BCE Inc. Supplementary Financial Information - Fourth Quarter 2003 Page 12

## Accompanying Notes

(1) Effective December 2003, we started presenting the financial results of Aliant's remote communications segment which consisted mainly of Aliant's investment in Stratos Global Corporation (Stratos), and BCE Emergis' US Health operations (US Health) as discontinued operations. Stratos results were previously presented in the Bell Canada Segment and US Health results were previously presented in the BCE Emergis segment. As a result, prior periods have been restated to reflect the discontinued operations treatment of Stratos and US Health.

### (2) Non-GAAP financial Measures

Certain financial measures used in this Supplementary Financial Information do not have any standardized meaning prescribed by Canadian generally accepted accounting principles (GAAP). Below you will find a discussion of these non-GAAP financial measures, as well as a reconciliation to the most comparable GAAP measure.

#### EBITDA

## Edgar Filing: BCE INC - Form 6-K

The term EBITDA (earnings before interest, taxes, depreciation and amortization) does not have any standardized meaning prescribed by Canadian GAAP and is therefore unlikely to be comparable to similar measures presented by other issuers. We define it as operating revenues less operating expenses, which means it represents operating income before amortization expense, net benefit plans (cost) credit and restructuring and other charges. EBITDA is presented on a basis that is consistent from period to period.

We believe EBITDA to be an important measure as it allows us to assess the operating performance of our ongoing businesses without the effects of amortization expense, net benefit plans (cost) credit and restructuring and other charges. We exclude amortization expense and net benefit plans (cost) credit because they substantially depend on the accounting methods and assumptions a company uses, as well as non-operating factors such as the historical cost of capital assets and the fund performance of a company's pension plans. We exclude restructuring and other charges because they are transitional in nature.

EBITDA allows us to compare our operating performance on a consistent basis. We also believe that EBITDA is used by certain investors and analysts in measuring a company's ability to service debt and to meet other payment obligations or as the basis for a valuation measurement that is commonly used in the telecommunications industry.

EBITDA should not be confused with net cash flows from operating activities. The most comparable Canadian GAAP earnings measure is operating income. The following is a reconciliation of EBITDA to operating income on a consolidated and segmented basis.

**Free Cash Flow**

The term free cash flow does not have any standardized meaning prescribed by Canadian GAAP and is therefore unlikely to be comparable to similar measures presented by other issuers. We define it as cash from operating activities less capital expenditures, total dividends and other investing activities. Free cash flow is presented on a basis that is consistent from period to

Edgar Filing: BCE INC - Form 6-K

period. We consider free cash flow as an important indicator of the financial strength and performance of our business as it demonstrates the cash available to repay debt and reinvest in our company. We believe that free cash flow is also used by certain investors and analysts in valuing a business and its underlying assets. The most comparable Canadian GAAP financial measure is cash from operating activities. The following is a reconciliation of free cash flow to cash from operating activities on a consolidated basis:

(in \$ millions)	Q4 2003	Q4 2002	FY 2003	FY 2002
Cash from operating activities	1 610	1 138	6 015	4 378
Capital expenditures	(1 083)	(1 066)	(3 179)	(3 731)
Other investing activities	(7)	(1)	64	13
Preferred dividends and dividends paid				
by subsidiaries to non-controlling interest	(69)	(160)	(245)	(511)
Free cash flow from operations, before common dividends	451	(89)	2 655	149
Common dividends	(259)	(271)	(1 029)	(999)
Free cash flow from operations, after common dividends	192	(360)	1 626	(850)

(3) Cash flow per share is calculated as follows:

Cash flow from operations less capital expenditures

Average number of common shares outstanding during the period

(4) Annualized cash flow yield is calculated as follows:

Free cash flow before common dividends, investments and divestitures

Number of common shares outstanding at end of period multiplied by share price at end of period

(5) Reflects an increase in the Bell Canada Segment debt as a result of the completion of the purchase price allocation (PPA) relating to the repurchase of SBC's 20% interest in Bell Canada, which resulted in an increase in long-term debt of \$165 million. This increase in long-term debt will be applied against interest expense (\$6 million in Q4 2003, \$24 million YTD) over the remaining terms of the related long-term debt.

## Edgar Filing: BCE INC - Form 6-K

- (6) At the BCE Consolidated level, 3rd Party Preferred Shares reflected in the financial statements of subsidiaries are included in non-controlling interest within the liabilities section of the balance sheet.
- (7) Bell Canada's estimated percentage of wireline NAS reflects losses to facilities-based competition only.
- (8) Represents Bell Canada's estimated percentage of traditional wireline revenues in Ontario and Quebec reflecting 1+, toll-free and calling card traffic. This measure does not include Bell Canada's share of long distance traffic originating through the use of dial-around services, prepaid cards and cellular and PCS services.
- (9) Legacy data revenues include digital transmission services such as MEGALINK™, network access and Integrated Services Digital Network (ISDN) and Data, as well as, competitive network services and the sale of inter-networking equipment.

Non-legacy data revenues include national and regional IP data, Internet and e-commerce.

- (10) Digital equivalent access lines are derived by converting low capacity data lines (DS-3 and lower) to the equivalent number of voice grade access lines. Broadband equivalent access lines are derived by converting high capacity data lines (higher than DS-3) to the equivalent number of voice grade access lines.
