NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Per share data is in actual dollars, other amounts are in thousands or millions, as noted)

Unaudited

NOTE 1. Basis of Presentation and Consolidation

The consolidated financial statements include the accounts of Northwest Bancorporation, Inc. (the Company) and its wholly-owned subsidiary, Inland Northwest Bank (the Bank). All significant intercompany balances and transactions have been eliminated in consolidation.

The foregoing unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X as promulgated by the Securities and Exchange Commission. Accordingly, these financial statements do not include all of the disclosures required by accounting principles generally accepted in the United States of America for complete financial statements. These unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the accompanying notes included in the annual report on Form 10-KSB for the year ended December 31, 2006. Prior to its filing on Form 10Q for the period ending March 31, 2007, the Company filed as a small business issuer, utilizing the Transitional Small Business Disclosure Format provided for in Regulation S-B. In the opinion of management, the unaudited interim consolidated financial statements furnished herein include all adjustments, all of which are of a normal recurring nature, necessary for a fair statement of the results for the interim periods presented. The results of operations for the three month periods ended March 31, 2007 and 2006 are not necessarily indicative of the operating results for the full year. Certain prior year balances have been reclassified to conform to the current year presentation. These reclassifications had no effect on retained earnings or net income as previously presented.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and the reported amounts of revenues and expenses during the reporting period. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of the Company's consolidated financial statements; accordingly, it is possible that the actual results could differ from these estimates and assumptions, which could have a material effect on the reported amounts of the Company's consolidated financial position and results of operations.

NOTE 2. Recent Accounting Pronouncements

SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of Financial Accounting Standards Board (FASB) Statement No. 115 This statement permits entities to choose to measure certain financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This statement is expected to expand the use of fair value measurement, which is consistent with the Board's long-term measurement objectives for accounting for financial instruments. This Statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. SFAS No. 159 is not expected to have a material impact on the Company's financial position or results of operations.

Table of Contents

SFAS 157, Fair Value Measurements - In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. This Statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements. Accordingly, this Statement does not require any new fair value measurements. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. SFAS No. 157 is not expected to have a material impact on the Company's financial position or results of operations.

In September 2006, the SEC's Office of the Chief Accountant and Divisions of Corporation Finance and Investment Management released SAB No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements (SAB No. 108), that provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The SEC staff believes that registrants should quantify errors using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. This pronouncement is effective for fiscal years ending after November 15, 2006. The Company has adopted SAB No. 108 and has found there to be no material impact on its financial position or results of operations.

NOTE 3. Income Taxes

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 is an interpretation of FASB Statement No. 109, Accounting for Income Taxes, and it seeks to reduce the diversity in practice associated with certain aspects of measurement and recognition in accounting for income taxes. In addition, FIN 48 provides guidance on de-recognition, classification, interest and penalties, and accounting in interim periods and requires expanded disclosure with respect to the uncertainty in income taxes. FIN 48 is effective as of the beginning of the Company's 2007 fiscal year. The cumulative effect, if any, of applying FIN 48 is to be reported as an adjustment to the opening balance of retained earnings in the year of adoption. The Company adopted the provisions of FIN 48 on January 1, 2007. Adoption of FIN 48 did not have a material effect on the Company.

NOTE 4. Securities

Most of the securities are classified as available-for-sale and are stated at fair value, and unrealized holding gains and losses, net of related deferred taxes, are reported as a separate component of stockholders' equity. Realized gains or losses on available-for-sale securities sales are reported as part of non-interest income based on the net proceeds and the adjusted carrying amount of the securities sold, using the specific identification method. Premiums and discounts are recognized in interest income using the effective method over the period to maturity. There were no securities sold in the three-month, year-to-date periods ending March 31, 2007 and 2006; consequently, there were no gains or losses included in non-interest income. Carrying amounts and fair values at March 31, 2007 and December 31, 2006 were as follows (in thousands):

Table of Contents

	March 31		December 31	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Securities available-for-sale:				
Obligations of federal government agencies	\$ 24,194	\$ 24,007	\$ 23,195	\$ 22,924
US Treasury securities	6,903	6,901	6,959	6,963
Mortgage backed securities	927	954	970	995
Corporate Bonds	500	467	500	455
TOTAL	\$ 32,524	\$ 32,329	\$ 31,624	\$ 31,337
Available-for-sale marketable equity securities ¹	\$ 250	\$ 250	\$ 250	\$ 250
Securities held-to-maturity:				
Obligations of states, municipalities and political subdivisions	3,866	3,868	3,972	3,972
TOTAL	\$ 3,866	\$ 3,868	\$ 3,972	\$ 3,972
Equity securities with a limited market ²	\$ 395	\$ 395	\$ 205	\$ 205

(1) Represents those AFS marketable equity securities that are recorded in **Other Assets** on the Consolidated Balance Sheet. Securities consist of (\$250 thousand) investment, at fair market value, in the common stock of a bank holding company headquartered in Bellevue, WA. As this company is relatively new, it is anticipated that it will be some time before an active market in its stock develops. To determine fair market value, the Company reviews the financial performance of the bank subsidiary of the Bellevue-based holding company and, pursuant to the latest review, believes that the current fair market value approximates cost.

(2) Represents those equity securities with limited marketability that are recorded in **Other Assets**, on the Consolidated Balance Sheet. These securities are reviewed quarterly to determine whether there has been any impairment in value. Securities consist of (\$155 thousand) equity investment in a Trust created by the Company in connection with issuance of trust preferred securities, (\$190 thousand) investment in the common stock of Pacific Coast Bankers Bank and (\$50 thousand) investment in an economic development company, each of these investments is reported at cost.

NOTE 5. Loans

Loan detail by category is as follows (dollars in thousands):

	March 31 2007	December 31 2006
1-4 family and multi-family real estate loans	\$ 18,599	\$ 18,917

Commercial real estate, term loans	87,004	83,437
Commercial, construction loans	48,678	48,602
Commercial loans, non-real estate	43,579	43,275
Consumer loans	23,720	23,877
TOTAL LOANS	\$ 221,580	\$ 218,108
Allowance for loan losses	(2,630)	(2,586)
Net deferred loan fees	(441)	(400)
NET LOANS	\$ 218,509	\$ 215,122

NOTE 6. Allowance for Loan Losses

The Company's subsidiary, Inland Northwest Bank (the "Bank") maintains an allowance for loan losses at a level considered adequate by management to provide for probable credit losses in the Bank's loan portfolio. Future credit losses are estimated through an analysis of various factors affecting the performance of the loan portfolio, including: individual review of problem loans, including an evaluation of the quality of underlying collateral; current business conditions and the Bank's historical loan loss experience; the term, in years, that the average loan is expected to remain on the Bank's books; and other factors that management determines to be relevant at the time of the analysis. In accordance with

Table of Contents

accounting and regulatory requirements, the portion of the allowance relating to unused loan commitments and other off-balance sheet items is reclassified to Other liabilities. Changes in the allowance for loan losses for the periods indicated were as follows (in thousands):

	Three-months ended	
	3/31/2007	3/31/2006
Balance, beginning of period	\$2,586	\$2,252
Add reserve for probable losses on unused loan commitments and off-balance sheet items (OBS)	199	179
Balance, beginning of period, including OBS reserve	2,785	2,431
Provision for loan losses	90	90
Loan Charge-offs	0	(15)
Loan Recoveries	3	6
Balance, end of period, prior to adjustment for off-balance sheet items	2,878	2,512
Reclassification of reserve for probable losses on unused loan commitments and off-balance sheet items to Other liabilities	(248)	(190)
Balance, end of period	\$2,630	\$2,322

NOTE 7. Borrowed Funds

The Bank has a line of credit with the Federal Home Loan Bank of Seattle (FHLB) and operating lines of credit with several other financial institutions. The FHLB line provides the Bank access to long-term funding, with repayment terms as long as thirty years, and to short-term funding to meet current liquidity needs. The operating lines with other financial institutions are available for short-term funding, to meet current liquidity needs.

The following table outlines amounts outstanding and the availability of borrowed funds for the periods covered in this report:

Table of Contents

	Line amount ⁽¹⁾ (\$ in thousands)	Maturity	Collateral	Purpose	Outstanding as of: 3/31/2007 12/31/2006 (\$ in thousands)	
Federal Home Loan Bank of Seattle ⁽²⁾	\$ 44,385	Annual ⁽³⁾	General pledge of assets ⁽⁴⁾	Line of credit, with access to short and long-term funds	\$ 3,802	\$ 6,406
KeyBank of Washington ⁽⁵⁾	\$ 10,000	7/1/2007	Unsecured	Short-term line of credit	-	-
	\$ 100	7/1/2007	Unsecured	Supports foreign currency transactions	-	-
	\$ 100	7/1/2008	Unsecured	Supports letters of credit	-	-
Pacific Coast Bankers Bank ⁽⁶⁾	\$ 10,000	6/30/2007	Unsecured	Short-term line of credit	-	-
U.S. Bank ⁽⁵⁾	\$ 1,500	7/31/2007	Unsecured	Short-term line of credit	-	-
Zions Bank ⁽⁵⁾	\$ 1,500	No stated maturity	Unsecured	Short-term line of credit	-	-
				Total borrowed funds	\$ 3,802	\$ 6,406

⁽¹⁾ The FHLB line amount is computed as 15% of Bank assets as of the reporting date and will change from quarter to quarter as asset totals change.

⁽²⁾ Access to the FHLB line is conditioned to stock ownership; additional stock purchase may be required to access the full amount of the line. The FHLB may be used for overnight borrowings (federal funds purchased) or for short-term (between 7 days and 1-year) or intermediate/long-term borrowings (as long as thirty years). \$2.5 million included in the balance as of March 31, 2006 matured in the 1st quarter 2007, the remaining balances outstanding for the reporting dates were intermediate or long-term.

⁽³⁾ The FHLB reviews its commitment annually and notifies the Bank that the arrangement will continue, but does not state an exact maturity date.

⁽⁴⁾ The FHLB requires a general pledge of all Bank assets. Actual advances are limited by the amount of single family and multi-family real estate loans in the Bank's loan portfolio, as well as certain commercial real estate loans. In practice, these loans provide the FHLB with adequate collateral coverage, exclusive of other Bank assets.

⁽⁵⁾ Federal funds purchased lines of credit to cover short-term liquidity needs. Typically expected to be re-paid within a few days.

⁽⁶⁾ Federal funds purchased line of credit to cover short-term liquidity needs. Typically expected to be re-paid within a few days. May be extended to as much as thirty days.

Table of Contents

NOTE 8. Capital Lease Liability

The capital lease liability outstanding on March 31, 2007 and December 31, 2006 is related to a ground lease, with a purchase option, that the Bank entered into in early 2005 (a copy of the ground lease was filed as an Exhibit to the Company's Form 10-KSB filing on March 24, 2005). As a capitalized lease, the value of the property is included as an asset on the consolidated statement of financial condition in Premises and equipment, net and the net present value of future payments is included as a liability in Capital lease liability.

NOTE 9. Material Contract

In the third-quarter 2006, the Bank entered into an agreement with the Spokane Public Facilities District (PFD) for the purchase of naming rights to the Spokane Opera House; that facility is now known as the INB Performing Arts Center. Under the agreement, the Bank will pay the PFD \$150 thousand per year for a period of ten years. The contract expires July 20, 2016; however, the Bank has the right to extend the contract for an additional ten years, at an annual rate that will not exceed the current annual rate by more than twenty-percent. Expenses related to the agreement are recognized as Other operating expense and affect (reduce) net income by about \$25 thousand per quarter. Payments to the PFD began in the third-quarter 2006; consequently, this expense is reflected in results reported for the three-month period ending March 31, 2007, but not for the period ending March 31, 2006.

NOTE 10. Junior Subordinated Debentures

In June 2005, the Company issued junior subordinated debentures aggregating \$5,155 thousand to Northwest Bancorporation Capital Trust I, with interest fixed at 5.95% through June 30, 2010, thereafter re-pricing quarterly at three-month LIBOR plus 1.70%. The Trust issued \$155 thousand of common securities to the Company and capital securities with an aggregate liquidation amount of \$5,000 thousand to third-party investors. The common securities are included in Other assets on the consolidated statement of financial condition; the subordinated debentures are detailed individually in this report and included in Borrowed funds in the consolidated financial statements included in the annual report on Form 10-KSB for the year ended December 31, 2006. The subordinated debentures are includable as Tier I capital for regulatory purposes. The subordinated debentures and the capital securities pay interest and dividends, respectively, on a quarterly basis, which are included in interest expense. The subordinated debentures will mature on June 30, 2035, at which time the capital securities must be redeemed. The subordinated debentures and capital securities can be redeemed, in whole or in part, beginning June 30, 2010, at par value. The Company has provided a full and unconditional guarantee of the obligations of the Trust under the capital securities in the event of default. Northwest Bancorporation Capital Trust I is not consolidated in these financial statements, pursuant to Financial Accounting Standards Board Interpretation No. 46(R), Consolidation of Variable Interest Entities. The Company reports the junior subordinated debentures within the liabilities section of the statement of financial condition.

Table of Contents

The following tables are a summary of trust preferred securities at the dates indicated (dollars in thousands):

March 31, 2007

Name of Trust	Aggregate liquidation amount of trust preferred securities	Aggregate liquidation amount of common capital securities	Aggregate principal amount of junior subordinated debentures	Stated maturity	Per annum interest rate	Extension period	Redemption option
N o r t h w e s t Bancorporation Capital Trust I	\$5,000	\$155	\$5,155	2035	5.95%	20 consecutive quarters	On or after 6/30/2010

December 31, 2006

Name of Trust	Aggregate liquidation amount of trust preferred securities	Aggregate liquidation amount of common capital securities	Aggregate principal amount of junior subordinated debentures	Stated maturity	Per annum interest rate	Extension period	Redemption option
N o r t h w e s t Bancorporation Capital Trust I	\$5,000	\$155	\$5,155	2035	5.95%	20 consecutive quarters	On or after 6/30/2010

NOTE 11. Common Stock

On April 18, 2006, the Board of Directors declared a five-percent stock dividend payable on June 15, 2006 to shareholders of record as of May 15, 2006. On April 17, 2007, the Board of Directors declared a five-percent stock dividend payable on June 15, 2007 to shareholders of record as of May 14, 2007. Shares, stock options and stock awards reported as outstanding, as well as earnings per share, the number of weighted average shares outstanding and the effect of dilutive securities for the three-month, year-to-date periods ending March 31, 2007 and 2006, have been adjusted to reflect the stock dividends.

On April 18, 2006, the Board of Directors declared a sixteen-cent (\$0.16) per share annual cash dividend which was paid on June 15, 2006 to shareholders of record as of May 12, 2006. On April 17, 2007, the Board of Directors declared an eighteen-cent (\$0.18) per share annual cash dividend payable on June 15, 2007 to shareholders of record as of May 11, 2007.

NOTE 12. Subsequent events

Director stock compensation

As detailed in the Company's Form DEF 14A (Proxy Statement) filed with the SEC on April 9, 2007, in addition to per meeting compensation, non-employee Bank directors, with the exception of the Chairman, are awarded 300 shares of

common stock of the Company per year as additional compensation. The Chairman is awarded 400 shares per year. These shares are issued on the first business day in May, each year, and are compensation for services rendered during the 12 months since the prior year's shareholder meeting. On May 1, 2007, the Company issued 4,000 shares of common stock for this purpose. Shares outstanding and earnings per share have not been adjusted to account for these shares.

Material contracts

The Bank has entered into contracts, dated May 4, 2007, for the construction of branch offices to be located in the communities of Hayden and Spirit Lake, Idaho. The contract for construction of the Hayden, Idaho branch is in the amount of \$1,176 thousand and the contract for construction of the Spirit Lake branch is in the amount of \$947 thousand, with the full amount of each contract remaining to be paid. Construction is expected to be completed on both branches in the fourth-quarter 2007.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion contains a review of Northwest Bancorporation, Inc.'s and its wholly-owned subsidiary, Inland Northwest Bank's, consolidated operating results and financial condition for the three months ended March 31, 2007. When warranted, comparisons are made to the same period in 2006 and/or to the previous year ended December 31, 2006. The discussion should be read in conjunction with the consolidated financial statements (unaudited) and related notes contained elsewhere in this report. The reader is assumed to have access to the Company's Form 10-KSB for the previous year ended December 31, 2006, which contains additional statistics and explanations. All numbers, except per share data, are expressed in thousands of dollars, unless otherwise noted.

Forward-Looking Statements

In addition to historical information, this quarterly report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (PSLRA). Such forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those projected, including but not limited to the following: the concentration of loans of the Company's banking subsidiary, particularly with respect to commercial and residential real estate lending; changes in the regulatory environment and increases in associated costs, particularly on-going compliance expenses and resource allocation needs in response to the Sarbanes-Oxley Act and related rules and regulations; vendor quality and efficiency; employee recruitment and retention; the Company's ability to control risks associated with rapidly changing technology, both from an internal perspective as well as for external providers; increased competition among financial institutions; fluctuating interest rate environments; and similar matters. Readers are cautioned not to place undue reliance on the forward-looking statements. The Company undertakes no obligation to publicly revise or update the forward-looking statements to reflect events or circumstances that arise after the date of this release. Readers should also carefully review any risk factors described in its Annual Report on Form 10-KSB, Quarterly Reports on Form 10-QSB and other documents, including any Current Reports on Form 8-K furnished to or filed from time-to-time with the Securities & Exchange Commission. This statement is included for the express purpose of invoking the safe harbor provisions of applicable sections of the Securities Act of 1933, the Securities Exchange Act of 1934 and rules promulgated thereunder.

SUMMARY OF CRITICAL ACCOUNTING POLICIES

The SEC defines critical accounting policies as those that require the application of management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in future periods. Significant accounting policies are described in Note 1 of the Notes to Consolidated Financial Statements for the year ended December 31, 2006 as filed on the Form 10-KSB. Management believes that the following policies and those disclosed in the Notes to Consolidated Financial Statements should be considered critical under the SEC definition:

Allowance for Loan Losses and Reserve for Unfunded Commitments

The allowance for outstanding loans is classified as a contra-asset account offsetting outstanding loans, and the allowance for unfunded commitments is classified as an Other liability on the balance sheet. The allowance for loan losses is established through a provision for loan losses charged against

Table of Contents

earnings. The balances of the allowance for loan losses for outstanding loans and unfunded commitments are maintained at amounts that management believes will be adequate to absorb known and inherent losses in the loan portfolio and commitments to loan funds. The allowances are evaluated on a regular basis by management and are based upon management's periodic review of the collectibility of loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. Revisions to these estimates and assumptions are reasonably possible and may have a material impact on the Company's consolidated financial statements, results of operations, or liquidity.

HIGHLIGHTS

Northwest Bancorporation, Inc.

Nonperforming loans to gross loans	0.26%	0.21%		
Allowance for loan losses to gross loans	1.18%	1.16%		

The Company earned \$495 thousand in the first-quarter 2007, a decrease of 19% when compared to net income of \$609 thousand for the same quarter last year. The reduction in income was the result of higher non-interest expense, detailed below.

Loans and deposits at March 31, 2007 showed growth rates of 11% and 15%, respectively, over March 31, 2006. Total assets grew 15%, year-over-year.

Table of Contents

RESULTS OF OPERATIONS

Net Interest Income

Net interest income is the primary source of the Bank's revenue. Net interest income is the difference between interest income derived from earning assets, primarily loans and investment securities, and interest expense associated with interest-bearing liabilities, primarily deposits, securities sold under agreement to repurchase and borrowed funds. The volume and mix of earning assets and funding sources, market rates of interest, demand for loans, and the availability of deposits affect net interest income.

The March 31, 2007 first-quarter net interest margin as a percentage of earning assets was 4.26%, which was unchanged from the net interest margin reported for the comparable period ended March 31, 2006.

The following table presents condensed balance sheet information for the Bank, together with interest income and yields on first-quarter average interest-earning assets, and interest expense and rates on average interest-bearing liabilities for the three months ended March 31, 2007 compared to March 31, 2006:

Net interest income to average earning assets	4.26%	4.26%

COMMENTS

1. There were no out-of-period adjustments.
2. Yields have not been adjusted on tax-exempt investments to determine a tax-equivalent yield.
3. Bank was not involved in any foreign activities.
4. Non-accrual loan balances are included in average loan balances; however, no interest income is imputed to non-accrual loans.
5. Loan fee income in the amount of \$138 thousand and \$47 thousand is included in loan interest income for 2007 and 2006, respectively.

Table I shows a small deterioration in net interest spread, a reduction of 0.10%, that resulted from a 0.69% increase in interest earned and a 0.79% increase in interest paid.

Market rates of interest during the first-quarter 2007, as measured by the Prime Rate, were 0.83% higher than for the first-quarter 2006. Comparing the change in market rates of interest to rates paid or received by the Bank, we see that interest paid increased by 95% of the change in market rates, while interest received only increased by 83%. This indicates that, overall, Bank liabilities re-priced somewhat more quickly than Bank assets. Compared to other earning assets, loans are more responsive to changes in market rates; they captured 94% of the increase in market rates. With the exception of Federal Funds Sold, the Bank's investments tend to re-price more slowly.

There was no significant change in either the mix of assets or the mix of funding sources when comparing the first-quarter 2007 to the first-quarter 2006.

Table of Contents

The following table sets forth a summary of changes in net interest income due to changes in year-to-date average asset and liability balances (volume) and changes in average rates (rate) for the three month periods ended March 31, 2007 and 2006 (dollars in thousands).

Table II

Change in net interest income	2007	2006	Variance	Change in	Change in rate	Difference in income	Net change in
				income due to change in volume		2007 due to rate change	income due to rate and volume changes
ASSETS							
Loans	\$220,609	\$198,945	\$21,664	411	0.78%	411	\$822
Securities	36,284	37,754	(1,470)	(14)	0.48%	43	29

Securities sold under agreement to repurchase	23,695	17,729	5,966	64	0.55%	26	90
Borrowed funds	5,269	9,289	(4,020)	(76)	1.21%	46	(30)
Junior Subordinated Debentures	5,155	5,155	0	0	0.00%	0	0
Net change, total interest bearing deposits			\$26,480				
Net change in expense on total interest bearing deposits							624
Net increase in net interest income							\$289

Year-to-date, through March 31, 2007, net interest income before the provision for loan losses increased by \$289 thousand over the previous year as interest income increased \$913 thousand and interest expense increased \$624 thousand. In reviewing Table II, the increase in interest income is almost evenly split between increased volume, which accounts for 51% of the increase, and increased rate, which accounts for 49% of the increase. Increased interest expense is tilted somewhat more towards rate, with 54% of the increase in interest expense due to increased rate and 46% due to increase volume. Again, this is indicative of a balance sheet that is slightly liability sensitive.

The net interest margin as a percentage of earning assets for the first-quarter 2007 was 4.26%, which was unchanged from the 4.26% net interest margin reported for first-quarter 2006. The Bank is anticipating that the net interest margin will decline slightly during the year, primarily due to increased competition pushing loan rates down and deposit rates up. Assuming that the mix of earning assets and funding sources remains consistent with the current mix, the decline is budgeted to be as much as 0.19% by year-end; however, the Bank has not experienced any deterioration through the end of the first-quarter 2007.

The Bank has not budgeted for either improvement or deterioration in the net interest margin due to changes in market rates. The Bank strives to maintain a neutral interest rate position, so that net interest income is not significantly affected by changes in market rates. The following discussion and table outline the process that the Bank goes through to measure its interest rate risk vulnerability and presents the results of the most recent analysis accomplished by the Bank.

Rate Shock

Presented below are the results of the analysis performed on the Bank's financial information as of March 31, 2007. Generally, our analyses have been supportive of Bank management's desire to limit

Table of Contents

volatility of net interest income to no more than plus or minus ten-percent when applying an interest rate shock of plus or minus two-hundred basis points. Rate increases and decreases of 1.00%, 2.00% and 3.00% were modeled. The results of the net interest income analysis performed March 31, 2007 are within established limits. The goal that has been established for change in economic value of equity seeks to limit the negative impact of a change in rates of plus or minus two-hundred basis points to no more that twenty-five percent; again, rate increases and decreases of 1.00%, 2.00% and 3.00% were modeled. The results of the economic value of equity analysis performed March 31, 2007, presented to indicate the estimated effect of changing rates on book value of equity, are within established limits.

Table of Contents*Loan Loss Provision and Allowance*

Below is a summary of the Bank's allowance for loan losses for the first three months of 2007 and 2006:

	March 31	
	2007	2006
	(Dollars in Thousands)	
YTD average net loans	\$217,979	\$196,643
Balance, beginning of period	\$2,586	\$2,252
Add reserve for probable losses on unused loan commitments and off-balance sheet items (OBS)	199	179
Balance, beginning of period, including OBS reserve	2,785	2,431
Loan charge-offs:		
Commercial	0	0
Real Estate	0	0
Installment & Credit Card	0	15
Total Charge-offs	0	15
Recoveries of loans previously charged-off:		
Commercial	0	0
Real Estate	3	5
Installment & Credit Card	0	1
Total Recoveries	3	6
Net Charge-offs	(3)	9
Provision charged to expense	90	90
Balance, end of year, prior to adjustment for off-balance sheet items	2,878	2,512
Reclassification of reserve for probable losses on unused loan commitments and off-balance sheet items to Other liabilities	(248)	(190)
Balance, end of year	\$2,630	\$2,322

Ratio of net charge-offs during period to average net loans outstanding (-0.01%) 0.02%

The year-to-date March 31, 2007 provision for loan losses was \$90 thousand, which is the same as the \$90 thousand expensed in the same period last year. The level of the provision in 2007, primarily, supports growth in the portfolio, rather than any change in overall portfolio credit quality. Changes in the loan loss provision for the remainder of 2007 is contingent upon future loan growth as there is very little benefit available from improvement in the overall credit quality of the portfolio.

Year-to-date March 31, 2007 net loan recoveries were \$3 thousand, compared to net losses of \$9 thousand reported for the same period in 2006. Annualized net loan losses (recoveries) to average outstanding loans were insignificant for first three months of each year, with 2007 at (-0.01%), compared to 0.02% for the first three months of 2006.

The allowance for loan losses at March 31, 2007 was 1.18% of period end (gross) loans compared to 1.18% and 1.16% at December 31, 2006 and March 31, 2006, respectively. At March 31, 2007, the allowance for loan losses as a percentage of net nonperforming loans was 461% or 4.6 times the level of net nonperforming loans. That compares to

572%, or 5.7 times, at March 31, 2006. The following table details the allocation of balances in the reserve for loan and lease losses, by category (dollars in thousands):

Table of Contents

Allocation of balances in the ALLL, by category	March 31, 2007		March 31, 2006	
	<u>Amount</u>	<u>% of allowance</u>	Amount	<u>% of allowance to total</u>
		<u>to total allowance</u>		<u>allowance</u>
Construction and land development (pass)	\$548	19.04%	\$369	14.69%
Secured by farmland (pass)	2	0.07%	1	0.04%
Home equity loans (pass)	43	1.49%	37	1.47%
Revolving loans secured by 1-4 family residential (pass)	22	0.76%	89	3.54%
Secured by multi-family residential (pass)	104	3.61%	64	2.55%
Secured by non-farm, non-residential real estate (pass)	562	19.53%	356	14.17%
Commercial and industrial loans (pass)	343	11.92%	276	10.99%
Loans to individuals (pass)	113	3.93%	165	6.57%
Credit card loans	90	3.13%	120	4.78%
All other loans and leases (pass)	2	0.07%	3	0.12%
Mortgage loans held for sale	1	0.03%	1	0.04%
Specifically Identified Potential Loss *	702	24.39%	824	32.80%
Commitments to Lend under Lines/Letters of Credit	249	8.65%	190	7.56%
Supplementary Allowance/Non-specific Factors	97	3.38%	17	0.68%
	\$2,878	100.00%	\$2,512	100.00%

* Classified and criticized loans are individually analyzed, at least quarterly, to determine loss potential. Allocated reserves related to classified and criticized loans, which includes impaired loans, are reported as Specifically Identified Potential Loss. While a loan may be specifically reserved for, that does not necessarily mean that a loss on the loan is likely. When a loss on a loan is identified as likely, the loan is immediately written-down to a level that collateral liquidation or other repayment sources are expected to support.

The following table shows a summary of non-accrual loans, loans past due 90 days or more and still accruing interest, and other real estate owned for the periods covered in this report:

Non-performing assets	March 31	
	2007	2006
	(Dollars in Thousands)	
Loans accounted for on a non-accrual basis	\$570	\$388
Loans contractually past due ninety days or more as to interest or principal	-	18
Foreclosed assets	-	5
Total nonperforming assets	\$570	\$411

At March 31, 2007, net nonperforming assets as a percentage of total assets was 0.19%. That compares to total net nonperforming assets to total assets of 0.16% at March 31, 2006.

Non-interest Income

Year-to-date March 31, 2007 non-interest income was \$508 thousand, an increase of \$5 thousand, or 1%, from the same period in 2006. Account service charge income, (a sub-component of Fees and service charges), declined about \$9 thousand year-over-year, with most of the reduction due to a lower volume of non-sufficient funds (NSF) service charges. NSF service charge income has been declining over the past several years, which is attributable to increased usage of electronic or other non-check based

Table of Contents

banking options (Internet Banking, Bill Pay, debit and credit cards). Offsetting the reduction in account service charge income, and the result of increased customer usage of debit and credit cards, was commission income earned in the form of bank card interchange income. Interchange income is paid by merchants and ATM and point-of-sale (POS) networks to credit and debit card issuer banks each time the issuer bank's customer makes a POS purchase or an ATM withdrawal. The Bank issues both debit and credit cards and has seen the dollar volume of customer usage increase significantly over the past several years. In the first-quarter 2007, interchange income increased \$9 thousand, or 19%, when compared to the same quarter in 2006. Non-interest income from the origination and sale of residential mortgages was \$135 thousand through March 31, 2007, up \$5 thousand from the same period last year, in line with a 5% increase in origination volume.

With the exception of income generated from the origination and sale of residential mortgages, where the first-quarter of the year is typically the lowest quarter of the year, non-interest income throughout the remainder of the year is expected to remain consistent with first-quarter 2007 results.

Non-interest Expense

Year-to-date March 31, 2007 non-interest expense was \$2,525 thousand, an increase of \$457 thousand or 22% over the same period in 2006. The largest increase in non-interest expense relates to the Bank's decision to increase the number of commercial loan officers that it employs from 7 to 11. This increase in the number of personnel was the primary reason for an increase in employee compensation expense of \$173 thousand, or 14%. One-time non-recurring expenses of \$66 thousand related to hiring the 4 new loan officers were paid during the first-quarter 2007 and are reflected in non-interest expense this year; there were no similar expenses during the first-quarter last year. Occupancy and FF&E were up sharply, \$56 thousand, or 17%, as normal monthly expenses related to the Bank's new Ruby branch, lease expense related to an additional 4,000 square feet at the Bank's headquarters location and lease expense related to property being held for future branch expansion are reflected in first-quarter 2007 results, but not the results for the same period in the prior year. Other operating expenses (not including the \$66 thousand non-recurring expense related to hiring the 4 new loan officers) show an increase of \$162 thousand, or 34%; of that increase, \$38 thousand relates to sponsorship of the INB Performing Arts Center and an additional \$20 thousand is increased advertising expense. The remainder of the increase is disbursed among a variety of line items and results from growth in assets and the number of Bank customers.

Non-interest expense will continue to run significantly higher than for the same period in the prior year throughout the remainder of the year, as much of the increase is budgeted, is related to the increase in the number of loan officers employed or to the addition of 2 new branches that will open later this year, and is intended to position the Bank to increase revenues in 2008 and 2009.

BALANCE SHEET*Loans*

At March 31, 2007, the Bank reported \$220,024 thousand in net loans, including loans-held-for-sale; this is an increase of \$3,327 thousand and \$22,652 thousand, or 1.5% and 11.5%, respectively, over loans reported at December 31, 2006 and March 31, 2006.

Net loan production during the first-quarter was below expectations; in spite of the fact that over \$25 million in new loans was booked, along with \$8 million in loans renewed. Loan pay-offs were

Table of Contents

approximately \$17 million and pay-downs on lines of credit reduced the first-quarter net increase in loan production to \$3 million. The Bank has budgeted loan growth in excess of 15% for the year, which means that production, net of pay-offs, will need to increase substantially during the final three quarters in order to meet budget. Historically, the 2nd and 3rd quarters of the year have been the best quarters during the year for net loan growth.

Competition in the Bank's primary market area has resulted in downward pressure on loan rates; however, the Bank has been able, for the time being, to maintain its pricing discipline, which is reflected in an average weighted interest rate on loans produced in the first-quarter of 8.56%.

The Bank maintains relationships with several other community institutions, whereby it purchases participations in loans made by those institutions. This is an important part of the Bank's business, with participations purchased accounting for approximately 15% of total loans outstanding during the periods discussed in this Report. The originating institutions, typically, are interested in selling a participation in loans originated by them because of regulatory limitations on the amount that they are allowed to lend to one borrower (as a rule, an amount equal to 15% or 20% of their capital). The Bank is interested in buying such participations in that they are good earning assets, when compared to other investment options and because it diversifies the Bank's investments outside of its primary market area. The Bank does not normally have contact with the borrower on participations purchased and, instead, relies on the originating institution to properly administer the credit; consequently, the Bank reviews the financial performance and the credit culture of each participant institution prior to the purchase of loan participations from such institution. The Bank underwrites each loan participation purchased, utilizing substantially the same standards applied to Bank-originated loans, and makes an independent credit decision as to whether or not to become involved in a loan originated by another financial institution.

The Bank is focused on credit quality and appropriate loan structure. The Bank, of course, has passed on credits that don't meet its standards for loan quality (basically, apparent ability to repay); in addition, the Bank has passed on credits that are not appropriately priced for the Bank's business model or where other conditions of the loan are not, in the Bank's opinion, representative of sound lending practices on the Bank's part, or supportive of long-term benefit to the borrower. Bank management will curtail loan production and Bank asset growth if such growth is dependent upon booking credits that do not meet its credit quality or loan structure standards. However, for the remainder of this year and, to the extent that the general business climate over the next few years can be forecasted, Bank management believes that there is ample opportunity for quality loan growth in its market area. The Bank expects to report double-digit percentage loan growth this year and, assuming a continued favorable business climate in its market area, over the next several years.

Securities

The Bank presently has \$32,329 thousand in securities classified as available-for-sale and \$3,866 thousand in securities classified as held-to-maturity at March 31, 2007. Almost all of these securities are pledged as collateral for public deposits in Washington and Idaho, to support the Bank's repurchase account program and to the Federal Reserve Bank of San Francisco to support balances in its Treasury, Tax and Loan deposit account and as collateral for funds on deposit by U.S. Bankruptcy Trustees. With the exception of one bond in the amount of \$500 thousand, all of the securities are obligations of the U.S. Treasury, U.S. Agencies or, in the held-to-maturity portfolio, municipal governments.

There has been no significant change
