QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended January 31, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 0-12456

AMERICAN SOFTWARE, INC.

(Exact name of registrant as specified in its charter)

Georgia
(State or other jurisdiction of

incorporation or organization)
470 East Paces Ferry Road, N.E., Atlanta, Georgia
(Address of principal executive offices)

(404) 261-4381

(Registrant's telephone number, including area code)

None

(Former name, former address and former fiscal year, if changed since last report)

58-1098795
(IRS Employer

Identification Number)

30305
(Zip Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
 Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
 Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Classes	Outstanding at February 29, 2016
Class A Common Stock, \$.10 par value	26,261,629 Shares
Class B Common Stock, \$.10 par value	2,587,086 Shares

AMERICAN SOFTWARE, INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements Unaudited

January 31, 2016

A. Basis of Presentation and Principles of Consolidation

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required for complete financial statements. In the opinion of our management, these condensed consolidated financial statements contain all normal recurring adjustments considered necessary for a fair presentation of the financial position at January 31, 2016, the results of operations for the three and nine months ended January 31, 2016 and 2015 and cash flows for the nine months ended January 31, 2016 and 2015. The results for the three and nine months ended January 31, 2016 are not necessarily indicative of the results expected for the full year. You should read these statements in conjunction with our audited consolidated financial statements and management's discussion and analysis and results of operations included in our Annual Report on Form 10-K for the fiscal year ended April 30, 2015.

The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities, at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Note 1 in the Notes to the Consolidated Financial Statements for the fiscal year ended April 30, 2015 describes the significant accounting policies that we have used in preparing our financial statements. On an ongoing basis, we evaluate our estimates, including but not limited to those related to revenue/vendor specific objective evidence (VSOE), bad debts, capitalized software costs, goodwill, intangible assets, stock-based compensation, income taxes and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results could differ materially from these estimates under different assumptions or conditions.

Principles of Consolidation

The consolidated financial statements include the accounts of American Software, Inc. (American Software or the Company), and its wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

B. Revenue Recognition

We recognize revenue in accordance with the Software Revenue Recognition Topic of the Financial Accounting Standards Board's (FASB) Accounting Standards Codification.

License. We recognize license revenue in connection with license agreements for standard proprietary software upon delivery of the software, provided we consider collection to be probable, the fee is fixed or determinable, there is evidence of an arrangement, and VSOE exists with respect to any undelivered elements of the arrangement. For multiple-element arrangements, we recognize revenue under the residual method, whereby (1) the total fair value of the undelivered elements, as indicated by VSOE, is deferred and subsequently recognized and (2) the difference between the total arrangement fee and the amount deferred for the undelivered elements is recognized as revenue related to the delivered elements. We record revenues from sales of third-party products in accordance with Principal Agent Considerations within the Revenue Recognition Topic of the FASB's Accounting Standards Codification. Furthermore, we evaluate sales through our indirect channel on a case-by-case basis to determine whether the transaction should be recorded gross or net, including but not limited to assessing whether or not we: (1) act as principal in the transaction, (2) take title to the products, (3) have risks and rewards of ownership, such as the risk of loss for collection, delivery, or returns, and (4) act as an agent or broker with compensation on a commission or fee basis. Accordingly, in most cases we record our sales through the Demand Management, Inc. (DMI) channel on a gross basis.

Maintenance. Revenue derived from maintenance contracts primarily includes telephone consulting, product updates, and releases of new versions of products previously purchased by the customer, as well as error reporting and correction services. Maintenance contracts are typically sold for a separate fee with initial contractual periods ranging from one to three years with renewal for additional periods thereafter. Maintenance fees are generally billed annually in advance. We recognize maintenance revenue ratably over the term of the maintenance agreement. In situations where we bundle all or a portion of the maintenance fee with the license fee, VSOE for maintenance is determined based on prices when sold separately.

Table of Contents

Services. Revenue derived from services primarily includes consulting, implementation, and training. We primarily bill fees under time and materials arrangements and recognize them as we perform the services. In accordance with the other presentation matters within the Revenue Recognition Topic of the FASB's Accounting Standards Codification, we recognize amounts received for reimbursement of travel and other out-of-pocket expenses incurred as revenue in the condensed consolidated statements of operations under services and other. These amounts totaled approximately \$555,000 and \$1.8 million for the three and nine months ended January 31, 2016, respectively, and \$628,000 and \$2.0 million for the three and nine months ended January 31, 2015, respectively.

Subscription and other recurring revenues include fees for access rights to software solutions that are offered under a subscription-based delivery model where the users have the right to take possession of the software. Under this model, the software applications are hosted by the Company or by a third party and the customer accesses and uses the software on an as-needed basis over the Internet or via a dedicated line. The underlying arrangements typically include a single fee for the service that is billed monthly, quarterly or annually, and provides the customer with an option to take delivery of the software at any time during or after the subscription term. In addition, subscription and other recurring revenues include subscription-based software license revenues where the customer has taken physical possession of the software for a defined period of time. Subscription revenues are recognized ratably over the subscription term because the Company is unable to establish VSOE and separate the various elements, beginning on the commencement date of each contract. As of January 31, 2016, revenue recorded under this accounting treatment has not been significant.

Indirect Channel Revenue. We recognize revenues for sales made through indirect channels principally when the distributor makes the sale to an end-user, the license fee is fixed or determinable, the license fee is nonrefundable, and the sale meets all other conditions for revenue recognition.

Deferred Revenue. Deferred revenue represents advance payments or billings for software licenses, services, and maintenance billed in advance of the time revenue is recognized.

Sales Taxes. We account for sales taxes collected from customers on a net basis.

Unbilled Accounts Receivable. The unbilled receivable balance consists of amounts generated from license fee and services revenues. At January 31, 2016 and April 30, 2015, unbilled license fees were approximately \$2.0 million and \$1.4 million, respectively, and unbilled services revenues were approximately \$2.0 million and \$2.1 million, respectively. Unbilled license fee accounts receivable represents revenue that has been recognized, but under the terms of the license agreement, which include specified payment terms that are considered normal and customary, certain payments have not yet been invoiced to the customers. Unbilled services revenues primarily occur due to the timing of the respective billings, which occur subsequent to the end of each reporting period.

C. Declaration of Dividend Payable

On November 12, 2015, our Board of Directors declared a quarterly cash dividend of \$0.10 per share of our Class A and Class B common stock. The cash dividend is payable on February 26, 2016 to Class A and Class B shareholders of record at the close of business on February 12, 2016.

D. Earnings Per Common Share

We have two classes of common stock of which Class B Common Shares are convertible into Class A Common Shares at any time, on a one-for-one basis. Under our Articles of Incorporation, if we declare dividends, holders of Class A Common Shares will receive a \$0.05 dividend per share prior to the Class B Common Shares receiving any dividend and holders of Class A Common Shares will receive a dividend at least equal to Class B Common Shares dividends on a per share basis. As a result, we have computed the earnings per share in accordance with Earnings Per Share within the Presentation Topic of the FASB's Accounting Standards Codification, which requires companies that have multiple classes of equity securities to use the two-class method in computing earnings per share.

For our basic earnings per share calculation, we use the two-class method. Basic earnings per share are calculated by dividing net earnings attributable to each class of common stock by the weighted average number of shares outstanding. All undistributed earnings are allocated evenly between Class A and B Common Shares in the earnings per share calculation to the extent that earnings equal or exceed \$0.05 per share. This allocation is based on management's judgment after considering the dividend rights of the two classes of common stock, the control of the Class B shareholders and the convertibility rights of the Class B shares to Class A shares.

The calculation of diluted earnings per share is similar to the calculation of basic earnings per share, except that the calculation includes the dilutive effect of the assumed exercise of options issuable under our stock incentive plans. For our diluted earnings per share calculation for Class A shares, we use the if-converted method. This calculation assumes that all Class B Common Shares are converted into Class A Common Shares and, as a result, assumes there are no holders of Class B Common Shares to participate in undistributed earnings.

Table of Contents

For our diluted earnings per share calculation for Class B shares, we use the two-class method. This calculation does not assume that all Class B Common Shares are converted into Class A Common Shares. In addition, this method assumes the dilutive effect if Class A stock options were converted to Class A shares and the undistributed earnings are allocated evenly to both Class A and B shares including Class A shares issued pursuant to those converted stock options. This allocation is based on management's judgment after considering the dividend rights of the two classes of common stock, the control of the Class B shareholders and the convertibility rights of the Class B shares into Class A shares.

The following tables set forth the computation of basic earnings per common share and diluted earnings per common share (in thousands except for per share amounts):

Basic earnings per common share:

	Three Months Ended January 31, 2016		Nine Months Ended January 31, 2016	
	Class		Class A	Class B

Reallocation of undistributed loss to Class A shares from Class B shares	3		
Diluted EPS for Class B	\$ 511	2,587	\$ 0.20

For the three and nine months ended January 31, 2016, we excluded options to purchase 63,435 and 1,346,761 Class A Common Shares, respectively, and for the three and nine months ended January 31, 2015, we excluded options to purchase 952,761 and 847,539 Class A Common Shares, respectively, from the computation of diluted

earnings per Class A Common Shares. We excluded these option share amounts because the exercise prices of those options were greater than the average market price of the Class A Common Shares during the applicable period. As of January 31, 2016, we had a total of 3,508,719 options outstanding and, as of January 31, 2015, we had a total of 3,056,335 options outstanding.

E. Acquisitions

We account for business combinations using the acquisition method of accounting and accordingly, the identifiable assets acquired and liabilities assumed are recorded based upon management's estimates of current fair values as of the acquisition date. The estimation process includes analyses based on income and market approaches. Goodwill represents the excess purchase price over the fair value of net assets, including the amount assigned to identifiable intangible assets. The goodwill generated is due in part to the synergies that are not included in the fair value of identifiable intangible assets. Goodwill recorded in an acquisition is assigned to applicable reporting units based on expected revenues. Identifiable intangible assets with finite lives are amortized over their useful lives. Amortization of current technology is recorded in Cost of Revenue-License and amortization of all other intangible assets is recorded in Amortization of acquisition-related intangibles. Acquisition-related costs, including advisory, legal, accounting, valuation and other costs, are expensed in general and administrative expenses in the periods in which the costs are incurred. The results of operations of acquired businesses are included in the consolidated financial statements from the acquisition date.

Effective May 30, 2014, the Company entered into an Asset Purchase Agreement (Purchase Agreement) with privately-held MID Retail, Inc., an Indiana corporation (MRI). Pursuant to the Purchase Agreement, the Company acquired 100% of the total issued and outstanding shares of capital stock of MRI, a provider of retail allocation and merchandise planning solutions. This acquisition will expand and complement the products and services offered by Logility.

Table of Contents

Under the terms of the Purchase Agreement, the Company acquired the capital stock for an effective purchase price of approximately \$8,507,000 in cash plus a \$678,000 working capital adjustment. Additional consideration is payable at the end of each 12-month period in the 24-month period following the closing date (such 24-month period being the

Earnout Period) equal to 15% of the license fee revenues contracted for and recorded as revenue in accordance with GAAP by either MRI or the Company from the sale of MRI Software during such 12-month period, up to a maximum aggregate amount of \$1.5 million over the Earnout Period. This additional consideration will be accounted for as post-combination services and, therefore, will be expensed as incurred. The Company incurred acquisition costs of approximately \$282,000 during the year ended April 30, 2015. The operating results of MRI are not material for proforma disclosure. We allocated \$4,930,000 of the total purchase price to goodwill, which has been assigned to the Supply Chain Management segment and is deductible for income tax purposes.

The following allocation of the total purchase price reflects the fair value of the assets acquired and liabilities assumed as of May 30, 2014 (in thousands):

		Useful Life
Cash	\$ 1,277	
Accounts receivable, net	546	
Current assets	35	
Property and equipment, net	32	
Other assets	505	
Goodwill	4,930	
Non-compete	290	3 years
Customer relationships	1,400	8 years
Current technology	1,500	3 years
Total Assets Acquired	10,515	
Current liabilities	(825)	
Long-term liabilities	(505)	
Total liabilities assumed	(1,330)	
Net assets acquired	\$ 9,185	

Non-compete agreements, customer relationships and current technology are being amortized on a straight-line basis over the remaining estimated economic life of the assets, including the period being reported. The fair value of deferred revenues in a business combination is considered to be an assumed liability (which must arise from a legal performance obligation) and, accordingly, is estimated based on the direct cost of fulfilling the obligation plus a normal profit margin, which approximates fair value. Also, in practice, the normal profit margin is limited to the profit margin on the costs to provide the product or service (that is, the fulfillment effort).

F. Stock-Based Compensation

During the nine months ended January 31, 2016 and 2015, we granted options for 1,076,200 and 337,000 shares of common stock, respectively. We recorded stock option compensation cost of approximately \$404,000 and \$386,000 and related income tax benefits of approximately \$148,000 and \$141,000 during the three months ended January 31,

2016 and 2015, respectively. We recorded stock option compensation cost of approximately \$1.2 million and \$1.2 million and related income tax benefits of approximately \$443,000 and \$413,000 during the nine months ended January 31, 2016 and 2015, respectively. We record stock-based compensation expense on a straight-line basis over the vesting period directly to additional paid-in capital.

We classify cash flows resulting from the tax deductions in excess of the tax benefits initially recognized for those options (excess tax benefits) as financing cash flows. During the nine months ended January 31, 2016 and 2015, we realized excess tax benefits of approximately \$231,000 and \$87,000, respectively.

During the nine months ended January 31, 2016 and 2015, we issued 276,700 and 149,646 shares of common stock, respectively, resulting from the exercise of stock options. The total intrinsic value of options exercised during the nine months ended January 31, 2016 and 2015 based on market value at the exercise dates was approximately \$1.1 million and \$575,000, respectively. As of January 31, 2016, unrecognized compensation cost related to unvested stock option awards approximated \$3.4 million, which we expect to recognize over a weighted average period of 1.70 years.

Table of Contents**G. Fair Value of Financial Instruments**

We measure our investments based on a fair value hierarchy disclosure framework that prioritizes and ranks the level of market price observability used in measuring assets and liabilities at fair value. A number of factors affect market price observability, including the type of asset or liability and its characteristics. This hierarchy prioritizes the inputs into three broad levels as follows:

Level 1 Quoted prices in active markets for identical instruments.

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

The following is a general description of the valuation methodologies we use for financial assets and liabilities measured at fair value, including the general classification of such assets and liabilities pursuant to the valuation hierarchy.

Cash Equivalents Cash equivalents include investments in government obligation based money-market funds, other money market instruments and interest-bearing deposits with initial terms of three months or less. The fair value of cash equivalents approximates its carrying value due to the short-term nature of these instruments.

Marketable Securities Marketable securities utilizing Level 1 inputs include active exchange-traded equity securities and equity index funds, and most U.S. Government debt securities, as these securities all have quoted prices in active markets. Marketable securities utilizing Level 2 inputs include municipal bonds. We value these securities using market-corroborated pricing or other models that use observable inputs such as yield curves.

The following tables present our assets and liabilities that we measured at fair value on a recurring basis as of January 31, 2016 and April 30, 2015, respectively, and indicates the fair value hierarchy of the valuation techniques we used to determine such fair value (in thousands):

	January 31, 2016			
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance
Cash equivalents	\$ 40,256	\$	\$	\$ 40,256
Marketable securities	8,271	23,068		31,339

Total	\$ 48,527	\$ 23,068	\$	\$ 71,595
-------	-----------	-----------	----	-----------

April 30, 2015

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance
Cash equivalents	\$ 42,951	\$	\$	\$ 42,951
Marketable securities	9,139	21,555		30,694
Total	\$ 52,090	\$ 21,555	\$	\$ 73,645

H. Stock Repurchases

On August 19, 2002, our Board of Directors approved a resolution authorizing the repurchase of up to an additional 2.0 million shares of our Class A common stock. We have made and will make these repurchases through open market purchases at prevailing market prices. The timing of any repurchase will depend upon market conditions, the market price of our common stock and management's assessment of our liquidity and cash flow needs. Under this repurchase plan, through January 31, 2016, we have repurchased 1,041,213 shares of common stock at a cost of approximately \$6.1 million. As of January 31, 2016, under all repurchase plans previously authorized, including this most recent plan, we have repurchased a total of 4,576,166 shares of common stock at a cost of approximately \$25.4 million.

Table of Contents

I. Comprehensive Income

We have not included condensed consolidated statements of comprehensive income in the accompanying unaudited condensed consolidated financial statements since comprehensive income and net earnings presented in the accompanying condensed consolidated statements of operations would be substantially the same.

J. Industry Segments

We provide our software solutions through three major business segments, which are further broken down into a total of four major product and service groups. The three business segments are (1) Supply Chain Management (SCM), (2) Enterprise Resource Planning (ERP), and (3) Information Technology (IT) Consulting.

The SCM segment consists of Logility, a wholly-owned subsidiary, as well as its subsidiary, DMI, which provide collaborative supply chain solutions to streamline and optimize the forecasting, production, distribution and management of products between trading partners. The ERP segment consists of (i) American Software ERP, which provides purchasing and materials management, customer order processing, financial, e-commerce and traditional manufacturing solutions, (ii) New Generation Computing (NGC), which provides industry-specific business software to both retailers and manufacturers in the apparel, sewn products and furniture industries, and (iii) Corporate expenses. The IT Consulting segment consists of The Proven Method, Inc., an IT staffing and consulting services firm. We also provide support for our software products, such as software enhancements, documentation, updates, customer education, consulting, systems integration services, and maintenance.

Our chief operating decision maker is the President and Chief Executive Officer (CEO). While the CEO is apprised of a variety of financial metrics and information, we manage our business primarily on a segment basis, with the CEO evaluating performance based upon segment operating profit or loss that includes an allocation of common expenses, but excludes certain unallocated expenses.

Table of Contents

In the following table, we have broken down the intersegment transactions applicable to the three and nine months ended January 31, 2016 and 2015:

	Three Months Ended January 31,		Nine Months Ended January 31,	
	2016	2015	2016	2015
Revenues:				
Enterprise Resource Planning (i)	\$ 3,291	\$ 2,997	\$ 9,875	\$ 8,607

Table of Contents

Major Customer

For the three and nine months ended January 31, 2016, there were no major customers that accounted for more than 10% of total revenues. No one customer accounted for more than 10% of total revenues for the three and nine months ended January 31, 2015.

K. Contingencies

We more often than not indemnify our customers against damages and costs resulting from claims of patent, copyright or trademark infringement associated with use of our products. We have historically not been required to make any payments under such indemnifications. However, we continue to monitor the conditions that are subject to the indemnifications to identify whether it is probable that a loss has occurred, and would recognize any such losses under the indemnifications when those losses are estimable. In addition, we warrant to our customers that our products operate substantially in accordance with the software products' specifications. Historically, we have incurred no costs related to software product warranties and we do not expect to incur such costs in the future, and as such we have made no accruals for software product warranty costs. Additionally, we are involved in various claims arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on our financial position or results of operations.

L. Subsequent Event

On February 10, 2016, our Board of Directors declared a quarterly cash dividend of \$0.10 per share of our Class A and Class B common stock. The cash dividend is payable on May 27, 2016 to Class A and Class B shareholders of record at the close of business on May 13, 2016.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING STATEMENTS

This report on Form 10-Q contains forward-looking statements relating to our future financial performance, business strategy, financing plans and other future events that involve uncertainties and risks. You can identify these statements by forward-looking words such as anticipate, intend, plan, continue, could, grow, may, potential, predict, seek, estimate, believe, expect, and similar expressions that convey uncertainty of future events or outcomes. Any forward-looking statements we make herein are pursuant to the safe harbor provision of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements concerning future:

results of operations;

liquidity, cash flow and capital expenditures;

demand for and pricing of our products and services;

viability and effectiveness of strategic alliances;

industry conditions and market conditions;

acquisition activities and the effect of completed acquisitions; and

general economic conditions.

Although we believe that the goals, plans, expectations, and prospects that our forward-looking statements reflect are reasonable in view of the information currently available to us, those statements are not guarantees of performance. There are many factors that could cause our actual results to differ materially from those anticipated by forward-looking statements made herein. These factors include, but are not limited to, continuing U.S. and global economic uncertainty, the timing and degree of business recovery, unpredictability and the irregular pattern of future revenues, dependence on particular market segments or customers, competitive pressures, delays, product liability and warranty claims and other risks associated with new product development, undetected software errors, market acceptance of our products, technological complexity, the challenges and risks associated with integration of acquired product lines, companies and services, as well as a number of other risk factors that could affect our future performance. All forward-looking statements included in this Form 10-Q are based upon information available to us as of the filing date of this Form 10-Q. We undertake no obligation to update any of these forward-looking statements for any reason. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance, or achievements to differ materially from those expressed or implied by these statements. We discuss certain factors in greater detail in [Business Overview](#) below. The terms [fiscal 2016](#) and [fiscal 2015](#) refer to our fiscal years ending April 30, 2016 and 2015, respectively.

Table of Contents

ECONOMIC OVERVIEW

Corporate capital spending trends and commitments are the primary determinants of the size of the market for business software. Corporate capital spending is, in turn, a function of general economic conditions in the U.S. and abroad and in particular may be affected by conditions in global credit markets.

In January 2016, the International Monetary Fund (IMF) provided an update to the World Economic Outlook (WEO) for the 2016 and 2017 world economic growth forecast. The update noted *that, Global growth, currently estimated at 3.1 percent in 2015, is projected at 3.4 percent in 2016 and 3.6 percent in 2017. The pickup in global activity is projected to be more gradual than in the October 2015 World Economic Outlook (WEO), especially in emerging market and developing economies. Risks to the global outlook remain tilted to the downside and relate to ongoing adjustments in the global economy: a generalized slowdown in emerging market economies, China's rebalancing, lower commodity prices, and the gradual exit from extraordinarily accommodative monetary conditions in the United States. If these key challenges are not successfully managed, global growth could be derailed.*

For the remainder of fiscal 2016, we expect the world economy growth to be uneven which could result in a difficult selling environment. Overall information technology spending continues to be relatively weak as a result of the current global economic environment when compared to the period prior to the last recession. However, we had an increase in software sales during the current quarter and continue to see improvement in sales pipeline activity. We believe information technology spending will incrementally improve over the long term as increased global competition forces companies to improve productivity by upgrading their technology systems. Although this improvement could slow or regress at any time, due in part to concerns in global capital markets and general economic conditions, we believe that our organizational and financial structure will enable us to take advantage of any sustained economic rebound. Customers continue to take long periods to evaluate discretionary software purchases.

We believe weak economic conditions may be driving some businesses to focus on achieving more process and efficiency improvements in their operations and to invest in solutions that improve operating margins, rather than make large infrastructure-type technology purchases. If this trend continues, we believe it may tend to favor solutions such as our Logility supply chain solutions, which are designed to provide a more rapid return on investment and are targeted at some of the largest profit drivers in a customer's business. While the current economic crisis has had a particularly adverse impact on the weaker companies in our target markets, we believe a larger percentage of our customers are seeking to make investments to strengthen their operations, and some are taking advantage of current economic conditions to gain market share.

BUSINESS OVERVIEW

American Software was incorporated as a Georgia corporation in 1970. We develop, market and support a portfolio of software and services that deliver enterprise management and collaborative supply chain solutions to the global marketplace. We have designed our software and services to bring business value to enterprises by supporting their operations over intranets, extranets, client/servers or the Internet. References to the Company, our products, our software, our services and similar references include the appropriate business unit actually providing the product or service.

We provide our software solutions through three major business segments, which are further broken down into a total of four major product and service groups. The three business segments are (1) Supply Chain Management (SCM), (2) Enterprise Resource Planning (ERP) and (3) Information Technology (IT) Consulting. The SCM segment consists of Logility, a wholly-owned subsidiary that provides collaborative supply chain solutions to streamline and optimize the production, distribution and management of products between trading partners. The ERP segment consists of

(i) American Software ERP, which provides purchasing and materials management, customer order processing, financial, e-commerce and traditional manufacturing solutions, and (ii) New Generation Computing (NGC), which provides industry-specific business software to both retailers and manufacturers in the apparel, sewn products and furniture industries. The IT Consulting segment consists of The Proven Method, an IT staffing and consulting services firm.

We derive revenues primarily from three sources: software licenses, services and other, and maintenance. We generally determine software license fees based on the number of modules, servers, users and/or sites licensed. Services and other revenues consist primarily of fees from software implementation, training, consulting and customization services. We primarily bill under time and materials arrangements and recognize revenues as we perform services. We typically enter into maintenance agreements for a one- to three-year term at the time of the initial product license. We generally bill maintenance fees annually in advance and then recognize the resulting revenues ratably over the term of the maintenance agreement. Deferred revenues represent advance payments or billings for software licenses, services and maintenance billed in advance of the time we recognize the related revenues.

Our cost of revenue for licenses includes amortization of capitalized computer software development costs, royalties paid to third-party software vendors, and agent commission expenses related to license revenues generated by the indirect sales channel, primarily from Demand Management, Inc. (DMI), a subsidiary of Logility. Costs for maintenance and services include the cost of personnel to conduct implementations and customer support, consulting, other personnel-related expenses, and agent commission

Table of Contents

expenses related to maintenance revenues generated by the indirect channel, primarily from DMI. We account for the development costs of software intended for sale in accordance with the Intangibles Goodwill and Other topic of the FASB Accounting Standards Codification. We monitor the net realizable value of our capitalized software on a quarterly basis based on an estimate of future product revenues. We currently expect to fully recover the value of the capitalized software asset recorded on our consolidated balance sheet; however, if future product revenues are less than management's current expectations, we may incur a write-down of capitalized software costs.

Our selling expenses generally include the salary and commissions paid to our sales professionals, along with marketing, promotional, travel and associated costs. Our general and administrative expenses generally include the salary and benefits paid to executive, corporate and support personnel, as well as facilities-related costs, utilities, communications expenses, and various professional fees.

We currently view the following factors as the primary opportunities and risks associated with our business:

Dependence on Capital Spending Patterns. There is risk associated with our dependence on the capital spending patterns of U.S. and international businesses, which in turn are functions of economic trends and conditions over which we have no control.

Acquisition Opportunities. There are opportunities for selective acquisitions or investments to provide opportunities to expand our sales distribution channels and/or broaden our product offering by providing additional solutions for our target markets.

Acquisition Risks. There are risks associated with acquisitions of complementary companies, products and technologies, including the risks that we will not achieve the financial and strategic goals that we contemplate at the time of the transaction. More specifically, in any acquisition we will face risks and challenges associated with the uncertain value of the acquired business or assets, the difficulty of assimilating operations and personnel, integrating acquired technologies and products and maintaining the loyalty of the customers of the acquired business.

Competitive Technologies. There is a risk that our competitors may develop technologies that are substantially equivalent or superior to our technology.

Competition in General. There are risks inherent in the market for business application software and related services, which has been and continues to be intensely competitive; for example, some of our competitors may become more aggressive with their prices and/or payment terms, which may adversely affect our profit margins.

A discussion of a number of additional risk factors associated with our business is included in our Annual Report on Form 10-K for the fiscal year ended April 30, 2015.

Recent Accounting Pronouncements

In April 2014, the FASB issued ASU No. 2014-08, *Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity*, to change the criteria for determining which disposals can be presented as discontinued operations and enhanced the related disclosure requirements. The new standard is effective for annual periods beginning on or after December 15, 2014 and interim periods within that year. The standard is applied prospectively, with early adoption permitted for disposals (or classifications as held for sale) that have not been reported in financial statements previously issued. The Company does not expect the standard to have a material impact on its consolidated financial statements.

In August 2015, the FASB issued ASU No. 2015-14, *Revenue from Contracts with Customers - Deferral of Effective date*, which defers the Implementation of ASU 2014-09, *Revenue from Contracts with Customers*, for one year from the initial effective date. The initial effective date of ASU No. 2014-09 was for annual reporting periods beginning after December 15, 2016, and early adoption was not permitted. ASU No. 2015-14 extends the effective date to annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier application is permitted only as of reporting periods beginning after December 16, 2016, including interim reporting periods within that reporting period. The Company is evaluating the effect that these standards will have on its consolidated financial statements and related disclosures.

In November 2015, the FASB issued ASU No. 2015-17, *Balance Sheet Classification of Deferred Taxes*, to simplify the presentation of the deferred income taxes. The ASU requires that all deferred tax assets and liabilities, along with any related valuation allowance, be classified as noncurrent on the balance sheet. The guidance does not change the existing requirement that only permits offsetting within a tax-paying component of an entity. This guidance is effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods, but may be adopted earlier. The Company has not adopted this ASU as of January 31, 2016, but does not expect the standard to have a material impact on its consolidated financial statements.

Table of Contents

In February 2016, the FASB issued ASU No. 2016-02, *Leases (topic 842)*, to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The ASU is effective for annual periods beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption of the update is permitted. The Company is evaluating the impact of the adoption of this update on our consolidated financial statements and related disclosures.

COMPARISON OF RESULTS OF OPERATIONS

Three-Month Comparisons. The following table sets forth certain revenue and expense items as a percentage of total revenues and the percentage changes in those items for the three months ended January 31, 2016 and 2015:

	Three Months Ended January 31,

	2016	2015	% Change	2016	2015
	(in thousands)				
License	\$ 15,487	\$ 11,718	32%	18%	15%
Services and other	39,109	34,448	14%	46%	46%
Maintenance	30,427	29,107	5%	36%	39%
Total revenues	\$ 85,023	\$ 75,273	13%	100%	100%

For the three months ended January 31, 2016, the 5% increase in revenues over the three months ended January 31, 2015 was attributable to a 16% increase in license fee revenues, a 4% increase in maintenance revenues and to a lesser extent a 1% services and other revenues. For the nine months ended January 31, 2016, the 13% increase in revenues over the nine months ended January 31, 2015 was attributable to a 32% license fee revenues, a 14% increase in services and other revenues and a 5% increase in maintenance revenues. The primary reason for the increase in license fee revenues was an increase in software sales at both our Supply Chain Management and Enterprise Resource Planning business units, which increased 8% and 70%, during the three months ended January 31, 2016 compared to the three months ended January 31, 2015, respectively and 30% and 43% during the nine months ended January 31, 2016 compared to the nine months ended January 31, 2015, respectively. We believe this increase was due to an improvement in the overall capital spending environment and improved sales execution in closing transactions partly as a result of an increase in sales and marketing staff when compared to the same period last year. Also, to a lesser extent some customer sales included hosting services which require the revenue recognition to be spread over the life of the contract due to the lack of VSOE.

Due to intensely competitive markets, we do discount license fees from our published list price due to pricing pressure in our industry. Numerous factors contribute to the amount of the discounts provided, such as previous customer purchases, the number of customer sites utilizing the software, the number of modules purchased and the number of users, as well as the overall size of the contract. While all these factors may affect the discount amount of a particular contract, the overall percentage discount has not materially changed in the recent reported fiscal periods.

The change in our revenues from period to period is primarily due to the volume of products and related services sold in any period and the amount of products or modules purchased with each sale.

International revenues represented approximately 19% and 18% of total revenues in the three and nine months ended January 31, 2016, respectively, and represented approximately 15% and 16% of total revenues in the three and nine months ended January 31, 2015. Our revenues, in particular our international revenues, may fluctuate substantially from period to period primarily because we derive most of our license fee revenues from a relatively small number of customers in a given period.

License Revenues

	Three Months Ended January 31,		
	2016	2015	% Change
	(in thousands)		
Enterprise Resource Planning	\$ 966	\$ 569	70%
Supply Chain Management	4,082	3,769	8%

Total license revenues	\$ 5,048	\$ 4,338	16%
------------------------	----------	----------	-----

	Nine Months Ended January 31,		
	2016	2015	% Change
	(in thousands)		
Enterprise Resource Planning	\$ 2,607	\$ 1,824	43%
Supply Chain Management	12,880	9,894	30%
Total license revenues	\$ 15,487	\$ 11,718	32%

For the three and nine months ended January 31, 2016, license fee revenues increased 16% and 32%, respectively, when compared to the same periods in the prior year. While we expect a degree of quarterly fluctuation due to the timing of signing license fee agreements, our SCM and ERP segments experienced an increase in license fee close rates in the current quarter when compared

to the same period last year due to improvement in the overall capital spending environment and improved sales execution in closing

Table of Contents

transactions partly as a result of an increase in sales and marketing staff when compared to the same period last year. The SCM license fee revenue would have been higher in the current quarter by approximately \$800,000 however these customer sales included hosting services which require the revenue recognition to be spread over the life of the contract due to the lack of VSOE.

Our SCM segment constituted 81% and 83% of total license fee revenues for the three and nine months ended January 31, 2016, respectively, compared to 87% and 84% for the three and nine months ended January 31, 2015, respectively. Our ERP business unit license fee revenues increased by 70% and 43% for the three and nine months ended January 31, 2016 when compared to the same periods in the prior year, primarily due to an increase in license fee sales to the apparel and retail industries due to improved sales execution and sales environment for those vertical industries.

The direct sales channel provided approximately 82% and 76% of license fee revenues for the three and nine months ended January 31, 2016, respectively, compared to approximately 77% and 71% of license fee revenues for the three and nine months ended January 31, 2015, respectively. The increase in the proportion of sales by our direct sales channel, which tends to target larger companies, for the current quarter when compared to the prior year period is primarily due to an increase in larger sales compared with the same time last year. In general, large and mid-sized companies do not require access to capital markets to fund expenditures to the same degree as do smaller companies. Thus, our indirect sales channel faces relatively greater challenges in the current economy, as the indirect channel tends to target smaller companies. For the three and nine months ended January 31, 2016, our margins after commissions on direct sales were approximately 84% and 86%, respectively, compared to 87% for the three and nine months ended January 31, 2015, respectively. For the three months ended January 31, 2016 compared to the same period in the prior year, our direct margins decreased due to the concentration (or mix) of sales staff achieving certain commission rate levels when compared to the same period last year. For the three and nine months ended January 31, 2016, our margins after commissions on indirect sales were approximately 46% and 50%, respectively, compared to 32% and 39% for the three and nine months ended January 31, 2015, respectively. The indirect channel margins increased for the three and nine months ended January 31, 2016 when compared to the same periods in the prior year due to the mix of value-added reseller (VAR) commission rates. These margin calculations include only commission expense for comparative purposes and do not include other costs of license fees such as amortization of capitalized software.

Services and Other Revenues

	Three Months Ended January 31,		
	2016	2015	% Change
	(in thousands)		
Enterprise Resource Planning	\$ 998	\$ 1,168	(15)%
Supply Chain Management	5,338	3,954	35%
IT Consulting	5,465	6,540	(16)%
Total services and other revenues	\$ 11,801	\$ 11,662	1%

	Nine Months Ended January 31,		
	2016	2015	% Change

	(in thousands)		
Enterprise Resource Planning	\$ 3,362	\$ 3,029	11%
Supply Chain Management	16,778	12,786	31%
IT Consulting	18,969	18,633	2%
 Total services and other revenues	 \$ 39,109	 \$ 34,448	 14%

For the three months ended January 31, 2016, services and other revenues increased by 1% when compared to the same period in the prior year, primarily due to an increase in services and other revenues from our SCM segment which was partially offset by decreases in our ERP and IT Consulting business segments. For the nine months ended January 31, 2016, services and other revenues increased by 14% when compared to the same period in the prior year, primarily due to an increase in services and other revenues from all our business segments. For the three and nine months ended January 31, 2016, services and other revenues from Logility (SCM) increased by 35% and 31%, respectively, when compared to the prior year periods. Logility services and other revenues increased due to an increase in project implementation work from higher license fee sales in the first half of fiscal 2016, which tend to increase services implementation revenue with a one to three quarter lag. For the three and nine months ended January 31, 2015, our ERP segment's revenues decreased 15% and increased 11%, respectively, when compared to the prior year periods. The decrease in the current quarter is due to timing of project work. For the three and nine months ended January 31, 2015, our IT Consulting segment's revenues decreased 16% and increased 2%, respectively, when compared to the prior year periods. The decrease in the current quarter was due to the completion of an IT project from one of our larger customer as a result of timing of project work. We expect the services revenue to increase sequentially in the fourth quarter of fiscal 2016 when compared to the current quarter.

Table of Contents

We have observed that there is a tendency for services and other revenues, other than from IT Consulting, to lag changes in license revenues by one to three quarters, as new licenses in one quarter often involve implementation and consulting services in subsequent quarters, for which we recognize revenues only as we perform those services.

Maintenance Revenues

	Three Months Ended January 31,		
	2016	2015	% Change
	(in thousands)		
Enterprise Resource Planning	\$ 1,327	\$ 1,260	5%
Supply Chain Management	8,919	8,579	4%
Total maintenance revenues	\$ 10,246	\$ 9,839	4%

	Nine Months Ended January 31,		
	2016	2015	% Change
	(in thousands)		
Enterprise Resource Planning	\$ 3,906	\$ 3,754	4%
Supply Chain Management	26,521	25,353	5%
Total maintenance revenues	\$ 30,427	\$ 29,107	5%

For the three and nine months ended January 31, 2016, maintenance revenues increased 4% and 5%, respectively, when compared to the same periods in the prior year due primarily to license fee sales in recent quarters and improved renewal rates in our SCM unit, which experienced a 4% and 5% increase in maintenance revenue for the three and nine months ended January 31, 2016, respectively, when compared to the same periods last year. Our legacy ERP unit experienced an increase of 5% and 4%, for the three and nine months ended January 31, 2016, respectively, when compared to the same periods in the prior year due to increased license fees in recent quarters and improved renewal rates. Logility accounted for 87% of total maintenance revenues for both the three- and nine-month periods ended January 31, 2016, respectively, compared to 87% of total maintenance revenues for both the three- and nine-month periods ended January 31, 2015. Typically, our maintenance revenues have had a direct relationship to current and historic license fee revenues, since new licenses are the potential source of new maintenance customers.

GROSS MARGIN

The following table provides both dollar amounts (in thousands) and percentage measures of gross margin:

	Three months ended January 31,				Nine months ended January 31,			
	2016		2015		2016		2015	
Gross margin on license fees	\$ 3,202	63%	\$ 2,349	54%	\$ 9,712	63%	\$ 6,230	53%
Gross margin on services and other	2,620	22%	2,870	25%	10,554	27%	9,318	27%
Gross margin on maintenance	7,785	76%	7,630	78%	23,555	77%	22,742	78%

Total gross margin	\$ 13,607	50%	\$ 12,849	50%	\$ 43,821	52%	\$ 38,290	51%
--------------------	-----------	-----	-----------	-----	-----------	-----	-----------	-----

For the three and nine months ended January 31, 2016, total gross margin percentage was the essentially the same when compared to the same periods in the prior year.

Gross Margin on License Fees

License fee gross margin percentage for the three and nine months ended January 31, 2016 was 63% compared to 54% and 53% for the same periods in the prior year, respectively, due primarily to an increase in the license fee. License fee gross margin percentage tends to be directly related to the level of license fee revenues due to the relatively fixed cost of computer software amortization expense, amortization of acquired software and the sales mix between our direct and indirect channels.

Table of Contents**Gross Margin on Services and Other**

For the three months ended January 31, 2016, the gross margin percentage on services and other revenues decreased three percentage points to 22% from 25% in the same period in the prior year, primarily due to a decrease in margins at our IT consulting and ERP business unit from a decrease services revenue from timing of project work. For the nine months ended January 31, 2016 and 2015, the gross margin percentage on services and other revenues were 27% for both periods. Services and other gross margin are directly related to the level of services and other revenues. The primary component of cost of services and other revenues is services staffing, which is relatively inelastic in the short term.

Gross Margin on Maintenance

Maintenance gross margin percentage for the three months ended January 31, 2016 declined by 2 percentage points when compared to the same periods in the prior year due to an increase in headcount. Maintenance gross margin percentage for the nine months ended January 31, 2016 were the same when compared to the same periods in the prior year. Maintenance gross margin normally is directly related to the level of maintenance revenues. The primary component of cost of maintenance revenue is maintenance staffing, which is relatively inelastic in the short term.

Expenses

	Three Months Ended				Nine Months Ended			
	January 31,		% of Revenues		January 31,		% of Revenues	
	2016	2015	2016	2015	2016	2015	2016	2015
	(in thousands)				(in thousands)			
Research and development	\$ 3,012	\$ 2,603	11%	10%	\$ 8,177	\$ 8,609	10%	11%
Sales and marketing	\$ 5,269	\$ 4,540	19%	18%	\$ 15,967	\$ 13,758	19%	18%
General and administrative	\$ 2,740	\$ 3,224	10%	12%	\$ 9,807	\$ 9,707	12%	13%
Amortization of acquisition-related intangible assets	\$ 68	\$ 107	0%	1%	\$ 204	\$ 299	0%	1%
Other (expense) income, net	\$ (194)	\$ (80)	1%	0%	\$ 242	\$ 715	0%	1%
Income tax expense (benefit)	\$ 213	\$ (546)	1%	(2)%	\$ 3,072	\$ 1,082	4%	2%

Research and Development

Gross product research and development costs include all non-capitalized and capitalized software development costs. A breakdown of the research and development costs is as follows:

	Three Months Ended		
	(in thousands)		
	January 31, 2016	Percent Change	January 31, 2015
Total capitalized computer software development costs	\$ 692	(21)%	\$ 879
	19%		25%

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-Q

Percentage of gross product research and development costs

Total research and development expense	3,012	16%	2,603
--	-------	-----	-------

Percentage of total revenues	11%		10%
------------------------------	-----	--	-----

Total research and development expense and capitalized computer software development costs	\$ 3,704	6%	\$ 3,482
--	----------	----	----------

Percentage of total revenues	14%		13%
------------------------------	-----	--	-----

Total amortization of capitalized computer software development costs *	\$ 985	10%	\$ 897
---	--------	-----	--------

Table of Contents

	Nine Months Ended (in thousands)		
	January 31, 2016	Percent Change	January 31, 2015
Total capitalized computer software development costs	\$ 2,681	55%	\$ 1,725
Percentage of gross product research and development costs	25%		17%
Total research and development expense	8,177	(5)%	8,609
Percentage of total revenues	10%		11%
Total research and development expense and capitalized computer software development costs	\$ 10,858	5%	\$ 10,334
Percentage of total revenues	13%		14%
Total amortization of capitalized computer software development costs *	\$ 2,936	9%	\$ 2,691

* Included in cost of license fees

For the three and nine months ended January 31, 2016, gross product research and development costs increased when compared to the same periods in the previous fiscal year primarily due to an increased hiring in our SCM business unit. Capitalized software development costs decreased for the three months ended January 31, 2016 and increased for the nine months ended January 31, 2016 when compared to the same periods last year due to timing of capitalizable project work. We expect capitalized product development costs to increase as new projects reach technological feasibility and we expect capitalized software amortization expense to be relatively stable in coming quarters. Costs included in gross product development are salaries of product development personnel, hardware lease expense, computer software expense, telephone expense and rent.

Sales and Marketing

For the three and nine months ended January 31, 2016, sales and marketing expenses increased 16% when compared to the same periods a year ago primarily due to an increase in headcount, marketing related fees and sales commissions as a result of higher license fees. We generally include commissions on indirect sales in cost of sales.

General and Administrative and Provision for (Recovery of) Doubtful Accounts

For the three months ended January 31, 2016, the 15% decrease when compared to the same period last year was primarily due to recording a Research and Development State tax credit against withholding taxes of approximately \$638,000 and to a lesser extent a decrease in the allowance for doubtful accounts. Based on current Georgia law and our historical research and development costs, in future fiscal years we expect this credit to be approximately \$400,000 annually.

For the nine months ended January 31, 2016, the 1% increase compared to the same period last year was primarily due to an increase in variable compensation, general office expenses and audit related expenses. This increase was partially offset by a Research and Development state tax credit against withholding taxes of approximately \$638,000 and to a lesser extent a decrease in the allowance for doubtful accounts.

At January 31, 2016, the total number of employees was 419, compared to 399 at January 31, 2015.

Operating Income/(Loss)

	Three Months Ended January 31,			Nine Months Ended January 31,		
	2016 (in thousands)	2015 (in thousands)	% Change	2016 (in thousands) ²	2015 (in thousands)	% Change
Enterprise Resource Planning	\$ (1,049)	\$ (1,192)	12%	\$ (3,394)	\$ (3,792)	10%
Collaborative Supply Chain Management	3,393	3,064	11%	11,784	8,076	46%
IT Consulting	174	503	(65)%	1,276	1,633	(22)%
Total Operating Income	\$ 2,518	\$ 2,375	6%	\$ 9,666	\$ 5,917	63%

Table of Contents

Our ERP and corporate expense segment operating loss in the three months ended January 31, 2016 decreased from the same period in the prior year due to higher license fee and maintenance revenues partially offset by a decrease in services revenue. Our ERP and corporate expense segment operating loss decreased in the nine months ended January 31, 2016 due to higher license fee, services and maintenance revenues.

Our SCM segment's contribution to operating income increased by 11% and 46% for the three and nine months ended January 31, 2016 compared to same periods last year, primarily as a result of an increase overall revenues particularly the 8% and 30% increase in license fee revenues for the three and nine months ended January 31, 2016 compared to same periods last year, respectively.

Our IT consulting segment operating income decreased 65% and 22% for the three and nine months ended January 31, 2016, respectively, when compared to same periods last year as a result of higher revenue and improved cost management due to a decrease in revenue from the end of a large IT project ending during the quarter.

Other Income (Expense)

Other income is comprised of net interest and dividend income, rental income net of related depreciation expenses, exchange rate gains and losses, and realized and unrealized gains and losses from investments. For the three and nine months ended January 31, 2016, the decrease in other income was due primarily to higher unrealized losses on investments when compared to the same period last year.

This decrease was partially offset by: 1) lower exchange rate losses of approximately \$128,000 and \$303,000 for the three and nine months ended January 31, 2016 when compared to \$262,000 and \$455,000 for the three and nine months ended January 31, 2015, 2) an increase in interest income as a result of higher market yields and 3) higher rental income when compared to the same periods last year.

We recorded losses of approximately \$703,000 and \$1.2 million for the three and nine months ended January 31, 2016, respectively, from our trading securities portfolio. We recorded losses of approximately \$364,000 and \$381,000 for the three and nine months ended January 31, 2015, respectively, from our trading securities portfolio.

For the three and nine months ended January 31, 2016, our investments generated an annualized yield of approximately 2.01% and 1.87% respectively, compared to approximately 1.86% and 1.67% for the three and nine months ended January 31, 2015, respectively.

Income Taxes

We recognize deferred tax assets and liabilities based on the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their tax bases. We measure deferred tax assets and liabilities using statutory tax rates in effect in the year in which we expect the differences to reverse. We establish a deferred tax asset for the expected future benefit of net operating loss and credit carry-forwards. Under the Income Tax Topic of the FASB Accounting Standards Codification, we cannot recognize a deferred tax asset for the future benefit of our net operating losses, tax credits and temporary differences unless we can establish that it is more likely than not that the deferred tax asset would be realized. During the three months ended January 31, 2016, our effective tax rate was 9.2% compared to our effective tax rate of (23.8)% in the three months ended January 31, 2015. The current quarter included the extension of the research and development tax credit during the third quarter of fiscal 2016 which resulted in a catch-up credit adjustment for the period January 1, 2015 through December 31, 2015.

The effective tax rate for the current quarter is higher compared to the third quarter of fiscal 2015 due to the reversal of a FIN 48 Reserve (\$973,000) in the third quarter of 2015, due to the lapse in the statute of limitations.

During the nine months ended January 31, 2016, our effective rate was 31.0% compared to our effective rate of 16.3% in the nine months ended January 31, 2015. We expect our effective rate will be between 31% and 34% during fiscal 2016.

Operating Pattern

We experience irregular fluctuations in quarterly operating results, caused primarily by changes in both the number and size of software license contracts received and delivered from quarter to quarter and our ability to recognize revenues in that quarter in accordance with our revenue recognition policies. We expect these fluctuations to continue.

Table of Contents**LIQUIDITY, CAPITAL RESOURCES AND FINANCIAL CONDITION*****Sources and Uses of Cash***

We have historically funded, and continue to fund, our operations and capital expenditures primarily with cash generated from operating activities. The changes in net cash that our operating activities provide generally reflect the changes in net earnings and non-cash operating items plus the effect of changes in operating assets and liabilities, such as investment trading securities, trade accounts receivable, trade accounts payable, accrued expenses and deferred revenue. We have no debt obligations or off-balance sheet financing arrangements, and therefore we used no cash for debt service purposes.

The following table shows information about our cash flows and liquidity positions during the nine months ended January 31, 2016 and 2015. You should read this table and the discussion that follows in conjunction with our condensed consolidated statements of cash flows contained in Item 1. Financial Statements in Part I of this report and in our Annual Report on Form 10-K for the fiscal year ended April 30, 2015.

	Nine Months Ended	
	January 31,	
	2016	2015
	(in thousands)	
Net cash provided by operating activities	\$ 8,465	\$ 4,714
Net cash used in investing activities	(3,162)	(10,606)
Net cash used in financing activities	(6,996)	(8,888)
Net change in cash and cash equivalents	\$ (1,693)	\$ (14,780)

For the nine months ended January 31, 2016, the increase in cash provided by operating activities compared to the same period last year was due primarily to: 1) a decrease in purchases of trading securities, 2) an increase in net earnings, 3) an increase in accounts payable and other accruals compared to a decrease in the same period last year due to timing of payments, 4) a higher increase in the tax benefit of stock options exercised compared to the prior year due to the mix of options exercised, 5) higher stock-based compensation expense and 6) an increase in unrealized losses on investments compared to the same period last year.

This increase was partially offset by: 1) lower proceeds from the maturity and sales of trading securities, 2) a decrease in customer accounts receivable compared to an increase in the same period last year caused by the timing of closing customer sales and related collections, 3) a decrease in prepaid expenses and other assets compared to an increase in the same period last year due to the timing of purchases, 4) higher excess tax benefits from stock-based compensation compared to the prior year due to the mix of options exercised, and 5) a decrease in deferred revenues compared to an increase in the same period last year due to the timing of revenue recognition.

The decrease in cash used in investing activities when compared to the same period in the prior year was due primarily to the acquisition of MRI during the first quarter of fiscal 2015 and a decrease in purchases of property and equipment. The decrease was partially offset by an increase in capitalized computer software development costs due to the timing of project work.

The decrease in cash used in financing activities compared to the prior year was due primarily to: 1) a decrease in repurchases of the Company's common stock, 2) an increase in proceeds from exercise of stock options and 3) an increase in excess tax benefits from stock-based compensation. This was partially offset by an increase in dividends paid.

The following table shows net changes in total cash, cash equivalents, and investments, which is one measure management uses to view net total cash generated by our activities:

	As of January 31,	
	2016	2015
	(in thousands)	
Cash and cash equivalents	\$ 42,962	\$ 41,023
Short and long-term investments	31,363	29,973
Total cash and short and long-term investments	\$ 74,325	\$ 70,996
Net decrease in total cash and investments (nine months ended January 31)	\$ (1,070)	\$ (8,578)

Table of Contents

Our total activities used less cash and investments during the nine months ended January 31, 2016, when compared to the prior year period, due primarily to the changes in operating assets and liabilities noted above, the payment of quarterly dividends, the acquisition of MRI and repurchase of the Company's common stock.

Days Sales Outstanding in accounts receivable were 69 days as of January 31, 2016, compared to 62 days as of January 31, 2015. This increase is primarily due to the timing of collection activity. Our current ratio on January 31, 2016 was 2.3 to 1 and on January 31, 2015 was 2.2 to 1.

Our business in recent periods has generated positive cash flow from operations, excluding purchases and proceeds of sale of trading securities. For this reason, and because we had \$74.3 million in cash and investments with no debt as of January 31, 2016, we believe that our sources of liquidity and capital resources will be sufficient to satisfy our presently anticipated requirements during at least the next twelve months for working capital, capital expenditures and other corporate needs. However, at some future date, we may need to seek additional sources of capital to meet our requirements. If such need arises, we may be required to raise additional funds through equity or debt financing. We do not currently have a bank line of credit. We can provide no assurance that bank lines of credit or other financing will be available on terms acceptable to us. If available, such financing may result in dilution to our shareholders or higher interest expense.

On December 17, 1997, our Board of Directors approved a resolution authorizing the repurchase of up to 1.5 million of our Class A Common Shares. On March 11, 1999, our Board of Directors approved a resolution authorizing us to repurchase an additional 700,000 shares for a total of up to 2.2 million of our Class A Common Shares. On August 19, 2002, our Board of Directors approved a resolution authorizing us to repurchase an additional 2.0 million shares for a total of up to 4.2 million of our Class A Common Shares. These repurchases have been and will be made through open market purchases at prevailing market prices. The timing of any repurchases will depend upon market conditions, the market price of our common stock and management's assessment of our liquidity and cash flow needs. As of January 31, 2016, under all repurchase plans previously authorized, including this most recent plan, we have repurchased a total of 4,576,166 shares of common stock at a cost of approximately \$25.4 million.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We have based the following discussion and analysis of financial condition and results of operations on our financial statements, which we have prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Note 1 in the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended April 30, 2015 describes the significant accounting policies that we have used in preparing our financial statements. On an ongoing basis, we evaluate our estimates, including, but not limited to those related to vendor specific objective evidence (VSOE), bad debts, capitalized software costs, goodwill, intangible asset impairment, stock-based compensation, income taxes and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results could differ materially from these estimates under different assumptions or conditions.

We believe the critical accounting policies listed below affect significant judgments and estimates used in the preparation of the financial statements.

Revenue Recognition. We recognize revenue in accordance with the Software Revenue Recognition Topic of FASB's Accounting Standards Codification. We recognize license revenues in connection with license agreements for standard proprietary software upon delivery of the software, provided we deem collection to be probable, the fee is fixed or determinable, there is evidence of an arrangement, and VSOE exists with respect to any undelivered elements of the arrangement. We generally bill maintenance fees annually in advance and recognize the resulting revenues ratably over the term of the maintenance agreement. We derive revenues from services which primarily include consulting, implementation, and training. We bill for these services primarily under time and materials arrangements and recognize fees as we perform the services. Deferred revenues represent advance payments or billings for software licenses, services, and maintenance billed in advance of the time we recognize revenues. We record revenues from sales of third-party products in accordance with Principal Agent Considerations within the Revenue Recognition Topic of the FASB's Accounting Standards Codification. Furthermore, we evaluate sales through our indirect channel on a case-by-case basis to determine whether the transaction should be recorded gross or net, including but not limited to assessing whether or not we 1) act as principal in the transaction, 2) take title to the products, 3) have risks and rewards of ownership, such as the risk of loss for collection, delivery, or returns, and 4) act as an agent or broker with compensation on a commission or fee basis. Accordingly, our sales through the DMI channel are typically recorded on a gross basis.

Table of Contents

Generally, our software products do not require significant modification or customization. Installation of the products is routine and is not essential to their functionality. Our sales frequently include maintenance contracts and professional services with the sale of our software licenses. We have established VSOE for our maintenance contracts and professional services. We determine fair value based upon the prices we charge to customers when we sell these elements separately. We defer maintenance revenues, including those sold with the initial license fee, based on VSOE, and recognize the revenue ratably over the maintenance contract period. We recognize consulting and training service revenues, including those sold with license fees, as we perform the services based on their established VSOE. We determine the amount of revenue we allocate to the licenses sold with services or maintenance using the residual method of accounting. Under the residual method, we allocate the total value of the arrangement first to the undelivered elements based on their VSOE and allocate the remainder to license fees.

Allowance for Doubtful Accounts. We maintain allowances for doubtful accounts for estimated losses resulting from the inability of customers to make required payments. If the financial condition of these customers were to deteriorate, resulting in an impairment of their ability to make payments, we may require additional allowances or we may defer revenue until we determine that collectability is probable. We specifically analyze accounts receivable and historical bad debts, customer creditworthiness, current economic trends and changes in customer payment terms when we evaluate the adequacy of the allowance for doubtful accounts.

Valuation of Long-Lived and Intangible Assets. In accordance with the Intangibles-Goodwill and Other Topic of the FASB's Accounting Standards Codification, we do not amortize goodwill and other intangible assets with indefinite lives. Our goodwill is subject to annual impairment tests, which require us to estimate the fair value of our business compared to the carrying value. The impairment reviews require an analysis of future projections and assumptions about our operating performance. Should such review indicate the assets are impaired, we would record an expense for the impaired assets.

In accordance with the Property, Plant, and Equipment Topic of the FASB's Accounting Standards Codification, long-lived assets, such as property and equipment and intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability would be measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, we recognize an impairment charge in the amount by which the carrying amount of the asset exceeds the fair value of the asset. The determination of estimated future cash flows, however, requires management to make estimates. Future events and changes in circumstances may require us to record a significant impairment charge in the period in which such events or changes occur. Impairment testing requires considerable analysis and judgment in determining results. If other assumptions and estimates were used in our evaluations, the results could differ significantly.

Annual tests or other future events could cause us to conclude that impairment indicators exist and that our goodwill is impaired. For example, if we had reason to believe that our recorded goodwill and intangible assets had become impaired due to decreases in the fair market value of the underlying business, we would have to take a charge to income for that portion of goodwill or intangible assets that we believed was impaired. Any resulting impairment loss could have a material adverse impact on our financial position and results of operations. At January 31, 2016, our goodwill balance was \$18.7 million and our intangible assets with definite lives balance was approximately \$2.1 million, net of accumulated amortization.

Valuation of Capitalized Software Assets. We capitalize certain computer software development costs in accordance with the Intangibles-Goodwill and Other Topic of the FASB's Accounting Standards Codification. Costs incurred internally to create a computer software product or to develop an enhancement to an existing product are charged to expense when incurred as research and development expense until technological feasibility for the respective product

is established. Thereafter, we capitalize all software development costs and report those costs at the lower of unamortized cost or net realizable value. Capitalization ceases when the product or enhancement is available for general release to customers. We make ongoing evaluations of the recoverability of our capitalized software projects by comparing the amount capitalized for each product to the estimated net realizable value of the product. If such evaluations indicate that the unamortized software development costs exceed the net realizable value, we write off the amount by which the unamortized software development costs exceed net realizable value. We amortize capitalized computer software development costs ratably based on the projected revenues associated with the related software or on a straight-line basis over three years, whichever method results in a higher level of amortization. Amortization of capitalized computer software development costs is included in the cost of license revenues in the condensed consolidated statements of operations.

Stock-Based Compensation. We estimate the value of options granted on the date of grant using the Black-Scholes option pricing model. Management's judgments and assumptions related to volatility, the expected term and the forfeiture rate are made in connection with the calculation of stock compensation expense. We periodically review all assumptions used in our stock option pricing model. Changes in these assumptions could have a significant impact on the amount of stock compensation expense.

Income Taxes. We provide for the effect of income taxes on our financial position and results of operations in accordance with the Income Tax Topic of the FASB's Accounting Standards Codification. Under this accounting guidance, income tax expense is recognized for the amount of income taxes payable or refundable for the current year and for the change in net deferred tax assets or liabilities resulting from events that are recorded for financial reporting purposes in a different reporting period than recorded in the

Table of Contents

tax return. Management must make significant assumptions, judgments and estimates to determine our current provision for income taxes and also our deferred tax assets and liabilities and any valuation allowance to be recorded against our net deferred tax asset. Our judgments, assumptions and estimates relative to the current provision for income tax take into account current tax laws, our interpretation of current tax laws, allowable deductions, and projected tax credits. Changes in tax law or our interpretation of tax laws could significantly impact the amounts provided for income taxes in our financial position and results of operations. Our assumptions, judgments and estimates relative to the value of our deferred tax assets take into account our expectations of the amount and category of future taxable income. Actual operating results and the underlying amount and category of income in future years, which could significantly increase tax expense, could render inaccurate our current assumptions, judgments and estimates of recoverable net deferred taxes.

Business Combinations and Intangible Assets Including Goodwill. We account for business combinations using the acquisition method of accounting and accordingly, the identifiable assets acquired and liabilities assumed are recorded based upon management's estimates of current fair values as of the acquisition date. The estimation process includes analyses based on income and market approaches. Goodwill represents the excess purchase price over the fair value of net assets, including the amount assigned to identifiable intangible assets. The goodwill generated is due in part to the synergies that are not included in the fair value of identifiable intangible assets. Goodwill recorded in an acquisition is assigned to applicable reporting units based on expected revenues. Identifiable intangible assets with finite lives are amortized over their useful lives. Amortization of current technology is recorded in Cost of Revenue-License and amortization of all other intangible assets is recorded in Amortization of acquisition-related intangibles. Acquisition-related costs, including advisory, legal, accounting, valuation and other costs, are expensed in general and administrative expenses in the periods in which the costs are incurred. The results of operations of acquired businesses are included in the consolidated financial statements from the acquisition date.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Foreign Currency. In the three and nine months ended January 31, 2016, we generated approximately 19% and 18%, respectively, of our revenues outside the United States. We typically make international sales through our foreign subsidiaries or our Logility subsidiary and denominate those sales typically in U.S. Dollars, British Pounds Sterling or Euros. However, expenses incurred in connection with these sales are typically denominated in the local currencies. We recorded exchange rate losses of approximately \$128,000 and \$303,000 for the three and nine months ended January 31, 2016, respectively, compared to exchange rate losses of approximately \$262,000 and \$455,000 for the three and nine months ended January 31, 2015. We estimate that a 10% movement in foreign currency rates would have had the effect of creating up to a \$346,000 exchange gain or loss for the nine months ended January 31, 2016. We have not engaged in any hedging activities.

Interest Rates and Other Market Risks. We have no debt, and therefore limit our discussion of interest rate risk to risk associated with our investment profile. We manage our interest rate risk by maintaining an investment portfolio of trading investments with high credit quality and relatively short average maturities. These instruments include, but are not limited to, money-market instruments, bank time deposits, and taxable and tax-advantaged variable rate and fixed rate obligations of corporations, municipalities, and national, state, and local government agencies, in accordance with an investment policy approved by our Board of Directors. These instruments are denominated in U.S. Dollars. The fair market value of these instruments as of January 31, 2016 was approximately \$71.6 million compared to \$69.0 million as of January 31, 2015.

We also hold cash balances in accounts with commercial banks in the United States and foreign countries. These cash balances represent operating balances only and are invested in short-term time deposits of the local bank. Such

operating cash balances held at banks outside the United States are denominated in the local currency and are minor.

Many of our investments carry a degree of interest rate risk. When interest rates fall, our income from investments in variable-rate securities declines. When interest rates rise, the fair market value of our investments in fixed-rate securities declines. In addition, our investments in equity securities are subject to stock market volatility. Due in part to these factors, our future investment income may fall short of expectations or we may suffer losses in principal if forced to sell securities, which have seen a decline in market value due to changes in interest rates. We attempt to mitigate risk by holding fixed-rate securities to maturity, but, if our liquidity needs force us to sell fixed-rate securities prior to maturity, we may experience a loss of principal.

Inflation. Although we cannot accurately determine the amounts attributable thereto, we have been affected by inflation through increased costs of employee compensation and other operational expenses. To the extent permitted by the marketplace for our products and services, we attempt to recover increases in costs by periodically increasing prices.

**Item 4. Controls and Procedures
Management's Report on Internal Control Over Financial Reporting**

As of the end of the period covered by this report, our management evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) under the supervision and with the participation of our chief executive officer and chief financial officer. Based on and as of the date of such evaluation, the aforementioned officers have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

Our chief executive officer and chief financial officer, with the assistance of our Disclosure Committee, have conducted an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this quarterly report. We perform this evaluation on a quarterly basis so that the conclusions concerning the effectiveness of our disclosure controls and procedures can be reported in our Annual Report on Form 10-K and quarterly reports on Form 10-Q. Based on this evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report.

Changes in Internal Control over Financial Reporting

There have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

We are not currently involved in legal proceedings requiring disclosure under this item.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the risk factors disclosed in Item 1A, Risk Factors, of our Annual Report on Form 10-K for the fiscal year ended April 30, 2015. There have been no material changes to the risk factors as previously disclosed in such Annual Report on Form 10-K,

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not applicable

(b) Not applicable

(c) The following table summarizes repurchases of our stock in the three months ended January 31, 2016:

Fiscal Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs*
November 1, 2015 through November 30, 2015		\$		958,787
December 1, 2015 through December 31, 2015				958,787
January 1, 2016 through January 31, 2016				958,787
Total Fiscal 2016 Third Quarter		\$		958,787

* Our Board of Directors approved the above share purchase authority on August 19, 2002, when the Board approved a resolution authorizing us to repurchase up to 2.0 million shares of Class A common stock. This action was announced on August 22, 2002. The authorization has no expiration date.
