

GWG Holdings, Inc.
Form 10-Q
August 10, 2017

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the quarterly period ended June 30, 2017

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES ACT OF 1934

For the transition period from _____ to _____

Commission File Number: None

GWG HOLDINGS, INC.

(Exact name of registrant as specified in its charter)

Delaware

26-2222607

(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

220 South Sixth Street, Suite 1200

Minneapolis, MN 55402

(Address of principal executive offices, including zip code)

(612) 746-1944

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer
Non-accelerated filer	(Do not check if a smaller reporting company) Smaller reporting company
	Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of August 10, 2017, GWG Holdings, Inc. had 5,783,555 shares of common stock outstanding.

GWG HOLDINGS, INC.

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

(1) Nature of Business and Summary of Significant Accounting Policies

Nature of Business – We are a financial services company committed to finding new ways of disrupting and transforming the life insurance and related industries. We built our business by creating opportunities for consumers to obtain significantly more value for their life insurance policies as compared to the traditional options offered by the insurance industry by creating a secondary market. We are enhancing and extending these activities through innovation in our products and services, business processes, financing strategies, and advanced epigenetic technologies. At the same time, we are creating opportunities for investors to receive income and capital appreciation from our investment activities in the life insurance and related industries.

GWG Holdings, Inc. and all of its subsidiaries are incorporated and organized in Delaware. Unless the context otherwise requires or we specifically so indicate, all references in these footnotes to “we,” “us,” “our,” “our Company,” “GWG” or the “Company” refer to GWG Holdings, Inc. and its subsidiaries collectively and on a consolidated basis. References to the full names of particular entities, such as “GWG Holdings, Inc.” or “GWG Holdings,” are meant to refer only to the particular entity referenced.

On December 7, 2015, GWG Holdings formed a wholly owned subsidiary, GWG MCA, LLC. On January 13, 2016, GWG MCA, LLC was converted to a corporation and became GWG MCA Capital, Inc. GWG MCA Capital, Inc. (“GWG MCA”) was formed to provide cash advances to small businesses.

On August 25, 2016, GWG Holdings formed a wholly owned subsidiary, Actüa Life & Annuity Ltd. (“Actüa”), to engage in various life insurance related businesses and activities related to its exclusive license for “DNA Methylation Based Predictor of Mortality” technology.

Use of Estimates – The preparation of our consolidated financial statements in conformity with GAAP requires management to make significant estimates and assumptions affecting the reported amounts of assets and liabilities at the date of the consolidated financial statements, as well as the reported amounts of revenue during the reporting period. We regularly evaluate estimates and assumptions, which are based on current facts, historical experience, management’s judgment, and various other factors that we believe to be reasonable under the circumstances. Our actual results may differ materially and adversely from our estimates. The most significant estimates with regard to

these consolidated financial statements relate to (1) the determination of the assumptions used in estimating the fair value of our investments in life insurance policies, and (2) the value of our deferred tax assets and liabilities.

Cash and Cash Equivalents – We consider cash in demand deposit accounts and temporary investments purchased with an original maturity of three months or less to be cash equivalents. We maintain our cash and cash equivalents with highly rated financial institutions. The balances in our bank accounts may exceed Federal Deposit Insurance Corporation limits. We periodically evaluate the risk of exceeding insured levels and may transfer funds as we deem appropriate.

Life Insurance Policies – Accounting Standards Codification 325-30, *Investments in Insurance Contracts* (“ASC 325-30”), permits a reporting entity to account for its investments in life insurance policies using either the investment method or the fair value method. We elected to use the fair value method to account for our life insurance policies. We initially record our purchase of life insurance policies at the transaction price, which is the amount paid for the policy, inclusive of all external fees and costs associated with the acquisition. At each subsequent reporting period, we re-measure the investment at fair value in its entirety and recognize the change in fair value as unrealized gain (revenue) in the current period, net of premiums paid.

In a case where our acquisition of a policy is not complete as of a reporting date, but we have nonetheless advanced direct costs and deposits for the acquisition, those costs and deposits are recorded as “other assets” on our balance sheet until the acquisition is complete and we have secured title to the policy. On June 30, 2017 and December 31, 2016, a total of \$339,000 and \$42,000, respectively, of our “other assets” comprised direct costs and deposits that we had advanced for policy acquisitions.

We also recognize realized gain (or loss) from a life insurance policy upon one of the two following events: (1) our receipt of notice or verified mortality of the insured; or (2) our sale of the policy, filing of change-of-ownership forms and receipt of payment. In the case of mortality, the gain (or loss) we recognize is the difference between the policy benefits and the carrying values of the policy once we determine that collection of the policy benefits is realizable and reasonably assured. In the case of a policy sale, the gain (or loss) we recognize is the difference between the sale price and the carrying value of the policy on the date we receive sale proceeds.

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Other Assets – Actüa is engaged in various life insurance related businesses and activities related to its exclusive license for the “DNA Methylation Based Predictor of Mortality” technology for the life insurance industry. The cost of entering into this license agreement is listed as “other assets.”

Stock-Based Compensation – We measure and recognize compensation expense for all stock-based payments at fair value over the requisite service period. We use the Black-Scholes option pricing model to determine the weighted-average fair value of options. For restricted stock grants, fair value is determined as of the closing price of our common stock on the date of grant. Stock-based compensation expense is recorded in general and administrative expenses based on the classification of the employee or vendor. The determination of fair value of stock-based payment awards on the date of grant using an option-pricing model is affected by our stock price as well as by assumptions regarding a number of subjective variables. These variables include, but are not limited to, the expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors.

The expected terms of the options are based on evaluations of historical and expected future employee exercise behavior. The risk-free interest rate is based on the U.S. Treasury rates at the date of grant with maturity dates approximately equal to the expected life at grant date. Volatility is based on the standard deviation of the average continuously compounded rate of return of five selected comparable companies over the previous 52 weeks. We have not historically issued any common stock dividends and do not expect to do so in the foreseeable future. Forfeitures for both option and restricted stock grants are estimated at the time of the grant and revised in subsequent periods if actual forfeitures differ from estimates.

Deferred Financing and Issuance Costs – Loans advanced to us under our senior credit facilities, as described in Notes 5 and 6, are reported net of financing costs, including issuance costs, sales commissions and other direct expenses, which are amortized using the straight-line method over the term of the facility. The Series I Secured Notes and L Bonds, as respectively described in Notes 7 and 8, are reported net of financing costs, which are amortized using the interest method over the term of those borrowings. The Series A Convertible Preferred Stock (“Series A”), as described in Note 9, is reported net of financing costs (including the fair value of warrants issued), all of which were fully amortized using the interest method as of June 30, 2017. Selling and issuance costs of Redeemable Preferred Stock (“RPS”) and Series 2 Redeemable Preferred Stock (“RPS 2”), described in Notes 10 and 11, are netted against additional paid-in-capital and against the principal balance of the preferred stock.

Earnings (loss) per Share – Basic earnings (loss) per share attributable to common shareholders are calculated using the weighted-average number of shares outstanding during the reported period. Diluted earnings (loss) per share are calculated based on the potential dilutive impact of our Series A, RPS, RPS 2, warrants and stock options. Due to our net loss for the three and six months ended June 30, 2017, there are no dilutive securities.

Recently Issued Accounting Pronouncements – On April 7, 2015, the FASB issued Accounting Standards Update No. 2015-03, *Simplifying the Presentation of Debt Issuance Costs* (“ASU 2015-03”), as part of its simplification initiative. ASU 2015-03 changes the presentation of debt issuance costs by presenting those costs in the balance sheet as a direct deduction from the related debt liability. Amortization of the costs is reported as interest expense. We adopted ASU 2015-03 effective January 1, 2016, as required for public reporting entities.

On February 25, 2016, the FASB issued Accounting Standards Update 2016-02 *Leases* (“ASU 2016-02”). The new guidance is effective for fiscal years beginning after December 15, 2018. ASU 2016-02 provides more transparency and comparability in the financial statements of lessees by recognizing all leases with a term greater than twelve months on the balance sheet. Lessees will also be required to disclose key information about their leases. Early adoption is permitted. We are currently evaluating the impact of the adoption of this pronouncement and have not yet adopted ASU 2016-02 as of June 30, 2017.

In March 2016, the FASB issued Accounting Standards Update 2016-09 (“ASU 2016-09”) to simplify the accounting for stock compensation related to the following items: income tax accounting, award classification, estimation of forfeitures, and cash flow presentation. The new guidance is effective for fiscal years beginning after December 15, 2016. We are currently in the process of adopting this pronouncement.

(2) Restrictions on Cash

Under the terms of our senior credit facilities (discussed in Notes 5 and 6), we are required to maintain collection and escrow accounts that are used to fund the acquisition of policies, pay annual policy premiums, pay interest and other charges under the facility, and collect policy benefits. The agents for the lenders authorize disbursements from these accounts. At June 30, 2017 and December 31, 2016, there was a balance of \$46,160,000, and \$37,827,000, respectively, in these restricted cash accounts.

(unaudited)

(3) Investment in Life Insurance Policies

Life insurance policies are valued based on unobservable inputs that are significant to their overall fair value. Changes in the fair value of these policies are recorded as gain or loss on life insurance policies, net of premiums paid on those policies, in our consolidated statements of operations. Fair value is determined on a discounted cash flow basis that incorporates life expectancy assumptions generally derived from reports obtained from widely accepted life expectancy providers, other than insured lives covered under small face amount policies (i.e., \$1 million in face value benefits or less), assumptions relating to cost-of-insurance (premium) rates and other assumptions. The discount rate we apply incorporates current information about discount rates applied by other reporting companies owning portfolios of life insurance policies, the discount rates observed in the life insurance secondary market, market interest rates, the credit exposure to the insurance companies that issued the life insurance policies and management's estimate of the risk premium a purchaser would require to receive the future cash flows derived from our portfolio as a whole. Management has discretion regarding the combination of these and other factors when determining the discount rate. As a result of management's analysis, a discount rate of 10.81% was applied to our portfolio as of June 30, 2017 as compared to 10.96% as of December 31, 2016.

A summary of our policies, organized according to their estimated life expectancy dates as of the reporting date, is as follows:

Years Ending December 31,	As of June 30, 2017			As of December 31, 2016		
	Number of Policies	Estimated Fair Value	Face Value	Number of Policies	Estimated Fair Value	Face Value
2017	4	\$3,044,000	\$3,375,000	11	\$14,837,000	\$16,939,000
2018	11	16,462,000	20,853,000	23	30,830,000	42,564,000
2019	61	64,377,000	92,676,000	55	57,556,000	88,858,000
2020	96	92,535,000	159,203,000	93	85,414,000	159,814,000
2021	85	71,872,000	142,961,000	86	73,825,000	158,744,000
2022	88	80,308,000	184,162,000	66	56,909,000	147,222,000
2023	80	58,506,000	166,527,000	64	44,953,000	128,581,000
Thereafter	368	189,946,000	755,606,000	292	146,868,000	618,953,000
Totals	793	\$577,050,000	\$1,525,363,000	690	\$511,192,000	1,361,675,000

Edgar Filing: GWG Holdings, Inc. - Form 10-Q

We recognized life insurance benefits of \$10,935,000 and \$9,829,000 during the three months ended June 30, 2017 and 2016, respectively, related to policies with a carrying value of \$3,014,000 and \$1,692,000, respectively, and as a result recorded realized gains of \$7,920,000 and \$8,137,000, respectively. We recognized life insurance benefits of \$29,910,000 and \$29,067,000 during the six months ended June 30, 2017 and 2016, respectively, related to policies with a carrying value of \$5,384,000 and \$6,302,000, respectively, and as a result recorded realized gains of \$24,526,000 and \$22,765,000, respectively.

Reconciliation of gain on life insurance policies:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
Change in estimated probabilistic cash flows	\$ 16,446,000	\$ 17,972,000	\$ 32,849,000	\$ 27,425,000
Unrealized gain on acquisitions	8,044,000	9,822,000	18,646,000	17,841,000
Premiums and other annual fees	(11,859,000)	(8,995,000)	(22,949,000)	(17,441,000)
Change in discount rates(1)	4,143,000	629,000	4,143,000	838,000
Change in life expectancy evaluation (2)	(6,662,000)	(1,545,000)	(8,604,000)	(914,000)
Realized gain on maturities	7,920,000	8,137,000	24,526,000	22,765,000
Fair value of matured policies	(6,736,000)	(5,637,000)	(17,915,000)	(12,417,000)
Gain on life insurance policies, net	\$ 11,296,000	\$ 20,383,000	\$ 30,696,000	\$ 38,097,000

(1) The discount rate applied to estimate the fair value of the portfolio of life insurance policies we own was 10.81% as of June 30, 2017, compared to 10.96% as of December 31, 2016 and 11.05% as of June 30, 2016. The carrying value of policies acquired during each quarterly reporting period is adjusted to current fair value using the fair value discount rate applied to the entire portfolio as of that reporting date.

(2) The change in fair value due to updating independent life expectancy estimates on certain life insurance policies in our portfolio.

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

We currently estimate that premium payments and servicing fees required to maintain our current portfolio of life insurance policies in force for the next five years, assuming no mortalities, are as follows:

Years Ending December 31,	Premiums	Servicing	Premiums and Servicing Fees
Six months ending December 31, 2017	\$24,455,000	\$654,000	\$25,109,000
2018	52,611,000	654,000	53,265,000
2019	58,206,000	654,000	58,860,000
2020	65,722,000	654,000	66,376,000
2021	74,105,000	654,000	74,759,000
2022	83,310,000	654,000	83,964,000
	\$358,409,000	\$3,924,000	\$362,333,000

Management anticipates funding the premium payments estimated above with proceeds from the receipt of policy benefits from our portfolio of life insurance policies, net proceeds from our offering of L Bonds and RPS 2, and from our senior credit facilities. The proceeds of these capital sources may also be used for the purchase, financing, and maintenance of additional life insurance policies.

(4) Fair Value Definition and Hierarchy

Accounting Standards Codification 820, *Fair Value Measurements and Disclosures* (“ASC 820”) establishes a hierarchical disclosure framework that prioritizes and ranks the level of market price observability used in measuring assets and liabilities at fair value. Market price observability is affected by a number of factors, including the type of investment, the characteristics specific to the investment and the state of the marketplace, including the existence and transparency of transactions between market participants. Assets and liabilities with readily available and actively quoted prices, or for which fair value can be measured from actively quoted prices in an orderly market, generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value. ASC 820 maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring the use of observable inputs whenever available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from independent sources. Unobservable inputs are inputs that reflect assumptions about how market participants price an asset or liability based on the best available information. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the “exit price”) in an orderly transaction between market participants at the measurement date.

The hierarchy is broken down into three levels based on the observability of inputs as follows:

Level 1 - Valuations based on quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Level 2 - Valuations based on one or more quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The availability of observable inputs can vary by types of assets and liabilities and is affected by a wide variety of factors, including, for example, whether an instrument is established in the marketplace, the liquidity of markets and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by management in determining fair value is greatest for assets and liabilities categorized in Level 3.

Level 3 Valuation Process

The estimated fair value of our portfolio of life insurance policies is determined on a quarterly basis by our portfolio management committee, taking into consideration changes in discount rate assumptions, estimated premium payments and life expectancy estimate assumptions, as well as any changes in economic and other relevant conditions. The discount rate incorporates current information about discount rates applied by other reporting companies owning portfolios of life insurance policies, the discount rates observed in other competitive purchases in the life insurance secondary market, market interest rates, the credit exposure to the insurance company that issued the life insurance policy and management's estimate of the risk premium a purchaser would require to receive the future cash flows derived from our portfolio as a whole. Management has discretion regarding the combination of these and other factors when determining the discount rate.

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

These inputs are then used to estimate the discounted cash flows from the portfolio using the Model Actuarial Pricing System probabilistic portfolio price model, which estimates the cash flows using various mortality probabilities and scenarios. The valuation process includes a review by senior management as of each valuation date. We also engage a third-party expert to independently test the accuracy of the valuations using the inputs we provide on a quarterly basis. See Exhibit 99.1 filed herewith.

The following table reconciles the beginning and ending fair value of our Level 3 investments in our portfolio of life insurance policies for the periods ended June 30, as follows:

	Three months ended June 30,		Six months ended June 30,	
	2017	2016	2017	2016
Beginning balance	\$545,397,000	\$387,402,000	\$511,192,000	\$356,650,000
Purchases	19,432,000	24,869,000	42,122,000	48,700,000
Maturities (initial cost basis)	(3,014,000)	(1,692,000)	(5,384,000)	(6,303,000)
Net change in fair value	15,235,000	21,241,000	29,120,000	32,773,000
Ending balance	\$577,050,000	\$431,820,000	\$577,050,000	\$431,820,000

In the past, we periodically updated the independent life expectancy estimates on the insured lives in our portfolio, other than insured lives covered under small face amount policies (i.e., \$1 million in face value benefits or less), on a continuous rotating three-year cycle, and through that effort attempted to update life expectancies for approximately one-twelfth of our portfolio each quarter. Currently, however, the terms of our senior credit facility with LNV Corporation require us to attempt to update life expectancies on a rotating two-year cycle.

The following table summarizes the inputs utilized in estimating the fair value of our portfolio of life insurance policies:

As of	As of
June 30,	December 31,
	2016

	2017			
Weighted-average age of insured, years *	81.5		81.6	
Weighted-average life expectancy, months *	82.6		83.2	
Average face amount per policy	\$1,924,000		\$1,973,000	
Discount rate	10.81	%	10.96	%

(*) Weighted average by face amount of policy benefits

Life expectancy estimates and market discount rates are, by their nature, inherently uncertain and the effect of changes in estimates may be significant. For example, if the life expectancy estimates were increased or decreased by four and eight months on each outstanding policy, and the discount rates were increased or decreased by 1% and 2%, while all other variables were held constant, the fair value of our investment in life insurance policies would increase or decrease as summarized below:

Change in Fair Value of the Investment in Life Insurance Policies

	Change in life expectancy estimates			
	minus 8 months	minus 4 months	plus 4 months	plus 8 months
June 30, 2017	\$78,665,000	\$39,075,000	\$(38,334,000)	\$(75,932,000)
December 31, 2016	\$69,253,000	\$34,601,000	\$(33,846,000)	\$(67,028,000)

	Change in discount rate			
	minus 2%	minus 1%	plus 1%	plus 2%
June 30, 2017	\$60,606,488	\$29,002,000	\$(26,678,000)	\$(51,277,000)
December 31, 2016	\$53,764,000	\$25,728,000	\$(23,668,000)	\$(45,491,000)

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Other Fair Value Considerations

The carrying value of receivables, prepaid expenses, accounts payable and accrued expenses approximate fair value due to their short-term maturities and low credit risk. Using the income-based valuation approach, the estimated fair value of our Series I Secured Notes and L Bonds, having a combined aggregate face value of \$414,666,000 as of June 30, 2017, is approximately \$424,793,000 based on a weighted-average market interest rate of 6.60%. The carrying value of the senior credit facilities reflects interest charged at the commercial paper rate or 12-month LIBOR, as applicable, plus an applicable margin. The margin represents our credit risk, and the strength of the portfolio of life insurance policies collateralizing the debt. The overall rate reflects market, and the carrying value of the facility approximates fair value.

GWG MCA participates in the merchant cash advance industry by directly advancing sums to merchants and lending money, on a secured basis, to companies that advance sums to merchants. Each quarter, we review the carrying value of these advances and loans, and determine if an impairment reserve is necessary. At June 30, 2017 one of our secured loans was potentially impaired. The secured loan to Nulook Capital LLC had an outstanding balance of \$2,060,000 and a loan loss reserve of \$1,478,000 at June 30, 2017. We deem fair value to be the estimated collectible value on each loan or advance made from GWG MCA. Where we estimate the collectible amount to be less than the outstanding balance, we record a reserve for the difference. We recorded an impairment charge of \$870,000 for the quarter ended June 30, 2017.

The following table summarizes outstanding warrants related to our Series A offering (see Note 9) and the Company's initial public offering as of June 30, 2017:

Month issued	Warrants issued	Fair value per share	Risk free rate	Volatility	Term
September 2012	2,500	\$0.72	0.31%	40.49	% 5 years
September 2014	16,000	\$1.26	1.85%	17.03	% 5 years
	18,500				

(5) Credit Facility – Autobahn Funding Company LLC

Through GWG DLP Funding III, LLC (“DLP III”) we are party to a \$105 million senior credit facility with Autobahn Funding Company LLC (“Autobahn”), with a maturity date of June 30, 2018. The facility is governed by a Credit and Security Agreement (the “Agreement”), and DZ Bank AG Deutsche Zentral-Genossenschaftsbank (“DZ Bank”) acts as the agent for Autobahn under the Agreement. On September 14, 2016, we paid off this senior credit facility in full with funds received from a new senior credit facility with LNV Corporation as described in Note 6.

Advances under the facility bear interest at a commercial paper rate of the lender at the time of the advance, or at the lender’s cost of borrowing plus 4.25%.

The amount outstanding under this facility was \$0 at both June 30, 2017 and December 31, 2016, respectively. GWG Holdings is a performance guarantor of the various obligations of GWG Life, as servicer, under the Agreement. Obligations under the facility are secured by our pledge of ownership in our life insurance policies to DZ Bank through an arrangement under which Wells Fargo serves as securities intermediary.

The Agreement has certain financial (as described below) and non-financial covenants, and we were in compliance with these covenants at both June 30, 2017 and December 31, 2016.

We have agreed to maintain (i) a positive consolidated net income on a non-GAAP basis (as defined and calculated under the Agreement) for each complete fiscal year, (ii) a tangible net worth on a non-GAAP basis (again, as defined and calculated under the Agreement) of not less than \$45 million, and (iii) cash and eligible investments of \$15 million or above.

Consolidated non-GAAP net income and non-GAAP tangible net worth for the four quarters ended and as of June 30, 2017, as calculated under the Agreement, was \$29,590,000 and \$225,661,000, respectively.

No life insurance policies were pledged and no funds were available for additional borrowings under the facility at June 30, 2017 and December 31, 2016.

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

(6) Credit Facility – LNV Corporation

On September 14, 2016, we entered into a senior credit facility with LNV Corporation as lender through our subsidiary GWG DLP Funding IV, LLC. The Loan Agreement governing the facility makes available a total of up to \$172,300,000 in credit with a maturity date of September 14, 2026. Additional quarterly advances are available under the Loan Agreement at the LIBOR rate as defined in the Loan Agreement. Interest will accrue on amounts borrowed under the Loan Agreement at an annual interest rate, determined as of each date of borrowing or quarterly if there is no borrowing, equal to (A) the greater of 12-month LIBOR or the federal funds rate (as defined in the agreement) plus one-half of one percent per annum, plus (B) 5.75% per annum. The effective rate at June 30, 2017 was 7.59%. Interest payments are made on a quarterly basis.

The amount outstanding under this facility was \$155,625,000 at June 30, 2017 and \$162,725,000 at December 31, 2016. Obligations under the facility are secured by a security interest in DLP IV's assets, for the benefit of the lenders under the Loan Agreement, through an arrangement under which Wells Fargo serves as securities intermediary. The life insurance policies owned by DLP IV do not serve as direct collateral for the obligations of GWG Holdings under its L Bonds or Series I Secured Notes. The difference between the outstanding balance as of June 30, 2017 and the carrying amount relates to unamortized debt issuance costs.

The Loan Agreement requires DLP IV to maintain a reserve account in an amount sufficient to pay 12 months of servicing, administrative and third party expenses identified under the Loan Agreement, and 12 months of debt service as calculated under the Loan Agreement. As of June 30, 2017, the amount set aside in this specific reserve account was \$27,523,000.

The Loan Agreement has certain financial and nonfinancial covenants, and we were in compliance with these covenants at June 30, 2017 and December 31, 2016.

No funds were available for additional borrowings under the facility at June 30, 2017.

(7) Series I Secured Notes

Series I Secured Notes (“Series I”) are legal obligations of GWG Life and were privately offered and sold from August 2009 through June 2011. The Series I are secured by the assets of GWG Life and are subordinate to obligations under our senior credit facilities (see Notes 5 and 6). We are party to a Third Amended and Restated Note Issuance and Security Agreement dated November 1, 2011, as amended, under which GWG Life is obligor, GWG Holdings is guarantor, and Lord Securities Corporation serves as trustee of the GWG Life Trust (“Trust”). This agreement contains certain financial and non-financial covenants, and we were in compliance with these covenants at both June 30, 2017 and December 31, 2016.

The Series I were sold with original maturity dates ranging from six months to seven years, and with fixed interest rates varying from 5.65% to 9.55% depending on the term of the note. The Series I have renewal features under which we may elect to permit their renewal, subject to the right of noteholders to elect to receive payment at maturity. Since September 1, 2016, we are no longer renewing the Series I.

Interest on the Series I is payable monthly, quarterly, annually or at maturity depending on the election of the investor. At June 30, 2017 and December 31, 2016, the weighted-average interest rate of our Series I was 8.72% and 8.68%, respectively. The principal amount of Series I outstanding was \$6,815,000 and \$16,614,000 at June 30, 2017 and December 31, 2016, respectively. The difference between the amount outstanding on the Series I and the carrying amount on our balance sheet is due to netting of unamortized deferred issuance costs and including redemptions in process. Overall, interest expense includes amortization of deferred financing and issuance costs of \$29,000 and \$74,000 for the three and six months ended June 30, 2017 and \$82,000 and \$193,000 for the three and six months ended June 30, 2016. Future expected amortization of deferred financing costs is \$134,000 in total over the next five years.

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Future contractual maturities of Series I payable, and future amortization of their deferred financing costs, at June 30, 2017 are as follows:

Years Ending December 31,	Contractual Maturities	Amortization of Deferred Financing Costs
Six months ending December 31 ,2017	\$749,000	\$ 3,000
2018	2,376,000	25,000
2019	1,024,000	17,000
2020	1,725,000	41,000
2021	941,000	48,000
	\$6,815,000	\$ 134,000

(8)L Bonds

Our L Bonds are legal obligations of GWG Holdings. Obligations under the L Bonds are secured by the assets of GWG Holdings and by GWG Life, as a guarantor, and are subordinate to the obligations under our senior credit facilities (see Notes 5 and 6). We began publicly offering and selling L Bonds in January 2012 under the name “Renewable Secured Debentures.” These debt securities were re-named “L Bonds” in January 2015. L Bonds are publicly offered and sold on a continuous basis under a registration statement permitting us to sell up to \$1.0 billion in principal amount of L Bonds. We are party to an indenture governing the L Bonds dated October 19, 2011, as amended (“Indenture”), under which GWG Holdings is obligor, GWG Life is guarantor, and Bank of Utah serves as indenture trustee. The Indenture contains certain financial and non-financial covenants, and we were in compliance with these covenants at June 30, 2017 and December 31, 2016.

Effective September 1, 2016, we ceased selling 6-month and 1-year L Bonds until further notice. In addition, effective September 1, 2016, the L Bond interest rates that we offer changed to 5.50%, 6.25%, 7.50% and 8.50% for the 2-, 3-, 5- and 7-year L Bonds, respectively. The bonds have renewal features under which we may elect to permit their renewal, subject to the right of bondholders to elect to receive payment at maturity. Interest is payable monthly or annually depending on the election of the investor.

At June 30, 2017 and December 31, 2016, the weighted-average interest rate of our L Bonds was 7.30% and 7.23%, respectively. The principal amount of L Bonds outstanding was \$407,850,000 and \$387,067,000 at June 30, 2017 and December 31, 2016, respectively. The difference between the amount of outstanding L Bonds and the carrying amount on our balance sheets is due to netting of unamortized deferred issuance costs, cash receipts for new issuances and payments of redemptions in process. Amortization of deferred issuance costs was \$927,000 and \$2,856,000 for the three and six months ended June 30, 2017 and \$1,721,000 and \$3,289,000 for the three and six months ended June 30, 2016. Future expected amortization of deferred financing costs as of June 30, 2017 is \$13,539,000 in total over the next seven years.

Future contractual maturities of L Bonds, and future amortization of their deferred financing costs, at June 30, 2017 are as follows:

Years Ending December 31,	Contractual Maturities	Amortization of Deferred Financing Costs
Six months ending December 31, 2017	\$47,068,000	\$353,000
2018	108,772,000	2,181,000
2019	116,767,000	4,128,000
2020	49,062,000	2,147,000
2021	28,753,000	1,411,000
Thereafter	57,428,000	3,319,000
	\$407,850,000	\$13,539,000

(9) Series A Convertible Preferred Stock

From July 2011 through September 2012, we privately offered shares of Series A of GWG Holdings at \$7.50 per share. In the offering, we sold an aggregate of 3,278,000 shares for gross consideration of \$24,582,000. Holders of Series A are entitled to cumulative dividends at the rate of 10% per annum, paid quarterly. Dividends on the Series A are accumulating and are recorded as a reduction to additional paid-in capital. Under certain circumstances described in the Certificate of Designation for the Series A, additional Series A shares may be issued in lieu of cash dividends at the rate of \$7.00 per share.

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Holders of Series A are entitled to a liquidation preference equal to the stated value of their preferred shares (i.e., \$7.50 per share) plus accrued but unpaid dividends. Holders of Series A may presently convert each share of their Series A into 0.75 shares of our common stock at a price of \$10.00 per share.

As of June 30, 2017, we issued an aggregate of 521,000 shares of Series A in satisfaction of \$3,647,000 in dividends on the Series A, and an aggregate of 696,000 shares of Series A were converted into 522,000 shares of our common stock. As of June 30, 2017, we had 2,672,000 Series A shares outstanding with respect to which we incurred aggregate issuance costs of \$2,838,000, all of which is included as a component of additional paid-in capital.

Purchasers of Series A in our offering received warrants to purchase an aggregate of 431,954 shares of our common stock at an exercise price of \$12.50 per share. The grant date fair value of these warrants was \$428,000. As of June 30, 2017, none of these warrants had been exercised and 413,000 warrants have expired. The weighted-average remaining life of these warrants was 1.94 and 0.56 years at June 30, 2017 and December 31, 2016, respectively.

In September 2014, we completed, at our discretion, a public offering of our common stock and, as a result, the Series A was reclassified from temporary equity to permanent equity. We may redeem Series A shares at a price equal to 110% of their liquidation preference (\$7.50 per share) at any time. As of June 30, 2017, we have redeemed an aggregate of 439,000 shares of Series A.

(10) Redeemable Preferred Stock

On November 30, 2015, our public offering of up to 100,000 shares of Redeemable Preferred Stock (“RPS”) at \$1,000 per share was declared effective. Holders of RPS are entitled to cumulative dividends at the rate of 7% per annum, paid monthly. Dividends on the RPS are recorded as a reduction to additional paid-in capital. Under certain circumstances described in the Certificate of Designation for the RPS, additional shares of RPS may be issued in lieu of cash dividends.

The RPS ranks senior to our common stock and pari passu with our Series A, and entitles its holders to a liquidation preference equal to the stated value per share (i.e., \$1,000) plus accrued but unpaid dividends. Holders of RPS may presently convert their RPS into our common stock at a conversion price equal to the volume-weighted average price of our common stock for the 20 trading days immediately prior to the date of conversion, subject to a minimum conversion price of \$15.00 and in an aggregate amount limited to 15% of the stated value of RPS originally purchased by such holder from us and still held by such holder.

Holders of RPS may request that we redeem their RPS at a price equal to their stated value plus accrued but unpaid dividends, less an applicable redemption fee, if any. Nevertheless, the Certificate of Designation for RPS permits us complete discretion to grant or decline redemption requests. Subject to certain restrictions and conditions, we may also redeem shares of RPS without a redemption fee upon a holder's death, total disability or bankruptcy. In addition, after one year from the date of original issuance, we may, at our option, call and redeem shares of RPS at a price equal to their liquidation preference.

As of June 30, 2017, we had sold 99,127 shares of RPS for aggregate gross consideration of \$99,127,000, and incurred approximately \$7,019,000 of selling costs related to the sale of those shares. On March 31, 2017, we closed the RPS offering to investors.

At the time of its issuance, we determined that the RPS contained two embedded features: (1) optional redemption by the holder and (2) optional conversion by the holder. We determined that each of the embedded features met the definition of a derivative and that the RPS should be considered an equity host for the purposes of assessing the embedded derivatives for potential bifurcation. Based on our assessment under Accounting Standards Codification 470 "*Debt*" ("ASC 470") we do not believe bifurcation of either the holder's redemption or conversion feature is appropriate.

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

(11) Series 2 Redeemable Preferred Stock

On February 14, 2017, our public offering of up to 150,000 shares of Series 2 Redeemable Preferred Stock (“RPS 2”) at \$1,000 per share was declared effective. Holders of RPS 2 are entitled to cumulative dividends at the rate of 7% per annum, paid monthly. Dividends on the RPS 2, when payable, will be recorded as a reduction to additional paid-in capital. Under certain circumstances described in the Certificate of Designation for the RPS 2, additional shares of RPS 2 may be issued in lieu of cash dividends.

The RPS 2 ranks senior to our common stock and pari passu with our Series A and RPS, and entitles its holders to a liquidation preference equal to the stated value per share (i.e., \$1,000) plus accrued but unpaid dividends. Holders of RPS 2 may, less an applicable conversion discount, if any, convert their RPS 2 into our common stock at a conversion price equal to the volume-weighted average price of our common stock for the 20 trading days immediately prior to the date of conversion, subject to a minimum conversion price of \$12.75 and in an aggregate amount limited to 10% of the stated value of RPS 2 originally purchased by such holder from us and still held by such holder.

Holders of RPS 2 may request that we redeem their RPS 2 shares at a price equal to their liquidation preference, less an applicable redemption fee, if any. Nevertheless, the Certificate of Designation for RPS 2 permits us complete discretion to grant or decline requests for redemption. Subject to certain restrictions and conditions, we may also redeem shares of RPS 2 without a redemption fee upon a holder’s death, total disability or bankruptcy. In addition, we may, at our option, call and redeem shares of RPS 2 at a price equal to their liquidation preference (subject to a minimum redemption price, in the event of redemptions occurring less than one year after issuance, of 107% of the stated value of the shares being redeemed).

As of June 30, 2017, we had sold 22,536 shares of RPS 2 for aggregate gross consideration of \$22,536,000, and incurred approximately \$1,078,000 of selling costs related to the sale of those shares.

At the time of its issuance, we determined that the RPS 2 contained two embedded features: (1) optional redemption by the holder and (2) optional conversion by the holder. We determined that each of the embedded features met the definition of a derivative and that the RPS 2 should be considered an equity host for the purposes of assessing the embedded derivatives for potential bifurcation. Based on our assessment under ASC 470 we do not believe bifurcation

of either the holder's redemption or conversion feature is appropriate.

(12) Income Taxes

We had a current income tax liability of \$0 as of both June 30, 2017 and December 31, 2016. The components of deferred income tax expense (benefit) for the three and six months ended June 30, 2017 and 2016, respectfully, consisted of the following:

	Three Months Ended		Six Months Ended	
	June 30, 2017	June 30, 2016	June 30, 2017	June 30, 2016
Income tax provision (benefit):				
Current:				
Federal	\$(27,000)	\$(23,000)	\$-	\$-
State	\$(7,000)	\$(6,000)	\$-	\$-
Total current tax expense (benefit)	(34,000)	(29,000)	-	-
Deferred:				
Federal	\$(2,798,000)	\$1,397,000	\$(2,818,000)	\$2,203,000
State	\$(885,000)	\$454,000	\$(900,000)	\$704,000
Total deferred tax expense (benefit)	(3,683,000)	1,851,000	(3,718,000)	2,907,000
Total income tax expense (benefit)	(3,717,000)	1,822,000	(3,718,000)	2,907,000

We provide for a valuation allowance when it is not considered "more likely than not" that our deferred tax assets will be realized. At both June 30, 2017 and December 31, 2016, based upon all available evidence, we provided a valuation allowance of \$2,164,000 against deferred tax assets related to the likelihood of recovering the tax benefit of a capital loss on a note receivable from a related entity and other capital losses.

The Company is engaged in acquiring of life insurance policies and holding them to maturity. Due to the nature of holding policies and the aging of the underlying insureds, it will be more likely than not that the Company will recognize taxable income as the policies in our portfolio start maturing at an accelerated rate in the near future. Due to this we believe that sufficient taxable income will be recognized during the net operating loss carryover period to utilize the reported deferred tax asset, and that no additional valuation allowance, other than that already recorded, is required.

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Accounting Standards Codification 740, *Income Taxes* (“ASC 740”) requires the reporting of certain tax positions that do not meet a threshold of “more likely than not” to be recorded as uncertain tax benefits. It is management’s responsibility to determine whether it is “more likely than not” that a tax position will be sustained upon examination, including resolution of any related appeals or litigation, based upon the technical merits of the position. Management has reviewed all income tax positions taken or expected to be taken for all open years and determined that the income tax positions are appropriately stated and supported. We do not anticipate that the total unrecognized tax benefits will significantly change prior to June 30, 2017.

Under our accounting policies, interest and penalties on unrecognized tax benefits, as well as interest received from favorable tax settlements, are recognized as components of income tax expense. At June 30, 2017 and December 31, 2016, we recorded no accrued interest or penalties related to uncertain tax positions.

Our income tax returns for tax years ended December 31, 2013, 2014, 2015 and 2016 remain open to examination by the Internal Revenue Service and various state taxing jurisdictions. Our tax return for tax year 2012 has now been examined by the IRS (finalized April of 2015) but is open for examination by various state taxing jurisdictions.

(13) Common Stock

In September 2014, we consummated an initial public offering of our common stock resulting in the sale of 800,000 shares of common stock at \$12.50 per share, and net proceeds of approximately \$8.6 million after the payment of underwriting commissions, discounts and expense reimbursements. In connection with this offering, we listed our common stock on the Nasdaq Capital Market under the ticker symbol “GWGH.”

(14) Stock Incentive Plan

We adopted our 2013 Stock Incentive Plan in March 2013. The Compensation Committee of our Board of Directors is responsible for the administration of the plan. Participants under the plan may be granted incentive stock options and non-statutory stock options; stock appreciation rights; stock awards; restricted stock; restricted stock units; and performance shares. Eligible participants include officers and employees of GWG Holdings and its subsidiaries,

members of our Board of Directors, and consultants. As of June 30, 2017, 3,000,000 common stock options are issuable under the plan.

Stock Options

Through June 30, 2017, we had issued stock options for 1,532,000 shares of common stock to employees, officers, and directors under the plan. Options for 740,000 shares have vested, and the remaining options are scheduled to vest over three years. The options were issued with an exercise price between \$6.35 and \$10.38 for those beneficially owning more than 10% of our common stock, and between \$4.83 and \$10.76 for all others, which is equal to the estimated market price of the shares on the date of grant. The expected annualized volatility used in the Black-Scholes model valuation of options issued during the period was 20.0%. The annual volatility rate is based on the standard deviation of the average continuously compounded rate of return of five selected comparable companies over the previous 52 weeks. A forfeiture rate of 15% is based on historical information and expected future trend. As of June 30, 2017, stock options for 679,000 shares had been forfeited and stock options for 70,000 shares had been exercised.

On April 17, 2017, GWG Holdings, Inc. entered into a Separation Agreement with Mr. Jon Gangelhoff. Under this agreement, Mr. Gangelhoff retired and resigned his position as Chief Operating Officer. In addition, all of Mr. Gangelhoff's unvested outstanding common stock options at the time of his separation were vested under the Separation Agreement.

Outstanding stock options:

	Vested	Un-vested	Total
Balance as of December 31, 2015	483,703	569,912	1,053,615

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Compensation expense related to unvested options not yet recognized is \$541,000. We expect to recognize this compensation expense over the next three years (\$89,000 in 2017, \$217,000 in 2018, \$167,000 in 2019, and \$68,000 in 2020).

Stock Appreciation Rights (SARs)

As of June 30, 2017, we have issued SARs for 280,472 shares of common stock to employees. The strike price of the SARs was between \$7.84 and \$10.38, which was equal to the market price of the common stock at the date of issuance. As of June 30, 2017, 114,031 of the SARs were vested. On June 30, 2017 the market price of GWG's common stock was \$10.58.

Outstanding Stock Appreciation Rights:

	Vested	Un-vested	Total
Balance as of December 31, 2015	-	-	-
Granted during the year	106,608	133,127	239,735
Forfeited during the year	-	-	-
Balance as of December 31, 2016	106,608	133,127	239,735
Granted during the year	4,063	36,674	40,737
Vested during the year	3,360	(3,360)	
Forfeited during the year	-	-	-
Balance as of June 30, 2017	114,031	166,441	280,472

A liability for the SARs was recorded on June 30, 2017 in the amount of \$316,000 and compensation expense was charged for the amount of \$312,000.

Upon the exercise of SARs, the Company is obligated to make cash payment equal to the positive difference between the fair market value of the Company's common stock on the date of exercise less the fair market value of the common

stock on the date of grant.

(15) Net Loss per Common Share

We have outstanding Series A, RPS and RPS 2, as described in Notes 9, 10 and 11. The Series A, RPS and RPS 2 are anti-dilutive to our net loss or income attributable to common shareholders calculation at both June 30, 2017 and 2016. We also issued warrants to purchase common stock in conjunction with the sale of Series A (see Note 9). Both those warrants and our vested stock options are anti-dilutive at both June 30, 2017 and 2016 and have not been included in the fully diluted net loss per common share calculation.

(16) Commitments

We are party to an office lease with U.S. Bank National Association as the landlord. On September 1, 2015, we entered into an amendment to our original lease that expanded the leased space to 17,687 square feet and extended the term through 2025. Under the amended lease we are obligated to pay base rent plus common area maintenance and a share of building operating costs. Rent expenses under this agreement were \$110,000 and \$223,000 during the three and six months ended June 30, 2017 and \$123,000 and \$232,000 for the three and six months ended June 30, 2016.

Minimum lease payments under the amended lease are as follows:

Six months ending December 31, 2017	\$90,000
2018	185,000
2019	191,000
2020	198,000
2021	204,000
2022	210,000
2023	217,000
2024	223,000
2025	230,000
	\$1,748,000

GWG HOLDINGS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

(17) Contingencies

Litigation – In the normal course of business, we are involved in various legal proceedings. In the opinion of management, any liability resulting from such proceedings would not have a material adverse effect on our financial position, results of operations or cash flows.

(18) Guarantee of L Bonds

We are publicly offering and selling L Bonds under a registration statement declared effective by the SEC, as described in Note 8. Our obligations under the L Bonds are secured by substantially all the assets of GWG Holdings, a pledge of all our common stock held individually by our largest stockholders, and by a guarantee and corresponding grant of a security interest in substantially all the assets of GWG Life. As a guarantor, GWG Life has fully and unconditionally guaranteed the payment of principal and interest on the L Bonds. Substantially all of our life insurance policies are held by DLP III, DLP IV and the Trust. GWG Life's equity in DLP III and DLP IV serve as collateral for our L Bond obligations. The policies held by DLP III and DLP IV are not collateral for the L Bond obligations as such policies serve as direct collateral for the senior credit facilities.

The consolidating financial statements are presented in lieu of separate financial statements and other related disclosures of the subsidiary guarantor and issuer because management does not believe that separate financial statements and related disclosures would be material to investors. There are currently no significant restrictions on the ability of GWG Holdings or GWG Life, the guarantor subsidiary, to obtain funds from its subsidiaries by dividend or loan, except as described in these notes. A majority of insurance policies we own are subject to a collateral arrangement with LNV Corporation described in Note 6. Under this arrangement, collection and escrow accounts are used to fund premiums for the insurance policies and to pay interest and other charges under the senior credit facility.

The following represents consolidating financial information as of June 30, 2017 and December 31, 2016, with respect to the financial position, and for the three and six months ended June 30, 2017 and 2016, with respect to results of operations and cash flows of GWG Holdings and its subsidiaries. The parent column presents the financial information of GWG Holdings, the primary obligor for the L Bonds. The guarantor subsidiary column represents the financial information of GWG Life, the guarantor subsidiary of the L Bonds, presenting its investment in DLP III, DLP IV and the Trust under the equity method. The non-guarantor subsidiaries column presents the financial

information of all non-guarantor subsidiaries, including DLP III, DLP IV and the Trust.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

(19) Concentrations

We purchase life insurance policies written by life insurance companies having investment-grade ratings by independent rating agencies. As a result, there may be certain concentrations of policies with life insurance companies. The following summarizes the face value of insurance policies with specific life insurance companies exceeding 10% of the total face value of our portfolio.

Life insurance company	June 30, 2017		December 31, 2016	
John Hancock	14.13	%	14.36	%
AXA Equitable	12.69	%	13.42	%
Lincoln National	10.86	%	11.22	%
Transamerica	10.31	%	*	

* percentage does not exceed 10% of the total face value.

The following summarizes the number of insurance policies held in specific states exceeding 10% of the total face value of our portfolio:

State of Residence	June 30, 2017		December 31, 2016	
Florida	20.30%		19.42	%
California	19.29%		20.72	%

(20) Subsequent events

Since June 30, 2017, we have issued approximately \$15,789,000 of L Bonds.

Since June 30, 2017, we have issued approximately \$12,762,000 of RPS 2.

As of the date of this report, we exercised our contractual rights to call for the redemption of our Series I Secured Notes and our Series A Preferred Stock and all outstanding warrants related to our Series A offering.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS 2. OF OPERATIONS.

You should read the following discussion in conjunction with the condensed consolidated financial statements and accompanying notes and the information contained in other sections of this report. This discussion and analysis is based on the beliefs of our management, as well as assumptions made by, and information currently available to, our management.

Risk Relating to Forward-Looking Statements

This report contains forward-looking statements that reflect our current expectations and projections about future events. Actual results could differ materially from those described in these forward-looking statements.

The words “believe,” “could,” “possibly,” “probably,” “anticipate,” “estimate,” “project,” “expect,” “may,” “will,” “should,” “plan,” “expect,” or “consider” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. Forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from such statements. Many of the forward-looking statements contained in this report can be found in our MD&A discussion and in the updates we provide in Part II, Item 5 “Other Information.”

changes in the secondary market for life insurance;
changes resulting from the evolution of our business model and strategy with respect to the life insurance industry;
our limited operating history;
the valuation of assets reflected on our financial statements;
the reliability of assumptions underlying our actuarial models, including our life expectancy estimates;
our reliance on debt financing;
risks relating to the validity and enforceability of the life insurance policies we purchase;
risks relating to our ability to license and effectively apply technologies to improve and expand the scope of our business;
our reliance on information provided and obtained by third parties;
federal, state and FINRA regulatory matters;
competition in the secondary market of life insurance;
the relative illiquidity of life insurance policies;
our ability to satisfy our debt obligations if we were to sell our entire portfolio of life insurance policies;
life insurance company credit exposure;
cost-of-insurance (premium) increases on our life insurance policies;
general economic outlook, including prevailing interest rates;
performance of our investments in life insurance policies;

financing requirements;
risks associated with the merchant cash advance business;
the various risks associated with our attempts to commercialize our M-Panel technology;
litigation risks;
restrictive covenants contained in borrowing agreements; and
our ability to make cash distributions in satisfaction of dividend obligations and redemption requests.

We caution you that the foregoing list of factors is not exhaustive. Forward-looking statements are only estimates and predictions, or statements of current intent. Actual results, outcomes or actions that we ultimately undertake could differ materially from those anticipated in the forward-looking statements due to risks, uncertainties or actual events differing from the assumptions underlying these statements.

JOBS Act

On April 5, 2012, the Jumpstart Our Business Startups Act of 2012, or JOBS Act, was enacted. Section 107 of the JOBS Act provides that an “emerging growth company” can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act of 1933 for complying with new or revised accounting standards. This means that an “emerging growth company” can make an election to delay the adoption of certain accounting standards until those standards would apply to private companies. We are an emerging growth company and have elected to delay our adoption of new or revised accounting standards and, as a result, we may not comply with new or revised accounting standards at the same time as other public reporting companies that are not “emerging growth companies.” This exemption will apply for a period of five years following our first sale of common equity securities under an effective registration statement (September 2019) or until we no longer qualify as an “emerging growth company” as defined under the JOBS Act, whichever is earlier.

Overview

We are a financial services company disrupting and transforming the life insurance industry and related industries with innovative products and services. We built our business by creating opportunities for consumers to obtain significantly more value for their life insurance policies as compared to the traditional options offered by the insurance industry by creating a secondary market. We are enhancing and extending these activities through innovation in our products and services, business processes, financing strategies, and advanced epigenetic technologies that we expect will improve insurance predictive underwriting analytics. At the same time, we are creating opportunities for investors to receive income and capital appreciation from our life insurance investment activities and the businesses we create in the life insurance and related industries.

Critical Accounting Policies

Critical Accounting Estimates

The preparation of our consolidated financial statements in accordance with the Generally Accepted Accounting Principles (GAAP) requires us to make significant judgments, estimates, and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. We base our judgments, estimates, and assumptions on historical experience and on various other factors believed to be reasonable under the circumstances. Actual results could differ materially from these estimates. We evaluate our judgments, estimates, and assumptions on a regular basis and make changes accordingly. We believe that the judgments, estimates, and assumptions involved in valuing our investments in life insurance policies have the greatest potential impact on our consolidated financial statements and accordingly believe these to be our critical accounting estimates. Below we discuss the critical accounting policies associated with these estimates as well as certain other critical accounting policies.

Ownership of Life Insurance Policies—Fair Value Option

We account for the purchase of life insurance policies in accordance with ASC 325-30, which requires us to use either the investment method or the fair value method. We have elected to account for all of our life insurance policies using the fair value method.

The fair value of our life insurance policies is determined as the net present value of the life insurance portfolio's future expected cash flows (policy benefits received and required premium payments) that incorporates current life expectancy estimates and discount rate assumptions.

Fair Value Components – Medical Underwriting

Unobservable inputs, as discussed below, are a critical component of our estimate for the fair value of our investments in life insurance policies. We currently use a probabilistic method of estimating and valuing the projected cash flows of our portfolio, which we believe to be the preferred and most prevalent valuation method in the industry. In this regard, the most significant assumptions we make are the life expectancy estimates of the insureds and the discount rate applied to the expected future cash flows to be derived from our portfolio.

The 2015 Valuation Basic Table (“2015 VBT”) finalized by the Society of Actuaries is based on a much larger dataset of insured lives, face amount of policies and more current information compared to the dataset underlying the 2008 Valuation Basic Table. The new 2015 VBT dataset includes 266 million policies compared to the 2008 VBT dataset of 75 million. The experience data in the 2015 VBT dataset includes 2.55 million claims on policies from 51 insurance carriers. Life expectancies implied by the 2015 VBT are generally longer for male and female nonsmokers between the ages of 65 and 80, while smokers and insureds of both genders over the age of 85 have significantly lower life expectancies. We adopted the 2015 VBT in our valuation process in June 2016.

For life insurance policies with face amounts greater than \$1 million and that are not pledged under any senior credit facility (approximately 30% of our portfolio by face amount of policy benefits) we attempt to update the independent life expectancy estimates on a continuous rotating three year cycle. For life insurance policies with face amounts greater than \$750,000 that are pledged under the LNV senior credit facility (approximately 58% of our portfolio by face amount of policy benefits) we are presently required to update the independent life expectancy estimates every two years.

Our prior experience in updating independent life expectancy estimates has generally resulted in shorter life expectancies of the updated insureds within our portfolio, but often not as short as we had projected. This has resulted in reductions to the fair value of our portfolio in the amounts of \$6.7 million and \$8.6 million for the three and six months ended June 30, 2017, respectively. As our life insurance portfolio continues to grow, we may experience additional and material adjustments to the fair value of our portfolio due to updating independent life expectancy estimates.

In July 2017, Lincoln National Life Insurance Company announced pending cost-of-insurance rate (i.e., premium) increases for certain life insurance policies which were effected on August 1, 2017. We identified two affected policies in our portfolio. We have requested updated policy illustrations in order to calculate the change in fair value resulting from the expected increased premiums. In August 2017, Transamerica Life Insurance Company announced pending cost-of-insurance rate increases for certain life insurance policies that will be effected on the policy anniversary dates. We identified three affected policies in our portfolio. We are aware of one additional pending cost-of-insurance increase affecting one other policy in our portfolio.

Fair Value Components – Required Premium Payments

We must pay the premiums on the life insurance policies within our portfolio in order to collect the policy benefit. The same probabilistic model and methodologies used to generate expected cash inflows from the life insurance policy benefits over the expected life of the insured are used to estimate cash outflows due to required premium payments. Premiums paid are offset against revenue in the applicable reporting period.

Fair Value Components – Discount Rate

A discount rate is used to calculate the net present value of the expected cash flows. The discount rate used to calculate fair value of our portfolio incorporates the guidance provided by ASC 820.

The table below provides the discount rate used to estimate the fair value of our portfolio of life insurance policies for the period ending:

June 30, 2017	December 31, 2016
10.81%	10.96%

The change in the discount rate incorporates current information about discount rates applied by other reporting companies owning portfolios of life insurance policies, discount rates observed by us in the life insurance secondary market, market interest rates, credit exposure to the issuing insurance companies, and our estimate of the risk premium a purchaser would require to receive the future cash flows derived from our portfolio of life insurance policies. Management has discretion regarding the combination of these and other factors when determining the discount rate. The discount rate we choose assumes an orderly and arms-length transaction (i.e., a non-distressed transaction in which neither seller nor buyer is compelled to engage in the transaction), which is consistent with related GAAP guidance. The carrying value of policies acquired during each quarterly reporting period are adjusted to their current

fair value using the fair value discount rate applied to the entire portfolio as of that reporting date.

We engaged Model Actuarial Pricing System, Inc. (“MAPS”) to prepare a calculation of our life insurance portfolio. MAPS owns and maintains the portfolio pricing software we use. MAPS processed policy data, future premium data, life expectancy estimate data, and other actuarial information to calculate a net present value for our portfolio using the specified discount rate of 10.81%. MAPS independently calculated the net present value of our portfolio of 793 policies to be \$577.0 million and furnished us with a letter documenting its calculation. A copy of such letter is filed as Exhibit 99.1 to this report.

Deferred Income Taxes

Under ASC 740, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. A valuation allowance is established for deferred tax assets that are not considered “more likely than not” to be realized. Realization of deferred tax assets depends upon having sufficient past or future taxable income in periods to which the deductible temporary differences are expected to be recovered or within any applicable carryback or carryforward periods. After assessing the realization of the net deferred tax assets, we believe that it is “more likely than not” that we will be able to realize all of our deferred tax assets other than those which have resulted from capital losses.

Deferred Financing and Issuance Costs

Financing costs, which include issuance costs, sales commissions and other direct expenses incurred under the senior credit facilities, were capitalized and are amortized using the straight-line method over the term of the senior credit facilities. The Series I Secured Note obligations are reported net of financing costs, which are amortized using the interest method over the term of each respective borrowing. The L Bonds are reported net of financing costs, which are amortized using the interest method over the term of each respective borrowing.

Principal Revenue and Expense Items

We earn revenues from the following three primary sources.

Life Insurance Policy Benefits Realized. We recognize the difference between the face value of the policy benefits and carrying value when an insured event has occurred and we determine that settlement and collection of the policy benefits is realizable and reasonably assured. Revenue from a transaction must meet both criteria in order to be recognized. We generally collect the face value of the life insurance policy from the insurance company within 45 days of our notification of the insured's mortality.

Change in Fair Value of Life Insurance Policies. We value our portfolio investments for each reporting period in accordance with the fair value principles discussed herein, which reflects the expected receipt of policy benefits in future periods as shown in our consolidated financial statements, net premium costs.

Sale of a Life Insurance Policy. In the event of a sale of a policy, we recognize gain or loss as the difference between the sale price and the carrying value of the policy on the date of the receipt of payment on such sale.

Our main components of expense are summarized below.

Selling, General and Administrative Expenses. We recognize and record expenses incurred in our business operations, including operations related to the purchasing and servicing of life insurance policies. These expenses include salaries and benefits, sales, marketing, occupancy and other expenditures.

Interest Expense. We recognize and record interest expenses associated with the costs of financing our life insurance portfolio for the current period. These expenses include interest paid to our senior lenders under our senior credit facilities, interest paid on our L Bonds and other outstanding indebtedness such as our Series I Secured Notes. When we issue debt, we amortize the financing costs associated with such indebtedness over the outstanding term of the financing, and classify it as interest expense.

Results of Operations — Three and Six Months Ended June 30, 2017 Compared to the Same Periods in 2016

The following is our analysis of the results of operations for the periods indicated below. This analysis should be read in conjunction with our consolidated financial statements and related notes.

Revenue.

	Three Months Ended		Six Months Ended	
	June 30, 2017	2016	June 30, 2017	2016
Revenue recognized from maturities of life insurance contracts	7,920,000	8,137,000	24,526,000	22,765,000
Revenue recognized from change in fair value of life insurance contracts	\$15,235,000	\$21,241,000	\$29,119,000	\$32,773,000
Premiums and other annual fees	(11,859,000)	(8,995,000)	(22,949,000)	(17,441,000)
Gain on life insurance contracts, net	\$11,296,000	\$20,383,000	\$30,696,000	\$38,097,000
Other income	372,000	394,000	1,060,000	584,000
Total revenue	\$11,668,000	\$20,777,000	\$31,756,000	\$38,681,000
Number of policies matured	9	6	19	12
Face value of matured policies	\$10,935,000	\$19,238,000	\$29,910,000	\$29,067,000
The change in fair value related to new policies acquired during the period	\$8,044,000	\$9,822,000	\$18,645,000	\$17,841,000

The discount rate applied to estimate the fair value of the portfolio of life insurance policies we own was 10.81% as of June 30, 2017, compared to 10.96% as of December 31, 2016 and 11.05% as of June 30, 2016. The carrying value of policies acquired during each quarterly reporting period is adjusted to current fair value using the fair value discount rate applied to the entire portfolio as of that reporting date.

Expenses.

	Three Months Ended June 30,			Six Months Ended June 30,		
	2017	2016	Increase/ Decrease	2017	2016	Increase/ Decrease
Employee compensation and benefits (1)	\$3,741,000	\$3,071,000	\$670,000	\$6,904,000	\$5,538,000	\$1,366,000
Interest expense (including amortization of deferred financing costs) (2)	12,246,000	9,765,000	2,481,000	25,490,000	18,914,000	6,576,000
Legal and professional expenses (3)	1,331,000	1,304,000	27,000	2,277,000	2,510,000	(233,000)
Provision for MCA loans (4)	878,000	300,000	578,000	878,000	400,000	478,000
Other expenses (5)	2,883,000	2,033,000	850,000	5,664,000	4,345,000	1,319,000
Total expenses	\$21,079,000	\$16,473,000	\$4,606,000	\$41,213,000	\$31,707,000	\$9,506,000

(1) We hired additional members to our sales, marketing and policy acquisition teams. At June 30, 2017 we employed 76 employees and on June 30, 2016, we employed 66 employees.

(2) Increase in all periods was due to the increase in our average debt outstanding.

Increase for the three months ended June 30, 2017 over the same period of 2016 is due to increased legal fees (3) associated with MCA collections. Decrease for the six months ended June 30, 2017 over the same period of 2016 is due to fewer SEC filings.

(4) Increase is due to further impairment of the Nulook loan due to decreased recovery estimates.

(5) Increase is due to public relations, sales and marketing costs associated with growing and servicing our network of independent financial advisors and appointed agents.

Deferred Income Taxes.

The Company is engaged in acquiring of life insurance policies and holding them to maturity. Due to the nature of holding policies and the aging of the underlying insureds, it will be more likely than not that the Company will recognize taxable income as the policies in our portfolio start maturing at an accelerated rate in the near future. Due to this, we believe that sufficient taxable income will be recognized during the net operating loss carryover period to utilize the reported deferred tax asset, and that no additional valuation allowance, other than that already recorded, is required.

Income Tax Expense. For both the three and six months ended June 30, 2017, we realized income tax benefits of \$3.7 million. In the three and six months ended June 30, 2016, we had an income tax expense of \$1.8 million and \$2.9 million, respectively. The effective tax rate for the three and six months ended June 30, 2017 was 39.5% and 39.3% and for the three and six months ended June 30, 2016, was 42.3% and 41.7%, respectively.

The following table provides a reconciliation of our income tax expense at the statutory federal tax rate to our actual income tax expense:

	Three Months Ended		June 30, 2016		Six Months Ended		June 30, 2016	
	June 30, 2017		June 30, 2016		June 30, 2017		June 30, 2016	
Statutory federal income tax (benefit)	\$(3,200,000)	34.0 %	\$1,463,000	34.0 %	\$(3,215,000)	34.0 %	\$2,371,000	34.0 %
State income taxes (benefit), net of federal benefit	(607,000)	6.5 %	281,000	6.5 %	(609,000)	6.4 %	456,000	6.5 %
Other permanent differences	90,000	(1.0)%	78,000	1.8 %	106,000	(1.1)%	80,000	1.2 %
Total income tax expense (benefit)	\$(3,717,000)	39.5 %	\$1,822,000	42.3 %	\$(3,718,000)	39.3 %	\$2,907,000	41.7 %

The most significant temporary differences between GAAP net income and taxable net income are the treatment of interest costs with respect to the acquisition of the life insurance policies and revenue recognition with respect to the mark-to-market of the life insurance portfolio.

Liquidity and Capital Resources

We finance our business through a combination of life insurance policy benefit receipts, origination fees, equity offerings, debt offerings, and our senior credit facilities. We have used our debt offerings and our senior credit facilities primarily for policy acquisition, policy servicing, and portfolio-related financing expenditures including paying principal and interest.

Under the terms of our senior credit facilities (discussed in Notes 5 and 6), we are required to maintain collection and escrow accounts that are used to fund the acquisition of policies, pay annual policy premiums, pay interest and other charges under the facility, and collect policy benefits. The agents for the lenders authorize disbursements from these accounts. At June 30, 2017 and December 31, 2016, there was a balance of \$46,160,000, and \$37,827,000, respectively, in these restricted cash accounts.

As of June 30, 2017 and December 31, 2016, we had approximately \$105.4 million and \$121.7 million, respectively, in combined available cash, cash equivalents, policy benefits receivable, if any, and available borrowing base surplus capacity, if any, under our senior credit facilities for the purpose of purchasing additional life insurance policies, paying premiums on existing policies, paying portfolio servicing expenses, and paying principal and interest on our outstanding financing obligations.

Financings Summary

We had the following outstanding debt balances as of June 30, 2017 and December 31, 2016:

Issuer/Borrower	As of June 30, 2017		As of December 31, 2016			
	Principal Amount	Weighted Average Interest Rate	Principal Amount	Weighted Average Interest Rate		
GWG Holdings, Inc. – L Bonds	\$407,850,000	7.30	%	\$387,067,000	7.23	%
GWG Life, LLC – Series I Secured Notes	6,815,000	8.72	%	16,614,000	8.68	%
GWG DLP Funding IV, LLC – Senior credit facilities	155,625,000	7.59	%	162,725,000	7.34	%
Total	\$570,290,000	7.40	%	\$566,406,000	7.30	%

In November 2009, our wholly owned subsidiary GWG Life began a private placement of Series I Secured Notes to accredited investors only. This offering was closed in November 2011. As of June 30, 2017 and December 31, 2016, we had approximately \$6.8 million and \$16.6 million, respectively, in principal amount of Series I Secured Notes outstanding. Effective as of the date of this report, we exercised our contractual right to call for the redemption of the Series I Secured Notes. We expect that our redemption of outstanding Series I Secured Notes will occur on or about September 8, 2017 and require us to pay an aggregate of approximately \$6.6 million.

In June 2011, we concluded a private placement offering of Series A for new investors, having received an aggregate \$24.6 million in subscriptions for our Series A. These subscriptions consisted of \$14.0 million in conversions of outstanding Series I Secured Notes and \$10.6 million of new investments.

As of both June 30, 2017 and December 31, 2016, we had approximately \$19.7 million of Series A stated value outstanding. As of the date of this report, we exercised our contractual right to call for the redemption of the Series A Preferred Stock and all related outstanding warrants. We expect that our redemption of outstanding Series A Preferred Stock and related warrants will occur on or about October 9, 2017 and require us to pay an aggregate of approximately \$22.2 million.

In January 2012, we began publicly offering up to \$250.0 million in debt securities (initially named “Renewable Secured Debentures” and subsequently renamed “L Bonds”) that was completed in January 2015.

On September 24, 2014, we consummated an initial public offering of our common stock resulting in the sale of 800,000 shares of common stock at \$12.50 per share and net proceeds of approximately \$8.6 million after the deduction of underwriting commissions, discounts and expense reimbursements.

In January 2015, we began publicly offering up to \$1.0 billion of L Bonds as a follow-on to our earlier \$250.0 million public debt offering. Through June 30, 2017, the total amount of these L Bonds sold, including renewals, was \$749.8 million. As of June 30, 2017 and December 31, 2016, respectively, we had approximately \$407.9 million and \$387.1 million in principal amount of L Bonds outstanding.

In October 2015, we began publicly offering up to 100,000 shares of our RPS at a per-share price of \$1,000. As of June 30, 2017, we had issued approximately \$99.1 million stated value of RPS. As of June 30, 2017, we no longer offer RPS.

On February 14, 2017, we began publicly offering up to 150,000 shares of RPS 2 at a per-share price of \$1,000. As of June 30, 2017, we have issued approximately \$22.5 million stated value of RPS 2.

The weighted-average interest rate of our outstanding Series I Secured Notes as of June 30, 2017 and December 31, 2016 was 8.72% and 8.68%, respectively, and the weighted-average maturity at those dates was 1.96 and 1.14 years, respectively. Effective September 1, 2016, we no longer renew the Series I Secured Notes.

The weighted-average interest rate of our outstanding L Bonds as of June 30, 2017 and December 31, 2016 was 7.30% and 7.23%, respectively, and the weighted-average maturity at those dates was 2.27 and 2.13 years, respectively. Our L Bonds have renewal features. Since we first issued our L Bonds, we have experienced \$341.9 million in maturities, of which \$207.8 million has renewed through June 30, 2017 for an additional term. This has provided us with an aggregate renewal rate of approximately 61% for investments in these securities. Effective September 1, 2016, we discontinued the sales and renewals of 6-month and 1-year L Bonds.

Future contractual maturities of Series I Secured Notes and L Bonds at June 30, 2017 are:

Years Ending December 31,	Series I Secured Notes	L Bonds	Total
Six months ending December 31, 2017	\$749,000	\$47,068,000	\$47,817,000
2018	2,376,000	108,772,000	111,148,000
2019	1,024,000	116,767,000	117,791,000
2020	1,725,000	49,062,000	50,787,000
2021	941,000	28,753,000	29,694,000
2022	-	24,773,000	24,773,000
Thereafter	-	32,655,000	32,655,000
	\$6,815,000	\$407,850,000	\$414,665,000

The L Bonds and Series I Secured Notes are secured by all of our assets, and are subordinate to our senior credit facilities. The L Bonds and Series I Secured Notes are pari passu with respect to a security interest in our assets pursuant to an intercreditor agreement (see Notes 7 and 8).

We maintain a \$105 million senior credit facility with Autobahn/DZ Bank through DLP III. The senior credit facility is used to pay the premium expenses related to our portfolio of life insurance policies. As of both June 30, 2017 and December 31, 2016, we had no amounts outstanding under that senior credit facility, no life insurance policies were pledged, and we maintained an available borrowing base of \$0 million. On September 14, 2016, we paid off the

Autobahn/DZ Bank senior credit facility in full with funds received under a new senior credit facility with LNV Corporation as described in Note 6.

On September 14, 2016, we entered into a \$172 million senior credit facility with LNV Corporation in which DLP IV is the borrower. We intend to use the proceeds from this facility to grow and maintain our portfolio of life insurance policies, for liquidity and for general corporate purposes. As of June 30, 2017 we had approximately \$155.6 million outstanding under the LNV senior credit facility.

We expect to meet our ongoing operational capital needs through a combination of the receipt of policy benefits from our portfolio of life insurance policies and net proceeds from our L Bonds and RPS 2 offerings. We expect to meet our policy acquisition, servicing, and financing capital needs principally from the receipt of policy benefits from our portfolio of life insurance policies, net proceeds from our offering of L Bonds and RPS 2, and from our senior credit facilities. We estimate that our liquidity and capital resources are sufficient for our current and projected financial needs for at least the next twelve months given current assumptions. However, if we are unable to continue our offerings for any reason (or if we become unsuccessful in selling our securities), and we are unable to obtain capital from other sources, our business will be materially and adversely affected. In addition, our business will be materially and adversely affected if we do not receive the policy benefits we forecast and if holders of our L Bonds or Series I Secured Notes fail to renew with the frequency we have historically experienced. In such a case, we could be forced to sell our investments in life insurance policies to service or satisfy our debt-related and other obligations.

Capital expenditures have historically not been material and we do not anticipate making material capital expenditures in 2017 or beyond.

Debt Financing Summary

The table below reconciles the face amount of our outstanding debt to the carrying value shown on our balance sheet:

	As of June 30, 2017	As of December 31, 2016
Total senior facilities and other indebtedness		
Face amount outstanding	\$ 155,626,000	\$ 162,725,000
Unamortized selling costs	(6,617,000)	(6,660,000)
Carrying amount	\$ 149,009,000	\$ 156,065,000
Series I Secured Notes:		
Face amount outstanding	\$ 6,815,000	\$ 16,614,000
Unamortized selling costs	(134,000)	(209,000)
Carrying amount	\$ 6,681,000	\$ 16,405,000
L Bonds:		
Face amount outstanding	\$ 407,850,000	\$ 387,067,000
Subscriptions in process	6,521,000	5,882,000
Unamortized selling costs	\$(13,539,000)	\$(11,636,000)
Carrying amount	\$ 400,832,000	\$ 381,313,000

Portfolio Assets and Secured Indebtedness

At June 30, 2017, the fair value of our investments in life insurance policies of \$577.0 million plus our cash balance of \$52.3 million and our restricted cash balance of \$46.2 million, plus matured policy benefits receivable of \$7.0 million, totaled \$682.5 million representing an excess of portfolio assets over secured indebtedness of \$105.4 million. At December 31, 2016, the fair value of our investments in life insurance policies of \$511.2 million plus our cash balance of \$78.5 million and our restricted cash balance of \$37.8 million, plus matured policy benefits receivable of \$5.3 million, totaled \$632.9 million, representing an excess of portfolio assets over secured indebtedness of \$66.4 million.

The following forward-looking table seeks to illustrate the impact that a hypothetical sale of our portfolio of life insurance assets at various discount rates would have on our ability to satisfy our debt obligations as of June 30, 2017. In all cases, the sale of the life insurance assets owned by DLP III and DLP IV will be used first to satisfy all amounts owing, if any, under the respective senior credit facilities. The net sale proceeds remaining after satisfying all obligations under the senior credit facilities would be applied to L Bonds and Series I Secured Notes on a pari passu basis.

Edgar Filing: GWG Holdings, Inc. - Form 10-Q

Portfolio Discount Rate	10%	11%	12%	13%	14%	15%	16%
Value of portfolio	\$599,960,000	\$571,539,000	\$545,377,000	\$521,240,000	\$498,920,000	\$478,238,000	\$459,034,000
Cash, cash equivalents and policy benefits receivable	105,423,000	105,423,000	105,423,000	105,423,000	105,423,000	105,423,000	105,423,000
Total assets	705,383,000	676,962,000	650,800,000	626,663,000	604,343,000	583,661,000	564,457,000
Senior credit facilities	155,625,000	155,625,000	155,625,000	155,625,000	155,625,000	155,625,000	155,625,000
Net after senior credit facilities	549,758,000	521,337,000	495,175,000	471,038,000	448,718,000	428,036,000	408,832,000
Series I Secured Notes and L Bonds	414,665,000	414,665,000	414,665,000	414,665,000	414,665,000	414,665,000	414,665,000
Net after Series I Secured Notes and L Bonds	135,093,000	106,672,000	80,510,000	56,373,000	34,053,000	13,371,000	(5,833,000)
Impairment to Series I Secured Notes and L Bonds	No impairment	No impairment	No impairment	No impairment	No impairment	No impairment	Impairment

The table illustrates that our ability to fully satisfy amounts owing under the L Bonds and Series I Secured Notes would likely be impaired upon the sale of all our life insurance assets at a price equivalent to a discount rate of approximately 15.69% or higher. At December 31, 2016, the likely impairment occurred at a discount rate of approximately 13.94% or higher. The discount rate used to calculate the fair value of our portfolio was 10.81% and 10.96% at June 30, 2017 and December 31, 2016, respectively.

The table does not include any allowance for transactional fees and expenses associated with a portfolio sale (which expenses and fees could be substantial), and is provided to demonstrate how various discount rates used to value our portfolio could affect our ability to satisfy amounts owing under our debt obligations in light of our senior secured lender's right to priority payments. This table also does not include the yield maintenance fee, which could be substantial, we are required to pay in certain circumstances under our senior credit facility with LNV Corporation. You should read the above table in conjunction with the information contained in other sections of this report, including our discussion of discount rates included under the "Critical Accounting Policies — Fair Value Components — Discount Rate" caption above. This discussion and analysis is based on the beliefs of our management, as well as assumptions made by, and information currently available to, our management.

Cash Flows

The payment of premiums and servicing costs to maintain life insurance policies represents our most significant requirement for cash disbursement. When a policy is purchased, we are able to calculate the minimum premium payments required to maintain the policy in-force. Over time as the insured ages, premium payments will increase. Nevertheless, the probability we will actually be required to pay the premiums decreases as mortality becomes more likely. These scheduled premiums and associated probabilities are factored into our expected internal rate of return and cash-flow modeling. Beyond premiums, we incur policy servicing costs, including annual trustee, tracking costs, and debt servicing costs, including principal and interest payments all of which are excluded from our internal rate of return ("IRR") calculations. Until we receive a sufficient amount of proceeds from the policy benefits, we intend to pay these costs from our senior credit facilities, when permitted, and through the issuance of debt securities, including the L Bonds, and equity securities including our preferred stock offerings.

The amount of payments for anticipated premiums and servicing costs that we will be required to make over the next five years to maintain our current portfolio, assuming no mortalities, is set forth in the table below.

Years Ending December 31,	Premiums	Servicing	Premiums and Servicing Fees
Six months ending December 31, 2017	\$24,455,000	\$654,000	\$25,109,000
2018	52,611,000	654,000	53,265,000

Edgar Filing: GWG Holdings, Inc. - Form 10-Q

2019	58,206,000	654,000	58,860,000
2020	65,722,000	654,000	66,376,000
2021	74,105,000	654,000	74,759,000
2022	83,310,000	654,000	83,964,000
	\$358,409,000	\$3,924,000	\$362,333,000

- 36 -

Our anticipated premium expenses are subject to the risk of increased cost-of-insurance charges (i.e., premium charges) for the universal life insurance policies we own. In July 2017, Lincoln National Life Insurance Company announced pending cost-of-insurance rate increases for certain life insurance policies which were effected on August 1, 2017. We identified two affected policies in our portfolio. We have requested updated policy illustrations and in order to calculate the change in fair value resulting from the expected increased premiums. In August 2017, Transamerica Life Insurance Company announced pending cost-of-insurance rate increases for certain life insurance policies that will be effected on the policy anniversary dates. We identified three affected policies in our portfolio. We are aware of one additional pending cost-of-insurance increase affecting one other policy in our portfolio. As a result, we expect that our premium expense will increase and the fair value of the policy and our portfolio will be negatively impacted once the insurer has specified and implemented the proposed increases. Except as noted above, we are not aware of cost-of-insurance increases by other insurers, but we are aware that cost-of-insurance increases have become more prevalent in the industry. Thus, we may see additional insurers implementing cost-of-insurance increases in the future.

For the quarter-end dates set forth below, the following table illustrates the total amount of face value of policy benefits owned, and the trailing 12 months of life insurance policy benefits collected and premiums paid on our portfolio. The trailing 12-month benefits/premium coverage ratio indicates the ratio of policy benefits received to premiums paid over the trailing 12-month period from our portfolio of life insurance policies.

Quarter End Date	Portfolio Face Amount	12-Month		
		12-Month Trailing Benefits Collected	12-Month Trailing Premiums Paid	12-Month Trailing Benefits/ Premium Coverage Ratio
December 31, 2014	779,099,000	18,050,000	23,265,000	77.6 %
March 31, 2015	754,942,000	46,675,000	23,786,000	196.2 %
June 30, 2015	806,274,000	47,125,000	24,348,000	193.5 %
September 30, 2015	878,882,000	44,482,000	25,313,000	175.7 %
December 31, 2015	944,844,000	31,232,000	26,650,000	117.2 %
March 31, 2016	1,027,821,000	21,845,000	28,771,000	75.9 %
June 30, 2016	1,154,798,000	30,924,000	31,891,000	97.0 %
September 30, 2016	1,272,078,000	35,867,000	37,055,000	96.8 %
December 31, 2016	1,361,675,000	48,452,000	40,240,000	120.4 %
March 31, 2017	1,447,558,000	48,189,000	42,753,000	112.7 %
June 30, 2017	1,525,363,000	49,295,000	45,414,000	108.5 %

We believe that the portfolio cash flow results set forth above are consistent with our general investment thesis: that the life insurance policy benefits we receive will continue to increase over time in relation to the premiums we are

required to pay on the remaining policies in the portfolio. Nevertheless, we expect that our portfolio cash flow on a period-to-period basis will remain inconsistent until such time as we achieve our goal of acquiring a larger, more diversified portfolio of life insurance policies. As our receipt of life insurance policy benefits increases, we expect to use these cash flows to begin paying down our outstanding indebtedness and purchase additional life insurance policies.

Inflation

Changes in inflation do not necessarily correlate with changes in interest rates. We presently do not foresee any material impact of inflation on our results of operations in the periods presented in our consolidated financial statements.

Off-Balance Sheet Arrangements

We are party to an office lease with U.S. Bank National Association as the landlord. On September 1, 2015, we entered into an amendment that expanded the leased space to 17,687 square feet and extended the term through August 31, 2026 (see Note 16).

Credit Risk

We review the credit risk associated with our portfolio of life insurance policies when estimating its fair value. In evaluating the policies' credit risk, we consider insurance company solvency, credit risk indicators, economic conditions, ongoing credit evaluations, and company positions. We attempt to manage our credit risk related to life insurance policies typically by purchasing policies issued only from companies with an investment-grade credit rating by either Standard & Poor's, Moody's, or A.M. Best Company. As of June 30, 2017, 96.3% of our life insurance policies, by face value benefits, were issued by companies that maintained an investment-grade rating (BBB or better) by Standard & Poor's.

Interest Rate Risk

Our senior credit facilities are floating-rate financing. In addition, our ability to offer interest and dividend rates that attract capital (including in our continuous offering of L Bonds and RPS 2) is generally impacted by prevailing interest rates. Furthermore, while our L Bond and RPS 2 offerings provide us with fixed-rate debt and equity financing, our debt coverage ratio is calculated in relation to the interest rate of our debt financing. Therefore, fluctuations in interest rates impact our business by increasing our borrowing costs, and reducing availability under our debt financing arrangements. We calculate our portfolio earnings based upon the spread generated between the return on our life insurance portfolio and the total cost of our financing. As a result, increases in interest rates will reduce the earnings we expect to achieve from our investments in life insurance policies.

Non-GAAP Financial Measures

Non-GAAP financial measures disclosed by our management are provided as additional information to investors in order to provide an alternative method for assessing our financial condition and operating results. These non-GAAP financial measures are not in accordance with GAAP and may be different from non-GAAP measures used by other companies, including other companies within our industry. This presentation of non-GAAP financial information is not meant to be considered in isolation or as a substitute for comparable amounts prepared in accordance with GAAP. See our consolidated financial statements and our financial statements contained herein.

We use non-GAAP financial measures for maintaining compliance with covenants contained in our borrowing agreement with Autobahn/DZ Bank and for management's assessment of our financial condition and operating results without regard to GAAP fair value standards. The application of current GAAP fair value standards, especially during a period of significant growth of our portfolio and our company may result in current period GAAP financial results that may not be reflective of our long-term earnings potential or overall financial condition. Management believes that our non-GAAP financial measures permit investors to understand long-term earnings performance without regard to the volatility in GAAP financial results that can and does occur during this stage of our portfolio and company growth.

Therefore, in contrast to a GAAP fair valuation (mark-to-market), we seek to measure the accrual of the actuarial gain occurring within the portfolio of life insurance policies at our expected internal rate of return based on statistical mortality probabilities for the insureds (using primarily the insured's age, sex, health and smoking status). The expected internal rate of return tracks actuarial gain occurring within the policies according to a mortality table as the insureds' age increases. By comparing the actuarial gain accruing within our portfolio of life insurance policies against our adjusted operating costs during the same period, we can estimate, manage and evaluate the overall financial performance of our business without regard to mark-to-market (fair value) volatility. We use this information to balance our life insurance policy purchasing and manage our capital structure, including the issuance of debt and

utilization of our other sources of capital, and to monitor our compliance with borrowing covenants. We believe that these non-GAAP financial measures provide information that is useful for investors to understand period-over-period operating results separate and apart from fair value items that can have a disproportionately positive or negative impact on GAAP results in any particular reporting period.

Our senior credit facility with Autobahn/DZ Bank requires us to maintain a “positive net income” and “tangible net worth,” each of which are calculated on an adjusted non-GAAP basis using the method described below, without regard to GAAP-based fair value measures. In addition, our senior credit facility with Autobahn/DZ Bank requires us to maintain an “excess spread,” which is the difference between (i) the weighted average of our expected internal rate of return of our portfolio of life insurance policies; and (ii) the weighted average of the Autobahn/DZ Bank senior credit facility’s interest rate. These non-GAAP measures (i.e., positive net income, tangible net worth, and an excess spread) are common non-GAAP measures of financial performance and condition in the industry.

In addition, the Indenture governing our L Bonds and the note issuance and security agreement governing our Series I Secured Notes require us to maintain a “debt coverage ratio” designed to ensure that the expected cash flows from our portfolio of life insurance policies is reasonably expected to be able to adequately service our total outstanding indebtedness. This ratio is calculated using non-GAAP measures in the method described below, again without regard to GAAP-based fair value measures.

	As of	As of
Non-GAAP Investment Cost Basis	June 30, 2017	December 31, 2016
GAAP fair value	\$577,050,000	\$511,192,000
Unrealized fair value gain (A)	(293,745,000)	(264,625,000)
Adjusted cost basis increase (B)	281,924,000	248,377,000
Non-GAAP investment cost basis (C)	\$565,229,000	\$494,944,000

(A) This represents the reversal of cumulative unrealized GAAP fair value gain of life insurance policies.

(B) Adjusted cost basis is increased to include interest, premiums and servicing fees that are expensed under GAAP.

(C) This is the non-GAAP cost basis in life insurance policies from which our expected internal rate of return is calculated.

Excess Spread. Management uses the “total excess spread” to gauge expected profitability of our investments. The expected IRR of our portfolio is based upon future cash flow forecasts derived from a probabilistic analysis of our policy benefits received and policy premiums paid in relation to our non-GAAP investment cost basis (“Expected IRR”).

	As of		As of	
	June 30,		December 31,	
	2017		2016	
Expected IRR	11.05	%	11.34	%
Total weighted-average interest rate on indebtedness for borrowed money (1)	7.40	%	7.30	%
Total excess spread (2)	3.65	%	4.04	%

(1) Represents the weighted-average interest rate paid on all interest-bearing indebtedness as of the measurement date, determined as follows:

	As of	
	June 30,	
	2017	
	December 31,	
	2016	
Indebtedness		
Senior credit facilities	\$155,626,000	\$162,725,000
Series I Secured Notes	6,815,000	16,614,000
L Bonds	407,850,000	387,067,000
Total	\$570,291,000	\$566,406,000

Interest Rates on Indebtedness

Senior credit facilities	7.59%	7.34%
Series I Secured Notes	8.72%	8.68%
L Bonds	7.30%	7.23%
Weighted-average interest rates paid on indebtedness	7.40%	7.30%

(2) Calculated as the Expected IRR minus the weighted-average interest rate on interest-bearing indebtedness (1).

Adjusted Non-GAAP Net Income. We calculate our adjusted non-GAAP net income by recognizing the actuarial gain accruing within our life insurance portfolio at the Expected IRR against our adjusted cost basis without regard to fair value. We net this actuarial gain against our adjusted operating costs during the same period to calculate our net income on a non-GAAP basis. Our senior credit facility with Autobahn/DZ Bank requires us to maintain a positive net income calculated on an adjusted non-GAAP basis.

Edgar Filing: GWG Holdings, Inc. - Form 10-Q

	Three Months Ended		Six Months Ended

Adjusted cost basis increase (2)	22,739,000	16,373,000	44,461,000	31,740,000
Accrual of unrealized actuarial gain (3)	7,505,000	7,460,000	12,415,000	13,527,000
Total adjusted non-GAAP net income (loss) (4)	\$7,284,000	\$4,473,000	\$18,119,000	\$15,450,000

(1) Reversal of unrealized GAAP fair value gain of life insurance policies for current period.

(2) Adjusted cost basis is increased to include interest, premiums and servicing fees that are expensed under GAAP.

(3) Accrual of actuarial gain at the Expected IRR.

(4) We must maintain an annual positive consolidated net income, calculated on a non-GAAP basis, to maintain compliance with our senior credit facility with Autobahn/DZ Bank.

Adjusted Non-GAAP Tangible Net Worth. We calculate our adjusted non-GAAP tangible net worth by recognizing the actuarial gain accruing within our life insurance policies at the Expected IRR of the policies we own without regard to fair value. We net this actuarial gain against our costs during the same period to calculate our adjusted tangible net worth on a non-GAAP basis. Our senior credit facility with Autobahn/DZ Bank requires us to maintain a tangible net worth in excess of \$45 million calculated on an adjusted non-GAAP basis.

	As of	As of
	June 30, 2017	December 31, 2016
GAAP net worth	\$ 113,889,000	\$ 67,298,000
Less intangible assets (1)	(21,630,000)	(19,442,000)
GAAP tangible net worth	92,259,000	47,856,000
Unrealized fair value gain (2)	(293,745,000)	(264,625,000)
Adjusted cost basis increase (3)	281,924,000	248,377,000
Accrual of unrealized actuarial gain (4)	145,223,000	132,808,000
Total adjusted non-GAAP tangible net worth	\$ 225,661,000	\$ 164,416,000

(1) Unamortized portion of deferred financing costs and pre-paid insurance.

(2) Reversal of cumulative unrealized GAAP fair value gain on life insurance policies.

(3) Adjusted cost basis is increased to include interest, premiums and servicing fees that are expensed under GAAP.

(4) Accrual of cumulative actuarial gain at the Expected IRR.

Debt Coverage Ratio. Our L Bond and Series I Secured Notes borrowing covenants require us to maintain a debt coverage ratio of less than 90%. The debt coverage ratio is calculated by dividing the sum of our total interest-bearing indebtedness by the sum of our cash, cash equivalents, policy benefits receivable, if any, and the net present value of the life insurance portfolio.

	As of	As of
	June 30, 2017	December 31, 2016
Life insurance portfolio policy benefits (5)	\$ 1,525,363,000	\$ 1,361,675,000
Discount rate of future cash flows	7.40	% 7.30 %
Net present value of life insurance portfolio policy benefits	\$ 686,490,000	\$ 614,908,000
Cash and cash equivalents	98,453,000	121,659,000
Life insurance policy benefits receivable	6,970,000	-
Total Coverage	791,913,000	736,567,000
Senior credit facilities	155,626,000	162,725,000
Series I Secured Notes	6,815,000	16,614,000

Edgar Filing: GWG Holdings, Inc. - Form 10-Q

L Bonds	407,850,000	387,067,000	
Total Indebtedness	\$570,291,000	\$566,406,000	
Debt Coverage Ratio	72.01	% 76.90	%

(5) Weighted-average interest rate paid on indebtedness.

- 40 -

As of June 30, 2017, we were in compliance with the debt coverage ratio.

Expected Portfolio Internal Rate of Return at Purchase. Expected portfolio IRR at purchase is calculated as the weighted average (by face amount of policy benefits) derived from a probabilistic analysis of policy benefits received and policy premiums paid relative to our purchase price for all life insurance policies in the portfolio. This non-GAAP measure isolates our IRR expectation at purchase utilizing our underwriting life expectancy assumptions at that time. This measure does not change with the passage of time as compared to our non-GAAP investment cost basis that increases with the payment of premiums, financing costs, and the effective life expectancy which changes over time, both of which are used to calculate our Expected IRR.

	As of June 30, 2017	As of December 31, 2016		
Life insurance portfolio policy benefits	\$1,525,363,000	\$1,361,675,000		
Total number of policies	793	690		
Non-GAAP Expected Portfolio Internal Rate of Return at Purchase	15.60	%	15.64	%

We have in the past reported non-GAAP net asset value among our other non-GAAP financial measures. We have determined, however, to cease reporting this measure primarily because we do not believe that it is sufficiently additive to our existing non-GAAP measures in aiding users of our financial statements and disclosures to measure and evaluate our financial condition or operating results. Moreover, we are not aware of other reporting companies in our industry that use this measure to evaluate their financial condition or operating results.

Portfolio Information

Our portfolio of life insurance policies, owned by our subsidiaries as of June 30, 2017, is summarized below:

Life Insurance Portfolio Summary

Total portfolio face value of policy benefits	\$1,525,363,000
Average face value per policy	\$1,924,000
Average face value per insured life	\$2,151,000
Average age of insured (yrs.)*	81.5

Edgar Filing: GWG Holdings, Inc. - Form 10-Q

Average life expectancy estimate (yrs.)*	6.9	
Total number of policies	793	
Number of unique lives	709	
Demographics	74% Males; 26% Females	
Number of smokers	30	
Largest policy as % of total portfolio	0.87	%
Average policy as % of total portfolio	0.13	%
Average annual premium as % of face value	3.21	%

* Averages presented in the table are weighted averages.

Our portfolio of life insurance policies, owned by our wholly owned subsidiaries as of June 30, 2017, organized by the insured's current age and the associated number of policies and policy benefits, is summarized below:

- 41 -

Distribution of Policies and Policy Benefits by Current Age of Insured

Min Age	Max Age	Policies	Policy Benefits	Wtd. Avg. Life Expectancy (yrs.)	Percentage of Total Number of Policies Policy Benefits

We track concentrations of pre-existing medical conditions among insured individuals within our portfolio based on information contained in life expectancy reports. We track these medical conditions within the following ten primary categories: (1) cancer, (2) cardiovascular, (3) cerebrovascular, (4) dementia, (5) diabetes, (6) multiple, (7) neurological disorders, (8) no disease, (9) other, and (10) respiratory diseases. Our primary categories are summary generalizations based on the ICD-9 codes we track on each insured individuals within our portfolio. ICD-9 codes, published by the

World Health Organization, are used worldwide for medical diagnoses and treatment systems, as well as morbidity and mortality statistics. Currently, the primary disease categories within our portfolio that represent a concentration of over 10% are multiple, cardiovascular, and other which constitute 27.6%, 19.9%, and 12.4%, respectively, of the face amount of insured benefits of our portfolio as at June 30, 2017.

Portfolio Credit Risk Management

We rely on the payment of policy benefit claims by life insurance companies as our most significant source of cash flows. The life insurance assets we own represent obligations of third-party life insurance companies to pay the benefit amount under the relevant policy upon the mortality of the insured. As a result, we manage this credit risk exposure by generally purchasing policies issued by insurance companies with investment-grade ratings from Standard & Poor manage this credit risk exposure by generally purchasing policies issued.

Approximately 96.3% of life insurance assets in our portfolio were issued by insurance companies with investment-grade credit ratings from Standard & Poor's, as of June 30, 2017. Our largest life insurance company credit exposures and the Standard & Poor's credit rating of their respective financial strength and claims-paying ability is set forth below:

Rank	Policy Benefits	Percentage of Policy Benefit Amount	Insurance Company	Ins. Co. S&P Rating
1	\$215,471,000	14.1	% John Hancock Life Insurance Company (U.S.A.)	AA-
2	\$193,557,000	12.7	% AXA Equitable Life Insurance Company	AA-
3	\$165,580,000	10.9	% Lincoln National Life Insurance Company	AA-
4	\$157,254,000	10.3	% Transamerica Life Insurance Company	AA-
5	\$103,642,000	6.8	% Metropolitan Life Insurance Company	AA-
6	\$62,293,000	4.1	% Massachusetts Mutual Life Insurance Company	AA+
7	\$61,025,000	4.0	% American General Life Insurance Company	A+
8	\$56,422,000	3.7	% Pacific Life Insurance Company	AA-
9	\$47,390,000	3.1	% West Coast Life Insurance Company	AA-
10	\$45,670,000	3.0	% Reliastar Life Insurance Company	A
	1,108,304,000	72.7	%	

The yield to maturity on bonds issued by life insurance carriers reflects, among other things, the credit risk (risk of default) of such insurance carrier. We follow the yields on certain publicly traded life insurance company bonds since this information is part of the data we consider when valuing our portfolio of life insurance policies for our financial statements.

Name of Bond	Maturity	YTM	Duration (Years)	Bond S&P Rating
AXA 1.125%	5/15/2028	1.04 %	10.9	A
Manulife Finl 4.15%	3/4/2026	3.18 %	8.7	A
Lincoln National Corp Ind 3.625%	12/12/2026	3.68 %	9.5	A-
Amer Intl Grp 4.875%	6/1/2022	2.71 %	4.9	BBB+
Protective Life 7.375%	10/15/2019	2.31 %	2.3	A-
Metlife 3.048%	12/15/2022	2.60 %	5.5	A-
Prudential Finl Inc Mtns Book 3.5%	5/15/2024	2.85 %	6.9	A
Average yield on insurance bonds		2.62 %	6.9	

The table above indicates the current yields to maturity (YTM) for the senior bonds of selected life insurance carriers with durations, on average, that are similar to the life expectancy estimates of our life insurance portfolio. As of June 30, 2017, the average yield to maturity of these bonds was 2.62%, which we believe reflects, in part, the financial market's judgment that credit risk is low with regard to these carriers' financial obligations. It should be noted that the obligations of life insurance carriers to pay life insurance policy benefits ranks senior to all of their other financial obligations, such as the bonds they issue. This "super senior" priority is not reflected in the yield to maturity in the table and, if considered, would result in a lower yield to maturity all else being equal. Thus, as long as the respective premium payments have been made, it is highly likely that the owner of the insurance policy will collect the insurance policy benefit upon the mortality of the insured.

Value Proposition. We define the value proposition presented by our portfolio of life insurance assets as our ability to earn superior risk-adjusted returns. At any time, we calculate our returns from our life insurance assets based upon (i) our historical results; and (ii) the future cash flows we expect to realize from our statistical forecasts. To forecast our expected future cash flows, we use the probabilistic method of analysis. The actuarial software we use to produce our expected future cash flows and conduct our probabilistic analysis was developed by the actuarial firm Milliman and is now owned by MAPS. The expected internal rate of return of our portfolio is based upon future cash flow forecasts derived from a probabilistic analysis of our policy benefits received and policy premiums paid in relation to our non-GAAP investment cost basis. As of June 30, 2017, the expected internal rate of return on our portfolio of life insurance assets was 11.05% based on our portfolio benefits of \$1.525 billion and our non-GAAP investment cost basis of \$565.2 million (including purchase price, premiums paid, and financing costs incurred to date).

We seek to further enhance our understanding of our expected future cash flow forecast by applying a stochastic analysis, sometimes referred to as a "Monte Carlo simulation," to provide us with a greater understanding of the

variability of our future cash flow projections. The stochastic analysis we perform is built within the MAPS actuarial software and provides internal rate of return calculations for different statistical confidence intervals. The results of our stochastic analysis, in which we run 10,000 random mortality scenarios, demonstrates that the scenario ranking at the 50th percentile of all 10,000 results generates an internal rate of return of 11.01%, which is near to our Expected IRR of 11.05%. The stochastic analysis results also reveal that our portfolio is expected to generate an internal rate of return of 10.49% or better in 75% of all generated scenarios; and an internal rate of return of 10.04% or better in 90% of all generated scenarios. As the portfolio continues to grow, all else equal, the percentage of observations that result in an internal rate of return at or very near 11.01% (currently our median, or 50th percentile, internal rate of return expectation) is expected to increase, thereby lowering future cash flow volatility and potentially justifying our use of lower discount rates to value our portfolio.

In sum, we believe our statistical analyses show that, if we can continue to grow and maintain our investments in life insurance assets, then, in the absence of significant negative events affecting our most significant risks, including but not limited to longevity and credit risk, and interest rate and financing risk, those investments will provide superior risk-adjusted returns for our company and provide us with the means to generate attractive returns for our investors.

The complete detail of our portfolio of life insurance policies, owned by our wholly owned subsidiaries as of June 30, 2017, organized by the current age of the insured and the associated policy benefits, sex, estimated life expectancy, issuing insurance carrier, and the credit rating of the issuing insurance carrier, is set forth below.

(ALB) Age Last Birthday - the insured's age is current as of the measurement date.

(1) The insured's life expectancy estimate, other than for a small face value insurance policy (i.e., a policy with \$1 million in face value benefits or less), is the average of two life expectancy estimates provided by independent third-party medical-actuarial underwriting firms at the time of purchase, actuarially adjusted through the measurement date. Numbers in this column represent months.

ITEM 4. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in our reports filed pursuant to the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance the objectives of the control system are met.

As of June 30, 2017, our Chief Executive Officer and Chief Financial Officer carried out an evaluation of the effectiveness of our disclosure controls and procedures as such term is defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934, as of the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with management's evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Securities Exchange Act of 1934 during the period covered by this report that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only with proper authorizations; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, under the supervision of and with the participation of the Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of our internal control over financial reporting as of March 31, 2017 based on criteria for effective control over financial reporting set forth by the Committee of Sponsoring Organizations of the Treadway Commission, 2013 framework in “*Internal Control—Integrated Framework.*” Based on this assessment, our management concluded that, as of the evaluation date, we maintained effective internal control over financial reporting.

ITEM 5. OTHER INFORMATION

Life Insurance Secondary Market Update

This quarter we experienced a noticeable increase in activity and interest in the life insurance secondary market across the entire spectrum of market constituents. This increased activity and interest was marked by the National Association of Insurance Commissioners (“NAIC”) policy bulletin issued July 19, 2017 in support of products we provide that the bulletin described as “innovative private market solutions for financing Americans’ long-term care needs.” The NAIC, citing GWG’s August 25, 2016 presentation, discussed how consumers could exchange the market value of their life insurance policies for products designed to fund long-term care expenses. The use of a life insurance policy to generate resources to fund long-term care was pioneered by our Executive Vice President, Chris Orestis. Today, we are the only company in the life insurance industry that provides this innovative product to pay for long-term care expenses.

We have been working to create an innovative product suite for consumers based on the market value of their life insurance policy. To deliver this product suite, we are establishing partnerships with life insurance sales organizations seeking to deliver long-term care “point of need” product solutions. The interest among life insurance sales organizations for the product solutions we provide is strong and appears to be increasing. This recent market experience leads us to believe that the life insurance secondary market may be reaching an important stage in its overall development and growth potential.

We remain committed to developing and delivering an innovative suite of financial products based upon the market value of life insurance. At this time, we believe we are uniquely situated with the strategy, infrastructure and market position necessary to lead the development of a more robust life insurance secondary market. Our focus for the remainder of 2017 will be to continue building a profitable portfolio of life insurance policies; refining the product suite we offer consumers owning life insurance; and partnering with life insurance sales organizations that will ultimately provide us with life insurance policies for evaluation, consideration, and purchase.

M-Panel Technology Update

This quarter we made advances in our wholly owned “insurtech” M-Panel technology division, which we have renamed as Life Epigenetics Inc. This division was founded on the belief that advanced technology can meaningfully improve the accuracy of life expectancy underwriting for our life insurance secondary market policy purchases. We continue to press ahead with the development and use of a commercialized epigenetic test based upon the “DNA Methylation Based Predictor of Mortality” technology we exclusively licensed in May 2017 from the University of California, Los Angeles (UCLA). In the process of refining our understanding of our M-Panel technology, we are now of the belief that our proprietary epigenetic testing has the potential to significantly impact underwriting for the entire life insurance industry. In order to commercialize this technology and fully explore the opportunity within the life insurance industry, we retained insurance innovation expert Tom Nodine to lead this division as our Executive Vice President. Mr. Nodine is now charged with commercializing our proprietary epigenetic technology applications and applying it the entire life insurance industry. As such, our priority has been to firm up our ability to provide scaled epigenetic testing and refine the predictive outputs derived from our proprietary epigenetic tests.

This quarter we strengthened our M-Panel technology by working with top actuarial consultants to analyze our process of translating our “DNA Methylation Based Predictor of Mortality” into individual actuarial mortality profiles. The actuarial consultants reported that the process we developed was “acceptable and consistent with established actuarial principles,” an important confirmation of our strategy. In addition, we identified and are solidifying relationships with key laboratory partners who can support scaled testing for the global life insurance industry. Finally, we refined our life expectancy predictor and made significant progress in adding additional epigenetic biomarkers that are predictive of other key life insurance underwriting parameters. The focus of this division for the remainder of 2017 will be to meet with insurance companies, reinsurance companies, and other potential partners to conduct scaled trials and explore how our M-Panel technology can best serve their global life insurance needs and how we can create the most shareholder value therefrom.
