

CASCADE NATURAL GAS CORP

Form 10-Q

August 08, 2005

FORM 10-Q

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2005

Commission file number: 1-7196

CASCADE NATURAL GAS CORPORATION

(Exact name of Registrant as specified in its charter)

Washington (State or other jurisdiction of incorporation or organization)	91-0599090 (I.R.S. Employer Identification No.)
222 Fairview Avenue North, Seattle, WA (Address of principal executive offices)	98109 (Zip code)
(Registrant's telephone number including area code)	(206) 624-3900

Indicate by checkmark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by checkmark whether the registrant is an accelerated filer (as defined in Rule 23b-2 of the Exchange Act).
Yes No

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

Title	Outstanding
Common Stock, Par Value \$1 per Share	11,387,034 as of July 29, 2005

CASCADE NATURAL GAS CORPORATION

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

THREE-AND NINE-MONTH PERIODS ENDED JUNE 30

Edgar Filing: CASCADE NATURAL GAS CORP - Form 10-Q

The preceding statements were taken from the books and records of the Company and reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the interim periods. Because of the highly seasonal nature of the natural gas distribution business, with revenues and operating margins concentrated in the first two fiscal quarters, earnings or loss for any portion of the year are disproportionate in relation to the full year.

Reference is directed to the Notes to Consolidated Financial Statements contained in the 2004 Annual Report on Form 10-K for the fiscal year ended September 30, 2004, and comments included therein under Management's Discussion and Analysis of Financial Condition and Results of Operations .

Note 1. Restatement

Edgar Filing: CASCADE NATURAL GAS CORP - Form 10-Q

As disclosed in the Quarterly Report on Form 10-Q for the quarter ended June 30, 2004, the Company restated its earnings for the quarter ended March 31, 2004. This restatement was a result of the remeasurement of retiree medical expense, with a remeasurement date of December 31, 2003. This remeasurement reduced operating expenses by \$158,000 for the three- and six-month periods ended March 31, 2004.

Fiscal year 2004 amounts reported in this quarterly report, including amounts in the following footnotes, reflect the restated amounts through June 30, 2004.

Note 2. New Accounting Standards

FIN 47: In March 2005, the FASB issued Interpretation No. 47, Accounting for Conditional Asset Retirement Obligations, an interpretation of FASB Statement No. 143 (FIN 47). FIN 47 clarifies that the term conditional asset retirement obligation refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the Company. The Company will be required to recognize a liability for the fair value of a conditional asset retirement obligation if the fair value of the liability can be reasonably estimated. This interpretation also clarifies when the Company would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. The Company will be required to adopt this interpretation by the end of fiscal year 2005. The Company is evaluating the impact this statement will have on its financial condition and results of operations.

Note 3. Earnings Per Share

The following table sets forth the calculation of earnings per share.

	Three Months Ended		Nine Months Ended	
	Jun 30, 2005	Jun 30, 2004	Jun 30, 2005	Jun 30, 2004
	(in thousands except per-share data)			
Net income (loss)	\$ (1,127)	\$ (666)	\$ 12,857	\$ 15,907
Weighted average shares outstanding	11,367	11,227	11,319	11,193
Basic earnings (loss) per share	\$ (0.10)	\$ (0.06)	\$ 1.14	\$ 1.42
Weighted average shares outstanding	11,367	11,227	11,319	11,193

Net Periodic Benefit Cost Recognized	\$ (44)	\$ 21	\$ (133)	\$ 199

DEFINED CONTRIBUTION PENSION PLAN

Net Periodic Benefit Cost Recognized	\$	229	\$	242	\$	721	\$	729
--------------------------------------	----	-----	----	-----	----	-----	----	-----

Retirement Plan Funding

Edgar Filing: CASCADE NATURAL GAS CORP - Form 10-Q

For the nine months ended June 30, 2005, \$2,735,000 of contributions were made to the Company's defined benefit pension plans. The Company presently anticipates contributing an additional \$630,000 to fund its pension plans for a total of \$3,365,000 in fiscal 2005.

Note 5. Stock-Based Compensation

The Company follows the disclosure-only provisions of Statement of Financial Accounting Standards (FAS) No. 123, Accounting for Stock-Based Compensation . Accordingly, employee stock options are accounted for under Accounting Principle Board Opinion (APB) No. 25, Accounting for Stock Issued to Employees . Stock options are granted at exercise prices not less than the fair value of common stock on the date of grant. Under APB No. 25, no compensation expense is recognized related to the Company's stock option plans. If compensation expense for the Company's stock option plans was determined consistent with FAS No. 123, net income and earnings per common share would have been the following pro forma amounts for the three- and nine-month periods ended June 30:

	Three Months Ended		Nine Months Ended	
	Jun 30, 2005	Jun 30, 2004	Jun 30, 2005	Jun 30, 2004
	(in thousands except per-share data)			
Net income (loss)				
As reported	\$ (1,127)	\$ (666)	\$ 12,857	\$ 15,907
Less total stock-based employee compensation expense determined under the fair value method, net of tax	\$	13	\$ 26	40
Pro forma net income	\$ (1,127)	\$ (679)	\$ 12,831	\$ 15,867
Earnings (loss) per share, basic and diluted				
As reported	\$ (0.10)	\$ (0.06)	\$ 1.14	\$ 1.42
Pro forma	\$ (0.10)	\$ (0.06)	\$ 1.13	\$ 1.42

Note 6. Commitments and Contingencies

Unregistered Shares of Common Stock Under DRIP

In connection with modifying administrative procedures and updating the prospectus for the Company's Automatic Dividend Reinvestment Plan (the DRIP), the Company determined in April 2005 that the number of shares of its common stock issued pursuant to the DRIP had exceeded the number of shares previously registered for such purpose under the Securities Act of 1933, as amended (the Securities Act). As a result, the Company may have failed to comply with the registration or qualification requirements of federal and applicable state securities laws with respect to such shares. In May 2005 the Company registered 500,000 additional shares of common stock for future issuance under the DRIP.

Based upon the Company's ongoing investigation, it appears that 121,458 shares of its common stock were issued to approximately 3,500 DRIP participants between August 2003 and April 2005 in excess of the number of shares registered specifically for such purpose. Such shares were issued at the following prices:

Purchase Price	Number of Shares
\$18.18	7,734
\$18.99	21,877
\$19.00	56,430
\$20.00	21,556
\$20.99	13,861
\$21.00	
\$21.99	
\$22.00	
\$22.95	

The closing market price for the Company's common stock on August 1, 2005, was \$21.10.

The Company is continuing to evaluate the impact of the issuance of unregistered shares on the DRIP participants affected and is considering appropriate actions to be taken, if any, to rectify this oversight. Should the Company repurchase all of the unregistered shares at the purchase prices for which

they were issued, cash of approximately \$2,493,000 would be used to retire 121,458 outstanding shares. Should the Company repurchase only the unregistered shares sold since August 1, 2004 (approximately the period covered by the one-year statute of limitations applicable to sales of unregistered shares under the Securities Act), cash of approximately \$1,106,000 would be used to retire approximately 53,495 outstanding shares. Current estimates of the costs of conducting a rescission offer as compared to the potential for financial benefit to participants in the DRIP indicate that a rescission offer may not be in the best interests of the Company or its shareholders, including the participants in the DRIP.

Environmental Matters

There are two claims against the Company for cleanup of alleged environmental contamination related to manufactured gas plant sites previously operated by companies that were subsequently merged into the Company.

The first claim was received in 1995 and relates to a site in Oregon. An investigation has shown that soil and groundwater contamination exists at the site. There are parties in addition to the Company that are potentially liable for cleanup of the contamination. Some of these other parties have shared in the costs expended to date to investigate the site and it is expected that these and other parties will share in the cleanup costs. Several alternatives for remediation of the site have been identified, with preliminary estimates for cleanup ranging from approximately \$500,000 to \$11,000,000. It is not known at this time what share of the cleanup costs will actually be borne by Cascade. The second claim was received in 1997 and relates to a site in Washington. An investigation has determined that there is evidence of contamination at the site, but there is also evidence that other property owners may have contributed to the contamination. There is currently not enough information available to estimate the potential liability associated with this claim, but the Company and other parties may become more involved in investigations of the nature and extent of contamination and possible remediation of the site as increased interest has been expressed concerning its potential for redevelopment.

Management first intends to pursue reimbursement from its insurance carriers. In the event the insurance proceeds do not completely cover the costs, management intends to seek recovery from its customers through increased rates. There is precedent for such recovery through increased rates, as both the Washington Utilities and Transportation Commission (WUTC) and the Oregon Public Utilities Commission (OPUC) have previously allowed regulated utilities to increase customer rates to cover similar costs.

Litigation and Other Contingencies

Various lawsuits, claims, and contingent liabilities may arise from time-to-time from the conduct of the Company's business. No other claims now pending, in the opinion of management, are expected to have a material effect on the Company's financial position, results of operations, cash flows, or liquidity.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is management's assessment of the Company's financial condition and a discussion of the principal factors that affected consolidated results of operations and cash flows for the three- and nine-month periods ended June 30, 2005 and 2004.

OVERVIEW

The Company is a local distribution company (LDC) serving approximately 228,000 customers in the States of Washington and Oregon. The Company's service area consists primarily of relatively small cities and rural communities rather than larger urban areas. The Company's primary source of revenue and operating margin is the distribution of natural gas to end-use residential, commercial, industrial, and institutional customers. Revenues are also derived from providing gas management and other services to some of its large industrial and commercial customers. The Company's rates and practices are regulated by the Washington Utilities and Transportation Commission (WUTC) and the Oregon Public Utility Commission (OPUC).

Key elements of the Company's strategy include:

Remain focused on delivering natural gas to a growing residential, commercial, and industrial customer base in Washington and Oregon.

Provide gas management, engineering, construction and maintenance services for customer-owned natural gas facilities when the risk / reward ratio is appropriate.

Pursue additional opportunities closely aligned with the Company's core business by building on its existing resources and customers.

Continuously evaluate the most effective utilization of corporate resources.

Opportunities and Challenges

The Company operates in a diverse service territory over a wide geographic area relative to its overall size and number of customers. The economies of various parts of the service area are supported by a variety of industries, and are affected by the conditions that impact those industries.

Rates charged by the Company for its utility services are regulated by the WUTC and the OPUC. The Company's basic business strategy is to minimize reliance on rate increases for earnings growth. However, realization of risks affecting earnings could require the Company to seek approval of higher rates. The results of such rate requests are subject to uncertainties associated with the regulatory process.

The Company earns more than one third of its operating margin from industrial and electric generation customers. Loss of major industrial customers, or unfavorable conditions affecting an industry segment, could have a detrimental impact on the Company's earnings. Many external factors over which the Company has no control can significantly impact the amount of natural gas consumed by industrial and electric generation customers, and consequently the margins earned by the Company.

Revenues and margins from the Company's residential and small commercial customers are highly weather sensitive. In a cold year, the Company's earnings are boosted by the effects of the weather, and conversely in a warm year, the Company's earnings suffer. Overall revenues and margins are also impacted negatively by customers taking measures to reduce energy usage. The increasing cost of energy in recent years, including the wholesale cost of natural gas, continues to encourage such measures.

The Company continues to explore alternative rate structures such as decoupling mechanisms that utility regulators in many jurisdictions have approved. The WUTC has opened a Rulemaking Docket to investigate decoupling and held a workshop under this docket on May 12. The Company presented its proposed mechanism at this workshop. Interested parties, including the Company, have filed additional written comments. The Company continues to work with the WUTC on its proposed decoupling mechanism and hopes to have resolution by the fall.

Edgar Filing: CASCADE NATURAL GAS CORP - Form 10-Q

Prospects for continuing strong residential and commercial customer growth are excellent. The pace of new home and commercial construction remains steady in the Company's communities. Good potential also exists for converting to natural gas from electricity or other fuels, homes and businesses located on or near the Company's current lines, as well as for expanding the system into adjacent areas.

RESULTS OF OPERATIONS

Edgar Filing: CASCADE NATURAL GAS CORP - Form 10-Q

Net loss for the third quarter of fiscal 2005 (quarter ended June 30, 2005) was \$1,127,000, or \$0.10 per share, basic and diluted, compared to a net loss of \$666,000, or \$0.06 per share, basic and diluted, for the quarter ended June 30, 2004. Primary factors negatively impacting the quarterly comparisons were:

Lower 2005 distribution and gas management margins from industrial customers

Executive transition costs in 2005

Increased uncollectible accounts expense in 2005

Increased purchased service costs in 2005 related to governance costs, legal, and other consulting

Partially offsetting the above factors were improved operating margins from residential and commercial customers resulting from new customer additions and increased natural gas usage per customer during the quarter compared to third quarter last year.

For the nine months ended June 30, 2005, net income was \$12,857,000, or \$1.14 per share, compared to \$15,907,000, or \$1.42 per share for the same period last year. Primary factors negatively impacting the year-to-date comparisons were:

Lower 2005 distribution and gas management margins from industrial customers

Executive and other transition costs in 2005

Increased uncollectible accounts expense in 2005

Higher depreciation expense in 2005

Lower natural gas usage per residential and commercial customer

Partially offsetting the above factors were:

Favorable comparisons of Oregon earnings sharing adjustments

Lower employee benefits expenses

Growth in the number of residential and commercial customers

Operating Margin

Edgar Filing: CASCADE NATURAL GAS CORP - Form 10-Q

Operating margins by customer category are set forth in the following tables:

Residential and Commercial Margin

	Third Quarter of Fiscal		Percent Change (dollars in thousands)	Fiscal Year to Date		Percent Change
	2005	2004		2005	2004	
Degree Days						
Actual	769	661	16.3%	4,944	5,016	-1.4%
5-Year Average	806	874		5,168	5,193	
Average Number of Customers Billed						
Residential	195,561	185,584	5.4%	194,252	185,114	4.9%
Commercial	30,256	29,471	2.7%	30,191	29,422	2.6%
Average Therm Usage per Customer						
Residential	111	97	14.4%	628	654	-4.0%
Commercial	590	536	10.1%	3,079	3,223	-4.5%
Operating Margin						
Residential	\$ 7,623	\$ 6,299	21.0%	\$ 36,079	\$ 35,533	1.5%
Commercial	\$ 4,015	\$ 3,414	17.6%	\$ 19,200	\$ 19,602	-2.1%

For the quarter, margins from sales to residential and commercial customers increased \$1,925,000 over last year. Of this increase, assuming the same average natural gas usage per customer as last year, approximately \$504,000 results from the increase in the number of customers. The remaining \$1,421,000 of the increase is primarily attributable to higher usage of natural gas on a per-customer basis.

Helped by third quarter improvements, year-to-date margin from residential and commercial customers increased \$144,000 over last year. The increase in the number of customers billed added approximately \$2,621,000 in margin, but lower average natural gas usage per customer in the first and second quarters resulted in a year-to-date decline in margin of approximately \$2,477,000.

The primary use of natural gas by residential customers is for space and water heating; therefore, average consumption per customer is very sensitive to weather, particularly during the Company's first and second fiscal quarters, and to a somewhat lesser extent in the third quarter. Consumption by commercial customers is also sensitive to weather. The sensitivity is more difficult to isolate and measure than for residential customers because of a variety of uses in addition to space and water heating. Other factors also have a negative impact on gas usage, including conservation efforts spurred by higher natural gas prices and higher energy efficiency in buildings and appliances.

Industrial and Other Margin

	Third Quarter of Fiscal		Percent	Fiscal Year to Date		Percent
	2005	2004	Change	2005	2004	Change
Average Number of Customers						
Electric Generation Customers	13	14	-7.1%	13	14	-7.1%
Industrial Customers	705	736	-4.2%	722	740	-2.4%
	718	750	-4.3%	735	754	-2.5%
Therms Delivered (thousands)

	\$ 6,036	\$ 6,921	-12.8%	\$ 21,634	\$ 24,863	-13.0%

Distribution Service Margin: The decline in margin from distribution services to industrial and electric generation customers is primarily attributable to reduced usage and fewer customers.

Gas Management Services: The decline in margin from gas management services is attributed to fewer gas management customers and lower per-therm margin on natural gas supply sales compared to last year. One customer in 2004 provided \$336,000 gas management margin in third quarter and \$1,050,000 year-to-date, but this year the Company does not have a gas management contract with that customer. The re-emergence of energy marketers, an industry segment that all but disappeared in the wake of the Enron failure, has resulted in stiff competition for natural gas supply sales to larger natural gas customers. The Company has lost some customers to such marketers, and margins that are available for any sales are smaller than in the past. The Company will continue to provide natural gas supply services to customers to facilitate their use of gas, but expects margins from this activity to remain at approximately

the current level.

Mark-to-Market Valuations: These valuations result from periodic changes in the fair value of the derivative instruments used to hedge the cost of supplies for gas management customers. The hedging instruments are in place to effectively fix the price of those supplies. As market prices of natural gas forward contracts increase, the value of the instruments increases. Conversely, when market prices decrease, the value of the instruments also decreases. During the fiscal 2005 third quarter, forward natural gas prices decreased from the beginning of the quarter to the end of the quarter, hence the \$232,000 charge to operating margin for the quarter. During the quarter last year, these prices decreased less dramatically, resulting in the smaller \$117,000 charge. These hedging instruments are for fixed periods that correspond to the periods of the physical supply contracts to serve these customers. The hedged volumes also correspond to the volumes expected to be purchased under these contracts. At the end of the life of the hedging instruments, the cumulative income statement effects of the mark-to-market valuations will net to zero. But market fluctuations in interim periods do result in mark-to-market valuation effects in those periods' income statements.

Oregon Earnings Sharing: In addition to the above described margin differences, the comparison of year-to-date 2005 versus 2004 is affected by accruals of estimated liability for Oregon Earnings Sharing. Over the first two quarters of fiscal 2004 the Company accrued a total liability of \$525,000 as an estimate of earnings that would be required to be shared with Oregon customers. However, based on an analysis of the results for the entire year, management concluded in 2005 that 2004 earnings in Oregon were not sufficient as to trigger a sharing with customers. As a result, in the second quarter of 2005 the Company recorded a reversal of the estimate accrued in 2004. On April 20, 2005, Cascade submitted its 2004 Earnings Report to the OPUC for fiscal 2004. At a Public Meeting held on July 12, the Commission accepted Cascade's analysis that concluded there were no earnings to be shared from fiscal 2004.

Cost of Operations

Compared to last year, overall Cost of Operations was \$1,716,000 higher for the quarter. Year-to-date, the increase was \$2,955,000. Following are descriptions of the major factors causing the increases.

Operating Expenses: Operating expense increases, partially offset by employee benefits decreases, were the primary factors contributing to these comparisons, as shown in the following table:

	Third Quarter of Fiscal		Percent	Year to Date		Percent
	2005	2004	Change	2005	2004	Change
Employee benefits	\$ 2,349	\$ 2,519	-7%	\$ 6,948	\$ 7,874	-12%
Executive transition	434			1,059		
Call center and automated meter reading (AMR) transition		81	-100%	313	88	256%
Uncollectible accounts	524	207	153%	1,212	770	57%
Purchased services	1,051	590	78%	2,292	1,903	20%
All other operating expenses	6,619	6,332	5%	20,594	20,021	3%
	\$ 10,977	\$ 9,729	13%	\$ 32,418	\$ 30,656	6%

The reductions in employee benefits expense reflect the full impact of benefit plan changes initiated in 2003. Executive transition costs are primarily severance costs related to early retirements, and hiring and relocation costs for the new Chief Executive Officer and Chief Financial Officer. Call center transition costs are primarily severance and employee relocation compensation related to consolidating the customer service function in a single call center. Contributing to the increases in uncollectible accounts expense is higher write-off experience. Management believes these increases are at least partly related to a temporary disruption of collection efforts during the transition to the call center. Collection activities have subsequently increased. Of the increase in purchased services expense, approximately \$200,000 is related to increased governance costs, and additional amounts related to legal and consulting expenses. Various smaller increases and decreases in other categories of expense, in the aggregate, accounted for the remainder of the change in operating expenses for the quarter and year-to-date periods.

Depreciation and Property & Miscellaneous Taxes: The increases in depreciation and amortization, and in property and miscellaneous taxes, are related to ongoing investments in new utility plant, related primarily to expanding the Company's distribution system to serve new customers, as well as investments related to automated meter reading.

LIQUIDITY AND CAPITAL RESOURCES

The seasonal nature of the Company's business creates short-term cash requirements to finance customer accounts receivable and construction expenditures. To provide working capital for these requirements, the Company has a \$60,000,000 bank revolving credit commitment. This agreement has a variable commitment fee, and a term that expires in October 2007. The Company also has a \$10,000,000 uncommitted line of credit. As of June 30, 2005, there was \$17,000,000 outstanding under these credit lines.

To provide longer-term financing the Company filed an omnibus registration statement in 2001, under the Securities Act of 1933, which provided the ability to issue up to \$150,000,000 of new debt and equity securities. In the second quarter of fiscal 2005, the Company issued \$30,000,000 of 30-year 5.25% Insured Quarterly Notes under this registration statement, leaving \$80,000,000 available for future issuance of securities, subject to market conditions and other factors. The proceeds of the \$30,000,000 issue were used to pay down debt under the revolving credit line. In July 2005, the Company repaid \$5,000,000 in current maturities of long-term debt. The Company funded this repayment through use of its bank credit lines.

Because of the availability of short-term credit and the ability to issue long-term debt and additional equity, management believes it has adequate financial flexibility to meet its anticipated cash needs.

Operating Activities

Edgar Filing: CASCADE NATURAL GAS CORP - Form 10-Q

Cash provided by operating activities for the first nine months of fiscal 2005 declined \$5,955,000 compared to last year. Other than lower net income, significant contributing factors were deferrals and amortizations of gas cost changes. Deferrals of gas cost changes represent higher costs paid for natural gas compared to the amounts included in revenues representing recovery of natural gas costs. Amortization of gas cost changes represent amounts included in revenue from temporary rate increases to recover higher natural gas costs paid in earlier periods. On a combined basis, these two items resulted in a use of \$884,000 this year compared to providing \$2,296,000 last year.

Investing Activities

Net capital expenditures of \$21,567,000 for the first nine months of fiscal 2005 were approximately 27% less than the first nine months of last year. Capital expenditures are lower due to the completion in 2004 of the Automated Meter Reading Project described in prior reports. Expenditures on the Automated Meter Reading project for the first nine months of fiscal 2004 were \$9,192,000.

Financing Activities

Edgar Filing: CASCADE NATURAL GAS CORP - Form 10-Q

Other than the payment of dividends, the Company's primary financing activities during the first nine months of fiscal 2005 were the issuance of \$30,000,000 in new long-term debt as described in the preceding paragraphs under Liquidity and Capital Resources, repayment of \$9,000,000 in current maturities of long-term debt and paying down borrowing under the bank credit lines by \$16,500,000.

EFFICIENCY INITIATIVE CUSTOMER SERVICE CALL CENTER

In January 2005, the Company began operation of a customer-service call center at its existing district office in Bellingham, Washington. Activation of the call center was phased in, and it became fully operational in March 2005. This call center consolidated in one location the Company's customer service function, which had been spread through 15 local offices. To implement the call center, the Company incurred \$855,000 capital expenditures and \$313,000 transitional expenses. In the call center's first full quarter of operation, ongoing customer service expenses were lower by approximately \$216,000 compared to the same quarter last year due to (current quarter) reductions generated through the elimination of sixteen full time equivalent positions, more specialization and increased efficiency.

CRITICAL ACCOUNTING POLICIES

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). In following GAAP, management exercises judgment in selection and application of accounting principles. Management considers critical accounting policies to be those where different assumptions regarding application could result in material differences in financial statements. The Company's critical accounting policies were described in its Annual Report on Form 10-K for the year ended September 30, 2004, under Part II, Item 7, and have not changed significantly since that report.

Forward-Looking Statements

The Company's discussion in this report, or in any information incorporated herein by reference, may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, are forward-looking statements, including statements concerning plans, objectives, goals, strategies, and future events or performance. When used in Company documents or oral presentations, the words anticipate, believe, estimate, expect, objective, projection, forecast, goal, or words are intended to identify forward-looking statements.

These forward-looking statements reflect the Company's current expectations, beliefs and projections about future events that we believe may affect the Company's business, financial condition and results of operations, and are expressed in good faith and are believed to have a reasonable basis. However, each such forward-looking statement involves risks, uncertainties and assumptions, and is qualified in its entirety by reference to the following important factors, among others, that could cause the Company's actual results to differ materially from those projected in such forward-looking statements:

prevailing state and federal governmental policies and regulatory actions, including those of the Washington Utilities and Transportation Commission, the Oregon Public Utility Commission, and the U.S. Department of Transportation's Office of Pipeline Safety, with respect to allowed rates of return, industry and rate structure, purchased gas cost and investment recovery, acquisitions and dispositions of assets and facilities, operation and construction of plant facilities, the maintenance of pipeline integrity, and present or prospective wholesale and retail competition;

weather conditions and other natural phenomena;

unanticipated population growth or decline, and changes in market demand caused by changes in demographic or customer consumption patterns;

changes in and compliance with environmental and safety laws, regulations and policies, including environmental cleanup requirements;

competition from alternative forms of energy and other sellers of energy;

increasing competition brought on by deregulation initiatives at the federal and state regulatory levels, as well as consolidation in the energy industry;

the potential loss of large volume industrial customers due to bypass or the shift by such customers to special competitive contracts at lower per-unit margins;

risks, including creditworthiness, relating to performance issues with customers and suppliers;

risks resulting from uninsured damage to the Company's property, intentional or otherwise, or from acts of terrorism;

unanticipated changes that may affect the Company's liquidity or access to capital markets;

the Company's ability to complete its assessment and, if necessary, remediation of internal controls over financial reporting in compliance with Section 404 of the Sarbanes-Oxley Act of 2002;

unanticipated changes in interest rates or in rates of inflation;

economic factors that could cause a severe downturn in certain key industries, thus affecting demand for natural gas;

unanticipated changes in operating expenses and capital expenditures;

unanticipated changes in capital market conditions, including their impact on future expenses and liabilities relating to employee benefit plans;

potential inability to obtain permits, rights of way, easements, leases, or other interests or necessary authority to construct pipelines, or complete other system expansions;

changes in the availability and price of natural gas; and

legal and administrative proceedings and settlements.

In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this report, or in any information incorporated herein by reference, may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. All subsequent forward-looking statements, whether written or oral and whether made by or on behalf of the Company, also are expressly qualified by these cautionary statements.

Any forward-looking statement by the Company is made only as of the date on which such statement is made. The Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of any unanticipated events. New factors emerge from time-to-time, and the Company is not able to predict all such factors, nor can it assess the impact of each such factor or the extent to which such factors may cause results to differ materially from those contained in any forward-looking statement.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Edgar Filing: CASCADE NATURAL GAS CORP - Form 10-Q

Cascade has evaluated its risk related to financial instruments whose values are subject to market sensitivity. The Company has fixed-rate debt obligations, but does not currently have derivative financial instruments subject to interest rate risk. Cascade makes interest and principal payments on these obligations in the normal course of its business, and may redeem these obligations prior to normal maturities if warranted by market conditions.

The Company's natural gas purchase commodity prices are subject to fluctuations resulting from weather, congestion on interstate pipelines, and other unpredictable factors. The Company's Purchased Gas Cost Adjustment (PGA) mechanisms assure the recovery in customer rates of prudently incurred wholesale cost of natural gas purchased for the core market. The Company primarily utilizes financial derivatives, and to a lesser extent, fixed price physical supply contracts to manage risk associated with wholesale costs of natural gas purchased for customers.

With respect to derivative arrangements covering natural gas supplies for core customers, periodic changes in fair market value are recorded in regulatory asset or regulatory liability accounts, pursuant to authority granted by the WUTC and OPUC recognizing that settlements of these arrangements will be recovered through the PGA mechanism.

For derivative arrangements related to supplies for non-core customers, which are not covered by a PGA mechanism, periodic changes in fair market value are recognized in earnings.

Item 4. Controls and Procedures

The Company maintains controls and procedures designed to provide reasonable assurance that required disclosure information in the reports the Company files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time period specified in the rules and forms of the Securities and Exchange Commission. Based upon their evaluation of those controls and procedures as of the end of the quarter covered by this report, the Chief Executive Officer and Chief Financial Officer of the Company concluded that the Company's disclosure controls and procedures were effective.

PART II. Other Information

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On April 24, 2005, the Company issued a total of 3,500 shares of unregistered common stock to seven non-employee directors under its 2000 Director Stock Award Plan (the Plan). Under the terms of the Plan, each non-employee director of the Company is entitled to receive an award of 500 shares of common stock in April of each year as part of the compensation paid to directors. The Company received

no proceeds for these shares. Since shares issued under the Plan may only be issued to non-employee directors, the Company takes the position that such issuances are exempt from registration requirements under Section 4(2) of the Securities Act of 1933, as transactions not involving a public offering.

Item 5. Other Information

a) None

b) There have been no changes in the Company's procedures by which security holders may recommend nominees to the Company's Board of Directors.

Item 6. Exhibits

No.	Description
12	Computation of Ratio of Earnings to Fixed Charges
31	Certification Accompanying Periodic Report Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
32	Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
