Annex 3 (A) I

Financial Condition of the Company

(Section 10 of the Reference Form)

10.1 General financial and equity conditions

Introduction

The following comments should be considered together with our individual and consolidated financial statements for the year ended December 31, 2018, issued on February 20, 2019, including Notes to the financial statements, as well as other financial information contained herein.

In the consolidated financial statements of Companhia Brasileira de Distribuição (“GPA” or “Company”) of December 31, 2018, due to the ongoing divestment of the interest held by GPA in Via Varejo S.A., the operations of Via Varejo are being treated as discontinued operations. Accordingly, net sales and other income/expense lines were adjusted retrospectively from January 1, 2016, as defined in CPC31, approved by CVM Resolution 598/09 - Sale of non-current assets and discontinued operations, equivalent to IFRS 5. Consequently, the following comments do not include the performance of Via Varejo.

(a) *general financial and equity conditions*

The year 2018 brought excellent results for GPA, with important market share gains and consistent results for the businesses of the Group. The accelerated store expansion at Assaí in recent years drove strong sales and substantial net income growth. Multivarejo registered a

sequential improvement in sales, accompanied by higher profitability. Our multi-channel, multi-format and multi-region portfolio, combined with the optimization of our store portfolio through conversions, renovations and new concepts, has ensured a better offering of products and services for our customers, further empowering their power of choice. The Company also advanced in the digital transformation of our businesses, reinforcing GPA's pioneering role in fronts such as food e-commerce and loyalty programs, which ensure greater efficiency in our search for new revenue streams.

In 2018:

- Gross sales came to R\$ 53.6 billion, increasing 10.7% compared to 2017, with market share gains in Multivarejo and Assaí.
- EBITDA adjusted by "Other Operating Income and Expenses" and excluding non-recurring effects came to R\$ 2.801 billion, improving 27.8% from 2017. At GPA Food, EBITDA was R\$ 2.846 billion, advancing 22.3% on 2017, with margin of 5.8% (vs. 5.2% in 2017), due to:
 - ü Multivarejo: Adjusted EBITDA was R\$ 1.467 billion with margin of 5.5% in 2018, expanding 50 bps compared to 2017, basically due to the reduction in personnel expenses as a result of the operational efficiency program and the labor reform, as well as strict control over general expenses;
 - ü Assaí: Adjusted EBITDA grew 34.1% to R\$ 1.379 billion, with margin of 6.0% (+40 bps from 2017), above the guidance for 2018, due to the quicker maturation of the stores opened in recent years.
- The financial result was negative at R\$ 474 million, accounting for 1.0% of net revenue, advancing 60 bps from the previous year;
- Consolidated net income attributable to controlling shareholders was R\$ 1.2 billion, increasing 106% from 2017, with margin of 2.4%. Net income attributable to the controlling shareholders of GPA Food was R\$ 1.3 billion, while net margin doubled to 2.6% (vs. 1.3% in 2017).
- Solid financial structure due to the low leverage maintained, which reached -0.32 times EBITDA;
- Shareholders' equity amounted to R\$ 13.939 billion, increasing R\$ 897 million. For more information, see item 10.1.h.

Early redemption is allowed only in accordance with the terms of the indenture.

(c) *ability to pay financial commitments*

The Management believes that the cash flow and the funds currently available fully ensure the GPA to pay all its short- and long-term financial commitments.

(d) *sources of financing for working capital and investments in non-current assets utilized by GPA*

The Company raised funds in 2018, 2017 and 2016 through: (A) financial agreements that represent: (i) Brazilian reais denominated loans with obligation to payment principal and DI (interbank deposit)-pegged interest rates; (ii) foreign currency-denominated loans, which are immediately and fully “swapped,” with Brazilian reais denominated payment obligations with DI-pegged interest rates, through swap operations; and (B) funding on capital markets, through the issue of debentures, promissory notes and agribusiness receivables certificates; (C) cash generation through its operations; and (D) anticipation of receivables.

In 2018, 2017 and 2016, we had no difficulties in obtaining loans or refinancing its current debt.

(e) *sources of financing for working capital and investments in non-current assets that GPA plans to utilize to cover liquidity deficiencies*

In the opinion of the management, the funding sources used in the fiscal years ended December 31, 2018, 2017 and 2016 are adequate, and will continue to be used by GPA as sources of financing, if necessary.

Finance Lease Obligations

Finance lease agreements, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are allocated between finance charges and reduction of lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized in the income statement. The leased assets are depreciated over their useful lives. However, if there is no reasonable certainty that the Company and its subsidiaries will obtain title at the end of the lease term, the asset is depreciated over its estimated useful life or lease term, whichever is lower. The capitalization of improvements and reforms made in stores is also considered.

The total amount recorded from lease agreements classified as financial lease are listed below:

Currently, GPA has no relevant long-term relations with financial institutions referring to the fiscal years ended December 31, 2018, 2017 and 2016, in addition to those already described in item 10.1 (f) of this Reference Form.

iii. *Level of subordination in Company's debt*

The Management informs that the level of subordination in GPA's debt is determined in accordance with the provisions set forth by the legislation in force.

iv. *Possible restrictions imposed on indebtedness limits and new debt contracting, the distribution of dividends, the sale of assets, the issue of new securities and the sale of controlling interest, as well as if the issuer has complied with these restrictions*

Debentures

GPA issues debentures to strengthen its working capital, maintain its cash strategy, lengthen its debt profile and finance investments. The debentures issued are not convertible into shares, are subject to the rollover clause and hold no guarantee.

These debentures are amortized upon payment exclusively on maturity with semiannual interest payments (13th, 14th, 15th and 16th issues of CBD). The 13th and 14th issues give debentureholders the right to early redemption at any time, the 15th issue as from December 15, 2018, and the 16th issue as from December 10, 2018, both in accordance with the conditions established in the indenture.

(g) *limits of the financing already contracted, percentages already used*

Though the Company does not have any fixed financing agreement contracted, on December 31, 2018, it had loan agreements amounting to R\$ 1.800 billion.

As mentioned in the financial statements disclosed by the Company in 2018, the agreements were entered into as per market practices and are valid through 2020.

(h) *relevant changes in each item of the financial statements*

There are no items that significantly altered the financial statements for 2016, 2017 and 2018, except for the effects of applying CPC 31 / IFRS 5 - Non-current assets held for sale and discontinued operation, CPC 47 / IFRS 15 – Revenue from contracts with clients, and CPC 48 / IFRS 9 – Financial Instruments.

In 2018, the Company actively worked to sell Via Varejo to potential strategic investors, but the sale was not concluded until December 31, 2018 due to external factors beyond the Company's control, which include the macroeconomic scenario. The Board of Directors broadened the alternatives of sale by determining that it should be concluded by December 31, 2019, including the possibility of selling a stake through stock market operations. In November 2018, the process of migrating the Via Varejo shares to the Novo Mercado segment of B3 was completed. In this new context, at the same meeting, the Board of Directors authorized the sale of 50,000,000 common shares of Via Varejo, corresponding to 3.86% of its capital, through a Total Return Swap (TRS) transaction with a top tier financial institution (note 17.10 of Individual and Consolidated Financial Statements for the Year Ended December 31, 2018 and Independent Auditor's Report), by which the shares were sold in daily transactions carried out by the bank. The operation does not entail any change in the control or administrative structure of Via Varejo, The agreement will expire on April 30, 2019. As such, since the sale of the Company's investment in Via Varejo in 2019 is highly probable, the operations of the subsidiary will be presented as discontinued operations, as required by CPC 31 – Non-current assets held for sale and discontinued operations (IFRS 5). The disclosure of the net income of Via Varejo is included in a single line in the income statement, after taxes and the balances of assets and liabilities as held for sale and discontinued operations.

The effect of assets and liabilities available held for sale on December 31, 2018 was R\$ 24.443 billion (R\$ 22.775 billion on December 31, 2017) and R\$ 19.412 billion (R\$ 17.824 billion on December 31, 2017), respectively. The effect of the result from discontinued operations was a loss of R\$ 74 million on December 31, 2018 (gain of R\$ 356 million on December 31, 2017).

The Company adopted retroactively CPC 47 / IFRS 15 Revenue from Contracts with Customers and CPC 48 / IFRS 9 Financial Instruments as of January 1, 2016, with impacts on the statements of income for the fiscal years ended December 31, 2016 and 2017, balance sheets, statements of cash flow and statement of value added. The effects on December 31, 2017 are R\$ 54 million in net income and R\$ 250 in shareholders' equity, and on December 31, 2016, R\$ 69 million in net income and R\$ 180 in shareholders' equity. In addition to a reclassification for purposes of CPC 47 increasing the cost of goods sold and reducing sales and administrative expenses by R\$ 285 million in 2017 and R\$ 279 million in 2016.

(*) Excluding non-recurring effects. In 4Q18, these effects were R\$145 million at Assaí comprising R\$78 million in credits related entirely to 9M18 (therefore non-recurring in the quarter and recurring in the year) and R\$67 million in credits from periods prior to 2018 (non-recurring in the quarter and in the year), which complements the amounts already recorded. In 4Q17, these effects came to R\$350 million, of which R\$114 million was at Assaí, composed of credits fully related to 9M17 (therefore non-recurring in the quarter and recurring in the year), and R\$236 million at Multivarejo, with R\$246 million related to tax credits from prior years and -R\$10 million related to the impact from inventory write-offs and deductibles related to the fire at the Distribution Center in Osasco in December 2017.

Net sales

GPA's net sales exclusively from continuing operations increased 10.7% in 2018, from R\$ 44.634 billion in 2017 to R\$ 49.388 billion in 2018. These sales were generated by GPA Food operations, which consist of Multivarejo and Assaí.

ü Assaí: the banner contributed significantly, with growth of 24.2% in 2018, leveraged by the expansion plan, totaling 18 openings (16 inaugurations and 2 store conversions).

ü Multivarejo: net sales increased 1.1% from 2017, driven by (i) the successful initiatives that brought more dynamism and business creativity, (ii) the evolution in the positioning of the banners and (iii) greater penetration of loyalty tools and personalization of "My Discount" and "My Rewards."

Gross Profit

In 2018, gross profit totaled R\$11.554 billion. Excluding non-recurring effects, it came to R\$11.073 billion, increasing R\$ 787 million (or 7.6%) from December 31, 2017. Gross margin, excluding non-recurring effects, reached 22.4%, 60 bps lower than in 2017. The highlights by business were:

ü Multivarejo: Gross profit, excluding non-recurring effects, came to R\$ 7.3 billion, practically in line with 2017, with gross margin of 27.7% (vs. 28.0% in 2017), reflecting the level of proper competitiveness of the banners, which resulted in the resumption of revenue growth and market share gains.

ü Assaí: Gross profit excluding non-recurring effects came to R\$ 3.7 billion, with margin of 16.3%. The 30 bps increase from 2017 reflects the maturation of the stores resulting from the expansion in recent years, as well as the return of food inflation.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased from R\$ 8.059 billion in 2017 to R\$

8.354 billion in 2018, or 3.7%, significantly lower than the growth in net sales. As a ratio of net sales, these expenses had a greater dilution, decreasing from 18.1% in 2017 to 16.9% in 2018. The highlights by business were:

Multivarejo: Operating expenses were R\$ 6.0 billion, down 2.2% from 2017, despite the acceleration of inflation over the year. This reduction was driven mainly by the decrease in personnel expenses, reflecting the operational efficiency program and the labor reforms, as well as strict control of general expenses.

Assaí: Selling, general and administrative expenses as a ratio of revenue came to 10.3%, decreasing 20 bps from 2017, reflecting the faster maturation of stores opened in recent years.

Other Operating Income (Expenses)

In 2018, Other Operating Income and Expenses decreased substantially by 62.7% (or R\$ 363 million), for a net expense of R\$ 216 million, composed of: (i) tax contingencies related to litigations from prior periods, corresponding to R\$ 181 million; (ii) expenses with integration and restructuring, including personnel and other costs related to the closures and conversions of stores / DCs, in the amount of R\$ 147 million, and (iii) profit from divestment and

Edgar Filing: BRAZILIAN DISTRIBUTION CO COMPANHIA BRASILEIRA DE DISTR CBD - Form 6-K
write-off of property and equipment, in the amount of R\$ 112 million.

Depreciation and Amortization

In 2018, depreciation and amortization amounted to R\$ 840 million, up 7.8% from R\$ 779 million in 2017. This increase was mainly due to depreciation and amortization of the new investments made in 2018.

Net Financial Result

In 2018, the Company's financial result was an expense of R\$ 474 million, or 1.0% of net sales, improving 60 bps from 2017. This reduction is mainly explained by the lower interest rate in the period (average CDI rate fell from 9.93% in 2017 to 6.5% in 2018), as well as the reduction in the adjustments of contingencies and other financial expenses.

Net Income (Loss)

Net income attributable to controlling shareholders, considering continuing and discontinued operations, totaled R\$1.193 billion in 2018, an increase of 105.7% from 2017. Considering the food segment, net income attributable to the controlling shareholders was R\$ 1.3 billion, while net margin doubled to 2.6% (vs. 1.3% in 2017). Multivarejo registered solid growth in net income, which reached R\$ 218 million. Assaí practically doubled its annual net income, which reached R\$ 1.1 billion.

Comments on variations between December 31, 2017 and December 31, 2016

Net sales

In 2017, GPA's consolidated net sales exclusively from continuing operations increased 7.7%, from R\$ 41.454 billion in 2016 to R\$ 44.634 billion in 2017. These sales were generated by GPA Food operations, which consist of Multivarejo and Assaí.

ü Assaí: the banner contributed significantly, with growth of 27.3% in 2017, leveraged by the expansion plan, totaling 20 openings (15 store conversions and 5 inaugurations).

ü Multivarejo: net sales decreased 2.9% from 2017, impacted by sharp deflation in the period, in addition to the closing of 17 hypermarkets since the beginning of the year, 15 of which were converted into Assaí. This optimization of the store portfolio resulted in a contraction in Multivarejo's sales area of approximately 5%.

Gross Profit

In 2017, gross profit totaled R\$ 10.988 billion, up R\$ 1.188 billion or 12.1% from December 31, 2016. Gross margin reached 24.6%, increasing 100 bps from 2016. In 2017, non-recurring effects totaled R\$ 703 million. Adjusted for these effects, gross profit in 2017 totaled R\$10.285 billion, with margin of 21.23%.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased from R\$ 7.729 billion in 2016 to R\$

Net Income (Loss)

8.059 billion in 2017, or 4.3%, lagging the growth in net sales. As a ratio of net revenue, dilution increased from 18.6% in 2016 to 18.1% in 2017, despite the sharp food deflation that affected net sales, while the other components of expenses continued to be impacted by inflation.

Other Operating Income (Expenses)

In 2017, other Operating Income and Expenses came to an expense of R\$ 579 million, up 2.1% from 2016, and were mainly related to the write-off of property and equipment due to: (i) closure of stores and conversion of Extra Hiper stores into Assaí; (ii) write-off of fixed assets related to the Distribution Center in Osasco due to the fire; and (iii) restructuring expenses due to measures adopted by the Company to adjust its structure of expenses, comprising all operating and administrative areas.

Depreciation and Amortization

Depreciation and amortization amounted to R\$ 779 million in 2017, up 10.2% from R\$ 707 million in 2016. This increase was mainly due to depreciation and amortization of the new investments made in 2017.

Net Financial Result

In 2017, the net financial result was an expense of R\$ 730 million, down 19.2% from 2016. The ratio of net financial result to net revenue decreased from 2.2% in 2016 to 1.6% in 2017, or 60 bps, chiefly due to the lower cost of gross debt by around R\$ 200 million on the decline in the average CDI rate from 14.0% in 2016 to 9.93% in 2017. In general, all the components of the financial result remained stable as a percentage of net sales compared to the same period the previous year.

Net Income (Loss)

Net income attributable to controlling shareholders, considering continuing and discontinued operations, came to R\$ 580 million in 2017 reversing the net loss of R\$ 533 million in 2016.

Assets

Current

Cash and cash equivalents

In 2018, cash and cash equivalents totaled R\$ 4.369 billion, up R\$ 577 billion from 2017, mainly due to lower disbursement for financing activities in 2018 compared to 2017. On December 31, 2018, cash and cash equivalents corresponded to 8.3% of total assets, compared to 7.9% on December 31, 2017.

Trade receivables

On December 31, 2018, the balance of trade receivables totaled R\$ 384 million, down R\$ 234 million from the balance in 2017. This reduction is mainly due to the higher volume of sale of receivables, reflecting the Company's cash management strategy.

Taxes recoverable

On December 31, 2018, the balance of short-term recoverable taxes increased 13.9%, from R\$ 596 million in 2017 to R\$ 679 million. The increase of R\$ 83 million, combined with the increase of R\$ 998 million in long-term recoverable taxes, resulted in an increase of R\$ 1.081

billion. This increase is mainly related to untimely ICMS-ST tax credits of R\$ 436 million related to previous periods at Assaí, and the new level of recurring credits.

Prepaid expenses and other accounts receivable

On December 31, 2018, prepaid expenses and other accounts receivable increased 25.9%, from R\$ 413 million in 2017 to R\$520 million, up R\$ 107 million, mainly due to accounts receivable from insurers, which were offset by other less significant effects.

Inventories

In 2018, inventories increased 22.5% (or R\$1.087 billion), from R\$ 4.822 billion in 2017 to R\$ 5.909 billion, mainly due to the increase in inventories at Assaí to sustain the strong sales growth. On December 31, 2018, inventories corresponded to 11.2% of total assets, compared to 10.1% on December 31, 2017.

Noncurrent

Noncurrent assets, excluding property and equipment, intangible assets and investments, increased from R\$3.452 billion in 2017 to R\$ 3.997 billion in 2018. In 2018, the Company acquired control of two entities: James Delivery, a delivery company, and Cheftime, which supplies gastronomic kits. The net assets of these companies (amounting to around R\$ 1.00) and the considerations for the acquisition were measured on a preliminary basis and will be completed in 2019.

(c) *unusual events or operations*

(i) Ongoing transaction for divestment of the subsidiary Via Varejo

On November 23, 2016, the Board of Directors approved the divestment of the Company's interest in Via Varejo S.A. ("Via Varejo"), in line with its long-term strategy of focusing on the development of the food sector.

In 2018, the Company actively worked to sell Via Varejo to potential strategic investors, but the sale was not concluded until December 31, 2018 due to certain external factors beyond the Company's control, which includes the macroeconomic scenario. The Board of Directors expanded the alternatives for sale by determining that it should be concluded by December 31, 2019, including the possibility of selling a stake through transactions in the stock market.

In November 2018, the migration of Via Varejo to B3's Novo Mercado segment was concluded.

In this new context, at the same meeting, the Board of Directors authorized the sale of 50,000,000 common shares of Via Varejo, corresponding to 3.86% of its capital, through a Total Return Swap (TRS) with a top tier financial institution (note 17.10 of the Financial Statements), through which such shares were sold in daily transactions carried out by the bank. This agreement was settled at the end of February 2019.

The Board of Directors approved, on February 20, 2019, the execution of a new TRS agreement, authorizing the sale of forty million (40,000,000) common shares of Via Varejo held by the Company, corresponding to 3.09% of Via Varejo's capital.

The TRS agreements do not entail any change in the control or administrative structure of Via Varejo.

Therefore, since the divestment of Via Varejo in 2019 is highly probable, the subsidiary's operations will be presented as discontinued operations, as required under CPC 31 – Non-current assets held for sale and discontinued operations (IFRS 5). The disclosure of net income or loss of Via Varejo after taxes is presented in a single line in the income statement and the balances of assets and liabilities as held for sale and discontinued operations.

10.4 Significant changes in accounting practices – reservations and emphases in the auditor's opinion

(a) *significant changes in accounting practices*

GPA prepared its consolidated financial statements pursuant to all pronouncements issued by the Brazilian Accounting Pronouncements Committee (CPC) and IFRS, being the financial

statements as of December 31, 2010 the very first financial statements prepared according to the rules mentioned herein.

In the fiscal years ended December 31, 2018, 2017 and 2016, there were no significant changes in the accounting practices adopted by GPA, except for the retrospective adoption of CPC 47 and CPC 48 (notes 5.1 to the financial statements of December 31, 2018 and item 10.1 of this Reference Form).

IFRS 16/ CPC 06 (R2) – Lease transactions – Application estimated for 1/1/2019

IFRS 16 “Leases”, which replaces IAS 17 “Leases” and the related interpretations from January 1st, 2019, eliminates the distinction between operating leases and finance leases; it requires recognition of an asset (the right to use the leased item) and of a financial liability representative of discounted future payments rentals for virtually all lease contracts. Operating lease expense is replaced with depreciation expense related to the right of use and interest expense related to the lease liability. Previously, the Company recognized mainly operating lease expense on a straight-line basis over the term of the lease and recognized assets and liabilities only to the extent that there was a timing difference between actual lease payments and the period of competence of the rent expense. Thus, performance indicators such as EBITDA and to a lesser extent current operating income will be positively impacted; conversely, the financial result will be negatively impacted. At last, consolidated net profit will also be affected because the total rental expense is generally higher at the beginning of the lease and decreases over time, unlike a straight-line charge under the current standard. Additionally, net cash from operating activities will be higher as cash payments for the principal portion of the lease liability and the related interest will be classified as cash flows from financing activities.

The Company mainly holds property leases of real estate contracts representing a minimum annual rent expense non-cancelable of R\$937 million out of a total of R\$982 million for the 2018 year-end. Adoption of the standard IFRS 16 will primarily impact the recognition of operating leases for the Company's stores and warehouses, particularly those associated with its Retail operations.

In 2018, the Company continued to collect and analyze the data required for the application of IFRS 16 as at January 1st, 2019. The Company is implementing computer software to ensure the fully integrated operational and financial monitoring of these leases. The implementation of the software will be finalized in the first quarter of 2019.

The Company decided to adopt the full retrospective approach as a transition method on January 1, 2019, and prospectively from the start of the earliest practicable period. As a result, the comparative periods will be restated.

The Company has chosen to apply the two recognition exemptions proposed by the standard on the following contracts:

- Leases of short-term property;
- Leases of property relating to low value assets.

Rents not included in the initial valuation of the liability (for example, variable rents) are classified as operating expenses, as are charges related to short-term and low-value leases.

The lease term will be the legally enforceable period of the contract and will take into account the options for termination and renewal, the use of which by the Company is reasonably certain.

The discount rate used to calculate the right of use and the lease liability will be determined using some historical data directly attributable to the Company and/or directly observable from the market, such as:

- The historical borrowing rate from the Company on comparable acquisition of assets, and Company's indebtedness.
-

- The future risk-free curve by maturity.

The estimated impact on the opening balance sheet as of January 1, 2019 would lead to:

- An increase in assets (mainly via the recognition of a right of use) of R\$3.6 billion,
- The recognition of a lease financial liability of R\$4.8 billion,
- An increase in the deferred tax asset of R\$0.3 billion,
- A decrease in equity (net of tax) of R\$ 0.8 billion.

The impact on the restatement of the 2018 result would lead to:

- A reversal of lease expenses of R\$1 billion,
- Recognize the amortization expense of the right to use of R\$0.5 billion,
- Recognize the interest expense of R\$0.6 billion,
- Recognize the net income of R\$0.1 billion.

The Company opted to disclose the right of use and the financial liability for lease in separated lines in the balance sheet.

Given the complexity of this new pronouncement, certain issues are still being discussed in the market. Accordingly, the amounts presented above may change until their initial adoption in the first quarter of 2019, since the Company's estimates may be impacted if certain assumptions are altered in discussions of market adoption.

On December 31, 2018, the Company presented an off-balance sheet commitment in respect of the expected minimum lease payments on real estate and equipment leases of R\$411 in accordance with IAS 17 (note 22), which mainly corresponded to real estate, such as stores and warehouses used as a tenant in its activities. The difference between the off-balance sheet commitment and the estimated IFRS 16 rental debt on real estate is mainly due to:

- amendment of minimum cancelable criterion under CPC 06 (R1), to be reasonably certain under CPC 06 (R2).
- calculation of the present value of rental flows at the end of CPC 06 (R2) compared to the nominal flows of CPC 06 (R1).

Given the lack of a regulatory position for the moment on the methods for applying impairment tests, the Company has not performed any new impairment tests taking into account the effects of IFRS 16.

(b) *significant effects of changes in accounting practices*

Not applicable.

(c) *reservations and emphasis in the independent auditor's report*

There were no reservations in the report issued by Company's independent auditor on the financial statements for the fiscal years ended December 31, 2018, 2017 and 2016.

10.5 Critical accounting policies

Judgments, estimates and assumptions

The preparation of GPA's individual and consolidated financial statements requires that the Management makes judgments and estimates and adopts assumptions that affect the amounts stated of revenues, expenses, assets and liabilities and disclosure of contingent liabilities at year- end, however, uncertainties relating to these assumptions and estimates may produce results that require substantial adjustments to the accounted amount of the asset or liability in future

periods. In the process of applying GPA's accounting policies, Management has adopted the following judgments, which have the most significant effect on the amounts recognized in the individual and consolidated financial statements:

1) Impairment

According to the method disclosed in note 4.9 of the financial statements, the Company performed test to verify that the assets might not be recoverable and the year ended December 31, 2018, based on those tests, there was no need to recognize any loss.

a) Impairment test of operating assets of stores

The procedure for verification of non-recoverability of property and equipment consisted in allocating operating assets and intangible assets (such as Commercial rights) directly attributable to the stores. The steps of the test were as follows:

- Step 1: compared the carrying amount in properties of leased stores with a multiple of sale (30% to 35%), representing transactions between retail companies. For stores with multiple valued below the carrying amount, the Company applied a more detailed method, described in Step 2.
- Step 2: the Company consider the highest value among discounted cash flows using sales growth per store, averaging 4.1% (3.4% in 2017) for the next five years and discount rate of 10.1% (9.9% in 2017) or valuation reports prepared by independent experts for own stores.

b) Impairment test of defined-life intangible assets

For the purposes of impairment testing, the goodwill and brands acquired through business combinations and licenses with indefinite duration was allocated to CGUs which are also operating segments that report information. The segments are: retail, cash and carry and e-commerce, with the latter two held for sale (Note 32).

The recoverable value of segments is calculated based on the value in use from cash projections deriving from financial budgets approved by Top Management for the next three years. The discount rate applied to cash flow projections is 10.1%, and cash flows exceeding the five-year period are extrapolated applying a growth rate of 5.5% for retail and wholesale (5.5% as on December 31, 2017). As a result of this analysis, GPA did not identify the need for recording provision for asset impairment.

The cash and carry wholesale brand refers to “ASSAÍ”, electronics and home appliance brands refer to “PONTO FRIO” and “CASAS BAHIA”. These brands were recorded upon the business combinations carried out with companies holding rights over them.

Via Varejo’s total consolidated net assets including Cnova Brasil, were valued as described in Note 32.

2) Income taxes

Given the nature and complexity of the Group’s business, the differences between actual results and assumptions, or future changes to such assumptions, could result in future adjustments to already recorded tax revenue and expenses. GPA and its subsidiaries record provisions, based on reasonable estimates, for any taxes due. The amount of these provisions is based on various factors, such as previous tax audits and different interpretations of tax regulations by the

taxpayer and the appropriate tax authority. Such differences in interpretation may refer to a wide range of issues, depending on the conditions prevailing in the respective entity's domicile.

Deferred income and social contribution tax assets are recognized for all unused tax losses to the extent that it is probable that taxable income will be available and tax credits can be offset. Significant Management judgment is required to determine the amount of deferred income and social contribution tax assets that can be recognized, based on income estimates and future taxable income, according to the strategic planning approved by the Board of Directors.

Company writes-off the potential deferred income tax and social contribution credits when fulfillment of the benefits cannot be justified. These losses do not expire; although their use is limited by law to 30% of taxable income for each year. The amounts relate to the Company and its subsidiaries that have tax planning opportunities for the use of these balances. Further details on taxes are disclosed in Note 20.

3) Fair value of derivatives and other financial instruments

When the fair value of financial assets and liabilities recorded in the financial statements cannot be obtained in active markets, it is determined according to the hierarchy set by technical pronouncement CPC 46 (IFRS 13), which establishes certain valuation techniques, including the discounted cash flow model. The data for these models are obtained, whenever possible, from observable markets or from information on comparable operations and transactions in the market. The judgments include the analyses of data, such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors may affect the reported fair value of financial instruments.

The fair value of financial instruments actively traded on organized markets is determined based on market quotes and at the end of the reporting periods.

For financial instruments not actively traded, the fair value is based on valuation techniques defined by GPA and compatible with usual market practices. These techniques include the use of recent market arm's length transactions, the benchmarking of the fair value of similar financial instruments, the analysis of discounted cash flows or other valuation models.

4) Share-based Payment

GPA measures the costs of transactions with employees eligible to share-based remuneration based on the fair value of the equity instruments on the grant date. Estimating the fair value of share-based payment transactions requires determining the most appropriate valuation model, which depends on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs for the valuation model, including the expected useful life of the stock options, volatility and dividend yield, as well as making assumptions about them. The assumptions and models used to estimate the fair value of share-based payment transactions are disclosed in note 24.5.

5) Provision for lawsuits

GPA and its subsidiaries are parties to several judicial and administrative proceedings (note 21), and provisions for legal claims are recognized for all cases representing reasonably estimated probable losses. The assessment of the likelihood of loss takes into account available evidence, the hierarchy of laws, former court decisions and their legal significance, the historical occurrence and amounts involved, and the opinion of external counsels.

6) Estimated losses from doubtful accounts

The subsidiary Via Varejo calculates the estimated losses on the consumer financing (CDCI) portfolio using the credit analysis performed at the time of sale, as well as the subsequent portfolio maturity changes, from 60 days. Variations in unemployment are also observed in this estimate.

7) Recoverable taxes

The Company and its subsidiaries have tax recoverable mainly related to ICMS, ICMS from Tax Substitution - ST, PIS and COFINS. The utilization of its taxes is made based on the projections prepared by Management, operational issues and the consumption of the credits by the companies in the group. Further details on credits and compensation, see note 11.

8) Inventories

Inventories are measured by the lowest between the acquisition cost and its amount realizable, calculated by the average cost. The realizable net amount is calculated by the average sales price, deducted from: (i) taxes over sales, (ii) personnel expenses directly related to inventories,

(iii) purchase cost, and (iv) other costs necessary to bring the product in condition of sales. Inventories are reduced to its realizable value though the estimations of shrinkage, scrap, slow moving and obsolescence and estimation of merchandise that will be sold with negative gross margin, including for products displayed in the stores.

The payment of the dividend set forth by the previous paragraph may be limited to the net profit amount for the fiscal year that has been ascertained pursuant to the law, provided that such difference is recorded as a reserve of unrealized profits.

Profits recorded in the unrealized profits reserve, when realized and if they have not been absorbed by losses in subsequent years, shall be added to the first dividend stated after such profit realization.

i. description of the compensation elements and each one's purposes

The members of our Board of Directors and committees, including the external members, as well as the members of the Fiscal Council receive a fixed monthly compensation, dissociated from the actual participation in meetings. This form of compensation is aligned with the general market practices and to the Company's interests. The Stock Option Plans and stock-based compensation described in item 13.4 of the *Formulário de Referência* may be extended to the members of the Board of Directors of the Company. Exceptionally, in the year of 2016, due to

two specific extraordinary events, there was a bonus payment to certain members of our Board of Directors and committees of the Company.

a) certain members of the Board of Directors established the Special Independent Committee, created pursuant to the Company’s Related Parties Transaction Policy (whose principles reflect on general guidance from the Orientation Opinion No. 35 of this CVM), with the purpose to analyze the project for potential integration of e- commerce business developed by Cnova Comércio Eletrônico S.A., which is a subsidiary of Cnova N.V., corporation controlled by the Company, for the business developed by Via Varejo, the integration occurred in October, 2016; and

b) members of the Audit Committee acted on and followed up the external investigation procedure that was conducted at Cnova Comércio Eletrônico S.A., which resulted in the restatement of the ITR of the first quarter of 2016, as broadly disclosed through Material Fact of July 26, 2016.

Our Officers’ compensation is comprised by the following elements: (i) fixed compensation as a Base Salary, with the purpose to maintain the balance with the general market practices; (ii) profit sharing, with the purpose to encourage professionals to seek Company’s success, who benefits from these results; and (iii) a Stock Option Plan and a Compensation Plan based on stock options, which comprise an incentive to executives to ensure a long-term sustainable business.

The Officers also receive a benefit package aligned with the market practices, including a medical care plan, a dental expenses reimbursement plan, bi-annual medical check-up, private pension plan, food voucher, fuel voucher and parking at the workplace. Compensation policy for members of the Company’s management allows such benefits to be extended to the members of the Board of Directors.

iii. methodology of calculation and adjustment of each element of the compensation

In order to establish the compensation of executives the Company often performs market researches, in a way to assess if the criteria and conditions that it has adopted to establish the compensation are satisfactory and if they allow the retention of its professionals, as well as to analyze the need to propose adjustments in any compensation element that may be misaligned. Such researches are annually performed by a well-known expert advisory firm hired by us, and they are based on the average value practiced in the main business groups in the country.

After the conclusion of the research, the consulting firm suggests compensation parameters and strategies, which are sent to the area responsible for establishing the compensation structure for management and key personnel, including non-statutory officers and holders of other strategic positions that do not make up statutory management.

The Company has an area dedicated to compensation-related issues, which evaluates structures and recommends the best practices. These recommendations are submitted to the Human Resources and Compensation Committee, which submits and deliberates on topics related to compensation of the Statutory and Non-statutory Board of Executive Officers.

After the compensation structure is approved by the Human Resources and Compensation Committee, the Board of Directors prepares the Management Proposal and submits it to shareholders to discuss and vote on the overall management compensation, always for each body.

The variable compensation of executive officers is mainly based on the concept of profit-sharing through the achievement and surpassing of targets. The calculation is based on indicators aligned with the Company's strategic plan, defined based on the business plan and on the results to be achieved by the Company, such as Revenue, EBITDA, Expenses and Net Income, as mentioned in item 13.1.c. Variable compensation is, therefore, linked to the performance of the Company and the manager.

For more information on our Stock Option Plans and our stock-based compensation, see item 13.4 below.

iv. reasons that justify compensation composition

The grounds of Company's compensation policy composition is focus on results, which depends on the continuous pursuit of the best talents, competent, skilled, dedicated and valuable professionals for our Company.

When analyzing the total compensation amount of a member of the Board of Executive Officers it is necessary to point out that the Company approves the compensation policy in a form to ensure that the amount perceived by the members of the Board of Directors is aligned with the companies to which we compare ourselves (largest economic groups in Brazil) and, equivalent to the total compensation of the 10% best payers in Brazil, according to the result of the previous mentioned research.

v. existence of members who were not compensated by the issuer and the reason for this fact

The Chairman of the Board of Directors does not receive any type of compensation, since he waived his right to receive.

(c) *main performance indicators that are taken into consideration in determining each element of compensation*

Aiming to comply with the purposes of the compensation policy, which is to compensate according to the market practices (measured through Top Exec Research from Kom Ferry, which uses as compensation parameters the greatest economic groups acting in the country), making it possible to attract and retain the best talents seeking excellence, each compensation element takes into account the following performance indicators at its establishment:

- Fixed compensation (Base Salary and Direct and Indirect Benefits): established based on competitive compensation structures, which take into account the know-how, problem solutions and responsibility of each position. We organize our structure by salary grids and the respective average salaries by each of such grids, seeking alignment with the market's salary average point.

- Variable Compensation: we comply with the performance indicators aligned with the Company's strategic planning, established based on Company's business plan and on the results to be achieved: Net Sales, Net Margin, General Administrative Expenses and Sale Expenses, EBITDA, Net Profit, Sustainability Index (% of Disabled Employees; % of Women in Leadership; Energy Consumption), Number of Tickets (transactions) and Market Share. Such indicators compose the target panel that is divided into Group targets (40%), Individual / Area Targets (40%) and Managerial Behaviors (20%).

The results of the Group's indicators and individual indicators are measured according to the minimum, target and maximum achievements, established and approved, respectively, by the Human Resources and Compensation Committee and the Board of Directors. The average of these results will define the percentage to be applied on the variable target compensation of each manager.

To assess and establish the Variable Compensation, the Company uses the method named Performance Score (internally aligned with the purposes outlined by Grupo Pão de Açúcar ("GPA") and its subsidiaries), such method was also used in 2018 for all of the Company's employees of intermediate leadership level.

- Stock-based compensation: information on criteria and characteristics of the stock based compensation are provided in item 13.4 of the *Formulário de Referência*.

(d) how compensation is structured to reflect the performance indicators evolution

The Company structures its compensation through programs monitoring the fulfillment of targets that have been previously established and the actual achieved results.

(e) how the policy or compensation practice is aligned with the short, medium and long term interests of the Company

In order to align the Board of Executive Officers with the Company's purposes in a short and medium-term perspective, we offer a fixed compensation (Base Salary) to Officers and, in addition, an installment of Variable Compensation, to be paid as profit sharing. Moreover, we offer to executives a Stock Option Plan and a Stock-Based Compensation Plan that, due to certain characteristics such as vesting periods and lock-up period for the acquired shares, maintain the Board of Executive Officers aligned with the Company's purposes on a long-term perspective. It is important to point out, that the Stock Option Plan, the Stock-Based Compensation Plan and the profit sharing compose the Variable Compensation of the Board of Executive Officers.

The compensation of the members of our Board of Directors, Fiscal Council and committees of the Company is adjusted based on the amount that is usually paid by the market, encouraging such professional to maintain the excellence in the exercise of their duties and the continuous pursuit to improve results. The Stock Option Plans and the Stock-Based Compensation Plan described in item 13.4 may be extended to the members of the Company's Board of Directors. In this regard, we understand that the compensation policy and practice match our short, medium and long-term interests.

(f) existence of compensation supported by subsidiaries or companies under direct or indirect control

The compensation of managers and members of committees is exclusively supported by the Company.

(g) existence of any compensation or benefit bound to the occurrence of a certain corporate event, such as disposal of the Company's corporate control

There is no compensation or benefit ensured to our managers or members of our committees that are bound to the occurrence of corporate events.

(h) *practices and procedures adopted by the board of directors to define the individual compensation of the board of directors and the board of executive officers, indicating:*

i. *the bodies and committees of the issuer participating in the decision-making process, identifying how they participate*

ii. *criteria and methodology used to fix the individual compensation, indicating if studies are used to verify market practices and, if yes, the comparison criteria and scope of these studies*

iii. *with what frequency and how the management evaluates the adequacy of the issuer's compensation policy*

As indicated in item 13.1.b.iii above, the Company conducts annual surveys through renowned specialist consulting firms to analyze the average compensation in the main economic groups

with operations in Brazil. After this information is analyzed, a compensation proposal is prepared based on the level of dedication and performance of each director and submitted to the Board of Directors of the Company's for approval and final validation.

The Human Resources and Compensation Committee and the Board of Directors evaluate the adequacy of the compensation paid annually, in accordance with the survey conducted by the specialized consulting firm engaged by the Company.

The Extraordinary and Annual General Meeting held on April 24, 2015 also approved amendments to the Stock Option Plan and the Compensation Plan.

The section below describes the Plans that had options in effect as of December 31, 2018:

COMPENSATION PLAN

- a. general terms and conditions
-

The Compensation Plan will be managed by the Company's Board of Directors, which established the Company's Human Resources and Compensation Committee to advise on the management of the Compensation Plan ("Committee").

The members of the Committee shall meet in order to grant stock options of the Compensation Plan series and, whenever necessary, to make decisions on issues raised with regard to the Compensation Plan.

Each series of granted options shall have the letter "B" followed by a number. In the fiscal year ended December 31, 2018, options granted in Series B3, B4 and B5 of the Compensation Plan were in effect.

The employees and executives of the Company are eligible to participate in the Compensation Plan, it being understood that the employees and executives of the companies belonging to GPA considered key executives ("Participant") may also participate, all being subject to the approval of the Board of Directors or Committee, as applicable.

Participation in the Compensation Plan does not affect the income to which the Participant is entitled as an employee and/or executive of the Company, such as salary, fees, pro-labore, benefits, profit sharing and/or any other compensation.

b. main purposes of the plan

The Compensation Plan establishes the conditions for the Company to grant stock options to its executives and employees, with the purpose of: (i) attracting and keeping as members of the Company (or, as applicable, GPA companies) executives and highly qualified professionals; (ii) facilitating the participation of the Company's executives and employees (or, as the case may be, of GPA companies) in its capital and in the equity increases arising from the results to which said executives and employees contributed; (iii) stimulating the achievement of the Company's objectives; and (iv) aligning the interests of the Company's executives and employees or of GPA's companies with those of its shareholders, thereby encouraging the performance of these professionals and ensuring their continuity in the Company's management.

e. How the plan aligns the interests of management and of the issuer in the short, medium and long term

By means of the Compensation Plan, the Company seeks to stimulate improvement in its management, in an attempt to gain commitment to long-term results. f. maximum number of shares affected

Stock options granted pursuant to the Compensation Plan may confer acquisition rights on a number of shares not exceeding two percent (2%) of the total preferred shares issued by the Company. The total number of shares issued or to be issued under the Compensation Plan is subject to adjustments due to splits, grouping and dividends.

g. maximum number of options to be granted

The maximum number of options to be granted is limited to the maximum number of shares contemplated by the Compensation Plan, as described in item (f) above.

Each stock option shall give the Participant the right to subscription or acquisition of one (1) preferred share issued by Company.

h. conditions for acquiring shares

The granting of stock options will be formalized by the signature between the Company and the Participant of the Stock option agreement, which shall specify the total number of shares subject to the respective option, the term and conditions for the effective acquisition of the right to exercise the option, the conditions for such exercise, the acquisition price and its payment conditions, in compliance with the Compensation Plan ("Stock Option Agreement").

For the purposes of the Compensation Plan, the date of the Committee's resolution on the series of options granted shall be the date on which the options shall be considered granted to the respective Participants, provided that the Participant, even if subsequent to the date of the Committee's resolution, agrees to join the Compensation Plan with the formalization of the Stock Option Agreement ("Grant Date").

The Participant who wishes to exercise their call options shall communicate to the Company, in writing and during the Exercise Period (as set forth in item (i) below), its intention to do so, indicating the number of options it wishes to exercise. Said communication shall comply with the exercise term model attached to the respective Stock Option Agreement ("Stock Option Exercise Term").

c. method used and assumptions made to incorporate the expected effects of early exercise

The Company does not take into account, for purposes of option pricing, the early exercises resulted from dismissal, death or disability of the beneficiary, as well as from corporate events.

The Company has adopted the assumption that the options will be exercised from the moment in which they become exercisable. Thus, the life period of options adopted for calculation is 3 years, according to the granting series and associated vesting periods.

d. method of determining expected volatility

For the calculation of the expected volatility, we used standard deviation of the natural logarithm of historical daily variations of the price of shares issued by our Company, according to the effective period of the options.

e. other characteristics incorporated in the calculation of the options' fair value

IV. INVESTMENT PLAN FOR FISCAL YEAR 2019

As described in section 10.8 of the "*Appendix to the Management's Proposal - Company's Financial Condition*" of Chapter 3 (A) I hereinabove, the Company's Management proposes an Investment Plan for Multivarejo, GPA Malls and Assaí for fiscal year 2019 in the total amount of up to R\$ 1.8 billion, for (i) conversion, opening and renovation of stores; and (ii) IT infrastructure, logistics and other efficiency improvement projects. Such amount does not include the Investment Plan for Via Varejo and its subsidiaries.

(B) EXTRAORDINARY GENERAL MEETING

I. RECTIFICATION AND RATIFICATION OF THE ANNUAL GLOBAL REMUNERATION OF THE COMPANY'S BOARD OF EXECUTIVE OFFICERS FOR FISCAL YEAR 2018

At the Annual and Extraordinary General Meeting held on April 27, 2018 ("AGM and EGM of 2018"), the proposal for the global compensation of the Board of Directors and the Fiscal Council of up to R\$ 85,334,341.69, was approved, distributed as follows: (i) up to R\$ 71,324,818.03 for the Board of Executive Officers, (ii) up to R\$ 13,188,723.66 for the Board of Directors, and (iii) up to R\$ 820,800.00 for the Fiscal Council, if established.

Over year 2018, the Company's Management revisited the projections contained in the proposal for the global compensation of the Management and Fiscal Council members approved at the AGM and EGM of 2018, and it was concluded that, if all payments for which the Company had undertaken itself were made, the projections be insufficient to pay the amount of R\$ 15.719.848.34 to the Board of Executive Officers (considering a total amount of R\$ 87.044.666.37 vis-à-vis the amount approved at the AGM and EGM of 2018 of R\$ 71.324.818.03).

It is worth emphasizing that the Company's Management did not make any payment that exceeds the budget approved by the shareholders at the AGM and EGM of 2018 up to the present moment.

The Board's budget inconsistency was due to long-term incentive contracts granted to executives, in the context of maintaining the right in contracts of the same nature, granted by the Company's subsidiaries, when the beneficiary was a member of such subsidiary.

For the reasons set forth above, the Company's Management proposes that the resolution approved at the AGM and EGM of 2018 regarding the annual global compensation (i) of the Board of Executive Officers from up to R\$ 71,324,818.03 be rectified and ratified to the total amount of up to R\$ 87,044,666.37; and (ii) consequently, such amount for the Management members is also rectified and ratified from the amount of up to R\$ 85,334,341.69 to the total amount of up to R\$ 99,528,993.79.

Lastly, it should be highlighted that section 13 of the Reference Form, which is included in Appendix 3(A)III of this Proposal, already includes amounts effectively recognized in the fiscal year.

II. PROPOSAL TO AMEND THE STOCK OPTION PLANS AND EQUITY COMPENSATION PLAN OF THE COMPANY

On May 9, 2014, our shareholders approved at the Extraordinary General Meeting of Shareholders the creation of the Stock Option Plan and its corresponding standard grant agreement ("Stock Option Plan") and the creation of the Equity Compensation Plan and its corresponding standard grant agreement (the "Equity Compensation Plan" and, together with the Stock Option Plan, they are hereinafter referred to as the "Plans").
