

CSP INC /MA/
Form 10-K
December 22, 2017

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the Fiscal Year Ended September 30, 2017.

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission File Number 000-10843

CSP Inc.
(Exact name of Registrant as specified in its Charter)

Massachusetts 04-2441294
(State of incorporation) (I.R.S. Employer Identification No.)

175 Cabot Street, Lowell, Massachusetts 01854
(Address of principal executive offices)

(978) 954-5038
(Registrant's telephone number including area code)

Securities Registered Pursuant to Section 12(b) of the Act:

| Title of Each Class | Name of Exchange on Which Registered |
|--|--------------------------------------|
| Common Stock, par value \$0.01 per share | NASDAQ Global Market |

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Edgar Filing: CSP INC /MA/ - Form 10-K

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer", "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller Reporting Company
Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of March 31, 2017, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$36,981,362 based on the closing sale price of \$10.42 as reported on the Nasdaq Global Market.

As of December 22, 2017, we had outstanding 3,924,109 shares of common stock.

DOCUMENTS INCORPORATED BY REFERENCE

Certain portions of the information required in Part III of this Form 10-K are incorporated by reference from our definitive proxy statement for our 2018 annual meeting of stockholders to be filed with the Securities and Exchange Commission within 120 days after the end of our fiscal year ended September 30, 2017.

| <u>Item 15. Exhibits and Financial Statement Schedules</u> | <u>29</u> |

Note: Items 1B, 6 and 7A are not required for Smaller Reporting Companies and therefore are not furnished.

Special Note Regarding Forward-Looking Statements

This annual report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. This information may involve known and unknown risks, uncertainties and other factors that are difficult to predict and may cause our actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by any forward-looking statements. The discussion below contains certain forward-looking statements related but not limited to, among others, statements concerning future revenues and future business plans. Forward-looking statements include statements in which we use words such as “expect,” “believe,” “anticipate,” “intend,” “estimate,” “should,” “could,” “may,” “plan,” “potential,” “predict,” “project,” “will,” “would” and similar. Although we believe the expectations reflected in such forward-looking statements are based on reasonable assumptions, the forward-looking statements are subject to significant risks and uncertainties, and thus we cannot assure you that these expectations will prove to be correct, and actual results may vary from those contained in such forward-looking statements. We discuss many of these risks and uncertainties in Item 1A under the heading “Risk Factors” in this Annual Report.

Factors that may cause such variances include, but are not limited to, our dependence on a small number of customers for a significant portion of our revenue, our high dependence on contracts with the U.S. federal government, our reliance in certain circumstances on single sources for supply of key product components, and intense competition in the market segments in which we operate. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Also, forward-looking statements represent our estimates and assumptions only as of the date of this document. We have based the forward-looking statements included in this annual report on Form 10-K on information available to us on the date of this annual report, and we assume no obligation to update any such forward-looking statements, other than as required by law.

PART I

Item 1. Business

CSP Inc. (“CSPI” or “the Company” or “we” or “our”) was incorporated in 1968 and is based in Lowell, Massachusetts. To meet the diverse requirements of our commercial and defense customers worldwide, CSPI and its subsidiaries develop and market IT integration solutions, advanced security and managed services, purpose built network adapters, and high-performance cluster computer systems.

Segments

CSPI operates in two segments; High Performance Products (“HPP”) and Technology Solutions (“TS”).

HPP Segment

The HPP segment revenue has four distinct product lines: (i) our Multicomputer product portfolio of computing systems for digital signal processing (“DSP”) applications within the defense markets, (ii) our Myricom® ARC Series product line of network Ethernet adapters that are offered to both commercial and government customers, (iii) our Myricom nVoy Series solution for OEM and end customers and (iv) our ARIA™ Software Defined Security (SDS) platform of solutions which are also offered to commercial, OEM and government customers.

Our Multicomputer revenue flows from a modest number of existing high-value customers that support the deployment and maintenance of systems utilized by domestic and foreign government entities. In 2016, the Company decided to no longer design and develop new systems for the defense market and is not expected to participate in the next generation of defense systems and applications. Instead, the Company has focused on servicing the existing product line. As a result, the revenue from these products as a percentage of overall Company revenue is expected to decline over time as we focus on the growth of our Myricom and ARIA security solutions, as well as TS division service lines.

Our Myricom ARC Series product portfolio derives its revenue flow from a line of network Ethernet adapters purchased by a wide range of customers in three specialized markets: (i) packet capture, (ii) financial transactions and

1

(iii) the storage interconnect market. Our primary customers in the packet capture market include government agencies that want the ability to capture, inject, and analyze network traffic at line rate, and original equipment manufacturers ("OEM") selling into vendors of computer security appliances. Our customers in the financial transactions market include banks, brokerages, and other trading firms looking for low latency adapters with value-added features specifically tied to market data feeds. Our storage interconnect market customers are primarily in the film industry using our adapters for film editing.

Our Myricom nVoy solution will obtain revenue from a packet broker and packet recorder deployed as part of an overall data security environment. Our primary customers will be commercial end-users in regulated markets that require a data breach detection and notification system to augment their already installed network security infrastructure. We believe the product line will also be attractive to value added services providers looking to sell a broad set of security services.

Our ARIA Software Defined Security (SDS) product set is a new portfolio that will derive its revenues from security software applications that can be deployed on servers on enterprise premises, in data centers and within the Public Cloud, purchased by a wide range of customers across multiple markets. Our primary customers will be commercial customers and government agencies that have critical applications and data that must be protected from exposure and breach. We believe the product line will also be attractive to value added services providers looking to sell a broad set of security services and OEMs leveraging our capabilities to offer a broader set of security product solutions.

TS Segment

The TS segment consists of our wholly-owned Modcomp subsidiary, which operates in the United States, Germany and the United Kingdom.

The TS segment generates product revenues by reselling third-party computer hardware and software as a value added reseller ("VAR"). The TS segment generates service revenues by the delivery of integration services for complex IT environments, including advanced security; unified communications and collaboration; wireless and mobility; data center solutions; and network solutions as well as managed IT services ("MSP") that primarily serve the small and mid-sized business market ("SMB").

Third party products and professional services are marketed and sold through the Company's direct sales force into a variety of vertical markets, including; automotive; defense; health care; education; federal, state and local government; and maritime.

Sales Information by Industry Segment

The following table details our sales by operating segment for fiscal years ending September 30, 2017 and 2016. Additional segment and geographical information is set forth in Note 14 to our financial statements.

| Segment | 2017 | % | 2016 | % |
|-------------|-------------------------------|------|-----------|------|
| | (Dollar amounts in thousands) | | | |
| HPP | \$13,844 | 12 % | \$16,342 | 16 % |
| TS | 97,638 | 88 % | 87,025 | 84 % |
| Total Sales | \$111,482 | 100% | \$103,367 | 100% |

HPP Segment

Products and Services

In the HPP segment, we design, manufacture and deliver products and services to customers that require specialized cyber security services, networking and signal processing.

Products

Our Multicomputer product portfolio includes the 2000 SERIES VME and 3000 SERIES VXS systems. The 2000 SERIES products, based on PowerPC RISC processors with AltiVec™ technology, high-speed memory and Myrinet-2000™ cluster interconnect are in deployment by customers in the aerospace, commercial and defense markets. The 3000 SERIES VXS product line, incorporating the Freescale QorIQ PowerPC processors with AltiVec technology, targets high performance DSP, signal intelligence (“SIGINT”), radar and sonar applications in airborne, shipboard and unmanned aerial vehicle (“UAV”) platforms where space, power and cooling are at a premium. The HPP segment continues to ship and repair existing products to its customer base and support an installed base of DSP systems.

Our Myricom ARC Series product line includes 10G Ethernet adapters and associated network adapter software for Linux, Windows, Mac OS X and VMware ESX that we acquired through an asset purchase on November 4, 2013. The acquired line of network 10G Ethernet adapters, continues to meet the critical requirements of performance, multi-platform compatibility, software vendor approval, and maturity required in the media and entertainment market. Our ARC Series adapters are a preferred choice for media editors as they have been tested and qualified for use with the Avid® MediaCentral™ Platform and similar software packages popular among media editors. Our current generation of the ARC Series adapters is based on field-programmable gate array (“FPGA”) technology and purpose built for complex and demanding applications including automated trading and network monitoring. We introduced the ARC Series with DBL™ (“DBL”) to the market during fiscal year 2015. DBL offers the ultra-low latency requirements of the high frequency trading market. However, adoption of the ARC Series with DBL product line was less than expected with limited success in Windows operating system environments. As a result, while we will continue to support DBL, we shifted focus of development resources to our ARC Series with Sniffer10G software to continue supporting the packet capture market during fiscal year 2017. Likely customers include enterprise and government customers seeking the ability to perform thorough inspection of network traffic to provide better detection of cyber threats enabled by 100% lossless packet capture and packet injection, such as required for network surveillance, including lawful intercept, deep packet inspection for use by Intrusion Detection Systems (IDS), forensic tools, and denial of service (DDoS) defense applications. The latest product, the Myricom ARC Series Secure Intelligent Adapter (SIA) will provide, when available, more flexible and powerful compute capabilities and specialty hardware to handle advanced encryption functions. The SIA will run the ARIA Software Defined Security (SDS) platform applications, as well as provide an environment for our OEM and Services partners to run their own applications upon.

Also sold under the Myricom brand, our nVoy Series is comprised of a 100G Packet Broker and 10G Packet Recorder, as well as specialized software. These products were introduced to the market during fiscal year 2017 and likely customers are end-users responsible for network and/or data security in their organizations. Since all organizations have data security needs, the market for nVoy Series is potentially broad; however, we believe that nVoy is best suited for and its primary market will be mid to enterprise-sized companies in regulated industries such as banking, finance, insurance, retail and state and local government. These markets are under tremendous pressure to comply with data privacy regulations that are widespread across 49 of the U.S states as well as internationally. The nVoy solution assists customers in meeting compliance requirements related to notifying regulators and entities impacted by a potential breach. The nVoy’s capabilities of monitoring specified critical assets and automatically matching intrusion alerts generated by an organizations firewall or intrusion detection system (IDS) against those assets, as well as disseminating an email containing an extraction file of all conversations, enables information security resources to immediately start the breach investigative process thus reducing the breach response time, as well as assist in forensic analysis and incident auditing.

Our ARIA SDS platform, when available, will include a variety of lightweight cyber security software applications that can be deployed upon bare metal servers, virtual machines (VMs) and/or container compute environments. These

applications include the ability to automatically implement and enforce security policies, which determine which applications can access which data and how. ARIA will have a combination of features sold as “security services” and these product sets will be priced separately and offered as part of an annual subscription priced software as a service (SaaS) offering. Note that this is a product solution, not a cloud-based service offering. The intent is to allow these ARIA software instances (SDSi) to run not only within a data center server based VMs and/or containers, but also within public cloud instances. The ARIA SDSi can be deployed across an organization’s enterprise as widespread or selectively as desired. ARIA SDSi will detect and programmatically execute the appropriate services feature set which is controlled through ARIA's services orchestrator ("SDSo"). The SDSo is the backbone of SDS platform and will be offered on a SaaS annual subscription basis and required to launch the purchased SDSi’s. ARIA products will also charge annual support fees. ARIA will lend itself to a set of professional services that can be provided by CSPi and/or its partners.

Royalties

We license the design of certain of our 2000 SERIES computer processor boards and switched interconnect technology to third parties. In exchange for licensing this technology, we receive a royalty payment for each processor board that the licensee produces that utilizes our design for these products.

Markets, Marketing and Dependence on Certain Customers

Aerospace & Defense Market

Our focus for fiscal 2018 and beyond is to continue our support of established products and the substantial investment in development, evaluation, and system deployments made by government entities with support requirements that often extend beyond twenty years.

Financial Transactions Market

Myricom network adapters with DBL application software address the need for the ultra-low latency required in the world of financial trading. Running DBL on ARC Series extreme performance network adapters provides unmatched acceleration for 10G Ethernet environments, with benchmarked application-to-application latency in the single digit microseconds for Linux and Microsoft Windows operating systems.

Packet Capture Market

Myricom Sniffer10G software, running on ARC Series Ethernet adapters, provides enterprise and government customers and partners the ability to capture, inject, and analyze network traffic at line rate for all Ethernet packet sizes, with low host-CPU overhead. Sniffer10G serves the following market segments: network surveillance, monitoring and analysis; test, measurement and packet generation; deep packet inspection (DPI); and as a critical technology component within Intrusion Detection Systems (IDS), forensic tools and distributed denial-of-service (DDoS) defense appliances.

Storage Interconnect Market

Myricom ARC Series network adapters are used in a wide range of applications that connect to storage subsystems using Ethernet. Most of these customers are using content creation applications requiring high performance networking from the storage system to video editing work stations. We also have customers in the supercomputing market and building cable head ends for video distribution. These adapters with the Myri10GE software deliver best in class throughput performance for Ethernet controllers.

Security Products Market

The Myricom nVoy solution is expected to be used by companies who wish to automatically monitor, and record packet level traffic to and from their most critical data assets, including those that store personally identifiable information (PII.) These capabilities are best suited to information security resources who need a means to quickly identify and validate a potential breach in order to meet compliance regulations; yet, taking this one step further, they desire immediate notification of any breach in order to minimize breach impact. This is critical due to the changing regulatory climate that requires improvement in the ability to react to breaches within a few days and thereby minimize damage. Using traditional techniques can take weeks to months to detect and determine the full scope of a breach. Given the increase in occurrences and sophistication of cyber breaches, the ability to properly identify and

react to breaches has been getting worse. nVoy can be deployed to help reduce that time, and improve the accuracy of records breached to meet these new regulations. Value added resellers (VARs) will find nVoy of interest to flesh out their portfolio of security products and services and weed out less effective tools and processes in their customer environments.

The ARIA SDS software platform is expected to be sold across commercial, and state and local education divisions (SLED) vertices that focus on developing/running their own software applications - known as DevOps. These customers are changing the way they develop, rollout and operate their applications; these applications require a set of security capabilities that allow these DevOps groups to roll their applications out quickly but securely. The Myricom Secure Intelligent Adapter (SIA) can be added to current server and VM deployments, which will allow CPU intensive security processes, such as ARIA's encryption services to be added, but offloaded from the server CPU cores. This will provide secure but optimized production application performance while preserving the life of these server deployments. In particular, ARIA SDS will allow such service

providers the ability to operationalize their security services quickly and efficiently both critical for success. Naturally, OEMs are the other security products providers who need to solve particular problems such as adding new features and solving performance issues. These OEMs may reference sell the products to be directly resold through Independent Software Vendor channels to the end customers in these markets.

Competition

The markets for our security products segment are very competitive. Customer requirements coupled with advances in technology will drive our efforts to continuously develop new feature capabilities. Applications expertise, product innovation, strong technical support and dedicated customer service allow us to compete as a provider of high-performance products and solutions.

Our primary direct competitors for the security products are traditional large security vendors including companies like: Dell, IBM, and to a lesser degree Intel, among others. In specific application areas, we also compete with traditional approaches to detecting breaches and/or applying 3rd party advanced security features. For breach detection, this includes firewall manufacturers such as Palo Alto or Cisco, and on the packet broker, Gigamon, Ixia as well as others. Competitors for SDS encryption include applications and appliances as provided by Talus and HPE's Voltaic group plus others. Illumio for micro-segmentation capabilities, and other traditional end point security vendors that attempt to set security policies on containers and VMs. Intel's chip level security functions highlighted on their product roadmap may provide more functionality that their market competitors could attempt to leverage, but this also opens up further opportunities for our ARIA SDS solution to leverage its functionality as well. We will be attractive to customers who need a combination of advanced protection features but who also require optimized application performance. Security adapter products will also leverage previous generation Myricom ARC Series network adapter capabilities that include advanced filtering, support for kernel bypass technologies, 100% lossless packet capture, as well as precision time stamping, combined with new capabilities to offer a variety of security service combinations that our customers can put to use.

Manufacturing, Assembly and Testing

Currently, all Multicomputer products are shipped to our customers directly from our plant in Lowell, Massachusetts. Our manufacturing activities consist mainly of final assembly and testing of printed circuit boards and systems that are designed by us and fabricated by outside third party vendors.

Upon our receipt of material and components from outside suppliers, our quality assurance technicians inspect these products and components. During manufacture and assembly, both sub-assemblies and completed systems are subjected to extensive testing, including burn-in and environmental stress screening designed to minimize equipment failure at delivery and over the useful service life of the system. We also use diagnostic programs to detect and isolate potential component failures. A comprehensive log is maintained of past failures to monitor the ongoing reliability of our products and improve design standards.

Currently, Myricom products, including nVoy and ARC Series are shipped to our customers directly from our plant in Lowell, Massachusetts. The packet recorder and packet broker appliances are sourced from third party partners and resold under the CSPi name, combined with CSPi provided software. Our network adapters are designed by us and fabricated by outside third party vendors. Material and components received from outside suppliers are inspected by our quality assurance technicians.

ARIA SDS software will be downloaded and licensed from servers or content delivery services controlled by CSPi. These can be sold in conjunction with the SIA, which may be preloaded with appropriate ARIA SDS software images. Licensing will be handled by the ARIA SDS which will be accessible by CSPi's licensing servers to allow proper

flexible services feature set activation and payment.

We provide a warranty covering defects arising from the sale of Multicomputer and Myricom products, which varies from 90 days to three years, depending upon the particular unit in question.

Sources and Availability of Raw Materials

Several components used in our HPP segment products are obtained from sole-source suppliers. We are dependent on key vendors such as NXP, Inc. for PowerPC processors for our 2000 SERIES and our 3000 SERIES VXS products and Wind River Systems, Inc. for VxWorks operating system software. Despite our dependence on these sole-source suppliers, based on our current forecast, we do not consider the risk of interruption of supply to be significant, therefore we expect to meet our

projected sales obligations over the near term, because we have adequate inventory on hand and/or our current requirements can be met in the existing supply chain.

Research and Development

For the year ended September 30, 2017, our expenses for R&D were approximately \$2.4 million compared to approximately \$3.0 million for fiscal year 2016. Expenditures for R&D are expensed as they are incurred. Product development efforts in fiscal year 2017 involved development of the ARIA SDS product set, and enhancements to our Myricom products, in which we expect to continue to make investments related to the development of new hardware adapter products and the ARIA SDS software that enables the hardware to meet the needs of specific applications. Our current R&D plan is intended to extend the usefulness and marketability of these products by reducing latency, improving precision time stamping capabilities, and adding features, such as enhanced arbitration, to deliver products fine-tuned to meet the needs of our markets.

Intellectual Property

We rely on a combination of trademark and trade secret laws in the United States and other jurisdictions, as well as confidentiality procedures and contractual provisions to protect our intellectual property rights. We have two pending patents for the ARIA software and will be pursuing additional patent rights over time.

Backlog

The backlog of customer orders and contracts in the HPP segment was approximately \$0.8 million at September 30, 2017 as compared to \$4.9 million at September 30, 2016. Our backlog can fluctuate greatly. These fluctuations can be due to the timing of receipt of large orders often for purchases from prime contractors for sales to the government. It is expected that all of the customer orders in backlog will ship within the next twelve months from September 30, 2017.

TS Segment

Products and Services

Integration Solutions

In the TS segment, we focus on value-added reseller ("VAR") integrated solutions including third-party hardware, software and technical computer-related consulting services and managed services. Our value proposition is our ability to integrate diverse third-party components together into a complete solution to install the system at the customer site and to offer high value IT consulting services to deliver solutions.

Third-Party Hardware and Software

Our wholly-owned subsidiary, Modcomp, sells third-party hardware and software products in the information technology market, with a strategic focus on industry standard servers and data center infrastructure solutions, midrange data storage infrastructure products, network products, unified communications and IT security hardware and software solutions. Our key offerings include products from HPE, Cisco Systems, IBM, Juniper Networks, Citrix, Dell, Intel, VMWare, Fortinet, Microsoft and Checkpoint. Through our business relationships with these vendors, we are able to offer competitively priced robust products to meet our customers' diverse technology needs, providing procurement and engineering expertise in server infrastructure, storage, security, unified communications and networking, to the small-to-medium sized businesses ("SMBs") and large enterprise businesses ("LEBs") with complex IT environments. We offer our customers a single point of contact for complex multi-vendor technology purchases.

Many of our SMB customers have unique technology needs and may lack technical purchasing expertise or have very limited IT engineering resources on staff. We also provide installation, integration, logistical assistance and other value-added services that customers may require. Our current customers are in web and infrastructure hosting, education, telecommunications, healthcare services, distribution, financial services, professional services and manufacturing. We target SMBs and LEB customers across all industries.

Professional Services

We provide professional IT consulting services in the following areas:

Implementation, integration, migration, configuration, installation services and project management.

Unified Storage Platforms ("USPs"). We help our customers implement USP solutions using products from Dell, EMC, HP and NetApp. USPs have advantages over conventional storage architecture, which include cost savings from better utilization of hardware and lower headcount requirements to run and maintain data storage systems, higher availability and faster data access rates resulting in increased productivity.

Virtualization. We help our customers implement virtualization solutions using products from companies such as VMWare and Citrix that allow one computer to do the job of multiple computers by sharing resources of a single computer across multiple environments. Virtualization eliminates physical and geographical limitations and enables users to host multiple operating systems and applications on fewer servers. Benefits include energy cost savings, lower capital expenditure requirements, high availability of resources, better desktop management, increased security and improved disaster recovery.

Enterprise security intrusion prevention, network access control and unified threat management. Using third-party products from companies like Checkpoint, Palo Alto, Aruba Networks, Juniper Networks and Cisco Systems, our services are designed to ensure data security and integrity through the establishment of virtual private networks, firewalls and other technologies.

IT security compliance services. We provide services for IT security compliance with personal privacy laws such as the Payment Card Industry Data Security Standard (PCI DSS), the Health Insurance Portability and Accountability Act of 1996 (HIPAA), and internal control regulations under the Sarbanes-Oxley Act (SOX).

Unified communications, wireless and routing and switching solutions using Cisco Systems and Aruba Networks products and services.

Custom software applications and solutions development and support. We develop custom applications to customer specifications using industry standard platforms such as Microsoft.Net, SharePoint and OnBase. We are a Microsoft Gold Partner.

- Managed IT services that include monitoring, reporting and management of alerts for the resolution and preventive general IT and IT security support tasks.

Maintenance and technical support for third-party products including hardware and software, operating system and user support.

Managed and Cloud Services

As consumption models continue to evolve in our industry Modcomp has developed a robust managed & cloud services offering to provide alternative solutions to traditional capital expenditure investments in IT solutions and IT operations for our clients. Our value is to provide an elastic offering that will also the client to scale and consume these offerings with monthly billing options that help control costs and provide economies of scale.

We provide managed and cloud services in the following areas:

Proactive monitoring and remote management of IT Infrastructure that includes network (both wired and wireless), data center (which includes compute, storage and virtualization), desktops, unified communications platforms and security.

Managed Collaboration solutions (voice and video), resale of Cisco Webex and SPARK under annuity program.

Managed Security (firewall, endpoint protection, malware, anti-virus and SIEM).

Managed BackUp and Replication.

Cloud services that include Microsoft Office 365, Azure, Greencloud and Amazon Web Services.

7

Markets, Marketing and Dependence on Certain Customers

We are an IT systems integrator and computer hardware and software VAR. We also provide technical services to achieve a value-add to our customers. We operate within the VAR sales channels of major computer hardware and software OEMs, primarily within the geographic areas of our sales offices and across the U.S. We provide innovative IT solutions, including a myriad of infrastructure products with customized integration consulting services and managed services to meet the unique requirements of our customers. We market the products and services we sell through sales offices in the U.S., Germany and the U.K. using our direct sales force (for a list of our locations, see Item 2 of this Form 10-K).

Competition

Our primary competition in the TS segment is other VARs ranging from small companies that number in the thousands, to large enterprises such as CDW, PC Connection, Insight, MoreDirect, Dimension Data, Bechtle AG, Presidio and Computacenter AG & Co oHG. In addition, we compete directly with many of the companies that manufacture the third-party products we sell, including Cisco Systems, IBM, Hewlett Packard (HP), EMC (now part of Dell) and others. In the network management, security and storage systems integration services business, our competitors are extensive and vary to a certain degree in each of the geographical markets, but they also include such national competitors as HP/EDS, IBM and Cap Gemini.

Nearly all of our product offerings are available through other channels. Favorable competitive factors for the TS segment include procurement capability, product diversity which enables the delivery of complete and custom solutions to our customers and the strength of our key business relationships with the major IT OEMs. We also consider our ability to meet the unique and/or specialized needs of the SMB and LEB markets and our strong knowledge of the IT products that we sell to be a key competitive advantage. Our ability to provide managed services through our network operations center and the consulting integration services required to design and install the custom solutions that fit our customers' IT needs are distinct competitive advantages. Unfavorable competitive factors include low name recognition, limited geographic coverage and pricing.

Backlog

The backlog of customer orders and contracts for the TS segment was approximately \$12.7 million at September 30, 2017, as compared to \$10.9 million at September 30, 2016. Our backlog can fluctuate greatly. These fluctuations can be due to the timing of receiving large orders for third- party products and/or IT services. It is expected that all of the customer orders in backlog will ship and/or be provided during fiscal year 2018.

Significant Customers

See Note 14 in the notes to the consolidated financial statements for detailed information regarding customers which comprised 10% or more of consolidated revenues for the years ended September 30, 2017 and 2016.

Employees

On September 30, 2017, we had approximately 200 full time equivalent employees worldwide for our consolidated operations. None of our employees are represented by a labor union and we have had no work stoppages in the last three fiscal years. We consider relations with our employees to be good.

Financial Information about Geographic Areas

Information regarding our sales by geographic area and percentage of sales based on the location to which the products are shipped or services rendered are in Note 14 of the notes to the consolidated financial statements.

8

Item 1A. Risk Factors

If any of the risks and uncertainties set forth below actually materialize, our business, financial condition and/or results of operations could be materially and adversely affected, the trading price of our common stock could decline and a stockholder could lose all or part of its, his or her investment. The risks and uncertainties set forth below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently consider immaterial may also impair our business operations.

We depend on a small number of customers for a significant portion of our revenue and loss of any customer could significantly affect our business.

Both the HPP and TS segments are reliant upon a small number of significant customers, and the loss of or significant reduction in sales to any one of which could have a material adverse effect on our business. For the fiscal year ended September 30, 2017, two customers accounted for approximately \$33.2 million in revenue, or 30% of our total revenues for the fiscal year. A significant reduction in the sales to or loss of any of our major customers would have a material adverse effect on our business, financial condition and results of operations. In addition, our revenues are largely dependent upon the ability of our customers to continue to grow or need services or to develop and sell products that incorporate our products. No assurance can be given that our customers will not experience financial or other difficulties that could adversely affect their operations and, in turn, our results of operations.

We depend on key personnel and skilled employees and face competition in hiring and retaining qualified employees.

We are largely dependent upon the skills and efforts of our senior management, managerial, sales and technical employees. None of our senior management personnel or other key employees are subject to any employment contracts except Victor Dellovo, our Chief Executive Officer and President. The loss of services of any of our executives or other key personnel could have a material adverse effect on our business, financial condition and results of operations. Our future success will depend to a significant extent on our ability to attract, train, motivate and retain highly skilled technical professionals. Our ability to maintain and renew existing engagements and obtain new business depends, in large part, on our ability to hire and retain technical personnel with the skills that keep pace with continuing changes in our industry standards and technologies. The inability to hire additional qualified personnel could impair our ability to satisfy or grow our client base. There can be no assurance that we will be successful in retaining current or future employees.

We depend on contracts with the federal government, primarily with the Department of Defense ("DoD"), for a significant portion of our revenue, and our business could be seriously harmed if the government significantly decreased or ceased doing business with us.

We derived 6% of our total revenue in fiscal year 2017 and 6% of our total revenue in fiscal year 2016 from the DoD as a subcontractor. We expect that the DoD contracts will continue to be important to our business for the foreseeable future. If we were suspended or debarred from contracting with the federal government generally, the General Services Administration, or any significant agency in the intelligence community or the DoD, if our reputation or relationship with government agencies were to be impaired, or if the government otherwise ceased doing business with us or significantly decreased the amount of business it does with us, our business, prospects, financial condition and operating results would be materially and adversely affected.

To be successful, we must respond to the rapid changes in technology. If we are unable to do so on a timely basis our business could be materially adversely affected.

Our future success will depend in large part on our ability to enhance our current products and to develop new commercial products on a timely and cost-effective basis in order to respond to technological developments and changing customer needs. The design-in process is typically lengthy and expensive and there can be no assurance that we will be able to continue to meet the product specifications of our customers in a timely and adequate manner. In addition, if we fail to anticipate or to respond adequately to changes in technology and customer preferences, or if there is any significant delay in product developments or introductions, this could have a material adverse effect on our business, financial condition and results of operations, including the risk of inventory obsolescence. Because of the complexity of our products, we have experienced delays from time to time in completing products on a timely basis. If we are unable to design, develop or introduce competitive new products on a timely basis, our future operating results would be adversely affected, particularly in our HPP segment. There can be no assurance that we will be successful in developing new products or enhancing our existing products on a timely or cost-effective basis, or that such new products or product enhancements will achieve market acceptance.

We rely on single sources for supply of certain components and our business may be seriously harmed if our supply of any of these components or other components is disrupted.

Several components used in our HPP products are currently obtained from sole-source suppliers. We are dependent on key vendors like Mellanox Technologies for our high-speed interconnect components. Generally, suppliers may terminate our purchase orders without cause upon 30 days' notice and may cease offering products to us upon 180 days' notice. Although we do not consider the risk of interruption of supply to be a significant risk in the near term, if in the future, Mellanox Technologies were to limit or reduce the sale of such components to us, or if these or other component suppliers, some of which are small companies, were to experience future financial difficulties or other problems which could prevent them from supplying the necessary components, such events could have a material adverse effect on our business, financial condition and results of operations. These sole source and other suppliers are each subject to quality and performance risks, materials shortages, excess demand, reduction in capacity and other factors that may disrupt the flow of goods to us or our customers, which thereby may adversely affect our business and customer relationships.

We have no guaranteed supply arrangements with our suppliers and there can be no assurance that our suppliers will continue to meet our requirements. If our supply arrangements are interrupted, there can be no assurance that we would be able to find another supplier on a timely or satisfactory basis. Any shortage or interruption in the supply of any of the components used in our products, or the inability to procure these components from alternate sources on acceptable terms, could have a material adverse effect on our business, financial condition and results of operations. There can be no assurance that severe shortages of components will not occur in the future. Such shortages could increase the cost or delay the shipment of our products, which could have a material adverse effect on our business, financial condition and results of operations. Significant increases in the prices of these components would also materially adversely affect our financial performance since we may not be able to adjust product pricing to reflect the increase in component costs. We could incur set-up costs and delays in manufacturing should it become necessary to replace any key vendors due to work stoppages, shipping delays, financial difficulties or other factors and, under certain circumstances, these costs and delays could have a material adverse effect on our business, financial condition and results of operations.

Our international operations are subject to a number of risks.

We market and sell our products in certain international markets and we have established operations in the U.K. and Germany. Foreign-based revenue is determined based on the location to which the product is shipped or services are rendered and represented 37% and 31% of our total revenue for the fiscal years ended September 30, 2017 and 2016, respectively. If revenues generated by foreign activities are not adequate to offset the expense of establishing and maintaining these foreign activities, our business, financial condition and results of operations could be materially adversely affected. In addition, there are certain risks inherent in transacting business internationally, such as changes in applicable laws and regulatory requirements, export and import restrictions, export controls relating to technology, tariffs and other trade barriers, longer payment cycles, problems in collecting accounts receivable, political instability, fluctuations in currency exchange rates, expatriation controls and potential adverse tax consequences, any of which could adversely impact the success of our international activities. A portion of our revenues are from sales to foreign entities, including foreign governments, which are primarily paid in the form of foreign currencies. There can be no assurance that one or more of such factors will not have a material adverse effect on our future international activities and, consequently, on our business, financial condition or results of operations.

Systems failures may disrupt our business and have an adverse effect on our results of operations.

Any systems failures, including network, software or hardware failures, whether caused by us, a third party service provider, unauthorized intruders and hackers, computer viruses, natural disasters, power shortages or terrorist attacks, could cause loss of data or interruptions or delays in our business or that of our clients and reputational harm as a security provider. Like other companies, we have experienced cyber security threats to our data and systems, our

company sensitive information, and our information technology infrastructure, including malware and computer virus attacks, unauthorized access, systems failures and temporary disruptions. We may experience similar security threats at customer sites that we operate and manage as a contractual requirement. Prior cyber attacks directed at us have not had a material adverse impact on our business or our financial results, and we believe that our continuing commitment toward threat detection and mitigation processes and procedures will avoid such impact in the future. Due to the evolving nature of these security threats, however, the impact of any future incident cannot be predicted.

In addition, the failure or disruption of our email, communications or utilities could cause us to interrupt or suspend our operations or otherwise harm our business. Our property and business interruption insurance may be inadequate to compensate us for all losses that may occur as a result of any system or operational failure or disruption and, as a result, our actual results could differ materially and adversely from those anticipated.

The systems and networks that we maintain for our clients, although highly redundant in their design, could also fail. If a system or network we maintain were to fail or experience service interruptions, we might experience loss of revenue or face claims for damages or contract termination. Our errors and omissions liability insurance may be inadequate to compensate us for all the damages that we might incur and, as a result, our actual results could differ materially and adversely from those anticipated.

We face competition that could adversely affect our sales and profitability.

The markets for our products are highly competitive and are characterized by rapidly changing technology, frequent product performance improvements and evolving industry standards. Many of our competitors are substantially larger than we are and have greater access to capital and human resources and in many cases price their products and services less than ours. In addition, due to the rapidly changing nature of technology, new competitors may emerge. Competitors may be able to offer more attractive pricing or develop products that could offer performance features that are superior to our products, resulting in reduced demand for our products. Such competitors could have a negative impact on our ability to win future business opportunities. There can be no assurance that a new competitor will not attempt to penetrate the various markets for our products and services. Their entry into markets historically targeted by us may have a material adverse effect on our business, financial condition and results of operations.

Our business could be adversely affected by changes in budgetary priorities of the federal government.

Because we derive a significant percentage of our revenue from contracts with the federal government, changes in federal government budgetary priorities could directly affect our financial performance. A significant decline in government expenditures, a shift of expenditures away from programs that we support or a change in federal government contracting policies could cause federal government agencies to reduce their purchases under contracts, to exercise their right to terminate contracts at any time without penalty or not to exercise options to renew contracts.

In years when Congress does not complete its budget process before the end of its fiscal year (September 30), government operations are funded through a continuing resolution (CR) that temporarily funds federal agencies. Recent CRs have generally provided funding at the levels provided in the previous fiscal year and have not authorized new spending initiatives. When the federal government operates under a CR, delays can occur in the procurement of products and services. Historically, such delays have not had a material effect on our business; however, should funding of the federal government by CR be prolonged or extended, and sequestration is not alleviated, it could continue to have significant consequences to our business and our industry.

Additionally, our business could be seriously affected if changes in DoD priorities reduces the demand for our services on contracts supporting some operations and maintenance activities or if we experience an increase in set-asides for small businesses, which could result in our inability to compete directly for contracts.

U.S. Federal government contracts contain numerous provisions that are unfavorable to us.

U.S. Federal government contracts contain provisions and are subject to laws and regulations that give the government rights and remedies, some of which are not typically found in commercial contracts, including allowing the government to:

- cancel multi-year contracts and related orders if funds for contract performance for any subsequent year become unavailable;
- claim rights in systems and software developed by us;
- suspend or debar us from doing business with the federal government or with a governmental agency;
- impose fines and penalties and subject us to criminal prosecution; and
- control or prohibit the export of our data and technology.

If the government terminates a contract for convenience, we may recover only our incurred or committed costs, settlement expenses and profit on work completed prior to the termination. If the government terminates a contract for default, we may be unable to recover even those amounts, and instead may be liable for excess costs incurred by the government in procuring undelivered items and services from another source. Depending on the value of a contract, such termination could cause our actual results to differ materially and adversely from those anticipated.

As is common with government contractors, we have experienced and continue to experience occasional performance issues under certain of our contracts. Depending upon the value of the matters affected, a performance problem that impacts

our performance of a program or contract could cause our actual results to differ materially and adversely from those anticipated.

We may be unsuccessful in protecting our intellectual property rights which could result in the loss of a competitive advantage.

Our ability to compete effectively against other companies in our industry depends, in part, on our ability to protect our current and future proprietary technology under patent, copyright, trademark, trade secret and unfair competition laws. We cannot assure that our means of protecting our proprietary rights in the United States or abroad will be adequate, or that others will not develop technologies similar or superior to our technology or design around our proprietary rights. In addition, we may incur substantial costs in attempting to protect our proprietary rights.

Also, despite the steps taken by us to protect our proprietary rights, it may be possible for unauthorized third parties to copy or reverse-engineer aspects of our products develop similar technology independently or otherwise obtain and use information that we regard as proprietary and we may be unable to successfully identify or prosecute unauthorized uses of our technology. Furthermore, with respect to our issued patents and patent applications, we cannot assure that patents from any pending patent applications (or from any future patent applications) will be issued, that the scope of any patent protection will exclude competitors or provide competitive advantages to us, that any of our patents will be held valid if subsequently challenged or that others will not claim rights in or ownership of the patents (and patent applications) and other proprietary rights held by us.

If we become subject to intellectual property infringement claims, we could incur significant expenses and could be prevented from selling specific products.

We may become subject to claims that we infringe the intellectual property rights of others in the future. We cannot assure that, if made, these claims will not be successful. Any claim of infringement could cause us to incur substantial costs defending against the claim even if the claim is invalid, and could distract management from other business. Any judgment against us could require substantial payment in damages and could also include an injunction or other court order that could prevent us from offering certain products.

Our need for continued or increased investment in research and development may increase expenses and reduce our profitability.

Our industry is characterized by the need for continued investment in research and development. If we fail to invest sufficiently in research and development, our products could become less attractive to potential customers and our business and financial condition could be materially and adversely affected. As a result of the need to maintain or increase spending levels in this area and the difficulty in reducing costs associated with research and development, our operating results could be materially harmed if our research and development efforts fail to result in new products or if revenues fall below expectations. In addition, as a result of our commitment to invest in research and development, spending levels of research and development expenses as a percentage of revenues may fluctuate in the future.

Our results of operations are subject to fluctuation from period to period and may not be an accurate indication of future performance.

We have experienced fluctuations in operating results in large part due to the sale of products and services in relatively large dollar amounts to a relatively small number of customers. Customers specify delivery date requirements that coincide with their need for our products and services. Because these customers may use our products and services in connection with a variety of defense programs or other projects with different sizes and durations, a customer's orders for one quarter generally do not indicate a trend for future orders by that customer. As

such, we have not been able in the past to consistently predict when our customers will place orders and request shipments so that we cannot always accurately plan our manufacturing, inventory, and working capital requirements. As a result, if orders and shipments differ from what we predict, we may incur additional expenses and build excess inventory, which may require additional reserves and allowances and reduce our working capital and operational flexibility. Any significant change in our customers' purchasing patterns could have a material adverse effect on our operating results and reported earnings per share for a particular quarter. Thus, results of operations in any period should not be considered indicative of the results to be expected for any future period.

High quarterly book-ship ratios may pressure inventory and cash flow management, necessitating increased inventory balances to ensure quarterly revenue attainment. Increased inventory balances tie up additional capital, limiting our operational flexibility. Some of our customers may have become conditioned to wait until the end of a quarter to place orders in the

expectation of receiving a discount. Customers conditioned to seek quarter-end discounts increase risk and uncertainty in our financial forecasting and decrease our margins and profitability.

Our quarterly results may be subject to fluctuations resulting from a number of other factors, including:

- delays in completion of internal product development projects;
- delays in shipping hardware and software;
- delays in acceptance testing by customers;
- a change in the mix of products sold to our served markets;
- changes in customer order patterns;
- production delays due to quality problems with outsourced components;
- inability to scale quick reaction capability products due to low product volume;
- shortages and costs of components;
- the timing of product line transitions;
- declines in quarterly revenues from previous generations of products following announcement of replacement products containing more advanced technology;
- inability to realize the expected benefits from acquisitions and restructurings, or delays in realizing such benefits;
- potential asset impairment, including goodwill and intangibles, or restructuring charges; and
- changes in estimates of completion on fixed price service engagements.

In addition, from time to time, we have entered into contracts, referred to as development contracts, to engineer a specific solution based on modifications to standard products. Gross margins from development contract revenues are typically lower than gross margins from standard product revenues. We intend to continue to enter into development contracts and anticipate that the gross margins associated with development contract revenues will continue to be lower than gross margins from standard product sales.

Another factor contributing to fluctuations in our quarterly results is the fixed nature of expenditures on personnel, facilities and marketing programs. Expense levels for these programs are based, in significant part, on expectations of future revenues. If actual quarterly revenues are below management's expectations, our results of operations will likely be adversely affected. Further, the preparation of financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates, and changes in estimates in subsequent periods could cause our results of operations to fluctuate.

Changes in regulations could materially adversely affect us.

Our business, results of operations, or financial condition could be materially adversely affected if laws, regulations, or standards relating to us or our products are newly implemented or changed. In addition, our compliance with existing regulations may have a material adverse impact on us. Under applicable federal securities laws, we are required to evaluate and determine the effectiveness of our internal control structure and procedures for financial reporting which in 2015, 2016 and 2017, we determined have not been effective due to a material weakness described below. If we have a material weakness in our internal controls, our results of operations or financial condition may be materially adversely affected or our stock price may decline. As of September 30, 2017, we have identified a material weakness in connection with controls over revenue recognition in foreign subsidiaries. See Item 9A "Controls and Procedures" else where in this document.

If we experience a disaster or other business continuity problem, we may not be able to recover successfully, which could cause material financial loss, loss of human capital, regulatory actions, reputational harm, or legal liability.

If we experience a local or regional disaster or other business continuity problem, such as a hurricane, earthquake, terrorist attack, pandemic or other natural or man-made disaster, our continued success will depend, in part, on the availability of our personnel, our office facilities, and the proper functioning of our computer, telecommunication and other related systems and operations. As we attempt to grow our operations, the potential for particular types of natural or man-made disasters, political, economic or infrastructure instabilities, or other country- or region-specific business continuity risks increases.

If we suffer any data breaches involving the designs, schematics, or source code for our products or other sensitive information, our business and financial results could be adversely affected.

We securely store our designs, schematics, and source code for our products as they are created. A breach, whether physical, electronic or otherwise, of the systems on which this sensitive data is stored could lead to damage or piracy of our products. If we are subject to data security breaches from external sources or from an insider threat, we may have a loss in sales or increased costs arising from the restoration or implementation of additional security measures, either of which could adversely affect our business and financial results. Other potential costs could include loss of brand value, incident response costs, loss of stock market value, regulatory inquiries, litigation, and management distraction. In addition, a security breach that involved classified information could subject us to civil or criminal penalties, loss of a government contract, loss of access to classified information, or debarment as a government contractor. Similarly, a breach that involved loss of customer-provided data could subject us to loss of a customer, loss of a contract, litigation costs and legal damages, and reputational harm.

Our operating results may fluctuate significantly.

Our operating results have fluctuated widely on a quarterly and annual basis during the last several years and we expect to experience significant fluctuations in future operating results. Many factors, some of which are beyond our control, have contributed to these fluctuations in the past and may continue to do so. Such factors include:

- sales in relatively large dollar amounts to a relatively small number of customers;

- competitive pricing programs and volume discounts;

- loss of customers;

- market acceptance of our products;

- product obsolescence;

- general economic conditions;

- change in the mix of products sold;

- whether or not we are able to secure design wins for significant customer systems;

- timing of significant orders;

delays in completion of internal product development projects or introduction of new products;

delays in shipping our products;

delays in acceptance testing by customers;

production delays due to quality programs with outsourced components;

shortages of components;

timing of product line transitions;

14

- uncertainty and timing of funding of governmental programs, including defense;

- declines of revenues from previous generations of products following announcement of replacement products containing more advanced technology; and

fixed nature of our expenditures on personnel, facilities and marketing programs.

We believe that period-to-period comparisons of our results of operations will not necessarily be meaningful and should not be relied upon as indicative of our future performance. It is also possible that in some periods, our operating results may be below the expectations of securities analysts and investors. In such circumstances, the price of our common stock may decline.

We need to continue to expend resources on research and development ("R&D") efforts, particularly our HPP segment, to meet the needs of our customers. If we are unable to do so, our products could become less attractive to customers and our business could be materially adversely affected.

Our industry requires a continued investment in research and development (R&D). As a result of our need to maintain or increase our spending levels for R&D in this area and the difficulty in reducing costs associated with R&D, our operating results could be materially harmed if our revenues fall below expectations. In addition, as a result of CSPI's commitment to invest in R&D, spending as a percent of revenues may fluctuate in the future. Further, if we fail to invest sufficiently in R&D or our R&D does not produce competitive results, our products may become less attractive to our customers or potential customers, which could materially harm our business and results of operations.

Our business could be adversely impacted if we have deficiencies in our disclosure controls and procedures or internal controls over financial reporting.

Our management identified a material weakness in internal controls over financial reporting as of September 30, 2017. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting at our foreign subsidiaries, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected in a timely basis.

The material weakness, which was first identified in fiscal year 2015, was in connection with our controls over the revenue recognition process, specifically that revenue recognition criteria have been satisfied prior to recognizing revenue and the failure to sufficiently assess gross versus net revenue indicators to certain revenue transactions. We determined that controls over the revenue recognition process were not operating effectively and the resulting control deficiency amounted to a material weakness in our internal controls over financial reporting. As a result, we have concluded that the Company's internal control over financial reporting are not effective as of September 30, 2017. Although we have implemented changes to our internal controls over financial reporting during the past three years, at this time we cannot conclude that the material weakness has been remediated.

Effective internal control over financial reporting and disclosure controls and procedures are necessary in order for us to provide reliable financial and other reports and effectively prevent fraud. These types of controls are designed to provide reasonable assurance regarding the reliability of financial reporting and the proper preparation of our financial statements, as well as regarding the timely reporting of material information. If we cannot maintain effective internal control over financial reporting or disclosure controls and procedures, or provide reliable financial statements or SEC reports or prevent fraud, investors may lose confidence in our reported financial information, our common stock could

be subject to delisting on the stock exchange where it is traded, our operating results and the trading price of our common stock could suffer and we might become subject to litigation.

While our management will continue to review the effectiveness of our internal control over financial reporting and disclosure controls and procedures, there is no assurance that our disclosure controls and procedures or our internal control over financial reporting will be effective in accomplishing all control objectives, including the prevention and detection of fraud, all of the time.

Our stock price may continue to be volatile

Historically, the market for technology stocks has been extremely volatile. Our common stock has experienced and may continue to experience, substantial price volatility. The following factors could cause the market price of our common stock to fluctuate significantly:

- loss of a major customer;
- loss of a major supplier;
- the addition or departure of key personnel;
- variations in our quarterly operating results;
- announcements by us or our competitors of significant contracts, new products or product enhancements;
- acquisitions, distribution partnerships, joint ventures or capital commitments;
- regulatory changes;
- sales of our common stock or other securities in the future;
- changes in market valuations of technology companies; and
- fluctuations in stock market prices and volumes.

In addition, the stock market in general and the NASDAQ Global Market and technology companies in particular, have experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of such companies. These broad market and industry factors may materially adversely affect the market price of our common stock, regardless of our actual operating performance. In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been instituted against such companies. If any shareholders were to issue a lawsuit, we could incur substantial costs defending the lawsuit and the attention of management could be diverted.

Item 2. Properties

Listed below are our principal facilities as of September 30, 2017. Management considers all facilities listed below to be suitable for the purpose(s) for which they are used, including manufacturing, research and development, sales, marketing, service and administration.

| Location | Principal Use | Owned or Leased | Approximate Floor Area |
|--|--|-----------------|------------------------|
| HPP Segment Properties: | | | |
| CSP Inc. 175 Cabot Street, Suite 210 Lowell, MA 01854 | Corporate Headquarters Manufacturing, Sales, Marketing and Administration | Leased | 13,515 S.F. |
| TS Segment Properties: | | | |
| Modcomp, Inc. 1182 East Newport Center Drive Deerfield Beach, FL 33442 | Division Headquarters Sales, Marketing and Administration | Leased | 11,815 S.F. |
| Modular Computer Systems GmbH Oskar-Jager-Strasse 173/K4 | Sales, Marketing, Service and Administration | Leased | 11,031 S.F. |

D-50825 Koln
Germany

| | | | |
|--|--|--------|------------|
| Modcomp, Ltd. 12a Oaklands Business Park, Fishponds Road Wokingham Berkshire United Kingdom | Sales, Marketing and Administration | Leased | 2,490 S.F. |
|--|--|--------|------------|

Item 3. Legal Proceedings

We are currently not a party to any material legal proceedings.

Item 4. Mine Safety Disclosures

Not Applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market information. Our common stock is traded on the Nasdaq Global Market under the symbol CSPI. The following table provides the high and low sales prices of our common stock as reported on the Nasdaq Global Market for the periods indicated.

| | 2017 | | 2016 | |
|--------------|---------|--------|--------|--------|
| Fiscal Year: | High | Low | High | Low |
| 1st Quarter | \$11.95 | \$7.89 | \$7.18 | \$5.28 |
| 2nd Quarter | 11.35 | 8.25 | 6.95 | 5.36 |
| 3rd Quarter | 11.23 | 10.00 | 9.09 | 5.92 |
| 4th Quarter | 11.20 | 9.61 | 10.95 | 8.00 |

Stockholders. We had approximately 76 holders of record of our common stock as of December 22, 2017. This number does not include stockholders for whom shares were held in a “nominee” or “street” name. We believe the number of beneficial owners of our shares of common stock (including shares held in street name) at that date was approximately 1,783.

Dividends. For the fiscal years ended September 30, 2017 and 2016, the Company declared and paid cash dividends as follows:

| Fiscal Year | Date Declared | Record Date | Date Paid | Amount Paid Per Share |
|-------------|---------------|-------------|-----------|-----------------------|
| 2016 | 12/23/2015 | 12/31/2015 | 1/11/2016 | \$0.11 |
| 2016 | 2/16/2016 | 2/26/2016 | 3/11/2016 | \$0.11 |
| 2016 | 5/11/2016 | 5/27/2016 | 6/10/2016 | \$0.11 |
| 2016 | 8/18/2016 | 8/31/2016 | 9/9/2016 | \$0.11 |
| 2017 | 1/12/2017 | 1/27/2017 | 2/8/2017 | \$0.11 |
| 2017 | 2/23/2017 | 3/3/2017 | 3/17/2017 | \$0.11 |
| 2017 | 5/24/2017 | 6/1/2017 | 6/15/2017 | \$0.11 |
| 2017 | 8/14/2017 | 8/21/2017 | 9/5/2017 | \$0.11 |

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This management's discussion and analysis of financial condition and results of operations and other portions of this filing contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by the forward-looking information. You should review the "Special Note Regarding Forward Looking Statements" and "Risk Factors" sections of this annual report for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained in the following discussion and analysis. The following discussion should be read in conjunction with our financial statements and the related notes included elsewhere in this filing.

Overview of Fiscal 2017 Results of Operations

Revenue increased by approximately \$8.1 million, or 8%, to \$111.5 million for the fiscal year ended September 30, 2017 versus \$103.4 million for the fiscal year ended September 30, 2016.

Our gross profit margin percentage decreased overall, from 24% of revenues for the fiscal year ended September 30, 2016 to 23% for the fiscal year ended September 30, 2017.

We generated operating income of approximately \$3.8 million for both fiscal years ended September 30, 2017 and September 30, 2016.

The following table details our results of operations in dollars and as a percentage of sales for the fiscal years ended:

| | September 30, 2017 | % of sales | September 30, 2016 | % of sales |
|-------------------------------------|-----------------------|------------------|-----------------------|------------------|
| (Dollar amounts in thousands) | | | | |
| Sales | \$111,482 | 100 % | \$103,367 | 100 % |
| Costs and expenses: | | | | |
| Cost of sales | 85,992 | 77 % | 78,326 | 76 % |
| Engineering and development | 2,362 | 2 % | 2,984 | 3 % |
| Selling, general and administrative | 19,356 | 17 % | 18,256 | 18 % |
| Total costs and expenses | 107,710 | 97 % | 99,566 | 96 % |
| Operating income | 3,772 | 3 % | 3,801 | 4 % |
| Other income (expense), net | 21 | — % | (201) | — % |
| Income before income taxes | 3,793 | 3 % | 3,600 | 3 % |
| Income tax expense | 1,287 | 1 % | 996 | 1 % |
| Net income | \$2,506 | 2 % | \$2,604 | 3 % |

Revenues

Revenue increased by approximately \$8.1 million, or 8%, to \$111.5 million for the fiscal year ended September 30, 2017 versus \$103.4 million for the fiscal year ended September 30, 2016. Our HPP segment revenue decreased by approximately \$2.5 million primarily due to a decline of \$2.3 million in the Myricom product revenue, and a \$1.3 million decline in Multicomputer product revenues, partially offset by \$1.1 million increase in royalty revenues. Our TS segment revenue increased by approximately \$10.6 million from increases of \$4.1 million, \$3.5 million and \$3.0 million in our U.S., U.K. and Germany divisions, respectively.

Edgar Filing: CSP INC /MA/ - Form 10-K

HPP segment revenue change by product and services lines for the fiscal years ended September 30 were as follows :

| (Dollar amounts in thousands) | | | Increase (decrease) | |
|-------------------------------|----------|----------|------------------------|-------|
| | 2017 | 2016 | \$ | % |
| Product | \$7,608 | \$11,190 | \$(3,582) | (32)% |
| Services | 6,236 | 5,152 | 1,084 | 21 % |
| Total | \$13,844 | \$16,342 | \$(2,498) | (15)% |

The HPP segment revenue decrease of \$2.5 million is primarily attributed to \$2.3 million sales decline in the Myricom legacy Ethernet adapters with no significant increase in the FPGA products. There was also a \$1.3 million decrease in Multicomputer product sales. The HPP segment's service revenue increase was due to additional royalty revenues related to the E2D program.

TS segment revenue change by product and services lines for the fiscal years ended September 30 were as follows:

| | 2017 | | 2016 | | Increase | |
|----------|----------|---|----------|---|----------|-----|
| | Dollar | % | Dollar | % | \$ | % |
| Product | \$77,067 | | \$66,645 | | \$10,422 | 16% |
| Services | 20,571 | | 20,380 | | 191 | 1% |
| Total | \$97,638 | | \$87,025 | | \$10,613 | 12% |

The TS segment total revenue increased in the U.S., U.K., and Germany divisions as previously noted. The \$10.4 million increase in TS segment product revenue is attributed to increases of \$3.3 million, \$3.7 million and \$3.4 million in our U.S., U.K., and Germany divisions, respectively. The \$0.2 million service revenue increase is related to an increase in the U.S. division of \$0.8 million, partially offset by decreases in Germany of \$0.5 million and the U.K. of \$0.1 million.

Our total revenues by geographic area based on the location to which the products were shipped or services rendered were as follows:

| | For the years ended September 30, | | | | Increase | |
|----------|-----------------------------------|------|-----------|------|-----------|------|
| | Dollar | % | Dollar | % | \$ | % |
| Americas | \$69,982 | 63% | \$71,115 | 69% | \$(1,133) | (2)% |
| Europe | 37,498 | 34% | 27,960 | 27% | 9,538 | 34% |
| Asia | 4,002 | 4% | 4,292 | 4% | (290) | (7)% |
| Totals | \$111,482 | 100% | \$103,367 | 100% | \$8,115 | 8% |

The large increase in Europe was largely due to the multinational customer sales in our U.K. division for some of our U.S. based customers.

Gross Margins

Our gross margins increased by approximately \$0.5 million to \$25.5 million in fiscal year 2017 as compared to gross margins of \$25.0 million in fiscal year 2016.

The following table summarizes gross margin ("GM") changes by segment for fiscal years 2017 and 2016:

| | 2017 | | 2016 | | Increase | |
|-------|----------|-----|----------|-----|----------|------|
| | Dollar | % | Dollar | % | Dollar | % |
| HPP | \$9,345 | 68% | \$10,111 | 62% | \$(766) | 6% |
| TS | 16,145 | 17% | 14,930 | 17% | 1,215 | —% |
| Total | \$25,490 | 23% | \$25,041 | 24% | \$449 | (1)% |

The impact of product mix on gross margins within our HPP segment for the fiscal years ended September 30 was as follows:

(Dollar amounts in thousands)

| | 2017 | | 2016 | | Increase (decrease) | |
|----------|---------|------|----------|------|------------------------|-------|
| | GM\$ | GM% | GM\$ | GM% | GM\$ | GM% |
| Product | \$3,249 | 43 % | \$5,072 | 45 % | \$(1,823) | (2) % |
| Services | 6,096 | 98 % | 5,039 | 98 % | 1,057 | — % |
| Total | \$9,345 | 68 % | \$10,111 | 62 % | \$(766) | 6 % |

The overall HPP segment gross margins as a percentage of sales increased to 68% in fiscal year 2017, from 62% in fiscal year 2016. The 6% increase in gross margin as a percentage of sales in the HPP segment was primarily attributed to the impact of an increase of \$1.1 million in high margin Multicomputer royalty revenues, which was partially offset by a decrease in lower margin HPP product revenues of approximately \$3.6 million.

The impact of product mix within our TS segment on gross margins for the fiscal years ended September 30 was as follows:

(Dollar amounts in thousands)

| | 2017 | | 2016 | | Increase (decrease) | |
|----------|----------|------|----------|------|------------------------|-------|
| | GM\$ | GM% | GM\$ | GM% | GM\$ | GM% |
| Product | \$10,124 | 13 % | \$9,224 | 14 % | \$900 | (1) % |
| Services | 6,021 | 29 % | 5,706 | 28 % | 315 | 1 % |
| Total | \$16,145 | 17 % | \$14,930 | 17 % | \$1,215 | — % |

The overall TS segment gross margin as a percentage of sales was unchanged at 17% for the period. For fiscal year 2017 compared to fiscal year 2016, the \$0.9 million increase in our TS segment product gross margins resulted from increased product revenues in all three divisions. The \$0.3 million increase in the TS segment service gross margins resulted from a combination of increased service revenues of approximately \$0.2 million combined with a general increase in overall service revenue margins from the MSP business.

Engineering and Development Expenses

The following table details our engineering and development expenses by operating segment for the fiscal years ended September 30, 2017 and 2016:

(Dollar amounts in thousands)

| | For the years ended September 30, | | | | | |
|-----------------------|--------------------------------------|---------------|---------|---------------|----------------|---------------|
| | 2017 | % of Total | 2016 | % of Total | \$ Decrease | % Decrease |
| By Operating Segment: | | | | | | |
| HPP | \$2,362 | 100 % | \$2,984 | 100 % | \$(622) | (21) % |
| TS | — | — % | — | — % | — | — % |
| Total | \$2,362 | 100 % | \$2,984 | 100 % | \$(622) | (21) % |

The \$0.6 million decrease in engineering and development expenses in the HPP segment resulted from transitioning from the external development of our latest generation Myricom products in fiscal year 2016 to the internal development of our ARIA Software Defined Security ("SDS") product set in fiscal year 2017. The fiscal year 2017

expenses are primarily for engineering expenses incurred in connection with the development of the nVoy and ARIA SDS products.

Selling, General and Administrative

The following table details our selling, general and administrative (“SG&A”) expenses by operating segment for the years ended September 30, 2017 and 2016:

(Dollar amounts in thousands)

| | For the years ended September 30, | | | | | |
|-----------------------|-----------------------------------|------------|----------|------------|------------------------|-----------------------|
| | 2017 | % of Total | 2016 | % of Total | \$ Increase (decrease) | % Increase (decrease) |
| By Operating Segment: | | | | | | |
| HPP | \$5,516 | 28 % | \$5,663 | 31 % | \$ (147) | (3)% |
| TS | 13,840 | 72 % | 12,593 | 69 % | 1,247 | 10 % |
| Total | \$19,356 | 100% | \$18,256 | 100% | \$ 1,100 | 6 % |

For fiscal year 2017 compared to fiscal year 2016, the HPP segment SG&A spending decrease of \$0.1 million is primarily attributed to decreases in variable compensation costs of approximately \$0.5 million partially offset by increases in outside consulting expenses of approximately \$0.3 million. In fiscal year 2016, we had a net gain of \$0.4 million on insurance proceeds from an officer life insurance policy and a \$0.3 million decrease in the cash surrender value of the underlying officer's life insurance policies. For fiscal year 2017 compared to fiscal year 2016, the TS segment SG&A spending increase of approximately \$1.2 million is substantially the result of an increase in our U.S. division of \$0.4 million primarily attributed to variable selling expenses and additional engineering and sales hires, combined with spending increases of \$0.1 million and \$0.7 million in our U.K. and German divisions, respectively. The spending increase in Germany is primarily attributed to selling expenses and the increase in the U.K. is attributed to administrative costs.

Other Income/Expenses

The following table details our other income/expenses for the years ended September 30, 2017 and 2016:

(Dollar amounts in thousands)

| | For the years ended September 30, | | |
|-----------------------------------|-----------------------------------|---------|---------------------|
| | 2017 | 2016 | Increase (decrease) |
| Interest expense | \$(76) | \$(87) | \$ 11 |
| Interest income | 11 | 7 | 4 |
| Foreign exchange loss | (3) | (134) | 131 |
| Other income, net | 89 | 13 | 76 |
| Total other income (expense), net | \$21 | \$(201) | \$ 222 |

Income Taxes

The Company recorded an income tax expense of approximately \$1.3 million, which reflected an effective tax expense rate of 33.9% for the year ended September 30, 2017, which was lower than the statutory rate due in part to the tax benefit from research and development credits. For the year ended September 30, 2016, the income tax expense was approximately \$1.0 million, which reflected an effective tax rate of 27.7%. The lower effective tax rate for 2016 as compared to the statutory rate was due in part to a large research and development credit.

As of September 30, 2017, management assessed the positive and negative evidence in the U.S operations, and estimated that we will have sufficient future taxable income to utilize the existing deferred tax assets. Significant objective positive evidence included the cumulative profits that we realized in recent fiscal years. This evidence enhances our ability to consider other subjective evidence such as our projections for future growth. Other factors that we considered are the likelihood for continued royalty income in future years, new product revenue from cyber security products, and our expectation that the TS segment will continue to be profitable in future years. On the basis of this evaluation, as of September 30, 2017, we have concluded that our U.S. deferred tax asset is more likely than not to be realized. It should be noted however, that the amount of the deferred tax asset realized could be adjusted in future years, if estimates of taxable income during the carryforward periods are reduced, or if there is objective negative evidence in the form of cumulative losses. On December 20, 2017, the Tax Cuts

and Jobs Act bill was passed by Congress. Once the bill is signed into law, the change in the tax law will lower our overall tax rate and reduce our deferred taxes and will be treated as a discrete item in the quarter enacted. We will still need to assess the effect of the new law when enacted on our effective tax rate.

We continue to maintain a full valuation allowance against our U.K. deferred tax assets as we have experienced cumulative losses and do not have any indication that the operation will be profitable in the future to an extent that will allow us to utilize much of our net operating loss carryforwards. To the extent that actual experience deviates from our assumptions, our projections would be affected and hence our assessment of realizability of our deferred tax assets may change.

Liquidity and Capital Resources

Our primary source of liquidity is our cash and cash equivalents, which increased by approximately \$0.8 million to \$13.9 million as of September 30, 2017 from \$13.1 million as of September 30, 2016. At September 30, 2017, cash equivalents totaled \$0.5 million of this amount.

Significant sources of cash for the year ended September 30, 2017 included net income of approximately \$2.5 million, an increase in accounts payable and accrued expenses of approximately \$6.5 million, an increase in deferred revenues of approximately \$1.2 million, and a decrease in life insurance receivables of approximately \$0.4 million. Partially offsetting these sources of cash were an increase in accounts receivable of approximately \$8.1 million, payment of dividends of approximately \$1.7 million, an increase in deferred costs of approximately \$0.8 million, and an increase in inventories of approximately \$0.4 million.

Cash held by our foreign subsidiaries located in Germany and the U.K. totaled approximately \$4.6 million as of September 30, 2017 and \$6.4 million as of September 30, 2016. This cash is included in our total cash and cash equivalents reported above. We consider this cash to be permanently reinvested into these foreign locations to support their operations and growth.

As of September 30, 2017 and September 30, 2016, the Company maintained a line of credit that allows for borrowings of up to \$1.0 million. Availability under the facility is reduced by outstanding borrowings thereunder. The interest rates on outstanding borrowings is London Inter-Bank Offer Rate ("LIBOR") plus 2.5%, with a floor of 4%. Borrowings under the credit agreements are required to be repaid on demand in certain circumstances, upon termination of the agreements, or may be prepaid by the Company without penalty. The Company had no amounts outstanding under the line of credit during the fiscal years ending September 30, 2017 and 2016.

As of September 30, 2017 and September 30, 2016, the Company also maintained an inventory line of credit that may be used by the TS segment in the U.S. to purchase inventory from approved vendors with payment terms which exceed those offered by the vendors. No interest accrues under the inventory line of credit when advances are paid within terms, late payments are subject to an interest charge of Prime plus 5%. The credit agreements for the inventory line of credit contain financial covenants which require the Company to maintain the following TS segment-specific financial ratios: (1) a minimum current ratio of 1.2, (2) tangible net worth of no less than \$4.0 million, and (3) a maximum ratio of total liabilities to total net worth of less than 5.0:1. As of September 30, 2017 and September 30, 2016, Company borrowings under the inventory line of credit, which is included as a component of accounts payable and accrued expenses on the accompanying consolidated balance sheets, were \$3.1 million and \$3.2 million, respectively, and the Company was in compliance with all covenants.

For more information, please refer to Note 12 - Lines of Credit, in the Notes to our Consolidated Financial Statements contained in this annual report on Form 10-K.

If cash generated from operations is insufficient to satisfy working capital requirements, we may need to access funds through bank loans, the equity markets, or other means. There is no assurance that we will be able to raise any such capital on terms acceptable to us, on a timely basis or at all. If we are unable to secure additional financing, we may not be able to complete development or enhancement of products, take advantage of future opportunities, respond to competition or continue to effectively operate our business.

Based on our current plans and business conditions, management believes that the Company's available cash and cash equivalents, the cash generated from operations and availability on our lines of credit will be sufficient to provide for the Company's working capital and capital expenditure requirements for the foreseeable future.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an on-going basis, we evaluate our estimates, including those related to uncollectible receivables, inventory valuation, goodwill and intangibles, income taxes, deferred compensation, revenue recognition, retirement plans, restructuring costs and contingencies. We base our estimates on historical performance and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements: revenue recognition; valuation allowances, specifically the allowance for doubtful accounts and net deferred tax asset valuation allowance; inventory valuation; intangibles; and pension and retirement plans.

Revenue Recognition

We derive revenue from the sale of integrated hardware and software, professional services, maintenance contracts, other services, and third party service contracts. Professional services generally include implementation, installation, and training services. Other services generally include revenue generated through our royalty and extended warranty contracts. We recognize revenue when persuasive evidence of an arrangement exists, delivery of the product or service has occurred, the fee is fixed and determinable and collectability is reasonably assured. We enter into multiple element arrangements as well as standalone sales of product, professional services, and other services.

We recognize revenue from standalone product sales upon transfer of title, which is typically upon shipment, provided all other revenue recognition criteria have been met. Revenue generated from standalone professional services and extended warranty contracts is recognized as services are performed, provided all other revenue recognition criteria have been met. In some instances professional service contracts include a customer acceptance provision, in which case revenue is deferred until we have evidence of customer acceptance. We recognize revenue from usage based royalty contracts upon confirmation from the customer of shipment of the system produced pursuant to the royalty agreement.

We recognize revenue from multiple element arrangements in accordance with Accounting Standards Codification ("ASC") 605-25, Multiple Element Arrangements. We evaluate multiple element arrangements to determine if separate units of accounting exist, and if so, we allocate revenue to each element based upon the relative selling price of each element. ASC 605-25 establishes a hierarchy for determining the amount to allocate to each separate deliverable in an arrangement. We determine selling price using vendor specific objective evidence ("VSOE"), if it exists; or, if VSOE does not exist, third party evidence ("TPE") of fair value is applicable; otherwise, we use the best estimate of selling price ("BESP"). The objective of BESP is to determine the price at which the Company would transact if the element was sold on a standalone basis. Management's determination of BESP involves several factors including budgeted profit margins, and cost to complete services.

We recognize revenue from third party service contracts as either gross sales or net sales in accordance with ASC 605-45, Principal Agent Considerations, which requires us to determine if the Company is acting as a principal party to the transaction or simply acting as an agent or broker. Under ASC 605-45, the assumption of the risks and rewards under the arrangement are considered indicators of principal parties to the arrangement. We record revenue as gross

when it is a principal party to the arrangement and net of cost when we are acting as a broker or agent. Under gross sales recognition, the entire selling price is recorded in revenue and our cost to the third-party service provider or vendor is recorded in cost of goods sold. Under net sales recognition, the cost to the third-party service provider or vendor is recorded as a reduction to revenue resulting in net sales equal to the gross profit on the transaction.

The following policies are applicable to our major categories of segment revenue transactions:

HPP Segment Revenue

HPP segment revenue is derived from the sale of integrated hardware and software, maintenance, and other services through the Multicomputer and Myricom product lines. Multicomputer product revenue is generally recognized when product is shipped, provided that all revenue recognition criteria are met. Service revenue consists principally of warranty and royalty revenue. Revenue generated from extended warranty contracts is recognized as services are performed over the term

of the contract, provided all other revenue recognition criteria have been met We recognize revenue from usage based royalty contracts upon confirmation from the customer of shipment of the system produced pursuant to the royalty agreement.

Myricom revenue is derived from the sale of products, which are comprised of both hardware and embedded software which is essential to the products functionality, and post contract maintenance and support. Revenue from multiple element arrangements is recognized in accordance with ASC 605-25. We evaluate multiple element arrangements to determine if separate units of accounting exist, and if so, we allocate revenue to each element based upon the relative selling price of each element. We determine selling price using BESP. Management's determination of BESP is based on several factors, including, but not limited to, internal costs and gross margin objectives. Accordingly, revenue for post contract maintenance and support is recognized over the implied maintenance period of three years, and revenue for product sales is recognized upon delivery assuming all other revenue recognition criteria have been met.

TS Segment Revenue

TS Segment revenue is derived from the sale of hardware, software, professional services, maintenance contracts and third party service contracts. TS product revenue is generally recognized when product is shipped, provided that all revenue recognition criteria are met. Service revenue consists of professional services which generally include implementation, installation, and training services. Revenue generated from standalone professional services is recognized as the services are completed, provided all other revenue recognition criteria have been met. Our standard sales agreements generally do not include customer acceptance provisions. However, in certain instances when arrangements include a customer acceptance provision or there is uncertainty about customer acceptance, revenue is deferred until we have evidence of customer acceptance.

Revenue derived from the sale of products, which are comprised of both hardware and software, and professional services is recognized in accordance with ASC 605-25. We evaluate multiple element arrangements to determine if separate units of accounting exist, and if so, we allocate revenue to each element based upon the relative selling price of each element. We determine selling price using BESP. Management's determination of BESP is based on several factors, including, but not limited to, internal costs and gross margin objectives. Accordingly revenue for professional services is recognized as services are completed, and revenue for product sales is recognized upon delivery assuming all other revenue recognition criteria have been met.

We also recognize TS segment revenue from certain third party service contracts, which are evaluated to determine whether such service revenue should be recorded as gross sales or net sales in accordance with ASC 605-45. We evaluate all third party service contracts to determine whether we act as a principal in the transaction and assume the risks and rewards of ownership or if we are simply acting as an agent or broker. Under gross sales recognition, the entire selling price is recorded in sales and our cost to the third-party service provider or vendor is recorded in cost of goods sold. Under net sales recognition, the cost to the third-party service provider or vendor is recorded as a reduction to sales resulting in net sales equal to the gross profit on the transaction and there are no costs of goods sold. We use the net sales recognition method for the third party service contracts that we sell when we are not the primary obligor on the contract. We use the gross sales recognition for the third party service contracts that we sell when we act as principal and are the primary obligor.

Product Warranty Accrual

Our product sales generally include a 90-day to three-year hardware warranty. At time of product shipment, we accrue for the estimated cost to repair or replace potentially defective products. Estimated warranty costs are based upon prior actual warranty costs for substantially similar products.

Engineering and Development Expenses

Engineering and development expenses include payroll, employee benefits, stock-based compensation and other headcount-related expenses associated with product development. Engineering and development expenses also include third-party development and programming costs. We consider technological feasibility for our software products to be reached upon the release of the software, accordingly, no internal software development costs have been capitalized.

Income Taxes

We use the asset and liability method of accounting for income taxes whereby deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment

date. We also reduce deferred tax assets by a valuation allowance if, based on the weight of available evidence, it is more likely than not that some portion or all of the recorded deferred tax assets will not be realized in future periods. This methodology requires estimates and judgments in the determination of the recoverability of deferred tax assets and in the calculation of certain tax liabilities. Valuation allowances are recorded against the gross deferred tax assets that management believes, after considering all available positive and negative objective evidence, historical and prospective, with greater weight given to historical evidence, that it is more likely than not that these assets will not be realized.

In addition, we are required to recognize in the consolidated financial statements, those tax positions determined to be more-likely-than-not of being sustained upon examination, based on the technical merits of the positions as of the reporting date. If a tax position is not considered more-likely-than-not to be sustained based solely on its technical merits, no benefits of the position are recognized.

In addition, the calculation of the Company's tax liabilities involves dealing with uncertainties in the application of complex tax regulations in a multitude of jurisdictions. The Company records liabilities for estimated tax obligations in the U.S. and other tax jurisdictions. These estimated tax liabilities include the provision for taxes that may become payable in the future.

Intangible Assets

Intangible assets that are not subject to amortization are also required to be tested annually, or more frequently if events or circumstances indicate that the asset may be impaired. We did not have intangible assets with indefinite lives at any time during the two years ended September 30, 2017. Intangible assets subject to amortization are amortized over their estimated useful lives, generally three to ten years, and are carried at net book value. The remaining useful lives of intangible assets are evaluated on an annual basis. Intangible assets subject to amortization are also tested for recoverability whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. If the fair value of an intangible asset subject to amortization is determined to be less than its carrying value, then an impairment charge is recorded to write down that asset to its fair value.

Inventories

Inventories are stated at the lower of cost or market, with cost determined using the first-in, first-out method. The recoverability of inventories is based upon the types and levels of inventories held, forecasted demand, pricing, competition and changes in technology. We write down our inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than those projected by management, additional inventory write-downs may be required.

Pension and Retirement Plans

The funded status of pension and other post-retirement benefit plans is recognized prospectively on the consolidated balance sheet. Gains and losses, prior service costs and credits and any remaining transition amounts that have not yet been recognized through pension expense will be recognized in accumulated other comprehensive income, net of tax, until they are amortized as a component of net periodic pension/post-retirement benefits expense. Additionally, plan assets and obligations are measured as of our fiscal year-end balance sheet date (September 30).

We have defined benefit and defined contribution plans in the U.K., Germany and in the U.S. In the U.K. and Germany, the Company provides defined benefit pension plans for certain employees and former employees and defined contribution plans for the majority of the employees. The defined benefit plans in both the U.K. and Germany

are closed to newly hired employees and have been for the two years ended September 30, 2017. In the U.S., the Company provides defined contribution plans that cover most employees and supplementary retirement plans to certain employees and former employees who are now retired. These supplementary retirement plans are also closed to newly hired employees and have been for the two years ended September 30, 2017. These supplementary plans are funded through whole life insurance policies. The Company expects to recover all insurance premiums paid under these policies in the future, through the cash surrender value of the policies and any death benefits or portions thereof to be paid upon the death of the participant. These whole life insurance policies are carried on the balance sheet at their cash surrender values as they are owned by the Company and not assets of the defined benefit plans. In the U.S., the Company also provides for officer death benefits and post-retirement health insurance benefits through supplemental post-retirement plans to certain officers. The Company also funds these supplemental plans' obligations through whole life insurance policies on the officers.

Pension expense is based on an actuarial computation of current future benefits using estimates for expected return on assets, expected compensation increases and applicable discount rates. Management has reviewed the discount rates and rates

of return with our consulting actuaries and investment advisers and concluded they were reasonable. A decrease in the expected return on pension assets would increase pension expense. Expected compensation increases are estimated based on historical and expected increases in the future. Increases in estimated compensation increases would result in higher pension expense while decreases would lower pension expense. Discount rates are selected based upon rates of return on high quality fixed income investments currently available and expected to be available during the period to maturity of the pension benefit. A decrease in the discount rate would result in greater pension expense while an increase in the discount rate would decrease pension expense.

The Company funds its pension plans in amounts sufficient to meet the requirements set forth in applicable employee benefits laws and local tax laws. Liabilities for amounts in excess of these funding levels are accrued and reported in the consolidated balance sheets.

Inflation and Changing Prices

Management does not believe that inflation and changing prices had significant impact on sales, revenues or income during fiscal years 2017 or 2016. There is no assurance that the Company's business will not be materially and adversely affected by inflation and changing prices in the future.

Item 8. Financial Statements and Supplementary Data

The consolidated financial statements are included herein.

None.

Item 9A. Controls and Procedures

Evaluation of Controls and Procedures

Disclosure Controls and Procedures. The Company evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2017. Our Chief Executive Officer, our Chief Financial

Officer and other members of our senior management team supervised and participated in this evaluation. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of September 30, 2017, the Company's Chief Executive

Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were not effective, due to the fact that we are not yet able to conclude that the material weakness described in this Item 9A has been remediated by the changes we made in response to that material weakness.

Management's Report on Internal Control over Financial Reporting.

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. As defined in Rule 13a-15(f) under the Exchange Act, internal control over financial reporting is a process designed by or under the supervision of a company's principal executive and principal financial officers and effected by a company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. It includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of a company;

- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of a company are being made only in accordance with authorizations of management and the board of directors of a company; and

- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of a company's assets that could have a material effect on its financial statements.

Management has assessed the effectiveness of the Company's internal control over financial reporting as of September 30, 2017. In making its assessment of internal control, management used the criteria described in "Internal Control-Integrated Framework" issued by the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission. As a result of its assessment, management has concluded that the Company's internal control over financial reporting was not effective as of September 30, 2017.

As of September 30, 2017, management has identified a material weakness. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected in a timely basis.

The material weakness is in connection with our controls over the revenue recognition process at our foreign subsidiaries, specifically whether revenue recognition criteria have been satisfied prior to recognizing revenue and the failure to sufficiently assess gross versus net revenue indicators to certain revenue transactions. We determined that controls over the revenue recognition process were not operating effectively and the resulting control deficiency amounted to a material weakness in our controls over financial reporting. As a result, we have concluded that the Company's internal control over financial reporting was not effective as of September 30, 2017. Although we have implemented changes to our internal controls over financial reporting as described below, at this time, we cannot conclude that the material weakness has been remediated, as we continued to make personnel changes and upgrade systems throughout fiscal year 2017.

During the periods following our initial identification of the material weakness referred to above, management assessed various alternatives to remediate this material weakness and we implemented additional changes to our system of internal controls, which included the implementation of enhanced internal auditing procedures, whereby a comprehensive review form is prepared for all new revenue transactions. Our review process has been expanded to

include corporate and TS accounting personnel reviews to ensure the correct accounting methodology is applied to all revenue transactions. We also created new revenue reports from the German ERP system to assist in the revenue transaction review process. During the twelve months ended September 30, 2017, management took additional actions to upgrade our international accounting staff with the hiring of a new controller and added consultants to assist in the revenue transaction processing which will improve accounting operations in our European divisions.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

This Annual Report on Form 10-K does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's assessment of the effectiveness of the

Company's internal control over financial reporting as of September 30, 2017 was not subject to attestation by the Company's independent registered public accounting firm pursuant to rules of the SEC that call for the Company to provide only management's report in this Annual Report on Form 10-K.

Changes in Internal Control over Financial Reporting.

During the quarter ended September 30, 2017, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

We incorporate the information required by this item by reference to the sections captioned “Nominees for Election”, “Our Board of Directors”, “Our Executive Officers”, “Section 16(a) Beneficial Ownership Reporting Compliance” and “Corporate Governance” in our Schedule 14A Proxy Statement for our 2018 Annual Meeting of Stockholders, to be filed with the SEC within 120 days after the end of our fiscal year ended September 30, 2017.

Item 11. Executive Compensation

We incorporate the information required by this item by reference to the sections captioned “Compensation of Executive Officers” and “Compensation of Non-Employee Directors” in our Schedule 14A Proxy Statement for our 2018 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of our fiscal year ended September 30, 2017.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Securities Authorized for Issuance Under Equity Compensation Plans.

The equity compensation plans approved by our stockholders consist of the CSP, Inc. 1997 Incentive Stock Option Plan, the 2003 Stock Incentive Plan, the 2007 Stock Incentive Plan, the 2014 Employee Stock Purchase Plan (the "ESPP") and the 2015 Stock Incentive Plan. In fiscal 2017 and 2016, the Company granted certain officers including its Chief Executive Officer and non-employee directors shares of non-vested common stock instead of stock options. The vesting periods for the officers', the Chief Executive Officer's and the directors' non-vested stock awards are four years, three years and one year, respectively. The following table sets forth information as of September 30, 2017 regarding the total number of securities outstanding under these equity compensation plans.

| Plan Category | (a) (1)(2) Number of securities to be issued upon exercise of outstanding options, warrants and rights | (b) Weighted-average exercise price of outstanding stock options, warrants and rights | (c) Number of securities remaining available for future issuance under equity compensation plans (excluding |
|---------------|---|--|--|
|---------------|---|--|--|

| | | | securities reflected in column) (a))(3) |
|---|---------|---------|---|
| Equity compensation plans approved by security holders | 189,197 | \$ 4.49 | 333,051 |

(1) Includes 179,821 non-vested shares issued.

(2) Does not include purchase rights under the ESPP, as the purchase price and number of shares to be purchased under the ESPP are not determined until the end of the relevant purchase period.

(3) Includes 183,965 shares available for future issuance under the stock incentive and stock option plans and 149,086 under the ESPP.

We incorporate additional information required by this Item by reference to the section captioned “Security Ownership of Certain Beneficial Owners and Management” in our Schedule 14A Proxy Statement for our 2018 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of our fiscal year ended September 30, 2017.

Item 13. Certain Relationships and Related Transactions and Director Independence

We incorporate the information required by this item by reference to the section captioned “Corporate Governance” in our Schedule 14A Proxy Statement for our 2018 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of our fiscal year ended September 30, 2017.

Item 14. Principal Accountant Fees and Services

We incorporate the information required by this item by reference to the sections captioned “Fees for Professional Services” and “Pre-approval Policies and Procedures” in our Schedule 14A Proxy Statement for our 2018 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of our fiscal year ended September 30, 2017.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) (1) Financial statements filed as part of this report:

Consolidated Balance Sheets as of September 30, 2017 and 2016

Consolidated Statements of Operations for the years ended September 30, 2017 and 2016

Consolidated Statements of Comprehensive Income (Loss) for the years ended September 30, 2017 and 2016

Consolidated Statements of Shareholders' Equity for the years ended September 30, 2017 and 2016

Consolidated Statements of Cash Flows for the years ended September 30, 2017 and 2016

Notes to Consolidated Financial Statements

(2) Financial statement schedules

All other financial statements and schedules not listed have been omitted since the required information is included in the consolidated financial statements or the notes thereto included in Item 8, or is not applicable, material or required.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
CSP Inc. and Subsidiaries
Lowell, MA

We have audited the accompanying consolidated balance sheets of CSP Inc. and Subsidiaries (the “Company”) as of September 30, 2017 and 2016, and the related consolidated statements of operations, comprehensive income (loss), shareholders' equity and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company as of September 30, 2017 and 2016, and the results of its operations and its cash flows for the years then ended, in conformity with U.S. generally accepted accounting principles.

FOR THE YEARS ENDED SEPTEMBER 30, 2017 AND 2016

Organization and Business

CSP Inc. (“CSPI” or “the Company” or “we” or “our”) was founded in 1968 and is based in Lowell, Massachusetts. To meet the diverse requirements of commercial and defense customers worldwide, CSPI and its subsidiaries develop and market IT integration solutions and high-performance cluster computer systems. The Company operates in two segments, its HPP segment and its TS segment.

1. Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All significant inter-company accounts and transactions have been eliminated. Certain prior year amounts have been reclassified for consistency with the current period presentation. These reclassifications had no effect on the reported results of operations.

Foreign Currency Translation

The U.S. Dollar is the reporting currency for all periods presented. The financial information for entities outside the United States is measured using the local currency as the functional currency. Assets and liabilities of the Company's foreign operations are translated into U.S. dollars at the exchange rates in effect at the balance sheet date. Revenue and expenses are translated at average rates in effect during the period. The resulting translation adjustment is reflected as accumulated other comprehensive income (loss), a separate component of shareholders' equity on the consolidated balance sheets. The translation adjustment for intercompany foreign currency loans that are of a long-term-investment nature is also reflected as accumulated other comprehensive income (loss). Currency transaction gains and losses are recorded as other income (expense) in the consolidated statements of operations.

Cash Equivalents

For purposes of the consolidated statements of cash flows, highly liquid investments with original maturities of three months or less at the time of acquisition are considered cash equivalents.

Fair Value of Financial Instruments

Our financial instruments are limited to cash and cash equivalents, accounts receivable, pension plan assets, accounts payable and our inventory line of credit. Fair value of these financial instruments was not materially different from their carrying values at September 30, 2017, and 2016.

Research and Development Expense

For the years ended September 30, 2017 and 2016, our expenses for research and development were approximately \$2.4 million and \$3.0 million, respectively. Expenditures for research and development are expensed as they are incurred.

Impairment of Long-Lived Assets

The Company reviews its long-lived assets, including intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Management assesses the recoverability of the long-lived assets (other than goodwill) by comparing the estimated undiscounted cash flows associated with the related asset or group of assets against their respective carrying amounts. The amount of impairment, if any, is calculated based on the excess of the carrying amount over the fair value of those assets. Intangible assets that are not subject to amortization are also required to be tested annually, or more frequently if events or circumstances indicate that the asset may be impaired. We did not have intangible assets with indefinite lives at any time during the two years ended September 30, 2017. Intangible assets subject to amortization are amortized on a straight-line basis over their estimated useful lives, generally three to ten years, and are carried at net book value. The remaining useful lives of intangible assets are evaluated on an annual basis. Intangible assets subject to amortization are also tested for recoverability whenever events or changes in circumstances indicate

that their carrying amount may not be recoverable. If the fair value of an intangible asset subject to amortization is determined to be less than its carrying value, then an impairment charge is recorded to write down that asset to its fair value.

Inventories

Inventories are stated at the lower of cost or market, with cost determined using the first-in, first-out method. The recoverability of inventories is based upon the types and levels of inventories held, forecasted demand, pricing, competition and changes in technology. We write down our inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than those projected by management, additional inventory write-downs may be required. For the years ended September 30, 2017, and September 30, 2016, the Company wrote down approximately \$294 thousand and \$602 thousand of inventory, respectively.

Property, Equipment and Improvements

The components of property, equipment and improvements are stated at cost. The Company provides for depreciation by use of the straight-line method over the estimated useful lives of the related assets (three to seven years). Leasehold improvements are amortized by use of the straight-line method over the lesser of the estimated useful life of the asset or the lease term. Repairs and maintenance costs are expensed as incurred. Property, equipment and improvements are tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. If the fair value of property, equipment and improvements is determined to be less than their carrying value, then an impairment charge is recorded to write down that asset to its fair value.

Trade Accounts Receivable and Allowance for Doubtful Accounts

Trade accounts receivable are stated at amounts that have been billed to customers less an allowance for doubtful accounts. Allowances for doubtful accounts are recorded for the estimated losses resulting from the inability of our customers to make required payments. The estimates for the allowance for doubtful accounts are based on the length of time the receivables are past due, current business environment and our historical experience. If the financial condition of our customers were to deteriorate, resulting in impairment of their ability to make payments, additional allowances may be required. Accounts receivable are charged off against the reserve when management has determined they are uncollectible.

Pension and Retirement Plans

The funded status of pension and other postretirement benefit plans is recognized on the consolidated balance sheet. Gains and losses, prior service costs and credits and any remaining transition amounts that have not yet been recognized through pension expense will be recognized in accumulated other comprehensive income, net of tax, until they are amortized as a component of net periodic pension/postretirement benefits expense. Additionally, plan assets and obligations are measured as of our fiscal year-end balance sheet date (September 30).

We have defined benefit and defined contribution plans in the United Kingdom (the "U.K."), Germany and in the U.S. In the U.K. and Germany, the Company provides defined benefit pension plans for certain employees and former employees and defined contribution plans for the majority of the employees. The defined benefit plans in both the U.K. and Germany are closed to newly hired employees and have been for the two years ended September 30, 2017. In the U.S., the Company also provides defined contribution plans that cover most employees and supplementary

retirement plans to certain employees and former employees who are now retired. These supplementary retirement plans are also closed to newly hired employees and have been for the two years ended September 30, 2017. These supplementary plans are funded through whole life insurance policies. The Company expects to recover all insurance premiums paid under these policies in the future, through the cash surrender value of the policies and any death benefits or portions thereof to be paid upon the death of the participant. These whole life insurance policies are carried on the balance sheet at their cash surrender values as they are owned by the Company and not assets of the defined benefit plans. In the U.S., the Company also provides for officer death benefits and post-retirement health insurance benefits through supplemental post-retirement plans to certain officers. The Company also funds these supplemental plans' obligations through whole life insurance policies on the officers.

Pension expense is based on an actuarial computation of current future benefits using estimates for expected return on assets, expected compensation increases and applicable discount rates. Management has reviewed the discount rates and rates of return with our consulting actuaries and investment advisor and concluded they were reasonable. A decrease in the expected return on pension assets would increase pension expense. Expected compensation increases are estimated based on historical and expected increases in the future. Increases in estimated compensation increases would result in higher pension expense while decreases would lower pension expense. Discount rates are selected based upon rates of return on high quality fixed income investments currently available and expected to be available during the period to maturity of the pension benefit. A

decrease in the discount rate would result in greater pension expense while an increase in the discount rate would decrease pension expense.

The Company funds its pension plans in amounts sufficient to meet the requirements set forth in applicable employee benefits laws and local tax laws. Liabilities for amounts in excess of these funding levels are accrued and reported in the consolidated balance sheets.

Segment Information

We have two operating segments; (i) High Performance Products ("HPP") and (ii) Technology Solutions ("TS"). In the HPP segment, we design, manufacture and deliver products and services to customers that require specialized cyber security services, networking and signal processing. In the TS segment, we focus on value added reseller ("VAR") integrated solutions including third party hardware, software and technical computer-related consulting and managed services. The operations and assets of our HPP segment are located in the United States. The operations and assets of our TS segment are located in the United States, Germany, and the United Kingdom.

Revenue Recognition

We derive revenue from the sale of integrated hardware and software, professional services, maintenance contracts, other services, and third party service contracts. Professional services generally include implementation, installation, and training services. Other services generally include revenue generated through our royalty and extended warranty contracts. We recognize revenue when persuasive evidence of an arrangement exists, delivery of the product or service has occurred, the fee is fixed and determinable and collectability is reasonably assured. We enter into multiple element arrangements as well as standalone sales of product, professional services, and other services.

We recognize revenue from standalone product sales upon transfer of title, which is typically upon shipment, provided all other revenue recognition criteria have been met. Revenue generated from standalone professional services and extended warranty contracts is recognized as services are completed, provided all other revenue recognition criteria have been met. In some instances professional service contracts include a customer acceptance provision, in which case revenue is deferred until we have evidence of customer acceptance. We recognize revenue from usage based royalty contracts upon confirmation from the customer of shipment of the system produced pursuant to the royalty agreement.

We recognize revenue from multiple element arrangements in accordance with ASC 605-25, Multiple Element Arrangements. We evaluate multiple element arrangements to determine if separate units of accounting exist, and if so, we allocate revenue to each element based upon the relative selling price of each element. ASC 605-25 establishes a hierarchy for determining the amount to allocate to each separate deliverable in an arrangement. We determine selling price using vendor specific objective evidence ("VSOE"), if it exists; or, if VSOE does not exist, third party evidence ("TPE") of fair value if applicable; otherwise, we use the best estimate of selling price ("BESP"). The objective of BESP is to determine the price at which the Company would transact if the element was sold on a standalone basis. Management's determination of BESP involves several factors including budgeted profit margins, and cost to complete services.

We recognize revenue from third party service contracts as either gross sales or net sales in accordance with ASC 605-45, Principal Agent Considerations, which requires us to determine if the Company is acting as a principal party to the transaction or simply acting as an agent or broker. Under ASC 605-45, the assumption of the risks and rewards under the arrangement are considered indicators of principal parties to the arrangement. We record revenue as gross when it is a principal party to the arrangement and net of cost when we are acting as a broker or agent. Under gross sales recognition, the entire selling price is recorded in revenue and our cost to the third-party service provider or

vendor is recorded in cost of goods sold. Under net sales recognition, the cost to the third-party service provider or vendor is recorded as a reduction to revenue resulting in net sales equal to the gross profit on the transaction. The following policies are applicable to our major categories of segment revenue transactions:

HPP Segment Revenue

HPP segment revenue is derived from the sale of integrated hardware and software, maintenance, and other services through the Multicomputer and Myricom product lines. Multicomputer product revenue is generally recognized when product is shipped, provided that all revenue recognition criteria are met. Service revenue consists principally of other services which comprise of warranty and royalty revenue. Revenue generated from extended warranty contracts is recognized as services are completed, provided all other revenue recognition criteria have been met We recognize revenue from usage

based royalty contracts upon confirmation from the customer of shipment of the system produced pursuant to the royalty agreement. In the years ended September 30, 2017 and 2016, respectively, \$5.4 million and \$4.3 million of royalty income is included in service revenues.

Myricom revenue is derived from the sale of products, which are comprised of both hardware and embedded software which is essential to the products functionality, and post contract maintenance and support. Revenue on multiple element arrangements is recognized in accordance with ASC 605-25. We evaluate multiple element arrangements to determine if separate units of accounting exist, and if so, we allocate revenue to each element based upon the relative selling price of each element. We determine selling price using BESP. Management's determination of BESP is based on several factors, including, but not limited to, internal costs and gross margin objectives. Accordingly revenue for post contract maintenance and support is recognized over the implied maintenance period of either one or three years, and revenue for product sales is recognized upon delivery assuming all other revenue recognition criteria have been met.

TS Segment Revenue

TS Segment revenue is derived from the sale of hardware, software, professional services, and third party service contracts. TS product revenue is generally recognized when product is shipped, provided that all revenue recognition criteria are met. Service revenue consists of professional services which generally include implementation, installation, and training services. Revenue generated from standalone professional services is recognized as services are completed, provided all other revenue recognition criteria has been met. Our standard sales agreements generally do not include customer acceptance provisions. However, in certain instances when arrangements include a customer acceptance provision or there is uncertainty about customer acceptance, revenue is deferred until we have evidence of customer acceptance.

Revenue derived from the sale of products, which are comprised of both hardware and software, and professional services is recognized in accordance with ASC 605-25. We evaluate multiple element arrangements to determine if separate units of accounting exist, and if so, we allocate revenue to each element based upon the relative selling price of each element. We determine selling price using BESP. Management's determination of BESP is based on several factors, including, but not limited to, internal costs and gross margin objectives. Accordingly revenue for professional services is recognized as services are completed, and revenue for product sales is recognized upon delivery assuming all other revenue recognition criteria have been met.

We recognize revenue from certain third party service contracts, which are evaluated to determine whether such service revenue should be recorded as gross sales or net sales in accordance ASC 605-45. We evaluate all third party service contracts to determine whether we act as a principal in the transaction and assume the risks and rewards of ownership or if we are simply acting as an agent or broker. Under gross sales recognition, the entire selling price is recorded in sales and our cost to the third-party service provider or vendor is recorded in cost of goods sold. Under net sales recognition, the cost to the third-party service provider or vendor is recorded as a reduction to sales resulting in net sales equal to the gross profit on the transaction and there are no costs of goods sold. We use the net sales recognition method for the third party service contracts that we sell when we are not the primary obligor on the contract. We use the gross sales recognition for the third party service contracts that we sell when we act as principal and are the primary obligor.

Product Warranty Accrual

Our product sales generally include a hardware warranty which ranges from 90-days to three-years. At time of product shipment, we accrue for the estimated cost to repair or replace potentially defective products. Estimated warranty costs are based upon prior actual warranty costs for substantially similar products.

Engineering and Development Expenses

Engineering and development expenses include payroll, employee benefits, stock-based compensation and other headcount-related expenses associated with product development. Engineering and development expenses also include third-party development and programming costs. We consider technological feasibility for our software products to be reached upon the release of the software, accordingly, no internal software development costs have been capitalized.

Income Taxes

We use the asset and liability method of accounting for income taxes whereby deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using

enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. We also reduce deferred tax assets by a valuation allowance if, based on the weight of available evidence, it is more likely than not that some portion or all of the recorded deferred tax assets will not be realized in future periods. This methodology requires estimates and judgments in the determination of the recoverability of deferred tax assets and in the calculation of certain tax liabilities. Valuation allowances are recorded against the gross deferred tax assets that management believes, after considering all available positive and negative objective evidence, historical and prospective, with greater weight given to historical evidence, that it is more likely than not that these assets will not be realized.

In addition, we are required to recognize in the consolidated financial statements, those tax positions determined to be more-likely-than-not of being sustained upon examination, based on the technical merits of the positions as of the reporting date. If a tax position is not considered more-likely-than-not to be sustained based solely on its technical merits, no benefits of the position are recognized.

In addition, the calculation of the Company's tax liabilities involves dealing with uncertainties in the application of complex tax regulations in a multitude of jurisdictions. The Company records liabilities for estimated tax obligations in the U.S. and other tax jurisdictions. These estimated tax liabilities include the provision for taxes that may become payable in the future.

Earnings per Share of Common Stock

Basic net income per common share is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted net income per common share reflects the maximum dilution that would have resulted from the assumed exercise and share repurchase related to dilutive stock options and is computed by dividing net income by the assumed weighted average number of common shares outstanding.

We are required to present earnings per share, or EPS, utilizing the two class method because we had outstanding, non-vested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents, which are considered participating securities.

Basic and diluted earnings per share computations for the Company's reported net income attributable to common stockholders are as follows:

| | For the years ended | |
|--|--|--------------------|
| | September 30, 2017 | September 30, 2016 |
| | (Amounts in thousands except per share data) | |
| Net income | \$ 2,506 | \$ 2,604 |
| Less: Net income attributable to nonvested common stock | 108 | 109 |
| Net income attributable to common stockholders | \$ 2,398 | \$ 2,495 |
| Weighted average total shares outstanding - basic | 3,890 | 3,766 |
| Less: weighted average non-vested shares outstanding | 167 | 157 |
| Weighted average number of common shares outstanding - basic | 3,723 | 3,609 |
| Potential common shares from non-vested stock awards and the assumed exercise of stock options | 94 | 125 |
| Weighted average common shares outstanding - diluted | 3,817 | 3,734 |
| Net income per share - basic | \$ 0.64 | \$ 0.69 |
| Net income per share - diluted | \$ 0.63 | \$ 0.67 |

All anti-dilutive securities, including stock options, are excluded from the diluted income per share computation. For the year ended September 30, 2017, there were no shares subject to stock options excluded from the diluted income per share calculation because their inclusion would have been anti-dilutive. For the fiscal year ended September 30, 2016, approximately 25 thousand stock options were excluded from the diluted income per share calculation because their inclusion would have been anti-dilutive.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues

and expenses during the reporting period. Actual results may differ from those estimates under different assumptions or conditions.

Stock-Based Compensation

We measure and recognize compensation expense for all stock-based payment awards made to employees and directors including stock options and nonvested shares of restricted common stock based on estimated fair values of stock-based payment awards on the date of grant. The Company uses the Black-Scholes option-pricing model to calculate the fair value of stock option grants. The fair value of nonvested restricted share awards is equal to the quoted market price of our common stock as quoted on the Nasdaq Global Market on the date of grant. The fair value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods in the Company's consolidated statements of operations.

Because stock-based compensation expense recognized in the consolidated statements of operations for the fiscal years ended September 30, 2017 and 2016 is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures and will be revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Stock-based compensation expense recognized for the fiscal years ended September 30, 2017 and 2016 consisted of stock-based compensation expense related to options and restricted stock granted pursuant to the Company's stock incentive and employee stock purchase plans of approximately \$0.6 million and \$0.4 million, respectively.

Concentrations of Credit Risk

Cash and cash equivalents are maintained with several financial institutions in the U.S., Germany and in the U.K. Deposits held with banks may exceed the amount of insurance on such deposits. Generally, these deposits may be redeemed upon demand. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk on cash and cash equivalents.

Subsequent Events

The Company recognizes in the consolidated financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the statement of financial position, including the estimates inherent in the process of preparing financial statements. The Company has evaluated subsequent events through the date of this filing.

New Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in GAAP when it becomes effective. The new standard is effective for the Company on October 1, 2018, and it does not plan to early adopt this ASU. The standard outlines a five-step model whereby revenue is recognized as performance obligations within a contract are satisfied. The standard also requires new, expanded disclosures regarding revenue recognition. We are utilizing a bottom-up approach to analyze the standard's impact on our contract portfolio, comparing our historical accounting policies and practices, and identifying potential differences from applying the requirements of the new standard to our contracts. While this assessment continues, we have not yet completed our determination of the impacts of the standard or the effect of these impacts on our consolidated financial statements. Consequently, we have not yet selected a transition method. We expect this determination will near completion in the first half of 2018. Because the new standard will impact our business processes, systems and controls, we are developing a comprehensive change

management project plan to guide the implementation.

Effective September 30, 2017, the Company adopted FASB ASU No. 2014-15, Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern, an amendment of the FASB Accounting Standards Codification. The ASU has added additional disclosure requirements to the codification. It requires management to assess, at each interim and annual reporting period, whether substantial doubt exists about an entity's ability to continue as a going concern. Substantial doubt exists if it is probable (the "probable" threshold under GAAP has generally been interpreted to be between 75 and 80 percent) that the entity will be unable to meet its obligations as they become due within one year after the date the financial statements are issued or available to be issued (assessment date). This guidance did not have an impact to the Company's consolidated financial statements.

In July 2015, the FASB issued ASU No. 2015-11, Inventory (Topic 330) Simplifying the Measurement of Inventory, which requires entities to measure inventory at the lower of cost and net realizable value, except for inventory measured using last-in, first-out (LIFO) or the retail inventory method. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. This ASU is effective for fiscal years beginning after December 15, 2016, and interim periods within fiscal years beginning after December 15, 2017 and requires prospective application, with early adoption permitted as of the beginning of an interim or annual reporting period. The Company has not yet assessed the potential impact of implementing this ASU on our consolidated financial statements.

In November 2015, the FASB issued ASU No. 2015-17, Income Taxes (Topic 740) Balance Sheet Classification of Deferred Taxes, which require that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. The amendments in this Topic apply to all entities that present a classified statement of financial position. The current requirement that deferred tax liabilities and assets of a tax-paying component of an entity be offset and presented as a single amount is not affected by the amendments in this Topic. The amendments in this Topic are effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Beginning October 1, 2017, the Company adopted the ASU and it hasn't had a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), an amendment of the FASB Accounting Standards Codification. This ASU requires lessees to recognize a right-of-use asset and lease liability for most lease arrangements. The new standard is effective for the Company on October 1, 2019. The standard mandates a modified retrospective transition method for all entities and early adoption is permitted. The Company is evaluating the effect that ASU 2016-02 will have on its consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU No. 2016-08 (Topic 606), Principal versus Agent Considerations (Reporting Revenue Gross versus Net) to clarify the implementation guidance on principal versus agent considerations. The amendments in this update provides additional guidance on indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customer and does not change the core principle of previously issued guidance. The amendments in this Topic are effective for financial statements issued for annual periods beginning after December 15, 2017, and interim periods within those annual periods. The Company does not expect the implementation of this ASU to have a material impact on our consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-09 (Topic 718), Compensation - Stock Compensation, Improvements to Employee Share-Based Payment Accounting to simplify several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Additionally, the amendments eliminate the guidance in Topic 718 that was indefinitely deferred shortly after the issuance of FASB Statement No. 123 (revised 2004), Share-Based Payment. This should not result in a change in practice because the guidance that is being superseded was never effective. The Company has adopted this ASU effective October 1, 2017 and it hasn't had a material impact on our consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, Classification of Certain Cash Receipts and Cash Payments, an amendment of the FASB Accounting Standards Codification. This ASU will reduce diversity in practice for classifying cash payments and receipts in the statement of cash flows for a number of common transactions. It will also clarify when identifiable cash flows should be separated versus classified based on their predominant source or use. This ASU is effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. An entity that elects early adoption must adopt all of the amendments in the

same period. The Company is evaluating the effect that ASU 2016-15 will have on its consolidated financial statements and related disclosures.

In October 2016, the FASB issued ASU No. 2016-16, Intra-Entity Transfers of Assets Other Than Inventory, an amendment of the FASB Accounting Standards Codification. This ASU requires the seller and buyer to recognize at the transaction date the current and deferred income tax consequences of intercompany asset transfers (except transfers of inventory). Under current GAAP, the seller and buyer defer the consolidated tax consequences of an intercompany asset transfer from the period of the transfer to a future period when the asset is transferred out of the consolidated group, or otherwise affects consolidated earnings. This standard will cause volatility in companies' effective tax rates, particularly for those that transfer intangible assets to foreign subsidiaries. For public entities, the new standard is effective for annual and interim periods in fiscal years beginning after December 15, 2017. An entity may early adopt the standard but only at the beginning of an annual period for which it has not issued or made available for issuance financial statements (interim or

annual). The Company is evaluating the effect that ASU 2016-16 will have on its consolidated financial statements and related disclosures.

In January 2017, FASB issued ASU No. 2017-01, "Business Combinations Clarifying the Definition of a Business" (Topic 805) ("ASU No. 2017-01"). ASU 2017-01 provides a framework to use in determining when a set of assets and activities is a business. ASU 2017-01 provides more consistency in applying the business combination guidance, reduces the costs of application, and makes the definition of a business more operable. ASU 2017-01 is effective for interim and annual periods within those annual periods beginning after December 15, 2017. The Company is currently evaluating the impact ASU 2017-01 will have on the Company's results of operations, financial position and disclosures.

In March 2017, the FASB issued ASU No. 2017-07, Compensation Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost, an amendment of the FASB Accounting Standards Codification. This ASU requires employers that sponsor defined benefit pension and/or other post-retirement benefit plans to report the service cost component of net benefit cost in the same line item as other compensation costs arising from services rendered by the pertinent employees during the period. Employers are required to present the other components of net benefit costs in the income statement separately from the service cost component and outside a subtotal of income from operations. Additionally, only the service cost component of net periodic pension cost will be eligible for asset capitalization. For public entities, the new standard is effective for annual periods beginning after December 15, 2017, including interim periods within that annual period. Early adoption is permitted as of the beginning of an annual period for which financial statements (interim or annual) have not been issued or made available for issuance. This ASU should be applied retrospectively for the presentation of the service cost component and the other components of net periodic pension cost and net periodic postretirement benefit cost in the income statement and prospectively, on and after the effective date, for the capitalization of the service cost component of net periodic pension cost and net periodic postretirement benefit in assets. The Company is evaluating the effect that ASU 2017-07 will have on its consolidated financial statements and related disclosures.

2. Inventories

Inventories consist of the following:

| | September 30, | |
|-----------------|------------------------|----------|
| | 2017 | 2016 |
| | (Amounts in thousands) | |
| Raw materials | \$ 1,334 | \$ 1,658 |
| Work-in-process | 260 | 814 |
| Finished goods | 4,377 | 3,108 |
| Total | \$ 5,971 | \$ 5,580 |

Finished goods includes inventory that has been shipped, but for which all revenue recognition criteria has not been met, of approximately \$0.4 million and \$0.1 million as of September 30, 2017 and September 30, 2016, respectively.

3. Accumulated Other Comprehensive Loss

The components of accumulated other comprehensive loss are as follows:

| | Effect of Foreign Currency Translation | Minimum Pension Liability | Accumulated Other Comprehensive Loss |
|----------------------------------|---|---------------------------------|---|
| (Amounts in thousands) | | | |
| Balance as of September 30, 2015 | \$(2,825) | \$(5,560) | \$ (8,385) |
| Change in period | 18 | (3,413) | (3,395) |
| Tax effect of change in period | — | (151) | (151) |
| Balance as of September 30, 2016 | \$(2,807) | \$(9,124) | \$ (11,931) |
| Change in period | (407) | 1,944 | 1,537 |
| Tax effect of change in period | — | 231 | 231 |
| Balance as of September 30, 2017 | \$(3,214) | \$(6,949) | \$ (10,163) |

The changes in the minimum pension liability are net of amortization of net gain of \$389 thousand in 2017 and net gain of \$90 thousand in 2016 included in net periodic pension cost.

4. Income Taxes

The components of income before income tax and income tax expense are comprised of the following:

| | For the Years Ended | |
|---------------------------|-----------------------|----------|
| | September 30, 2017 | 2016 |
| (Amounts in thousands) | | |
| Income before income tax: | | |
| U.S. | \$ 3,383 | \$ 3,418 |
| Foreign | 410 | 182 |
| | \$ 3,793 | \$ 3,600 |
| Income tax expense: | | |
| Current: | | |
| Federal | \$ 1,067 | \$ 303 |
| State | 119 | 118 |
| Foreign | 132 | 159 |
| | 1,318 | 580 |
| Deferred: | | |
| Federal | (86) | 400 |
| State | 37 | 46 |
| Foreign | 18 | (30) |
| | (31) | 416 |
| | \$ 1,287 | \$ 996 |

As of September 30, 2017, management assessed the positive and negative evidence in the U.S operations, and estimated we will have sufficient future taxable income to utilize the existing deferred tax assets, except for certain state tax

credit carry-forwards. Significant objective positive evidence included the cumulative profits that we realized over the most recent years. This evidence enhances our ability to consider other subjective evidence such as our projections for future growth. Other factors we considered are the likelihood for continued royalty income in future years, and our expectation that the TS segment will continue to be profitable in future years. On the basis of this evaluation, as of September 30, 2017, we have concluded that our U.S. deferred tax asset is more likely than not to be realized. It should be noted however, that the amount of the deferred tax asset realized could be adjusted in future years, if estimates of taxable income during the carryforward periods are reduced, or if objective negative evidence in the form of cumulative losses is present.

The recording and ultimate reversal of valuation allowances for our deferred tax asset requires significant judgment associated with past and projected performance. In assessing the realizability of deferred tax assets, we consider our taxable future earnings and the expected timing of the reversal of temporary differences. We recorded a valuation allowance which reduced the gross deferred tax asset to an amount that we believed was more likely than not to be realized because of the cumulative losses incurred in the U.K. in recent years represented sufficient negative evidence to record a valuation allowance against certain deferred tax assets.

We continue to maintain a full valuation allowance against our U.K. deferred tax assets as we have experienced cumulative losses and do not have any indication that the operation will be profitable in the future to an extent that will allow us to utilize much of our net operating loss carryforwards. To the extent that actual experience deviates from our assumptions, our projections would be affected and hence our assessment of realizability of our deferred tax assets may change.

Reconciliation of federal statutory rate and income tax expense to the Company's effective tax rate and actual income tax expense is as follows:

| | For the Years Ended September 30, | | | |
|---|--------------------------------------|---------|---------|---------|
| | 2017 | | 2016 | |
| | (Dollar amounts in thousands) | | | |
| Computed "expected" tax expense | \$1,289 | 34.0 % | \$1,224 | 34.0 % |
| Increases (reductions) in taxes resulting from: | | | | |
| State income taxes, net of federal tax benefit | 80 | 2.1 % | 124 | 3.5 % |
| Foreign operations | 11 | 0.3 % | 67 | 1.9 % |
| Permanent differences | (4) | (0.1)% | (20) | (0.6)% |
| Change in valuation allowance | (37) | (1.0)% | — | — % |
| Uncertain tax liability adjustment | 8 | 0.2 % | 8 | 0.2 % |
| Research & development credit | (53) | (1.4)% | (344) | (9.6)% |
| Other items | (7) | (0.2)% | (63) | (1.7)% |
| Income tax expense | \$1,287 | 33.9 % | \$996 | 27.7 % |

For the years ended September 30, 2017 and 2016, temporary differences, which give rise to deferred tax assets (liabilities), are as follows:

| | September 30, 2017 | September 30, 2016 |
|--|---------------------------|-----------------------|
| | (Amounts in thousands) | |
| Deferred tax assets: | | |
| Pension | \$2,470 | \$ 2,896 |
| Intangibles | 219 | 315 |
| Other reserves and accruals | 633 | 671 |
| Inventory reserves and other | 563 | 470 |
| State credits, net of federal benefit | 318 | 313 |
| Federal and state net operating loss carryforwards | 52 | 61 |
| Foreign net operating loss carryforwards | 1,531 | 1,704 |
| Foreign exchange on intercompany loan | (77) | — |
| Foreign tax credits | 7 | 7 |
| Depreciation and amortization | (177) | (203) |
| Gross deferred tax assets | 5,539 | 6,234 |
| Less: valuation allowance | (2,712) | (3,180) |
| Realizable deferred tax asset | 2,827 | 3,054 |
| Gross deferred tax liabilities | — | — |
| Net deferred tax assets | \$2,827 | \$ 3,054 |

The deferred tax valuation allowance decreased by approximately \$468 thousand, as shown above. In assessing the realizability of deferred tax assets, the Company considers its taxable future earnings and the expected timing of the reversal of temporary differences. Accordingly, the Company has recorded a valuation allowance which reduces the gross deferred tax asset to an amount which management believes will more likely than not be realized. The valuation allowance was determined by assessing both positive and negative evidence whether it is more likely than not that deferred tax assets are realizable. Such assessment is done on a jurisdiction-by-jurisdiction basis. The Company's inability to project future profitability beyond fiscal year 2017 and the cumulative losses incurred in recent years in the U.K. represent sufficient negative evidence to record a valuation allowance against certain deferred tax assets.

As of September 30, 2017 and 2016, the Company had U.S. net operating loss carryforwards for state tax purposes of approximately \$0.4 million and \$0.4 million, respectively, which are available to offset future taxable income through 2033.

As of September 30, 2017, the Company had other state tax credit carryforwards of \$55 thousand available to reduce future state tax expense which has unlimited carryover status.

As of September 30, 2017, the Company concluded that a net increase of \$43 thousand of the valuation allowance for the U.S. was appropriate. As part of the Company's analysis, the Company evaluated, among other factors, its recent history of generating taxable income in state jurisdictions and its near-term forecasts of future taxable income. The net increase in the Company's valuation allowance of \$43 thousand is to reserve for state tax credit carryforwards that the Company believes will expire unused.

As of September 30, 2017, the Company had U.K. net operating loss carryforwards of approximately \$9.0 million that have an indefinite life with no expiration.

Undistributed earnings of the Company's foreign subsidiaries amounted to approximately \$2.8 million and \$2.5 million at September 30, 2017 and 2016, respectively. The Company's policy is that its undistributed foreign earnings are indefinitely reinvested and, accordingly, no U.S. federal and state deferred tax liabilities have been recorded.

In addition, the calculation of the Company's tax liabilities involves dealing with uncertainties in the application of complex tax regulations in a multitude of jurisdictions. The Company records liabilities for estimated tax obligations in the U.S. and other tax jurisdictions. These estimated tax liabilities include the provision for taxes that may become payable in the future.

As of September 30, 2017, the total amount of uncertain tax liabilities was \$209 thousand. We recognized \$7 thousand of interest and potential penalties accrued related to unrecognized tax benefits in our provision for income taxes.

A reconciliation of the beginning and ending balances of the total amounts of gross unrecognized tax benefits is as follows:

| | For the Year Ended September 30, 2017 | For the Year Ended September 30, 2016 |
|--------------------------------|---|---|
| | (Amounts in thousands) | |
| Balance, beginning of year | \$ 202 | \$ 195 |
| Accrued penalties and interest | 7 | 7 |
| Balance, end of period | \$ 209 | \$ 202 |

We file income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. The Company has reviewed the tax positions taken on returns filed domestically and in its foreign jurisdictions for all open years, generally fiscal 2014 through 2017, and believes that tax adjustments in any audited year will not be material, except for the uncertain tax position described above.

On December 20, 2017, the Tax Cuts and Jobs Act bill was passed by Congress. Once the bill is signed into law, the change in the tax law will lower our overall tax rate and reduce our deferred taxes and will be treated as a discrete item in the quarter enacted. We will still need to assess the effect of the new law when enacted on our effective tax rate.

5. Property, Equipment and Improvements, Net

Property, equipment and improvements, net consist of the following:

| | September 30, 2017 | September 30, 2016 |
|--|---------------------------|-----------------------|
| | (Amounts in thousands) | |
| Leasehold improvements | \$224 | \$ 263 |
| Equipment | 9,055 | 8,629 |
| Automobiles | 74 | 74 |
| | 9,353 | 8,966 |
| Less accumulated depreciation and amortization | (7,845) | (7,286) |
| Property, equipment and improvements, net | \$ 1,508 | \$ 1,680 |

The Company uses the straight-line method over the estimated useful lives of the assets to record depreciation expense. Depreciation expense was \$553 thousand and \$570 thousand for the years ended September 30, 2017 and 2016, respectively.

6. Acquired Intangible Assets

Edgar Filing: CSP INC /MA/ - Form 10-K

As of September 30, 2017 and 2016, intangible assets are as follows:

| | September 30, 2017 | | | September 30, 2016 | | | | |
|------------------------|--|---------|--------------------------|--------------------|--|---------|--------------------------|-------|
| | Weighted Average Remaining Amortization Period (Amounts in thousands) | Gross | Accumulated Amortization | Net | Weighted Average Remaining Amortization Period | Gross | Accumulated Amortization | Net |
| Customer list | 2 years | \$910 | \$ 773 | \$137 | 3 years | \$910 | \$ 682 | \$228 |
| Non-compete agreements | 0 years | 93 | 93 | — | 0 years | 93 | 93 | — |
| Developed technology | 0 years | 30 | \$ 30 | \$— | 0 years | 30 | 29 | 1 |
| Trade name | 1 year | 140 | \$ 110 | \$30 | 2 years | 140 | 82 | 58 |
| Total | | \$1,173 | \$ 1,006 | \$167 | | \$1,173 | \$ 886 | \$287 |

Amortization expense on these intangible assets was \$120 thousand and \$129 thousand for fiscal 2017 and 2016, respectively.

Annual amortization expense related to intangible assets for each of the following successive fiscal years is as follows:

Fiscal year ending September 30: (Amounts in thousands)

| | |
|------------|--------|
| 2018 | 119 |
| 2019 | 11 |
| 2020 | 9 |
| 2021 | 9 |
| 2022 | 9 |
| Thereafter | 10 |
| Total | \$ 167 |

7. Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses consist of the following:

| | September 30, | |
|---|------------------------|-----------|
| | 2017 | 2016 |
| | (Amounts in thousands) | |
| Accounts payable | \$ 10,941 | \$ 4,360 |
| Inventory line of credit | 3,110 | 3,151 |
| Commissions | 269 | 269 |
| Compensation and fringe benefits | 2,147 | 2,139 |
| Professional fees and shareholders' reporting costs | 789 | 594 |
| Taxes, other than income | 866 | 353 |
| Warranty | 121 | 131 |
| Other | 602 | 935 |
| | \$ 18,845 | \$ 11,932 |

8. Product Warranties

Product warranty activity for the years ended September 30 was as follows:

| | 2017 | 2016 |
|---|------------|------------|
| Balance at the beginning of the period | \$ 130,841 | \$ 125,423 |
| Accruals for warranties for products sold in the period | 75,816 | 52,066 |
| Fulfillment of warranty obligations | (85,207) | (46,648) |
| Balance at the end of the period | \$ 121,450 | \$ 130,841 |

9. Stock Based Incentive Compensation

In 1997, the Company adopted the 1997 Stock Option Plan (the “1997 Plan”), and authorized 199,650 shares of common stock to be reserved for issuance pursuant to the 1997 Plan. The 1997 plan expired in 2007. Because the 1997 Plan has expired, no further awards will be issued under this plan. In 2003, the Company adopted the 2003 Stock Incentive Plan (the “2003 Plan”) and authorized 200,000 shares of common stock to be reserved for issuance pursuant to the 2003 Plan. The 2003 plan expired in 2013. Because the 2003 Plan has expired, no further awards will be issued under this plan. In 2007, the Company adopted the 2007 Stock Incentive Plan (the “2007 Plan”) and authorized 250,000 shares of common stock to be reserved for issuance pursuant to the 2007 Plan. The 2007 plan expired in 2017. Because the 2007 Plan has expired, no further awards will be issued under this plan. In 2015, the Company adopted the 2015 Stock Incentive Plan (the “2015 Plan”) and authorized

300,000 shares of common stock to be reserved for issuance pursuant to the 2015 Plan. As of September 30, 2017, there were 183,965 shares available to be granted under the 2015 Plan. Under all of the stock incentive plans, both incentive stock options and non-qualified stock options may be granted to officers, key employees and other persons providing services to the Company. The 2003 Plan and 2007 Plan also provide for awards of nonvested shares of common stock. All of the Company's stock incentive plans have a ten year life. The total number of available shares under all plans for future awards was 183,965 as of September 30, 2017.

Awards issued under any of the stock option plans are not affected by termination of the plan. The Company issues stock options at their fair market value on the date of grant. Vesting of stock options granted pursuant to the Company's stock incentive plans is determined by the Company's compensation committee. Generally, options granted to employees vest over four years and expire ten years from the date of grant. Options granted to non-employee directors have historically included cliff vesting after six months from the date of grant and expire three years from the date of grant. In fiscal years 2015 through 2017, the Company granted certain officers including its Chief Executive Officer and non-employee directors, and key employees shares of nonvested common stock instead of stock options. The vesting periods for the officers', the Chief Executive Officer's and the directors' nonvested stock awards are four years, three years and one year, respectively. The vesting period for the key employees' awards is four years.

We measure and recognize compensation expense for all stock-based payment awards made to employees and directors including employee stock options and awards of nonvested stock based on estimated fair values, as described in Note 1. Stock-based compensation expense incurred and recognized for the years ended September 30, 2017 and 2016 related to stock options and nonvested stock granted to employees and non-employee directors under the Company's stock incentive and employee stock purchase plans totaled approximately \$577 thousand and \$414 thousand, respectively. The classification of the cost of stock-based compensation, in the consolidated statements of operations, is consistent with the nature of the services being rendered in exchange for the share based payment. The following table summarizes stock-based compensation expense in the Company's consolidated statements of operations:

| | Years ended | |
|-------------------------------------|------------------------|--------------------|
| | September 30, 2017 | September 30, 2016 |
| | (Amounts in thousands) | |
| Cost of sales | \$6 | \$ 2 |
| Engineering and development | 24 | 6 |
| Selling, general and administrative | 547 | 406 |
| Total | \$577 | \$ 414 |

For the year ended September 30, 2017, the Company granted 34,000 nonvested shares to certain key employees, 40,000 nonvested shares to certain officers including 30,000 shares granted to the Chief Executive Officer, and 20,000 nonvested shares to its non-employee directors. For the year ended September 30, 2016, the Company granted 28,000 nonvested shares to certain key employees, 57,000 nonvested shares to certain officers including 40,000 to its Chief Executive Officer and 20,395 nonvested shares to its non-employee directors.

The Company measures the fair value of nonvested stock awards based upon the market price of its common stock as of the date of grant. The Company used the Black-Scholes option-pricing model to value stock options. The Black-Scholes model requires the use of a number of assumptions including volatility of the Company's stock price, the weighted average risk-free interest rate and the weighted average expected life of the options, at the time of grant.

The expected dividend yield is equal to the dividend per share declared, divided by the closing share price on the date the options were granted. All equity compensation awards granted for the years ended September 30, 2017 and September 30, 2016 were nonvested stock awards.

As stock-based compensation expense recognized in the consolidated statements of operations is based on awards ultimately expected to vest, expense for grants beginning upon adoption on October 1, 2005 has been reduced for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. The forfeiture rates for the years ended September 30, 2017 and 2016 were based on actual forfeitures.

No cash was used to settle equity instruments granted under share-based payment arrangements in any of the years in the two-year period ended September 30, 2017.

The following tables provide summary data of stock option award activity:

| | Number of Shares | Weighted average exercise price | Weighted Average Remaining Contractual Term | Aggregate Intrinsic Value (in thousands) |
|---|------------------------|--|---|--|
| Outstanding at September 30, 2015 | 55,126 | \$ 6.43 | — | — |
| Granted | — | — | — | — |
| Expired | (17,500) | \$ 6.61 | — | — |
| Forfeited | — | — | — | — |
| Exercised | (14,000) | 6.20 | — | — |
| Outstanding at September 30, 2016 | 23,626 | \$ 5.76 | — | — |
| Granted | — | — | — | — |
| Expired | (9,250) | \$ 9.30 | — | — |
| Forfeited | — | — | — | — |
| Exercised | (5,000) | 2.99 | — | — |
| Outstanding at September 30, 2017 | 9,376 | \$ 4.49 | 1.35 Years | \$ 62 |
| Exercisable at September 30, 2017 | 9,376 | \$ 4.49 | 1.35 Years | \$ 62 |
| Vested and expected to vest at September 30, 2017 | 9,376 | \$ 4.49 | 1.35 Years | \$ 62 |

There were no stock options granted in the years ended September 30, 2017 and 2016. The aggregate intrinsic value of stock options exercised during the years ended September 30, 2017 and 2016 was \$38 thousand and \$51 thousand, respectively.

The following table provides summary data of nonvested stock award activity:

| | Number of nonvested shares | Weighted Average Fair Value | Weighted Average Remaining Contractual Term | Aggregate Intrinsic Value (in thousands) |
|--|----------------------------------|--------------------------------------|---|--|
| Nonvested shares outstanding at September 30, 2015 | 130,457 | \$ 6.08 | 2.12 Years | \$ 714 |
| Activity in 2016: | | | | |
| Granted | 105,395 | \$ 6.47 | — | — |
| Vested | (48,444) | \$ 6.33 | — | — |
| Forfeited | (21,700) | 7.38 | — | — |
| Nonvested shares outstanding at September 30, 2016 | 165,708 | \$ 6.38 | 2.20 Years | \$ 1,695 |
| Activity in 2017: | | | | |
| Granted | 94,000 | \$ 10.18 | — | — |
| Vested | (71,587) | \$ 6.59 | — | — |
| Forfeited | (8,300) | 7.11 | — | — |
| Nonvested shares outstanding at September 30, 2017 | 179,821 | \$ 8.64 | 2.23 Years | \$ 1,987 |
| Vested at September 30, 2017 | 250,864 | \$ 5.96 | 0.31 Years | \$ 2,772 |
| Vested and expected to vest at September 30, 2017 | 430,685 | \$ 7.08 | 1.11 Years | \$ 4,759 |

As of September 30, 2017, there was \$1.09 million of total unrecognized compensation cost related to nonvested stock-based compensation arrangements (including stock option and nonvested stock awards) granted under the Company's stock incentive plans. This cost is expected to be expensed over a weighted average period of approximately 2.68 years. The total fair value of shares vested during the years ended September 30, 2017 and 2016 was \$472 thousand and \$307 thousand, respectively.

10. Employee Stock Purchase Plan

In December 2013, the Board of Directors of the Company adopted the 2014 Employee Stock Purchase Plan covering up to 250,000 shares of Common Stock (the "ESPP"), which was ratified by a vote of the Company's shareholders in February 2014. Under the ESPP, the Company's employees may purchase shares of common stock at a price per share that is currently 95% of the lesser of the fair market value as of the beginning or end of semi-annual option periods. Pursuant to the ESPP, the Company issued 22,996 and 33,248 shares for the two years ended September 30, 2017 and September 30, 2016, respectively. Since inception of the plan, there are 149,086 shares available for future issuance under the ESPP as of September 30, 2017.

11. Pension and Retirement Plans

We have defined benefit and defined contribution plans in the U.K., Germany and in the U.S. In the U.K. and Germany, the Company provides defined benefit pension plans for certain employees and former employees and defined contribution plans for the majority of the employees. The defined benefit plans in both the U.K. and Germany are closed to newly hired employees and have been for the two years ended September 30, 2017. In the U.S., the Company also provides defined contribution plans that cover most employees and supplementary retirement plans to certain employees and former employees who are now retired. These supplementary retirement plans are also closed to newly hired employees and have been for the two years ended September 30, 2017. These supplementary plans are funded through whole life insurance policies. The Company expects to recover all insurance premiums paid under these policies in the future, through the cash surrender value of the policies and any death benefits or portions thereof to be paid upon the death of the participant. These whole life insurance policies are carried on the balance sheet at their cash surrender values as they are owned by the Company and not assets of the defined benefit plans. In the U.S., the Company also provides for officer death benefits and post-retirement health insurance benefits through supplemental post-retirement plans to certain officers. The Company also funds these supplemental plans' obligations through whole life insurance policies on the officers.

Defined Benefit Plans

The Company funds its pension plans in amounts sufficient to meet the requirements set forth in applicable employee benefits laws and local tax laws. Liabilities for amounts in excess of these funding levels are accrued and reported in the consolidated balance sheet.

The German Plan does not have any assets and therefore all costs and benefits of the plan are funded annually with cash flow from operations.

The domestic supplemental retirement plans have life insurance policies which are not considered plan assets but were purchased by the Company as a vehicle to fund the costs of the plan. These insurance policies are included in the balance sheet at their cash surrender value, net of policy loans, aggregating \$2.1 million and \$1.9 million as of September 30, 2017 and 2016, respectively. The loans against the policies have been taken out by the Company to pay the premiums. The costs and benefit payments for these plans are paid through operating cash flows of the Company to the extent that they cannot be funded through the use of the cash values in the insurance policies. The Company expects that the recorded value of the insurance policies will be sufficient to fund all of the Company's obligations under these plans.

Assumptions:

Edgar Filing: CSP INC /MA/ - Form 10-K

The following table provides the weighted average actuarial assumptions used to determine the actuarial present value of projected benefit obligations at:

| | Domestic | | International | |
|---------------------------------|---------------|--------|---------------|--------|
| | September 30, | | September 30, | |
| | 2017 | 2016 | 2017 | 2016 |
| Discount rate: | 3.75 % | 3.50 % | 2.34 % | 1.77 % |
| Expected return on plan assets: | | | 3.70 % | 3.60 % |
| Rate of compensation increase: | | | 1.00 % | 1.00 % |

The following table provides the weighted average actuarial assumptions used to determine net periodic benefit cost for years ended:

| | Domestic | | International | |
|---------------------------------|---------------|--------|---------------|--------|
| | September 30, | | September 30, | |
| | 2017 | 2016 | 2017 | 2016 |
| Discount rate: | 3.50 % | 4.25 % | 1.77 % | 3.10 % |
| Expected return on plan assets: | | | 3.60 % | 4.20 % |
| Rate of compensation increase: | | | 1.00 % | 1.00 % |

For domestic plans, the discount rate was determined by comparison against the Citigroup Pension Discount Curve and Liability Index for AA rated corporate instruments. The Company monitors other indices to assure that the pension obligations are fairly reported on a consistent basis. The international discount rates were determined by comparison against country specific AA corporate indices, adjusted for duration of the obligation.

The periodic benefit cost and the actuarial present value of projected benefit obligations are based on actuarial assumptions that are reviewed on an annual basis. The Company revises these assumptions based on an annual evaluation of long-term trends, as well as market conditions that may have an impact on the cost of providing retirement benefits.

The components of net periodic benefit costs related to the U.S. and international plans are as follows:

| | Years Ended September 30 | | | | | |
|--|--------------------------|---------|-----------|---------|---------|---------|
| | 2017 | | | 2016 | | |
| | Foreign | U.S. | Total | Foreign | U.S. | Total |
| | (amounts in thousands) | | | | | |
| Pension: | | | | | | |
| Service cost | \$41 | \$— | \$41 | \$35 | \$— | \$35 |
| Interest cost | 386 | 29 | 415 | 571 | 43 | 614 |
| Expected return on plan assets | (268) | — | (268) | (357) | — | (357) |
| Amortization of net (gain)/loss | 370 | 4 | 374 | 174 | (5) | 169 |
| Net periodic benefit cost | \$529 | \$33 | \$562 | \$423 | \$38 | \$461 |
| Post Retirement: | | | | | | |
| Service cost | \$— | \$38 | \$38 | \$— | \$27 | \$27 |
| Interest cost | — | 44 | 44 | — | 42 | 42 |
| Amortization of net (gain)/loss | — | 15 | 15 | — | (79) | (79) |
| Net periodic benefit cost | \$— | \$97 | \$97 | \$— | \$(10) | \$(10) |
| Pension: | | | | | | |
| Increase (decrease) in minimum liability included in other comprehensive income (loss) | \$(1,831) | \$(14) | \$(1,845) | \$3,105 | \$25 | \$3,130 |
| Post Retirement: | | | | | | |
| Increase (decrease) in minimum liability included in other comprehensive income (loss) | — | (99) | (99) | — | 283 | 283 |
| Total: | | | | | | |
| Increase (decrease) in minimum liability included in other comprehensive income (loss) | \$(1,831) | \$(113) | \$(1,944) | \$3,105 | \$308 | \$3,413 |

The following table presents an analysis of the changes in 2017 and 2016 of the benefit obligation, the plan assets and the funded status of the plans:

| | Years Ended September 30 | | | 2016 | | |
|---|--------------------------|-----------|------------|------------|-----------|------------|
| | 2017 | U.S. | Total | Foreign | U.S. | Total |
| | (Amounts in thousands) | | | | | |
| Pension: | | | | | | |
| Change in projected benefit obligation (“PBO”) | | | | | | |
| Balance beginning of year | \$19,564 | \$829 | \$20,393 | \$17,979 | \$1,022 | \$19,001 |
| Service cost | 42 | — | 42 | 35 | — | 35 |
| Interest cost | 386 | 29 | 415 | 571 | 43 | 614 |
| Changes in actuarial assumptions | (1,582) | (9) | (1,591) | 3,948 | 20 | 3,968 |

| Total accumulated benefit obligation | \$(18,514) | \$(1,932) | \$(20,446) | \$(19,396) | \$(2,086) | \$(21,482) |

Plans with projected benefit obligations in excess of plan assets are attributable to unfunded domestic supplemental retirement plans, our German plans which are legally not required to be funded and our U.K. retirement plan.

Accrued benefit liability reported as:

| | September 30, | |
|---------------------------------------|------------------------|-----------|
| | 2017 | 2016 |
| | (Amounts in thousands) | |
| Current accrued benefit liability | \$ 534 | \$ 581 |
| Non-current accrued benefit liability | 11,818 | 13,441 |
| Total accrued benefit liability | \$ 12,352 | \$ 14,022 |

As of September 30, 2017 and 2016, the amounts included in accumulated other comprehensive income, consisted of deferred net losses totaling approximately \$6.9 million and \$9.1 million, respectively.

The amount of net deferred gain expected to be recognized as a component of net periodic benefit cost for the year ending September 30, 2018, is approximately \$186 thousand.

Contributions

The Company expects to contribute \$0.5 million to its pension plans for fiscal 2018.

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid (amounts in thousands):

| Fiscal year ending September 30: | (Amounts in thousands) |
|----------------------------------|------------------------|
| 2018 | \$ 606 |
| 2019 | 651 |
| 2020 | 667 |
| 2021 | 691 |
| 2022 | 724 |
| Thereafter | 4,225 |

Plan Assets

At September 30, 2017, our pension plan in the U.K. was the only plan with assets, holding investments of approximately \$8.2 million. Pension plan assets are managed by a fiduciary committee. The Company's investment strategy for pension plan assets is to maximize the long-term rate of return on plan assets within an acceptable level of risk while maintaining adequate funding levels. Local regulations, local funding rules, and local financial and tax considerations are part of the funding and investment process. In deciding on the investments to be held, the trustees take into account the risk of possible fluctuations in income from, and market values of, the assets as well as the risk of departing from an asset profile which broadly matches the liability profile. The committee has invested the plan assets in a single pooled fund with an authorized investment company (the "Fund"). The Fund selected by the trustees is consistent with the plan's overall investment principles and strategy described herein. There are no specific targets as to asset allocation other than those contained within the Fund that is managed by the authorized investment company.

The fair value of the assets held by the U.K. pension plan by asset category are as follows:

| Asset Category | Fair Values as of September 30, 2017 | | | | September 30, 2016 | | | | |
|-------------------|---|------------|------------|------------|--------------------|------------|------------|------------|---|
| | Total | Level 1 | Level 2 | Level 3 | Total | Level 1 | Level 2 | Level 3 | |
| | (Thousands) | | | | | | | | |
| Cash on deposit | \$62 | \$62 | \$ | —\$ | —\$86 | \$86 | \$ | —\$ | — |
| Pooled funds | 8,177 | 8,177 | — | — | 7,543 | 7,543 | — | — | |
| Total plan assets | \$8,239 | \$8,239 | \$ | —\$ | —\$7,629 | \$7,629 | \$ | —\$ | — |

The expected long-term rates of return on plan assets are equal to the yields to maturity of appropriate indices for government and corporate bonds and by adding a premium to the government bond return for equities. The expected rate of return on cash is the Bank of England base rate in force at the effective date.

Level 1 investments represent mutual funds for which a quoted market price is available on an active market. These investments primarily hold stocks or bonds, or a combination of stocks and bonds.

Defined Contribution Plans

The Company has defined contribution plans in domestic and international locations under which the Company matches a portion of the employee's contributions and may make discretionary contributions to the plans. The Company's contributions were \$152 thousand and \$129 thousand for the years ended September 30, 2017 and 2016, respectively.

12. Lines of Credit

As of September 30, 2017 and September 30, 2016, the Company maintained a line of credit note that allows for borrowings of up to \$1.0 million. Availability under this facility is reduced by outstanding borrowings thereunder. The interest rates on outstanding borrowings is the London Inter-Bank Offer Rate (“LIBOR”) plus 2.5%, with a floor of 4%. Borrowings under the credit agreement are required to be repaid on demand by the lender in some cases, upon termination of the agreements or may be prepaid by the Company without penalty. The credit agreement is not subject to financial covenants and the Company did not borrow under the line of credit during the fiscal years ending September 30, 2017 and 2016.

As of September 30, 2017 and September 30, 2016, the Company maintained an inventory line of credit that may be used by the TS division in the U.S. to purchase inventory from approved vendors with payment terms which exceed those offered by the vendors. No interest accrues under the inventory line of credit when advances are paid within terms, late payments are subject to an interest charge of Prime plus 5%. The credit agreements contain financial covenants which require the Company to maintain the following division specific financial ratios: (1) a minimum current ratio of 1.2, (2) tangible net worth of \$2.5 million and (3) a maximum ratio of total liabilities to total net worth of less than 5.0:1. As of September 30, 2017 and September 30, 2016, Company borrowings under the inventory line of credit were \$3.1 million and \$3.2 million, respectively, which is included as a component of accounts payable and accrued expenses on the accompanying consolidated balance sheets.

13. Commitments and Contingencies

Leases

The Company occupies office space under lease agreements expiring at various dates during the next ten years. The leases are classified as operating leases and provide for the payment of real estate taxes, insurance, utilities and maintenance.

The Company was obligated under non-cancelable operating leases as follows:

| Fiscal year ending September 30: | (Amounts in thousands) |
|----------------------------------|------------------------|
| 2018 | \$ 852 |
| 2019 | 735 |
| 2020 | 609 |
| 2021 | 295 |
| 2022 | 201 |
| | \$ 2,692 |

Occupancy expenses under the operating leases approximated \$1.0 million in 2017 and \$1.2 million in 2016.

Common Stock Repurchase

From time to time the Company's Board of Directors passes resolutions to authorize the Company to purchase shares of its outstanding common stock. The Company did not repurchase any shares during the years ended September 30, 2017 and 2016. As of September 30, 2017, the Company is authorized to repurchase an additional 201 thousand shares pursuant to such resolutions.

14. Segment Information

The following table presents certain operating segment information.

| For the Years Ended September 30, | TS Segment | | | U.S. | Total | Consolidated Total |
|-----------------------------------|-------------|---------|----------------|----------|----------|--------------------|
| | HPP Segment | Germany | United Kingdom | | | |
| (Amounts in thousands) | | | | | | |
| 2017 | | | | | | |
| Sales: | | | | | | |
| Product | \$7,608 | \$8,322 | \$10,727 | \$58,018 | \$77,067 | \$ 84,675 |
| Service | 6,236 | 14,668 | 763 | 5,140 | 20,571 | 26,807 |
| Total sales | 13,844 | 22,990 | 11,490 | 63,158 | 97,638 | 111,482 |
| Profit (loss) from operations | 1,467 | 377 | (30) | 1,958 | 2,305 | 3,772 |
| Assets | 17,782 | 17,055 | 6,878 | 17,213 | 41,146 | 58,928 |
| Capital expenditures | 99 | 151 | — | 108 | 259 | 358 |
| Depreciation and amortization | 224 | 188 | 9 | 252 | 449 | 673 |
| 2016 | | | | | | |
| Sales: | | | | | | |
| Product | \$11,190 | \$4,863 | \$7,066 | \$54,716 | \$66,645 | \$ 77,835 |
| Service | 5,152 | 15,130 | 925 | 4,325 | 20,380 | 25,532 |
| Total sales | 16,342 | 19,993 | 7,991 | 59,041 | 87,025 | 103,367 |
| Profit (loss) from operations | 1,464 | 676 | (363) | 2,024 | 2,337 | 3,801 |
| Assets | 17,717 | 13,751 | 3,748 | 13,491 | 30,990 | 48,707 |
| Capital expenditures | 227 | 322 | 97 | 89 | 508 | 735 |
| Depreciation and amortization | 232 | 158 | 79 | 230 | 467 | 699 |

Profit (loss) from operations is sales less cost of sales, engineering and development, selling, general and administrative expenses but is not affected by either non-operating charges/income or by income taxes. Non-operating charges/income consists principally of investment income and interest expense. All intercompany transactions have been eliminated.

The following table details the Company's sales by operating segment for fiscal years September 30, 2017 and 2016. The Company's sales by geographic area based on the location of where the products were shipped or services rendered are as follows:

| 2017 | Americas | Europe | Asia | Total | % of Total |
|------------------------|----------|----------|---------|-----------|------------|
| (Amounts in thousands) | | | | | |
| HPP | \$10,340 | \$1,437 | \$2,067 | \$13,844 | 12 % |
| TS | 59,642 | 36,060 | 1,936 | 97,638 | 88 % |
| Total | \$69,982 | \$37,497 | \$4,003 | \$111,482 | 100 % |
| % of Total | 63 | % 34 | % 3 | % 100 | % |
| 2016 | | | | | |
| HPP | \$11,417 | \$1,584 | \$3,341 | \$16,342 | 16 % |
| TS | 59,698 | 26,376 | 951 | 87,025 | 84 % |
| Total | \$71,115 | \$27,960 | \$4,292 | \$103,367 | 100 % |
| % of Total | 69 | % 27 | % 4 | % 100 | % |

Substantially all Americas amounts are United States.

Long-lived assets by geographic location at September 30, 2017 and 2016 were as follows:

| | September 30, 2017 | September 30, 2016 |
|---------------|---------------------------|-----------------------|
| | (Amounts in thousands) | |
| North America | \$ 1,078 | \$ 1,348 |
| Europe | 597 | 619 |
| Totals | \$ 1,675 | \$ 1,967 |

Deferred tax assets by geographic location at September 30, 2017 and 2016 were as follows:

| | September 30, 2017 | September 30, 2016 |
|---------------|---------------------------|-----------------------|
| | (Amounts in thousands) | |
| North America | \$ 1,962 | \$ 1,990 |
| Europe | 865 | 1,064 |
| Totals | \$ 2,827 | \$ 3,054 |

The following table lists customers from which the Company derived revenues in excess of 10% of total revenues for the years ended September 30, 2017 and 2016.

| | For the years ended | | Amount | % of Revenues | Amount | % of Revenues |
|------------|-----------------------|-----------------------|--------|------------------|--------|------------------|
| | September 30, 2017 | September 30, 2016 | | | | |
| | (Amounts in millions) | | | | | |
| Customer A | \$ 22.1 | 20 | % | \$ 19.6 | 19 | % |
| Customer B | \$ 11.1 | 10 | % | \$ 13.2 | 13 | % |

In addition, accounts receivable from Customer A totaled approximately \$2.4 million, or 9%, and approximately \$3.0 million, or 15%, of total consolidated accounts receivable as of September 30, 2017 and September 30, 2016, respectively. Accounts receivable from Customer B totaled approximately \$3.9 million, or 14%, and approximately \$2.5 million, or 13%, of total consolidated accounts receivable as of September 30, 2017 and September 30, 2016, respectively.

Two additional customers, C and D, accounted for accounts receivable of 10% or more but did not account for sales of 10% or more. Accounts receivable from Customer C totaled approximately \$4.5 million, or 16%, and approximately \$1.5 million, or 8%, of total consolidated accounts receivable as of September 30, 2017 and September 30, 2016, respectively. Accounts receivable from Customer D totaled approximately \$4.2 million, or 15%, and approximately \$0.7 million, or 3%, of total consolidated accounts receivable as of September 30, 2017 and September 30, 2016, respectively. We believe that the Company is not exposed to any significant credit risk with respect to the accounts receivable with these customers as of September 30, 2017. No other customers accounted for 10% or more of total consolidated accounts receivable as of September 30, 2017 or September 30, 2016.

15. Fair Value Measures

The Company had no assets or liabilities measured at fair value on a recurring or non-recurring basis as of September 30, 2017 or September 30, 2016, except for pension plan assets values, which are discussed in Note 11.

16. Dividend

For the years ended September 30, 2017 and 2016, the Company declared and paid cash dividends as follows:

| Fiscal Year | Date Declared | Record Date | Date Paid | Amount Paid Per Share |
|-------------|---------------|-------------|-----------|-----------------------|
| 2016 | 12/23/2015 | 12/31/2015 | 1/11/2016 | \$0.11 |
| 2016 | 2/16/2016 | 2/26/2016 | 3/11/2016 | \$0.11 |
| 2016 | 5/11/2016 | 5/27/2016 | 6/10/2016 | \$0.11 |
| 2016 | 8/18/2016 | 8/31/2016 | 9/9/2016 | \$0.11 |
| 2017 | 1/12/2017 | 1/27/2017 | 2/8/2017 | \$0.11 |
| 2017 | 2/23/2017 | 3/3/2017 | 3/17/2017 | \$0.11 |
| 2017 | 5/24/2017 | 6/1/2017 | 6/15/2017 | \$0.11 |
| 2017 | 8/14/2017 | 8/21/2017 | 9/5/2017 | \$0.11 |

17. Related Party Transactions

During the normal course of business, the Company sold products to a company whose Board of Directors included two members of CSP Inc.'s Board of Directors. The total sales were \$283 thousand for the fiscal year ended 2016. The trade receivable was \$64 thousand as of September 30, 2016. CSP Inc's two board members were no longer board members of the same company at the end of fiscal year 2017.

18. Subsequent Events

On December 20, 2017, the Tax Cuts and Jobs Act bill was passed by Congress. Once the bill is signed into law, the change in the tax law will lower our overall tax rate and reduce our deferred taxes and will be treated as a discrete item in the quarter enacted. We will still need to assess the effect of the new law when enacted on our effective tax rate.
