FIRST QUARTER REPORT

MARCH 31, 2015

LETTER TO SHAREHOLDERS

Dear Fellow Shareholders,

Oil prices continued to decline following the collapse of 2014. Domestic crude prices, as measured by West Texas Intermediate, fell 10.5% in the first quarter. Energy stocks in the Dow Jones Oil and Gas Index fared better than the commodity price, losing 2.1%. Faced with the impact of lower prices, oil and gas companies slashed spending across the board, with many cutting jobs and share buyback programs. Drilling programs were scaled back, causing a 43% decline in the rig count. In addition to making necessary cost cuts, energy companies also needed to repay revolving credit lines and shore up balances sheets. Capital markets were surprisingly wide open for the sector. Debt issuances by U.S. exploration companies topped \$12 billion and the U.S.-based majors borrowed \$14 billion. Equity issuances raised another \$10 billion for energy companies in the first three months.

During the quarter, the Fund initiated two new positions, Chesapeake Energy and Alcoa. Chesapeake is in the middle of a significant transformation. With new management in place, focused on capital discipline and operational improvement, the reasonable valuation offered an attractive opportunity. The company's large acreage position is concentrated in top U.S. oil and natural gas plays from South Texas to Pennsylvania, including the Utica, Eagle Ford and Powder River Basins. We believe Chesapeake's low acreage acquisition costs and solid operational performance will generate production growth and returns higher than Wall Street's expectations.

In Basic Materials, Alcoa presented an attractive entry point. Alcoa historically was a high cost producer of basic aluminum and aluminum products. Recently, the company has streamlined its manufacturing operations, becoming very cost competitive on a global scale. Importantly, it has also developed a high return, high growth downstream products business selling into the lucrative aerospace and automotive markets, among others. This conversion allows the company to benefit from the recent trend toward light weight vehicles. Alcoa is the key supplier of aluminum parts to the Ford F-150, the best-selling truck in the U.S. Ford is replacing 95% of the steel in the body of the F-150 with aluminum.

For the three months ended March 31, 2015, the total return on the Fund's net asset value (NAV) per share (with dividends and capital gains reinvested) was (2.8)%. The total return on the market price of the Fund's shares for the period was (2.5)%. These compare to a (1.2)% total return for Lipper Global Natural Resources Funds Index over the same time period.

For the twelve months ended March 31, 2015, the Fund's total return on NAV was (12.7)% and on market price was (10.7)%. The comparable return for the Lipper Global Natural Resources Funds Index was (18.2)%.

Net assets of the Fund at March 31, 2015 were \$26.68 per share on 27,392,919 shares outstanding, compared with \$27.56 per share at December 31, 2014 on 27,380,920 shares outstanding. On March 2, 2015, a distribution of \$0.10 per share was paid, consisting of \$0.02 net investment income and \$0.06 long-term capital gain, realized in 2014, and \$0.02 of net investment income realized in 2015, all taxable in 2015. On April 16, 2015, an investment income dividend of \$0.10 per share was declared to shareholders of record May 13, 2015, payable June 1, 2015. These constitute the first two payments toward our annual 6% minimum distribution rate commitment.

By order of the Board of Directors,

Mark E. Stoeckle

Chief Executive Officer
