to allow some companies to recognize revenue on transactions that involve multiple deliverables earlier than under current requirements. ASU 2009-13 will be effective for Gartner beginning in the first quarter of fiscal year 2012. Early adoption is permitted. We are currently evaluating the impact of this Update but do not believe it will have any significant impact on the Company's consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*Interest Rate Risk*

We have exposure to changes in interest rates arising from the \$187.0 million outstanding on our two term loans and \$180.0 million outstanding on our revolver as of March 31, 2010. All of these borrowings are floating rate, which may be either prime-based or LIBOR-based. Interest rates under these borrowings include a base rate plus a margin currently between 0.00% and 0.75% on prime borrowings and between .625% and 1.75% on LIBOR-based borrowings.

As of March 31, 2010, the annualized interest rates on the original term loan, the 2008 term loan, and the revolver were 1.18%, 1.55%, and 1.15%, respectively. The rates on the original and 2008 term loans consisted of a three-month LIBOR base rate plus margins of 0.88% and 1.25%, respectively. The rate on the revolver consisted of a LIBOR base rate plus a margin of 0.88%.

We have an interest rate swap contract which effectively converts the floating base rate on the original term loan to a fixed rate. As a result, our exposure to interest rate risk on the original term loan is capped. Including the effect of the interest rate swap, the annualized interest rate on the original term loan was 5.94% as of March 31, 2010.

The Company does not hedge the interest rate risk on the 2008 term loan and the revolver. Accordingly, we are exposed to interest rate risk on this debt. A 25 basis point increase or decrease in interest rates would change pre-tax annual interest expense on the \$300.0 million revolver and the \$70.0 million currently outstanding on the 2008 term loan by approximately \$0.9 million.

Foreign Currency Exchange Risk

We have clients in 80 countries and as a result we conduct business in numerous currencies other than the U.S dollar. Among the major foreign currencies in which we conduct business are the Euro, the British Pound, the Japanese Yen, the Australian dollar, and the Canadian dollar. Our foreign currency exposure results in both translation risk and transaction risk:

Table of Contents

Translation Risk

We are exposed to foreign currency translation risk since the functional currencies of our foreign operations are generally denominated in the local currency. Translation risk arises since the assets and liabilities that we report for our foreign subsidiaries are translated into U.S. dollars at the exchange rates in effect at the balance sheet dates, and these exchange rates fluctuate over time. These foreign currency translation adjustments are deferred and are recorded as a component of stockholders' equity and do not impact our operating results.

A measure of the potential impact of foreign currency translation on our Condensed Consolidated Balance Sheets can be determined through a sensitivity analysis of our cash and cash equivalents. As of March 31, 2010, we had \$105.9 million of cash and cash equivalents, a substantial portion of which was denominated in foreign currencies. If foreign exchange rates in comparison to the U.S. dollar changed by 10%, the amount of cash and cash equivalents we would have reported on March 31, 2010, would have increased or decreased by approximately \$6.0 million.

Our foreign subsidiaries generally operate in a local functional currency that differs from the U.S. dollar. Revenues and expenses in these foreign currencies translate into higher or lower revenues and expenses in U.S. dollars as the U.S. dollar continuously weakens or strengthens against these other currencies. Therefore, changes in exchange rates may affect our consolidated revenues and expenses (as expressed in U.S. dollars) from foreign operations.

Historically, this impact on our consolidated earnings has not been material since foreign currency movements in the major currencies in which we operate tend to impact our revenues and expenses fairly equally.

Translation Risk

We also have foreign exchange transaction risk since we typically enter into transactions in the normal course of business that are denominated in foreign currencies that differ from local functional currencies in which the foreign subsidiaries operate.

We typically enter into foreign currency forward exchange contracts to offset the effects of this foreign currency transaction risk. These contracts are normally short term in duration. Unrealized and realized gains and losses are recognized in earnings. At March 31, 2010, we had 14 foreign currency forward contracts outstanding with a total notional amount of \$58.5 million and a net unrealized loss of approximately \$0.2 million. All of these contracts matured by the end of April 2010.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to concentration of credit risk consist primarily of short-term, highly liquid investments classified as cash equivalents, accounts receivable, and interest rate swap contracts. The majority of the Company's cash equivalent investments and its two interest rate swap contracts are with investment grade commercial banks that are participants in the Company's Credit Agreement. Accounts receivable balances deemed to be collectible from customers have limited concentration of credit risk due to our diverse customer base and geographic dispersion.

ITEM 4. CONTROLS AND PROCEDURES

We have established disclosure controls and procedures that are designed to ensure that the information we are required to disclose in our reports filed under the Securities Exchange Act of 1934, as amended (the "Act"), is recorded, processed, summarized and reported in a timely manner. Specifically, these controls and procedures ensure that the information is accumulated and communicated to our executive management team, including our chief executive officer and our chief financial officer, to allow timely decisions regarding required disclosure.

Table of Contents

Management conducted an evaluation, as of March 31, 2010, of the effectiveness of the design and operation of our disclosure controls and procedures, under the supervision and with the participation of our chief executive officer and chief financial officer. Based upon that evaluation, our chief executive officer and chief financial officer have concluded that the Company's disclosure controls and procedures are effective in alerting them in a timely manner to material Company information required to be disclosed by us in reports filed under the Act.

In addition, there have been no changes in the Company's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION**ITEM 1. LEGAL PROCEEDINGS**

We are involved in legal and administrative proceedings and litigation arising in the ordinary course of business. We believe that the potential liability, if any, in excess of amounts already accrued from all proceedings, claims and litigation will not have a material effect on our financial position or results of operations when resolved in a future period.

ITEM 1A. RISK FACTORS

A description of the risk factors associated with our business is included under "Risk Factors" contained in Item 1A. of our 2009 Annual Report on Form 10-K and is incorporated herein by reference.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no unregistered sales of equity securities during the period covered by this report.

Issuer Purchases of Equity Securities

The Company has a \$250.0 million authorized stock repurchase program, of which \$43.5 million remained available as of March 31, 2010. The following table provides detail related to repurchases of our common stock for treasury in the three months ended March 31, 2010 under this program:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Approximate Dollar Value of Shares that may yet be Purchased Under our Share Repurchase Program (in thousands)
2010			
January	2,291	\$ 21.39	
February	949,467	22.93	
March	551,942	24.18	
Total	1,503,700	\$ 23.39	\$ 43.5
