UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-K

- x ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2013

- o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 0-15950

FIRST BUSEY CORPORATION

(Exact name of registrant as specified in its charter)

Nevada

(State or other jurisdiction of incorporation of organization)

37-1078406

(I.R.S. Employer Identification No.)

100 W. University Avenue

Champaign, Illinois 61820

(Address of principal executive offices) (Zip code)

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

Registrant's telephone number, including area code (217) 365-4544

Securities registered pursuant to Section 12(b) of the Act:

| Title of each class | Name of each exchange on which registered |
|----------------------------------|---|
| Common Stock (\$0.001 par value) | The NASDAQ Stock Market LLC |

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

The aggregate market value of the voting and non-voting common equity held by non-affiliates on the last business day of the registrant's most recently completed second fiscal quarter was \$349.0 million, determined using a per share closing price for the registrant's common stock on that date of \$4.50, as quoted on The Nasdaq Global Select Market.

As of March 11, 2014, there were 86,811,171 shares of the registrant's common stock, \$0.001 par value, outstanding.

Part I

Item 1. Business

Introduction

First Busey Corporation (First Busey or the Company), a Nevada Corporation, is a \$3.5 billion financial holding company which was initially organized as a bank holding company in 1980. First Busey conducts a broad range of financial services through its banking and non-banking subsidiaries at multiple locations in Illinois, Florida, Indiana and Missouri. First Busey has one wholly-owned bank subsidiary, Busey Bank (the Bank), which has locations in Illinois, Indiana and Florida. First Busey is headquartered in Champaign, Illinois, and its common stock is traded on The Nasdaq Global Select Market under the symbol BUSE.

Business of First Busey

First Busey conducts the business of banking and related services through the Bank, asset management, brokerage and fiduciary services through Busey Wealth Management, Inc. (Busey Wealth Management) and Trevett Capital Partners (Trevett) and retail payment processing through FirsTech, Inc. (FirsTech).

The Bank is an Illinois state-chartered bank organized in 1868 with its headquarters in Champaign, Illinois. The Bank has twenty-eight locations in Illinois, seven in southwest Florida and one in Indianapolis, Indiana.

The Bank offers a full range of diversified financial products and services for consumers and businesses, including innovative online and mobile banking capabilities to conveniently serve our customers' needs. Services include commercial, agricultural and real estate loans, and retail banking services, including home equity lines of credit, residential real estate and consumer loans, customary types of demand and savings deposits, money transfers, safe deposit services, IRA, Keogh and other fiduciary services through our branch, ATM and technology-based networks.

The Bank's principal sources of income are interest and fees on loans and investments and service fees. Its principal expenses are interest paid on deposits and general operating expenses. The Bank's primary markets are downstate Illinois, southwest Florida, and central Indiana.

The Bank's loan portfolio is comprised primarily of commercial, commercial real estate, residential real estate, and consumer loans. As of December 31, 2013, real estate mortgage loans (including commercial and residential real estate) made up approximately 70.9% of the Bank's loan portfolio, construction lending comprised approximately 3.4%, commercial loans comprised approximately 25.3%, and consumer installments and other loans comprised approximately 0.4%.

Trevett, operating as a division of the Bank, is a private wealth management boutique created to serve clientele in southwest Florida through a highly tenured team of sophisticated wealth management professionals. Trevett builds upon our established presence in Florida and the broad capabilities of our existing Wealth Management operation to provide concierge service and tailored solutions for the accumulation and preservation of capital and generational legacies.

Busey Wealth Management, which is headquartered in Champaign, Illinois, provides asset management, investment and fiduciary services to individuals, businesses and foundations through its subsidiary, Busey Trust Company. As of December 31, 2013, Busey Trust Company had \$5.0 billion in assets under care. For individuals, Busey Trust Company provides investment management, trust and estate advisory services and financial planning. For businesses, it provides investment management, business succession planning and employee retirement plan services. For foundations, Busey Trust Company provides investment management, investment strategy consulting and fiduciary services. Brokerage related services are offered by Busey Investment Services, a division of Busey Trust Company, through a third-party arrangement with Raymond James Financial Services.

FirsTech, which has offices in Decatur, Illinois and Clayton, Missouri, offers the following pay processing solutions: walk-in payment processing for payments delivered by customers to retail pay agents; online bill payment solutions for payments made by customers on a billing company's website; customer service payments for payments accepted over the telephone; direct debit services; electronic concentration of payments delivered by the Automated Clearing House network; money management software and credit card networks; and lockbox remittance processing of payments delivered by mail. FirsTech had approximately 3,100 agent locations in 38 states as of December 31, 2013.

First Busey Corporation also has various other subsidiaries that are not significant to the consolidated entity.

Table of Contents

See *Note 20 Reportable Segments and Related Information* in the Notes to the Consolidated Financial Statements for an analysis of segment operations.

Economic Conditions of Markets

Our primary markets, which are in stable micro-urban communities of downstate Illinois, are distinct from the dense competitive landscapes of Chicago and the smaller rural populations of southern Illinois and they have strong industrial, academic and healthcare employment bases. Our primary downstate Illinois markets of Champaign, Macon, McLean and Peoria counties are anchored by several strong, familiar and stable organizations. Although our downstate Illinois and Indiana markets experienced economic distress in recent years, they did not experience it to the level of many other areas of the country, including our southwest Florida market. While future economic conditions remain uncertain, we believe our markets have generally stabilized following a few years of economic downturn and, as a whole, continue to show signs of improvement.

Champaign County is home to the University of Illinois – Urbana/Champaign (U of I), the University’s primary campus. U of I has in excess of 43,000 students. Additionally, Champaign County healthcare providers serve a significant area of downstate Illinois and western Indiana. Macon County is currently home to Archer Daniels Midland (ADM), a Fortune 100 company and one of the largest agricultural processors in the world. ADM’s presence in Macon County supports many derivative businesses in the agricultural processing arena. During the fourth quarter of 2013, ADM announced its intent to move its corporate headquarters to Chicago, Illinois and designate Decatur, Illinois as its North American headquarters. Job relocations of 50 to 75 executives have been disclosed and we will continue to monitor the situation for customer impact. Additionally, Macon County is home to Millikin University, and its healthcare providers serve a significant role in the market. McLean County is home to State Farm, Country Financial, Illinois State University and Illinois Wesleyan University. State Farm, a Fortune 100 company, is the largest employer in McLean County, and Country Financial and the universities provide additional stability to a growing area of downstate Illinois. Peoria County is home to Caterpillar, a Fortune 100 company, and Bradley University, in addition to a large healthcare presence serving much of the western portion of downstate Illinois. The institutions noted above, coupled with a large agricultural sector, anchor the communities in which they are located, and have provided a comparatively stable foundation for housing, employment and small business.

Severe storms, straight-line winds and tornadoes caused significant property damage in areas of Illinois on November 17, 2013. Selected areas in Illinois were declared federal disaster areas on November 26, 2013. The Company has a process in place to assist affected customers and the overall impacts to our business were minimal.

The largest portion of the Company’s customer base is within the State of Illinois, the financial condition of which is among the most troubled of any state in the United States with severe pension under-funding, recurring bill payment delays, and budget deficits. Additionally, the Company is located in markets with significant universities and healthcare companies, which rely heavily on state funding and contracts. The State of Illinois continues to be behind on payments to its vendors and government sponsored entities. Further and continued payment lapses by the State of Illinois to its vendors and government sponsored entities may have significant, negative effects on our primary market areas.

Southwest Florida has shown continuing signs of improvement in areas such as unemployment and home sales since 2011. In addition, median sales prices of homes in Florida continue to be on the rise. As southwest Florida’s economy is based primarily on tourism and the secondary/retirement residential market, declines in discretionary spending brought on by uncertain economic conditions caused damage to that economy and, the recent improvement in certain economic indicators notwithstanding, we expect it will take southwest Florida a number of years to return to peak economic strength. In 2013, Hertz Global Holdings, a Fortune 500 company, announced its intent to move headquarters

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

from New Jersey to southwest Florida, building a new world headquarters in Lee County. It is estimated that Hertz Global Holdings will spend \$50.0 million to build the new headquarters and bring at least 700 jobs to the area.

Competition

The Bank competes actively with national and state banks, savings and loan associations and credit unions for deposits and loans mainly in downstate Illinois (primarily Champaign, Ford, Livingston, Macon, McLean, Peoria, and Shelby counties), southwest Florida (primarily Charlotte, Lee and Sarasota counties), and central Indiana (primarily Hamilton and Marion counties). In addition, First Busey and its non-bank subsidiaries compete with other financial institutions, including asset management and trust companies, security broker/dealers, personal loan companies, insurance companies, finance companies, leasing companies, mortgage companies, remittance processing companies, and certain governmental agencies, all of which actively engage in marketing various types of loans, deposit accounts, and other products and services. The Bank competes for real estate and other loans primarily on the basis of the interest rates and loan fees it charges, the types of loans it originates and the quality of services it provides to borrowers.

Table of Contents

The Bank faces substantial competition in attracting deposits from other commercial banks, savings institutions, money market and mutual funds, credit unions, insurance agencies, brokerage firms, and other investment vehicles. The ability of the Bank to attract and retain deposits depends on its ability to provide investment opportunities that satisfy the requirements of investors as to rate of return, liquidity, risk and other factors. The Bank attracts a significant amount of deposits through its branch offices, primarily from the communities in which those branch offices are located; therefore, competition for those deposits is principally from other commercial banks, savings institutions, and credit unions located in the same communities. The Bank competes for these deposits by offering a variety of deposit accounts at competitive rates, high-quality customer service, convenient business hours, internet and mobile banking, and convenient branch locations with interbranch deposit and withdrawal privileges at each.

Based on information obtained from FDIC Summary of Deposits dated June 30, 2013, First Busey ranked in the top ten in total deposits in seven Illinois counties: first in Champaign County; second in Ford County; eighth in Livingston County; second in Macon County; fifth in McLean County; ninth in Peoria County; and second in Shelby County. Customers for banking services are generally influenced by convenience, quality of service, personal contacts, price of services and availability of products. Although the market share of First Busey varies in different markets, First Busey believes that it effectively competes with other banks, thrifts and financial institutions in the relevant market areas.

Monetary Policy and Economic Conditions

The earnings of commercial banks and bank holding companies are affected not only by general economic conditions, but also by the policies of various governmental regulatory agencies. In particular, the Federal Reserve regulates money and credit conditions and interest rates in order to influence general economic conditions and interest rates, primarily through open market operations in U.S. government securities, varying the discount rate on member banks and nonmember bank borrowings and setting reserve requirements against bank deposits. Such Federal Reserve policies and acts have a significant influence on overall growth and distribution of bank loans, investments, deposits and related interest rates. The Company cannot accurately predict the effect, if any, such policies and acts may have in the future on its business or earnings.

Supervision, Regulation and Other Factors

General

Financial institutions, their holding companies and their affiliates are extensively regulated under federal and state law. As a result, the growth and earnings performance of First Busey may be affected not only by management decisions and general economic conditions, but also by the requirements of federal and state statutes and by the regulations and policies of various bank regulatory agencies, including the Illinois Department of Financial and Professional Regulation (the DFPR), the Board of Governors of the Federal Reserve System (the Federal Reserve), the Federal Deposit Insurance Corporation (the FDIC) and the recently created Bureau of Consumer Financial Protection (the CFPB). Furthermore, taxation laws administered by the Internal Revenue Service and state taxing authorities, accounting rules developed by the Financial Accounting Standards Board (the FASB) and securities laws administered by the Securities and Exchange Commission (the SEC) and state securities authorities have an impact on the business of First Busey. The effect of these statutes, regulations, regulatory policies and accounting rules are significant to the operations and results of First Busey and the Bank, and the nature and extent of future legislative, regulatory or other changes affecting financial institutions are impossible to predict with any certainty.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

Federal and state banking laws impose a comprehensive system of supervision, regulation and enforcement on the operations of financial institutions, their holding companies and affiliates that is intended primarily for the protection of the FDIC-insured deposits and depositors of banks, rather than shareholders. These federal and state laws, and the regulations of the bank regulatory agencies issued under them, affect, among other things, the scope of business, the kinds and amounts of investments banks may make, reserve requirements, capital levels relative to operations, the nature and amount of collateral for loans, the establishment of branches, the ability to merge, consolidate and acquire, dealings with insiders and affiliates and the payment of dividends. Moreover, turmoil in the credit markets in recent years prompted the enactment of unprecedented legislation that has allowed the U.S. Department of the Treasury (the Treasury) to make equity capital available to qualifying financial institutions to help restore confidence and stability in the U.S. financial markets, which imposes additional requirements on institutions in which the Treasury has an investment.

Table of Contents

This supervisory and regulatory framework subjects banks and bank holding companies to regular examination by their respective regulatory agencies, which results in examination reports and ratings that are not publicly available and that can impact the conduct and growth of their businesses. These examinations consider not only compliance with applicable laws and regulations, but also capital levels, asset quality and risk, management ability and performance, earnings, liquidity, and various other factors. The regulatory agencies generally have broad discretion to impose restrictions and limitations on the operations of a regulated entity where the agencies determine, among other things, that such operations are unsafe or unsound, fail to comply with applicable law or are otherwise inconsistent with laws and regulations or with the supervisory policies of these agencies.

The following is a summary of the material elements of the supervisory and regulatory framework applicable to First Busey and the Bank. It does not describe all of the statutes, regulations and regulatory policies that apply, nor does it restate all of the requirements of those that are described. The descriptions are qualified in their entirety by reference to the particular statutory and regulatory provision.

Financial Regulatory Reform

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) into law. The Dodd-Frank Act represents a sweeping reform of the U.S. supervisory and regulatory framework applicable to financial institutions and capital markets in the wake of the global financial crisis, certain aspects of which are described below in more detail. In particular, and among other things, the Dodd-Frank Act: (i) created a Financial Stability Oversight Council as part of a regulatory structure for identifying emerging systemic risks and improving interagency cooperation; (ii) created the CFPB, which is authorized to regulate providers of consumer credit, savings, payment and other consumer financial products and services; (iii) narrowed the scope of federal preemption of state consumer laws enjoyed by national banks and federal savings associations and expanded the authority of state attorneys general to bring actions to enforce federal consumer protection legislation; (iv) imposed more stringent capital requirements on bank holding companies and subjected certain activities, including interstate mergers and acquisitions, to heightened capital conditions; (v) with respect to mortgage lending, (a) significantly expanded requirements applicable to loans secured by 1-4 family residential real property, (b) imposed strict rules on mortgage servicing, and (c) required the originator of a securitized loan, or the sponsor of a securitization, to retain at least 5% of the credit risk of securitized exposures unless the underlying exposures are qualified residential mortgages or meet certain underwriting standards; (vi) repealed the prohibition on the payment of interest on business checking accounts; (vii) restricted the interchange fees payable on debit card transactions for issuers with \$10 billion in assets or greater; (viii) in the so-called Volcker Rule, subject to numerous exceptions, prohibited depository institutions and affiliates from certain investments in, and sponsorship of, hedge funds and private equity funds and from engaging in proprietary trading; (ix) provided for enhanced regulation of advisers to private funds and of the derivatives markets; (x) enhanced oversight of credit rating agencies; and (xi) prohibited banking agency requirements tied to credit ratings. These statutory changes shifted the regulatory framework for financial institutions, impacted the way in which they do business and have the potential to constrain revenues.

Numerous provisions of the Dodd-Frank Act are required to be implemented through rulemaking by the appropriate federal regulatory agencies. Many of the required regulations have been issued and others have been released for public comment, but there remain a number that have yet to be released in any form. Furthermore, while the reforms primarily target systemically important financial service providers, their influence is expected to filter down in varying degrees to smaller institutions over time. Management of First Busey and the Bank will continue to evaluate the effect of the Dodd-Frank Act changes; however, in many respects, the ultimate impact of the Dodd-Frank Act will not be fully known for years, and no current assurance may be given that the Dodd-Frank Act, or any other new legislative changes, will not have a negative impact on the results of operations and financial condition of First Busey and the Bank.

The Increasing Regulatory Emphasis on Capital

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

Regulatory capital represents the net assets of a financial institution available to absorb losses. Because of the risks attendant to their businesses, depository institutions are generally required to hold more capital than other businesses, which directly affects earnings capabilities. While capital has historically been one of the key measures of the financial health of both bank holding companies and banks, its role is becoming fundamentally more important in the wake of the global financial crisis, as the banking regulators recognized that the amount and quality of capital held by banks prior to the crisis was insufficient to absorb losses during periods of severe stress. Certain provisions of the Dodd-Frank Act and Basel III, discussed below, establish strengthened capital standards for banks and bank holding companies, require more capital to be held in the form of common stock and disallow certain funds from being included in capital determinations. Once fully implemented, these standards will represent regulatory capital requirements that are meaningfully more stringent than those in place currently and historically.

Table of Contents

First Busey and Bank Required Capital Levels

Bank holding companies have historically had to comply with less stringent capital standards than their bank subsidiaries and were able to raise capital with hybrid instruments such as trust preferred securities. The Dodd-Frank Act mandated the Federal Reserve to establish minimum capital levels for bank holding companies on a consolidated basis that are as stringent as those required for insured depository institutions. As a consequence, the components of holding company permanent capital known as Tier 1 Capital are being restricted to capital instruments that are considered to be Tier 1 Capital for insured depository institutions. A result of this change is that the proceeds of hybrid instruments, such as trust preferred securities, are being excluded from Tier 1 Capital unless such securities were issued prior to May 19, 2010 by bank holding companies with less than \$15 billion of assets, subject to certain restrictions. Because First Busey has assets of less than \$15 billion, it is able to maintain its trust preferred proceeds, subject to certain restrictions, as Tier 1 Capital but will have to comply with new capital mandates in other respects and will not be able to raise Tier 1 Capital in the future through the issuance of trust preferred securities.

Under current federal regulations, a bank is subject to the following minimum capital standards:

- A leverage requirement, consisting of a minimum ratio of Tier 1 Capital to total adjusted book assets of 3% for the most highly-rated banks with a minimum requirement of at least 4% for all others; and
- A risk-based capital requirement, consisting of a minimum ratio of Total Capital to total risk-weighted assets of 8% and a minimum ratio of Tier 1 Capital to total risk-weighted assets of 4%.

For these purposes, Tier 1 Capital consists primarily of common stock, noncumulative perpetual preferred stock and related surplus less intangible assets (other than certain loan servicing rights and purchased credit card relationships). Total Capital consists primarily of Tier 1 Capital plus Tier 2 Capital, which includes other nonpermanent capital items, such as certain other debt and equity instruments that do not qualify as Tier 1 Capital, and a portion of the Bank's allowance for loan and lease losses. Further, risk-weighted assets for the purposes of the risk-weighted ratio calculations are balance sheet assets and off-balance-sheet exposures to which required risk weightings of 0% to 100% are applied.

The capital standards described above are minimum requirements and will be increased under Basel III, as discussed below. Bank regulatory agencies are uniformly encouraging banks and bank holding companies to be well-capitalized and, to that end, federal law and regulations provide various incentives for banking organizations to maintain regulatory capital at levels in excess of minimum regulatory requirements. For example, a banking organization that is well-capitalized may: (i) qualify for exemptions from prior notice or application requirements otherwise applicable to certain types of activities; (ii) qualify for expedited processing of other required notices or applications; and (iii) accept brokered deposits. Under the capital regulations of the FDIC and Federal Reserve, in order to be well-capitalized, a banking organization, under current federal regulations, must maintain:

- A leverage ratio of Tier 1 Capital to total assets of 5% or greater;
- A ratio of Tier 1 Capital to total risk-weighted assets of 6% or greater; and

- A ratio of Total Capital to total risk-weighted assets of 10% or greater.

The FDIC and Federal Reserve guidelines also provide that banks and bank holding companies experiencing internal growth or making acquisitions will be expected to maintain capital positions substantially above the minimum supervisory levels without significant reliance on intangible assets. Furthermore, the guidelines indicate that the agencies will continue to consider a tangible Tier 1 leverage ratio (deducting all intangible assets) in evaluating proposals for expansion or to engage in new activities.

Higher capital levels may also be required if warranted by the particular circumstances or risk profiles of individual banking organizations. For example, the Federal Reserve's capital guidelines contemplate that additional capital may be required to take adequate account of, among other things, interest rate risk, or the risks posed by concentrations of credit, nontraditional activities or securities trading activities. Further, any banking organization experiencing or anticipating significant growth would be expected to maintain capital ratios, including tangible capital positions (*i.e.*, Tier 1 Capital less all intangible assets), well above the minimum levels.

Table of Contents

Prompt Corrective Action

A banking organization's capital plays an important role in connection with regulatory enforcement as well. Federal law provides the federal banking regulators with broad power to take prompt corrective action to resolve the problems of undercapitalized institutions. The extent of the regulators' powers depends on whether the institution in question is adequately capitalized, undercapitalized, significantly undercapitalized or critically undercapitalized, in each case as defined by regulation. Depending upon the capital category to which an institution is assigned, the regulators' corrective powers include: (i) requiring the institution to submit a capital restoration plan; (ii) limiting the institution's asset growth and restricting its activities; (iii) requiring the institution to issue additional capital stock (including additional voting stock) or to sell itself; (iv) restricting transactions between the institution and its affiliates; (v) restricting the interest rate that the institution may pay on deposits; (vi) ordering a new election of directors of the institution; (vii) requiring that senior executive officers or directors be dismissed; (viii) prohibiting the institution from accepting deposits from correspondent banks; (ix) requiring the institution to divest certain subsidiaries; (x) prohibiting the payment of principal or interest on subordinated debt; and (xi) ultimately, appointing a receiver for the institution.

As of December 31, 2013: (i) the Bank was not subject to a directive from the FDIC to increase its capital to an amount in excess of the minimum regulatory capital requirements; and (ii) the Bank was well-capitalized, as defined by FDIC regulations. As of December 31, 2013, First Busey had regulatory capital in excess of the Federal Reserve's requirements and met the Dodd-Frank Act requirements.

The Basel International Capital Accords

The current risk-based capital guidelines described above, which apply to the Bank and are being phased in for First Busey, are based upon the 1988 capital accord known as Basel I adopted by the international Basel Committee on Banking Supervision, a committee of central banks and bank supervisors, as implemented by the U.S. federal banking regulators on an interagency basis. In 2008, the banking agencies collaboratively began to phase in capital standards based on a second capital accord, referred to as Basel II, for large or core international banks (generally defined for U.S. purposes as having total assets of \$250 billion or more, or consolidated foreign exposures of \$10 billion or more). Basel II emphasized internal assessment of credit, market and operational risk, as well as supervisory assessment and market discipline in determining minimum capital requirements.

On September 12, 2010, the Group of Governors and Heads of Supervision, the oversight body of the Basel Committee on Banking Supervision, announced agreement on a strengthened set of capital requirements for banking organizations around the world, known as Basel III, to address deficiencies recognized in connection with the global financial crisis. Basel III was intended to be effective globally on January 1, 2013, with phase-in of certain elements continuing until January 1, 2019, and it is currently effective in many countries.

U.S. Implementation of Basel III

After an extended rulemaking process that included a prolonged comment period, in July 2013, the U.S. federal banking agencies approved the implementation of the Basel III regulatory capital reforms in pertinent part, and, at the same time, promulgated rules effecting certain changes required by the Dodd-Frank Act (the Basel III Rule). In contrast to capital requirements historically, which were in the form of guidelines, Basel III was released in the form of regulations by each of the agencies. The Basel III Rule is applicable to all U.S. banks that are subject to minimum capital requirements, including federal and state banks and savings and loan associations, as well as to bank and savings and loan holding companies other than small bank holding companies (generally bank holding companies with consolidated assets of less than \$500 million).

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

The Basel III Rule not only increases most of the required minimum capital ratios, but it introduces the concept of Common Equity Tier 1 Capital, which consists primarily of common stock, related surplus (net of treasury stock), retained earnings, and Common Equity Tier 1 minority interests subject to certain regulatory adjustments. The Basel III Rule also expanded the definition of capital as in effect currently by establishing more stringent criteria that instruments must meet to be considered Additional Tier 1 Capital (Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that now qualify as Tier 1 Capital will not qualify, or their qualifications will change. For example, cumulative preferred stock and certain hybrid capital instruments, including trust preferred securities, will no longer qualify as Tier 1 Capital of any kind, with the exception, subject to certain restrictions, of such instruments issued before May 10, 2010, by bank holding companies with total consolidated assets of less than \$15 billion as of December 31, 2009. For those institutions, trust preferred securities and other nonqualifying capital instruments currently included in consolidated Tier 1 Capital are permanently grandfathered under the Basel III Rule, subject to certain restrictions. Noncumulative perpetual preferred stock, which now qualifies as simple Tier 1 Capital, will not qualify as Common Equity Tier 1 Capital, but will qualify as Additional Tier 1 Capital. The Basel III Rule also constrains the inclusion of minority interests, mortgage-servicing assets, and deferred tax assets in capital and requires deductions from Common Equity Tier 1 Capital in the event such assets exceed a certain percentage of a bank's Common Equity Tier 1 Capital.

Table of Contents

The Basel III Rule requires:

- A new required ratio of minimum Common Equity Tier 1 equal to 4.5% of risk-weighted assets;
- An increase in the minimum required amount of Tier 1 Capital from the current level of 4% of total assets to 6% of risk-weighted assets;
- A continuation of the current minimum required amount of Total Capital (Tier 1 plus Tier 2) at 8% of risk-weighted assets; and
- A minimum leverage ratio of Tier 1 Capital to total assets equal to 4% in all circumstances.

In addition, institutions that seek the freedom to make capital distributions (including for dividends and repurchases of stock) and pay discretionary bonuses to executive officers without restriction must also maintain 2.5% of risk-weighted assets in Common Equity Tier 1 attributable to a capital conservation buffer to be phased in over three years beginning in 2016. The purpose of the conservation buffer is to ensure that banks maintain a buffer of capital that can be used to absorb losses during periods of financial and economic stress. Factoring in the fully phased-in conservation buffer increases the minimum ratios depicted above to 7% for Common Equity Tier 1, 8.5% for Tier 1 Capital and 10.5% for Total Capital. The leverage ratio is not impacted by the conservation buffer.

The Basel III Rule maintained the general structure of the current prompt corrective action framework, while incorporating the increased requirements. The prompt corrective action guidelines were also revised to add the Common Equity Tier 1 Capital ratio. In order to be a well-capitalized depository institution under the new regime, a bank and holding company must maintain a Common Equity Tier 1 Capital ratio of 6.5% or more; a Tier 1 Capital ratio of 8% or more; a Total Capital ratio of 10% or more; and a leverage ratio of 5% or more. It is possible under the Basel III Rule to be well-capitalized while remaining out of compliance with the capital conservation buffer discussed above.

The Basel III Rule revises a number of the risk weightings (or their methodologies) for bank assets that are used to determine the capital ratios. For nearly every class of assets, the Basel III Rule requires a more complex, detailed and calibrated assessment of credit risk and calculation of risk weightings. While Basel III would have changed the risk weighting for residential mortgage loans based on loan-to-value ratios and certain product and underwriting characteristics, there was concern in the United States that the proposed methodology for risk weighting residential mortgage exposures and the higher risk weightings for certain types of mortgage products would increase costs to consumers and reduce their access to mortgage credit. As a result, the Basel III Rule did not effect this change, and banks will continue to apply a risk weight of 50% or 100% to their exposure from residential mortgages, with the risk weighting depending on, among other things, whether the mortgage was a prudently underwritten first lien mortgage.

Furthermore, there was significant concern noted by the financial industry in connection with the Basel III rulemaking as to the proposed treatment of accumulated other comprehensive income (AOCI). Basel III requires unrealized gains and losses on available-for-sale securities to flow through to regulatory capital as opposed to the current treatment, which neutralizes such effects. Recognizing the problem for community

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

banks, the U.S. bank regulatory agencies adopted the Basel III Rule with a one-time election for smaller institutions like First Busey and the Bank to opt out of including most elements of AOCI in regulatory capital. This opt-out, which must be made in the first quarter of 2015, would exclude from regulatory capital both unrealized gains and losses on available-for-sale debt securities and accumulated net gains and losses on cash-flow hedges and amounts attributable to defined benefit post-retirement plans. First Busey is currently evaluating whether it will make the opt-out election.

Generally, financial institutions (except for large, internationally active financial institutions) become subject to the new rules on January 1, 2015. However, there will be separate phase-in/phase-out periods for: (i) the capital conservation buffer; (ii) regulatory capital adjustments and deductions; (iii) nonqualifying capital instruments; and (iv) changes to the prompt corrective action rules. The phase-in periods commence on January 1, 2016 and extend until 2019.

First Busey

General

First Busey, as the sole shareholder of the Bank, is a bank holding company. As a bank holding company, First Busey is registered with, and is subject to regulation by, the Federal Reserve under the Bank Holding Company Act of 1956, as amended (the "BHCA"). In accordance with Federal Reserve policy, and as now codified by the Dodd-Frank Act, First Busey is legally obligated to act as a source of financial strength to the Bank and to commit resources to support the Bank in circumstances where First Busey might not otherwise do so. Under the BHCA, First Busey is subject to periodic examination by the Federal Reserve. First Busey is required to file with the Federal Reserve periodic reports of First Busey's operations and such additional information regarding First Busey and its subsidiaries as the Federal Reserve may require.

Table of Contents

Acquisitions, Activities and Change in Control

The primary purpose of a bank holding company is to control and manage banks. The BHCA generally requires the prior approval of the Federal Reserve for any merger involving a bank holding company or any acquisition by a bank holding company of another bank or bank holding company. Subject to certain conditions (including deposit concentration limits established by the BHCA and the Dodd-Frank Act), the Federal Reserve may allow a bank holding company to acquire banks located in any state of the United States. In approving interstate acquisitions, the Federal Reserve is required to give effect to applicable state law limitations on the aggregate amount of deposits that may be held by the acquiring bank holding company and its insured depository institution affiliates in the state in which the target bank is located (provided that those limits do not discriminate against out-of-state depository institutions or their holding companies) and state laws that require that the target bank have been in existence for a minimum period of time (not to exceed five years) before being acquired by an out-of-state bank holding company. Furthermore, in accordance with the Dodd-Frank Act, bank holding companies must be well-capitalized and well-managed in order to effect interstate mergers or acquisitions. For a discussion of the capital requirements, see *The Increasing Regulatory Emphasis on Capital* above.

The BHCA generally prohibits First Busey from acquiring direct or indirect ownership or control of more than 5% of the voting shares of any company that is not a bank and from engaging in any business other than that of banking, managing and controlling banks or furnishing services to banks and their subsidiaries. This general prohibition is subject to a number of exceptions. The principal exception allows bank holding companies to engage in, and to own shares of companies engaged in, certain businesses found by the Federal Reserve prior to November 11, 1999 to be so closely related to banking ... as to be a proper incident thereto. This authority would permit First Busey to engage in a variety of banking-related businesses, including the ownership and operation of a savings association, or any entity engaged in consumer finance, equipment leasing, the operation of a computer service bureau (including software development) and mortgage banking and brokerage. The BHCA generally does not place territorial restrictions on the domestic activities of nonbank subsidiaries of bank holding companies.

Additionally, bank holding companies that meet certain eligibility requirements prescribed by the BHCA and elect to operate as financial holding companies may engage in, or own shares in companies engaged in, a wider range of nonbanking activities, including securities and insurance underwriting and sales, merchant banking and any other activity that the Federal Reserve, in consultation with the Secretary of the Treasury, determines by regulation or order is financial in nature or incidental to any such financial activity or that the Federal Reserve determines by order to be complementary to any such financial activity and does not pose a substantial risk to the safety or soundness of depository institutions or the financial system generally. First Busey has elected to be, and continues to operate as, a financial holding company.

In order to become and maintain its status as a financial holding company, First Busey and the Bank must be well-capitalized, well-managed, and have a least a satisfactory Community Reinvestment Act (CRA) rating. If the Federal Reserve determines that a financial holding company is not well-capitalized or well-managed, the company has a period of time in which to achieve compliance, but during the period of noncompliance, the Federal Reserve may place any limitations on the company it believes to be appropriate. Furthermore, if the Federal Reserve determines that a financial holding company's subsidiary bank has not received a satisfactory CRA rating, the company will not be able to commence any new financial activities or acquire a company that engages in such activities.

Federal law also prohibits any person or company from acquiring control of an FDIC-insured depository institution or its holding company without prior notice to the appropriate federal bank regulator. Control is conclusively presumed to exist upon the acquisition of 25% or more of the outstanding voting securities of a bank or bank holding company, but may arise under certain circumstances between 10% and 24.99% ownership.

Capital Requirements

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

Bank holding companies are required to maintain capital in accordance with Federal Reserve capital adequacy requirements, as affected by the Dodd-Frank Act and Basel III. For a discussion of capital requirements, see [The Increasing Regulatory Emphasis on Capital](#) above.

U.S. Government Investment in Bank Holding Companies

Events in the United States and global financial markets leading up to the global financial crisis, including deterioration of the worldwide credit markets, created significant challenges for financial institutions throughout the country beginning in 2008. In response to this crisis affecting the U.S. banking system and financial markets, on October 3, 2008, the U.S. Congress passed, and the President signed into law, the Emergency Economic Stabilization Act of 2008 (the EESA). The EESA authorized the Secretary of the Treasury to implement various temporary emergency programs designed to strengthen the capital positions of financial institutions and stimulate the availability of credit within the U.S. financial system. Financial institutions participating in certain of the programs established under the EESA are required to adopt the Treasury's standards for executive compensation and corporate governance.

Table of Contents

On October 14, 2008, the Treasury announced a program that provided Tier 1 Capital (in the form of perpetual preferred stock and common stock warrants) to eligible financial institutions. This program, known as the TARP Capital Purchase Program (the CPP), allocated \$250 billion from the \$700 billion authorized by EESA to the Treasury for the purchase of senior preferred shares from qualifying financial institutions (the CPP Preferred Stock). Eligible institutions were able to sell equity interests to the Treasury in amounts equal to between 1% and 3% of the institutions' risk-weighted assets. First Busey determined participation in the CPP to be in its best interests based upon the economic uncertainties of the deep recession, the benefits of holding additional capital and the relatively low cost of participation.

Pursuant to the CPP, on March 6, 2009, First Busey entered into a Letter Agreement with the Treasury, pursuant to which First Busey issued (i) 100,000 shares of CPP Preferred Stock, designated as the Fixed Rate Cumulative Perpetual Preferred Stock, Series T (the Series T Preferred Stock), and (ii) a warrant to purchase 1,147,666 shares of First Busey's common stock, no par value, for an aggregate purchase price of \$100 million in cash. Since First Busey's participation in the CPP, it has raised additional capital through a public offering of common stock and, as a result of that offering, the number of shares of common stock subject to the warrant has been reduced by 50% to 573,833.

Small Business Lending Fund and CPP Redemption

Under the Small Business Jobs Act of 2010, the Treasury established a Small Business Lending Fund (the SBLF), a \$30 billion fund that encourages lending to small businesses by providing capital to qualified community banks with assets of less than \$10 billion. First Busey applied for the SBLF program, was accepted, and on August 25, 2011, entered into a Securities Purchase Agreement (the Purchase Agreement) with the Treasury, pursuant to which it issued and sold to the Treasury 72,664 shares of its Senior Non-Cumulative Perpetual Preferred Stock, Series C (the Series C Preferred Stock), having a liquidation preference of \$1,000 per share (the Liquidation Amount), for aggregate proceeds of \$72.7 million. On the same date, First Busey redeemed from the Treasury, in part using the proceeds from the issuance of the Series C Preferred Stock, all 100,000 outstanding shares of its Series T Preferred Stock issued under the CPP, for a redemption price of approximately \$100.1 million, including accrued but unpaid dividends to the date of redemption. First Busey remitted a cash payment to the Treasury in the amount of \$27.3 million to cover the difference between the outstanding balance of the Series T Preferred Stock and the proceeds from the issuance of the Series C Preferred Stock. As a result of its redemption of the Series T Preferred Stock, First Busey is no longer subject to the limits on executive compensation and other restrictions stipulated under the CPP.

Dividend Payments

First Busey's ability to pay dividends to its shareholders may be affected by both general corporate law considerations and the policies of the Federal Reserve applicable to bank holding companies. As a Nevada corporation, First Busey is subject to the limitations of Nevada law, which allows First Busey to pay dividends unless, after such dividend, (i) First Busey would not be able to pay its debts as they become due in the usual course of business or (ii) First Busey's total assets would be less than the sum of its total liabilities plus any amount that would be needed, if First Busey were to be dissolved at the time of the dividend payment, to satisfy the preferential rights upon dissolution of shareholders whose rights are superior to the rights of the shareholders receiving the distribution.

As a general matter, the Federal Reserve has indicated that the board of directors of a bank holding company should eliminate, defer or significantly reduce dividends to shareholders if: (i) the company's net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends; (ii) the prospective rate of earnings retention is inconsistent with the company's capital needs and overall current and prospective financial condition; or (iii) the company will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios. The Federal Reserve also possesses enforcement powers over bank holding companies and their nonbank subsidiaries to prevent or remedy actions that represent unsafe or unsound practices or violations of applicable statutes and regulations. Among these powers is the ability to proscribe the payment of dividends by banks and bank holding companies.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

The terms of the Series C Preferred Stock issued in connection with the SBLF impose limits on First Busey's ability to pay dividends on and repurchase shares of its common stock and other securities. In general, through December 31, 2013, First Busey was permitted to declare and pay dividends on its common stock or any other stock junior to the Series C Preferred Stock, or repurchase shares of any such stock, only, if after payment of such dividends or repurchase of such shares, First Busey's Tier 1 Capital would remain at a level equal to at least 90% of the Signing Date Tier 1 Capital (defined as \$307.7 million in the certificate of designations establishing the Series C Preferred Stock), excluding any subsequent net charge-offs and any redemption of the Series C Preferred Stock (the Tier 1 Dividend Threshold). The Tier 1 Dividend Threshold is subject to reduction, beginning with the dividend period commencing on January 1, 2014, by 10% for each 1% increase in the Bank's Qualified Small Business Lending (as defined in the Purchase Agreement) over the baseline level.

Table of Contents

If, however, First Busey fails to declare and pay dividends on the Series C Preferred Stock in a given quarter, then during such quarter and for the next three quarters following such missed dividend payment First Busey may not pay dividends on or repurchase any common stock or any other securities that are junior to (or in parity with) the Series C Preferred Stock, except in very limited circumstances.

Federal Securities Regulation

First Busey's common stock is registered with the SEC under the Securities Exchange Act of 1934, as amended (the Exchange Act). Consequently, First Busey is subject to the information, proxy solicitation, insider trading and other restrictions and requirements of the SEC under the Exchange Act.

Corporate Governance

The Dodd-Frank Act addresses many investor protection, corporate governance and executive compensation matters that will affect most U.S. publicly traded companies. The Dodd-Frank Act will increase shareholder influence over boards of directors by requiring companies to give shareholders a nonbinding vote on executive compensation and so-called golden parachute payments, and authorizing the SEC to promulgate rules that would allow shareholders to nominate and solicit voters for their own candidates using a company's proxy materials. The legislation also directs the Federal Reserve to promulgate rules prohibiting excessive compensation paid to executives of bank holding companies, regardless of whether such companies are publicly traded.

The Bank

General

The Bank is an Illinois-chartered bank. The deposit accounts of the Bank are insured by the FDIC's Deposit Insurance Fund (DIF) to the maximum extent provided under federal law and FDIC regulations. As an Illinois-chartered FDIC-insured bank, the Bank is subject to the examination, supervision, reporting and enforcement requirements of the DFPR, the chartering authority for Illinois banks, and the FDIC, designated by federal law as the primary federal regulator of insured state banks that, like the Bank, are not members of the Federal Reserve System (nonmember banks).

Deposit Insurance

As an FDIC-insured institution, the Bank is required to pay deposit insurance premium assessments to the FDIC. The FDIC has adopted a risk-based assessment system whereby FDIC-insured depository institutions pay insurance premiums at rates based on their risk classification. An institution's risk classification is assigned based on its capital levels and the level of supervisory concern the institution poses to the regulators.

On November 12, 2009, the FDIC adopted a final rule that required insured depository institutions to prepay on December 30, 2009, their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011, and 2012. As such, on December 31, 2009, the Bank prepaid its assessments based on its actual September 30, 2009 assessment base, adjusted quarterly by an estimated 5% annual growth rate through the end of 2012. The FDIC also used the institution's total base assessment rate in effect on September 30, 2009, increasing it by an annualized three basis points beginning in 2011. The FDIC began to offset prepaid assessments on March 30, 2010, representing payment of the

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

regular quarterly risk-based deposit insurance assessment for the fourth quarter of 2009. Any prepaid assessment not exhausted after collection of the amount due on June 30, 2013, was returned to the institution and normal quarterly payments resumed.

Amendments to the Federal Deposit Insurance Act also revise the assessment base against which an insured depository institution's deposit insurance premiums paid to the DIF will be calculated. Under the amendments, the assessment base will no longer be the institution's deposit base, but rather its average consolidated total assets less its average tangible equity. This may shift the burden of deposit insurance premiums toward those large depository institutions that rely on funding sources other than U.S. deposits. Additionally, the Dodd-Frank Act makes changes to the minimum designated reserve ratio of the DIF, increasing the minimum from 1.15% to 1.35% of the estimated amount of total insured deposits, and eliminating the requirement that the FDIC pay dividends to depository institutions when the reserve ratio exceeds certain thresholds. The FDIC has until September 3, 2020 to meet the 1.35% reserve ratio target. Several of these provisions could increase the Bank's FDIC deposit insurance premiums.

The Dodd-Frank Act permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per insured depositor, retroactive to January 1, 2009. Although the legislation provided that non-interest-bearing transaction accounts had unlimited deposit insurance coverage, that program expired on December 31, 2012.

Table of Contents

FICO Assessments

The Financing Corporation (FICO) is a mixed-ownership governmental corporation chartered by the former Federal Home Loan Bank Board pursuant to the Competitive Equality Banking Act of 1987 to function as a financing vehicle for the recapitalization of the former Federal Savings and Loan Insurance Corporation. FICO issued 30-year noncallable bonds of approximately \$8.1 billion that mature in 2017 through 2019. FICO s authority to issue bonds ended on December 12, 1991. Since 1996, federal legislation has required that all FDIC-insured depository institutions pay assessments to cover interest payments on FICO s outstanding obligations. These FICO assessments are in addition to amounts assessed by the FDIC for deposit insurance. The FICO assessment rate is adjusted quarterly and for the fourth quarter of 2013 was approximately 0.0064%, which reflects the change from an assessment base computed on deposits to an assessment base computed on assets, as required by the Dodd-Frank Act.

Supervisory Assessments

Illinois-chartered banks are required to pay supervisory assessments to the DFPR to fund its operations. The amount of the assessment paid by an Illinois bank to the DFPR is calculated on the basis of the institution s total assets, including consolidated subsidiaries, as reported to the DFPR. During the year ended December 31, 2013, the Bank paid supervisory assessments to the DFPR totaling \$0.3 million.

Capital Requirements

Banks are generally required to maintain capital levels in excess of other businesses. For a discussion of capital requirements, see The Increasing Regulatory Emphasis on Capital above.

Dividend Payments

Under the Illinois Banking Act, the Bank generally may not pay dividends in excess of its net profits. The payment of dividends by any financial institution is affected by the requirement to maintain adequate capital pursuant to applicable capital adequacy guidelines and regulations, and a financial institution generally is prohibited from paying any dividends if, following payment thereof, the institution would be undercapitalized. As described above, the Bank exceeded its minimum capital requirements under applicable guidelines as of December 31, 2013. As of December 31, 2013, the Bank was in a retained deficit position and no amount was available to be paid as dividends by the Bank.

Insider Transactions

The Bank is subject to certain restrictions imposed by federal law on covered transactions between the Bank and its affiliates. First Busey is an affiliate of the Bank for purposes of these restrictions, and covered transactions subject to the restrictions include extensions of credit to First Busey, investments in the stock or other securities of First Busey and the acceptance of the stock or other securities of First Busey as collateral for loans made by the Bank. The Dodd-Frank Act enhances the requirements for certain transactions with affiliates as of July 21, 2011, including an expansion of the definition of covered transactions and an increase in the amount of time for which collateral requirements regarding covered transactions must be maintained.

Certain limitations and reporting requirements are also placed on extensions of credit by the Bank to its directors and officers, to directors and officers of First Busey and its subsidiaries, to principal shareholders of First Busey and to related interests of such directors, officers and principal shareholders. In addition, federal law and regulations may affect the terms upon which any person who is a director or officer of First Busey or the Bank, or a principal shareholder of First Busey, may obtain credit from banks with which the Bank maintains a correspondent

relationship.

Safety and Soundness Standards

The federal banking agencies have adopted guidelines that establish operational and managerial standards to promote the safety and soundness of federally insured depository institutions. The guidelines set forth standards for internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees and benefits, asset quality and earnings.

In general, the safety and soundness guidelines prescribe the goals to be achieved in each area, and each institution is responsible for establishing its own procedures to achieve those goals. If an institution fails to comply with any of the standards set forth in the guidelines, the institution's primary federal regulator may require the institution to submit a plan for achieving and maintaining compliance. If an institution fails to submit an acceptable compliance plan, or fails in any material respect to implement a compliance plan that has been accepted by its primary federal regulator, the regulator is required to issue an order directing the institution to cure the deficiency. Until the deficiency cited in the regulator's order is cured, the regulator may restrict the institution's rate of growth, require the institution to increase its capital, restrict the rates the institution pays on deposits or require the institution to take any action the regulator deems appropriate under the circumstances. Noncompliance with the standards established by the safety and soundness guidelines may also constitute grounds for other enforcement action by the federal banking regulators, including cease and desist orders and civil money penalty assessments.

Table of Contents

During the past decade, the bank regulatory agencies have increasingly emphasized the importance of sound risk management processes and strong internal controls when evaluating the activities of the institutions they supervise. Properly managing risks has been identified as critical to the conduct of safe and sound banking activities and has become even more important as new technologies, product innovation, and the size and speed of financial transactions have changed the nature of banking markets. The agencies have identified a spectrum of risks facing a banking institution including, but not limited to, credit, market, liquidity, operational, legal, and reputational risk. In particular, recent regulatory pronouncements have focused on operational risk, which arises from the potential that inadequate information systems, operational problems, breaches in internal controls, fraud, or unforeseen catastrophes will result in unexpected losses. The Bank is expected to have active board and senior management oversight; adequate policies, procedures, and limits; adequate risk measurement, monitoring, and management information systems; and comprehensive internal controls.

Branching Authority

Illinois banks, such as the Bank, have the authority under Illinois law to establish branches anywhere in the State of Illinois, subject to receipt of all required regulatory approvals.

Federal law permits state and national banks to merge with banks in other states subject to: (i) regulatory approval; (ii) federal and state deposit concentration limits; and (iii) state law limitations requiring the merging bank to have been in existence for a minimum period of time (not to exceed five years) prior to the merger. The establishment of new interstate branches or the acquisition of individual branches of a bank in another state (rather than the acquisition of an out-of-state bank in its entirety) has historically been permitted only in those states the laws of which expressly authorize such expansion. However, the Dodd-Frank Act permits well-capitalized and well-managed banks to establish new branches across state lines without these impediments.

State Bank Investments and Activities

The Bank is permitted to make investments and engage in activities directly or through subsidiaries as authorized by Illinois law. However, under federal law, FDIC-insured state banks are prohibited, subject to certain exceptions, from making or retaining equity investments of a type, or in an amount, that are not permissible for a national bank. Federal law also prohibits FDIC-insured state banks and their subsidiaries, subject to certain exceptions, from engaging as principal in any activity that is not permitted for a national bank unless the bank meets, and continues to meet, its minimum regulatory capital requirements and the FDIC determines that the activity would not pose a significant risk to the DIF. These restrictions have not had, and are not currently expected to have, a material impact on the operations of the Bank.

Transaction Account Reserves

Federal Reserve regulations require depository institutions to maintain reserves against their transaction accounts (primarily NOW and regular checking accounts). For 2014: the first \$13.3 million of otherwise reservable balances are exempt from the reserve requirements; for transaction accounts aggregating more than \$13.3 million to \$89.0 million, the reserve requirement is 3% of total transaction accounts; and for net transaction accounts in excess of \$89.0 million, the reserve requirement is \$2,271,000 plus 10% of the aggregate amount of total transaction accounts in excess of \$89.0 million. These reserve requirements are subject to annual adjustment by the Federal Reserve. The Bank is in compliance with the foregoing requirements.

Federal Home Loan Bank System

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

The Bank is a member of the Federal Home Loan Bank of Chicago (the FHLB), which serves as a central credit facility for its members. The FHLB is funded primarily from proceeds from the sale of obligations of the FHLB system. It makes loans to member banks in the form of FHLB advances. All advances from the FHLB are required to be fully collateralized as determined by the FHLB.

Community Reinvestment Act Requirements

The Community Reinvestment Act requires the Bank to have a continuing and affirmative obligation in a safe and sound manner to help meet the credit needs of its entire community, including low- and moderate-income neighborhoods. Federal regulators regularly assess the Bank's record of meeting the credit needs of its communities. Applications for additional acquisitions would be affected by the evaluation of the Bank's effectiveness in meeting its Community Reinvestment Act requirements.

Table of Contents

Anti-Money Laundering

The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the Patriot Act) is designed to deny terrorists and criminals the ability to obtain access to the U.S. financial system and has significant implications for depository institutions, brokers, dealers and other businesses involved in the transfer of money. The Patriot Act mandates financial services companies to have policies and procedures with respect to measures designed to address any or all of the following matters: (i) customer identification programs; (ii) money laundering; (iii) terrorist financing; (iv) identifying and reporting suspicious activities and currency transactions; (v) currency crimes; and (vi) cooperation between financial institutions and law enforcement authorities.

Commercial Real Estate Guidance

The interagency Concentrations in Commercial Real Estate Lending, Sound Risk Management Practices guidance (CRE Guidance) provides supervisory criteria, including the following numerical indicators, to assist bank examiners in identifying banks with potentially significant commercial real estate loan concentrations that may warrant greater supervisory scrutiny: (i) commercial real estate loans exceeding 300% of capital and increasing 50% or more in the preceding three years; or (ii) construction and land development loans exceeding 100% of capital. The CRE Guidance does not limit banks' levels of commercial real estate lending activities, but rather guides institutions in developing risk management practices and levels of capital that are commensurate with the level and nature of their commercial real estate concentrations. Based on the Bank's loan portfolio as of December 31, 2013, it did not exceed these guidelines at such time.

Consumer Financial Services

There are numerous developments in federal and state laws regarding consumer financial products and services that impact the Bank's business. Importantly, the current structure of federal consumer protection regulation applicable to all providers of consumer financial products and services changed significantly on July 21, 2011, when the CFPB commenced operations to supervise and enforce consumer protection laws. The CFPB has broad rulemaking authority for a wide range of consumer protection laws that apply to all providers of consumer products and services, including the Bank, as well as the authority to prohibit unfair, deceptive or abusive acts and practices. The CFPB has examination and enforcement authority over providers with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets, like the Bank, will continue to be examined by their applicable bank regulators. Below are additional recent regulatory developments relating to consumer mortgage lending activities. First Busey does not currently expect these provisions to have a significant impact on Bank operations; however, additional compliance resources will be needed to monitor changes.

Ability-to-Repay Requirement and Qualified Mortgage Rule

The Dodd-Frank Act contains additional provisions that affect consumer mortgage lending. First, it significantly expands underwriting requirements applicable to loans secured by 1-4 family residential real property and augments federal law combating predatory lending practices. In addition to numerous new disclosure requirements, the Dodd-Frank Act imposes new standards for mortgage loan originations on all lenders, including banks and savings associations, in an effort to strongly encourage lenders to verify a borrower's ability to repay, while also establishing a presumption of compliance for certain qualified mortgages. In addition, the Dodd-Frank Act generally requires lenders or securitizers to retain an economic interest in the credit risk relating to loans that the lender sells, and other asset-backed securities that the securitizer issues, if the loans have not complied with the ability-to-repay standards. The risk retention requirement generally will be 5%, but could be increased or decreased by regulation.

On January 10, 2013, the CFPB issued a final rule, effective January 10, 2014, that implements the Dodd-Frank Act's ability-to-repay requirements and clarifies the presumption of compliance for qualified mortgages. In assessing a borrower's ability to repay a mortgage-related obligation, lenders generally must consider eight underwriting factors: (i) current or reasonably expected income or assets; (ii) current employment status; (iii) monthly payment on the subject transaction; (iv) monthly payment on any simultaneous loan; (v) monthly payment for

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

all mortgage-related obligations; (vi) current debt obligations, alimony, and child support; (vii) monthly debt-to-income ratio or residual income; and (viii) credit history. The final rule also includes guidance regarding the application of, and methodology for evaluating, these factors.

Further, the final rule also clarifies that qualified mortgages do not include no-doc loans and loans with negative amortization, interest-only payments, balloon payments, terms in excess of 30 years, or points and fees paid by the borrower that exceed 3% of the loan amount, subject to certain exceptions. In addition, for qualified mortgages, the monthly payment must be calculated on the highest payment that will occur in the first five years of the loan, and the borrower's total debt-to-income ratio generally may not be more than 43%.

Table of Contents

The final rule also provides that certain mortgages that satisfy the general product feature requirements for qualified mortgages and that also satisfy the underwriting requirements of Fannie Mae and Freddie Mac (while they operate under federal conservatorship or receivership), or the U.S. Department of Housing and Urban Development, Department of Veterans Affairs, or Department of Agriculture or Rural Housing Service, are also considered to be qualified mortgages. This second category of qualified mortgages will phase out as the aforementioned federal agencies issue their own rules regarding qualified mortgages, the conservatorship of Fannie Mae and Freddie Mac ends, and, in any event, after seven years.

As set forth in the Dodd-Frank Act, subprime (or higher-priced) mortgage loans are subject to the ability-to-repay requirement, and the final rule provides for a rebuttable presumption of lender compliance for those loans. The final rule also applies the ability-to-repay requirement to prime loans, while also providing a conclusive presumption of compliance (*i.e.*, a safe harbor) for prime loans that are also qualified mortgages. Additionally, the final rule generally prohibits prepayment penalties (subject to certain exceptions) and sets forth a 3-year record retention period with respect to documenting and demonstrating the ability-to-repay requirement and other provisions.

Changes to Mortgage Loan Originator Compensation

Effective April 2, 2011, previously existing regulations concerning the compensation of mortgage loan originators were amended. As a result of these amendments, mortgage loan originators may not receive compensation based on a mortgage transaction's terms or conditions other than the amount of credit extended under the mortgage loan. Further, the new standards limit the total points and fees that a bank and/or a broker may charge on conforming and jumbo loans to 3% of the total loan amount. Mortgage loan originators may receive compensation from a consumer or from a lender, but not both. These rules contain requirements designed to prohibit mortgage loan originators from steering consumers to loans that provide mortgage loan originators with greater compensation. In addition, the rules contain other requirements concerning recordkeeping.

Servicing

On January 17, 2013, the CFPB announced rules to implement certain provisions of the Dodd-Frank Act relating to mortgage servicing. The new servicing rules require servicers to meet certain benchmarks for loan servicing and customer service in general. Servicers must provide periodic billing statements and certain required notices and acknowledgments, promptly credit borrowers' accounts for payments received and promptly investigate complaints by borrowers and are required to take additional steps before purchasing insurance to protect the lender's interest in the property. The new servicing rules also call for additional notice, review and timing requirements with respect to delinquent borrowers, including early intervention, ongoing access to servicer personnel and specific loss mitigation and foreclosure procedures. The rules provide for an exemption from most of these requirements for small servicers. A small servicer is defined as a loan servicer that services 5,000 or fewer mortgage loans and services only mortgage loans that they or an affiliate originated or own. The new servicing rules took effect on January 10, 2014. Bank management is continuing to evaluate the full impact of these rules and their impact on mortgage servicing operations.

Foreclosure and Loan Modifications

Federal and state laws further impact foreclosures and loan modifications, with many of such laws having the effect of delaying or impeding the foreclosure process on real estate secured loans in default. Mortgages on commercial property can be modified, such as by reducing the principal amount of the loan or the interest rate, or by extending the term of the loan, through plans confirmed under Chapter 11 of the Bankruptcy Code. In recent years, legislation has been introduced in the U.S. Congress that would amend the Bankruptcy Code to permit the modification of mortgages secured by residences, although at this time the enactment of such legislation is not presently proposed. The scope, duration and terms of potential future legislation with similar effect continue to be discussed. First Busey cannot predict whether any such legislation will be passed or the impact, if any, it would have on First Busey's business.

Monetary Policy

The monetary policy of the Federal Reserve has a significant effect on the operating results of financial or bank holding companies and their subsidiaries. Among the tools available to the Federal Reserve to affect the money supply are open market transactions in U.S. government securities, changes in the discount rate on member bank borrowings and changes in reserve requirements against member bank deposits. These means are used in varying combinations to influence overall growth and distribution of bank loans, investments and deposits, and their use may affect interest rates charged on loans or paid on deposits.

Table of Contents

The Volcker Rule

In addition to other implications of the Dodd-Frank Act discussed above, the act amends the BHCA to require the federal regulatory agencies to adopt rules that prohibit banks and their affiliates from engaging in proprietary trading and investing in and sponsoring certain unregistered investment companies (defined as hedge funds and private equity funds). This statutory provision is commonly called the Volcker Rule. On December 10, 2013, the federal regulatory agencies issued final rules to implement the prohibitions required by the Volcker Rule. Thereafter, in reaction to industry concern over the adverse impact to community banks of the treatment of certain collateralized debt instruments in the final rule, the federal regulatory agencies approved an interim final rule to permit banking entities to retain interests in collateralized debt obligations backed primarily by trust preferred securities (TruPS CDOs) from the investment prohibitions contained in the final rule. Under the interim final rule, the agencies permit the retention of an interest in or sponsorship of covered funds by banking entities under \$15 billion in assets if the following qualifications are met:

- The TruPS CDO was established, and the interest was issued, before May 19, 2010;
- The banking entity reasonably believes that the offering proceeds received by the TruPS CDO were invested primarily in qualifying TruPS collateral; and
- The banking entity's interest in the TruPS CDO was acquired on or before December 10, 2013.

Although the Volcker Rule has significant implications for many large financial institutions, First Busey does not currently anticipate that the Volcker Rule will have a material effect on the operations of First Busey or the Bank. First Busey may incur costs if it is required to adopt additional policies and systems to ensure compliance with the Volcker Rule, but any such costs are not expected to be material. Until the application of the final rules is fully understood, the precise financial impact of the rule on First Busey, the Bank, their customers or the financial industry more generally, cannot be determined.

The Trust Company

Busey Wealth Management is an Illinois corporation that operates under a certificate of authority to exercise trust powers issued by the DFPR. As such, Busey Wealth Management is subject to the examination, supervision, reporting and enforcement requirements established for trust companies by the DFPR. Additionally, because Busey Wealth Management is a wholly-owned subsidiary of First Busey, the Federal Reserve, as the primary federal regulator of First Busey, has the authority to conduct such examinations of Busey Wealth Management as the Federal Reserve deems necessary. Busey Wealth Management is required to maintain capital at the level determined by the DFPR to be necessary for the safe and sound operation of Busey Wealth Management. Like Busey Bank, Busey Wealth Management is required to pay supervisory assessments to the DFPR, which, for the year ended December 31, 2013, totaled \$0.1 million.

Table of Contents

Employees

As of December 31, 2013, First Busey and its subsidiaries had a total of 849 employees (full-time equivalents).

Executive Officers

Following is a description of the business experience for at least the past five years of our executive officers.

Van A. Dukeman. Mr. Dukeman, age 55, has served as a Director, Chief Executive Officer and President of First Busey since August 2007. Effective February 28, 2009 through March 31, 2010, Mr. Dukeman also served as the Chief Executive Officer and President of the Bank. Prior to August 2007, Mr. Dukeman served as a Director, Chief Executive Officer and President of Main Street Trust, Inc. until its merger with First Busey.

Robin N. Elliott. Mr. Elliott, age 37, was appointed Chief Financial Officer of First Busey effective on January 1, 2014. Mr. Elliott had previously served as Director of the Business Banking Group of the Bank since November 2011. Prior to that appointment, he had served as Director of Finance & Treasury since joining the organization in 2006.

Barbara J. Harrington. Mrs. Harrington, age 54, has served as Chief Risk Officer of First Busey since March 2010, prior to which she had served as Chief Financial Officer of First Busey since March 1999. She also served as Controller and Senior Vice President of the Bank from December 1994 to March 1999, and has served in various financial and accounting positions since joining the organization in 1991.

Howard F. Mooney II. Mr. Mooney, age 49, has served as President and Chief Executive Officer of FirsTech Inc., our payment processing subsidiary, since 2000. In addition, Mr. Mooney has served as Chief Information Officer of First Busey since January 1, 2014. Prior to our August 2007 merger, FirsTech was a subsidiary of Main Street Trust, Inc.

Robert F. Plecki, Jr. Mr. Plecki, age 53, has served as Executive Vice President and Chief Operating Officer of First Busey since October 2012 and continued to serve as Chief Credit Officer of First Busey since March 2010. Mr. Plecki has also served as President & Chief Executive Officer of Busey Wealth Management since October 2013. Prior to March 2010, he had served as Executive Vice President of our southwest Florida market since early 2009. Prior to that he served as Executive Vice President of our Champaign-Urbana market following First Busey's merger with Main Street Trust in 2007, and, prior to the merger, had served as President of Main Street Bank & Trust Retail Banking since 2004.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

John J. Powers. Mr. Powers, age 58, has served as General Counsel of First Busey since December 2011. Prior to that, he was a shareholder of Meyer Capel, P.C., a law firm based in Champaign, Illinois, since 1998.

Christopher M. Shroyer. Mr. Shroyer, age 48, has served as President and Chief Executive Officer of the Bank since March 2010, prior to which he had served as Executive Vice President of our East Region since early 2009. Prior to 2009, he served as Executive Vice President of our Decatur market following First Busey's merger with Main Street Trust in 2007, and, prior to the merger, had served as Executive Vice President of Main Street Bank & Trust Commercial Banking since 2004.

Securities and Exchange Commission Reporting and Other Information

First Busey's web site address is www.busey.com. We make available on this web site our Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments thereto, as reasonably practicable after such reports are filed with the SEC, and in any event, on the same day as such filing with the SEC. Reference to this web site does not constitute incorporation by reference of the information contained on the web site and should not be considered part of this document.

First Busey has adopted a code of ethics applicable to our employees, officers, and directors. The text of this code of ethics may be found under Investor Relations on our website.

Special Cautionary Note Regarding Forward-Looking Statements

Certain statements contained in or incorporated by reference into this Annual Report on Form 10-K that are not historical facts may constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Exchange Act. These forward-looking statements are covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. These statements, which are based on certain assumptions and estimates and describe our future plans, strategies and expectations, can generally be identified by the use of the words may, will, should, could, would, potential, estimate, project, believe, intend, anticipate, expect, target, aim and similar expressions. These statements relate to our projected growth, anticipated future financial performance, financial condition, credit quality and management's long-term performance goals, as well as statements relating to the anticipated effects on results of operations and financial condition from expected developments or events, our business and growth strategies and any other statements that are not historical facts.

These forward-looking statements are subject to significant risks, assumptions and uncertainties, and could be affected by many factors. Factors that could have a material adverse effect on our financial condition, results of operations and future prospects can be found under Item 1A Risk Factors in this Annual Report on Form 10-K and elsewhere in our periodic and current reports filed with the SEC. These factors include, but are not limited to, the following:

- the strength of the local and national economy;
- changes in state and federal laws, regulations and governmental policies concerning First Busey's general business (including the impact of the Dodd-Frank Act and the extensive regulations to be promulgated thereunder, as well as the recently adopted Basel III Rule);
- changes in interest rates and prepayment rates of First Busey's assets;
- increased competition in the financial services sector and the inability to attract new customers;
- changes in technology and the ability to develop and maintain secure and reliable electronic systems;
- the loss of key executives or employees;

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

- changes in consumer spending;
- unexpected results of acquisitions;
- unexpected outcomes of existing or new litigation involving First Busey;
- the economic impact of any future terrorist threats or attacks;
- the economic impact of exceptional weather occurrences such as tornadoes, hurricanes, floods, and blizzards;
- changes in accounting policies and practices; and
- other factors and risks described under Risk Factors herein.

Because of those risks and other uncertainties, our actual future results, performance or achievement, or industry results, may be materially different from the results indicated by these forward-looking statements. In addition, our past results of operations are not necessarily indicative of our future results.

You should not place undue reliance on any forward-looking statements, which speak only as of the dates on which they were made. We are not undertaking an obligation to update these forward-looking statements, even though circumstances may change in the future, except as required under federal securities law. We qualify all of our forward-looking statements by these cautionary statements.

Table of Contents

Item 1A. Risk Factors

This section highlights the risks management believes could adversely affect our financial performance. Additional possible risks that could affect us adversely and cannot be predicted may arise at any time. Other risks that are immaterial at this time may also have an adverse effect on our future financial condition.

General economic or business conditions could have an adverse effect on our business, financial condition and results of operations.

Our business activities and earnings are affected by general business and economic conditions in the United States and, particularly, in the states in which we operate. These conditions include legislative and regulatory changes, short-term and long-term interest rates, inflation, employment rates, real estate values and sales prices and changes in government monetary and fiscal policies, all of which are beyond our control.

Although it has recently shown continued signs of improvement, since the financial crisis beginning in late 2007, the U.S. economy has generally experienced challenging economic conditions. If current economic conditions do not continue to improve, or even if they do, our business, growth and profitability may suffer. To the extent that our business customers' underlying businesses are harmed as a result of the general economic environment, our customers are more likely to default on their loans, which would adversely affect our financial condition and results of operations.

The Company's performance depends significantly on the financial condition of and the economic conditions in the states in which it operates.

The largest portion of the Company's customer base is within the State of Illinois, the financial condition of which is among the most troubled of any state in the United States with credit downgrade concerns, severe pension under-funding, recurring bill payment delays, and budget deficits. State budget restructuring to improve its financial condition may have negative financial effects on local governments and businesses, their employees, and directly and indirectly our customers. Conversely, a continued lack of state budget restructuring to achieve budget balance and growing debt burden may also have negative financial effects on local governments and businesses, their employees, and directly and indirectly our customers.

The Company is located in markets with significant university and healthcare presence, which rely heavily on state funding and contracts. The State of Illinois continues to be behind on payments to its vendors and government sponsored entities. Further and continued payment lapses by the State of Illinois to its vendors and government sponsored entities may have significant, negative effects on our primary market areas, which could in turn adversely affect our financial condition and results of operations. In addition, adverse changes in agribusiness and capital goods exports could materially adversely affect our downstate Illinois markets, which are heavily reliant upon these industries.

Further, southwest Florida was particularly impacted by the downturn in economic conditions in recent years and real estate activity and values continue to be depressed relative to historical levels. As a result, we experienced a deterioration of asset quality in the southwest Florida market relative to periods prior to 2007. Another downturn in economic conditions, particularly within our primary market areas, could result in a

decrease in demand for our products and services, an increase in loan delinquencies and defaults, high or increased levels of problem assets and foreclosures and reduced wealth management fees resulting from lower asset values.

Market volatility could have an adverse effect on us.

In certain periods in the past, the capital and credit markets have experienced heightened volatility and disruption. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to those issuers' underlying financial condition or performance. If the capital and credit markets experience these heightened levels of disruption and volatility again, we may experience material adverse effects on our customers' and our ability to maintain or access capital and on our business, financial condition and results of operations.

Table of Contents

Liquidity risks could affect operations and jeopardize our business, financial condition and results of operations.

Liquidity is essential to our business. An inability to raise funds through deposits, borrowings, the sale of loans and other sources could have a substantial negative effect on our liquidity. Our primary sources of funds consist of cash from operations, investment maturities and sales, deposits and funds from sales of capital securities. Additional liquidity is available through brokered deposits, repurchase agreements and the ability to borrow from the Federal Reserve Bank and the Federal Home Loan Bank. Our access to funding sources in amounts adequate to finance or capitalize our activities or on terms that are acceptable to us could be impaired by factors that affect us directly or the financial services industry or economy in general, such as disruptions in the financial markets or negative views and expectations about the prospects for the financial services industry.

During periods of economic turmoil, the financial services industry and the credit markets generally may be materially and adversely affected by significant declines in asset values and depressed levels of liquidity. These and other factors could negatively affect the Company's ability to engage in routine funding and other transactions with other financial institutions, lead to market-wide liquidity problems, loss of depositor, creditor, and counterparty confidence which could lead to losses or defaults by us or by other institutions. Furthermore, regional and community banks generally have less access to the capital markets than do the national and super-regional banks because of their smaller size and limited analyst coverage.

Any decline in available funding and/or capital could adversely impact our ability to originate loans, invest in securities, meet our expenses, pay dividends to our stockholders, or meet deposit withdrawal demands, any of which could have a material adverse impact on our liquidity, business, financial condition and results of operations.

Non-performing assets take significant time to resolve and adversely affect our results of operations and financial condition, and could result in further losses in the future.

At December 31, 2013 and 2012, our non-performing loans (which consist of non-accrual loans and loans past due 90 days or more and still accruing loans) totaled \$17.4 million and \$25.4 million, or 0.76% and 1.22% of our loan portfolio, respectively. At December 31, 2013 and 2012, our non-performing assets (which include non-performing loans plus other real estate owned and other repossessed assets) were \$19.5 million and \$28.8 million, or 0.55% and 0.80% of total assets, respectively. Our non-performing assets adversely affect our net income in various ways. While we pay interest expense to fund non-performing assets, we do not record interest income on non-accrual loans or other real estate owned, thereby adversely affecting our income and returns on assets and equity, and our loan administration costs increase and our efficiency ratio is adversely affected. When we take collateral in foreclosures and similar proceedings, we are required to mark the collateral to its then-fair market value, which, when compared to the outstanding balance of the loan, may result in a loss. These non-performing loans and other real estate owned also increase our risk profile and the capital our regulators believe is appropriate in light of such risks. The resolution of non-performing assets requires significant time commitments from management, which can be detrimental to the performance of their other responsibilities. We cannot guarantee that we will not experience increases in non-performing loans in the future, and our non-performing assets may result in further losses in the future.

Our allowance for loan losses may be insufficient to absorb actual losses in our loan portfolio.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

We establish our allowance for loan losses and maintain it at a level considered adequate by management to absorb probable loan losses based on a continual analysis of our portfolio and market environment. The allowance for loan losses represents our estimate of probable losses in the portfolio at each balance sheet date and is based upon other relevant information available to us. The allowance contains provisions for probable losses that have been identified relating to specific borrowing relationships, as well as probable losses inherent in the loan portfolio and credit undertakings that are not specifically identified. Additions to the allowance for loan losses, which are charged to earnings through the provision for loan losses, are determined based on a variety of factors, including an analysis of the loan portfolio, historical loss experience and an evaluation of current economic conditions in the relevant market areas. The actual amount of loan losses is affected by changes in economic, operating and other conditions within our markets, which may be beyond our control, and such losses may exceed current estimates.

Our allowance for loan losses at December 31, 2013 and 2012 was \$47.6 million and \$48.0 million, respectively. At December 31, 2013 and 2012, our allowance for loan losses as a percentage of total loans was 2.1% and 2.3%, respectively, and as a percentage of total non-performing loans was 274.0% and 189.3%, respectively.

Table of Contents

Although management believes that the allowance for loan losses is adequate to absorb losses on any existing loans that may become uncollectible, we cannot guarantee that we will not be required to record additional provisions for loan losses in the future, either due to management's decision to do so or requirements by the regulators, to further supplement the allowance for loan losses, particularly if economic conditions unfold in a manner which differs significantly from what management currently expects. Additional provisions to the allowance for loan losses and loan losses in excess of our allowance for loan losses may adversely affect our business, financial condition and results of operations.

A significant portion of the loans in our portfolio is secured by real estate.

At December 31, 2013, approximately 79.0% of our loans were collateralized by real estate. The market value of real estate can fluctuate significantly in a short period of time as a result of market conditions in the area in which the real estate is located. Adverse changes affecting real estate values and the liquidity of real estate in one or more of our markets could increase the credit risk associated with our loan portfolio, and could result in losses which would adversely affect profitability. Such changes especially affected our southwest Florida market in recent years during the financial crisis which began in late 2007. Adverse changes in the economy affecting real estate values and liquidity generally, and in downstate Illinois and southwest Florida specifically, could significantly impair the value of property pledged as collateral on loans and affect our ability to sell the collateral upon foreclosure without a loss or additional losses. Collateral may have to be sold for less than the outstanding balance of the loan which would result in losses.

Commercial and industrial loans make up a significant portion of our loan portfolio.

Commercial and industrial loans were \$580.6 million, or approximately 25.3% of our total loan portfolio, as of December 31, 2013. Our commercial loans are primarily made based on the identified cash flow of the borrower and secondarily on the underlying collateral provided by the borrower. Most often, this collateral is accounts receivable, inventory, machinery or real estate. Credit support provided by the borrower for most of these loans and the probability of repayment is based on the liquidation of the pledged collateral and enforcement of a personal guarantee, which we require whenever appropriate on commercial loans. As a result, in the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers. The collateral securing other loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business. Due to the larger average size of each commercial loan as compared with other loans such as residential loans, as well as collateral that is generally less readily-marketable, losses incurred on a small number of commercial loans could have a material adverse impact on our financial condition and results of operations.

Real estate construction, land acquisition and development loans are based upon estimates of costs and values associated with the complete project. These estimates may be inaccurate, and we may be exposed to significant losses on loans for these projects.

Construction, land acquisition, and development loans comprised approximately 3.4% of our total loan portfolio at December 31, 2013, and such lending involves additional risks because funds are advanced upon the security of the project, which is of uncertain value prior to its completion, and costs may exceed realizable values in declining real estate markets. Because of the uncertainties inherent in estimating construction costs and the realizable market value of the completed project and the effects of governmental regulation on real property, it is relatively difficult to evaluate accurately the total funds required to complete a project and the related loan-to-value ratio. As a result, construction loans often involve the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project and the ability of the borrower to sell or lease the property, rather than the ability of the borrower or guarantor to repay principal and interest. If our appraisal of the value of the completed project proves to be overstated or market values or rental rates decline, we may have inadequate security for the repayment of the

loan upon completion of construction of the project. If we are forced to foreclose on a project prior to or at completion due to a default, there can be no assurance that we will be able to recover all of the unpaid balance of, and accrued interest on, the loan as well as related foreclosure and holding costs. In addition, we may be required to fund additional amounts to complete the project and may have to hold the property for an unspecified period of time while we attempt to dispose of it.

Table of Contents

Credit risk cannot be eliminated.

There are risks in making any loan, including risks inherent in dealing with individual borrowers, risks of nonpayment, risks resulting from uncertainties as to the future value of collateral and cash flows available to service debt and risks resulting from economic and market conditions. We attempt to reduce our credit risk through loan application approval procedures, monitoring the concentration of loans within specific industries and geographic location, and periodic independent reviews of outstanding loans by our loan review and audit departments as well as external parties. However, while such procedures should reduce our risks, they cannot be expected to completely eliminate our credit risks. Our borrowers may experience difficulties in repaying their loans for any of a variety of reasons resulting in a rise in the level of nonperforming loans, charge-offs and delinquencies and/or a need for increases in the provision for loan losses, which would cause our net income and return on equity to decrease.

Our business is subject to interest rate risk, and variations in interest rates may harm our financial performance.

Our earnings and profitability depend significantly on our net interest income. Net interest income represents the difference between interest income and fees earned on interest-earning assets and interest expense incurred on interest-bearing liabilities. In the event that interest paid on deposits and borrowings increases faster than the interest earned on loans and investments, there may be a negative impact on our net interest income. Changes in interest rates could also adversely affect the income of certain components of our noninterest income and affect the values of our investment securities. An increase in interest rates may also affect our customers' ability to make payments on their loans, which could in turn increase loan losses. In addition, higher interest rates could also increase our costs of deposits and borrowed funds.

We are unable to predict or control fluctuations in market interest rates, which are affected by the economy as well as fiscal and monetary policies; however, competition for loans in the marketplace and the overall interest rate environment has kept current interest rates low relative to historical levels. Interest rates paid on deposit products have declined significantly in recent years, but further significant decline is unlikely as interest rates on deposits have approached zero. We expect net interest margin compression in 2014 to continue to require our focus with interest rates at generational lows.

We are required to maintain capital to meet regulatory requirements, and if we fail to maintain sufficient capital, whether due to losses, an inability to raise additional capital or otherwise, our financial condition, liquidity and results of operations, as well as our ability to maintain regulatory compliance, would be adversely affected.

First Busey, the Bank and Busey Wealth Management must meet regulatory capital requirements and maintain sufficient liquidity. Our ability to raise additional capital, when and if needed, will depend on conditions in the capital markets, economic conditions and a number of other factors, including investor perceptions regarding the banking industry and market condition, and governmental activities, many of which are outside our control, and on our financial condition and performance. Accordingly, we cannot guarantee that we will be able to raise additional capital if needed or on terms acceptable to us. If we fail to meet these capital and other regulatory requirements, our financial condition, liquidity and results of operations would be materially and adversely affected.

Our failure to continue to maintain capital ratios in excess of the amounts necessary to be considered well-capitalized for bank regulatory purposes could affect customer confidence, our ability to grow, our costs of funds and FDIC insurance costs, our ability to pay dividends on

common and preferred stock and to make distributions on our trust preferred securities, our ability to make acquisitions, and our business, results of operations and financial condition. Furthermore, under FDIC rules, if the Bank ceases to meet the requirements to be considered a well-capitalized institution for bank regulatory purposes, the interest rates that it pays on deposits and its ability to accept, renew or rollover deposits, particularly brokered deposits, may be restricted. As of December 31, 2013 the Bank did not have any brokered deposits.

We face the risk of possible future goodwill impairment.

Because of a significant decline in our market capitalization during 2009, our goodwill related to our banking operations was determined to be fully impaired and we recorded an impairment charge of \$208.2 million. We performed a valuation analysis of our remaining goodwill, \$20.7 million related to Busey Wealth Management and FirsTech, as of December 31, 2013, and the analysis indicated no impairment existed. We will be required to perform additional goodwill impairment assessments on no less than an annual basis, and perhaps more frequently, which could result in further goodwill impairment charges. Any future goodwill impairment charge we are required to take could have a material adverse effect on our results of operations by reducing our net income or increasing our net losses in the periods that we recognize an impairment charge.

Table of Contents

Issuances or sales of common stock or other equity securities could result in an ownership change as defined for U.S. federal income tax purposes. If an ownership change were to occur, we could realize a loss of a portion of our U.S. federal and state deferred tax assets, including certain built-in losses that have not been recognized for tax purposes, as a result of the operation of Section 382 of the Internal Revenue Code of 1986, as amended. The amount of the permanent loss would be determined by the annual limitation period and the carryforward period (generally up to 20 years for U.S. federal net operating losses). Any resulting loss could have a material adverse effect on our results of operations and financial condition.

While we have established a full valuation allowance against certain state net operating loss carryforwards, we did not establish a valuation allowance against our U.S. federal or Illinois deferred tax assets as of December 31, 2013, as we believed that it was more likely than not that all of these assets would be realized. An important element in our analysis was that we do not believe we have had an ownership change under Section 382 of the Internal Revenue Code of 1986, as amended, or the Code. Section 382 imposes restrictions on the use of a corporation's net operating losses, certain recognized built-in losses and other carry-overs after an ownership change occurs. An ownership change generally occurs if the aggregate percentage ownership of the stock of the corporation held by one or more 5% stockholders increases by more than 50 percentage points over the aggregate of such stockholders' lowest percentage ownership during the testing period, which is generally the three-year period ending on the transaction date. Upon an ownership change, a corporation generally is subject to an annual limitation on its utilization of pre-ownership change losses, including certain recognized built-in losses, equal to the value of the stock of the corporation immediately before the ownership change (subject to certain adjustments), multiplied by the long-term tax-exempt rate. A number of special rules apply to calculating this annual limit. The annual limitation is increased each year to the extent that there is an unused limitation in a prior year. Because U.S. federal net operating losses generally may be carried forward for up to 20 years, the annual limitation may effectively provide a cap on the cumulative amount of pre-ownership change losses, including certain recognized built-in losses that may be utilized. Such pre-ownership change losses in excess of the cap may be lost. In addition, if an ownership change were to occur, it is possible that the limitations imposed on our ability to use pre-ownership change losses and certain recognized built-in losses could cause a net increase in our U.S. federal income tax liability and U.S. federal income taxes to be paid earlier than otherwise would be paid if such limitations were not in effect.

The relevant calculations under Section 382 are technical and highly complex and depend on changes in percentage stock ownership among stockholders. If an ownership change were to occur, we currently believe that any limitations imposed on our use of pre-transaction losses by Section 382 will not significantly affect our ability to use such losses. In some circumstances, however, issuances or sales of our stock (including certain transactions involving our stock that are outside of our control) could result in an ownership change under Section 382. An ownership change could occur if, due to the sale or issuance of additional common stock, the aggregate ownership of one or more persons treated as 5% stockholders were to increase by more than 50 percentage points over such stockholders' lowest percentage ownership during the relevant testing period. There are currently no restrictions on the transfer of our stock that would discourage or prevent transactions that could cause an ownership change, although we may adopt such restrictions in the future. In addition, we have not obtained, and currently do not plan to obtain, a ruling from the Internal Revenue Service regarding our conclusion as to whether an ownership change has occurred and we are subject to limitations on our pre-ownership change losses and recognized built-in losses.

Furthermore, we may decide in the future that it is necessary or in our interest to take certain actions that could result in an ownership change. Therefore, no assurance can be provided as to whether an ownership change has occurred or will occur in the future. As of December 31, 2013, our net deferred tax assets reflected on our balance sheet were approximately \$35.6 million. If an ownership change were to occur, it is possible that we could permanently lose the ability to realize a portion of this asset, resulting in reduction to our total stockholders' equity. This could also decrease the Bank's regulatory capital.

We have significant deferred tax assets and cannot assure it will be fully realized.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

We had net deferred tax assets of \$35.6 million as of December 31, 2013. Other than a valuation allowance against certain state net operating loss carryforwards, we did not establish a valuation allowance against our net deferred tax assets as of December 31, 2013, as we believe that it is more likely than not that all of these assets will be realized. In evaluating the need for a valuation allowance, we estimated future taxable income based on management forecasts and tax planning strategies that may be available to us. This process required significant judgment by management about matters that are by their nature uncertain.

Table of Contents

If future events differ significantly from our current forecasts, we may need to establish a valuation allowance against our net deferred tax assets, which would have a material adverse effect on our results of operations and financial condition. In addition, a significant portion of the net deferred tax assets relates to a tax-effected \$23.4 million net operating loss carryforward as of December 31, 2013, the utilization of which may be further limited in the event of certain material changes in our ownership.

Recent legislative and regulatory reforms applicable to the financial services industry may have a significant impact on our business, financial condition and results of operations.

The laws, regulations, rules, policies and regulatory interpretations governing us are constantly evolving and may change significantly over time as Congress and various regulatory agencies react to adverse economic conditions or other matters. The global financial crisis of 2008-2009 served as a catalyst for a number of significant changes in the financial services industry, including the Dodd-Frank Act, which reformed the regulation of financial institutions in a comprehensive manner, and the Basel III regulatory capital reforms, which will increase both the amount and quality of capital that financial institutions must hold.

The Dodd-Frank Act, together with the regulations developed and to be developed thereunder, affects large and small financial institutions alike, including several provisions that impact how community banks, thrifts and small bank and thrift holding companies will operate in the future. Among other things, the Dodd-Frank Act changes the base for FDIC insurance assessments to a bank's average consolidated total assets minus average tangible equity, rather than its deposit base, permanently raises the current standard deposit insurance limit to \$250,000, and expands the FDIC's authority to raise the premiums we pay for deposit insurance. The legislation allows financial institutions to pay interest on business checking accounts, contains provisions on mortgage-related matters (such as steering incentives, determinations as to a borrower's ability to repay and prepayment penalties) and establishes the CFPB as an independent entity within the Federal Reserve. This entity has broad rulemaking, supervisory and enforcement authority over consumer financial products and services, including deposit products, residential mortgages, home-equity loans and credit cards. Moreover, the Dodd-Frank Act includes provisions that affect corporate governance and executive compensation at all publicly traded companies.

In addition, in July 2013, the U.S. federal banking authorities approved the implementation of the Basel III Rule. The Basel III Rule is applicable to all U.S. banks that are subject to minimum capital requirements as well as to bank and saving and loan holding companies, other than small bank holding companies (generally bank holding companies with consolidated assets of less than \$500 million). The Basel III Rule not only increases most of the required minimum regulatory capital ratios, it introduces a new Common Equity Tier 1 Capital ratio and the concept of a capital conservation buffer. The Basel III Rule also expands the current definition of capital by establishing additional criteria that capital instruments must meet to be considered Additional Tier 1 Capital (i.e., Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that now generally qualify as Tier 1 Capital will not qualify or their qualifications will change when the Basel III Rule is fully implemented. However, the Basel III Rule permits banking organizations with less than \$15 billion in assets to retain, through a one-time election, the existing treatment for accumulated other comprehensive income, which currently does not affect regulatory capital. The Basel III Rule has maintained the general structure of the current prompt corrective action thresholds while incorporating the increased requirements, including the Common Equity Tier 1 Capital ratio. In order to be a well-capitalized depository institution under the new regime, an institution must maintain a Common Equity Tier 1 Capital ratio of 6.5% or more, a Tier 1 Capital ratio of 8% or more, a Total Capital ratio of 10% or more, and a leverage ratio of 5% or more. Institutions must also maintain a capital conservation buffer consisting of Common Equity Tier 1 Capital. Generally, financial institutions will become subject to the Basel III Rule on January 1, 2015 with a phase-in period through 2019 for many of the changes.

The implementation of these provisions, as well as any other aspects of current or proposed regulatory or legislative changes to laws applicable to the financial industry, will impact the profitability of our business activities and may change certain of our business practices, including the ability to offer new products, obtain financing, attract deposits, make loans, and achieve satisfactory interest spreads, and could expose us to

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

additional costs, including increased compliance costs. These changes also may require us to invest significant management attention and resources to make any necessary changes to operations in order to comply, and could therefore also materially and adversely affect our business, financial condition and results of operations. Our management is actively reviewing the provisions of the Dodd-Frank Act and the Basel III Rule, many of which are to be phased-in over the next several months and years, and assessing the probable impact on our operations. However, the ultimate effect of these changes on the financial services industry in general, and us in particular, is uncertain at this time.

Table of Contents

Monetary policies and regulations of the Federal Reserve could adversely affect our business, financial condition and results of operations.

In addition to being affected by general economic conditions, our earnings and growth are affected by the policies of the Federal Reserve. An important function of the Federal Reserve is to regulate the money supply and credit conditions. Among the instruments used by the Federal Reserve to implement these objectives are open market operations in U.S. government securities and adjustments of the discount rate. These instruments are used in varying combinations to influence overall economic growth and the distribution of credit, bank loans, investments and deposits. Their use also affects interest rates charged on loans or paid on deposits.

The monetary policies and regulations of the Federal Reserve have had a significant effect on the operating results of commercial banks in the past and are expected to continue to do so in the future. The effects of such policies upon our business, financial condition and results of operations cannot be predicted.

Our strategy of pursuing acquisitions exposes us to financial, execution and operational risks that could negatively affect us.

We have historically pursued a strategy of supplementing organic growth by acquiring other financial institutions in our market areas and in nearby markets that will help us fulfill our strategic objectives and enhance our earnings. As our capital position and asset quality allow, we may again supplement organic growth through acquisitions, possibly through FDIC-assisted transactions involving acquisitions of failed depository institutions. There are risks associated with an acquisition strategy, however, including the following:

- We are exposed to potential asset and credit quality risks and unknown or contingent liabilities of the banks or businesses we acquire. If these issues or liabilities exceed our estimates, our earnings and financial condition may be materially and adversely affected.
- Prices at which acquisitions can be made fluctuate with market conditions. We have experienced times during which acquisitions could not be made in specific markets at prices our management considered acceptable and expect that we will experience this condition in the future in one or more markets.
- The acquisition of other entities generally requires integration of systems, procedures and personnel of the acquired entity in order to make the transaction economically feasible. This integration process is complicated and time consuming and can also be disruptive to the customers of the acquired business. If the integration process is not conducted successfully and with minimal effect on the acquired business and its customers, we may not realize the anticipated economic benefits of particular acquisitions within the expected time frame, and we may lose customers or employees of the acquired business. We may also experience greater than anticipated customer losses even if the integration process is successful.
- To finance an acquisition, we may borrow funds, thereby increasing our leverage and diminishing our liquidity, or issue capital stock to the sellers in an acquisition or to third-parties to raise capital, which could dilute the interests of our existing stockholders.

- We may be unsuccessful in realizing the anticipated benefits from any future acquisitions.

Our ability to attract and retain management and key personnel may affect future growth and earnings and legislation imposing new compensation restrictions could adversely affect our ability to do so.

Much of our success and growth has been influenced strongly by our ability to attract and retain management experienced in banking and financial services and familiar with the communities in our market areas. Our ability to retain executive officers, current management teams, lending and retail banking officers, and administrative staff of our subsidiaries will continue to be important to the successful implementation of our strategy. It is also critical to be able to attract and retain qualified staff with the appropriate level of experience and knowledge about our market areas to implement our community-based operating strategy. The unexpected loss of services of key personnel, or the inability to recruit and retain qualified personnel in the future, could have an adverse effect on our business, financial condition, and results of operation.

Table of Contents

We are required to make our compensation decisions under often overlapping regulatory schemes. The Federal Reserve and the FDIC each maintain rules and guidance related to compensation practices. The Dodd-Frank Act includes additional compensation related requirements that, once fully implemented, may make it more difficult to attract and retain the people we need to operate our businesses and limit our ability to promote our objectives through our compensation and incentive programs.

Our wealth management business may be negatively impacted by changes in economic and market conditions.

Our wealth management business may be negatively impacted by changes in general economic conditions and the conditions in the financial and securities markets, including the values of assets held under care. Our management contracts generally provide for fees payable for wealth management services based on the market value of assets under care. Because most of our contracts provide for a fee based on market values of securities, declines in securities prices will have an adverse effect on our results of operations from this business. Market declines and reductions in the value of our customers' wealth management accounts, could also result in the loss of wealth management customers, including those who are also banking customers.

We face strong competition from financial services companies and other companies that offer banking and wealth management services, which could harm our business.

We currently conduct our banking operations primarily in downstate Illinois and southwest Florida. In addition, we currently offer fiduciary and wealth management services through Trevett Capital Partners and Busey Wealth Management, which accounts for an important portion of our noninterest income. Many competitors offer the same, or a wider variety of, banking and wealth management services within our market areas. These competitors include national banks, regional banks and other community banks. We also face competition from many other types of financial institutions, including savings and loan institutions, finance companies, brokerage firms, insurance companies, credit unions, mortgage banks and other financial intermediaries. In addition, a number of out-of-state financial intermediaries have opened production offices or otherwise solicit deposits in our market areas. Also, technology and other changes have lowered barriers to entry and made it possible for non-banks to offer products and services traditionally provided by banks. For example, customers can maintain funds that would have historically been held as bank deposits in brokerage accounts or mutual funds. Customers can also complete transactions such as paying bills and/or transferring funds directly without the assistance of banks. The process of eliminating banks as intermediaries, known as disintermediation, could result in the loss of fee income, as well as the loss of customer deposits and the related income generated from those deposits. Increased competition in our markets may result in reduced loans, deposits and commissions and brokers' fees, as well as reduced net interest margin and profitability. Ultimately, we may not be able to compete successfully against current and future competitors. If we are unable to attract and retain banking and wealth management customers, we may be unable to grow our loan and deposit portfolios and our commissions and brokers' fees, and our business, results of operations and financial condition may be adversely affected.

We are subject to risks related to our use of technology.

Communications and information systems are essential to conduct our business, as we use such systems to manage our customer relationships, our general ledger, our deposits and our loans. However, the computer systems and network infrastructure we use could be vulnerable to unforeseen problems. Our operations are dependent upon our ability to protect our computer equipment against damage from physical theft, fire, power loss, telecommunications failure or a similar catastrophic event, as well as from security breaches, denial of service attacks, viruses and other disruptive problems caused by hackers. Computer break-ins, phishing and other disruptions could also jeopardize the security of information stored in and transmitted through our computer systems and network infrastructure, as well as those of our customers engaging in internet banking activities.

In addition, we outsource certain processing functions to third-party providers. If our third-party providers encounter difficulties, or if we have difficulty in communicating with them, our ability to adequately process and account for customer transactions could be affected and our business operations could be adversely impacted. Threats to security also exist in the processing of customer information through various other third-parties, their personnel, and their use of subcontractors. Furthermore, advances in computer capabilities, new discoveries in the field of cryptography or other developments could result in a compromise or breach of the algorithms we and our third-party service providers use to encrypt and protect customer transaction data.

Table of Contents

Although we have procedures in place to prevent or limit the effects of any of these potential problems and intend to continue to implement security technology and establish operational procedures to prevent such occurrences, cyber-security risks are a constant threat, both for us and for the third-parties we work with. Therefore, we cannot guarantee that these measures will be successful. Any interruption in, or breach in security of, our computer systems and network infrastructure, as well as those of our customers engaging in internet banking activities, could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our financial condition and results of operations.

Moreover, the delivery of financial products and services has become increasingly technology-driven. Our ability to meet the needs of our customers competitively, and in a cost-effective manner, is dependent on our ability to keep pace with technological advances and to invest in new technology as it becomes available. Many of our competitors have greater resources to invest in technology than we do and may be better equipped to market new technology-driven products and services. The ability to keep pace with technological change is important and the failure to do so on our part could have an adverse impact on our business.

We are subject to certain operational risks, including, but not limited to, customer or employee fraud and data processing system failures and errors.

Errors and misconduct could subject us to financial losses or regulatory sanctions and seriously harm our reputation. Misconduct by our employees and customers could include hiding unauthorized activities from us, improper or unauthorized activities or improper use of confidential information. It is not always possible to prevent errors and misconduct, and the precautions we take to prevent and detect this activity may not be effective in all cases. Employee errors could also subject us to financial claims for negligence.

We also face fraud risk associated with the origination of loans, including the intentional misstatement of information in property appraisals or other underwriting documentation provided to us by customers or by third-parties. Customers may expose us to certain fraud risks associated with the compromise of their computing systems. Furthermore, we are subject to fraud risk resulting from data security breaches at merchants, payment processors, and other third-parties involved in handling consumer payment and personal information.

We maintain a system of internal controls and insurance coverage to mitigate operational risks, including data processing system failures and errors, customer or employee fraud and other fraudulent transactions which might impact our business. Should our internal controls fail to prevent or detect an occurrence, or if any resulting loss is not insured or exceeds applicable insurance limits, it could have a material adverse effect on our business, results of operations and financial condition.

We could recognize losses on securities held in our securities portfolio, particularly if interest rates increase or economic and market conditions deteriorate.

As of December 31, 2013, the fair value of our securities available for sale was approximately \$841.3 million. Factors beyond our control can significantly influence the fair value of securities in our portfolio and can cause potential adverse changes to the fair value of these securities. For example, fixed-rate securities acquired by us are generally subject to decreases in market value when interest rates rise. Additional factors include, but are not limited to, rating agency downgrades of the securities, defaults by the issuer or individual mortgagors with respect to the underlying securities, and continued instability in the credit markets. Any of the foregoing factors could cause an other-than-temporary

impairment in future periods and result in realized losses. The process for determining whether impairment is other-than-temporary usually requires difficult, subjective judgments about the future financial performance of the issuer and any collateral underlying the security in order to assess the probability of receiving all contractual principal and interest payments on the security. Because of changing economic and market conditions affecting interest rates, the financial condition of issuers of the securities and the performance of the underlying collateral, we may recognize realized and/or unrealized losses in future periods, which could have an adverse effect on our financial condition and results of operations.

Table of Contents

Downgrades in the credit rating of one or more insurers that provide credit enhancement for our state and municipal securities portfolio may have an adverse impact on the market for and valuation of these types of securities.

We invest in tax-exempt state and local municipal securities, some of which are insured by monoline insurers. As of December 31, 2013, we had \$273.0 million of municipal securities, which represented 32.4% of our total securities portfolio. In recent years, several of these insurers have come under scrutiny by rating agencies. Even though management generally purchases municipal securities on the overall credit strength of the issuer, the reduction in the credit rating of an insurer may negatively impact the market for and valuation of our investment securities. Such downgrade or a default by an issuer could adversely affect our liquidity, financial condition and results of operations.

A downgrade of the U.S. credit rating could have a material adverse effect on our business, financial condition and liquidity.

Standard & Poor's lowered its long term sovereign credit rating on the United States of America from AAA to AA+ on August 5, 2011. On October 15, 2013 Fitch ratings placed the sovereign debt of the United States of America on rating watch negative, indicating it may lower its credit rating in the future. A further downgrade or a downgrade by other rating agencies could have a material adverse impact on financial markets and economic conditions in the United States and worldwide. Any such adverse impact could have a material adverse effect on our liquidity, financial condition and results of operations. Many of our investment securities are issued by U.S. government sponsored entities.

The soundness of other financial institutions could negatively affect us.

Our ability to engage in routine funding and other transactions could be negatively affected by the actions and commercial soundness of other financial institutions. Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. Defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry generally, have led to market-wide liquidity problems and losses of depositor, creditor and counterparty confidence and could lead to losses or defaults by us or by other institutions. We could experience increases in deposits and assets as a result of the difficulties or failures of other banks, which would increase the capital we need to support our growth.

Our business may be adversely impacted by acts of war or terrorism.

Geopolitical conditions could affect our earnings. Acts or threats of terrorism and political or military actions taken by the United States or other governments in response to terrorism, or similar activity, could adversely affect general economic or industry conditions, including inflation. Such events could affect the ability of our borrowers to repay their loans or could impair the value and liquidity of the collateral securing our loans. In addition, such events could affect the ability of our depositors to maintain their deposits. Although we have established disaster recovery plans and procedures in the event of significant property damage to our own operations or that of our vendors, the occurrence of any such event could have a material adverse effect on our business that, in turn, could effect on our growth, financial condition, and results of operations.

Adverse weather affecting the markets we serve could hurt our business and prospects for growth.

We conduct a significant portion of our business in downstate Illinois. Downstate Illinois is a highly agricultural area and therefore the economy can be greatly affected by severe weather conditions, including droughts, storms, tornados and flooding. Unfavorable weather conditions may decrease agricultural productivity or could result in damage to our branch locations or the property of our customers, all of which could adversely affect the local economy. An adverse effect on the economy of downstate Illinois could negatively affect our profitability.

The southwest Florida market is at risk of hurricanes and related flooding and wind damage, which may cause damage to our assets and those of our customers. Hurricane damage could adversely affect our financial condition in a number of ways. Damage caused to a branch location could result in temporary closure and inconvenience to customers which could result in loss of customers and business. A hurricane could also affect the local economy and impact customers' ability to meet loan repayment terms and adversely affect our financial condition. Furthermore, hurricane-related damage could significantly reduce the values of collateral pledged as security against loans made by us. Insurance may not be available or sufficient to cover weather-related damage.

Table of Contents

We are subject to changes in accounting principles, policies or guidelines.

Our financial performance is impacted by accounting principles, policies and guidelines. Some of these policies require the use of estimates and assumptions that may affect the value of our assets or liabilities and financial results. Some of our accounting policies are critical because they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. If such estimates or assumptions underlying our financial statements are incorrect, we may experience material losses.

From time to time, the Financial Accounting Standards Board and the SEC change the financial accounting and reporting standards or the interpretation of those standards that govern the preparation of our financial statements. These changes are beyond our control, can be difficult to predict and could materially impact how we report our financial condition and results of operations. Changes in these standards are continuously occurring, and given recent economic conditions, more drastic changes may occur. The implementation of such changes could have a material adverse effect on our financial condition and results of operations.

Our framework for managing risks may not be effective in mitigating risk and loss to us.

Our risk management framework seeks to mitigate risk and loss to us. We have established processes and procedures intended to identify, measure, monitor, report and analyze the types of risk to which we are subject, including liquidity risk, credit risk, market risk, interest rate risk, operational risk, compensation risk, legal and compliance risk, and reputational risk, among others. However, as with any risk management framework, there are inherent limitations to our risk management strategies as there may exist, or develop in the future, risks that we have not appropriately anticipated or identified. Our ability to successfully identify and manage risks facing us is an important factor that can significantly impact our results. If our risk management framework proves ineffective, we could suffer unexpected losses and could be materially adversely affected.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

First Busey's headquarters are located at 100 West University Avenue, Champaign, Illinois. The Busey Bank and Busey Wealth Management headquarters are also located at 100 West University Avenue, Champaign, Illinois. FirstTech's headquarters are located at 130 North Water Street, Decatur, Illinois. These facilities, which are owned by the Company, house the executive and primary administrative offices of each respective entity. The Company also owns or leases other facilities, such as branches of Busey Bank, within its primary market areas of downstate Illinois, Indianapolis, Indiana and southwest Florida.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

First Busey and its subsidiaries own or lease all of the real property and/or buildings on which each respective entity is located. The Company considers its properties to be suitable and adequate for its present needs.

Item 3. Legal Proceedings

As part of the ordinary course of business, First Busey and its subsidiaries are parties to litigation that is incidental to their regular business activities.

There is no material pending litigation, other than ordinary routine litigation incidental to its business, in which First Busey or any of its subsidiaries is involved or of which any of their property is the subject. Furthermore, there is no pending legal proceeding that is adverse to First Busey in which any director, officer or affiliate of First Busey, or any associate of any such director or officer, is a party, or has a material interest.

Item 4. Mine Safety Disclosures

Not applicable.

Table of Contents**Part II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***Common Stock Prices and Dividends*

The following table presents for the periods indicated the high and low sales price for First Busey common stock as reported on The Nasdaq Global Select Market.

| Market Prices of Common Stock | 2013 | | | | 2012 | | | |
|-------------------------------|------|------|-----|------|------|------|----|------|
| | | High | Low | | High | Low | | |
| First Quarter | \$ | 4.88 | \$ | 4.23 | \$ | 5.30 | \$ | 4.56 |
| Second Quarter | \$ | 4.62 | \$ | 4.16 | \$ | 5.10 | \$ | 4.42 |
| Third Quarter | \$ | 5.33 | \$ | 4.50 | \$ | 5.00 | \$ | 4.51 |
| Fourth Quarter | \$ | 6.10 | \$ | 4.95 | \$ | 4.97 | \$ | 4.09 |

During 2013 and 2012, First Busey declared cash dividends per share of common stock as follows:

| | 2013 | | 2012 | |
|----------|------|-----|------|-----|
| January | \$ | | \$ | .04 |
| April | \$ | .04 | \$ | .04 |
| July | \$ | .04 | \$ | .04 |
| October | \$ | .04 | \$ | .04 |
| December | \$ | | \$ | .08 |

In December 2012, the Company declared a quarterly cash dividend of \$0.04 per share on the Company's common stock and an additional cash dividend of \$0.04 per share. The quarterly dividend was intended by the board of directors to be an acceleration of the regular quarterly dividend the Company otherwise would have declared in January 2013. The acceleration was due to uncertainty surrounding U.S. tax policy and our desire to maximize stockholder value and return while potentially reducing stockholder dividend income tax burden. The Company's board of directors and management are currently committed to continuing to pay regular cash dividends; however, no guarantee can be given with respect to future dividends, as they are dependent on certain regulatory restrictions, future earnings, capital requirements and financial condition of the Company and its subsidiaries.

As of March 11, 2014, First Busey Corporation had 86,811,171 shares of common stock outstanding held by 1,324 holders of record.

Stock Repurchases

There were no purchases made by or on behalf of First Busey of shares of its common stock during the year ended December 31, 2013.

On January 22, 2008, First Busey announced that its board of directors had authorized the repurchase of one million shares of common stock. First Busey's repurchase plan has no expiration date and is active until all the shares are repurchased or until action by the board of directors to discontinue the plan. The plan has not been discontinued to date, and as of December 31, 2013, under the Company's stock repurchase plan, 895,655 shares remained authorized for repurchase.

Table of Contents

Performance Graph

The following graph compares First Busey's performance, as measured by the change in price of its common stock plus reinvested dividends, with the NASDAQ Composite and the SNL Midwest Bank Index for the five years ended December 31, 2013.

**First Busey Corporation
Stock Price Performance**

| Index | 12/31/08 | 12/31/09 | 12/31/10 | 12/31/11 | 12/31/12 | 12/31/13 |
|-------------------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| First Busey Corporation | \$ 100.00 | \$ 22.39 | \$ 28.04 | \$ 30.80 | \$ 30.09 | \$ 38.49 |
| NASDAQ Composite | 100.00 | 145.36 | 171.74 | 170.38 | 200.63 | 281.22 |
| SNL Midwest Bank Index | 100.00 | 84.75 | 105.24 | 99.40 | 119.64 | 163.80 |

The banks in the SNL Midwest Bank Index represent all publicly traded banks, thrifts or financial service companies located in Iowa, Illinois, Indiana, Kansas, Kentucky, Michigan, Minnesota, Missouri, North Dakota, Nebraska, Ohio, South Dakota and Wisconsin.

Table of Contents**Item 6. Selected Financial Data***Selected Consolidated Financial Information*

The following selected financial data as of year-end and for each of the five years in the period ended December 31, 2013, have been derived from First Busey's audited Consolidated Financial Statements and the results of operations for each period. This financial data should be read in conjunction with the Consolidated Financial Statements and the related Notes to the Consolidated Financial Statements included in this Annual Report.

| | 2013 | 2012 | 2011 | 2010 | 2009 |
|--|---|--------------|------------|------------|------------|
| | (dollars in thousands, except per share data) | | | | |
| Balance Sheet Items | | | | | |
| Securities available for sale | \$ 841,310 | \$ 1,001,497 | \$ 831,749 | \$ 599,459 | \$ 569,640 |
| Gross loans, including loans held for sale | 2,295,300 | 2,073,110 | 2,051,344 | 2,368,777 | 2,792,823 |

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is management's discussion and analysis of the financial condition as of December 31, 2013 and 2012 and results of operations for the years ended December 31, 2013, 2012, and 2011 of First Busey and subsidiaries. It should be read in conjunction with Item 1. Business, Item 6. Selected Financial Data, the Consolidated Financial Statements and the related Notes to the Consolidated Financial Statements included in this Annual Report.

Critical Accounting Estimates

Critical accounting estimates are those that are critical to the portrayal and understanding of First Busey's financial condition and results of operations and require management to make assumptions that are difficult, subjective or complex. These estimates involve judgments, estimates and uncertainties that are susceptible to change. In the event that different assumptions or conditions were to prevail, and depending on the severity of such changes, the possibility of a materially different financial condition or materially different results of operations is a reasonable likelihood.

First Busey's significant accounting policies are described in *Note 1 Significant Accounting Policies* in the Notes to the Consolidated Financial Statements. The majority of these accounting policies do not require management to make difficult, subjective or complex judgments or estimates or the variability of the estimates is not material. However, the following policies could be deemed critical:

Fair Value of Investment Securities. Securities are classified as held to maturity when First Busey has the ability and management has the positive intent to hold those securities to maturity. Accordingly, they are stated at cost, adjusted for amortization of premiums and accretion of discounts. First Busey had \$0.8 million securities classified as held to maturity at December 31, 2013 and none at December 31, 2012. First Busey had no securities classified as trading at December 31, 2013 or 2012. Securities are classified as available for sale when First Busey may decide to sell those securities due to changes in market interest rates, liquidity needs, changes in yields on alternative investments, and for other reasons. They are carried at fair value with unrealized gains and losses, net of taxes, reported in other comprehensive income. First Busey had \$841.3 million and \$1.0 billion securities classified as available for sale at December 31, 2013 and 2012, respectively. For equity securities, unadjusted quoted prices in active markets for identical assets are utilized to determine fair value at the measurement date. For all other securities, we obtain fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the security's terms and conditions, among other things. Due to the limited nature of the market for certain securities, the fair value and potential sale proceeds could be materially different in the event of a sale.

Realized securities gains or losses are reported in securities gains (losses), net in the Consolidated Statements of Income. The cost of securities sold is based on the specific identification method. Declines in the fair value of available for sale securities below their amortized cost are evaluated to determine whether the loss is temporary or other-than-temporary. If the Company (a) has the intent to sell a debt security or (b) will more likely than not be required to sell the debt security before its anticipated recovery, then the Company recognizes the entire unrealized loss in earnings as an other-than-temporary loss. If neither of these conditions are met, the Company evaluates whether a credit loss exists. The impairment is separated into the amount of the total impairment related to the credit loss and the amount of total impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings and the amount related to all other factors is recognized in other comprehensive income.

The Company also evaluates whether the decline in fair value of an equity security is temporary or other-than-temporary. In determining whether an unrealized loss on an equity security is temporary or other-than-temporary, management considers various factors including the magnitude and duration of the impairment, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to hold the equity security to forecasted recovery.

Allowance for Loan Losses. First Busey has established an allowance for loan losses which represents its estimate of the probable losses inherent in the loan portfolio as of the date of the financial statements and reduces the total loans outstanding by an estimate of uncollectible loans. Loans deemed uncollectible are charged against and reduce the allowance. A provision for loan losses is charged to current expense. This provision acts to replenish the allowance for loan losses and to maintain the allowance at a level that management deems adequate.

Table of Contents

To determine the adequacy of the allowance for loan losses, a formal analysis is completed quarterly to assess the risk within the loan portfolio. This assessment is reviewed by senior management of the Company and the Bank. The analysis includes a review of historical performance, dollar amount and trends of past due loans, dollar amount and trends in non-performing loans, certain impaired loans, and loans identified as sensitive assets. Sensitive assets include non-accrual loans, past-due loans, loans on First Busey's watch loan reports and other loans identified as having probable potential for loss.

The allowance consists of specific and general components. The specific component considers loans that are classified as impaired. For such loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying amount of that loan. The general component covers non-classified loans and classified loans not considered impaired, and is based on historical loss experience adjusted for qualitative factors. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss experience.

A loan is considered to be impaired when, based on current information and events, it is probable First Busey will not be able to collect all principal and interest amounts due according to the contractual terms of the loan agreement. When a loan becomes impaired, management generally calculates the impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate. If the loan is collateral dependent, the fair value of the collateral is used to measure the amount of impairment. The amount of impairment and any subsequent changes are recorded through a charge to the provision for loan losses. For collateral dependent loans, First Busey has determined the required allowance on these loans based upon the estimated fair value, net of selling costs, of the respective collateral. The required allowance or actual losses on these impaired loans could differ significantly if the ultimate fair value of the collateral is significantly different from the fair value estimates used by First Busey in estimating such potential losses.

Deferred Taxes. We have maintained significant net deferred tax assets for deductible temporary differences, the largest of which relates to the net operating loss carryforward and the allowance for loan losses. For income tax return purposes, only actual charge-offs are deductible, not the provision for loan losses. Under generally accepted accounting principles, a valuation allowance is required to be recognized if it is more likely than not that the deferred tax assets will not be realized. The determination of the recoverability of the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, the forecasts of future income, applicable tax planning strategies, and assessments of the current and future economic and business conditions. We consider both positive and negative evidence regarding the ultimate recoverability of our deferred tax assets. Positive evidence includes available tax planning strategies and the probability that taxable income will continue to be generated in future periods, as it was in periods since March 31, 2010, while negative evidence includes a cumulative loss in 2009 and 2008 and certain business and economic trends. We established a valuation allowance for certain state net operating loss and credit carryforwards that are not expected to be fully realized. Management believes that it is more likely than not that the other deferred tax assets included in the accompanying Consolidated Financial Statements will be fully realized. We determined that no valuation allowance was required for any other deferred tax assets as of December 31, 2013, although there is no guarantee that those assets will be recognizable in future periods.

We must assess the likelihood that any deferred tax assets will be realized through the reduction of taxes in future periods and establish a valuation allowance for those assets for which recovery is not more likely than not. In making this assessment, we must make judgments and estimates regarding the ability to realize the asset through the future reversal of existing taxable temporary differences, future taxable income, and the possible application of future tax planning strategies. The Company's evaluation gave consideration to the fact that all net operating loss carrybacks have been utilized. Therefore, utilization of net operating loss carryforwards are dependent on implementation of tax strategies and continued profitability.

Table of Contents**Executive Summary****Operating Results**

| | Year Ended December 31: | |
|--|-------------------------|-----------|
| | 2013 | 2012 |
| Net income: | | |
| Consolidated | \$ 28,726 | \$ 22,357 |
| Busey Bank | 25,416 | 19,162 |
| FirsTech | 1,000 | 935 |
| Busey Wealth Management | 4,242 | 3,363 |
| Consolidated earnings per share, fully-diluted | \$ 0.29 | \$ 0.22 |

Operating Performance

First Busey Corporation's net income for the year ended December 31, 2013 was \$28.7 million and net income available to common stockholders was \$25.1 million, or \$0.29 per fully-diluted common share, compared to net income of \$22.4 million and net income available to common stockholders of \$18.7 million, or \$0.22 per fully-diluted common share, for the year ended December 31, 2012. Net income growth relative to the prior year was driven by positive trends in credit quality, which reduced our provision for loan loss in 2013 to levels approximating historical Company norms prior to the economic downturn beginning in late 2007. Provision for loan loss decreased to \$7.5 million for the year ended December 31, 2013 compared to \$16.5 million for the year ended December 31, 2012.

Significant operating performance items were:

- Net interest income for the year ended December 31, 2013 was \$100.1 million compared to \$102.1 million for the same period of 2012.
- Net interest margin for the year ended December 31, 2013 decreased to 3.15% compared to 3.24% for the same period of 2012. Average loan balances for the year ended December 31, 2013 increased compared to the year ended December 31, 2012, while a highly competitive loan environment and prolonged period of low interest rates continued to put downward pressure on yields.
- The efficiency ratio for the year ended December 31, 2013 was 66.39%, as compared to 68.54% for the same period of 2012. Efficiency ratios have been influenced throughout the past two years by a number of events (such as the core conversion, branch closures and restructuring costs which are discussed in more detail in the Other Expense section below).
- FirsTech's net income for the year ended December 31, 2013 was \$1.0 million as compared to \$0.9 million for the year ended December 31, 2012. FirsTech offers sophisticated payment processing capabilities and adds important diversity to our revenue stream while widening our array of service offerings to larger commercial clients.
- Busey Wealth Management's net income for the year ended December 31, 2013 was \$4.2 million as compared to \$3.4 million for the year ended December 31, 2012. Net inflows to assets under care accompanied by positive market valuations favorably impacted year-over-year

results.

Table of Contents

Asset Quality

While much internal focus has been directed toward organic growth, our commitment to credit quality remains strong. As of December 31, 2013, we significantly improved asset quality measures from prior periods and expect these levels to generally stabilize in 2014; however, this remains dependent upon market-specific economic conditions, and specific measures may fluctuate from quarter to quarter. The key metrics are as follows:

- Non-performing loans decreased to \$17.4 million at December 31, 2013 from \$25.4 million at December 31, 2012.
- Illinois/Indiana non-performing loans decreased to \$13.6 million at December 31, 2013 from \$17.8 million at December 31, 2012.
- Florida non-performing loans decreased to \$3.8 million at December 31, 2013 from \$7.6 million at December 31, 2012.
- Loans 30-89 days past due increased to \$6.1 million at December 31, 2013 from \$2.3 million at December 31, 2012, primarily as a result of one large commercial credit which the Company is actively working to resolve.
- Other non-performing assets, primarily consisting of other real estate owned, decreased to \$2.1 million at December 31, 2013 from \$3.5 million at December 31, 2012.
- The ratio of non-performing assets to total loans plus other non-performing assets at December 31, 2013 decreased to 0.85% from 1.39% at December 31, 2012.
- The allowance for loan losses to non-performing loans ratio increased to 274.02% at December 31, 2013 from 189.32% at December 31, 2012.
- The allowance for loan losses to total loans ratio decreased to 2.07% at December 31, 2013 from 2.32% at December 31, 2012.
- Net charge-offs of \$7.9 million recorded for the year ended December 31, 2013 were lower than the \$27.0 million recorded for the year ended December 31, 2012.
- Provision expense of \$7.5 million for the year ended December 31, 2013 decreased from the \$16.5 million recorded for the year ended December 31, 2012.

Overview and Strategy

We believe our emphasis on maximizing stockholder value was evidenced in 2013 by the upward momentum in earnings per share on a full year basis. We are pleased with the positive traction in earnings and loan growth during the year, powered by the strategic investments of prior periods and the outstanding commitment of our talented associates. We move ahead from a stronger base that enhances further growth

opportunities through organic and external channels, and serves as a solid foundation for continued success going forward.

The year was highlighted by meaningful progress in commercial loan growth which steadied net interest income and allowed us to attain certain targets under the SBLF program. Our success in growing loans was well-balanced across our footprint, as we serviced the funding needs of local businesses which support our communities. Moreover, as our loan portfolio expanded, our credit metrics continued to strengthen and provision expenses declined considerably.

Major sources of recurring non-interest income increased from the prior year including trust fees, commissions and brokers' fees, and fees for customer services. Non-interest expenses declined, as we actively managed our resources to higher productivity while remaining fully committed to premier customer service. In 2014 we will continue to monitor our investments and revenue growth with the greatest of care as we strive to deliver optimal value to our shareholders. We take pride in our past and look confidently towards our future.

Results of Operation Three Years Ended December 31, 2013

Net Interest Income

Net interest income is the difference between interest income and fees earned on earning assets and interest expense incurred on interest-bearing liabilities. Interest rate levels and volume fluctuations within earning assets and interest-bearing liabilities impact net interest income. Net interest margin is tax-equivalent net interest income as a percent of average earning assets.

Certain assets with tax favorable treatment are evaluated on a tax-equivalent basis. Tax-equivalent basis assumes a federal income tax rate of 35%. Tax favorable assets generally have lower contractual pre-tax yields than fully taxable assets. A tax-equivalent analysis is performed by adding the tax savings to the earnings on tax favorable assets. After factoring in the tax favorable effects of these assets, the yields may be more appropriately evaluated against alternative earning assets. In addition to yield, various other risks are factored into the evaluation process.

The following tables show the consolidated average balance sheets, detailing the major categories of assets and liabilities, the interest income earned on interest-earning assets, the interest expense paid for the interest-bearing liabilities, and the related interest rates for the periods, or as of the dates, shown. The tables also show, for the periods indicated, a summary of the changes in interest earned and interest expense resulting from changes in volume and rates for the major components of interest-earning assets and interest-bearing liabilities. All average information is provided on a daily average basis.

Earning Assets, Sources of Funds, and Net Interest Margin

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

Average earning assets increased \$32.7 million, or 1.0%, to \$3.25 billion in 2013 as compared to \$3.22 billion in 2012. Average earning assets increased \$34.6 million, or 1.1%, to \$3.22 billion in 2012 as compared to \$3.19 billion in 2011. In 2013, average loans increased compared to 2012 due to our continued emphasis on commercial loan growth; however, at a lower yield than 2012. Loans generally have notably higher yields compared to interest-bearing bank deposits and securities, leading to a positive effect on net interest margin which helped offset the downward pressure of a lower rate environment. In 2012, investment securities increased, which more than offset the decline in average loans; however, at a much lower yield. Interest-bearing liabilities increased slightly in 2013 compared to 2012 and decreased slightly in 2012 compared to 2011. Core deposits are an important low cost source of funding and maintaining adequate levels has allowed the Company to reduce more expensive non-core funding.

Interest income, on a tax-equivalent basis, decreased \$8.2 million, or 6.9%, to \$111.1 million in 2013 from \$119.2 million in 2012. Interest income, on a tax-equivalent basis, decreased \$15.5 million, or 11.5%, to \$119.2 million in 2012 from \$134.7 million in 2011. The interest income decline in 2013 related to lower yields earned on assets in a low interest rate environment. The interest income decline in 2012 was primarily related to decreases in loan volume as well as decreased yields.

Interest expense decreased during 2013 by \$6.1 million, or 41.6%, to \$8.6 million from \$14.8 million in 2012. Interest expense decreased during 2012 by \$7.7 million, or 34.1%, to \$14.8 million from \$22.4 million in 2011. The decreases in interest expense during the past two years were primarily a result of decreases in interest rates offered by the Company on certain deposit products as the interest rate environment remains low.

Table of Contents

Net interest income, on a tax-equivalent basis, decreased \$2.0 million, or 1.96%, in 2013 as compared to 2012. Net interest income, on a tax-equivalent basis, decreased \$7.8 million, or 6.96%, in 2012 as compared to 2011. Net interest margin, our net interest income expressed as a percentage of average earning assets stated on a tax-equivalent basis, decreased to 3.15% in 2013 from 3.24% in 2012 and 3.52% during 2011. The net interest spread, also on a tax-equivalent basis, was 3.07% in 2013 compared to 3.12% in 2012 and 3.35% in 2011.

The quarterly net interest margins are as follows:

| | 2013 | 2012 | 2011 |
|----------------|-------|-------|-------|
| First Quarter | 3.10% | 3.31% | 3.55% |
| Second Quarter | 3.17% | 3.21% | 3.54% |
| Third Quarter | 3.20% | 3.25% | 3.57% |
| Fourth Quarter | 3.12% | 3.20% | 3.44% |

We continue to experience downward pressure on our yield in interest-earning assets resulting from a protracted period of historically low rates and heightened competition for assets, which has been experienced throughout the banking industry. In 2013, the development of a stronger asset mix from increased loan balances, while actively bringing down interest expense and optimizing funding costs was a focus. Despite this focus, we had limited ability to improve margin through funding rate decreases due to the historically low interest rate environment. We believe improvements in margin will be achieved through continued deployment of our liquid funds at higher yields as we expect to redeploy cash and securities into our loan portfolio at improved yields.

As a general matter, management attempts to mitigate the effects of an unpredictable interest rate environment through effective portfolio management, prudent loan underwriting and operational efficiencies.

Table of Contents**Other Income**

| | | | As of December 31, | | | | % Change |
|-------------------------------------|-----------|-----------|---------------------------------------|-----------|-----------|--|-------------|
| | 2013 | 2012 | % Change (dollars in thousands) | 2012 | 2011 | | |
| Trust fees | \$ 18,521 | \$ 17,592 | 5.3% | \$ 17,592 | \$ 15,657 | | 12.4% |
| Commissions and brokers fees, net | 2,416 | 2,102 | 14.9% | 2,102 | 1,858 | | 13.1% |
| Remittance processing | 8,354 | 8,426 | (0.9)% | 8,426 | 9,196 | | (8.4)% |
| Service charges on deposit accounts | 11,947 | 11,646 | 2.6% | 11,646 | 12,616 | | (7.7)% |
| Other service charges and fees | 5,961 | 5,717 | 4.3% | 5,717 | 5,298 | | 7.9% |
| Gain on sales of loans | 10,227 | 12,535 | (18.4)% | 12,535 | 10,945 | | 14.5% |
| Security gains, net | 553 | 1,597 | (65.4)% | 1,597 | 170 | | 839.4% |
| Other | 4,604 | 7,237 | (36.4)% | 7,237 | 3,275 | | 121.0% |
| Total other income | \$ 62,583 | \$ 66,852 | (6.4)% | \$ 66,852 | \$ 59,015 | | 13.3% |

Total other income decreased \$4.3 million in 2013 from 2012 but increased \$7.8 million in 2012 from 2011.

Combined wealth management revenue, which includes trust fees and commissions and broker's fees, net, rose \$1.2 million in 2013 compared to 2012, and rose \$2.2 million in 2012 compared to 2011. The 2013 increase was led by organic growth, which increased assets under care (AUC) and positive market trends. The 2012 increase also included heightened activity in services to agriculture-based businesses. AUC averaged \$4.6 billion for the year ended December 31, 2013 as compared to \$4.2 billion for the year ended December 31, 2012 and \$3.8 billion for the year ended December 31, 2011. Continued growth in new AUC driven by our wealth management teams during 2013 suggest future income will also be positively impacted as wealth management revenues are typically highly correlated to AUC.

Remittance processing revenue relates to our payment processing company, FirsTech. FirsTech's revenue decreased in 2013 compared to 2012 and decreased 8.4% in 2012 compared to 2011. FirsTech adds important diversity to our revenue stream while widening our array of service offerings to larger commercial clients within our footprint and nationally.

Overall, service charges increased in 2013 compared to 2012 and remained relatively steady in 2012 as compared to 2011. Evolving regulation and changing behaviors by our client base may impact the revenue derived from charges on deposit accounts going forward.

Gain on sales of loans decreased \$2.3 million in 2013 compared to 2012 but increased \$1.6 million in 2012 as compared to 2011. The 2012 increase was based on strong loan production, an active market for refinancing and positive momentum in the home purchase market. As interest rates began to rise in the second quarter of 2013, mortgage refinance activity decreased and purchase activity increased. The Company anticipated total production to slow in the fourth quarter of 2013 due to general industry conditions and management took action to right size expenses due to the lower forecasted revenue. We expect that our future production will generally align with the industrywide outlook for continued reduction in overall mortgage activity.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

Security gains, net decreased in 2013 compared to 2012 but increased in 2012 as compared to 2011. In 2012, the Company sold approximately \$35.0 million of U.S. Treasuries to maintain a steady operating earnings stream to shareholders during the core conversion launch and branch closure impairments. Please see *Note 3 Securities* in the Notes to the Consolidated Financial Statements for a full discussion of securities.

Other decreased in 2013 as compared to 2012 but increased in 2012 as compared to 2011. The significant increase in 2012 was primarily from income earned on private equity investment funds for which the Company recorded a net gain of \$3.1 million. \$2.1 million of this gain related to income earned from an investment in a local, community-focused fund. This gain was non-recurring; therefore, the Company did not and does not expect the other category to show significant increases in future years. The Company has successfully invested in various private equity funds, that primarily serve our business footprint, for more than ten years. While management continues to evaluate the restrictions to these investments under the Volcker Rule, it currently expects the rule's impact on the Company's private equity investments to be minimal.

| Regulatory expense | 2,290 | 2,543 | (9.9)% | 2,543 | 4,109 | | (38.1)% | |
| OREO expense | 503 | 1,303 | (61.4)% | 1,303 | 1,192 | | 9.3% | |
| Other | 18,771 | 22,585 | (16.9)% | 22,585 | 19,677 | | 14.8% | |
| Total other expense | \$ 112,311 | \$ 119,644 | (6.1)% | \$ 119,644 | \$ 104,565 | | 14.4% | |
| Income taxes | \$ 14,111 | \$ 10,497 | 34.4% | \$ 10,497 | \$ 14,970 | | (29.9)% | |
| Effective rate on income taxes | 32.9% | 31.9% | | 31.9% | 33.4% | | | |
| Efficiency ratio | 66.4% | 68.5% | | 68.5% | 59.0% | | | |

Total other expense decreased by \$7.3 million in 2013 as compared to 2012 but increased by \$15.1 million in 2012 as compared to 2011.

Total compensation expense decreased in 2013 as compared to 2012 but increased in 2012 as compared to 2011. During 2012, we engaged in a strategic investment in talent to build the targeted areas of our business to support growth initiatives, including our addition of Trevett Capital Partners. We also committed to a careful examination of all areas of the Company, seeking sensible opportunities to reduce cost and enhance efficiency. That evaluation resulted in personnel reductions and other cost containment efforts in early 2013 which contributed to positive expense trends during the year. At December 31, 2013 there were 849 full-time equivalent employees, compared to 948 at December 31, 2012 and 888 at December 31, 2011.

Combined net occupancy expense of premises and furniture and equipment expenses decreased in 2013 as compared to 2012 and in 2012 as compared to 2011, as we continue to evaluate our operations and execute appropriate cost control measures while seeking improvements in service delivery to our customers.

Data processing expense decreased in 2013 as compared to 2012 but increased in 2012 as compared to 2011. In 2012, we completed a core processing system conversion which we believe will provide for greater customization and technological agility going forward. Costs of the system upgrade were the primary cause of increased data processing expense in 2012. As we manage data processing expense, the Company continues to enhance our mobile and internet banking services and prioritize strategies to mitigate the risk from cybercriminals through the use of new technology, industry best practices and customer education.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

Amortization expense decreased in 2013 as compared to 2012 and in 2012 as compared to 2011 as we are now in the sixth year of amortization arising from the merger with Main Street Trust, Inc. The amortization is on an accelerated basis; thus, barring further acquisitions, we expect amortization expense to continue to gradually decline in the coming years.

Regulatory expense decreased in 2013 as compared to 2012 and in 2012 as compared to 2011 due to a change in the FDIC's assessment methodology for financial institutions which became effective April 1, 2011. We anticipate that our regulatory expense will generally remain at current levels for the near future.

Our costs associated with OREO, such as collateral preservation and legal expenses, decreased in 2013 as compared to 2012 but increased in 2012 as compared to 2011. This expense fluctuates based on the management of commercial properties and the operating activity associated with the properties that we hold throughout the year.

Table of Contents

Other expense decreased \$3.8 million in 2013 as compared to 2012 but increased \$2.9 million in 2012 as compared to 2011. Actions were taken in early 2013 for widespread reductions in expenses due to an enhanced emphasis on cost control. 2012 expenses included impairment charges recorded for branch closings that took place in April 2013.

The effective rate on income taxes, or income taxes divided by income before taxes, of 32.9%, 31.9% and 33.4% for the years ended December 31, 2013, 2012 and 2011, respectively, was lower than the combined federal and state statutory rate of approximately 41% due to fairly stable amounts of tax preferred interest income, such as municipal bond interest and bank owned life insurance income, accounting for a portion of our taxable income. As taxable income increases, we expect our effective tax rate to increase.

The efficiency ratio represents total other expense, less amortization charges, as a percentage of tax equivalent net interest income plus other income, less security gains and losses. The efficiency ratio, which is a non-GAAP financial measure commonly used by management and the investment community in the banking industry, measures the amount of expense that is incurred to generate a dollar of revenue. The efficiency ratio decreased in 2013 to 66.4% as compared to 68.5% in 2012 but increased in 2012 as compared to 59.0% in 2011. Efficiency ratios have been influenced throughout the past two years by a number of events, such as our 2012 core conversion and branch closures. The process of examining appropriate avenues to improve efficiency is expected to continue as a focus in future periods.

Table of Contents**Balance Sheet December 31, 2013 and December 31, 2012****Significant Balance Sheet Items**

| | December 31, 2013 | December 31, 2012 | % Change |
|---|------------------------|----------------------|---------------|
| | (dollars in thousands) | | |
| Assets | | | |
| Securities available for sale | \$ 841,310 | \$ 1,001,497 | (16.0)% |
| Securities held to maturity | 834 | | 100.0% |
| Loans, including held for sale (net of allowance for loan losses 2013 \$47,567; 2012 \$48,012) | 2,247,733 | 2,025,098 | 11.0% |
| Total assets | \$ 3,539,575 | \$ 3,618,056 | (2.2)% |
| Liabilities | | | |
| Deposits: | | | |
| Non-interest-bearing | \$ 547,531 | \$ 611,043 | (10.4)% |
| Interest-bearing | 2,321,607 | 2,369,249 | (2.0)% |
| Total deposits | 2,869,138 | 2,980,292 | (3.7)% |
| Securities sold under agreements to repurchase | 172,348 | 139,024 | 24.0% |
| Long-term debt | | 7,000 | (100.0)% |
| Total liabilities | \$ 3,124,211 | \$ 3,209,259 | (2.7)% |
| Stockholders equity | \$ 415,364 | \$ 408,797 | 1.6% |

Our balance sheet decreased by 2.2% during 2013. Overall, assets decreased by \$78.5 million. Securities available for sale decreased by \$160.2 million, or 16.0%, at December 31, 2013 compared to December 31, 2012, while net loans, including loans held for sale, increased by \$222.6 million, or 11.0%, at December 31, 2013 compared to December 31, 2012. The Company's strategic investment and continued emphasis on loan growth took shape starting in the second quarter of 2013. In addition to overall loan growth, the Company experienced loan growth in the highest credit grades, while the volume of the lowest credit grades decreased.

Liabilities decreased by \$85.0 million, or 2.7%, at December 31, 2013 compared to December 31, 2012. Total deposits decreased \$111.2 million, or 3.7%, at December 31, 2013 compared to December 31, 2012. Securities sold under agreements to repurchase increased \$33.3 million, or 24.0%, due to changing customer preferences and fluctuations in balances, while long-term debt decreased \$7.0 million, at December 31, 2013 compared to December 31, 2012 due to payment at maturity. We remain strongly core deposit funded at 76.4% of total assets with ample liquidity and significant market share in the communities we serve.

Stockholders' equity increased to \$415.4 million at December 31, 2013 as compared to \$408.8 million at December 31, 2012. This increase was the result of 2013 earnings, partially offset by dividends paid on common stock in the second, third and fourth quarters and decreases in the market value of our securities portfolio. No dividends on common stock were paid in the first quarter, as the Company had accelerated its 2013 first quarter dividend of \$0.04 per common share into the fourth quarter of 2012 due to uncertainty surrounding U.S. tax policy and our desire to maximize stockholder value and return while potentially reducing stockholder dividend income tax burden. Preferred dividends were also paid in 2013 at the same level as in 2012.

Investment Securities

We have classified investment securities as available for sale or held to maturity. Securities available for sale are held with the option of their disposal in the foreseeable future to meet investment and liquidity objectives or for other operational needs. Securities available for sale are carried at fair value. Securities held to maturity are held with the intent to hold those securities to maturity. Securities held to maturity are carried at cost, adjusted for amortization of premiums and accretion of discounts. As of December 31, 2013, the fair value of securities available for sale was \$841.3 million and the amortized cost was \$833.7 million. There were \$11.4 million of gross unrealized gains and \$3.8 million of gross unrealized losses for a net unrealized gain of \$7.6 million. The unrealized gain, net of tax, of \$4.5 million has been included in stockholders' equity. As of December 31, 2013, the cost and fair value of securities held to maturity was \$0.8 million.

Table of Contents

The composition of securities available for sale was as follows:

| | 2013 | 2012 | As of December 31, 2011 (dollars in thousands) | 2010 | 2009 |
|--|------------|--------------|--|------------|------------|
| U.S. Treasury securities | \$ 102,640 | \$ 104,656 | \$ 46,035 | \$ 381 | \$ 782 |
| Obligations of U.S. government corporations and agencies | 257,411 | 370,194 | 349,031 | 333,135 | 346,030 |
| Obligations of states and political subdivisions | 272,152 | 280,288 | 154,437 | 76,935 | 82,546 |
| Residential mortgage-backed securities | 177,735 | 217,715 | 278,115 | 183,006 | 135,285 |
| Corporate debt securities | 25,506 | 24,714 | 2,583 | 1,499 | 1,721 |
| Mutual funds and other equity securities | 5,866 | 3,930 | 1,548 | 4,503 | 3,276 |
| Fair value of securities available for sale | \$ 841,310 | \$ 1,001,497 | \$ 831,749 | \$ 599,459 | \$ 569,640 |
| Amortized cost | \$ 833,735 | \$ 978,477 | \$ 809,439 | \$ 584,469 | \$ 555,016 |
| Fair value as a percentage of amortized cost | 100.91% | 102.35% | 102.76% | 102.56% | 102.63% |

The Company had \$0.8 million securities classified as held to maturity at December 31, 2013. There were no held to maturity securities in the prior years.

The primary purposes of the investment portfolio include providing a source of liquidity, providing collateral for pledging purposes against public monies and repurchase agreements, serving as a tool for interest rate risk positioning and providing a source of earnings by deploying funds which are not needed to fulfill loan demand, deposit redemptions or other liquidity purposes. Pledged securities totaled \$428.7 million, or 51.0% of total securities, and \$489.1 million, or 48.9% of total securities at December 31, 2013 and 2012, respectively.

The maturities, fair values and weighted average yields of securities available for sale and held to maturity as of December 31, 2013 were:

| Available for sale(1) | Due in 1 year or less | | Due after 1 year through 5 years | | Due after 5 years through 10 years | | Due after 10 years | |
|--|------------------------|------------------------|----------------------------------|------------------------|------------------------------------|------------------------|--------------------|------------------------|

(1) Excludes mutual funds and other equity securities.

(2) Weighted average yield calculated on a tax-equivalent basis, assuming a federal income tax rate of 35% (the effective federal income tax rate as of December 31, 2013).

Table of Contents

Overall in 2013, the investment portfolio declined by 15.9%. We consider many factors in determining the composition of our investment portfolio including, but not limited to, credit quality, duration, interest rate risk, liquidity, tax-equivalent yield, regulatory and overall portfolio allocation. As of December 31, 2013, the Company did not have any non-agency issued securities that exceeded 10% of the Company's total stockholders' equity. We have not experienced credit related losses in our investment portfolio and all classes of available for sale securities had valuations at December 31, 2013 in excess of their respective cost basis.

Loan Portfolio

The composition of our loan portfolio as of the dates indicated was as follows:

| | 2013 | 2012 | As of December 31, 2011 | | 2010 | 2009 |
|--------------------------|--------------|--------------|----------------------------|--------------|--------------|------|
| | | | (dollars in thousands) | | | |
| Commercial | \$ 580,612 | \$ 433,688 | \$ 407,855 | \$ 439,393 | \$ 494,374 | |
| Commercial real estate | 1,092,273 | 981,132 | 980,216 | 1,072,817 | 1,210,807 | |
| Real estate construction | 78,855 | 86,101 | 104,865 | 154,411 | 299,754 | |
| Retail real estate | 534,493 | 559,836 | 540,146 | 657,096 | 719,557 | |
| Retail other | 9,067 | 12,353 | 18,262 | 45,060 | 68,331 | |
| Loans | \$ 2,295,300 | \$ 2,073,110 | \$ 2,051,344 | \$ 2,368,777 | \$ 2,792,823 | |

Loans, including loans held for sale and deferred loan fees, before allowance for loan losses, increased 10.7% to \$2.30 billion as of December 31, 2013 from \$2.07 billion at December 31, 2012. The largest increase, of \$146.9 million, was in commercial loans while the largest decline was in retail real estate loans at \$25.3 million. Our focus is to grow loans through relationship banking rather than transactional banking. Relationship banking implies a primary banking relationship with the borrower that includes, at minimum, an active deposit banking relationship in addition to the lending relationship.

Geographic distributions of loans by category were as follows:

| | Illinois | December 31, 2013 | | Total |
|--------------------------------|--------------|------------------------|------------|--------------|
| | | Florida | Indiana | |
| | | (dollars in thousands) | | |

| Net loans | | | | \$ 1,985,095 |

(1) Loans held for sale are included in retail real estate.

The total loan portfolio, gross, as of December 31, 2013 increased \$222.2 million from December 31, 2012; gross commercial balances (consisting of commercial, commercial real estate and real estate construction loans) increased \$250.8 million from December 31, 2012. The December 31, 2013 retail real estate portfolio decreased from December 31, 2012, mainly due to a decrease in loans held for sale. In the second quarter of 2013, the Company purchased \$25.4 million in performing home equity lines of credit at a floating rate to support an optimal mix of earning asset growth, which helped offset the decrease. Achieving meaningful organic growth has been a significant focus for us and our commitment to credit quality remains strong.

Commitments under standby letters of credit, unused lines of credit and other conditionally approved credit lines totaled approximately \$537.8 million and \$495.7 million as of December 31, 2013 and 2012, respectively.

As illustrated by the tables above, we have a concentration of loans within commercial real estate. Generally, these loans are collateralized by assets of the borrowers. The loans are expected to be repaid from cash flows from operations of the property or the borrower or from proceeds from the sale of selected assets of the borrowers.

The following table sets forth remaining maturities of selected loans (excluding certain real estate-mortgage loans and installment loans to individuals) at December 31, 2013:

| | 1 Year or Less | 1 to 5 Years | Over 5 Years | Total |
|--------------------------|------------------------|--------------|--------------|--------------|

Table of Contents

In 2013, we continued to see a decline in our net charge-offs. As a portion of our allowance is based upon weighted historical charge-offs, the lesser amount of charge-offs in recent years are replacing years with significantly higher charge-offs in the historical data, causing the weighted historical average charge-off rate to decline. The decreased levels of charge-offs and delinquency trends have led to a decrease in the allowance requirement. The market mix of our portfolio changed significantly in 2010, from primarily an Indiana and Florida base to an Illinois base. As historical charge-off percentages in Illinois are significantly less than those of Indiana and Florida, this also contributed to the decrease in the required allowance based on weighted historical charge-offs for our loan portfolio, including our adversely graded portfolio. The loss expectations for Indiana and Illinois were less than southwest Florida as real estate values did not experience the same level of decline in these areas in recent years.

Typically, when we move loans into nonaccrual status, the loans are collateral dependent and charged down to the fair value of our interest in the underlying collateral less estimated costs to sell. Our loan portfolio is collateralized primarily by real estate.

We continue to attempt to identify problem loan situations on a proactive basis. Once problem loans are identified, adjustments to the provision for loan losses are made based upon all information available at that time. The provision reflects management's analysis of additional allowance for loan losses necessary to cover probable losses in our loan portfolio.

As of December 31, 2013, management believed the level of the allowance and coverage of non-performing loans to be appropriate based upon the information available. However, additional losses may be identified in our loan portfolio as new information is obtained. We may need to provide for additional loan losses in the future as management continues to identify potential problem loans and gains further information concerning existing problem loans.

First Busey does not originate or hold any Alt-A or subprime loans or investments.

Provision for Loan Losses

The provision for loan losses is a current charge against income and represents an amount which management believes is sufficient to maintain an appropriate allowance for known and probable losses in the loan portfolio. In assessing the appropriateness of the allowance for loan losses, management considers the size and quality of the loan portfolio measured against prevailing economic conditions, regulatory guidelines, historical loan loss experience and credit quality of the portfolio. When a determination is made by management to charge-off a loan balance, such write-off is charged against the allowance for loan losses.

Our provision for loan losses was \$7.5 million during 2013 compared to \$16.5 million in 2012 and \$20.0 million in 2011. The relative provision expenses during 2013 and 2012 were reflective of management's assessment of the lower level of risk in the portfolio in 2013.

Sensitive assets include non-accrual loans, loans on our classified loan reports and other loans identified as having more than reasonable potential for loss. Management reviews sensitive assets on at least a quarterly basis for changes in the customers' ability to pay and changes in valuation of underlying collateral in order to estimate probable losses. The majority of these loans are being repaid in conformance with their

contracts.

Non-performing Loans

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on non-accrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. Loans may be placed on non-accrual status regardless of whether or not such loans are considered past due. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Table of Contents

The following table sets forth information concerning non-performing loans and performing restructured loans at December 31 for each of the years indicated:

| | 2013 | 2012 | 2011 | 2010 | 2009 |
|--|------------------------|-----------|-----------|-----------|------------|
| | (dollars in thousands) | | | | |
| Non-accrual loans | \$ 17,164 | \$ 25,104 | \$ 38,340 | \$ 65,486 | \$ 82,133 |
| Loans 90+ days past due and still accruing | 195 | 256 | 173 | 2,618 | 4,166 |
| Total non-performing loans | \$ 17,359 | \$ 25,360 | \$ 38,513 | \$ 68,104 | \$ 86,299 |
| Repossessed assets | \$ 1,732 | \$ 2,949 | \$ 6,378 | \$ 9,154 | \$ 17,190 |
| Other assets acquired in satisfaction of debts previously contracted | 401 | 501 | 2,074 | 6 | 51 |
| Total OREO | \$ 2,133 | \$ 3,450 | \$ 8,452 | \$ 9,160 | \$ 17,241 |
| Total non-performing loans and OREO | \$ 19,492 | \$ 28,810 | \$ 46,965 | \$ 77,264 | \$ 103,540 |
| Non-performing loans to loans, before allowance for loan losses | 0.76% | 1.22% | 1.88% | 2.88% | 3.09% |
| Non-performing loans and OREO to loans, before allowance for loan losses | 0.85% | 1.39% | 2.28% | 3.26% | 3.71% |
| Performing restructured loans not included above | \$ 11,891 | \$ 22,051 | \$ 33,637 | \$ 28,233 | \$ 30,541 |

In 2013 we continued to significantly improve asset quality measures and expect these levels to generally stabilize in 2014; however, this remains dependent upon market-specific economic conditions. Total non-performing assets were \$19.5 million at December 31, 2013, compared to \$28.8 million at December 31, 2012.

As of December 31, 2013, the Bank had charged-off \$6.0 million of principal balance on loans that were on non-accrual status at December 31, 2013. Partial charge-offs reduce the reported principal of the balance of the loan, whereas, a specific allocation of allowance for loan losses does not reduce the reported principal balance of the loan. Non-accrual loans are reported net of charge-offs, but include related specific allocations of the allowance for loan losses. In summary, if we had not charged-off \$6.0 million in loans, our non-accrual loans would have been that amount greater than the \$17.2 million reported.

Potential Problem Loans

Potential problem loans are those loans which are not categorized as impaired, restructured, non-accrual or 90+ days past due, but where current information indicates that the borrower may not be able to comply with present loan repayment terms. Management assesses the potential for loss on such loans as it would with other problem loans and has considered the effect of any potential loss in determining its provision for probable loan losses. Potential problem loans of \$50.1 million at December 31, 2013 were less than the \$58.1 million reported at December 31, 2012. The balance of potential problem loans is a reflection of continued challenging economic conditions; however, we do not believe the potential losses will be as great as seen in certain years in the past. Management continues to monitor these credits and anticipates that restructurings, guarantees, additional collateral or other planned actions will result in full repayment of the debts. As of December 31, 2013, management identified no other loans that represent or result from trends or uncertainties which management reasonably expected to materially impact future operating results, liquidity or capital resources. As of December 31, 2013, management was not aware of any information about any other credits which caused management to have serious doubts as to the ability of such borrower(s) to comply with the loan repayment terms.

Table of Contents*Deposits*

As indicated in the following table, average non-interest-bearing deposits as a percentage of average total deposits increased to 18.3% for the year ended December 31, 2013, from 18.0% for the year ended December 31, 2012, which was an increase from 16.8% for the year ended December 31, 2011. We continue to focus on deepening our relationship value with customers.

| | 2013 | | | Year Ended December 31, 2012 | | | 2011 | | |
|---|--------------------|---------|-----------------|---------------------------------|---------|-----------------|--------------------|---------|-----------------|
| | Average Balance | % Total | Average Rate | Average Balance | % Total | Average Rate | Average Balance | % Total | Average Rate |
| Non-interest-bearing demand deposits | \$ 531,744 | 18.3% | 0.00% | \$ 515,934 | 18.0% | 0.00% | \$ 472,516 | 16.8% | 0.00% |
| Interest-bearing demand Deposits | 49,049 | 1.7% | 0.06% | 42,532 | 1.5% | 0.16% | 39,900 | 1.4% | 0.23% |
| Savings/Money Market | 1,681,407 | 58.1% | 0.11% | 1,562,660 | 54.6% | 0.20% | 1,424,764 | 50.6% | 0.29% |
| Time deposits | 633,534 | 21.9% | 0.83% | 741,038 | 25.9% | 1.25% | 877,011 | 31.2% | 1.64% |

Certificates of deposit and other time deposits of \$100,000 and over at December 31, 2013 had the following maturities (dollars in thousands):

| | | |
|----------------|----|---------|
| Under 3 months | \$ | 28,564 |
| 3 to 6 months | | 25,852 |
| 6 to 12 months | | 44,363 |
| Over 12 months | | 64,918 |
| Total | \$ | 163,697 |

At December 31, 2013, we did not have any brokered certificates of deposit. National certificates of deposit of \$0.5 million at December 31, 2013 had maturities in excess of 12 months.

Table of Contents**Short-term Borrowings**

The following table sets forth the distribution of short-term borrowings and weighted average interest rates thereon as of December 31, 2013, 2012 and 2011. Securities sold under agreements to repurchase generally represent overnight borrowing transactions. First Busey had no other categories of short-term borrowings as of December 31, 2013, 2012 and 2011.

| | Securities sold under agreements to repurchase (dollars in thousands) | |
|--|--|---------|
| 2013 | | |
| Balance, December 31, 2013 | \$ | 172,348 |
| Weighted average interest rate at end of period | | 0.13% |
| Maximum outstanding at any month end | \$ | 172,348 |
| Average daily balance | \$ | 137,777 |
| Weighted average interest rate during period (1) | | 0.14% |
| 2012 | | |
| Balance, December 31, 2012 | \$ | 139,024 |
| Weighted average interest rate at end of period | | 0.15% |
| Maximum outstanding at any month end | \$ | 146,710 |
| Average daily balance | \$ | 132,150 |
| Weighted average interest rate during period (1) | | 0.21% |
| 2011 | | |
| Balance, December 31, 2011 | \$ | 127,867 |
| Weighted average interest rate at end of period | | 0.21% |
| Maximum outstanding at any month end | \$ | 142,557 |
| Average daily balance | \$ | 127,095 |
| Weighted average interest rate during period (1) | | 0.29% |

(1) The weighted average interest rate is computed by dividing total interest for the year by the average daily balance outstanding.

Liquidity

Liquidity management is the process by which we ensure that adequate liquid funds are available to meet the present and future cash flow obligations arising in the daily operations of our business. These financial obligations consist of needs for funds to meet commitments to borrowers for extensions of credit, fund capital expenditures, honor withdrawals by customers, pay dividends to stockholders and pay operating expenses.

Our most liquid assets are cash and due from banks, interest-bearing bank deposits, and, if needed, federal funds sold. The balances of these assets are dependent on the Company's operating, investing, lending, and financing activities during any given period. Average liquid assets are

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

summarized in the table below:

| | 2013 | Years Ended December 31, 2012 | | 2011 |
|---------------------------------|-------------------|----------------------------------|-------------------|------|
| | | (dollars in thousands) | | |
| Cash and due from banks | \$ 92,390 | \$ 77,482 | \$ 76,651 | |
| Interest-bearing bank deposits | 194,508 | 263,017 | 282,634 | |
| Total | \$ 286,898 | \$ 340,499 | \$ 359,285 | |
| Percent of average total assets | 8.1% | 9.7% | 10.3% | |

Table of Contents

First Busey's primary sources of funds consist of deposits, investment maturities and sales, loan principal repayments, and capital funds. Additional liquidity is provided by repurchase agreements, the ability to borrow from the Federal Reserve and the Federal Home Loan Bank, and brokered deposits. Management intends to satisfy long-term liquidity needs primarily through retention of capital funds.

Based upon the level of investment securities that reprice within 30 days and 90 days, as of December 31, 2013, management believed that adequate liquidity existed to meet all projected cash flow obligations. We seek to achieve a satisfactory degree of liquidity by actively managing both assets and liabilities. Asset management guides the proportion of liquid assets to total assets, while liability management monitors future funding requirements and prices liabilities accordingly.

At December 31, 2013 the Bank's capital ratios were in excess of the minimum capital ratios required to be well-capitalized under regulatory standards. However, due to the significant losses in the past, no dividends have been paid from the Bank since 2009. Until such time as retained earnings have been restored, the Bank will not be permitted to pay dividends and we will need to request permission from the Bank's primary regulator to receive any capital out of the Bank. On January 22, 2013, with the approval of its primary regulator, the Bank transferred \$50.0 million to the Company representing a return of capital and associated surplus as a result of an amendment to the Bank's charter.

Off-Balance-Sheet Arrangements

The Bank routinely enters into commitments to extend credit in the normal course of its business. As of December 31, 2013 and 2012, we had outstanding loan commitments including lines of credit of \$527.6 million, and \$483.4 million, respectively. The balance of commitments to extend credit represents future cash requirements and some of these commitments may expire without being drawn upon. We anticipate we will have sufficient funds available to meet current loan commitments, including loan applications received and in process prior to the issuance of firm commitments.

Contractual Obligations

We have entered into certain contractual obligations and other commitments. Such obligations generally relate to funding of operations through deposits, debt issuance, and property and equipment leases. The following table summarizes significant contractual obligations and other commitments as of December 31, 2013:

| | Certificates of Deposit | Operating Leases | Junior Subordinated Debt Owed to Unconsolidated Trusts | Total |
|------|----------------------------|---------------------|--|------------|
| 2014 | \$ 349,128 | \$ 1,274 | \$ | \$ 350,402 |
| 2015 | 112,585 | 711 | | 113,296 |

Table of Contents

Cash Flows

Net cash flows provided by operating activities totaled \$98.2 million, \$49.1 million and \$115.9 million in 2013, 2012 and 2011, respectively. Significant items affecting the cash flows provided by operating activities include net income, depreciation and amortization expense, the provision for loan losses, deferred income taxes, gain on sales of loans, and activities related to the origination and sale of mortgage loans held for sale. Net cash provided by mortgage loan originations was \$36.4 million in 2013 while net cash used in mortgage loan sales totaled \$12.2 million in 2012. In 2011, net cash provided by mortgage loan originations was \$45.4 million. Fluctuations in sales are primarily a function of changes in market rates for mortgage loans, which influence refinance activity.

Net cash used in investing activities was \$118.7 million in 2013 and \$204.4 million in 2012; however, net cash provided by investing activities totaled \$13.2 million in 2011. Significant activities affecting cash flows from investing activities are those activities associated with managing the Company's investment and loan portfolios. The primary reason for investing activities providing cash to the Company during 2011 was the reduction in loans and increase in purchases of available for sale securities. Due to the previously announced growth initiative, the Company experienced a net increase in loans of \$258.4 million in 2013 and \$33.7 million during 2012.

Net cash used in financing activities totaled \$99.1 million in 2013 as compared to net cash provided by financing activities of \$191.6 million in 2012 and cash used in financing activities of \$233.0 million in 2011. Significant items affecting cash flows from financing activities are deposits, long-term debt, and net proceeds from stock issuances. Deposits, which represent the Company's primary funding source, increased by \$216.8 million in 2012, and as such, drove the positive cash inflow from financing activities. In comparison, deposits shrank \$111.2 million in 2013 and \$152.9 million in 2011. While securities sold under agreements to repurchase increased \$33.3 million in 2013 and \$11.1 million in 2012 as compared to a decline of \$11.1 million in 2011, core growth has generally supported the reduction in higher cost funding alternatives such as long-term debt. In 2011, the Company issued \$72.6 million in preferred stock to Treasury in connection with its participation in the Small Business Lending Fund program. The proceeds from this stock issuance allowed the Company to repurchase all shares of its Series T preferred stock for a redemption price of \$100.1 million. The Company's net cash outlay for these transactions was \$27.3 million.

Capital Resources

Our capital ratios are in excess of those required to be considered well-capitalized pursuant to applicable regulatory guidelines at both the consolidated level and at the Bank. The Federal Reserve Board uses capital adequacy guidelines in its examination and regulation of bank holding companies and their subsidiary banks. Risk-based capital ratios are established by allocating assets and certain off-balance-sheet commitments into four risk-weighted categories. These balances are then multiplied by the factor appropriate for that risk-weighted category. The guidelines require bank holding companies and their subsidiary banks to maintain a total capital to total risk-weighted asset ratio of not less than 8.00%, of which at least one half must be Tier 1 capital, and a Tier 1 leverage ratio of not less than 4.00%. As of December 31, 2013, we had a total capital to total risk-weighted asset ratio of 18.21%, a Tier 1 capital to risk-weighted asset ratio of 16.92% and a Tier 1 leverage ratio of 12.02%; the Bank had ratios of 16.17%, 14.88%, and 10.66%, respectively.

Issuance of Preferred Stock Under Small Business Lending Fund

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

On August 25, 2011, the Company entered into the Purchase Agreement with the Treasury, pursuant to which the Company issued and sold to the Treasury 72,664 shares of its Series C Preferred Stock, having a liquidation preference of \$1,000 per share, for aggregate proceeds of \$72,664,000 (which were used to partially finance the Company's redemption of Series T Preferred Stock as described below). The SBLF is a Treasury lending program that encourages qualified community banks to partner with small businesses and entrepreneurs to create jobs and promote economic development in local communities.

Table of Contents

The Series C Preferred Stock qualifies as Tier 1 capital for the Company. Non-cumulative dividends are payable quarterly on the Series C Preferred Stock, which began October 1, 2011. The dividend rate is calculated as a percentage of the aggregate Liquidation Amount of the outstanding Series C Preferred Stock and was based on changes in the level of Qualified Small Business Lending or QSBL (as such terms are defined in the Purchase Agreement) by the Bank. Based upon the lack of increase in the Bank's level of QSBL over the baseline level calculated under the terms of the Purchase Agreement, the dividend rate for the initial dividend period, which was from the date of issuance through September 30, 2011, was set at 5%. For the 2nd through 10th calendar quarters, which ended December 31, 2013, the annual dividend rate also remained at 5%. For the 11th calendar quarter through 4.5 years after issuance, the dividend rate will be fixed at between 1% and 7% based upon the level of QSBL as compared to the baseline. In the third quarter of 2013, the Company had meaningful progress in commercial loan growth which led to the successful attainment of targets under the SBLF program. The achievement of this important milestone under SBLF will yield a lower dividend rate in 2014 of 1%. After 4.5 years from issuance, the dividend rate will increase to 9%.

The Series C Preferred Stock is non-voting, except in limited circumstances. The Company may redeem the shares of Series C Preferred Stock, in whole or in part, at any time at a redemption price equal to the sum of the Liquidation Amount per share and the per share amount of any unpaid dividends for the then-current period, subject to any required prior approval by the Company's primary federal banking regulator.

Redemption of Series T Preferred Stock

The Company's Series T Preferred Stock, was issued to the Treasury on March 6, 2009 in connection with the Company's participation in the TARP CPP. On August 25, 2011, the Company entered into and consummated the transactions contemplated by a letter agreement (the Repurchase Document) with the Treasury. Under the Repurchase Document, the Company redeemed from the Treasury, in part using the proceeds from the issuance of the Series C Preferred Stock, all 100,000 outstanding shares of its Series T Preferred Stock, for a redemption price of approximately \$100.1 million, including accrued but unpaid dividends to the date of redemption.

In connection with the Company's participation in the CPP, the Company also issued to Treasury a warrant to purchase 1,147,666 shares of the Company's common stock. Subsequent to the date of the Company's participation in the CPP, it raised additional capital through a public offering of common stock and, as a result of that offering, the number of shares of common stock subject to the warrant were reduced by 50% to 573,833. On November 23, 2011 the Treasury completed an auction to sell its warrant in a private transaction. At December 31, 2013, this warrant to purchase 573,833 shares of the Company's common stock remained outstanding.

Series B Convertible Cumulative Preferred Stock Issuance and Subsequent Conversion

At December 28, 2010, the Company completed a registered direct offering, issuing 318,625 shares of Series B Convertible Cumulative Preferred Stock (the Series B Preferred Stock) at a price of \$100,000 per share, or \$31.9 million in the aggregate. The Series B Preferred Stock had a liquidation preference of \$100,000 per share and annual dividend of 9.0%.

On March 1, 2011, the Company's stockholders approved the conversion of the shares of the Series B Preferred Stock issued December 28, 2010, at \$4.25 per share, the same price at which shares of common stock were issued in a common stock issuance made concurrently with the offering of the Series B Preferred Stock, resulting in an additional 7,497,000 common shares outstanding. Following the conversion, no shares of Series B Preferred Stock remained outstanding.

New Accounting Pronouncements

The Company reviews new accounting standards as issued. Information relating to accounting pronouncements issued and applicable to the Company in 2013 appears in *Note 1 Significant Accounting Policies* in the Notes to the Consolidated Financial Statements. The Company has not identified any other standards that it believes merit further discussion.

Table of Contents***Effects of Inflation***

The effect of inflation on a financial institution differs significantly from the effect on an industrial company. While a financial institution's operating expenses, particularly salary and employee benefits, are affected by general inflation, the asset and liability structure of a financial institution consists largely of monetary items. Monetary items, such as cash, loans and deposits, are those assets and liabilities which are or will be converted into a fixed number of dollars regardless of changes in prices. As a result, changes in interest rates have a more significant impact on a financial institution's performance than does general inflation. For additional information regarding interest rates and changes in net interest income see Average Balance Sheets and Interest Rates and Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of change in asset values due to movements in underlying market rates and prices. Interest rate risk is the risk to earnings and capital arising from movements in interest rates. Interest rate risk is the most significant market risk affecting First Busey as other types of market risk, such as foreign currency exchange rate risk and commodity price risk, do not arise in the normal course of First Busey's business activities.

The Bank has an asset-liability committee which meets at least quarterly to review current market conditions and attempts to structure the Bank's balance sheet to ensure stable net interest income despite potential changes in interest rates with all other variables constant.

As interest rate changes do not impact all categories of assets and liabilities equally or simultaneously, the asset-liability committee primarily relies on balance sheet and income simulation analysis to determine the potential impact of changes in market interest rates on net interest income. In these standard simulation models, the balance sheet is projected over a one-year period and net interest income is calculated under current market rates, and then assuming permanent instantaneous shifts of +/-100, +/-200, +/-300 and +/-400 basis points. Management measures such changes assuming immediate and sustained shifts in the federal funds rate and other market rate indices and the corresponding shifts in other non-market rate indices based on their historical changes relative to changes in the federal funds rate and other market indices. The model assumes assets and liabilities remain constant at the measurement date balances. The model uses repricing frequency on all variable-rate assets and liabilities. Prepayment speeds on loans have been adjusted to incorporate expected prepayment speeds in both a declining and rising rate environment. As of December 31, 2013 and 2012, due to the current low interest rate environment, a downward adjustment in federal fund rates was not possible.

Utilizing this measurement concept, the interest rate risk of First Busey due to an immediate and sustained change in interest rates, expressed as a change in net interest income as a percentage of the net interest income calculated in the constant base model, was as follows:

| | Basis Point Changes | | | | | | | |
|-------------------|----------------------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|
| | -400 | -300 | -200 | -100 | +100 | +200 | +300 | +400 |
| December 31, 2013 | NA | NA | NA | NA | (3.55)% | (6.91)% | (10.62)% | (14.60)% |
| December 31, 2012 | NA | NA | NA | NA | (2.64)% | (5.48)% | (9.15)% | (13.22)% |

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

First Busey's Asset, Liability and Liquidity Management Policy defines a targeted range of:

| Change in Basis points | Net interest income |
|-----------------------------------|--------------------------------|
| +/-100 | +/-10.0% |
| +/-200 | +/-15.0% |
| +/-300 | +/-22.5% |
| +/-400 | +/-30.0% |

As indicated in the table above, as of December 31, 2013 and 2012, First Busey was within each of the targeted ranges on a consolidated basis. The calculation of potential effects of hypothetical interest rate changes are based on numerous assumptions and should not be relied upon as indicative of actual results.

Item 8. Financial Statements and Supplementary Data

The financial statements are presented beginning on page 73, and incorporated herein by reference.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

An evaluation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) was carried out as of December 31, 2013, under the supervision and with the participation of our Chief Executive Officer, Chief Financial Officer and several other members of our senior management. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2013, our disclosure controls and procedures were effective in ensuring that the information we are required to disclose in the reports we file or submit under the Exchange Act is (i) accumulated and communicated to our management (including the Chief Executive Officer and Chief Financial Officer) to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

Management's Report on Internal Control Over Financial Reporting

First Busey's management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed under the supervision of the Company's Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's Consolidated Financial Statements for external reporting purposes in accordance with U.S. generally accepted accounting principles.

As of December 31, 2013, management assessed the effectiveness of the Company's internal control over financial reporting based on the criteria for effective internal control over financial reporting established in *Internal Control - Integrated Framework*, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in 1992. Based on this assessment, management determined that the Company maintained effective internal control over financial reporting as of December 31, 2013, based on the COSO criteria.

McGladrey LLP, an independent registered public accounting firm that audited the Consolidated Financial Statements of the Company included in this Annual Report on Form 10-K, has issued an attestation report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2013. The report, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2013, is included in this Item under the heading *Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting*.

Table of Contents

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON
INTERNAL CONTROL OVER FINANCIAL REPORTING**

To the Stockholders and Board of Directors of First Busey Corporation

We have audited First Busey Corporation's internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission in 1992. First Busey Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that: (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Consolidated Financial Statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, First Busey Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission in 1992.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Consolidated Financial Statements of First Busey Corporation and subsidiaries and our report dated March 11, 2014, expressed an unqualified opinion.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of First Busey Corporation

We have audited the accompanying consolidated balance sheets of First Busey Corporation and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2013. These financial statements are the responsibility of the First Busey Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the Consolidated Financial Statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013, in conformity with United States generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission in 1992, and our report dated March 11, 2014 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

FIRST BUSEY CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Significant Accounting Policies

Description of business

First Busey Corporation (the Company) is a Nevada corporation and a financial holding company whose subsidiaries provide retail and commercial banking services, and remittance processing, and offer a full range of financial products and services, including depository, lending, security brokerage services, investment management and fiduciary services, to individual, corporate, institutional and governmental customers through its locations in downstate Illinois, Indianapolis, Indiana and southwest Florida. The Company and its subsidiaries are subject to competition from other financial institutions and non-financial institutions providing financial products and services. The Company and its subsidiaries are also subject to the regulations of certain regulatory agencies and undergo periodic examinations by those regulatory agencies.

The significant accounting and reporting policies for the Company and its subsidiaries follow:

Basis of consolidation

The Consolidated Financial Statements include the accounts of the Company and its subsidiaries: Busey Bank and its wholly-owned subsidiary FirstTech, Inc.; and Busey Wealth Management, Inc. and its wholly-owned subsidiaries Busey Trust Company and Busey Capital Management, Inc. The Company and its subsidiaries maintain various LLCs that hold specific assets for risk mitigation purposes and are consolidated into these financial statements. All significant intercompany balances and transactions have been eliminated in consolidation.

The Consolidated Financial Statements also exclude the following wholly-owned variable interest entities: First Busey Statutory Trust II, First Busey Statutory Trust III and First Busey Statutory Trust IV because the Company is not the primary beneficiary.

The Consolidated Financial Statements of the Company have been prepared in conformity with accounting principles generally accepted in the United States of America and conform to predominant practice within the banking industry.

Use of estimates

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

In preparing the accompanying Consolidated Financial Statements, the Company's management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses for the reporting period. Actual results could differ from those estimates. Material estimates which are particularly susceptible to significant change in the near-term relate to the fair value of investment securities, the determination of the allowance for loan losses and the ability to realize its deferred tax assets.

Comprehensive income

Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available for sale securities, are reported as a separate component of the equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

Trust assets

Assets held for customers in a fiduciary or agency capacity, other than trust cash on deposit at the Company's bank subsidiary, are not assets of the Company and, accordingly, are not included in the accompanying Consolidated Financial Statements. Busey Trust Company had assets under care of \$5.0 billion and \$4.2 billion at December 31, 2013 and 2012, respectively.

Table of Contents

Cash flows

For purposes of the consolidated statement of cash flows, cash and due from banks includes cash on hand and amounts due from banks. Cash flows from federal funds purchased and sold, short-term borrowings, and securities sold under agreements to repurchase are reported net, since their original maturities are less than three months. Cash flows from loans and deposits are also reported net.

Securities

Securities classified as available for sale are those debt securities that the Company intends to hold for an indefinite period of time, but not necessarily to maturity, and marketable equity securities. Any decision to sell a security classified as available for sale would be based on various factors, including significant movements in interest rates, changes in the maturity mix of the Company's assets and liabilities, liquidity needs, regulatory capital considerations and other similar factors. Securities available for sale are carried at fair value, with temporary unrealized gains and losses excluded from earnings and reported in other comprehensive income.

Declines in the fair value of debt securities below their amortized cost are evaluated to determine whether the loss is temporary or other-than-temporary. If the Company (a) has the intent to sell a debt security or (b) more likely than not will be required to sell the debt security before its anticipated recovery, then the Company recognizes the entire unrealized loss in earnings as an other-than-temporary loss. If neither of these conditions are met, the Company evaluates whether a credit loss exists. The impairment is separated into (x) the amount of the total impairment related to the credit loss and (y) the amount of total impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings and the amount related to all other factors is recognized in other comprehensive income.

The Company also evaluates whether the decline in fair value of an equity security is temporary or other-than-temporary. In determining whether an unrealized loss on an equity security is temporary or other-than-temporary, management considers various factors, including the magnitude and duration of the impairment, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to hold the equity security to forecasted recovery.

Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

Securities classified as held to maturity are those debt securities that the Company intends to hold to maturity. Securities held to maturity are carried at cost, adjusted for amortization of premiums and accretion of discounts.

Loans held for sale

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

Loans held for sale are those loans the Company has the intent to sell in the foreseeable future. They consist of mortgage loans conforming to established guidelines and held for sale to investors and the secondary mortgage market. Loans held for sale are carried at the lower of aggregate cost or estimated fair value, as determined by aggregate outstanding commitments from investors or current investor yield requirements. Net unrealized losses, if any, are recognized through a valuation allowance by charges to income. Gains and losses on sales of loans are recognized at settlement dates and are determined by the difference between the sales proceeds and the carrying amount of the loans after allocating cost to servicing rights retained.

The Company enters into commitments to originate loans whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Rate lock commitments on mortgage loans that are intended to be sold are considered to be derivatives. To avoid interest rate risk, the Company also enters into mortgage loan sales commitments at the time it makes the interest rate lock commitment. Accordingly, such commitments along with any related fees received from potential borrowers are recorded at fair value, with changes in fair value recorded in the net gain or loss on sale of mortgage loans. Fair value is based on the change in estimated fair value of the underlying mortgage loan. The fair value is subject to change primarily due to changes in interest rates and is considered immaterial to the Consolidated Financial Statements.

Table of Contents

Loan servicing

Servicing assets are recognized as separate assets when rights are acquired or retained through the sale of mortgage loans. Mortgage servicing rights are initially recorded at fair value. Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. Capitalized servicing rights are reported in other assets and are amortized into other income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets.

Mortgage servicing rights are periodically evaluated for impairment based on the fair value of those rights as compared to book value. Fair values are estimated using discounted cash flows based on current expected future prepayment rates. For purposes of measuring impairment, the rights must be stratified by one or more predominant risk characteristics of the underlying loans. The Company stratifies its capitalized mortgage servicing rights based on the origination date, interest rate, and type of the underlying loans. The amount of impairment recognized is the amount, if any, by which the amortized cost of the rights for each stratum exceeds its fair value. If the Company later determines that all or a portion of the impairment no longer exists for a particular group of loans, a reduction of the allowance may be recorded as an increase to income.

Servicing fee income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal and are recorded as income when earned. The amortization of mortgage servicing rights is netted against loan servicing fee income.

Loans

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are stated at the amount of outstanding unpaid principal, adjusted for chargeoffs, the allowance for loan losses, and any deferred origination fees or costs on loans.

Loan origination fees, net of certain direct loan origination costs, are deferred and the net amount is amortized as an adjustment of the related loan's yield. The Company is generally amortizing these amounts over the contractual life. However, for long-term, fixed-rate residential mortgages, the Company has anticipated prepayments and assumes an estimated economic life of 5 years or less. Commitment fees and costs are generally based upon a percentage of a customer's maximum line of credit or fees related to standby letters of credit and are recognized as collected.

Interest is accrued daily on the outstanding balances. Loans are placed on non-accrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. Loans may be placed on non-accrual status regardless of whether or not such loans are considered past due. Past due status is based on the contractual terms of the loan.

Interest accrued in the current year but not collected for loans that are placed on non-accrual status or charged-off is reversed against interest income. Interest accrued during the prior year but not collected for loans that are placed on non-accrual status or charged-off is charged against

the allowance for loan losses. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual status. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for loan losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance for loan losses when management believes the uncollectibility of the loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

Table of Contents

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

In addition, regulatory agencies, as an integral part of their examination process, periodically review the allowance for loan losses, and may require the Company to make additions to the allowance based on their judgment about information available to them at the time of their examinations.

The allowance consists of specific and general components. The specific component considers loans that are classified as impaired. For such loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying amount of that loan. The general component covers non-classified loans and classified loans not considered impaired, and is based on historical loss experience adjusted for qualitative factors. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss experience.

Premises and equipment

Land is stated at cost less accumulated depreciation of depreciable land improvements. Premises and equipment are stated at cost less accumulated depreciation. Depreciation is computed principally by the straight-line method over the estimated useful lives of the assets. The estimated useful lives for premises and equipment are:

| Asset Description | Estimated Useful Life |
|----------------------------|------------------------------|
| Buildings and improvements | 3 40 years |
| Furniture and equipment | 3 10 years |

Long-lived assets

Long-lived assets, including premises and equipment and intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. An impairment loss would be recognized when estimated undiscounted future cash flows from operations of the asset are less than the carrying value of the asset. The cash flows used for this analysis are those directly associated with and that are expected to arise as a direct result of the use and eventual disposition of the asset. An impairment loss would be measured by the amount by which the carrying value of the asset exceeds its fair value.

Other real estate owned

Other real estate owned (OREO) represents properties acquired through foreclosure or other proceedings in settlement of loans. OREO is held for sale and is recorded at the date of foreclosure at the fair value of the properties less estimated costs of disposal, which establishes a new cost basis. Any adjustment to fair value at the time of transfer to OREO is charged to the allowance for loan losses. Property is evaluated regularly to ensure the recorded amount is supported by its current fair value, and valuation allowances to reduce the carrying amount to fair value less estimated costs to dispose are recorded as necessary. Revenue, expense, gains and losses from the operations of foreclosed assets are included in operations.

Goodwill

Goodwill represents the excess of the cost of a business acquired over the fair value of the new assets acquired. Goodwill is not amortized, but is subject to at least annual impairment assessments. The Company has established December 31 as the annual impairment assessment date. Accounting standards allow for goodwill to be tested for impairment by first performing a qualitative assessment to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying value. If the reporting unit does not pass the qualitative assessment, then the reporting unit's carrying value is compared to its fair value. The Company estimates the fair value of its reporting units as of the measurement date utilizing valuation methodologies including the comparable transactions approach and the control premium approach. Goodwill is considered impaired if the carrying value of the reporting unit exceeds its fair value. There was no impairment determined at December 31, 2013 and 2012. It is possible the Company will evaluate its goodwill for impairment on a more frequent basis than annually. Future evaluations may result in impairment.

See Note 7 *Goodwill and Other Intangible Assets* for further discussion.

Table of Contents

Cash surrender value of bank-owned life insurance

The Company has purchased life insurance policies on certain executives and senior officers. Life insurance is recorded at its cash surrender value.

ASC Topic 715, Compensation Retirement Benefits requires an employer to recognize a liability for post-employment benefits promised to an employee based on an arrangement between an employer and an employee. In an endorsement split-dollar arrangement, the employer owns and controls the policy, and the employer and employee split the life insurance policy's cash surrender value and/or death benefits. If the employer agrees to maintain a life insurance policy during the employee's retirement, the present value of the cost of maintaining the insurance policy would be accrued over the employee's active service period. Similarly, if the employer agrees to provide the employee with a death benefit, the present value of the death benefit would be accrued over the employee's active service period.

Transfers of financial assets

Transfers of financial assets are accounted for as sales only when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when: (1) the assets have been isolated from the Company, (2) the transferee obtains the right to pledge or exchange the assets it received, and no condition both constrains the transferee from taking advantage of its right to pledge or exchange and provides more than a modest benefit to the transferor, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Income taxes

The Company is subject to income taxes in the U.S. federal and various state jurisdictions. The Company and its subsidiaries file consolidated federal and state income tax returns with each subsidiary computing its taxes on a separate entity basis. Tax regulations within each jurisdiction are subject to the interpretation of the related tax laws and regulations and require significant judgment to apply. With few exceptions, the Company is no longer subject to U.S. federal, state or local tax examinations by tax authorities for the years before 2009. The provision for income taxes is based on income as reported in the Consolidated Financial Statements.

The Company has maintained significant net deferred tax assets for deductible temporary differences, the largest of which relates to the net operating loss carryforward and the allowance for loan losses. For income tax return purposes, only actual charge-offs are deductible, not the provision for loan losses. Under generally accepted accounting principles, a valuation allowance is required to be recognized if it is more likely than not that the deferred tax assets will not be realized. The determination of the recoverability of the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, the forecasts of future income, applicable tax planning strategies, and assessments of the current and future economic and business conditions. The Company considers both positive and negative evidence regarding the ultimate recoverability of its deferred tax assets. Positive evidence includes available tax planning strategies and the probability that taxable income will continue to be generated in future periods, as it was in periods since March 31, 2010, while negative evidence includes a cumulative loss in 2009 and 2008 and certain business and economic trends. The Company evaluated the recoverability of its net deferred tax assets and established a valuation allowance for certain state net operating loss and credit carryforwards that are not expected to be fully realized. Management believes that it is more likely than not that the other deferred tax assets included in the

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

accompanying Consolidated Financial Statements will be fully realized. The Company determined that no valuation allowance was required for any other deferred tax assets as of December 31, 2013, although there is no guarantee that those assets will be recognizable in future periods.

The Company must assess the likelihood that any deferred tax assets will be realized through the reduction of taxes in future periods and establish a valuation allowance for those assets for which recovery is not more likely than not. In making this assessment, the Company must make judgments and estimates regarding the ability to realize the asset through the future reversal of existing taxable temporary differences, future taxable income, and the possible application of future tax planning strategies. The Company's evaluation gave consideration to the fact that all net operating loss carrybacks have been utilized. Therefore, utilization of net operating loss carryforwards are dependent on implementation of tax strategies and continued profitability.

Table of Contents

Positions taken in tax returns may be subject to challenge upon examination by the taxing authorities. Uncertain tax positions are initially recognized in the Financial Statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions are both initially and subsequently measured as the largest amount of tax benefit that has a greater than 50% likelihood of being realized upon settlement with the tax authority, assuming full knowledge of the position and all relevant facts. When applicable, the Company recognizes interest accrued related to unrecognized tax benefits and penalties in operating expenses. The Company had no accruals for payments of interest and penalties at December 31, 2013 and 2012.

At December 31, 2013, the Company was not under examination by any tax authority; however, the Company has received notice that the Illinois Department of Revenue intends to audit the Company's 2011 income tax filing beginning in the first quarter of 2014.

Reclassifications

Reclassifications have been made to certain prior year account balances, with no effect on net income or stockholders' equity, to be consistent with the classifications adopted as of and for the year ended December 31, 2013.

Stock-based employee compensation

During the second quarter of 2010, the Company adopted the First Busey Corporation 2010 Equity Incentive Plan ("2010 Equity Plan"), which was approved at the annual stockholders meeting on May 19, 2010. The Company will no longer make any additional grants under prior plans.

The Company's equity incentive plans are designed to encourage ownership of its common stock by its employees and directors, to provide additional incentive for them to promote the success of the Company's business, and to attract and retain talented personnel. All of the Company's employees and directors and those of its subsidiaries are eligible to receive awards under the plans. See *Note 16 - Stock Incentive Plans* for further discussion.

The Company calculates the compensation cost of its non-vested stock awards (restricted stock units) based on the Company's stock price on the grant date multiplied by the number of units granted. This cost is recorded over a specified requisite service period (i.e. vesting period) ranging from one to five years. As the units cliff vest and are subject only to a service condition, the cost is recorded using straight-line amortization. No compensation cost is recognized for unvested awards that are forfeited.

Segment disclosure

Operating segments are components of a business that (i) engage in business activities from which it may earn revenues and incur expenses; (ii) have operating results that are reviewed regularly by the entity's chief operating decision maker to make decisions about resources to be

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

allocated to the segments and assess their performance; and (iii) for which discrete financial information is available. The Company's segments are its three primary operating subsidiaries Busey Bank, FirsTech and Busey Wealth Management.

Earnings per share

Basic earnings per share are computed by dividing net income available to common stockholders for the year by the weighted average number of shares outstanding.

Diluted earnings per share are determined by dividing net income available to common stockholders for the period by the weighted average number of shares of common stock and common stock equivalents outstanding. Common stock equivalents assume exercise of stock options, warrants and vesting of restricted stock units and use of proceeds to purchase treasury stock at the average market price for the period. If the average market price for the period is less than the strike price of a stock option or warrant, that option or warrant is considered anti-dilutive and is excluded from the calculation of common stock equivalents. If the total employee proceeds of a restricted stock unit exceed the average market price for the period, that restricted stock unit is considered anti-dilutive and is excluded from the calculation of common stock equivalents. At December 31, 2013, 643,879 outstanding options, 573,833 warrants, and 347,253 restricted stock units were anti-dilutive and excluded from the calculation of common stock equivalents. At December 31, 2012, 804,968 outstanding options, 573,833 warrants, and 793,332 restricted stock units were anti-dilutive and excluded from the calculation of common stock equivalents.

Table of Contents

The following reflects net income per share calculations for basic and diluted methods:

| | For the Years Ended December 31, | | |
|---|---------------------------------------|-----------|-----------|
| | 2013 | 2012 | 2011 |
| | (in thousands, except per share data) | | |
| Net income available to common stockholders | \$ 25,093 | \$ 18,724 | \$ 24,531 |
| Weighted average common shares outstanding | 86,765 | 86,643 | 85,304 |
| Dilutive effect of outstanding options, warrants and restricted stock units as determined by the application of the treasury stock method | 299 | 9 | 8 |
| Weighted average common shares outstanding, as adjusted for diluted earnings per share calculation | 87,064 | 86,652 | 85,312 |
| Basic earnings per common share | \$ 0.29 | \$ 0.22 | \$ 0.29 |
| Diluted earnings per common share | \$ 0.29 | \$ 0.22 | \$ 0.29 |

Subsequent events

The Company has evaluated subsequent events for potential recognition and/or disclosure through the date the Consolidated Financial Statements included in this Annual Report on Form 10-K were issued. There were no significant subsequent events for the year ended December 31, 2013 through the date of these Consolidated Financial Statements.

Impact of new financial accounting standards

ASU 2011-11, Balance Sheet (Topic 210) Disclosures about Offsetting Assets and Liabilities. ASU 2011-11 amends Topic 210, Balance Sheet, to require an entity to disclose both gross and net information about financial instruments, such as sales and repurchase agreements and reverse sale and repurchase agreements. ASU 2011-11 became effective for the Company on January 1, 2013 and did not have a significant impact on the Company's financial statements.

ASU 2013-02, Comprehensive Income (Topic 220) Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. ASU 2013-02 amends guidance related to the reporting of comprehensive income to enhance the reporting of reclassifications out of accumulated other comprehensive income. ASU 2013-02 became effective for the Company on January 1, 2013 and did not have a significant impact on the Company's financial statements.

ASU 2013-12, Definition of a Public Business Entity - An Addition to the Master Glossary. ASU 2013-12 amends the Master Glossary of the FASB Accounting Standards Codification to include a single definition of public business entity for use in future financial and reporting guidance. ASU 2013-12 did not have an impact on the Company's financial statements.

ASU 2014-04, Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40) - Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. ASU 2014-14 clarifies when an in-substance repossession or foreclosure occurs and requires interim and annual disclosures. The new authoritative guidance will be for reporting periods after January 1, 2015 and is not expected to have a significant impact on the Company's financial statements.

Table of Contents**Note 2. Cash and Due from Banks**

The Bank is required to maintain certain cash reserve balances with the Federal Reserve Bank of Chicago, which may be offset by cash on hand. The required reserve balances as of December 31, 2013 and 2012 were approximately \$5.3 million and \$4.3 million, respectively.

Effective July 12, 2012, the contractual clearing balance program was eliminated by the Federal Reserve Bank. Prior to that, the Bank had established a clearing balance requirement with the Federal Reserve Bank of Chicago to use Federal Reserve Bank services.

The Company maintains its cash in deposit accounts which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts. Management believes the Company is not exposed to any significant credit risk on cash and cash equivalents.

Note 3. Securities

The amortized cost, unrealized gains and losses and fair values of securities classified as available for sale and held to maturity are summarized as follows:

| December 31, 2013: | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|--|------------------------|------------------------------|-------------------------------|-------------------|
| | (dollars in thousands) | | | |
| Available for sale | | | | |
| U.S. Treasury securities | \$ 102,463 | \$ 244 | \$ (67) | \$ 102,640 |
| Obligations of U.S. government corporations and agencies | 254,998 | 2,741 | (328) | 257,411 |
| Obligations of states and political subdivisions | 272,077 | 2,887 | (2,812) | 272,152 |

| Mutual funds and other equity securities | 2,451 | 1,479 | | 3,930 |
| Total | \$ 978,477 | \$ 23,289 | \$ (269) | \$ 1,001,497 |

There were no held to maturity securities at December 31, 2012.

The amortized cost and fair value of debt securities available for sale and held to maturity as of December 31, 2013, by contractual maturity, are shown below. Mutual funds and other equity securities do not have stated maturity dates and therefore are not included in the following maturity summary. Mortgages underlying the residential mortgage-backed securities may be called or prepaid without penalties; therefore, actual maturities could differ from the contractual maturities. All residential mortgage-backed securities were issued by U.S. government agencies and corporations.

| | Available for sale | | Held to maturity | |
|--|---|-------------------|---|---------------|
| | Amortized Cost (dollars in thousands) | Fair Value | Amortized Cost (dollars in thousands) | Fair Value |
| Due in one year or less | \$ 140,414 | \$ 141,464 | \$ | \$ |
| Due after one year through five years | 451,993 | 454,381 | 321 | 322 |
| Due after five years through ten years | 163,885 | 165,378 | 513 | 509 |
| Due after ten years | 73,329 | 74,221 | | |
| Total | \$ 829,621 | \$ 835,444 | \$ 834 | \$ 831 |

Realized gains and losses related to sales of securities available for sale are summarized as follows:

| | For the Years Ended December 31, | | |
|---------------------------|----------------------------------|-----------------|---------------|
| | 2013 | 2012 | 2011 |
| | (dollars in thousands) | | |
| Gross security gains | \$ 599 | \$ 1,602 | \$ 174 |
| Gross security (losses) | (46) | (5) | (4) |
| Net security gains | \$ 553 | \$ 1,597 | \$ 170 |

The tax provision for these net realized gains and losses was \$0.2 million for the year ended December 31, 2013, and \$0.6 million for the year ended December 31, 2012. It was insignificant for the year ended December 31, 2011.

Investment securities with carrying amounts of \$428.7 million and \$489.1 million on December 31, 2013 and 2012, respectively, were pledged as collateral on public deposits, securities sold under agreements to repurchase and for other purposes as required or permitted by law.

| Total temporarily impaired securities | \$ 63,320 | \$ 220 | \$ 3,311 | \$ 49 | \$ 66,631 | \$ 269 |

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the length of time and extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and whether the Company has the intent to sell the security and it is more likely than not it will have to sell the security before recovery of its cost basis.

Table of Contents

The total number of securities in the investment portfolio in an unrealized loss position as of December 31, 2013 was 266, and represented a loss of 1.8% of the aggregate carrying value. Based upon a review of unrealized loss circumstances, the unrealized losses resulted from changes in market interest rates and liquidity, not from changes in the probability of receiving the contractual cash flows. The Company does not intend to sell the securities and it is more likely than not that the Company will recover the amortized cost prior to being required to sell the securities. Full collection of the amounts due according to the contractual terms of the securities is expected; therefore, the Company did not consider these investments to be other-than-temporarily impaired at December 31, 2013.

The Company had available for sale obligations of state and political subdivisions with a fair value of \$272.2 million and 280.3 million as of December 31, 2013 and 2012, respectively. In addition, the Company had held to maturity obligations of state and political subdivisions totaling \$0.8 million at December 31, 2013 and none as of December 31, 2012.

As of December 31, 2013, the Company's obligations of state and political subdivisions portfolio was comprised of \$223.5 million of general obligation and \$49.5 million of revenue bonds issued by 267 issuers, primarily consisting of states, counties, cities, towns, villages and school districts. The Company held investments in general obligation bonds in twenty-five states (including the District of Columbia), including seven states in which the aggregate fair value exceeded \$5.0 million. The Company held investments in revenue bonds in twenty-one states, including two states where the aggregate fair value exceeded \$5.0 million.

As of December 31, 2012, the Company's obligations of state and political subdivisions portfolio was comprised of \$228.6 million of general obligation and \$51.7 million of revenue bonds issued by 276 issuers, primarily consisting of states, counties, cities, towns, villages and school districts. The Company held investments in general obligation bonds in twenty-six states (including the District of Columbia), including five states in which the aggregate fair value exceeded \$5.0 million. The Company held investments in revenue bonds in twenty-three states, including two states where the aggregate fair value exceeded \$5.0 million.

The amortized cost and fair values of the Company's portfolio of general obligation bonds are summarized in the following tables by the issuers state:

December 31, 2013:

| U.S. State | Number of Issuers | Average Exposure | | Amortized Cost | Fair Value |
|---------------------------------|-------------------|-------------------------|-------|----------------|------------|
| | | Per Issuer (Fair Value) | | | |

| Total general obligations bonds | 227 | \$ 1,007 | \$ 223,010 | \$ 228,606 |

Table of Contents

The general obligation bonds are diversified across many issuers, with \$5.0 million and \$5.2 million being the largest exposure to a single issuer at December 31, 2013 and 2012, respectively. Accordingly, as of December 31, 2013 and 2012, the Company did not hold general obligation bonds of any single issuer, the aggregate book or market value of which exceeded 10% of the Company's stockholders' equity. Of the general obligation bonds in the Company's portfolio, 96.4% have been rated by at least one nationally recognized statistical rating organization and 3.6% are unrated, based on the fair value as of December 31, 2013. Of the general obligation bonds in the Company's portfolio, 94.3% have been rated by at least one nationally recognized statistical rating organization, 5.6% are unrated and 0.1% are insured by a below-investment-grade insurer without an underlying rating, based on the fair value as of December 31, 2012.

The amortized cost and fair values of the Company's portfolio of revenue bonds are summarized in the following tables by the issuers' state:

December 31, 2013:

| U.S. State | Number of Issuers | Average Exposure Per Issuer (Fair Value) | | Amortized Cost | Fair Value |
|---------------------|-------------------|--|-------|----------------|------------|
| | | (dollars in thousands) | | | |
| Illinois | 4 | \$ | 1,780 | \$ | 7,356 |
| Indiana | 14 | | 1,034 | | 14,740 |
| Other | 30 | | 930 | | 28,122 |
| Total revenue bonds | 48 | \$ | 1,032 | \$ | 50,218 |

December 31, 2012:

| U.S. State | Number of Issuers | Average Exposure Per Issuer (Fair Value) | | Amortized Cost | Fair Value |
|---------------------|-------------------|--|-------|----------------|------------|
| | | (dollars in thousands) | | | |
| Illinois | 4 | \$ | 1,961 | \$ | 7,832 |
| Indiana | 11 | | 853 | | 9,339 |
| Other | 34 | | 1,014 | | 34,169 |
| Total revenue bonds | 49 | \$ | 1,055 | \$ | 51,340 |

The revenue bonds are diversified across many issuers and revenue sources with \$3.0 million and \$3.5 million being the largest exposure to a single issuer at December 31, 2013 and 2012, respectively. Accordingly, as of December 31, 2013 and 2012, the Company did not hold revenue bonds of any single issuer, the aggregate book or market value of which exceeded 10% of the Company's stockholders' equity. All of the revenue bonds in the Company's portfolio have been rated by at least one nationally recognized statistical rating organization. Some of the primary types of revenue bonds owned in the Company's portfolio include: primary education or government building lease rentals secured by ad valorem taxes, utility systems secured by utility system net revenues, housing authorities secured by mortgage loans or principal receipts on mortgage loans, secondary education secured by student fees/tuitions, contracts subject to annual state appropriation, and pooled issuances (i.e. bond bank) consisting of multiple underlying municipal obligors.

Substantially all of the Company's obligations of state and political subdivision securities are owned by Busey Bank, whose investment policy requires that state and political subdivision securities purchased be investment grade. Busey Bank's investment policy also limits the amount of

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

rated state and political subdivision securities to an aggregate 100% of the Bank's Total Risk Based Capital at the time of purchase and an aggregate 15% of Total Risk Based Capital for unrated state and political subdivision securities issued by municipalities having taxing authority or located in counties/MSAs in which an office of the Bank is located. The investment policy states fixed income investments that are not OCC Type 1 securities (U.S. Treasuries, agencies, municipal government general obligation and for well-capitalized institutions, most municipal revenue bonds), should be analyzed prior to acquisition to determine that (1) the security has low risk of default by the obligor, and (2) the full and timely repayment of principal and interest is expected over the expected life of the investment. All securities in the Bank's obligations of state and political subdivision securities portfolio are subject to such review. Factors that may be considered as part of ongoing monitoring of state and political subdivision securities include credit rating changes by nationally recognized statistical rating organizations, market valuations, third-party municipal credit analysis, which may include indicative information regarding the issuer's capacity to pay, market and economic data and such other factors as are available and relevant to the security or the issuer such as its budgetary position and sources, strength and stability of taxes and/or other revenue.

Table of Contents

As of December 31, 2013, the Company's regular monitoring of its obligations of state and political subdivisions portfolio had not uncovered any facts or circumstances resulting in significantly different credit ratings than those assigned by a nationally recognized statistical rating organization.

Note 4. Loans

Geographic distributions of loans by category were as follows:

| | December 31, 2013 | | | Total |
|--------------------------------|------------------------|------------|------------|--------------|
| | Illinois | Florida | Indiana | |
| | (dollars in thousands) | | | |

(1) Loans held for sale are included in retail real estate.

Net deferred loan origination costs included in the tables above was insignificant as of December 31, 2013 and \$0.8 million as of December 31, 2012.

Table of Contents

The Company believes that sound loans are a necessary and desirable means of employing funds available for investment. Recognizing the Company's obligations to its stockholders, depositors, and to the communities it serves, authorized personnel are expected to seek to develop and make sound, profitable loans that resources permit and that opportunity affords. The Company maintains lending policies and procedures designed to focus lending efforts on the types, locations and duration of loans most appropriate for its business model and markets. While not specifically limited, the Company attempts to focus its lending on short to intermediate-term (0-7 years) loans in geographies within 125 miles of its lending offices. The Company attempts to utilize government assisted lending programs, such as the Small Business Administration and United States Department of Agriculture lending programs, when prudent. Generally, loans are collateralized by assets, primarily real estate, of the borrowers and guaranteed by individuals. The loans are expected to be repaid primarily from cash flows of the borrowers, or from proceeds from the sale of selected assets of the borrowers.

Management reviews and approves the Company's lending policies and procedures on a routine basis. Management routinely (at least quarterly) reviews the Company's allowance for loan losses and reports related to loan production, loan quality, concentrations of credit, loan delinquencies and non-performing and potential problem loans. The Company's underwriting standards are designed to encourage relationship banking rather than transactional banking. Relationship banking implies a primary banking relationship with the borrower that includes, at a minimum, an active deposit banking relationship in addition to the lending relationship. The integrity and character of the borrower are significant factors in the Company's loan underwriting. As a part of underwriting, tangible positive or negative evidence of the borrower's integrity and character are sought out. Additional significant underwriting factors beyond location, duration, a sound and profitable cash flow basis and the borrower's character are the quality of the borrower's financial history, the liquidity of the underlying collateral and the reliability of the valuation of the underlying collateral.

Total borrowing relationships, including direct and indirect debt, are generally limited to \$20 million, which is significantly less than the Company's regulatory lending limit. Borrowing relationships exceeding \$20 million are reviewed by the Company's board of directors at least annually and more frequently by management. At no time is a borrower's total borrowing relationship permitted to exceed the Company's regulatory lending limit. Loans to related parties, including executive officers and the Company's various directorates, are reviewed for compliance with regulatory guidelines and by the Company's board of directors at least annually.

The Company maintains an independent loan review department that reviews the loans for compliance with the Company's loan policy on a periodic basis. In addition to compliance with this policy, the loan review process reviews the risk assessments made by the Company's credit department, lenders and loan committees. Results of these reviews are presented to management and the audit committee at least quarterly.

The Company's lending can be summarized into five primary areas: commercial loans, commercial real estate loans, real estate construction loans, retail real estate loans, and retail other loans. The significant majority of the lending activity occurs in the Company's Illinois and Indiana markets, with the remainder in the Florida market. Due to the small scale of the Indiana loan portfolio and its geographical proximity to the Illinois portfolio, the Company believes that quantitative or qualitative segregation between Illinois and Indiana is not material or warranted.

Commercial Loans

Commercial loans typically comprise working capital loans or business expansion loans, including loans for asset purchases and other business loans. Commercial loans will generally be guaranteed in full or a significant amount by the primary owners of the business. Commercial loans are made based primarily on the historical and projected cash flow of the underlying borrower and secondarily on the underlying assets pledged as collateral by the borrower. The cash flows of the underlying borrower, however, may not perform consistently with historical or projected information. Further, the collateral securing loans may fluctuate in value due to individual economic or other factors. The Company has

established minimum standards and underwriting guidelines for all commercial loan types.

Table of Contents

Commercial Real Estate Loans

The Company is primarily located in markets with significant academic presence. The academic presence in addition to the commercial environment provides for the majority of the Company's commercial lending opportunities to be commercial real estate related, including multi-unit housing. As the majority of the Company's loan portfolio is within the commercial real estate class, the Company's goal is to maintain a high quality, geographically diverse portfolio of commercial real estate loans. Commercial real estate loans are subject to underwriting standards and guidelines similar to commercial loans. Commercial real estate loans will generally be guaranteed in full or a significant amount by the primary owners of the business. The repayment of these loans is primarily dependent on the cash flows of the underlying property. However, the commercial real estate loan generally must be supported by an adequate underlying collateral value. The performance and the value of the underlying property may be adversely affected by economic factors or geographical and/or industry specific factors. These loans are subject to other industry guidelines that are closely monitored by the Company.

Real Estate Construction Loans

Real estate construction loans are typically commercial in nature. The loan proceeds are controlled by the Company and distributed for the improvement of real estate in which the Company holds a mortgage. Real estate construction loans will generally be guaranteed in full or a significant amount by the developer or primary owners of the business. These loans are subject to underwriting standards and guidelines similar to commercial loans. The loan generally must be supported by an adequate as completed value of the underlying project. In addition to the underlying project, the financial history of the developer and business owners weighs significantly in determining approval. The repayment of these loans is typically through permanent financing following completion of the construction. Real estate construction loans are inherently more risky than loans on completed properties as the unimproved nature and the financial risks of construction significantly enhance the risks of commercial real estate loans. These loans are closely monitored and subject to other industry guidelines.

Retail Real Estate Loans

Retail real estate loans are comprised of direct consumer loans that include residential real estate, residential real estate construction loans, home equity lines of credit and home equity loans. The Company sells substantially all of its long-term (over 5 years) retail real estate loans to secondary market purchasers. The Company does retain retail real estate loans having terms typically five years or less. As retail real estate loan underwriting is subject to specific regulations, the Company typically underwrites its retail real estate loans to conform to widely accepted standards. Several factors are considered in underwriting including the value of the underlying real estate and the debt to income and credit history of the borrower.

Retail Other Loans

Retail other loans consist of installment loans to individuals, primarily automotive loans. These loans are centrally underwritten utilizing the borrower's financial history, including the Fair Isaac Corporation (FICO) credit scoring and information as to the underlying collateral. Repayment is expected from the cash flow of the borrower.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-K

The Company utilizes a loan grading scale to assign a risk grade to all of its loans. Loans are graded on a scale of 1 through 10 with grades 2, 4 & 5 unused. A description of the general characteristics of the grades is as follows:

- *Grades 1, 3, 6* These grades include loans which are all considered strong credits, with grade 1 being investment or near investment grade. A grade 3 loan is comprised of borrowers that exhibit credit fundamentals that exceed industry standards and loan policy guidelines. A grade 6 loan is comprised of borrowers that exhibit acceptable credit fundamentals.
- *Grade 7-* This grade includes loans on management's Watch List and is intended to be utilized on a temporary basis for a pass grade borrower where a significant risk-modifying action is anticipated in the near future.
- *Grade 8-* This grade is for Other Assets Especially Mentioned loans that have potential weaknesses which may, if not checked or corrected, weaken the asset or inadequately protect the Company's credit position at some future date.

Table of Contents

- *Grade 9-* This grade includes Substandard loans, in accordance with regulatory guidelines, for which the accrual of interest has not been stopped. Assets so classified must have well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.
- *Grade 10-* This grade includes Doubtful loans that have all the characteristics of a substandard loan with additional factors that make collection in full highly questionable and improbable. Such loans are placed on non-accrual status and may be dependent on collateral having a value that is difficult to determine.

All loans are graded at the inception of the loan. All commercial and commercial real estate loans above \$0.5 million with a grading of 7 are reviewed annually and grade changes are made as necessary. All real estate construction loans above \$0.5 million, regardless of the grade, are reviewed annually and grade changes are made as necessary. Interim grade reviews may take place if circumstances of the borrower warrant a more timely review. All loans above \$0.5 million which are graded 8 are reviewed quarterly. Further, all loans graded 9 or 10 are reviewed at least quarterly.

Loans in the highest grades, represented by grades 1, 3, 6 and 7, totaled \$2.1 billion at December 31, 2013 and grew by \$314.0 million from \$1.8 billion at December 31, 2012. Loans in the lowest grades, represented by grades 8, 9 and 10, totaled \$161.9 million at December 31, 2013 and declined by \$66.2 million from \$228.1 million at December 31, 2012. The positive change in mix of loan grades began in 2012 and suggests a declining level of overall risk in the total loan portfolio.

The following table presents weighted average risk grades segregated by class of loans (excluding held-for-sale, non- posted and clearings) and geography:

| | Weighted Avg. Risk Grade | Grades 1,3,6 | December 31, 2013 | | | |
|-------------------------------|-----------------------------|---------------------|-------------------|------------------|------------------|------------------|
| | | | Grade 7 | Grade 8 | Grade 9 | Grade 10 |
| (dollars in thousands) | | | | | | |
