Notes to portfolio of investments

Aggregate cost for federal income tax purposes, which was the same for book purposes, was \$134,694,223; and net unrealized depreciation consisted of:

Gross unrealized appreciation	\$ 6,203,755
Gross unrealized depreciation	(12,908,091)
Net unrealized depreciation	\$ (6,704,336)

On September 7, 2008, the Federal Housing Finance Agency placed the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation into conservatorship, and the US Treasury guaranteed the debt issued by those organizations.

- (1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2008, the value of these securities amounted to \$4,103,128 or 3.17% of net assets.
- (2) Floating rate security. The interest rate shown is the current rate as of December 31, 2008.
- (3) Perpetual bond security. The maturity date reflects the next call date.
- (4) Security is in default.
- (5) Zero coupon bond. The rate shown is the effective yield at December 31, 2008.
- (6) The rate shown reflects the yield at December 31, 2008.
- (7) The table below details the Fund's investment in a security issued by a fund that is advised by the same advisor as the Fund. The advisor does not earn a management fee from UBS Supplementary Trust.

Security description	Value at 09/30/08	Purchases during the three months ended 12/31/08	Sales during the three months ended 12/31/08	Value at 12/31/08	Income earned from affiliate for the three months ended 12/31/08
UBS Supplementary Trust U.S. Cash Management Prime Fund	\$5,707,328	\$17,759,866	\$22,965,849	\$501,345	\$26,913

- (8) The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, current market quotations or valuations from computerized matrix systems that derive values based on comparable securities. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of portfolio securities. Securities traded in the over-the-counter (OTC) market and listed on The NASDAQ Stock Market, Inc. (NASDAQ) normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price available on the valuation date prior to valuation. Securities which are listed on US and foreign stock exchanges normally are valued at the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. Securities listed on foreign stock exchanges may be fair valued based on significant events that have occurred subsequent to the close of the foreign markets. The Fund may use a systematic fair valuation model provided by an independent third party to value securities principally traded in foreign markets in order to adjust for possible stale pricing that may occur between the close of the foreign exchanges and the time for valuation. If a security is valued at a fair value, that value is likely to be different from the last quoted market price for the security. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated as the primary market by UBS Global Asset Management (Americas) Inc. (UBS Global AM), the investment manager of the Fund. UBS Global AM is an indirect wholly owned asset management subsidiary of UBS AG, an internationally diversified organization with headquarters in Zurich and Basel, Switzerland and operations in many areas of the financial services industry. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund's Board of Directors (the Board). Various factors may be reviewed in order to make a good faith determination of a security's fair value. These factors include, but are not limited to, fundamental analytical data relating to the investment; the nature and duration of restrictions on disposition of the

Edgar Filing: FORT DEARBORN INCOME SECURITIES INC - Form N-Q

securities; and the evaluation of forces which influence the market in which the securities are purchased and sold. Investments in open-end investment companies are valued at the daily closing net asset value of the respective investment company.

In September 2006, the Financial Accounting Standards Board (FASB) released *Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157)*. FAS 157 requires disclosure regarding the various inputs that are used in determining the value of the Fund s investments. These inputs are summarized into the three broad levels listed below.

Edgar Filing: FORT DEARBORN INCOME SECURITIES INC - Form N-Q

Level 1 Quoted prices in active markets for identical securities.

Level 2 Other significant observable inputs, including but not limited to, quoted prices for similar securities, interest rates, prepayment speeds and credit risks.

Level 3 Unobservable inputs inclusive of the Fund's own assumptions in determining the fair value of investments.

The following is a summary of the inputs used as of December 31, 2008 in valuing the Fund's assets:

Measurements at 12/31/08

Description	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Unobservable inputs (Level 3)	Total

TIPS Treasury inflation protected securities (TIPS) are debt securities issued by the US Treasury whose principal and/or interest payments are adjusted for inflation, unlike debt securities that make fixed principal and interest payments. The interest rate paid by the TIPS is fixed, while the principal value rises or falls based on changes in a published Consumer Price Index (CPI). Thus, if inflation occurs, the principal and interest payments on the TIPS are adjusted accordingly to protect investors from inflationary loss. During a deflationary period, the principal and interest payments decrease, although the TIPS principal amounts will not drop below their face amounts at maturity. In exchange for the inflation protection, the TIPS generally pay lower interest rates than typical US Treasury securities. Only if inflation occurs will TIPS offer a higher real yield than a conventional Treasury security of the same maturity.

For more information regarding the Fund's other significant accounting policies, please refer to the Fund's annual report to shareholders dated September 30, 2008.
