FORWARD-LOOKING STATEMENTS

In addition to historical information, certain sections of this Form 10-K may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 (the Act), that discuss the Company's beliefs, expectations or intentions or those pertaining to the Company's operations, markets, products, services, price and performance. Forward-looking statements and the success of the Company, generally involve numerous risks and uncertainties such as trends of the economy, including interest rates, income tax laws, governmental regulations, legislation and those risk factors discussed elsewhere in this report and the Company's filings under the Act. The Company cannot guarantee that any forward-looking statement will be accurate, although the Company believes that it has been reasonable in its expectations and assumptions. Forward-looking statements are subject to the risks identified in Issues and Risks and elsewhere in this report. Readers are cautioned not to place undue reliance on forward-looking statements and are advised to review the risks identified in Issues and Risks and elsewhere in this report. The Company has no obligation to update forward-looking statements.

PART I

Item 1 Business

Veramark Technologies, Inc. (the Company or Veramark), was originally incorporated under the name MOSCOM Corporation in New York in January 1983 and reincorporated in Delaware in 1984. The Company's name was changed to Veramark Technologies, Inc. on June 15, 1998.

For over 20 years, Veramark's telemanagement solutions have set the industry standard for technological excellence, application experience, and process expertise. Veramark's completely web-based software architecture integrates communications management software with operation support systems (OSS) software. These solutions include eCAS and VeraSMART Call Accounting, Work Flow Management, Help Desk/Trouble Ticket, Asset Management, Directory/Information Management, Service Inventory Build and Line Verification, Service Analysis and Recommendations, Wireless Optimization and Ongoing Management, Contract Analysis/Negotiations, and Billing Dispute Resolution.

Additionally, Veramark's Telecommunications Expense Management (TEM) solution will not only ensure that you know exactly what telecommunication services you have, where those services are located and what they cost, but will also ensure that you are being invoiced correctly and are only paying for services you need. This will give you the base line of information you need to manage your telecom environment in the most efficient and cost effective manner going forward.

This broad portfolio of products and services allows enterprises to optimize telecom performance, increase productivity, improve enterprise security, and measurably reduce communications expenses. By utilizing industry-standard databases, secure web-browser based user interfaces, and dynamic reporting tools, Veramark's products and services make managing complex communications networks easy and efficient. Veramark's web-based architecture eliminates the need for client software and makes the solutions accessible from every networked PC in the enterprise. In addition to Veramark's premise-based solutions, Veramark offers its customers a robust application service provider (ASP) and Managed Services alternative that is designed to meet all or a portion of the customer's defined needs.

Table of Contents

The company sells and markets its solutions directly and through leveraged distribution channels to customers ranging from the Fortune 500 to small businesses as well as the public sector, including government agencies and the military. Veramark's leadership position is demonstrated by its relationships with telecom's leaders: Avaya[®], Nortel Networks[®], Cisco Systems[®], NEC Unified, AT&T Inc., Sprint[®] and others.

Products and Services

VeraSMART[®]

Our enterprise-level software solution, VeraSMART[®], is a highly modular solution that takes advantage of its totally web-based design to quickly and effectively deliver business-critical information to the people who need it. The modularity of the system allows clients to purchase the modules they need today, while providing an option to expand the system through future purchases as needed.

Released in the second quarter of 2003, VeraSMART 1.0 delivered Directory and Call Accounting. This version was the Company's initial offering for the large enterprise market and effectively harnessed the speed and flexibility of Veramark's totally web-based endeavor architecture. VeraSMART 1.0 provided enterprise clients with unprecedented ability to see and control their telecommunications usage expenses.

The VeraSMART 2.0 software, released in the second quarter of 2004, brought even more ease and power to enterprise cost management. VeraSMART 2.0 featured enhancements to Directory and Call Accounting, as well as introducing three new modules: Allocation, Invoice Management and Online Directory. Each new module was designed to expand the VeraSMART platform beyond management of telecom use, to include the management of telecom assets, infrastructure, fixed costs, and ultimately wireless device costs; presenting a more robust management tool to enterprise customers. The Online Directory solution, a natural extension of the Directory module, allows large enterprise clients to put frequently needed contact information (extension number, cell phone or pager numbers, email and traditional mailing addresses, and more) on the desktop of any network connected user, effectively expanding the application's appeal and more tightly linking it to the day-to-day operations of the enterprise. VeraSMART 2.0 also introduced EZ-Share, Veramark's exclusive data configuration and export solution, which facilitates much tighter integration of VeraSMART into enterprise back-office systems, like general ledgers and enterprise resource management systems.

VeraSMART 3.0 software, released in the first quarter of 2005, provided numerous enhancements to the existing suite of modules and introduced Electronic Billing Format (EBF) which allows customers to electronically import third-party product and service invoices, thereby streamlining the spend management process.

VeraSMART 4.0, released in the third quarter of 2005, added flexible workflow and helpdesk management functionality with the introduction of Work Order and Online Ticket Manager. Work Order allows customers to take control of their work flow management environments by allowing administrators to configure rules which define and enforce corporate policies. Online Ticket Manager reduces administrative overhead by providing an online ticket request mechanism to any network connected user, complete with an up-to-date online ticket status.

Table of Contents

VeraSMART 5.0, generally available since October 2006, is the most recent release of Veramark's enterprise platform. VeraSMART 5.0 introduced the ability to manage, track and optimize both tangible and non-tangible assets through out their life cycle.

Today's VeraSMART consists of these modules:

Directory, the central repository for personnel and organization data. It provides a complete personnel profile that includes location and affiliation to cost centers within the corporate structure. It also provides the tools for system-wide configuration, security, reports, and database/system-wide diagnostic utilities.

Online Directory, which provides quick, customizable desktop access to key contacts and personnel information contained in the Directory module. Corporate users can maintain their own phone listings, which may consist of any company entries plus personal numbers they might wish to add.

Call Accounting provides the ability to control usage-based charges. Call Accounting connects to business telephone systems (PBXs, IP-PBXs, Key Systems, etc.) to collect, store, and rate information on every telephone call made or received.

Allocation, which allows the user to accurately distribute fixed charges on a one-time, recurring and pro-rated basis for equipment, services, and more to any individual or group. Because it has the ability to distribute any charges, it can provide a complete picture of all telecom costs.

Invoice Management, which allows the allocation of outside vendor charges by individual, logical functional group or customized distribution list. The Invoice Management module gives you the power to track and analyze all your communications costs, helping you prevent overpayments, while identifying areas for potential savings. Electronic Billing Format (EBF) gives you the ability to import third-party vendor invoices, saving you valuable time and assuring an unprecedented degree of accuracy.

Work Order provides the user with the ability to gain control of their workflow management environment. Work Order can effectively track issues, work requests, directory updates and support calls and manage OSS process (such as helpdesk, bug tracking, and facilities management) according to highly configurable, easy to use process rules.

Wireless Management provides the ability to generate reports that show actual costs for each wireless device by airtime, roaming, toll charges, surcharges, taxes, and more. It then identifies your carrier's optimum plan for each wireless device, even those in pooled-minute or shared plans.

Asset Management, provides the ability to manage, track and optimize both tangible and non-tangible assets including IP and mobile devices, phones, furniture, computers, SLA's and maintenance agreements through out their life cycle.

Going forward, Veramark plans to continue increasing VeraSMART's value add by adding features and functionality such as invoice payment tracking, contract compliance, and invoice alert notification. Veramark plans on releasing the next version of VeraSMART in 2007. The new

Table of Contents

version will enhance our capabilities in the Telecommunications Expense Management (TEM) area.

eCAS®

Veramark's totally web-based eCAS Call Accounting software system connects to business telephone systems (PBXs, IP-PBXs, Key Systems, etc.) to collect, store, and rate information on every telephone call made or received.

eCAS clients can significantly reduce, through heightened awareness and proactive management, their telecommunications costs. As a result, the cost of an eCAS system can generally be recovered through direct expense reduction in less than one year. In addition, eCAS addresses the problem of theft of telephone service through PBX hacking and employee abuse. Using user-defined criteria, that is generally indicative of fraud/abuse, clients are immediately alerted to potential problems and are able to take corrective action to minimize loss.

In today's business climate, in addition to telecom costs, issues like productivity and security are top concerns. Veramark's eCAS gives small and mid-size businesses (SME) a cost-effective method to measure productivity, improve business security, reduce fraud, and optimize network utilization. By capturing statistical details on every incoming and outgoing call, and delivering that information to the desktop as easy-to-use reports, eCAS delivers essential information to management, while retaining employee privacy, because the actual content of phone conversations is not captured.

Common business drivers for Veramark's eCAS software include:

Improving business security through alarms and reports that identify called parties or incoming calls that can threaten employees or the entire organization (e.g., bomb threats);

Evaluating employee productivity and detecting unauthorized use of company phones for personal calls or 900 numbers;

Traffic analysis used to optimize network performance and better project network capacity requirements, and to determine the best long distance carrier plans based on usage trends;

Detecting fraudulent use of the phone system by hackers.

Producing revenues by reselling phone services to third-parties (e.g., tenants); and

Allocating telephone expense to specific cost centers or clients based on actual use;

In 2006, Veramark released eCAS 4.0. Highlights of the new version included increased call record storage capacity, enhanced graphical reporting, enhanced alert management, new reports, and support for new VoIP switches.

The software is installed on the client's network and is accessed entirely through a standard Internet browser, such as Microsoft Internet Explorer or Netscape Navigator. This architecture allows clients to administer the system from virtually anywhere, without the added cost and inconvenience of additional client software. The system's high-performance reporting engine delivers all reports electronically to the Internet browser or via email, allowing the user to readily view and manipulate the information and apply it for understanding telecommunications cost, usage, security, and productivity trends.

Table of Contents

The eCAS system collects and processes call records from up to 100 different remote locations and can be deployed in business environments that range from 20 to 10,000 extensions. Avaya, their distributors, and resellers sell a private label version of the eCAS system.

Clients running eCAS software with multiple locations have the option to use Veramark's Pollable Storage Unit (PSU). The PSU is a solid-state buffer box that collects call record data from circuit-switched PBXs and Key Systems and stores the data until polled by the call accounting system. Veramark's Service Bureau clients use these devices extensively.

Managed Services Group

For companies that recognize the benefits of managing communications costs, but lack the means or desire to utilize internal staff and equipment to perform it, Veramark's Managed Services team provides completely hosted or partially hosted (e.g., Application Service Provider) solutions. By using its broad portfolio of products and services, Veramark can remotely poll, process, and report on telecommunications activity and data, then provide comprehensive reports and analysis to remote clients in a variety of formats. Managed Services customers can access their data remotely and securely by Internet login, email, fax, or CD-ROM. Clients that opt for Managed Services generally sign multi-year contracts and pay for services monthly based on total call records processed and delivery of other value-added services. Based on the scope of services required, Veramark may elect to utilize third party contractors to provide portions of contracted services.

Professional Services and Maintenance

To varying degrees, all of the Company's products offer an opportunity to provide professional services to customers on a fee basis. These sales typically include installation, implementation, and training services, and often include software customization and data conversion services. Veramark provides software support and maintenance for an annual fee. Software support and maintenance includes post warranty support via telephone or modem as well as new software service pack releases. Annual fees for maintenance range from 15-20% of the original software license fee, depending upon the hours and priority of support and whether a distributor plays an intermediary support role.

Marketing and Sales

Veramark's marketing and sales personnel are located at its headquarters in Pittsford, New York, and 11 other locations throughout the United States.

Veramark has separate marketing and distribution strategies for its enterprise and SME markets. Because of the size and complexity of its enterprise platform, Veramark's marketing and distribution strategy for VeraSMART is focused primarily on direct sales. On the other hand, the strategy for its SME product, eCAS, is founded on building mutually beneficial relationships with companies that have established distribution networks. The nature of these relationships vary, depending on the product and market. Some sell privately labeled, customized products developed and manufactured by Veramark to their defined specifications, while others resell Veramark-labeled products.

A partial listing of companies privately labeling or reselling Veramark products follows:

New Product Development

Software development costs, meeting recoverability tests, are capitalized in accordance with Statement of Financial Accounting Standards No. 86 when technological feasibility has been established for the software. The costs capitalized are amortized on a product-by-product basis over their estimated life, or the ratio of current revenues to current and anticipated revenues from such software, whichever provides the greater amortization. The Company periodically records adjustments to write down certain capitalized costs to their net realizable value.

Backlog

At December 31, 2006, Veramark had a backlog of \$7,296,000, the majority of which is expected to be recognized as revenue during 2007. Backlog as of December 31, 2005 was \$4,502,000.

The Company's policy is to recognize orders only upon receipt of purchase orders.

Table of Contents

Competition

The telecommunications management industry is highly competitive and highly fragmented. The number of domestic suppliers of telemanagement systems for business users is estimated to exceed 100 companies. The vast majority of those are regional firms with limited product lines and limited sales and development resources. Several competitors are established companies that are able to compete with Veramark on a national and international basis.

There are fewer competitors in the market for large-scale telemanagement systems for telephone service providers, although several existing competitors are substantially larger than Veramark and may be able to devote significantly more resources to product development and marketing.

With respect to all of Veramark's products, some competing firms have greater name recognition and more financial, marketing, and technological resources than Veramark. Competition in the industry is based on price, product performance, breadth of product line, and customer service. Veramark believes its products are priced competitively based upon their performance and functionality. We also believe that our services organization effectively and efficiently differentiates Veramark from that of competition. However, Veramark does not strive to be consistently the lowest priced supplier in its markets. Historically, prices for application software have declined rapidly in the face of competition. Increased competition for the Company's software products could adversely affect the Company's sales volume and profits.

Employees

As of February 28, 2007 Veramark employed 94 full-time personnel. Veramark's employees are not represented by any labor unions.

Item 2 Properties

The Company's principal administrative office and manufacturing facility is located in a one-story building in Pittsford, New York. Veramark presently leases approximately 65,000 square feet of the building, of which approximately 8,600 square feet is currently sub-let. The term of the lease expires on October 31, 2007. Pursuant to the terms of that agreement the Company plans to exercise its option to renew the existing lease for an additional three years through October 31, 2010.

Item 3 Legal Proceedings

There are no material pending legal proceedings to which the Company is currently a party or of which any of its property is the subject.

Item 4 Submission of Matters to a Vote of Security Holders

None.

Item 7 Management's Discussion and Analysis of Results of Operations and Financial Condition
Results of Operations

Management's Discussion and Analysis contains statements that are forward-looking. Such statements are identified by the use of words like plans, expects, intends, believes, will, anticipates, estimates and other words having similar meaning in conjunction with, among other things, discussions of future operations, financial performance, the Company's strategy for growth, product development, regulatory approvals, market position and expenditures. Forward-looking statements are based on management's expectations as of the date of this report. The Company cannot guarantee that any forward-looking statement will be accurate, although the Company believes that it has been reasonable in its expectations and assumptions. Forward-looking statements are subject to the risks identified in *Issues and Risks* and elsewhere in this report. Readers are cautioned not to place undue reliance on forward looking statements and are advised to review the risks identified in *Issues and Risks* and elsewhere in this report. The Company has no obligation to update forward-looking statements.

2006 Compared with 2005

Overview

Sales for the fourth quarter ended December 31, 2006 were \$2,721,000 which compared with sales of \$2,902,000 for the same quarter of 2005. Sales for the full year ended December 31, 2006 totaled \$10,361,000 which compared with sales of \$10,859,000 for the year ended December 31, 2005.

Veramark incurred a net loss of \$51,000, or \$0.01 per share, for the quarter ended December 31, 2006. For the same quarter of 2005 we reported a net income of \$266,000, or \$0.03 per diluted share. For the full year ended December 31, 2006 our net loss of \$488,000 or \$0.06 per share, compared with a net income of \$382,000, or \$0.04 per diluted share, for the year ended December 31, 2005.

Order rates experienced during the third and fourth quarters of 2006, particularly for VeraSMART and Managed Services increased significantly from the same periods of 2005. Significant portions of the revenue associated with these orders will be recognized in the first quarter of 2007 and beyond. Orders booked for the first two quarters of 2006 averaged approximately \$2.6 million per quarter. Orders booked for the third quarter increased to approximately \$3.0 million, and orders booked for the fourth quarter of 2006 increased to approximately \$5.4 million.

In December 2006 we announced the award of a contract from a large national retail chain to provide them with Telecommunications Expense Management (TEM) services. The initial term of this contract, which is included in fourth quarter orders, is valued at approximately \$2 million. Pursuant to terms of the contract, we will provide a range of TEM services for a period of eighteen months, at which time the customer has the option to license Veramark software products and provide those services internally. If the customer opts to have Veramark continue to perform the contracted services on their behalf, the contract will be extended an additional eighteen months, increasing the total contract value to approximately \$4 million over the three years.

Table of Contents

In addition to the Managed Service opportunity described above, orders received in the fourth quarter for new VeraSMART systems, combined with upgrades to existing systems, represented the highest level of orders received for VeraSMART products in any quarter since the initial release of the product line. For the full year ended December 31, 2006 orders for VeraSMART products and services increased 42% from the prior year.

In total, orders booked increased 26% from \$10.8 million for 2005, to \$13.6 million for 2006. As a result our backlog of embedded revenues, representing orders and contracts received for which revenue has not yet been recognized, increased to approximately \$7.3 million dollars at December 31, 2006, an increase of 62% from the embedded revenue backlog of approximately \$4.5 million at December 31, 2005.

Sales

Sales of VeraSMART, our enterprise level product suite increased 12% and 8%, respectively for the three and twelve months ended December 31, 2006, as compared with the same three and twelve month periods of 2005. In October of 2006 we announced the release of VeraSMART 5.0, introducing the VeraSMART Asset Management Module, further enhancing our enterprise productivity and resource management solution. The new asset management module is fully integrated with our Work Order/Help Desk, Allocation, and Directory modules allowing customers the ability to manage and optimize any tangible or intangible asset within their organization. With the release of VeraSMART 5.0 we are now able to offer a complete array of facilities management options to our customers.

Included in sales of our enterprise level category of products are the continuing maintenance revenues associated with VeraSMART's predecessor product, Quantum. Support for the Quantum line of products has been in the process of being phased out since April 2003 when new sales of Quantum were suspended with the introduction of VeraSMART. Maintenance revenues in 2006 derived from Quantum declined 63% for the three months ended December 31, 2006 and 41% for the twelve months ended December 31, 2006 from prior year levels. As previously reported, support for the Quantum product will cease in its entirety December 31, 2007.

Sales of eCAS products and services increased 9% and 3%, respectively, for the three and twelve months ended December 31, 2006 as compared with the same three and twelve month periods of 2005. Though we have experienced declines in sales of new licenses for eCAS through our largest distribution channel, Avaya Inc, and their master distributors, these declines have been offset by increased revenues generated from our eCAS maintenance and support activities.

Sales generated from our Managed Services Group (formerly referred to as Service Bureau) increased 13% for the three months ended December 31, 2006 and 9% for the twelve months ended December 31, 2006 from the same periods of 2005. Our Managed Services organization offer a variety of services ranging from full service applications to Application Service Provider (ASP) models, utilizing the same tools and products developed for our premise based offerings. During 2006 we announced two new managed services contracts, both for three year terms, and both with large companies in the beverage industry. Initial revenues associated with those contracts began in the fourth quarter of 2006.

Table of Contents**Cost of Sales**

For the three months ended December 31, 2006 gross margin (defined as sales minus cost of sales) was \$2,202,000 or 81% of sales. For the three months ended December 31, 2005 gross margin was \$2,348,000, also representing 81% of sales. For the year ended December 31, 2006 gross margin was \$8,181,000 or 79% of sales versus \$8,971,000, or 83% of sales for the year ended December 31, 2005.

The lower gross margins for 2006 as compared with 2005 were attributable to higher amortization costs from previously capitalized software development efforts and an increase in costs associated with our managed service operation.

Engineering and Software Development Expenses

Net engineering and software development expenses of \$891,000 for the year ended December 31, 2006 decreased 13% from net engineering and development expenses of \$1,021,000 incurred for the year ended December 31, 2005. Gross expenditures for 2006, before the effects of software capitalization, were slightly below 2005 levels, declining from \$2,197,000 for the year ended December 31, 2005 to \$2,176,000 for the year ended December 31, 2006. The chart below summarizes gross engineering and development expenses, software costs capitalized, the resulting net expenses charged against operations, and amortization expenses recorded and charged to cost of sales for the years ended December 31, 2006 and 2005.

	2006	2005
Gross Expenditures for Engineering and Software Development	\$ 2,176,000	\$ 2,197,000
Less: Software Development Costs Capitalized	(1,285,000)	(1,176,000)
Net Expenditures for Engineering and Software Development	891,000	1,021,000
Plus: Software Development Costs Amortized and Charged to Cost of Sales	936,000	867,000
Total Expense Recognized	\$ 1,827,000	\$ 1,888,000

Selling General and Administrative Expenses

For the year ended December 31, 2006 selling, general and administrative expenses (SG&A) totaled \$7,814,000, an increase of 3% from expenses of \$7,594,000 for the year ended December 31, 2005. The increased SG&A expenses result from staffing additions made to our direct sales force, a process initiated during the first half of 2006, which we felt essential to increasing future sales levels. As a result, selling expenses increased 20% in 2006 over the expenses incurred for 2005, primarily in the form of higher compensation and travel expenses. Offsetting the additional selling expenses were reductions in expenses recorded for marketing, administration, and support functions.

Table of Contents

2005 Compared with 2004

Overview

Veramark's sales for the fourth quarter ended December 31, 2005 of \$2,902,000 represented an increase of 9% from the sales achieved for the third quarter of 2005. Sales for the fourth quarter of 2004 were \$3,013,000. For the twelve months ended December 31, 2005 sales of \$10,859,000 compared with sales of \$11,036,000 for the twelve months ended December 31, 2004.

For the fourth quarter ended December 31, 2005 our net income of \$266,000, or \$0.03 per diluted share compared with a net income of \$416,000, or \$0.04 per diluted share for the same quarter of 2004. For the twelve months ended December 31, 2005, net income of \$382,000 or \$0.04 per diluted share, represents an improvement of \$496,000 from the net loss of \$114,000, or \$0.01 per share, incurred for the twelve months ended December 31, 2004.

During 2005 we realized an increase in orders booked for each fiscal quarter, with orders increasing from approximately \$2.3 million for the first quarter of the year to over \$2.9 million for the fourth quarter of 2005. The steady growth in orders was primarily attributable to new orders for VeraSMART, our enterprise level platform, which we have continued to expand in terms of features and functionality since its inception in 2003. In late September of 2005 we announced the release of VeraSMART 4.0. This latest version of VeraSMART introduced SMART Work Order, a module that provides flexible workflow and helpdesk management tools to the overall platform. With this release, VeraSMART now encompasses integrated modules for Help Desk/Trouble Ticket, Work order, Directory, Allocation, Call Accounting, Invoice Management, Wireless Management and On-Line Directory. The continued expansion of the capabilities of VeraSMART is integral to the success of our strategy to address business opportunities and provide network and work flow solutions to customers beyond the telemanagement applications on which the Company had traditionally been focused for much of its history.

In addition to the quarterly increases in orders booked for 2005 our balance sheet was significantly strengthened by the generation of positive cash flows throughout the year. From a total cash and investment position of \$978,000 at March 31 of this year, we were able to increase total cash and investments to \$1,081,000 at June 30, \$1,257,000 at September 30 and to \$1,512,000 at December 31. This increase in cash and investment position was achieved through careful monitoring of operating expenses and staffing levels. For the full year ended December 31 2005, total gross operating expenses of \$9,791,000 were 8% lower than operating expenses incurred for the year ended December 31, 2004 of \$10,670,000.

During 2005 we capitalized \$1,176,000 of software development costs associated with versions 3.0 and 4.0 of VeraSMART, down from \$1,279,000 of software capitalization during 2004. The development of version 5.0 of VeraSMART, which will introduce a state-of-the-art Inventory and Assets module, is currently in development with product launch expected late in the second quarter of 2006.

Sales

Sales of VeraSMART increased 43% for the year ended December 31, 2005 as compared with prior year results, accounting for 22% and 18% of total sales for the three and twelve months ended December 31, 2005 respectively. Additionally Veramark continues to earn revenue from

Table of Contents

VeraSMART S predecessor product, The Quantum Series, primarily in the form of maintenance contracts. Though maintenance revenues derived from Quantum are declining as sales of that product were discontinued in 2003, new sales of VeraSMART product and services are providing growth to the overall sales of enterprise level products. For the year ended December 31, 2005 total enterprise revenues increased 13% from 2004 results accounting for 36% of total 2005 revenue, up from 31% of total revenues for 2004.

Sales of the Company s core telemanagement product, eCAS, decreased 3% for the twelve months ended December 31, 2005 as compared with the twelve months ended December 31, 2004. eCAS continues to be sold primarily on a direct basis to Avaya Inc, or through Avaya s master distributor channels. For the year ended December 31, 2005 direct sales to Avaya decreased 17% from 2004 levels and sales to Avaya s master distributor channels decreased 2%. We continue our efforts to expand sales of eCAS through alternative channels of distribution, and though experiencing some success, those newer channels have not as yet provided sufficient sales volumes to make up for the shortfall. In total, sales of eCAS products and services were 3% lower than a year ago and accounted for 59% of total revenues for 2005 versus 60% of total revenues for 2004.

Veramark also offers an Outsourced Solutions Group for companies that recognize the benefits of better managing their telecommunication and network management needs but lack either the means or desire to utilize internal staff or equipment to perform the function. Veramark s Outsourcing Group provides completely hosted or partially hosted solutions. Revenues derived from the outsourced solutions group decreased 21% in 2005 as compared with 2004 results due to the loss of a major client through its acquisition early in the year. Despite the reduced revenues in 2005 the Company views the providing of outsourced solutions as a major growth area for the future. In the last four months of 2005 we began providing outsourced services to new two clients, including SONY Corporation of America, which signed an initial three year agreement under which Veramark will manage their call accounting, allocation, invoice management , on-line directory and work order requirements.

Cost of Sales

For the quarter ended December 31, 2005 our gross margin (defined as sales minus cost of sales) was \$2,348,000 representing 81% of sales. For the fourth quarter of 2004 gross margin totaled \$2,592,000, or 86% of sales. For the twelve months ended December 31, 2005 and 2004 gross margins were \$8,971,000 and \$9,272,000 representing 83% and 84% of sales respectively. The decrease in gross margin earned as a percentage of sales for both the three and twelve months ended December 31, 2005 as compared with the same periods of 2004 is primarily attributable to an increase in the amortization expense associated with software development costs capitalized in prior periods. Amortization costs of \$263,000 for the fourth quarter of 2005 were 59% higher than those incurred for the fourth quarter of 2004 and amortization costs of \$867,000 for the year ended December 31, 2005 were 50 % higher than the previous year.

Table of Contents**Engineering and Software Development Expenses**

Net engineering and software development expenses of \$1,021,000 for the year ended December 31, 2005 decreased 28% from the net engineering and software development expenses of \$1,415,000 for the year ended December 31, 2004. Gross expenses, prior to the effects of software capitalization decreased as well, from \$2,694,000 for the year ended December 31, 2004 to \$2,197,000 for the year ended December 31, 2005, a reduction of 18%. The table below summarizes our engineering and software development efforts for the years ended December 31, 2005 and 2004 in terms of gross expenses incurred, costs capitalized, the resulting net engineering and software development expenses, and costs amortized and charged to cost of sales.

	2005	2004
Gross Expenditures for Engineering and Software Development	\$ 2,197,000	\$ 2,694,000
Less: Software Development Costs Capitalized	(1,176,000)	(1,279,000)
Net Expenditures for Engineering and Software Development	1,021,000	1,415,000
Plus: Software Development Costs Amortized and Charged to Cost of Sales	867,000	578,000
Total Expense Recognized	\$ 1,888,000	\$ 1,993,000

The reductions in expense, both on a gross and net of capitalization basis reflect lower staffing levels required in 2005 as opposed to 2004. For 2005 average employment in the engineering and software development group totaled 21 employees versus an average of 27 employees for 2004 resulting in reductions to both salary and benefit expenses.

Selling, General, and Administrative Expenses

For the year ended December 31, 2005 selling, general and administrative expenses of \$7,594,000 decreased 5% from expenses of \$7,976,000 for the year ended December 31, 2004. Our selling, general and administrative expenses are separated into four separate functions. Those four functions and a comparison of 2005 and 2004 expenses levels are as follows.

	2005	2004
Marketing and Product Management	\$ 709,000	\$ 903,000
Direct Sales	2,321,000	2,422,000
Sales Support and Service	1,825,000	2,316,000
Corporate Administration	2,739,000	2,335,000
	\$ 7,594,000	\$ 7,976,000

The decrease in expenses associated with marketing, direct sales and support and service, as was the case with engineering and software development costs, is attributable to reductions in staffing levels during 2005 versus 2004. Much of the opportunity to reduce staffing levels reflects the diminished

Table of Contents

level of resources required to support the Quantum Series, VeraSMART's predecessor product, as former Quantum customers have been successfully transitioned to the VeraSMART platform which requires significantly lower levels of support and maintenance resources.

The company expects that expenditures for selling and marketing costs will increase during 2006 as we are currently in the process of recruiting additional staff for those particular functions.

The increase in Administrative expense for 2005 over 2004 reflect higher costs for professional fees and services, legal and accounting costs, and business insurance coverages.

Liquidity and Capital Resources

As of December 31, 2006 Veramark's total cash position, consisting of cash in the bank and short term investments totaled \$1,695,000 up 12% from the December 31, 2005 balance of \$1,512,000. Cash balances have remained stable throughout 2006 as we continue to carefully monitor operating expenses levels and capital spending.

Accounts receivable at December 31, 2006 of \$1,444,000 are slightly below the December 2005 accounts receivable balance of \$1,522,000 due to the lower sales volume for the fourth quarter of 2006 as compared with the fourth quarter of 2005. The reserve for bad debts at December 31, 2006 is \$30,000 versus \$32,000 at the end of 2005. We encountered no significant collection problems in 2006 with total write-offs totaling approximately \$1,000.

Prepaid expenses of \$262,000 at December 31, 2006 are \$101,000 higher than prepaid expenses of \$161,000 at December 31, 2005. The increase represents payments to a third party service provider for work to be completed in the first quarter of 2007 in conjunction with the Managed Service TEM contract referred to earlier, and an increase in prepaid commission for orders received in 2006.

The net value of property and equipment at December 31, 2006 totals \$669,000, as compared with \$771,000 at December 31, 2005. New capital purchases for 2006 totaled \$160,000 and disposals of obsolete equipment amounted to \$52,000, all of which had been fully depreciated. Depreciation expense for 2006 was \$261,000.

Capitalized software development costs of \$3,175,000 at the end of 2006 increased 12% from the prior year balance of \$2,827,000. During 2006 we capitalized \$1,285,000 of software development costs, up from \$1,176,000 in 2005.

Previously capitalized development costs amortized in 2006 totaled \$936,000 versus \$867,000 in 2005.

As of December 31, 2006 pension assets, which consist of the cash surrender values of Company-owned life insurance policies designed to fund the company's future pension obligations, were \$2,866,000, an increase of 15% from the December 31, 2005 balance of \$2,502,000. These cash surrender values are available to fund our current operations should that be deemed necessary. Management currently has no plans to access these funds for operational purposes.

Total current liabilities at December 31, 2006 of \$4,834,000, compare with total current liabilities of \$4,073,000 at December 31, 2005. Of the total \$761,000 increase, \$381,000 is attributable to an increase in deferred revenues, which essentially represent backlog to the Company. Deferred revenues which total \$3,317,000 at December 31, 2006 versus \$2,936,000 at the end of 2005, represent the value of after sale services for which the company has billed customers, but for which it has not yet performed the service, and therefore not recorded the associated revenues. These

Table of Contents

services typically include maintenance and support, installation, training, and implementation services. Deferred revenues are accounted for in the current liability section of the Company's balance sheet in order to recognize the existence of a future obligation. However, no outflow of working capital, beyond the normal operating costs required to provide those obligations will be necessary.

Other accrued liabilities increased \$188,000 from the December 31, 2005 balance of \$135,000 to \$323,000 at December 31, 2006. The increase includes a \$170,000 deposit from a single customer for a VeraSMART installation that we anticipate will occur in the second quarter of 2007.

As of December 31, 2006 the net present value of the company's pension obligation was \$5,292,000. As December 31, 2005 the net present value of the pension obligation totaled \$4,424,000. The company carries a series of company-owned life insurance policies, the death benefits of which are intended to cover future pension obligations. The accumulated death benefits attached to those policies is \$10.2 million at December 31, 2006.

Total Stockholders Equity of \$1,003,000 at December 31, 2006 compares with a total \$1,786,000 at December 31, 2005, the decrease reflecting the net loss for 2006 of \$488,000 and a reclassification of approximately \$349,000 required to initially apply FASB No. 158, Employers accounting for Defined Benefit Pension and Other Postretirement Plans. Statement 158 required the reclassification of unrecognized prior service costs and any unrealized gain or loss on the pension obligation to the stockholders equity section.

In light of our current cash flows, the access to cash surrender values of company-owned life insurance, current operating expenses levels, and the absence of debt, it is management's opinion that sufficient liquidity is available to fund operations and development schedules for the next twelve months and beyond.

Off Balance Sheet Arrangements

Pension Obligations The Company sponsors a non-qualified, unfunded, Supplemental Executive Retirement Plan (SERP), which provides certain key employees with a defined pension benefit. The Company believes that the SERP is an important part of its compensation package, necessary for the recruitment and retention of qualified employees.

The SERP is not encumbered by the coverage and benefit restrictions imposed on qualified plans by the IRS. In addition, the Company generally is not required to comply with non-discrimination rules imposed on qualified plans under ERISA.

Unfunded means that the Company has not set aside any particular assets to satisfy its SERP liabilities. Accordingly any assets the Company may have available to satisfy SERP liabilities are subject to claims by the Company's creditors.

Recovery of 100% of projected SERP costs is designed through a program of Company-owned life insurance (COLI). Recovery for the imputed time value of the money, plus all costs associated with the COLI premium payments, and benefit obligations, are included in this program. The Company currently owns 14 separate life insurance contracts on selected current and former employees, not all of who will ultimately qualify for participation in the plan. The cumulative death

Table of Contents

benefit attached to these policies is \$10.2 million and is not included in the Company's Consolidated Balance Sheet as of December 31, 2006.

The cash surrender values of these policies at December 31, 2006 totaled approximately \$2,866,000 and are included in the Company's consolidated balance sheets under the caption of Pension Assets.

The projected future pension benefits expected to be paid under this plan are as follows, assuming retirement at 65 and a life expectancy of 80 years for all participants:

Year Ending December 31,	
2007	\$ 195,767
2008	447,692
2009	496,906
2010	496,906
2011	466,772
2012-2016	2,714,535

The net present value of these projected pension obligations at December 31, 2006, totals \$5,291,798, and is included in the current and long-term liability sections of the Company's consolidated balance sheets.

Lease Obligations The Company leases current office facilities and certain equipment under operating leases, which expire at various dates through 2008. Rent expense under all operating leases (exclusive of real estate taxes and other expenses payable under the leases) was approximately \$373,000, \$409,000, and \$470,000 for the years ended December 31, 2006, 2005 and 2004, respectively.

Minimum lease payments as of December 31, 2006 under operating leases are as follows:

Year Ending December 31,		Operating
	2007	Leases
	2008	\$ 361,895
		693
		\$ 362,588

The current term of the Company's lease on its facility expire October 31, 2007. Under the terms of that agreement the Company plans to exercise the option of renewing the existing lease for an additional three years through October 31, 2010.

Purchase Commitments The Company has no purchase commitment contracts in place as of December 31, 2006.

Table of Contents

Critical Accounting Policies

The preparation of financial statements requires management to make estimates and assumptions that affect amounts reported therein. The most significant of these involving difficult or complex judgments in 2006 include:

Revenue recognition

Capitalization of software development costs

Allowance for Doubtful Accounts

Pension liability

In each situation, management is required to make estimates about the effects of matters or future events that are inherently uncertain.

The Company's revenue consists of revenues from the licensing of software to resellers and end user customers; fees for services rendered to include installation, training, implementation, and customer maintenance contracts; and the outsourcing or hosting of services.

The Company recognizes software license revenue under Statement of Position No 97-2 Software Revenue Recognition as amended by Statement of Position No. 98-9, Software Revenue Recognition With Respect to Certain Transactions, Emerging Issues Task Force 00-21, Revenue Arrangements with Multiple Deliverables, and related interpretations.

Sales of licensed software sold directly to an end user customer are recognized as revenue upon delivery and installation of the software at the customer site. Sales of licensed software to a reseller are recognized as revenue when delivery is made to the reseller. Regardless of the form of sale no revenue is recognized without persuasive evidence of an arrangement existing. Persuasive evidence is determined to be a signed purchase order received from the customer or an equivalent form for those customers lacking a formalized purchase order system. In the case of VeraSMART sales, a software license agreement signed by both parties is often required in addition to a purchase order or equivalent. Additionally, revenue is only recognized when a selling price is fixed or determinable and collectibility of the receivable is deemed to be probable.

Service revenues such as training, installation and implementation are recognized when the service is complete and acknowledged by the customer, regardless as to whether the sale is on a direct basis or through a reseller arrangement.

Fees charged to customers for post-contract Customer Support are recognized ratably over the term of the contract. Costs related to maintenance obligations are expensed as incurred.

Sales which constitute a multiple-element arrangement are accounted for by determining if the elements can be accounted for as separate accounting units, and if so, by applying values to those units for which there is vendor specific objective evidence of their fair value. We use the residual method to apply any remaining balance to the remaining elements of the arrangement. More specifically, this methodology applies when there is embedded maintenance (post-contract customer support) involved in the sale of a software license, or when the sale of a software license is made in conjunction with installation services. In the latter case, the recognition of the software license is deferred until installation is completed.

The Company's revenues generated through hosting solutions are recognized using the proportional performance method. Revenues are recognized in the month services are rendered and earned under service agreements with clients where service fees are fixed or determinable.

Table of Contents

Contracts can be terminated with 90 days written notice. All services provided by us through the date of cancellation are due and payable under the contract terms.

The Company believes its revenue recognition policies are appropriate, in all circumstances, and that its policies are reflective of complexities arising from customer arrangements involving such features as maintenance, warranty agreements, license agreements, and other normal course of business arrangements.

As set forth in Note 1, the Company capitalizes software development costs when technological feasibility has been established for the software in accordance with SFAS No. 86, Accounting for the Costs of Computer Software to be Sold, Leased, or Otherwise Marketed. Such capitalized costs are amortized on a product-by-product basis over their economic life or the ratio of current revenues to current and anticipated revenues from such software, whichever provides the greater amortization. The Company periodically reviews the carrying value of capitalized software development costs and impairments are recognized in the results of operations when the expected future undiscounted operating cash flow derived from the capitalized software is less than its carrying value. Should the Company inaccurately determine when a product reaches technological feasibility or the economic life of a product, results could differ materially from those reported. Veramark uses what it believes are reasonable assumptions and where applicable, established valuation techniques in making its estimates.

The Company maintains allowances for doubtful accounts for estimated losses resulting from the potential inability of its customers to make required payments. Management specifically analyzes accounts receivable, historical bad debts, credit concentrations and customer payment terms when evaluating the adequacy of the allowance for doubtful accounts.

As set forth in *Note 7 Benefit Plans*, the Company sponsors an unfunded Supplemental Executive Retirement Program (SERP), which is a nonqualified plan that provides certain key employees a defined pension benefit. In order to properly record the net present value of future pension obligations a number of assumptions are required to be made by Company's management. These assumptions include years of service, life expectancies, and projected future salary increases for each participant. In addition, management must make assumptions with regard to the proper long-term interest and liability discount rates to be applied to these future obligations.

Should the Company need to alter any of these assumptions, there is the potential for significant adjustments to future projected pension liabilities.

Table of Contents

Accounting Pronouncements

- 1) In December 2004, the FASB issued SFAS 123[®], *Share-Based Payment*, which established standards for transactions in which an entity exchanges its equity instruments for goods or services. This standard requires an issuer to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award and the recording of such expense in the consolidated financial statements. This eliminated the exception to account for such awards using the intrinsic value method previously allowable under Accounting Principles Board (APB) Opinion No. 25. Pro forma disclosure of fair value recognition will no longer be an alternative. In addition, the adoption of SFAS No. 123[®] required additional accounting related to the income tax effects and disclosure regarding the cash flow effects resulting from share-based payment arrangements.

SFAS 123[®] permits public companies to adopt its requirements using one of two methods:

Modified prospective method: Compensation cost is recognized beginning with the effective date of adoption

(a) based on the requirements of SFAS No. 123[®] for all share-based payments granted after the effective date of adoption and (b) based on the requirements of SFAS 123 for all awards granted to employees prior to the effective date of adoption that remain unvested on the date of adoption.

Modified retrospective method: Includes the requirements of the modified prospective method described above, but also permits restatement using amounts previously disclosed under the pro forma provisions of SFAS No. 123 either for (a) all periods presented or (b) prior interim periods of the year of adoption. In March 2005, the SEC released Staff Accounting Bulletin (SAB) 107, *Share-Based Payment*, which expresses views of the SEC Staff about the application of SFAS No. 123[®]. In April 2005, the SEC issued a rule that SFAS No. 123[®] will be effective for annual reporting periods beginning on or after June 15, 2005.

SFAS 123[®] became effective for our first quarter of fiscal 2006 and we opted to utilize the modified prospective method. We have selected the Black-Scholes option-pricing model as the most appropriate fair-value method for our awards and have recognized compensation costs on a straight-line basis over our awards vesting periods. Although the adoption of SFAS No. 123[®] had no adverse impact on our balance sheet or total cash flows, it adversely affected our net income and earnings per share for 2006 by approximately \$30,000. The actual effects of SFAS No. 123[®] depend on numerous factors including the amounts of share-based payments granted in the future, our stock price volatility, estimated forfeiture rates and employee stock option exercise behavior. See Note 1 for the effect on reported net income and earnings per share if we had accounted for our stock option plan using the fair value method in 2005 and 2004.

- 2) In December 2004, FASB issued SFAS 153, *Exchanges of Nonmonetary Assets* an amendment to APB Opinion No. 29. This statement amends APB 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of

Table of Contents

the entity are expected to change significantly as a result of the exchange. Adoption of this statement did not have a material impact on our results of operations or financial condition.

- 3) In May 2005, the FASB issued SFAS No. 154, *Accounting Changes and Error Corrections* a replacement of APB Opinion No. 20 and FASB Statement No. 3 (SFAS 154). SFAS 154 changes the requirements for the accounting for and reporting of a change in accounting principle. These requirements apply to all voluntary changes and changes required by an accounting pronouncement in the unusual instance that the pronouncement does not include specific transition provisions. SFAS 154 is effective for fiscal years beginning after December 15, 2005. As such, the Company was required to adopt these provisions at the beginning of the fiscal year ended December 31, 2006. Adoption of SFAS 154 did not have to have a significant impact on the Company's financial statements.
- 4) In June 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes-an Interpretation of FASB Statement NO. 109*. This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. Fin 48 is effective for fiscal years beginning after December 15, 2006. As such, the Company is required to adopt these provisions at the beginning of the fiscal year ended December 31, 2007. The Company is currently evaluating the impact of adopting Fin 48 on its financial statements, but does not expect adoption to have a significant effect.
- 5) In September 2006, SEC Staff Accounting Bulletin No. 108 (SAB 108) was issued to provide guidance on Quantifying Financial Statement Misstatements. SAB 108 addresses how the effects of prior-year uncorrected misstatements should be considered when quantifying misstatements in current-year financial statements. The SAB 108 requires registrants to quantify misstatements using both the balance sheet and income statement approaches and to evaluate whether either approach results in quantifying an error that is material in light of relevant quantitative and qualitative factors. When the effect of initial adoption is determined to be material, the SAB 108 allows registrants to record that effect as a cumulative-effect to beginning-of-year retained earnings. SAB 108 is effective for fiscal years ending after November 15, 2006 and early application is encouraged for any interim period of the first fiscal year ending after that date. The Company will adopt SAB 108 in January, 2007 and is currently evaluating the impact of adopting SAB 108 on its financial statements, but does not expect adoption to have a significant effect.

Issues and Risks

The following factors, among others discussed herein and in the Company's filings under the Act, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: economic, competitive, governmental and technological factors, increased operating costs, failure to obtain necessary outside financing, risks related to natural disasters and financial market fluctuations. Such factors also include:

Table of Contents

Intellectual Property Rights

Veramark regards its software as proprietary and attempts to protect it with a combination of copyright, trademark and trade secret protections, employee and third-party non-disclosure agreements and other methods of protection. Despite those precautions, it may be possible for unauthorized third parties to copy certain portions of Veramark's products, reverse engineer or obtain and use information that Veramark regards as proprietary. The laws of some foreign countries do not protect Veramark's proprietary rights to the same extent as the laws of the United States. Any misappropriation of Veramark's intellectual property could have a material adverse effect on its business and results of operations. Furthermore, although Veramark takes steps to prevent unlawful infringement of other's intellectual property, there can be no assurance that third parties will not assert infringement claims against Veramark in the future with respect to current or future products. Any such assertion could require Veramark to enter into royalty arrangements or result in costly litigation.

New Products and Services

Veramark has made significant investments in research, development and marketing for new products, services and technologies, including the VeraSMART® software offering and its service bureau outsourced solutions. Significant revenue from new product and service investments may not be achieved for a number of years, if at all. Moreover, if such products or services are profitable, operating margins may not be as high as the margins historically experienced by Veramark.

Declines in Demand for Software

If overall market demand for software and computer devices generally, as well as call accounting software or enterprise level products specifically, declines, or corporate spending for such products declines, Veramark's revenue will be adversely affected. Additionally, Veramark's revenues would be unfavorably impacted if customers reduce their purchases of new software products or upgrades to existing products.

Product Development Schedule

The development of software products is a complex and time-consuming process. New products and enhancements to existing products can require long development and testing periods. Significant delays in new product releases or significant problems in creating new products, particularly any delays in future releases of the VeraSMART® suite of products, could adversely affect Veramark revenues.

Competition

Veramark experiences intensive competition across all markets for its products and services. Some competing firms have greater name recognition and more financial, marketing and technological resources than Veramark. These competitive pressures may result in decreased sales volumes, price reductions, and/or increased operating costs, such as for marketing and sales incentives, resulting in lower revenues, gross margins and operating income.

Marketing and Sales

Veramark's marketing and distribution strategy is founded on building mutually beneficial relationships with companies that have established distribution networks. Some sell privately labeled, customized products developed and manufactured by Veramark to their specific specifications, while others resell Veramark's products. Any loss of the continued availability of those relationships could have a material adverse effect on

Veramark's business and results of operations.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors
and Stockholders

Veramark Technologies, Inc.
Pittsford, New York

We have audited the accompanying balance sheets of Veramark Technologies, Inc. as of December 31, 2006 and 2005, and the related statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Veramark Technologies, Inc. as of December 31, 2006 and 2005, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

VERAMARK TECHNOLOGIES, INC.
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2006, 2005 AND 2004

1. DESCRIPTION OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of business Veramark Technologies, Inc., (the Company) designs and produces communications management and operation support software for users and providers of telecommunication services in the global market. The Company operates in one segment.

Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents The Company considers all highly liquid investments purchased with a maturity of three months or less to be cash equivalents. The fair value of the Company's cash and cash equivalents approximates carrying value, which, due to the relatively short maturities and variable interest rates of the instruments, approximates current market rates.

Investments The Company records its investments in accordance with Statement of Financial Account Standards (SFAS) No. 115, Accounting for Certain Investments in Certain Debt and Equity Securities. As of December 31, 2006 and 2005, the Company has classified its portfolio as available-for-sale securities. These securities are recorded at fair value, based on quoted market prices in an active market, with net unrealized holding gains and losses reported in stockholders' equity as accumulated other comprehensive income. At December 31, 2006 and 2005 the carrying value of investments approximated fair market value.

Investments at December 31, 2006 and 2005 consisted of the following:

	2006	2005
Bond Funds	\$ 242,996	\$ 340,092
US Government Securities	606,659	260,232
	\$ 849,655	\$ 600,324

The contractual maturities of the Company's investments as of December 31, 2006 are primarily due within one year.

Accounts receivable and allowance for doubtful accounts The Company extends credit to its customers in the normal course of business and collateral is generally not required for trade receivables. Exposure to credit risk is controlled through the use of credit approvals, credit limits and monitoring procedures. Accounts receivable are reported net of an allowance for doubtful accounts. The Company estimates the allowance based on its analysis of specific balances, taking into consideration the age of the past due account and anticipated collections resulting from legal issues. An account is considered past due after thirty (30) days from the invoice date. Based on these factors, there was an allowance for doubtful

Table of Contents

accounts of \$30,000 and \$32,000 at December 31, 2006 and 2005, respectively. Changes to the allowance for doubtful accounts are charged to expense and reduced by charge-offs, net of recoveries.

Concentrations of credit risk Financial instruments, which potentially subject the Company to concentration of credit risk, consist principally of investments and accounts receivable. The Company places its cash and investments with quality financial institutions and, by policy, limits the amount of investment exposure to any one financial institution. The Company has not experienced any losses to date on its invested cash and investments.

The Company's customers are not concentrated in any specific geographic region, nor in any specific industry. As of December 31, 2006, one customer accounted for approximately \$346,000 of the total accounts receivable balance. As of December 31, 2005, two customers accounted for approximately \$521,000 of the total accounts receivable balance. The Company performs ongoing credit evaluations of its customers' financial conditions but does not require collateral to support customer receivables. The Company establishes an allowance for doubtful accounts based upon factors surrounding the credit risk of specific customers, historical trends and other information. Such losses to date have been within management's expectations.

The Company maintains cash deposits with major banks, which may from time to time exceed federally insured limits. The Company periodically assesses the financial condition of the institutions and believes that the risk of any loss is minimal.

Inventories are stated at the lower of cost (first-in, first-out) or market. The Company evaluates the net realizable value of inventory on hand considering deterioration, obsolescence, replacement costs and other pertinent factors, and records adjustments as necessary.

Prepaid Expenses consist of cash outlays made by the Company for economic benefits to be realized in future periods. These benefits typically include the unutilized portions of current business insurances and maintenance contracts on Company-owned equipment. Prepaid expenses are generally expensed on a straight-line basis over the corresponding life of the underlying asset, with the exception of prepaid commissions which are expensed at the time the revenue that gave rise to the commission is recognized.

Property and equipment is recorded at cost and depreciated on a straight-line basis using the following useful lives:

Computer hardware and software	3-5 years
Machinery and equipment	4-7 years
Furniture and fixtures	5-10 years
Leasehold improvements	Term of lease or useful life

All maintenance and repair costs are charged to operations as incurred. The cost and accumulated depreciation for property and equipment sold, retired, or otherwise disposed of are removed from the accounts, and the resulting gains or losses are reflected in earnings.

Long-lived assets In accordance with Statement of Financial Accounting Standards (SFAS) No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets, the Company tests long-lived assets for recoverability whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. No impairment charges were recorded in 2006, 2005, or 2004.

Table of Contents

Software development costs meeting recoverability tests are capitalized, under SFAS No. 86, Accounting for the Costs of Computer Software to be Sold, Leased, or Otherwise Marketed, and amortized on a product-by-product basis over their economic life, ranging from three to five years, or the ratio of current revenues to current and anticipated revenues from such software, whichever provides the greater amortization in a particular period. The Company capitalized \$1,285,233 of development costs in 2006, \$1,175,281 of development costs in 2005 and \$1,278,900 of development costs in 2004. The Company amortized \$936,492 of development costs in 2006, and \$867,119 of development costs in 2005 and \$577,856 of development costs in 2004. The Company periodically reviews the carrying value of capitalized software development costs and impairments are recognized in the results of operations when the expected future undiscounted operating cash flow derived from the capitalized software is less than its carrying value. No charges for impairment were required in 2006, 2005 or 2004.

Fair Value of Financial Instruments Statement of Financial Accounting Standards (SFAS) No. 107, Disclosure About Fair Value of Financial Instruments, requires entities to disclose the fair value of financial instruments, both assets and liabilities recognized and not recognized on the balance sheet, for which it is practicable to estimate fair value. SFAS No. 107 defines fair value of a financial instrument as the amount at which the instrument could be exchanged in a current transaction between willing parties. At December 31, 2006 and 2005, the carrying value of certain financial instruments (accounts receivable, accounts payable, and current portion of capital lease obligations) approximates fair value due to the short-term nature of the instruments or interest rates, which are comparable with current rates. At December 31, 2006 and 2005, the Company has no long-term debt.

Revenue recognition The Company's revenue consists of revenues from the licensing of software to resellers and end user customers; fees for services rendered to include installation, training, implementation, and customer maintenance contracts; and the outsourcing or hosting of services.

The Company recognizes software license revenue under Statement of Position No 97-2 Software Revenue Recognition as amended by Statement of Position No. 98-9, Software Revenue Recognition With Respect to Certain Transactions, Emerging Issues Task Force 00-21, Revenue Arrangements with Multiple Deliverables, and related interpretations.

Sales of licensed software sold directly to an end user customer are recognized as revenue upon delivery and installation of the software at the customer site. Sales of licensed software to a reseller are recognized as revenue when delivery is made to the reseller. Regardless of the form of sale no revenue is recognized without persuasive evidence of an arrangement existing. Persuasive evidence is determined to be a signed purchase order received from the customer or an equivalent form for those customers lacking a formalized purchase order system. In the case of VeraSMART sales, a software license agreement signed by both parties is often required in addition to a purchase order or equivalent. Additionally, revenue is only recognized when a selling price is fixed or determinable and collectibility of the receivable is deemed to be probable.

Service revenues such as training, installation and implementation are recognized when the service is complete and acknowledged by the customer, regardless as to whether the sale is on a direct basis or through a reseller arrangement. Fees charged to customers for post-contract Customer Support are recognized ratably over the term of the contract. Costs related to maintenance obligations are expensed as incurred.

Sales which constitute a multiple-element arrangement are accounted for by determining if the elements can be accounted for as separate accounting units, and if so, by applying values to those units for which there is vendor specific objective evidence of their fair value. We use the residual method to apply any remaining balance to the remaining elements of the arrangement. More specifically, this methodology

Table of Contents

applies when there is embedded maintenance (post-contract customer support) involved in the sale of a software license, or when the sale of a software license is made in conjunction with installation services. In the latter case, the recognition of the software license is deferred until installation is completed.

The Company's revenues generated through hosting solutions are recognized using the proportional performance method. Revenues are recognized in the month services are rendered and earned under service agreements with clients where service fees are fixed or determinable. Contracts can be terminated with 90 days written notice. All services provided by us through the date of cancellation are due and payable under the contract terms.

Income taxes are provided on the income earned in the financial statements. In accordance with SFAS 109,

Accounting for Income Taxes, the Company applies the liability method of accounting for income taxes, under which deferred income taxes are provided to reflect the impact of temporary differences between the amounts of assets and liabilities for financial reporting purposes and such amounts as measured by tax laws and regulations. A valuation allowance is recorded to reduce the carrying amounts of deferred tax assets unless it is more likely than not, that such assets will be realized.

Net income (or loss) per common share (EPS) is computed in accordance with the provisions of SFAS No. 128,

Earnings Per Share. Basic EPS is computed by dividing net income (loss) by weighted average shares outstanding. Diluted EPS includes the dilutive effect of stock options and warrants issued. Included in diluted earnings per share in 2005 are 553,972 shares, representing the dilutive effect of stock options issued. There were no dilutive effects of stock options in 2006 or 2004, as the effect would have been anti-dilutive, due to net loss incurred for those years.

Comprehensive Income Comprehensive income includes all changes in stockholders' equity during the period except those resulting from investments by owners and distribution to owners. The Company's comprehensive income includes net loss or earnings, unrealized gains or losses on available for sale investments, and unrecognized prior service costs and gains or loss associated with the Company's Supplement Executive Retirement Program.

Research and Development Costs Research and development costs, other than certain software development costs previously disclosed in Note 1, are expensed as incurred. For the years ended December 31, 2006, 2005, and 2004, research and development costs expensed were \$890,616, \$1,021,338, and \$ 1,415,000, respectively.

Stock-Based Compensation In December 2004, the FASB issued SFAS No. 123R, Share-Based Payment. SFAS No. 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized as compensation expense in the financial statements based on their fair values. That expense will be recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period). We adopted SFAS No. 123R effective beginning January 1, 2006, using the Modified Prospective Application. SFAS No. 123R applies to the new awards modified, repurchased or cancelled after the effective date. The impact of adopting SFAS No. 123R was an increase of \$29,700 to operating expenses for the year ended December 31, 2006.

For the years ended December 31, 2005 and 2004, the following table includes disclosures required by SFAS No. 123,

Accounting for Stock-Based Compensation, as amended by SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure, and illustrates the effect on net earnings and net earnings per share as if we had applied the fair value recognition provisions of SFAS No. 123:

Table of Contents

	2005	2004
Net income (loss), as reported	\$ 381,733	\$ (113,560)
Add: Stock-based compensation expense included in net income (loss), net of forfeitures and tax effects	(121,350)	(18,738)
Deduct: Total stock-based compensation expense determined under fair value, net of forfeitures and related tax effects	(73,442)	(138,631)
Pro forma net income (loss)	\$ 186,941	\$ (270,929)

Net income (loss) per common share

As reported:			
Basic	\$	0.04	\$ (0.01)
Diluted	\$	0.04	\$ (0.01)

Pro forma:			
Basic	\$	0.02	\$ (0.03)
Diluted	\$	0.02	\$ (0.03)

For purposes of the disclosure above, the fair value of each option grant is estimated on the date of the grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for grants in 2004.

	2004
Dividend yield	
Expected volatility	148.09%
Risk-free interest rate	3.29%
Expected life	5 years

There were no options granted during the year ended December 31, 2005.

Accounting Pronouncements

1) In December 2004, the FASB issued SFAS 123[®], *Share-Based Payment*, which established standards for transactions in which an entity exchanges its equity instruments for goods or services. This standard requires an issuer to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award and the recording of such expense in the consolidated financial statements. This eliminated the exception to account for such awards using the intrinsic value method previously allowable under Accounting Principles Board (APB) Opinion No. 25. Pro forma disclosure of fair value recognition will no longer be an alternative. In addition, the adoption of SFAS No. 123[®] required additional accounting related to the income tax effects and disclosure regarding the cash flow effects resulting from share-based payment arrangements.

SFAS 123[®] permits public companies to adopt its requirements using one of two methods:

Modified prospective method: Compensation cost is recognized beginning with the effective date of adoption

(a) based on the requirements of SFAS No. 123[®] for all share-based payments granted after the effective date of adoption and (b) based on the requirements of SFAS 123 for all awards granted to employees prior to the effective date of adoption that remain unvested on the date of adoption.

Modified retrospective method: Includes the requirements of the modified prospective method described above, but also permits restatement using amounts previously disclosed under the pro forma provisions of SFAS No. 123 either for (a) all periods presented or (b) prior interim periods of the year of adoption.

In March 2005, the SEC released Staff Accounting Bulletin (SAB) 107, *Share-Based Payment*, which expresses views of the SEC Staff about the application of SFAS No. 123[®]. In April 2005, the SEC issued a rule that SFAS No. 123[®] will be effective for annual reporting periods beginning on or after June 15, 2005.

SFAS 123[®] became effective for our first quarter of fiscal 2006 and we opted to utilize the modified prospective method. We have selected the Black-Scholes option-pricing model as the most appropriate fair-value method for our awards and have recognized compensation costs on a straight-line basis over our awards' vesting periods. Although the adoption of SFAS No. 123[®] had no adverse impact on our balance sheet or total cash flows, it adversely affected our net income and earnings per share for 2006 by approximately \$30,000. The actual effects of SFAS No. 123[®] depend on numerous factors including the amounts of share-based payments granted in the future, our stock price volatility, estimated forfeiture rates and employee stock option exercise behavior. See Note 1 for the effect on reported net income and earnings per share if we had accounted for our stock option plan using the fair value method in 2005 and 2004.

2) In December 2004, FASB issued SFAS 153, *Exchanges of Nonmonetary Assets* an amendment to APB Opinion No. 29. This statement amends APB 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. Adoption of this statement did not expected to have a material impact on our results of operations or financial condition.

3) In May 2005, the FASB issued SFAS No. 154, *Accounting Changes and Error Corrections* - a replacement of APB Opinion No. 20 and FASB Statement No. 3 (SFAS 154). SFAS 154 changes the requirements for the accounting for and reporting of a change in accounting principle. These requirements apply to all voluntary changes and changes required by an accounting pronouncement in

Table of Contents

the unusual instance that the pronouncement does not include specific transition provisions. SFAS 154 is effective for fiscal years beginning after December 15, 2005. As such, the Company was required to adopt these provisions at the beginning of the fiscal year ended December 31, 2006. The Adoption of SFAS 154 did not have to have a significant impact on the Company's financial statements.

- 4) In June 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes-an Interpretation of FASB Statement NO. 109*. This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. Fin 48 is effective for fiscal years beginning after December 15, 2006. As such, the Company is required to adopt these provisions at the beginning of the fiscal year ended December 31, 2007. The Company is currently evaluating the impact of adopting Fin 48 on its financial statements, but does not expect adoption to have a significant effect.
- 5) In September 2006, SEC Staff Accounting Bulletin No. 108 (SAB 108) was issued to provide guidance on Quantifying Financial Statement Misstatements. SAB 108 addresses how the effects of prior-year uncorrected misstatements should be considered when quantifying misstatements in current-year financial statements. The SAB 108 requires registrants to quantify misstatements using both the balance sheet and income statement approaches and to evaluate whether either approach results in quantifying an error that is material in light of relevant quantitative and qualitative factors. When the effect of initial adoption is determined to be material, the SAB 108 allows registrants to record that effect as a cumulative-effect to beginning-of-year retained earnings. SAB 108 is effective for fiscal years ending after November 15, 2006 and early application is encouraged for any interim period of the first fiscal year ending after that date. The Company will adopt SAB 108 in January, 2007 and is currently evaluating the impact of adopting SAB 108 on its financial statements, but does not expect adoption to have a significant effect.

Stock Purchase Plans Under the Company's Employee's Stock Purchase Plan (ESPP), employees can purchase Veramark stock at a 15% discount to the lesser of the market price at the beginning or ending date of the six-month periods ending approximately June 30th and December 31st. Employees may elect to make after-tax payroll deduction of 1% to 10% of compensation as defined by the plan to the extent that his or her rights to purchase stock under this plan does not exceed Twenty-Five Thousand Dollars (\$25,000) worth of stock (determined at the full market value of the shares at the time such option is granted), and only to the extent that, immediately after the grant, such employee would not own or hold outstanding options to purchase stock, such that his or her combined voting power would exceed 5% of all classes of capital stock of the Company. Employee payroll deductions are for six-month period beginning approximately each January 1 and July 1. Shares of the Company's common stock are purchased on or about June 30 or December 31 unless the participant has either elected to withdraw from the plan or was terminated. Purchased shares are restricted for sale or transfer for a six-month period. All participants funds received prior to the ESPP purchase dates are held as Company liabilities without interest or other increment. No dividends are paid on employee contributions until shares are purchased. Plan participants purchased 15,436 shares at an average purchase price of \$0.60 in 2006, 20,211 shares at an average purchase price of \$0.66 in 2005 and 24,938 shares at an average purchase price of \$0.83 in 2004.

Table of Contents**2. PROPERTY AND EQUIPMENT**

The major classifications of property and equipment as of December 31, 2006 and 2005 are:

	2006	2005
Machinery and equipment	\$ 795,905	\$ 794,314
Computer hardware and software	2,057,099	1,991,877
Furniture and fixtures	1,669,084	1,627,677
Leasehold improvements	1,382,559	1,382,559
	\$ 5,904,647	\$ 5,796,427

Depreciation expense was approximately \$261,000, \$270,000 and \$278,000 for the years ended December 31, 2006, 2005 and 2004, respectively.

3. ENGINEERING AND SOFTWARE DEVELOPMENT EXPENDITURES

Engineering and software development costs incurred during the years ended December 31, 2006, 2005 and 2004 were recorded as follows:

	2006	2005	2004
Engineering and software development expenses included in the consolidated statements of operations	\$ 890,616	\$ 1,021,338	\$ 1,415,000
Amounts capitalized and included in the consolidated balance sheets	1,285,233	1,175,281	1,278,900
Total costs for engineering and software development	\$ 2,175,849	\$ 2,196,619	\$ 2,693,900

Additionally, the Company recorded amortization of capitalized software development costs of approximately \$936,000, \$867,000, and \$578,000 for the years ended December 31, 2006, 2005 and 2004, respectively. Such amortization is included in cost of sales in the consolidated statements of operations. Estimated aggregate minimum amortization expenses for each of the next five years is:

2007	\$ 930,962
2008	985,128
2009	820,126
2010	530,863
2011	358,276

Table of Contents**4. COMPREHENSIVE INCOME (LOSS)**

Comprehensive income (loss) for years ended December 31, 2006, 2005 and 2004 was as follows:

	2006	2005	2004
Net income (loss)	\$ (488,341)	\$ 381,733	\$ (113,560)
Adjustments to initially apply FASB No. 158			
Unrecognized prior service costs	(374,618)		
Unrealized gain (loss) pension obligation	25,658		
Unrealized gain (loss) on investments	14,336	(6,861)	6,255
Comprehensive income (loss)	\$ (822,965)	\$ 374,872	\$ (107,305)

5. NET INCOME (LOSS) PER SHARE (EPS)

SFAS 128 Earnings Per Share requires the Company to calculate its net income (loss) per share based on basic and diluted net income (loss) per share, as defined. Basic EPS excludes dilution and is computed by dividing net income (loss) by the weighted average number of shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. The dilutive effect of outstanding options, issued by the Company, are reflected in diluted EPS using the treasury stock method. Under the treasury stock method, options will generally have a dilutive effect when the average market price of common stock during the period exceeds the exercise price of the options.

	Year Ended December 31,		
	2006	2005	2004
Basic			
Net income (loss)	\$ (488,341)	\$ 381,733	\$ (113,560)
Weighted average common shares outstanding	8,843,154	8,755,916	8,606,759
Net income (loss) per common share	\$ (0.06)	\$ 0.04	\$ (0.01)
Diluted			
Net income (loss)	\$ (488,341)	\$ 381,733	\$ (113,560)
Weighted average common shares outstanding	8,843,154	8,755,916	8,606,759
Additional dilutive effect of stock options & warrants after application of treasury stock method	(1)	553,972	(1)

Edgar Filing: VERAMARK TECHNOLOGIES INC - Form 10-K

Weighted average dilutive shares outstanding	8,843,154	9,309,888	8,606,759
Net income (loss) per common share assuming dilution	\$ (0.06)	\$ 0.04	\$ (0.01)

(1) There were no dilutive effects of stock options and warrants in 2006 or 2004, as the effect would have been anti-dilutive due to the net loss incurred for those years.

Table of Contents**6. INDEMNIFICATION OF CUSTOMERS**

The Company's agreements with customers generally require us to indemnify the customer against claims that its software infringes third party patent, copyright, trademark or other proprietary rights. Such indemnification obligations are generally limited in a variety of industry-standard respects, including our right to replace an infringing product. As of December 31, 2006, the Company had not experienced any material losses related to these indemnification obligations and no material claims with respect thereto were outstanding. The Company does not expect significant claims related to these indemnification obligations, and consequently, the Company has not established any related reserves.

7. BENEFIT PLANS

The Company sponsors an employee incentive savings plan under section 401(k) for all eligible employees. The Company's contributions to the plan are discretionary. There have been no contributions to the plan since 1999.

The Company also sponsors an unfunded Supplemental Executive Retirement Program (SERP), which is a nonqualified plan that provides certain key employees defined pension benefits. For the years ended December 31, 2006 and 2005, changes to the benefit obligation consisted of the following:

	2006	2005
Benefit obligation-beginning of year	\$ 4,923,978	\$ 4,439,398
Current service cost-benefits earned during the period	270,381	376,627
Interest cost on projected benefit obligation	293,494	263,139
Unrealized gain	(25,658)	
Plan amendments	(10,630)	4,578
Benefits paid	(159,767)	(159,764)
Benefit obligation-end of year	\$ 5,291,798	\$ 4,923,978

A reconciliation of the SERP plan's funded status with amounts recognized in the Company's balance sheets is as follows:

	2006	2005
Actuarial present value of projected benefit obligation	\$ 5,291,798	\$ 4,923,978
Plan assets		
Projected benefit obligation in excess of plan assets	5,291,798	4,923,978
Prior service cost not yet recognized in net periodic pension cost		(499,674)
Net amount recognized	\$ 5,291,798	\$ 4,424,304

The discount rate used in determining the actuarial present value of the projected benefit obligation was 6% for 2006, 2005, and 2004. The rate of increase in future compensation levels used in determining the projected benefit obligation ranged from 0% to 3% for 2006, 2005, and 2004.

Table of Contents

Pension expense for the years ended December 31, 2006 and 2005 consisted of the following.

	2006	2005	2004
Current service cost	\$ 270,381	\$ 376,627	\$ 323,006
Amortization of prior service	125,056	65,161	88,169
Interest costs	293,494	263,139	276,472
Total pension expense	\$ 688,931	\$ 704,927	\$ 687,647

Effective with the year ended December 31, 2006 the Company adopted FASB No. 158 Employers Accounting for Defined Benefit Pension and Other Postretirement Plans. FASB 158 requires the Company to recognize the over funded or under funded status of a defined postretirement plan as an asset or liability in its balance sheet and to recognize changes in the funded status in the year in which the changes occur through comprehensive income. The Statement further requires companies to measure its plan assets and obligations as of the date of the company's fiscal year end balance sheet. Accordingly the Company has moved the annual measurement date of its Supplemental Executive Retirement Program from October 31 to December 31.

As a result of the adoption of FASB No.158 the Company has adjusted its pension liability as of December 31, 2006 for unrecognized prior service costs of \$374,618 and recorded an unrealized gain of \$25,658 related to the pension obligation, both of which have been included in other comprehensive income.

The Company maintains life insurance covering certain key employees under its Supplemental Executive Retirement Program with the Company named as beneficiary. The Company intends to use the death benefits of these policies, as well as loans against the accumulating cash surrender value of the policies, to fund the pension obligation. The total death benefit associated with these policies is \$10.2 million, with an associated accumulated cash surrender value of approximately \$2,866,000 at December 31, 2006. The accumulated cash surrender values of these policies at December 31, 2005, was approximately \$2,502,000. All of the current accumulated cash surrender values are available to meet current pension obligations, or to fund current general operations of the Company in the event that should become necessary.

The projected future pension benefits under this plan are as follows, assuming a retirement age of 65 and a life expectancy of 80 years for all participants:

Year Ending December 31,	
2007	\$ 195,767
2008	447,692
2009	496,906
2010	496,906
2011	466,772
2012-2016	2,714,535

Table of Contents

8. STOCKHOLDERS EQUITY

The Company has reserved 4,500,000 shares of its common stock for issuance under its 1998 Stock Option Plan. As of December 31, 2006, 1,927,638 shares of common stock were available for future grants. The plan provides for options, which may be issued as nonqualified or qualified incentive stock options. All options granted are exercisable in increments of 20 100% per year beginning one year from the date of grant. All options granted to employees have a ten year term.

A summary of stock option and warrant transactions for the years ended December 31, 2006, 2005 and 2004 is shown below:

45

Table of Contents

	2006		2005		2004	
	SHARES	WEIGHTED AVERAGE PRICE	SHARES	WEIGHTED AVERAGE PRICE	SHARES	WEIGHTED AVERAGE PRICE
Options						
Shares under option, beginning of year	2,865,028	\$ 2.37	3,345,303	\$ 2.30	3,547,470	\$ 2.32
Options granted	10,000	0.55			91,833	1.31
Options exercised	(1,750)	0.53	(148,450)	0.45	(81,187)	0.62
Options terminated	(83,000)	2.82	(331,825)	2.56	(212,813)	2.77

Warrants expired					(14,701)	6.17
Warrants outstanding, end of year						
Exercise price of warrants outstanding						

The following table summarizes information relating to currently outstanding and exercisable stock options as of December 31, 2006:

Range of Exercise Prices	Weighted Average Remaining Contractual Life (in years)	Options Outstanding	Weighted Average Exercise Price	Options Exercisable	Weighted Average Exercise Price
\$0.28 \$ 1.49	5	1,232,983	\$ 0.51	1,169,458	\$ 0.50
\$1.50 \$ 4.99	2	991,270	2.52	988,270	2.52
\$5.00 \$10.41	1	566,025	6.06	566,025	6.06
	3	2,790,278	\$ 2.35	2,723,753	\$ 2.39

Table of Contents**9. SALES INFORMATION**

Sales to two customers were approximately \$3,172,000 or 31% of the Company's total sales in 2006. Sales to these same two customers were approximately \$3,812,000 or 35% of the Company's total sales in 2005 and \$3,687,000 or 33% of the Company's total sales in 2004.

10. INCOME TAXES

The income tax provision includes the following:

	2006	2005	2004
Current income tax expense:			
Federal	\$	\$	\$
State			
	\$	\$	\$
Deferred income tax provision (benefit):			
Federal	\$ (269,343)	65,363	(290,768)
State	(14,926)	15,846	(21,240)
Change in valuation allowance	284,269	(81,209)	312,008
	\$	\$	\$

The income tax provision differs from those computed using the statutory federal tax rate of 34%, due to the following:

	2006	2005	2004
Tax expense (benefit) at statutory federal rate	\$ (166,036)	\$ 129,789	\$ (38,610)
State tax, net of federal tax expense (benefit)	(14,650)	11,452	(3,407)
Change in valuation allowance	284,269	(81,209)	312,008
Other	(2,809)		
Non deductible expenses	26,757	6,284	4,618
Deferred tax adjustment-fixed assets	(64,806)	24,519	(284,847)
Deferred tax adjustment-net operating loss	13,849	23,811	44,237
General business credits	(76,574)	(114,646)	(33,999)
	\$	\$	\$

Table of Contents

Deferred income taxes recorded in the balance sheets results from differences between financial statement and tax reporting of income and deductions. A summary of the composition of the deferred income tax assets (liabilities) follows:

	2006	2005
General business credits	\$ 1,585,761	\$ 1,507,272
Net operating losses	3,882,355	3,915,203
Deferred compensation	2,271,581	1,995,936
Alternative minimum tax credits	322,216	322,216
Inventory	659	211
Accounts receivable	11,100	11,840
Capitalized software	(1,174,892)	(1,045,858)
Fixed assets	240,647	149,265
Other	93,609	90,767
New York State ITC	94,322	96,237
	7,327,358	7,043,089
Valuation allowance	(7,327,358)	(7,043,089)
Net deferred asset (liability)	\$	\$

The Company has \$10,492,850 of net operating loss carryforwards available as of December 31, 2006. Of that total, \$682,000 is limited to a utilization of approximately \$100,000 annually. The carryforwards expire in varying amounts in 2012 through 2026. The valuation allowance increased by \$284,269 during the year ended December 31, 2006.

The Company's tax credit carryforwards as of December 31, 2006 are as follows:

Description	Amount	Expiration Dates
General business credits	\$ 1,585,761	2007 - 2026
New York State investment tax credits	\$ 94,322	2007 - 2021
Alternative minimum tax credits	\$ 322,216	No expiration date

Cash paid for income taxes during the years ended December 31, 2006, 2005 and 2004 totaled \$18,022, \$(1,944), and \$22,556 respectively.

Table of Contents**11. COMMITMENTS AND CONTINGENCIES**

Lease Obligations The Company leases current manufacturing and office facilities and certain equipment under operating leases, which expire at various dates through 2008. Rent expense under all operating leases (exclusive of real estate taxes and other expenses payable under the leases) was approximately \$373,000, \$409,000, and \$470,000 for the years ended December 31, 2006, 2005 and 2004, respectively.

Minimum lease payments as of December 31, 2006 under operating leases are as follows:

Year Ending December 31,	Operating Leases
2007	\$ 361,895
2008	693
	\$ 362,588

The current term of the Company's lease on its Pittsford facility expires October 31, 2007. Under the terms of that agreement the Company will exercise its option to renew that lease for an additional three years through October 31, 2010.

Legal Matters The Company is subject to litigation from time to time in the ordinary course of business. In the opinion of management, there is no pending or threatened proceeding against the Company, if adversely determined, would have a material effect on the Company's financial condition or results of operations.

Table of Contents**12. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)**

Summarized quarterly financial information for the years ended December 31, 2006 and 2005 is as follows:

	Three Months Ended			
	March 31	June 30	September 30	December 31
2006				
Net sales	\$ 2,444,196	\$ 2,606,281	\$ 2,589,637	\$ 2,721,036

Item 9A. Controls and Procedures

Based upon an evaluation as of the end of the period covered by this report, the Company's Chief Executive Officer and Vice President of Finance (Chief Financial Officer) concluded that the Company's disclosure controls and procedures are effective to provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. There have been no changes in the Company's internal controls over financial reporting, that occurred during the period covered by this report, that have materially affected, or are reasonably likely to materially affect the Company's internal controls over financial reporting.

The Company's disclosure controls and procedures and internal controls over financial reporting provide reasonable, but not absolute, assurance that all deficiencies in design or operation of those control systems, or all instances of errors or fraud, will be prevented or detected. Those control systems are designed to provide reasonable assurance of achieving the goals of those systems in light of the Company's resources and nature of the Company's business operations. The Company's disclosure controls and procedures and internal control over financial reporting remain subject to risks of human error and the risk that controls can be circumvented for wrongful purposes by one or more individuals in management or non-management positions.

PART III

Item 10 Directors and Executive Officers of the Registrant

Information relating to the officers and directors of the Company and the Committees of the Company's Board of Directors is incorporated herein by reference to portions of the Company's Proxy Statement for the Annual Meeting of Shareholders to be held May 21, 2007, under the headings "Election of Directors" and "Section 16(a) Beneficial Ownership Reporting Compliance."

The following lists the names and ages of all executive officers of the Company, all persons chosen to become executive officers, all positions and offices with the Company held by such persons, and the business experience during the past five years of such persons. All officers and directors were elected to their present positions for terms ending on May 21, 2007, and until their respective successors are elected and qualified.

MANAGEMENT

Directors and Executive Officers of the Registrant

The Directors and executive officers of Veramark are as follows:

Name	Age	Position
David G. Mazzella	66	Chairman of the Board, President and CEO
William J. Reilly	58	Director
Charles A. Constantino	67	Director
John E. Gould	62	Director
Andrew W. Moylan	67	Director
Michael R. Holly	60	Director
Martin F. LoBiondo	43	Senior Vice President
Ronald C. Lundy	55	Vice President of Finance and CFO
Douglas F. Smith	62	Vice President - Operations

All Directors hold office until the next annual meeting of stockholders, and until their successors are duly elected and qualified. Officers are elected annually by the Board of Directors and serve at the discretion of the Board.

David G. Mazzella, Jr. was appointed Chief Executive Officer in June 1997. He previously served as President and Chief Operating Officer of the Company from February 1997. He became Chairman of the Board on December 19, 1998. From June 1994 to February 1997, he was engaged in management consulting. From February 1992 to June 1994, he was the President and CEO of Scotgroup Enterprises, Inc., which was engaged in the development and sale of telecommunications software equipment and the sale of paging and cellular telephone services. From 1988 to 1991, Mr. Mazzella was Vice President of Glenayre Electronics, a manufacturer of software based telecommunications equipment. He was President and CEO of Multitone

Table of Contents

Electronics, Inc., a company engaged in the manufacture, sale and servicing of telecommunications equipment from 1983 until its acquisition by Glenayre Electronics in 1988.

William J. Reilly has been a Director of Veramark since June 1997. Since September 2004, Mr. Reilly has been President and Chief Executive Officer of Realtime Media, an online Relationship Marketing firm to the Pharmaceutical and Consumer Packaged Goods markets. From September 2003 until September 2004, Mr. Reilly also served as a Principal in the consulting firm ChesterBrook Growth Partners. From 1989 until September, 2003, Mr. Reilly was Chief Operating Officer of Checkpoint Systems, Inc., (NYSE:CKP) a global manufacturer and distributor of automatic identification, pricing, and retail security systems.

Charles A. Constantino has been a Director of Veramark since May, 2002. Mr. Constantino has also been a Director and Executive Vice President of PAR Technology Corporation (NYSE:PTC) for more than five years. PTC develops, manufactures, markets, installs and services microprocessor-based transaction processing systems for the restaurant and industrial market places and also designs software. Their government business segment provides the United State Department of defense, and other federal and state government organizations, with a wide range of technical products and services. Mr. Constantino is also a Director and Past Chairman of the Board of Trustees of St. John Fisher College, and a Director of Adirondack Bank.

John E. Gould has been a Director of Veramark since August 1997. For more than five years, Mr. Gould was a Partner in Gould & Wilkie LLP, a general practice law firm located in New York City. On May 1, 2002, Gould & Wilkie LLP combined with Thompson Hine LLP, a larger general practice law firm with headquarters in Cleveland, Ohio. Mr. Gould serves on the Executive Committee of Thompson Hine LLP. Mr. Gould is also Chairman of the American Geographical Society and a Director of the Gerber Life Insurance Company.

Andrew W. Moylan has been a Director of Veramark since September 2004. Mr. Moylan is currently the President of BCS plc. North America, a risk management software company. Prior to his current position, Mr. Moylan had served as President, Chief Operating Officer and Director of MarketDataInsite. Mr. Moylan was also a senior Partner in the Deloitte management consulting practice in New York for 20 years.

Michael R. Holly was appointed a Director of Veramark in September 2006. Since 2004 Mr. Holly has been President of MRH Consulting LLC, where he advises companies seeking debt and equity growth capital, and management groups involved in acquisitions and the execution of consolidation, growth, and value creation strategies in portfolio companies. Prior to that, for more than five years, Mr. Holly was a founding partner and Managing Director of Safeguard International Fund, a private \$350 million equity fund which made control investments and implemented growth strategies in portfolio companies in the United States and Europe. Mr. Holly is a Certified Public Accountant in the state of Pennsylvania.

Martin F. LoBiondo was appointed Senior Vice President of Veramark in January 2007. Mr. LoBiondo joined Veramark in 2000 and has served since that time as Vice President of Engineering and Development. Prior to joining Veramark, Mr. LoBiondo served in various engineering management positions with Xerox Corporation.

Ronald C. Lundy was appointed Vice President of Finance and Chief Financial Officer in March 2007. Since joining Veramark in 1984 he has held a variety of financial management positions, the most recent having been Treasurer since August of 1993. Prior to that he held various financial positions with Rochester Instrument Systems, Inc. from 1974-1983.

Table of Contents

Douglas F. Smith was appointed Vice President of Operations in December 1998. Mr. Smith has been an employee of the Company since 1984 as Order Administration Manager and then as Director of Operations. Prior to joining the Company, Mr. Smith held various management positions with Rochester Instrument Systems, Inc. The Company has adopted a Code of Business Conduct and Ethics for all principal executive officers, directors, and employees of the Company. A copy of this code is incorporated by reference to portions of the Company's Proxy Statement for the Annual Meeting of Shareholders to be held May 21, 2007, as Exhibit C. A copy of the Code of Business Conduct and Ethics is available, without charge, upon written request to the Company's Treasurer at the Company's corporate offices.

Item 11 Executive Compensation

Information relating to executive compensation is incorporated by reference to portions of the Company's Proxy Statement for the Annual Meeting of Shareholders to be held May 21, 2007, under the heading Executive Compensation.

Common Stock Performance Comparison

The following graph shows a five-year comparison of cumulative total returns for owners of the Common Stock compared to an Index for NASDAQ stocks and the NASDAQ Telecommunications Index based upon year-end closing prices including a closing price on December 31, 2006 of \$0.80 per share for the Common Stock.
