

GREAT SOUTHERN BANCORP INC
Form 10-Q
August 05, 2011

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES ACT OF 1934

For the Quarterly Period ended June 30, 2011

Commission File Number 0-18082

GREAT SOUTHERN BANCORP, INC.

(Exact name of registrant as specified in its charter)

Maryland
(State of Incorporation)

43-1524856
(IRS Employer Identification Number)

1451 E. Battlefield, Springfield, Missouri
(Address of Principal Executive Offices)

65804
(Zip Code)

(417) 887-4400
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data file required to be submitted and posted pursuant to Rule 405 of regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "accelerated filer," "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

(Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes / / No /X/

The number of shares outstanding of each of the registrant's classes of common stock: 13,461,739 shares of common stock, par value \$.01, outstanding at August 4, 2011.

GREAT SOUTHERN BANCORP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1: BASIS OF PRESENTATION

The accompanying unaudited interim consolidated financial statements of Great Southern Bancorp, Inc. (the "Company" or "Great Southern") have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. The financial statements presented herein reflect all adjustments which are, in the opinion of management, necessary to fairly present the financial condition, results of operations and cash flows of the Company for the periods presented. Those adjustments consist only of normal recurring adjustments. Operating results for the three and six months ended June 30, 2011 are not necessarily indicative of the results that may be expected for the full year. The consolidated statement of financial condition of the Company as of December 31, 2010, has been derived from the audited consolidated statement of financial condition of the Company as of that date. Certain prior periods' amounts have been reclassified to conform to the current period presentation. These reclassifications had no effect on net income.

Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for 2010 filed with the Securities and Exchange Commission.

NOTE 2: OPERATING SEGMENTS

The Company's banking operation is its only reportable segment. The banking operation is principally engaged in the business of originating residential and commercial real estate loans, construction loans, commercial business loans and consumer loans and funding these loans through deposits attracted from the general public and correspondent account relationships, brokered deposits and borrowings from the Federal Home Loan Bank ("FHLBank") and others. The operating results of this segment are regularly reviewed by management to make decisions about resource allocations and to assess performance.

Revenue from segments below the reportable segment threshold is attributable to three operating segments of the Company. These segments include insurance services, travel services and investment services. Selected information is not presented separately for the Company's reportable segment, as there is no material difference between that information and the corresponding information in the consolidated financial statements.

NOTE 3: COMPREHENSIVE INCOME

The FASB's Accounting Standards Codification ("FASB ASC") Topic 220 requires the reporting of comprehensive income and its components. Comprehensive income is defined as the change in equity from transactions and other events and circumstances from non-owner sources, and excludes investments by and distributions to owners. Comprehensive income includes net income and other items of comprehensive income meeting the above criteria. The Company's only component of other comprehensive income is the unrealized gains and losses on available-for-sale securities.

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

	Three Months Ended June 30,	
	2011	2010
	(In Thousands)	
Net unrealized gain on available-for-sale securities	\$9,332	\$4,204
Non-credit component of unrealized gain on available-for-sale debt securities for which a portion of an other-than-temporary impairment has been recognized	571	—
Other-than-temporary impairment loss recognized in earnings on available-for-sale debt securities	(400) —
Less reclassification adjustment for gain included in net income	—	3,465
Other comprehensive income, before tax effect	9,503	739
Tax expense	3,326	259
Change in unrealized gain on available-for-sale securities, net of income taxes	\$6,177	\$480
	Six Months Ended June 30,	
	2011	2010
	(In Thousands)	
Net unrealized gain on available-for-sale securities	\$6,620	\$3,602
Non-credit component of unrealized gain on available-for-sale debt securities for which a portion of an other-than-temporary impairment has been recognized	705	(435
Other-than-temporary impairment loss recognized in earnings on available-for-sale debt securities	(400) —
Less reclassification adjustment for gain included in net income	—	3,465
Other comprehensive income (loss), before tax effect	6,925	(298
Tax expense (benefit)	2,424	(104
Change in unrealized gain (loss) on available-for-sale securities, net of income taxes	\$4,501	\$(194

The components of accumulated other comprehensive income, included in stockholders' equity, are as follows:

	June 30, 2011	December 31, 2010
	(In Thousands)	
Net unrealized gain on available-for-sale securities	\$13,499	\$7,279
Net unrealized loss on available-for-sale debt securities for which a portion of an other-than-temporary impairment has been recognized	(80) (785
	13,419	6,494
Tax expense	4,697	2,273
Net-of-tax amount	\$8,722	\$4,221

NOTE 4: RECENT ACCOUNTING PRONOUNCEMENTS

In June 2011, the FASB issued Accounting Standards Update (ASU) No. 2011-05 to amend FASB ASC Topic 220, Comprehensive Income: Presentation of Comprehensive Income. The purpose of the Update is to improve the comparability, consistency and transparency of financial reporting related to other comprehensive income. It eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. Instead, the components of other comprehensive income must either be presented with net income in a single continuous statement of comprehensive income or as a separate but consecutive statement following the statement of operations. Regardless of which method is used, adjustments for items that are reclassified from other comprehensive income to net income must be presented on the face of the financial statements. The Update is effective on a retrospective basis for interim and annual reporting periods beginning after December 15, 2011, and is not expected to have a material impact on the Company's financial position or results of operations.

In May 2011, the FASB issued ASU No. 2011-04 to amend FASB ASC Topic 820, Fair Value Measurement: Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs. The Update amends the GAAP requirements for measuring fair value and for disclosures about fair value measurements to improve consistency between GAAP and IFRSs by changing some of the wording used to describe the requirements, clarifying the intended application of certain requirements and changing certain principles. The Update is effective on a prospective basis for interim and annual reporting periods beginning after December 15, 2011, and is not expected to have a material impact on the Company's financial position or results of operations.

In April 2011, the FASB issued ASU No. 2011-03 to amend FASB ASC Topic 860, Transfers and Servicing. ASC 860 outlines when the transfer of financial assets under a repurchase agreement may or may not be accounted for as a sale. Whether the transferring entity maintains effective control over the transferred financial assets provides the basis for such a determination. The previous requirement that the transferor must have the ability to repurchase or redeem the financial assets before the maturity of the agreement is removed from the assessment of effective control by this Update. The Update is effective on a prospective basis for interim and annual reporting periods beginning on or after December 15, 2011, and is not expected to have a material impact on the Company's financial position or results of operations.

In April 2011, the FASB issued ASU No. 2011-02 to amend FASB ASC Subtopic 310-40, Receivables – Troubled Debt Restructurings by Creditors. The statement clarifies guidance used by creditors to identify troubled debt restructurings and to result in more consistent application of GAAP for debt restructurings. The guidance is effective for interim and annual reporting periods beginning after June 15, 2011. Management is still evaluating the impact of

this Update but at this time it does not expect it to have a material impact on the Company's financial position or results of operations.

NOTE 5: STOCKHOLDERS' EQUITY

Previously, the Company's stockholders approved the Company's reincorporation to the State of Maryland. Under Maryland law, there is no concept of "Treasury Shares." Instead, shares purchased by the Company constitute authorized but unissued shares under Maryland law. Accounting principles generally accepted in the United States of America state that accounting for treasury stock shall conform to state law. The cost of shares purchased by the Company has been allocated to Common Stock and Retained Earnings balances.

NOTE 6: EARNINGS PER SHARE

	Three Months Ended June 30,	
	2011	2010
	(In Thousands, Except Per Share Data)	
Basic:		
Average shares outstanding	13,457	13,431
Net income available to common shareholders	\$5,108	\$4,977
Per share amount	\$0.38	\$0.37
Diluted:		
Average shares outstanding	13,457	13,431
Net effect of dilutive stock options and warrants – based on the treasury stock method using average market price	498	617
Diluted shares	13,955	14,048
Net income available to common shareholders	\$5,108	\$4,977
Per share amount	\$0.37	\$0.35

Options to purchase 614,760 and 423,958 shares of common stock were outstanding at June 30, 2011 and 2010, respectively, but were not included in the computation of diluted earnings per share for each period because the options' exercise prices were greater than the average market prices of the common shares for the three months ended June 30, 2011 and 2010, respectively.

	Six Months Ended June 30,	
	2011	2010
	(In Thousands, Except Per Share Data)	
Basic:		
Average shares outstanding	13,457	13,429
Net income available to common shareholders	\$10,155	\$9,676
Per share amount	\$0.75	\$0.72
Diluted:		
Average shares outstanding	13,457	13,429
Net effect of dilutive stock options and warrants – based on the treasury stock method using average market price	531	607
Diluted shares	13,988	14,036
Net income available to common shareholders	\$10,155	\$9,676
Per share amount	\$0.73	\$0.69

Options to purchase 529,160 and 427,308 shares of common stock were outstanding at June 30, 2011 and 2010, respectively, but were not included in the computation of diluted earnings per share for each period because the options' exercise prices were greater than the average market prices of the common shares for the six months ended June 30, 2011 and 2010, respectively.

The held-to-maturity securities at June 30, 2011, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
	(In Thousands)	
One year or less	\$840	\$959
After five through ten years	1,025	1,178
	\$1,865	\$2,137

Certain investments in debt and marketable equity securities are reported in the financial statements at an amount less than their historical cost. Total fair value of these investments at June 30, 2011 and December 31, 2010, respectively, was approximately \$174,209,000 and \$298,813,000, which is approximately 20.92% and 38.77% of the Company's available-for-sale and held-to-maturity investment portfolio, respectively.

Based on evaluation of available evidence, including recent changes in market interest rates, credit rating information and information obtained from regulatory filings, management believes the declines in fair value for these debt securities are temporary at June 30, 2011.

During the three and six months ended June 30, 2011, the Company determined that the impairment of a non-agency collateralized mortgage obligation with a book value of \$1.8 million had become other than temporary. Consequently, the Company recorded a \$400,000 pre-tax charge to income. Based on evaluations of investment securities during the three and six months ended June 30, 2010, none were determined to be other-than-temporarily impaired.

The following table shows the Company's gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at June 30, 2011 and December 31, 2010:

Description of Securities	June 30, 2011		December 31, 2010		Total

No securities were sold during the three and six months ended June 30, 2011, and therefore, no gains or losses on sales were realized. Gross gains of \$3.5 million and gross losses of \$0 resulting from sales of available-for-sale securities were realized for the three and six months ended June 30, 2010. Gains and losses on sales of securities are determined on the specific-identification method.

Other-than-temporary Impairment. Upon acquisition of a security, the Company decides whether it is within the scope of the accounting guidance for beneficial interests in securitized financial assets or will be evaluated for impairment under the accounting guidance for investments in debt and equity securities.

The accounting guidance for beneficial interests in securitized financial assets provides incremental impairment guidance for a subset of the debt securities within the scope of the guidance for investments in debt and equity securities. For securities where the security is a beneficial interest in securitized financial assets, the Company uses the beneficial interests in securitized financial asset impairment model. For securities where the security is not a beneficial interest in securitized financial assets, the Company uses the debt and equity securities impairment model. The Company does not currently have securities within the scope of this guidance for beneficial interests in securitized financial assets.

The Company routinely conducts periodic reviews to identify and evaluate each investment security to determine whether an other-than-temporary impairment has occurred. The Company considers the length of time a security has been in an unrealized loss position, the relative amount of the unrealized loss compared to the carrying value of the security, the type of security and other factors. If certain criteria are met, the Company performs additional review and evaluation using observable market values or various inputs in economic models to determine if an unrealized loss is other-than-temporary. The Company uses quoted market prices for marketable equity securities and uses broker pricing quotes based on observable inputs for equity investments that are not traded on a stock exchange. For non-agency collateralized mortgage obligations, to determine if the unrealized loss is other-than-temporary, the Company projects total estimated defaults of the underlying assets (mortgages) and multiplies that calculated amount by an estimate of realizable value upon sale in the marketplace (severity) in order to determine the projected collateral loss. The Company also evaluates any current credit enhancement underlying these securities to determine the impact on cash flows. If the Company determines that a given security position will be subject to a write-down or loss, the Company records the expected credit loss as a charge to earnings.

Credit Losses Recognized on Investments. Certain debt securities have experienced fair value deterioration due to credit losses.

The following table provides information about debt securities for which only a credit loss was recognized in income and other losses are recorded in other comprehensive income.

Included in certain loan categories in the impaired loans are troubled debt restructurings that were classified as impaired. At June 30, 2011, the Company had \$7.4 million of construction loans, \$7.4 million of residential mortgage loans, \$10.2 million of commercial real estate loans, \$51,000 of commercial business loans and \$213,000 of consumer loans that were modified in troubled debt restructurings and impaired. Of the total troubled debt restructurings, \$22.6 million were accruing interest at June 30, 2011. At December 31, 2010, the Company had \$6.5 million of construction loans, \$5.5 million of residential mortgage loans, \$8.2 million of commercial real estate loans, \$57,000 of other commercial loans and \$150,000 of consumer loans that were modified in troubled debt restructurings and impaired. Of the total troubled debt restructurings, \$16.5 million were accruing interest at December 31, 2010.

The Company reviews the credit quality of its loan portfolio using an internal grading system that classifies loans as “Satisfactory,” “Watch,” “Special Mention” and “Substandard.” Substandard loans are characterized by the distinct possibility that the Bank will sustain some loss if certain deficiencies are not corrected. Special mention loans possess

potential weaknesses that deserve management's close attention but do not expose the Bank to a degree of risk that warrants substandard classification. Loans classified as watch are being monitored because of indications of potential weaknesses or deficiencies that may require future classification as special mention or substandard. Loans not meeting any of the criteria previously described are considered satisfactory. The FDIC-covered loans are evaluated using this internal grading system. However, since the loans are accounted for in pools and are currently substantially covered through loss sharing agreements with the FDIC, all of the loan pools were considered satisfactory at June 30, 2011 and December 31, 2010, respectively. See Note 9 for further discussion of the acquired loan pools and loss sharing agreements. The loan grading system is presented by loan class below:

	Satisfactory	Watch	June 30, 2011 Special Mention (In Thousands)	Substandard	Total

NOTE 9: LOSS SHARING AGREEMENTS AND FDIC INDEMNIFICATION ASSETS

On March 20, 2009, Great Southern Bank entered into a purchase and assumption agreement with loss share with the Federal Deposit Insurance Corporation (FDIC) to assume all of the deposits (excluding brokered deposits) and acquire certain assets of TeamBank, N.A., a full service commercial bank headquartered in Paola, Kansas. A detailed discussion of this transaction is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, under the section titled "Item 8. Financial Statements and Supplementary Information."

The loans, commitments and foreclosed assets purchased in the TeamBank transaction are covered by a loss sharing agreement between the FDIC and Great Southern Bank which affords the Bank significant protection. Under the loss sharing agreement, the Bank will share in the losses on assets covered under the agreement (referred to as covered assets). On losses up to \$115.0 million, the FDIC has agreed to reimburse the Bank for 80% of the losses. On losses exceeding \$115.0 million, the FDIC has agreed to reimburse the Bank for 95% of the losses. Realized losses covered by the loss sharing agreement include loan contractual balances (and related unfunded commitments that were acquired), accrued interest on loans for up to 90 days, the book value of foreclosed real estate acquired, and certain direct costs, less cash or other consideration received by the Bank. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. The value of this loss sharing agreement was considered in determining fair values of loans and foreclosed assets acquired. The loss sharing agreement is subject to the Bank following servicing procedures as specified in the agreement with the FDIC. The expected reimbursements under the loss sharing agreement were recorded as an indemnification asset at their preliminary estimated fair value on the

acquisition date. A discount was recorded in conjunction with the fair value of the acquired loans and the amount accreted to yield during the three and six months ended June 30, 2011 was \$668,000 and \$1.4 million, respectively. The amount accreted to yield during the three and six months ended June 30, 2010 was \$400,000 and \$700,000, respectively.

On September 4, 2009, Great Southern Bank entered into a purchase and assumption agreement with loss share with the FDIC to assume all of the deposits and acquire certain assets of Vantus Bank, a full service thrift headquartered in Sioux City, Iowa. A detailed discussion of this transaction is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, under the section titled "Item 8. Financial Statements and Supplementary Information."

The loans, commitments and foreclosed assets purchased in the Vantus Bank transaction are covered by a loss sharing agreement between the FDIC and Great Southern Bank which affords the Bank significant protection. Under the loss sharing agreement, the Bank will share in the losses on assets covered under the agreement (referred to as covered assets). On losses up to \$102.0 million, the FDIC has agreed to reimburse the Bank for 80% of the losses. On losses exceeding \$102.0 million, the FDIC has agreed to reimburse the Bank for 95% of the losses. Realized losses covered by the loss sharing agreement include loan contractual balances (and related unfunded commitments that were acquired), accrued interest on loans for up to 90 days, the book value of foreclosed real estate acquired, and certain direct costs, less cash or other consideration received by the Bank. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. The value of this loss sharing agreement was considered in determining fair values of loans and foreclosed assets acquired. The loss sharing agreement is subject to the Bank following servicing procedures as specified in the agreement with the FDIC. The expected reimbursements under the loss sharing agreement were recorded as an indemnification asset at their preliminary estimated fair value on the acquisition date. A discount was recorded in conjunction with the fair value of the acquired loans and the amount accreted to yield during the three and six months ended June 30, 2011 was \$247,000 and \$523,000, respectively. The amount accreted to yield during the three and six months ended June 30, 2010 was \$300,000 and \$550,000, respectively.

Fair Value and Expected Cash Flows. At the time of these acquisitions, the Company determined the fair value of the loan portfolios based on several assumptions. Factors considered in the valuations were projected cash flows for the loans, type of loan and related collateral, classification status, fixed or variable interest rate, term of loan, current discount rates and whether or not the loan was amortizing. Loans were grouped together according to similar characteristics and were treated in the aggregate when applying various valuation techniques. Management also estimated the amount of credit losses that were expected to be realized for the loan portfolios. The discounted cash flow approach was used to value each pool of loans. For non-performing loans, fair value was estimated by calculating the present value of the recoverable cash flows using a discount rate based on comparable corporate bond rates. This valuation of the acquired loans is a significant component leading to the valuation of the loss sharing assets recorded.

The amount of the estimated cash flows expected to be received from the acquired loan pools in excess of the fair values recorded for the loan pools is referred to as the accretable yield. The accretable yield is recognized as interest income over the estimated lives of the loans. The Company continues to evaluate the fair value of the loans including cash flows expected to be collected. Increases in the Company's cash flow expectations are recognized as increases to the accretable yield while decreases are recognized as impairments through the allowance for loan losses. During the three and six months ended June 30, 2011, increases in expected cash flows related to both acquired loan portfolios resulted in adjustments of \$7.9 million and \$11.3 million, respectively, to the accretable yield to be spread over the estimated remaining lives of the loans on a level-yield basis. During the year ended December 31, 2010, similar such adjustments totaling \$58.9 million were made to the accretable yield. The current year increases in expected cash flows also reduced the amount of expected reimbursements under the loss sharing agreements. During the three and six months ended June 30, 2011, this resulted in corresponding adjustments of \$7.2 million and \$10.1 million, respectively, to the indemnification assets to be amortized on a level-yield basis over the remainder of the loss sharing agreements or the remaining expected lives of the loan pools, whichever is shorter. During the second half of the year ended December 31, 2010, similar such adjustments totaling \$51.8 million were made to the indemnification assets. The impact of adjustments on the Company's financial results for the current reporting period is shown below:

Three Months Ended June 30, 2011	Six Months Ended June 30, 2011
(In Thousands, Except Per Share and Basis Points Data)	

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

Impact on net interest income/ net interest margin (in basis points)	\$12,814	166 bps	\$25,481	164 bps
Non-interest income	(11,491)		(22,753)	
Net impact to pre-tax income	\$1,323		\$2,728	
Net impact net of taxes	\$860		\$1,773	
Impact to diluted earnings per common share	\$0.07		\$0.13	

Because these adjustments will be recognized over the estimated remaining lives of the loan pools, they will impact future periods as well. The majority of the remaining \$25.3 million of accretable yield adjustment affecting interest income and \$(22.1) million of adjustment to the indemnification assets affecting non-interest income is expected to be recognized over the next year, with \$15.2 million of interest income and \$(13.5) million of non-interest income (expense) expected to be recognized in the remainder of 2011. Additional adjustments may be recorded in future periods as the Company continues to estimate expected cash flows from the acquired loan pools.

The loss sharing asset is measured separately from the loan portfolio because it is not contractually embedded in the loans and is not transferable with the loans should the Bank choose to dispose of them. Fair value was estimated using projected cash flows available for loss sharing based on the credit adjustments estimated for each loan pool (as discussed above) and the loss sharing percentages outlined in the Purchase and Assumption Agreement with the FDIC. These cash flows were discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. The loss sharing asset is also separately measured from the related foreclosed real estate.

TeamBank FDIC Indemnification Asset. The following tables present the balances of the FDIC indemnification asset related to the TeamBank transaction at June 30, 2011 and December 31, 2010. Gross loan balances (due from the borrower) were reduced approximately \$240.4 million since the transaction date through repayments by the borrower, transfers to foreclosed assets or charge-offs to customer loan balances.

Accretable discount on FDIC indemnification asset	(3,850)	(109)
FDIC indemnification asset	\$33,338		\$3,127	

Changes in the accretable yield for acquired loan pools were as follows for the three months ended June 30, 2011 and 2010:

	TeamBank		Vantus Bank	
	(In Thousands)			
Balance, April 1, 2010	\$27,681		\$34,939	
Accretion	(3,477)	(4,495)
Balance, June 30, 2010	\$24,204		\$30,444	
Balance, April 1, 2011	\$27,287		\$31,882	
Accretion	(10,854)	(7,364)
Reclassification from nonaccretable difference(1)	6,712		2,365	
Balance, June 30, 2011	\$23,145		\$26,883	

1) Represents increases in estimated cash flows expected to be received from the acquired loan pools, primarily due to lower estimated credit losses. The numbers also include changes in expected accretion of the loan pools totaling \$2.5 million and \$581,000 for TeamBank and Vantus Bank, respectively.

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

Changes in the accretable yield for acquired loan pools were as follows for the six months ended June 30, 2011 and 2010:

	TeamBank	Vantus Bank
	(In Thousands)	
Balance, January 1, 2010	\$31,300	\$39,023
Accretion	(7,096) (8,579
Balance, June 30, 2010	\$24,204	\$30,444
Balance, January 1, 2011	\$36,765	\$35,796
Accretion	(21,523) (15,510
Reclassification from nonaccretable difference(1)	7,903	6,597
Balance, June 30, 2011	\$23,145	\$26,883

1) Represents increases in estimated cash flows expected to be received from the acquired loan pools, primarily due to lower estimated credit losses. The numbers also include changes in expected accretion of the loan pools totaling \$2.8 million and \$1.8 million for TeamBank and Vantus Bank, respectively.

NOTE 10: FORECLOSED ASSETS HELD FOR SALE

Major classifications of foreclosed assets were as follows:

	June 30, 2011	December 31, 2010
	(In Thousands)	
One-to four-family construction	\$1,303	\$2,510
Subdivision construction	19,969	19,816
Land development	18,148	10,620

NOTE 13: FAIR VALUE MEASUREMENT

ASC Topic 820, Fair Value Measurements, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Topic 820 also specifies a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Quoted prices in active markets for identical assets or liabilities (Level 1): Inputs that are quoted unadjusted prices in active markets for identical assets that the Company has the ability to access at the measurement date. An active market for the asset is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Other observable inputs (Level 2): Inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity including quoted prices for similar assets, quoted prices for securities in inactive markets and inputs derived principally from or corroborated by observable market data by correlation or other means.
- Significant unobservable inputs (Level 3): Inputs that reflect assumptions of a source independent of the reporting entity or the reporting entity's own assumptions that are supported by little or no market activity or observable inputs.

Financial instruments are broken down as follows by recurring or nonrecurring measurement status. Recurring assets are initially measured at fair value and are required to be remeasured at fair value in the financial statements at each reporting date. Assets measured on a nonrecurring basis are assets that, due to an event or circumstance, were required to be remeasured at fair value after initial recognition in the financial statements at some time during the reporting period.

The following is a description of inputs and valuation methodologies used for assets recorded at fair value on a recurring basis and recognized in the accompanying balance sheets at June 30, 2011, as well as the general classification of such assets pursuant to the valuation hierarchy.

Securities Available for Sale. Investment securities available for sale are recorded at fair value on a recurring basis. The fair values used by the Company are obtained from an independent pricing service, which represent either quoted market prices for the identical asset or fair values determined by pricing models, or other model-based valuation techniques, that consider observable market data, such as interest rate volatilities, LIBOR yield curve, credit spreads and prices from market makers and live trading systems. Recurring Level 1 securities include exchange traded equity securities. Recurring Level 2 securities available for sale include U.S. government agency securities, mortgage-backed securities, collateralized mortgage obligations, Small Business Administration (SBA) loan pools, state and municipal bonds, corporate bonds and equity securities. Inputs used for valuing Level 2 securities include observable data that may include dealer quotes, benchmark yields, market spreads, live trading levels and market consensus prepayment speeds, among other things. Additional inputs include indicative values derived from the independent pricing service's proprietary computerized models. No securities available for sale were included in the category of Recurring Level 3 securities at or for the three and six months ended June 30, 2011.

Mortgage Servicing Rights. Mortgage servicing rights do not trade in an active, open market with readily observable prices. Accordingly, fair value is estimated using discounted cash flow models. Due to the nature of the valuation inputs, mortgage servicing rights are classified within Level 3 of the hierarchy.

	Fair value measurements at June 30, 2011, using			
	Fair value June 30, 2011	Quoted prices in active markets for identical assets (Level 1)	Other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
	(In Thousands)			
U.S. government agencies	\$24,079	\$—	\$24,079	\$—
Collateralized mortgage obligations	4,914	—	4,914	—
Mortgage-backed securities	639,841	—	639,841	—
Small Business Administration loan pools	59,197	—	59,197	—
Corporate bonds	370	—	370	—
States and political subdivisions	100,415	—	100,415	—
Equity securities	2,243	558	1,685	—
Mortgage servicing rights	450	—	—	450

	Fair value measurements at December 31, 2010, using			
	Fair value December 31, 2010	Quoted prices in active markets for identical assets (Level 1)	Other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
	(In Thousands)			
U.S. government agencies	\$3,980	\$—	\$3,980	\$—
Collateralized mortgage obligations	7,680	—	7,680	—
Mortgage-backed securities	599,211	—	599,211	—
Small Business Administration loan pools	60,914	—	60,914	—
Corporate bonds	21	—	21	—
States and political subdivisions	95,617	—	95,617	—
Equity securities	2,123	630	1,493	—
Mortgage servicing rights	637	—	—	637

The Company considers transfers between the levels of the hierarchy to be recognized at the end of related reporting periods. From December 31, 2010 to June 30, 2011, no assets for which fair value is measured on a recurring basis transferred between any levels of the hierarchy.

The following is a reconciliation of the beginning and ending balances of recurring fair value measurements recognized in the accompanying balance sheet using significant unobservable (Level 3) inputs.

Balance, June 30	\$450	\$915

The following is a description of valuation methodologies used for assets measured at fair value on a nonrecurring basis at June 30, 2011, as well as the general classification of such assets pursuant to the valuation hierarchy.

Impaired Loans. A loan is considered to be impaired when it is probable that all of the principal and interest due may not be collected according to its contractual terms. Generally, when a loan is considered impaired, the amount of reserve required under FASB ASC 310, Receivables, is measured based on the fair value of the underlying collateral. The Company makes such measurements on all material loans deemed impaired using the fair value of the collateral for collateral dependent loans. The fair value of collateral used by the Company is determined by obtaining an observable market price or by obtaining an appraised value from an independent, licensed or certified appraiser, using observable market data. This data includes information such as selling price of similar properties and capitalization rates of similar properties sold within the market, expected future cash flows or earnings of the subject property based on current market expectations, and other relevant factors. In addition, management may apply selling and other discounts to the underlying collateral value to determine the fair value. If an appraised value is not available, the fair value of the impaired loan is determined by an adjusted appraised value including unobservable cash flows.

The Company records impaired loans as Nonrecurring Level 3. If a loan's fair value as estimated by the Company is less than its carrying value, the Company either records a charge-off of the portion of the loan that exceeds the fair value or establishes a reserve within the allowance for loan losses specific to the loan. Loans for which such charge-offs or reserves were recorded during the six months ended June 30, 2011 are shown in the table below (net of reserves).

Foreclosed Assets Held for Sale. Foreclosed assets held for sale are initially recorded at fair value less estimated cost to sell at the date of foreclosure. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less estimated cost to sell. Foreclosed assets held for sale are classified within Level 3 of the fair value hierarchy. The foreclosed assets represented in the table below were re-measured during the six months ended June 30, 2011, subsequent to their initial transfer to foreclosed assets.

The following tables present the fair value measurements of assets measured at fair value during the periods presented on a nonrecurring basis and the level within the fair value hierarchy in which the fair value measurements fall at June 30, 2011 and December 31, 2010:

June 30, 2011		
Fair Value Measurements Using		
Quoted prices in active markets	Other	Significant

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

	Fair value June 30, 2011	for identical assets (Level 1)	observable inputs (Level 2)	unobservable inputs (Level 3)
		(In Thousands)		
Impaired loans	\$ 45,939	\$ —	\$ —	\$ 45,939
Foreclosed assets held for sale	491	—	—	491

	December 31, 2010			
	Fair Value Measurements Using			
		Quoted prices in active markets for identical assets (Level 1)	Other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
	Fair value December 31, 2010	(In Thousands)		
Impaired loans	\$ 80,407	\$ —	\$ —	\$ 80,407
Foreclosed assets held for sale	10,360	—	—	10,360

The following methods were used to estimate the fair value of all other financial instruments recognized in the accompanying balance sheet at amounts other than fair value:

Cash and Cash Equivalents and Federal Home Loan Bank Stock. The carrying amount approximates fair value.

Loans and Interest Receivable. The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Loans with similar characteristics are aggregated for purposes of the calculations. The carrying amount of accrued interest receivable approximates its fair value.

Deposits and Accrued Interest Payable. The fair value of demand deposits and savings accounts is the amount payable on demand at the reporting date, i.e., their carrying amounts. The fair value of fixed maturity certificates of deposit is estimated using a discounted cash flow calculation that applies the rates currently offered for deposits of similar remaining maturities. The carrying amount of accrued interest payable approximates its fair value.

Federal Home Loan Bank Advances. Rates currently available to the Company for debt with similar terms and remaining maturities are used to estimate fair value of existing advances.

Short-Term Borrowings. The carrying amount approximates fair value.

Subordinated Debentures Issued to Capital Trusts. The subordinated debentures have floating rates that reset quarterly. The Company can redeem these instruments at par on a quarterly basis beginning in February (with respect to \$25.8 million of the subordinated debentures) and October (with respect to \$5.2 million of the subordinated debentures) 2012, respectively. The carrying amount of these debentures approximates their fair value.

Structured Repurchase Agreements. Structured repurchase agreements are collateralized borrowings from counterparties. In addition to the principal amount owed, the counterparty also determines an amount that would be owed by either party in the event the agreement is terminated prior to maturity by the Company. The fair values of the structured repurchase agreements are estimated based on the amount the Company would be required to pay to terminate the agreement at the balance sheet date.

Commitments to Originate Loans, Letters of Credit and Lines of Credit. The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the

agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date.

The following table presents estimated fair values of the Company's financial instruments. The fair values of certain of these instruments were calculated by discounting expected cash flows, which method involves significant judgments by management and uncertainties. Fair value is the estimated amount at which financial assets or liabilities could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Because no market exists for certain of these financial instruments and because management does not intend to sell these financial instruments, the Company does not know whether the fair values shown below represent values at which the respective financial instruments could be sold individually or in the aggregate.

The following disclosure relates to financial assets for which it is not practicable for the Company to estimate the fair value at June 30, 2011.

FDIC Indemnification Asset: As part of the 2009 Purchase and Assumption Agreements, the Bank and the FDIC entered into loss sharing agreements. These agreements cover realized losses on loans and foreclosed real estate.

Under the first agreement (TeamBank), the FDIC will reimburse the Bank for 80% of the first \$115 million in realized losses. The FDIC will reimburse the Bank 95% on realized losses that exceed \$115 million. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. This loss sharing asset is measured separately from the loan portfolio because it is not contractually embedded in the loans and is not transferable with the loans or foreclosed assets should the Bank choose to dispose of them. Fair value at the acquisition date (March 20, 2009) was estimated using projected cash flows available for loss sharing based on the credit adjustments estimated for each loan pool and the loss sharing percentages. These cash flows were discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. This loss sharing asset is also separately measured from the related foreclosed real estate. At June 30, 2011, the carrying value of the FDIC indemnification

asset was \$48.1 million, with \$11.9 million of this amount scheduled to be amortized against non-interest income over future periods as a result of the changes in expected losses recognized in the quarter ended June 30, 2011 and in previous periods. Although this asset is a contractual receivable from the FDIC, there is no effective interest rate. The Bank will collect this asset over the next several years. The amount ultimately collected will depend on the timing and amount of collections and charge-offs on the acquired assets covered by the loss sharing agreement. While this asset was recorded at its estimated fair value at March 20, 2009, it is not practicable to complete a fair value analysis of the entire portfolio of loans and foreclosed assets covered by the loss sharing agreement on a quarterly or annual basis in order to estimate the fair value of the FDIC indemnification asset.

Under the second agreement (Vantus Bank), the FDIC will reimburse the Bank for 80% of the first \$102 million in realized losses. The FDIC will reimburse the Bank 95% on realized losses that exceed \$102 million. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. This loss sharing asset is

measured separately from the loan portfolio because it is not contractually embedded in the loans and is not transferable with the loans or foreclosed assets should the Bank choose to dispose of them. Fair value at the acquisition date (September 4, 2009) was estimated using projected cash flows available for loss sharing based on the credit adjustments estimated for each loan pool and the loss sharing percentages. These cash flows were discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. This loss sharing asset is also separately measured from the related foreclosed real estate. At June 30, 2011, the carrying value of the FDIC indemnification asset was \$28.3 million, with \$10.2 million of this amount scheduled to be amortized against non-interest income over future periods as a result of the changes in expected losses recognized in the quarter ended June 30, 2011 and in previous periods. Although this asset is a contractual receivable from the FDIC, there is no effective interest rate. The Bank will collect this asset over the next several years. The amount ultimately collected will depend on the timing and amount of collections and charge-offs on the acquired assets covered by the loss sharing agreement. While this asset was recorded at its estimated fair value at September 4, 2009, it is not practicable to complete a fair value analysis of the entire portfolio of loans and foreclosed assets covered by the loss sharing agreement on a quarterly or annual basis in order to estimate the fair value of the FDIC indemnification asset.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-looking Statements

When used in this Quarterly Report on Form 10-Q and in other filings by the Company with the Securities and Exchange Commission (the "SEC"), in the Company's press releases or other public or shareholder communications, and in oral statements made with the approval of an authorized executive officer, the words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "project," "intends" or similar expressions are intended to identify "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties, including, among other things, (i) expected cost savings, synergies and other benefits from the Company's merger and acquisition activities might not be realized within the anticipated time frames or at all, and costs or difficulties relating to integration matters, including but not limited to customer and employee retention, might be greater than expected; (ii) changes in economic conditions, either nationally or in the Company's market areas; (iii) fluctuations in interest rates; (iv) the risks of lending and investing activities, including changes in the level and direction of loan delinquencies and write-offs and changes in estimates of the adequacy of the allowance for loan losses; (v) the possibility of other-than-temporary impairments of securities held in the Company's securities portfolio; (vi) the Company's ability to access cost-effective funding; (vii) fluctuations in real estate values and both residential and commercial real estate market conditions; (viii) demand for loans and deposits in the Company's market areas; (ix) legislative or regulatory changes that adversely affect the Company's business, including, without limitation, the Dodd-Frank Wall Street Reform and Consumer Protection Act and its implementing regulations, and the new overdraft protection regulations and customers' responses thereto; (x) monetary and fiscal policies of the Federal Reserve Board and the U.S. Government and other governmental initiatives affecting the financial services industry; (xi) results of examinations of the Company and the Bank by their regulators, including the possibility that the regulators may, among other things, require the Company to increase its allowance for loan losses or to write-down assets; (xii) the uncertainties arising from the Company's participation in the TARP Capital Purchase Program, including impacts on employee recruitment and retention and other business and practices, uncertainties concerning the potential redemption by us of the U.S. Treasury's preferred stock investment under the program, including the timing of, regulatory approvals for, and conditions placed upon, any such redemption and uncertainties associated with our anticipated participation in the U.S. Treasury's Small Business Lending Fund; (xiii) costs and effects of litigation, including settlements and judgments; and (xiv) competition. The Company wishes to advise readers that the factors listed above could affect the Company's financial performance and

could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements.

The Company does not undertake-and specifically declines any obligation-to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Critical Accounting Policies, Judgments and Estimates

The accounting and reporting policies of the Company conform with accounting principles generally accepted in the United States and general practices within the financial services industry. The preparation of financial statements in

conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates.

Allowance for Loan Losses and Valuation of Foreclosed Assets

The Company believes that the determination of the allowance for loan losses involves a higher degree of judgment and complexity than its other significant accounting policies. The allowance for loan losses is calculated with the objective of maintaining an allowance level believed by management to be sufficient to absorb estimated loan losses. Management's determination of the adequacy of the allowance is based on periodic evaluations of the loan portfolio and other relevant factors. However, this evaluation is inherently subjective as it requires material estimates of, including, among others, expected default probabilities, loss once loans default, expected commitment usage, the amounts and timing of expected future cash flows on impaired loans, value of collateral, estimated losses, and general amounts for historical loss experience.

The process also considers economic conditions, uncertainties in estimating losses and inherent risks in the loan portfolio. All of these factors may be susceptible to significant change. To the extent actual outcomes differ from management estimates, additional provisions for loan losses may be required that would adversely impact earnings in future periods. In addition, the Bank's regulators could require additional provisions for loan losses as part of their examination process.

Additional discussion of the allowance for loan losses is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2010, under the section titled "Item 1. Business - Allowances for Losses on Loans and Foreclosed Assets." Inherent in this process is the evaluation of individual significant credit relationships. From time to time certain credit relationships may deteriorate due to payment performance, cash flow of the borrower, value of collateral, or other factors. In these instances, management may have to revise its loss estimates and assumptions for these specific credits due to changing circumstances. In some cases, additional losses may be realized; in other instances, the factors that led to the deterioration may improve or the credit may be refinanced elsewhere and allocated allowances may be released from the particular credit. For the periods included in the financial statements contained in this report, management's overall methodology for evaluating the allowance for loan losses has not changed significantly.

In addition, the Company considers that the determination of the valuations of foreclosed assets held for sale involves a high degree of judgment and complexity. The carrying value of foreclosed assets reflects management's best estimate of the amount to be realized from the sales of the assets. While the estimate is generally based on a valuation by an independent appraiser or recent sales of similar properties, the amount that the Company realizes from the sales of the assets could differ materially from the carrying value reflected in the financial statements, resulting in losses that could adversely impact earnings in future periods.

Carrying Value of FDIC-covered Loans and Indemnification Asset

The Company considers that the determination of the carrying value of loans acquired in the March 20, 2009 and September 4, 2009, FDIC-assisted transactions and the carrying value of the related FDIC indemnification assets involve a high degree of judgment and complexity. The carrying value of the acquired loans and the FDIC indemnification assets reflect management's best ongoing estimates of the amounts to be realized on each of these assets. The Company determined initial fair value accounting estimates of the assumed assets and liabilities in accordance with FASB ASC 805, Business Combinations. However, the amount that the Company realizes on these assets could differ materially from the carrying value reflected in its financial statements, based upon the timing of

collections on the acquired loans in future periods. Because of the loss sharing agreements with the FDIC on these assets, the Company should not incur any significant losses. To the extent the actual values realized for the acquired loans are different from the estimates, the indemnification asset will generally be impacted in an offsetting manner due to the loss sharing support from the FDIC. Subsequent to the initial valuation, the Company continues to monitor identified loan pools and related loss sharing assets for changes in estimated cash flows projected for the loan pools, anticipated credit losses and changes in the accretable yield. Analysis of these variables requires significant estimates and a high degree of judgment. See Note 9 “Loss Sharing Agreements and FDIC Indemnification Assets” included in Item 1 for additional information.

Goodwill and Intangible Assets

Goodwill and intangibles assets that have indefinite useful lives are subject to an impairment test at least annually and more frequently if circumstances indicate their value may not be recoverable. Goodwill is tested for impairment using a process that estimates the fair value of each of the Company's reporting units compared with its carrying value. The Company defines reporting units as a level below each of its operating segments for which there is discrete financial information that is regularly reviewed. As of June 30, 2011, the Company has two reporting units to which goodwill has been allocated – the Bank and the Travel division (which is a division of a subsidiary of the Bank). If the fair value of a reporting unit exceeds its carrying value, then no impairment is recorded. If the carrying value amount exceeds the fair value of a reporting unit, further testing is completed comparing the implied fair value of the reporting unit's goodwill to its carrying value to measure the amount of impairment. Intangible assets that are not amortized will be tested for impairment at least annually by comparing the fair values of those assets to their carrying values. At June 30, 2011, goodwill consisted of \$379,000 at the Bank reporting unit and \$877,500 at the Travel reporting unit. Other identifiable intangible assets that are subject to amortization are amortized on a straight-line basis over periods ranging from three to seven years. At June 30, 2011, the amortizable intangible assets consisted of core deposit intangibles of \$3.7 million at the Bank reporting unit and \$22,000 of non-compete agreements at the Travel reporting unit. These amortizable intangible assets are reviewed for impairment if circumstances indicate their value may not be recoverable based on a comparison of fair value.

While the Company believes no impairment existed at June 30, 2011, different conditions or assumptions used to measure fair value of reporting units, or changes in cash flows or profitability, if significantly negative or unfavorable, could have a material adverse effect on the outcome of the Company's impairment evaluation in the future.

Current Economic Conditions

The current economic environment presents financial institutions with unprecedented circumstances and challenges which in some cases have resulted in large declines in the fair values of investments and other assets, constraints on liquidity and significant credit quality problems, including severe volatility in the valuation of real estate and other collateral supporting loans. The Company's financial statements have been prepared using values and information currently available to the Company.

Given the volatility of current economic conditions, the values of assets and liabilities recorded in the financial statements could change rapidly, resulting in material future adjustments in asset values, the allowance for loan losses, or capital that could negatively impact the Company's ability to meet regulatory capital requirements and maintain sufficient liquidity.

General

The profitability of the Company and, more specifically, the profitability of its primary subsidiary, Great Southern Bank (the "Bank"), depends primarily on its net interest income, as well as provisions for loan losses and the level of non-interest income and non-interest expense. Net interest income is the difference between the interest income the Bank earns on its loans and investment portfolio, and the interest it pays on interest-bearing liabilities, which consists mainly of interest paid on deposits and borrowings. Net interest income is affected by the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rates earned or paid on these balances. When interest-earning assets approximate or exceed interest-bearing liabilities, any positive interest rate spread will generate net interest income.

In the six months ended June 30, 2011, Great Southern's net loans increased \$34.0 million, or 1.8%, from \$1.88 billion at December 31, 2010, to \$1.91 billion at June 30, 2011. The increase was primarily due to increases in commercial

real estate loans of \$40.8 million, or 7.7%, and multi-family residential mortgage loans of \$26.5 million, or 12.6%. Commercial construction loans also increased but the increase was primarily offset by decreases in subdivision construction and land development loans. Partially offsetting these increases were decreases in net loans acquired through the 2009 FDIC-assisted transactions of \$21.5 million, or 7.1%. As loan demand is affected by a variety of factors, including general economic conditions, and because of the competition we face and our focus on pricing discipline and credit quality, we cannot be assured that our loan growth will match or exceed the level of increases achieved in prior years. Based upon the current lending environment and economic conditions, the Company does not expect to grow the overall loan portfolio significantly, at this time and the loan portfolio could shrink due to net loan repayments. The Company's strategy continues to be focused on maintaining credit risk and interest rate risk at appropriate levels.

The level of non-performing loans and foreclosed assets affects our net interest income and net income. While we did not have an overall high level of charge-offs on our non-performing loans prior to 2008, we generally do not accrue interest income on these loans and do not recognize interest income until the loans are repaid or interest payments have been made for a period of time sufficient to provide evidence of performance on the loans. Generally, the higher the level of non-performing assets, the greater the negative impact on interest income and net income. We expect the loan loss provision, non-performing assets and foreclosed assets will generally remain elevated and will fluctuate from period to period. In addition, expenses related to the credit resolution process could also remain elevated.

In the six months ended June 30, 2011, Great Southern's available-for-sale securities increased \$61.5 million, or 8.0%, from \$769.5 million at December 31, 2010, to \$831.0 million at June 30, 2011. The increase was primarily due to purchases of mortgage-backed securities and U.S. government agency securities which increased \$40.6 million, or 6.8%, and \$20.1 million, or 505.0%, respectively. These securities were purchased for pledging to secure public-fund deposits and customer reverse repurchase agreements.

Great Southern had cash and cash equivalents of \$355.4 million at June 30, 2011 compared to \$430.0 million at December 31, 2010. The decrease in cash and cash equivalents during 2011 was due to increased loan funding, purchases of available-for-sale securities and redemption of brokered deposits.

The Company attracts deposit accounts through its retail branch network, correspondent banking and corporate services areas, and brokered deposits. The Company then utilizes these deposit funds, along with Federal Home Loan Bank (FHLBank) advances and other borrowings, to meet loan demand or otherwise fund its activities. In the six months ended June 30, 2011, total deposit balances increased \$26.9 million, or 1.0%. Transaction accounts increased \$94.7 million, while total brokered deposits (excluding CDARS accounts) decreased \$78.8 million. Great Southern Bank customer deposits totaling \$244.4 million and \$218.8 million, at June 30, 2011 and December 31, 2010, respectively, were part of the CDARS program which allows bank customers to maintain balances in an insured manner that would otherwise exceed the FDIC deposit insurance limit. The FDIC considers these customer accounts to be brokered deposits due to the fees paid in the CDARS program. The increase in CDARS customer deposits at June 30, 2011 of \$25.6 million was primarily due to additions to an existing deposit relationship. The level of competition for deposits in our markets is high. While it is our goal to gain checking account and retail certificate of deposit market share in our branch footprint, we cannot be assured of this in future periods.

Total brokered deposits, excluding the CDARS accounts discussed above, were \$65.7 million at June 30, 2011, down from \$144.5 million at December 31, 2010. The decrease was the result of \$75.5 million of brokered deposits that matured or were called by the Company during the quarter and were not replaced due to high liquidity levels. No interest rate swaps were associated with the remaining brokered certificates. The majority of the Company's brokered certificates of deposit have fixed rates of interest and mature within the next year.

Our ability to fund growth in future periods may also be dependent on our ability to continue to access brokered deposits and FHLBank advances. In times when our loan demand has outpaced our generation of new deposits, we have utilized brokered deposits and FHLBank advances to fund these loans. These funding sources have been attractive to us because we can create variable rate funding, if desired, which more closely matches the variable rate nature of much of our loan portfolio. While we do not currently anticipate that our ability to access these sources will be reduced or eliminated in future periods, if this should happen, the limitation on our ability to fund additional loans would adversely affect our business, financial condition and results of operations.

Our net interest income may be affected positively or negatively by market interest rate changes. A large portion of our loan portfolio is tied to the "prime rate" and adjusts immediately when this rate adjusts (subject to the effect of loan interest rate floors, which are discussed below). We monitor our sensitivity to interest rate changes on an ongoing

basis (see "Item III. Quantitative and Qualitative Disclosures About Market Risk"). In addition, our net interest income may be impacted by changes in the cash flows expected to be received from acquired loan pools. As previously described in Note 9, the Company's evaluation of cash flows expected to be received from acquired loan pools is on-going and increases in cash flow expectations are recognized as increases in accretable yield through interest income. Decreases in cash flow expectations are recognized as impairments through the allowance for loan losses.

The current level and shape of the interest rate yield curve poses challenges for interest rate risk management. The FRB last cut interest rates on December 16, 2008. Great Southern has a significant portfolio of loans which are tied to a "prime rate" of interest. Some of these loans are tied to some national index of "prime," while most are indexed to "Great Southern prime." The Company has elected to leave its "Great Southern prime rate" of interest at 5.00%. This does not affect a large number of customers, as a majority of the loans indexed to "Great Southern prime"

are already at interest rate floors which are provided for in individual loan documents. But for the interest rate floors, a rate cut by the FRB generally would have an anticipated immediate negative impact on the Company's net interest income due to the large total balance of loans which generally adjust immediately as the Federal Funds rate adjusts. Loans at their floor rates are subject to the risk that borrowers will seek to refinance elsewhere at the lower market rate, however. Because the Federal Funds rate is already very low, there may also be a negative impact on the Company's net interest income due to the Company's inability to lower its funding costs significantly in the current environment, although interest rates on assets may decline further. Conversely, interest rate increases would normally result in increased interest rates on our prime-based loans. The interest rate floors in effect may limit the immediate increase in interest rates on these loans, until such time as rates rise above the floors. However, the Company may have to increase rates paid on deposits to maintain deposit balances.

The negative impact of declining loan interest rates has been mitigated by the positive effects of the Company's loans which have interest rate floors. At June 30, 2011, the Company had a portfolio (excluding the loans acquired in the FDIC-assisted transactions) of prime-based loans totaling approximately \$684 million with rates that change immediately with changes to the prime rate of interest. Of this total, \$603 million also had interest rate floors. These floors were at varying rates, with \$86 million of these loans having floor rates of 7.0% or greater and another \$472 million of these loans having floor rates between 5.0% and 7.0%. At June 30, 2011, all of these loans were at their floor rates. The loan yield for the portfolio was approximately 269 basis points higher than the national "prime rate of interest" at June 30, 2011, partly because of these interest rate floors. While interest rate floors have had an overall positive effect on the Company's results during this period, they do subject the Company to the risk that borrowers will elect to refinance their loans with other lenders. To the extent economic conditions improve, the likelihood that borrowers will seek to refinance their loans increases.

The Company's profitability is also affected by the level of its non-interest income and operating expenses. Non-interest income consists primarily of service charges and ATM fees, commissions earned by our travel, insurance and investment divisions, accretion income (net of amortization) related to the FDIC-assisted acquisitions, late charges and prepayment fees on loans, gains on sales of loans and available-for-sale investments and other general operating income. In 2011 and 2010, increases in the cash flows expected to be collected from the FDIC-covered loan portfolios resulted in amortization (expense) recorded relating to reductions of expected reimbursements under the loss sharing agreements with the FDIC, which are recorded as indemnification assets. Non-interest income may also be affected by the Company's interest rate hedging activities, if the Company chooses to implement hedges. On July 1, 2010, a federal rule went into effect which prohibits a financial institution from automatically enrolling customers in overdraft protection programs, on ATM and one-time debit card transactions, unless a consumer consents, or opts in, to the overdraft service. As expected, this recent federal rule has had an adverse affect on the amount of non-interest income we generate. Operating expenses consist primarily of salaries and employee benefits, occupancy-related expenses, expenses related to foreclosed assets, postage, FDIC deposit insurance, advertising and public relations, telephone, professional fees, office expenses and other general operating expenses. Details of the current period changes in non-interest income and non-interest expense are provided in the "Results of Operations and Comparison for the Three and Six Months Ended June 30, 2011 and 2010" section of this Quarterly Report on Form 10-Q.

Effect of Federal Laws and Regulations

General. Federal legislation and regulation significantly affect the banking operations of the Company and the Bank, and have increased competition among commercial banks, savings institutions, mortgage banking enterprises and other financial institutions. In particular, the capital requirements and operations of regulated depository institutions such as the Company and the Bank have been and will be subject to changes in applicable statutes and regulations from time to time, which changes could, under certain circumstances, adversely affect the Company or the Bank.

Legislation Impacting the Financial Services Industry. On July 21, 2010, sweeping financial regulatory reform legislation entitled the “Dodd-Frank Wall Street Reform and Consumer Protection Act” (the “Dodd-Frank Act”) was signed into law. The Dodd-Frank Act implements far-reaching changes across the financial regulatory landscape, including provisions that, among other things, will provide increased consumer financial protection, amend capital requirements for financial institutions, change the assessment base for federal deposit insurance, repeal the federal prohibitions on the payment of interest on demand deposits, amend the account balance limit for federal deposit insurance protection, and increase the authority of the Federal Reserve Board.

Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on the Company and the financial services industry more generally. Provisions in the legislation that affect deposit insurance assessments, and payment of interest on demand deposits

could increase the costs associated with deposits. Provisions in the legislation that require revisions to the capital requirements of the Company and the Bank could require the Company and the Bank to seek additional sources of capital in the future.

A provision of the Dodd-Frank Act, commonly referred to as the “Durbin Amendment,” directed the FRB to analyze the debit card payments system and fix the interchange rates based upon their estimate of actual costs. The FRB has established the interchange rate for all debit transactions for issuers with over \$10 billion in assets, effective October 1, 2011, at \$0.21 per transaction. An additional five basis points of the transaction amount and an additional \$0.01 may be collected by the issuer for fraud prevention and recovery, provided the issuer performs certain actions. Although the Bank is currently exempt from the provisions of the rule on the basis of asset size, there is some uncertainty about the impact there will be on the interchange rates for issuers below the \$10 billion level of assets.

In December 2010 and January 2011, the Basel Committee on Banking Supervision published the final texts of reforms on capital and liquidity generally referred to as “Basel III.” Although Basel III is intended to be implemented by participating countries for large, internationally active banks, its provisions are likely to be considered by United States banking regulators in developing new regulations applicable to other banks in the United States, including Great Southern. For banks in the United States, among the provisions concerning capital are: (i) a minimum ratio of common equity to risk-weighted assets reaching 4.5%, plus an additional 2.5% as a capital conservation buffer, by 2019 after a phase-in period; (ii) a minimum ratio of Tier 1 capital to risk-weighted assets reaching 6.0% by 2019 after a phase-in period; (iii) a minimum ratio of total capital to risk-weighted assets, plus the additional 2.5% capital conservation buffer, reaching 10.5% by 2019 after a phase -in period; (iv) an additional countercyclical capital buffer to be imposed by applicable national banking regulators periodically at their discretion, with advance notice; and (v) restrictions on capital distributions and discretionary bonuses applicable when capital ratios fall within the buffer zone.

Although Basel III is described as a “final text,” it is subject to the resolution of certain issues and to further guidance and modification, as well as to adoption by United States banking regulators, including decisions as to whether and to what extent it will apply to United States banks that are not large, internationally active banks.

Business Initiatives

As part of its long-term strategic plan, the Company anticipates opening two to three banking centers per year as conditions warrant. In May 2011, the Company opened a banking center in an office complex at 8235 Forsyth Boulevard in Clayton, Mo., a suburb of St. Louis. In addition, the Company’s Creve Coeur loan production office relocated to the same office complex. Clayton is a major business center of metropolitan St. Louis and the St. Louis County seat.

In August 2011, a new full-service banking center on South Campbell Avenue in Springfield, Mo. is expected to open. The banking center will replace a current office on South Campbell, which is less than a mile from the new site, and will offer better access and greater convenience for customers.

The Company has purchased property on West 135th Street in Olathe, Kan., in an established retail business district. Plans are to relocate the current banking center at 11120 South Lone Elm Road, which is located in a lesser developed area of Olathe. Great Southern Travel also expects to move its current Olathe office to the new site. A first quarter 2012 opening is anticipated.

In June 2011, the Company introduced online loan applications on its website. Customers can apply online for fixed rate and adjustable rate conventional mortgages, FHA and VA home loans, and home equity lines of credit. The

online loan application service enhances the Company's online channel for customers complementing its online depository account opening service implemented several years ago.

In March 2011, the Company submitted its application to possibly participate in the Small Business Lending Fund ("SBLF") of the U.S. Department of the Treasury (the "Treasury"). Enacted into law in 2010 as part of the Small Business Jobs Act, the SBLF is a \$30 billion fund that encourages lending to small businesses by providing Tier 1 capital to qualified community banks and holding companies with assets of less than \$10 billion through the sale of preferred stock to the Treasury. The SBLF provides an option for eligible community banks and holding companies to refinance funds received through the Treasury's Capital Purchase Program ("CPP"). The Company received \$58.0 million in CPP funds from the Treasury in 2008 through the sale of preferred stock. In connection with the SBLF, the

preferred stock issued by the Company under the CPP would be repaid and the Company would concurrently issue a new series of preferred stock to the Treasury. The annualized dividend rate on the new preferred stock issued under the SBLF initially would be 5% (which is the rate currently being paid by the Company under CPP), but the rate could be reduced to as low as 1% through April 2016, depending on the level of small business lending, and would be increased to 9% thereafter. The Company's SBLF application has been preliminarily approved by the Treasury for the issuance of \$57.9 million of preferred stock, and the transaction closing (including the concurrent repayment of the \$58.0 million of CPP funds) is expected to occur in the third quarter of 2011. The ten-year warrant issued by the Company to the Treasury in connection with the CPP to purchase 909,091 shares of the Company's common stock at an exercise price of \$9.57 per share would remain outstanding following the closing of the SBLF transaction, provided that the Company may repurchase the warrant following the SBLF closing if it submits a proposed repurchase price to the Treasury within 15 days after the closing and reaches an agreement with the Treasury on that price.

Comparison of Financial Condition at June 30, 2011 and December 31, 2010

During the six months ended June 30, 2011, the Company increased total assets by \$6.7 million to \$3.42 billion. Most of the increase was attributable to increases in securities available for sale, net loans and foreclosed assets, partially offset by decreases in cash and cash equivalents, mortgage loans held for sale and the FDIC indemnification asset. Securities available for sale increased \$61.5 million as compared to December 31, 2010. The increase was primarily due to purchases of mortgage-backed securities and U.S. government agency securities which increased \$40.6 million, or 6.8%, and \$20.1 million, or 505.0%, respectively. While there is no specifically stated goal, the available-for-sale securities portfolio has in recent quarters been approximately 20% to 25% of total assets. The available-for-sale securities portfolio was 24.03% and 22.6% of total assets at June 30, 2011 and December 31, 2010, respectively. Net loans increased \$34.0 million from December 31, 2010, to \$1.91 billion at June 30, 2011. The increase was primarily due to increases in commercial real estate loans of \$40.8 million, or 7.7%, multi-family residential mortgage loans of \$26.5 million, or 12.6%. Commercial construction loans also increased but the increase was primarily offset by decreases in subdivision construction and land development loans. Partially offsetting these increases were decreases in net loans acquired through the 2009 FDIC-assisted transactions of \$21.5 million, or 7.1%. The Company's strategy continues to be focused on maintaining credit risk and interest rate risk at appropriate levels given the current credit and economic environments. Aside from any potential future acquisitions, the Company does not expect to grow the loan portfolio significantly at this time. Foreclosed assets increased \$10.3 million from December 31, 2010, to \$70.6 million at June 30, 2011. For detailed information on this increase, see "Non-performing Assets – Foreclosed Assets." Cash and cash equivalents decreased \$74.5 million as compared to December 31, 2010 as the Company used some of its excess liquidity to redeem brokered deposits and to fund loans and the purchase of securities. For several quarters, the Company has maintained a level of liquidity it considered to be higher than normal because of uncertainties in the U.S. economy and banking industry. While cash and cash equivalents are down at June 30, 2011, average balances remain at higher levels. In some instances, the Company invested these excess funds in short-term cash equivalents that earned a small positive or a negative spread relative to the cost of funds. While the Company generally earned a positive spread on securities purchased, it was often much smaller than the Company's overall net interest spread, having the effect of increasing net interest income but negatively affecting net interest margin in 2010 and 2011. The Company expects to maintain a higher level of cash and cash equivalents for the time being as excess liquidity in these uncertain times for the U.S. economy and the banking industry, subject to funding activities which are discussed below, and recognizing that this could potentially have the effect of suppressing net interest margin and net interest income. The FDIC indemnification asset decreased \$24.5 million from December 31, 2010 due primarily to amortization relating to the reduction in expected reimbursements under the loss sharing agreements previously discussed in Note 9 of the Notes to Consolidated Financial Statements.

Total liabilities decreased \$3.7 million from December 31, 2010 to \$3.10 billion at June 30, 2011. The decrease was primarily attributable to decreases in securities sold under reverse repurchase agreements with customers partially

offset by increases in deposits. Securities sold under reverse repurchase agreements with customers decreased \$27.5 million from December 31, 2010 as these balances fluctuate over time. Total deposits increased \$26.9 million from December 31, 2010. Transaction account balances increased \$94.7 million to \$1.39 billion at June 30, 2011, up from \$1.30 billion at December 31, 2010. Total brokered deposits (excluding CDARS customer account balances) were \$65.7 million at June 30, 2011, compared to \$144.5 million at December 31, 2010. The decrease was the result of \$78.8 million of brokered deposits that matured or were called by the Company during the six months and were not replaced due to the Company's existing high liquidity levels. In addition, at June 30, 2011 and December 31, 2010, Great Southern Bank customer deposits totaling \$244.4 million and \$218.8 million, respectively, were part of the CDARS program which allows bank customers to maintain balances in an insured manner that would otherwise exceed the FDIC deposit insurance limit. The FDIC counts these deposits as brokered, but these are deposit accounts that we generate with customers in our local markets. The increase in CDARS customer deposits at June 30, 2011 of \$25.6 million was primarily due to additions to an existing deposit relationship. FHLBank advances decreased

slightly from the December 31, 2010 level. The level of FHLBank advances also fluctuates depending on growth in the Company's loan portfolio and other funding needs and sources available to the Company. Most of the Company's FHLBank advances are fixed-rate advances that cannot be repaid prior to maturity without incurring significant penalties.

Total stockholders' equity increased \$10.4 million from \$304.0 million at December 31, 2010 to \$314.4 million at June 30, 2011. The Company recorded net income of \$11.8 million for the six months ended June 30, 2011, common and preferred dividends declared were \$6.2 million and accumulated other comprehensive gain increased \$4.5 million. The increase in accumulated other comprehensive gain resulted from increases in the fair value of the Company's available-for-sale investment securities. In addition, total stockholders' equity increased \$239,000 due to stock option exercises.

Our participation in the CPP currently precludes us from purchasing shares of the Company's stock without the Treasury's consent until the earlier of December 5, 2011, or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. As noted above, the Company's CPP funds are expected to be repaid in connection with the closing of the SBLF transaction, which is expected to occur in the third quarter of 2011. The Company has historically utilized stock buy-back programs from time to time as long as it believed that repurchasing the stock contributed to the overall growth of shareholder value. The number of shares of stock repurchased and the price paid is the result of many factors, several of which are outside of the control of the Company. The primary factors, however, are the number of shares available in the market from sellers at any given time and the price of the stock within the market as determined by the market.

Results of Operations and Comparison for the Three and Six Months Ended June 30, 2011 and 2010

General

Net income was \$5.9 million for the three months ended June 30, 2011 compared to net income of \$5.8 million for the three months ended June 30, 2010. This increase of \$66,000, or 1.1%, was primarily due to an increase in net interest income of \$13.2 million, or 48.6%, a decrease in provision for loan losses of \$3.6 million, or 29.7%, and a decrease in provision for income taxes of \$956,000, or 36.3%, partially offset by a decrease in non-interest income of \$16.3 million, or 115.3%, and an increase in non-interest expense of \$1.3 million, or 6.4%. Net income available to common shareholders was \$5.1 million and \$5.0 million for the quarters ended June 30, 2011 and 2010, respectively.

Net income was \$11.8 million for the six months ended June 30, 2011 compared to net income of \$11.4 million for the six months ended June 30, 2010. This increase of \$420,000, or 3.7%, was primarily due to an increase in net interest income of \$26.0 million, or 48.3%, a decrease in provision for loan losses of \$869,000, or 5.0%, and a decrease in provision for income taxes of \$1.5 million, or 29.0%, partially offset by a decrease in non-interest income of \$27.1 million, or 117.0%, and an increase in non-interest expense of \$796,000, or 1.9%. Net income available to common shareholders was \$10.2 million and \$9.7 million for the six months ended June 30, 2011 and 2010, respectively.

Total Interest Income

Total interest income increased \$9.5 million, or 24.1%, during the three months ended June 30, 2011 compared to the three months ended June 30, 2010. The increase was due to a \$9.7 million increase in interest income on loans partially offset by a \$158,000 decrease in interest income on investments and other interest-earning assets. Total interest income increased \$18.8 million, or 23.7%, during the six months ended June 30, 2011 compared to the six months ended June 30, 2010. The increase was due to a \$19.6 million increase in interest income on loans partially

offset by a \$761,000 decrease in interest income on investments and other interest-earning assets. Interest income on loans increased primarily due to increases in expected cash flows to be received from the FDIC-acquired loan pools and the resulting adjustment to accretable yield which were previously discussed in Note 9 of the Notes to Consolidated Financial Statements. Interest income from investment securities and other interest-earning assets decreased due to lower average rates of interest, partially offset by higher average balances. The lower average investment yields were primarily a result of lower yields on mortgage-backed securities as interest rates reset downward. Prepayments on the mortgages underlying these securities resulted in amortization of premiums which also reduced yields.

Interest Income – Loans

During the three months ended June 30, 2011 compared to the three months ended June 30, 2010, interest income on loans increased due to higher average interest rates partially offset by lower average balances. Interest income increased \$12.2 million as a result of higher average interest rates on loans. The average yield on loans increased from 6.41% during the three months ended June 30, 2010, to 8.72% during the three months ended June 30, 2011. This increase was due to additional yield accretion recognized in conjunction with the fair value of the loan pools acquired in the 2009 FDIC-assisted transactions as previously discussed in Note 9 of the Notes to Consolidated Financial Statements. On an on-going basis the Company estimates the cash flows expected to be collected from the acquired loan pools. This cash flows estimate has increased each quarter beginning with the third quarter of 2010, based on the payment histories and reduced loss expectations of the loan pools, resulting in a total of \$70.2 million of adjustments to be spread on a level-yield basis over the remaining expected lives of the loan pools. The increases in expected cash flows also reduced the amount of expected reimbursements under the loss sharing agreements with the FDIC, which are recorded as indemnification assets. Therefore, the expected indemnification assets have also been reduced each quarter since the third quarter of 2010, resulting in a total of \$62.0 million of adjustments to be amortized on a comparable basis over the remainder of the loss sharing agreements or the remaining expected life of the loan pools, whichever is shorter. The adjustments increased interest income by \$12.8 million and decreased non-interest income by \$11.5 million during the quarter ended June 30, 2011, for a net impact of \$1.3 million to pre-tax income. Because the adjustments will be recognized over the estimated remaining lives of the loan pools and the remainder of the loss sharing agreements, respectively, they will impact future periods as well. As of June 30, 2011, the remaining accretable yield adjustment that will affect interest income is \$25.3 million and the remaining adjustment to the indemnification assets that will affect non-interest income (expense) is \$(22.1) million. Of the remaining adjustments, we expect to recognize \$15.2 million of interest income and \$(13.5) million of non-interest income (expense) in the remainder of 2011. In the three months ended June 30, 2011, the average yield on loans was 8.72% versus an average prime rate for the period of 3.25%, or a difference of a positive 547 basis points. In the three months ended June 30, 2010, the average yield on loans was 6.41% versus an average prime rate for the period of 3.25%, or a difference of a positive 316 basis points. Apart from the yield accretion, average loan rates were lower for the quarter ended June 30, 2011 when compared to the same period in 2010, as a result of both normal amortization of higher-rate loans and new loans that were made at current lower market rates.

Interest income decreased \$2.5 million as the result of lower average loan balances which decreased from \$2.04 billion during the quarter ended June 30, 2010, to \$1.94 billion during the quarter ended June 30, 2011. The lower average balance resulted primarily from decreases in average outstanding construction loans, commercial real estate loans and one- to four-family residential loans. Outstanding construction loans decreased as many projects were completed and demand for new construction loans has declined. Commercial real estate loans and one- to four-family residential loans decreased due to a higher level of loan repayments than loan originations despite a slight increase in loan demand toward the end of the quarter.

During the six months ended June 30, 2011 compared to the six months ended June 30, 2010, interest income on loans increased due to higher average interest rates partially offset by lower average balances. Interest income increased \$23.6 million as a result of higher average interest rates on loans. The average yield on loans increased from 6.29% during the six months ended June 30, 2010, to 8.79% during the six months ended June 30, 2011. This increase was due to additional yield accretion recognized in conjunction with the fair value of the loan pools acquired in the 2009 FDIC-assisted transactions as discussed above for the three months ended June 30, 2011 and as previously discussed in Note 9 of the Notes to Consolidated Financial Statements. The adjustments increased interest income by \$25.5 million and decreased non-interest income by \$22.7 million during the six months ended June 30, 2011, for a net impact of \$2.7 million to pre-tax income. Apart from the yield accretion, average loan rates were also lower for the six months ended June 30, 2011 when compared to the same period in 2010 for reasons discussed above.

Interest income decreased \$4.0 million as the result of lower average loan balances which decreased from \$2.07 billion during the six months ended June 30, 2010, to \$1.93 billion during the six months ended June 30, 2011. The reasons for decrease in average loan balances for the comparable six-month periods are the same as those described previously for the comparable three-month periods.

Interest Income – Investments and Other Interest-earning Assets

Interest income on investments and other interest-earning assets decreased in the three months ended June 30, 2011 compared to the three months ended June 30, 2010. Interest income decreased \$1.5 million as a result of a decrease in average interest rates from 2.81% during the three months ended June 30, 2010, to 2.38% during the three months ended June 30, 2011. The majority of the Company's securities in the 2010 and 2011 periods were mortgage-backed securities which are backed by hybrid ARMs that have fixed rates of interest for a period of time (generally one to ten

years) and then adjust annually. The actual amount of securities that will reprice and the actual interest rate changes on these securities are subject to the level of prepayments on these securities and the changes that actually occur in market interest rates (primarily treasury rates and LIBOR rates). Mortgage-backed securities are also subject to reduced yields due to more rapid prepayments in the underlying mortgages. As a result, premiums on these securities may be amortized against interest income more quickly, thereby reducing the yield recorded. Interest income increased \$1.4 million as a result of an increase in average balances from \$1.01 billion during the three months ended June 30, 2010, to \$1.16 billion during the three months ended June 30, 2011. Average balances of both securities and interest-earning deposits contributed to the increase as securities increased due to purchases made for pledging to secure public-fund deposits and interest-earning deposits increased because of deposit growth and loan repayments.

Interest income on investments and other interest-earning assets decreased in the six months ended June 30, 2011 compared to the six months ended June 30, 2010. Interest income decreased \$3.4 million as a result of a decrease in average interest rates from 2.95% during the six months ended June 30, 2010, to 2.34% during the six months ended June 30, 2011. Interest income increased \$2.6 million as a result of an increase in average balances from \$1.00 billion during the six months ended June 30, 2010, to \$1.20 billion during the six months ended June 30, 2011. The reasons for these changes in the comparable six-month periods are the same as those described previously for the comparable three-month periods.

The Company's interest-earning deposits and non-interest-earning cash equivalents currently earn very low or no yield and therefore negatively impact the Company's net interest margin. At June 30, 2011, the Company had cash and cash equivalents of \$355.4 million compared to \$430.0 million at December 31, 2010. See "Net Interest Income" for additional information on the impact of this interest activity.

Total Interest Expense

Total interest expense decreased \$3.6 million, or 29.1%, during the three months ended June 30, 2011, when compared with the three months ended June 30, 2010, due to a decrease in interest expense on deposits of \$3.5 million, or 34.3%, a decrease in interest expense on FHLBank advances of \$103,000, or 7.3%, a decrease in interest expense on short-term and structured repo borrowings of \$52,000, or 6.5%, and a decrease in interest expense on subordinated debentures issued to capital trusts of \$2,000, or 1.4%.

Total interest expense decreased \$7.1 million, or 27.8%, during the six months ended June 30, 2011, when compared with the six months ended June 30, 2010, primarily due to a decrease in interest expense on deposits of \$6.7 million, or 32.0%, a decrease in interest expense on short-term and structured repo borrowings of \$289,000, or 16.1%, and a decrease in interest expense on FHLBank advances of \$203,000, or 7.2%, slightly offset by an increase in interest expense on subordinated debentures issued to capital trusts of \$3,000, or 1.1%.

Interest Expense – Deposits

Interest expense on demand deposits decreased \$751,000 due to a decrease in average rates from 0.96% during the three months ended June 30, 2010, to 0.73% during the three months ended June 30, 2011. The average interest rates decreased due to lower overall market rates of interest since June 30, 2010 and because the Company chose to pay lower rates during the three months ended June 30, 2011 when compared to the same period in 2010. Market rates of interest on checking and money market accounts have decreased since late 2007 when the FRB began reducing short-term interest rates. Interest expense on demand deposits increased \$626,000 due to an increase in average balances from \$898 million during the three months ended June 30, 2010, to \$1.11 billion during the three months ended June 30, 2011. The increase in average balances of demand deposits was primarily a result of customer preference to transition from time deposits to demand deposits as well as organic growth in the Company's deposit

base, particularly in interest-bearing checking accounts.

Interest expense on demand deposits decreased \$1.1 million due to a decrease in average rates from 0.97% during the six months ended June 30, 2010, to 0.76% during the six months ended June 30, 2011. Interest expense on demand deposits increased \$982,000 due to an increase in average balances from \$874 million during the six months ended June 30, 2010, to \$1.10 billion during the six months ended June 30, 2011. The reasons for these changes in the comparable six-month periods are the same as those described previously for the comparable three-month periods.

Interest expense on time deposits decreased \$1.9 million as a result of a decrease in average rates of interest from 2.05% during the three months ended June 30, 2010, to 1.49% during the three months ended June 30, 2011. A large portion of the Company's certificate of deposit portfolio matures within one year and so reprices fairly quickly; this is

consistent with the portfolio over the past several years. Interest expense on deposits decreased \$1.4 million due to a decrease in average balances of time deposits from \$1.56 billion during the three months ended June 30, 2010, to \$1.25 billion during the three months ended June 30, 2011. As previously mentioned, the decrease in average balances of time deposits was partly the result of customer preference to transition from time deposits to demand deposits. Also contributing to the decrease was the redemption of brokered deposits without replacement in the last half of 2010 and the first half of 2011 due to the Company's existing high liquidity levels.

Interest expense on time deposits decreased \$3.5 million due to a decrease in average rates from 2.07% during the six months ended June 30, 2010, to 1.57% during the six months ended June 30, 2011. Interest expense on time deposits decreased \$3.0 million due to a decrease in average balances from \$1.62 billion during the six months ended June 30, 2010, to \$1.28 billion during the six months ended June 30, 2011. The reasons for these changes in the comparable six-month periods are the same as those described previously for the comparable three-month periods.

The Dodd-Frank Act repealed the federal prohibitions on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts beginning July 21, 2011. Although the ultimate impact of this legislation on the Company has not yet been determined, the Company expects interest costs associated with demand deposits may increase as a result of competitor responses to this change.

Interest Expense – FHLBank Advances, Short-term Borrowings and Structured Repo Borrowings and Subordinated Debentures Issued to Capital Trusts

During the three months ended June 30, 2011 compared to the three months ended June 30, 2010, interest expense on FHLBank advances decreased due to lower average balances, partially offset by higher average interest rates. Interest expense on FHLBank advances decreased \$148,000 due to a decrease in average balances from \$168 million during the three months ended June 30, 2010, to \$152 million during the three months ended June 30, 2011. Interest expense on FHLBank advances increased \$45,000 due to an increase in average interest rates from 3.37% in the three months ended June 30, 2010, to 3.44% in the three months ended June 30, 2011. Most of the remaining advances are fixed-rate and are subject to penalty if paid off prior to maturity.

During the six months ended June 30, 2011 compared to the six months ended June 30, 2010, interest expense on FHLBank advances decreased due to lower average balances, partially offset by higher average interest rates. Interest expense on FHLBank advances decreased \$265,000 due to a decrease in average balances from \$168 million during the six months ended June 30, 2010, to \$153 million during the six months ended June 30, 2011. Interest expense on FHLBank advances increased \$62,000 due to an increase in average interest rates from 3.37% in the six months ended June 30, 2010, to 3.44% in the six months ended June 30, 2011. Most of the remaining advances are fixed-rate and are subject to penalty if paid off prior to maturity.

Interest expense on short-term and structured repo borrowings decreased \$208,000 due to a decrease in average balances from \$353 million during the three months ended June 30, 2010, to \$293 million during the three months ended June 30, 2011. The decrease in balances of short-term borrowings was primarily due to decreases in average securities sold under repurchase agreements with the Company's deposit customers which tend to fluctuate. Interest expense on short-term and structured repo borrowings increased \$156,000 due to a slight increase in average rates on short-term borrowings from 0.91% in the three months ended June 30, 2010, to 1.02% in the three months ended June 30, 2011.

Interest expense on short-term and structured repo borrowings decreased \$284,000 due to a decrease in average balances from \$365 million during the six months ended June 30, 2010, to \$307 million during the six months ended June 30, 2011. The decrease in balances of short-term borrowings was primarily due to decreases in average securities

sold under repurchase agreements with the Company's deposit customers which tend to fluctuate. Interest expense on short-term and structured repo borrowings decreased \$5,000 due to relatively consistent average rates on short-term borrowings for the comparable six-month periods.

Interest expense on subordinated debentures issued to capital trusts decreased \$2,000 due to a decrease in average rates from 1.84% in the three months ended June 30, 2010, to 1.82% in the three months ended June 30, 2011. Interest expense on subordinated debentures issued to capital trusts increased \$3,000 due to an increase in average rates from 1.81% in the six months ended June 30, 2010, to 1.83% in the six months ended June 30, 2011. These debentures are not subject to an interest rate swap; however, they are variable-rate debentures and bear interest at an average rate of three-month LIBOR plus 1.57%, adjusting quarterly.

Net Interest Income

Net interest income for the three months ended June 30, 2011 increased \$13.2 million to \$40.3 million compared to \$27.1 million for the three months ended June 30, 2010. Net interest margin was 5.21% in the three months ended June 30, 2011, compared to 3.57% in the three months ended June 30, 2010, an increase of 164 basis points, or 45.9%. The Company's margin was positively impacted primarily by the increase in expected cash flows to be received from the FDIC-acquired loan pools and the resulting increase to accretible yield which was previously discussed in Note 9 of the Notes to Consolidated Financial Statements. The impact of this change on the three months ended June 30, 2011 was an increase in interest income of \$12.8 million and an increase in net interest margin of 166 basis points. Excluding the positive impact of the additional yield accretion, net interest margin decreased two basis points primarily due to overall decreases in yields on investments and loans, excluding the yield accretion income discussed above, when compared to the year-ago quarter. Partially offsetting the decrease in yields on investment securities was a change in the deposit mix over the last year. Since June 30, 2010, lower-cost checking accounts increased as customers added to existing accounts or new customer accounts were opened while higher-cost brokered deposits decreased. In the last half of 2010 and the first half of 2011, the Company redeemed brokered deposits without replacement due to the Company's existing high liquidity levels. Traditional brokered deposits decreased \$78.8 million since December 31, 2010. Retail certificates of deposit also continued to decrease, and those that were renewed or replaced generally had lower market rates of interest.

The Company's overall interest rate spread increased 154 basis points, or 43.4%, from 3.56% during the three months ended June 30, 2010, to 5.10% during the three months ended June 30, 2011. The gross change was due to a 113 basis point increase in the weighted average yield on interest-earning assets and a 41 basis point decrease in the weighted average rate paid on interest-bearing liabilities. In comparing the two periods, the yield on loans increased 231 basis points while the yield on investment securities and other interest-earning assets decreased 43 basis points. The rate paid on deposits decreased 52 basis points, the rate paid on subordinated debentures issued to capital trusts decreased two basis points, the rate paid on short-term borrowings increased 11 basis points and the rate paid on FHLBank advances increased seven basis points.

Net interest income for the six months ended June 30, 2011 increased \$26.0 million to \$79.7 million compared to \$53.7 million for the six months ended June 30, 2010. Net interest margin was 5.13% in the six months ended June 30, 2011, compared to 3.52% in the six months ended June 30, 2010, an increase of 161 basis points, or 45.7%. The Company's overall interest rate spread increased 151 basis points, or 43.0%, from 3.51% during the six months ended June 30, 2010, to 5.02% during the six months ended June 30, 2011. The gross change was due to a 112 basis point increase in the weighted average rate paid on interest-earning assets, partially offset by a 39 basis point decrease in the weighted average yield on interest-bearing liabilities. In comparing the two periods, the yield on loans increased 250 basis points while the yield on investment securities and other interest-earning assets decreased 61 basis points. The rate paid on deposits decreased 48 basis points, the rate paid on FHLBank advances increased seven basis points, the rate paid on subordinated debentures issued to capital trusts increased two basis points and the rate paid on short-term borrowings remained the same.

For additional information on net interest income components, refer to the "Average Balances, Interest Rates and Yields" table in this Quarterly Report on Form 10-Q.

Provision for Loan Losses and Allowance for Loan Losses

The provision for loan losses decreased \$3.6 million, from \$12.0 million during the three months ended June 30, 2010, to \$8.4 million during the three months ended June 30, 2011. The provision for loan losses decreased \$869,000, from \$17.5 million during the six months ended June 30, 2010, to \$16.6 million during the six months ended June 30,

2011. At June 30, 2011, the allowance for loan losses was \$40.5 million, a decrease of \$1.0 million from December 31, 2010. Net charge-offs were \$9.8 million in the three months ended June 30, 2011, versus \$12.0 million in the three months ended June 30, 2010. Net charge-offs were \$17.6 million in the six months ended June 30, 2011, versus \$17.0 million in the six months ended June 30, 2010. Ten relationships accounted for \$14.9 million of the net charge-off total for the six months ended June 30, 2011. General market conditions, and more specifically, housing supply, absorption rates and unique circumstances related to individual borrowers and projects contributed to increased provisions and charge-offs. As properties were categorized as potential problem loans, non-performing loans or foreclosed assets, evaluations were made of the value of these assets with corresponding charge-offs as appropriate.

Management records a provision for loan losses in an amount it believes sufficient to result in an allowance for loan losses that will cover current net charge-offs as well as risks believed to be inherent in the loan portfolio of the Bank. The amount of provision charged against current income is based on several factors, including, but not limited to, past loss experience, current portfolio mix, actual and potential losses identified in the loan portfolio, economic conditions, regular reviews by internal staff and regulatory examinations.

Weak economic conditions, higher inflation or interest rates, or other factors may lead to increased losses in the portfolio and/or requirements for an increase in loan loss provision expense. Management long ago established various controls in an attempt to limit future losses, such as a watch list of possible problem loans, documented loan administration policies and a loan review staff to review the quality and anticipated collectability of the portfolio. More recently, additional procedures have been implemented to provide for more frequent management review of the loan portfolio based on loan size, loan type and delinquencies. Management determines which loans are potentially uncollectible, or represent a greater risk of loss, and makes additional provisions to expense, if necessary, to maintain the allowance at a satisfactory level.

Loans acquired in the March 20, 2009 and September 4, 2009, FDIC-assisted transactions are covered by loss sharing agreements between the FDIC and Great Southern Bank which afford Great Southern Bank significant protection from losses in the acquired portfolio of loans. The acquired loans were grouped into pools based on common characteristics and were recorded at their estimated fair values, which incorporated estimated credit losses at the acquisition dates. These loan pools are systematically reviewed by the Company to determine the risk of losses that may exceed those identified at the time of the acquisition. Techniques used in determining risk of loss are similar to the legacy Great Southern Bank portfolio, with most focus being placed on those loan pools which include the larger loan relationships and those loan pools which exhibit higher risk characteristics. Review of the acquired loan portfolio also includes meetings with customers, review of financial information and collateral valuations to determine if any additional losses are apparent. At June 30, 2011, one loan pool exhibited risk of loss and had allowances for loan losses totaling \$30,000. The loan pool was acquired through the Vantus Bank FDIC-assisted transaction and because of the loss sharing agreement, only 20% of the anticipated \$30,000 loss would be ultimately borne by the Bank. During the three months ended June 30, 2011, one loan pool that was acquired through the Vantus Bank FDIC-assisted transaction and had allowances for loan losses totaling \$800,000 at December 31, 2010 was charged-off. Because of the loss sharing agreement, only 20% of the loss was ultimately borne by the Bank.

The Bank's allowance for loan losses as a percentage of total loans, excluding loans covered by the FDIC loss sharing agreements, was 2.43% and 2.48% at June 30, 2011 and December 31, 2010, respectively. Management considers the allowance for loan losses adequate to cover losses inherent in the Company's loan portfolio at June 30, 2011, based on recent reviews of the Company's loan portfolio and current economic conditions. If economic conditions remain weak or deteriorate significantly, it is possible that additional loan loss provisions would be required, thereby adversely affecting future results of operations and financial condition.

Non-performing Assets

Former TeamBank and Vantus Bank non-performing assets, including foreclosed assets, are not included in the totals and in the discussion of non-performing loans, potential problem loans and foreclosed assets below because losses from these assets are substantially covered under loss sharing agreements with the FDIC. In addition, FDIC-covered assets were recorded at their estimated fair values as of March 20, 2009, and September 4, 2009, respectively. The overall performance of FDIC-covered loan pools has been consistent with, or better than, original expectations as of the acquisition dates.

As a result of changes in balances and composition of the loan portfolio, changes in economic and market conditions that occur from time to time, and other factors specific to a borrower's circumstances, the level of non-performing assets will fluctuate. Non-performing assets, excluding FDIC-covered non-performing assets, at June 30, 2011, were \$83.5 million, an increase of \$5.2 million from \$78.3 million at December 31, 2010. Non-performing assets, excluding FDIC-covered assets, as a percentage of total assets were 2.44% at June 30, 2011, compared to 2.30% at December 31, 2010. Compared to December 31, 2010, non-performing loans decreased \$4.1 million to \$25.3 million and foreclosed assets increased \$9.3 million to \$58.2 million. Construction and land development loans comprised \$6.8 million, or 27.1%, of the total \$25.3 million of non-performing loans at June 30, 2011, compared with \$8.1 million or 27.6% of the total \$29.4 million of non-performing loans at December 31, 2010. Non-performing commercial real estate loans were \$5.3 million, or 21.1%, of the total non-performing loans at June 30, 2011, compared with \$6.1 million, or 20.7%, at December 31, 2010.

Non-performing Loans. Activity in the non-performing loans category during the six months ended June 30, 2011 was as follows:

	Beginning Balance, January 1	Additions to Non-Performing	Removed from Non-Performing	Transfers to Potential Problem Loans	Transfers to Foreclosed Assets	Charge-Offs	Payments	Ending Balance, June 30
	(In Thousands)							
One- to four-family construction Subdivision construction Land development Commercial construction One- to four-family residential Other residential Commercial real estate Commercial business Consumer	\$578	\$ 699	\$ —	\$—	\$ —	\$ (57)	\$(388)	\$832
	1,860	6,325	(26)	—	(2,131)	(1,257)	(105)	4,666
	5,668	97		(667)	(2,931)	(767)	(51)	1,349
	—	—	—	—	—	—	—	—
	5,608	3,502	—	—	(2,636)	(563)	(456)	5,455
	4,203	—	—	—	(183)	(883)	(44)	3,093
	6,074	13,658	(3,687)	(1,911)	(3,619)	(4,392)	(786)	5,337
	3,832	747	(497)	(3)	(42)	(99)	(385)	3,553
	1,597	752	(201)	(120)	(30)	(226)	(798)	974
Total	\$29,420	\$ 25,780	\$ (4,411)	\$(2,701)	\$ (11,572)	\$ (8,244)	\$(3,013)	\$25,259

At June 30, 2011, the commercial real estate category of non-performing loans included 9 loans. The largest two relationships in this category totaled \$1.4 million and \$1.0 million, respectively, or 45.7% of the total category, and were collateralized by properties in St. Louis, and Springfield, Mo., respectively. The significant changes in the commercial real estate category were primarily due to two large relationships collateralized by properties in St. Louis, Mo. and Rogers, Ark. Within the commercial real estate category, these two relationships account for \$10.2 million of the additions, primarily all of the amount removed from non-performing, \$2.2 million of the transfers to foreclosed assets and \$3.2 million of the charge-offs. Both of the relationships were added during the period because of unexpected downturns in the borrowers' respective businesses that were providing the cash flow for the loans. The one- to four-family residential category included 51 loans, nine of which were added during the period.

Potential Problem Loans. Compared to December 31, 2010, potential problem loans decreased \$30.6 million, or 54.9%. This decrease included \$14.2 million of loans removed from potential problem loans and \$16.8 million of loans transferred to non-performing loans or foreclosed assets categories. Potential problem loans are loans which management has identified through routine internal review procedures as having possible credit problems that may cause the borrowers difficulty in complying with the current repayment terms. These loans are not reflected in non-performing assets, but are considered in determining the adequacy of the allowance for loan losses. Activity in the potential problem loans category during the six months ended June 30, 2011 was as follows:

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

	Beginning Balance, January 1	Additions to Potential Problem	Removed from Potential Problem	Transfers to Non-Performing Assets	Transfers to Foreclosed Assets	Charge-Offs	Payments	Ending Balance, June 30
	(In Thousands)							
One- to four-family construction Subdivision construction Land development Commercial construction One- to four-family residential Other residential Commercial real estate Commercial business Consumer	\$714	\$653	\$(196)	\$ (261)	\$ —	\$ —	\$(240)	\$670
	6,473	630	(1,131)	(2,266)	—	(861)	(245)	2,600
	11,476	769	(1,724)	—	(3,832)	(1,327)	(190)	5,172
	1,851	—	(1,200)	—	—	(651)	—	—
	8,786	1,594	(1,270)	(862)	—	(890)	(1,984)	5,374
	5,674	189	(3,850)	—	—	(1,715)	(5)	293
	14,729	4,348	(1,160)	(5,068)	(2,669)	—	(267)	9,913
	5,934	2,845	(3,653)	(503)	(1,361)	(1,513)	(814)	935
	12	224	(62)	(11)	—	—	(25)	138
Total	\$55,649	\$11,252	\$(14,246)	\$ (8,971)	\$ (7,862)	\$ (6,957)	\$(3,770)	\$25,095

At June 30, 2011, the commercial real estate category of potential problem loans included 13 loans, the largest of which had a balance of \$3.5 million, or 35.6% of the total category, and was collateralized by a hotel in Kansas City, Mo. The one- to four-family residential category included 36 loans, 16 of which were added during the period and relate to one borrower relationship. These loans totaled \$1.4 million or 25.6% of the total category and were

collateralized by rental properties in Springfield, Mo. The land development category of potential problem loans included six loans, the largest of which had a balance of \$2.5 million, or 48.4% of the total category, and was collateralized by commercial land in southwest Missouri. The transfers to foreclosure and charge-offs in the land development category for the period represent two related loans that were collateralized by commercial land in southwest Missouri. The significant decrease in the other residential category was due the charge-down and refinancing of one loan collateralized by a retail and residential building in St. Louis, Mo.

Foreclosed Assets. Of the total \$70.6 million of foreclosed assets at June 30, 2011, \$12.3 million represents the fair value of foreclosed assets acquired in the FDIC-assisted transactions in 2009. These acquired foreclosed assets are subject to the loss sharing agreements with the FDIC and, therefore, are not included in the following table and discussion of foreclosed assets. Activity in foreclosed assets during the six months ended June 30, 2011 was as follows:

	Beginning Balance, January 1	Additions	Proceeds from Sales	Capitalized Costs	ORE Expense Write-Downs	Ending Balance, June 30
(In Thousands)						
One- to four-family construction	\$2,510	\$—	\$(1,275)	\$ 148	\$ (80)	\$1,303
Subdivision construction	19,816	1,365	(1,185)	—	(27)	19,969
Land development	10,620	7,528	—	—	—	18,148
Commercial construction	3,997	—	(1,250)	—	—	2,747
One- to four-family residential	2,896	2,813	(2,261)	—	(209)	3,239
Other residential	4,178	983	(193)	—	10	4,978
Commercial real estate	4,565	6,288	(4,626)	—	(134)	6,093
Commercial business	—	42	(10)	—	—	32
Consumer	318	1,872	(470)	—	—	1,720
Total	\$48,900	\$ 20,891	\$(11,270)	\$ 148	\$ (440)	\$58,229

At June 30, 2011, the subdivision construction category of foreclosed assets included 60 properties, the largest of which was located in the St. Louis, Mo. metropolitan area and had a balance of \$4.9 million, or 24.7% of the total category. Of the total dollar amount in the subdivision construction category, 19.6% is located in Branson, Mo. The land development category of foreclosed assets included 27 properties, the largest of which had a balance of \$4.3 million, or 23.6% of the total category. Of the total dollar amount in the land development category, 41.8% is located in northwest Arkansas, including the largest property previously mentioned. Included in the proceeds from sales for the commercial real estate category was an industrial building located in Springfield, Mo. that the Company capitalized as a fixed asset at \$2.7 million. The Company plans to use this facility for operational storage and a disaster recovery site, consolidating its storage from other space.

Non-interest Income

For the three months ended June 30, 2011, non-interest income decreased \$16.3 million, or 115.3%, to a negative \$2.2 million when compared to the three months ended June 30, 2010, primarily as a result of the following items:

Amortization of indemnification asset: As previously described in Note 9 of the Notes to Consolidated Financial Statements, due to the increase in cash flows expected to be collected from the FDIC-covered loan portfolios, \$11.5

million of amortization (expense) was recorded in the 2011 period relating to reductions of expected reimbursements under the loss sharing agreements with the FDIC, which are recorded as indemnification assets.

Securities gains and impairments: During the second quarter of 2011, no securities were sold and therefore, no gains or losses on sales were recognized. However, during the second quarter of 2010, a \$3.5 million gain was recorded due to sales of mortgage-backed securities. During the second quarter of 2011, a \$400,000 loss was recorded as a result of an impairment write-down in the value of an investment in a non-agency CMO. The Company continues to hold this security in the available-for-sale category. During the second quarter of 2010, no impairment write-downs were necessary based on analyses of the securities portfolio.

Service charges and ATM fees: Overdraft regulations on ATM and certain debit card transactions became effective during the third quarter of 2010. As expected, these overdraft regulations adversely affected overdraft fees. Compared to the quarter ended June 30, 2010, income related to total service charges and ATM fees decreased \$588,000 during the quarter ended June 30, 2011. Of the total \$4.0 million of income from service charges and ATM fees for the quarter ended June 30, 2011, \$1.2 million related to point-of-sale transactions.

For the six months ended June 30, 2011, non-interest income decreased \$27.0 million, or 117.0%, to a negative \$3.9 million when compared to the six months ended June 30, 2010, primarily as a result of the following items:

Amortization of indemnification asset: As previously described in Note 9 of the Notes to Consolidated Financial Statements, due to the increase in cash flows expected to be collected from the FDIC-covered loan portfolios, \$22.8 million of amortization (expense) was recorded in the 2011 period relating to reductions of expected reimbursements under the loss sharing agreements with the FDIC, which are recorded as indemnification assets.

Securities gains and impairments: As previously discussed, during the first half of 2010, a \$3.5 million gain was recorded due to sales of mortgage-backed securities and during the first half of 2011, a \$400,000 loss was recorded as a result of an impairment write-down in the value of an investment in a non-agency CMO.

Service charges and ATM fees: Due to the new overdraft regulations previously described, compared to the six months ended June 30, 2010, income related to total service charges and ATM fees decreased \$1.1 million during the six months ended June 30, 2011. Of the total \$8.5 million of income from service charges and ATM fees for the six months ended June 30, 2010, \$2.3 million related to point-of-sale transactions.

Partially offsetting the above decreases in non-interest income was a \$513,000 increase in commission income during the six months ended June 30, 2011, compared to the same period in 2010. This increase is primarily due to an overall increase in activity for Great Southern Travel as well as two new locations operating in Olathe, Kan. and Des Moines, Iowa that opened in July and November 2010, respectively.

Non-interest Expense

For the three months ended June 30, 2011, non-interest expense increased \$1.3 million, or 6.4%, to \$22.1 million, when compared to the three months ended June 30, 2010. The increase was primarily due to the following items:

New banking centers: Continued internal growth of the Company since the quarter ended June 30, 2010 caused an increase in non-interest expense during the quarter ended June 30, 2011. The Company opened two retail banking centers in the St. Louis, Mo. market area, one in Clayton, Mo. in May 2011, and the other in Des Peres, Mo. in September 2010. A new banking center was also opened in Forsyth, Mo. in December 2010 that is intended to complement existing banking centers in that market area. The operation of these three new locations increased non-interest expense for the quarter ended June 30, 2011 by \$195,000 over the same period in 2010. For additional information on the Company's growth, see the "Business Initiatives" section of this Quarterly Report on Form 10-Q.

Salaries and benefits: As a result of the Company's overall growth, the number of associates employed by the Company in operational and lending areas increased 3.1% from June 30, 2010 to June 30, 2011. This personnel increase, as well as general merit increases for existing employees, led to a large portion of the increased salaries and benefits paid of \$542,000 in the quarter ended June 30, 2011 when compared with the quarter ended June 30, 2010.

FDIC insurance premiums: In the second quarter of 2011, deposit insurance premiums increased \$378,000 over the second quarter of 2010 due to an increase in the Company's insured deposits.

For the six months ended June 30, 2011, non-interest expense increased \$796,000, or 1.9%, to \$43.7 million, when compared to the six months ended June 30, 2010. The increase was primarily due to the following items:

New banking centers: Continued internal growth of the Company through new banking centers in Clayton, Mo., Des Peres, Mo. and Forsyth, Mo., as mentioned above, also contributed to the increase in non-interest expense in the first

half of 2011. The operation of these three new locations increased non-interest expense for the six months ended June 30, 2011 by \$351,000 over the same period in 2010.

Salaries and benefits: As discussed above, increases in personnel and general merit increases for existing employees led to a large portion of the increased salaries and benefits paid of \$1.1 million in the six months ended June 30, 2011 when compared with the six months ended June 30, 2010.

FDIC insurance premiums: In the first six months of 2011, deposit insurance premiums increased \$693,000 over the first six months of 2010 due to an increase in the Company's insured deposits.

Partially offsetting the above increases in non-interest expense was a \$1.5 million decrease in expense on foreclosed assets for the six months ended June 30, 2011 when compared to the same period in 2010. The decrease was primarily due to higher write-downs on foreclosed assets in the 2010 period.

The Company's efficiency ratio for the three months ended June 30, 2011, was 58.05% compared to 50.43% for the same quarter in 2010. The efficiency ratio for the six months ended June 30, 2011, was 57.77% compared to 55.90% for the same period in 2010. The changes in the ratios from the prior to current periods were primarily due to decreases in the yield on investments and changes in gains/losses on securities, as well as the increases in non-interest expense. The Company's ratio of non-interest expense to average assets increased from 2.31% and 2.36% for the three and six months ended June 30, 2010, respectively, to 2.57% and 2.52% for the three and six months ended June 30, 2011. The increase in the current period ratios is due to lower average assets and increased non-interest expense in the 2011 periods. Average assets for the quarter ended June 30, 2011 decreased \$163.4 million, or 4.5%, from the quarter ended June 30, 2010. Average assets for the six months ended June 30, 2011 decreased \$177.0 million, or 4.9%, from the six months ended June 30, 2010.

Provision for Income Taxes

The Company's effective tax rate (as compared to the statutory federal tax rate of 35.0%) was 22.1% and 23.2% for the three and six months ended June 30, 2011, respectively, due to the effects of investment tax credits and to tax-exempt investments and tax-exempt loans which reduced the Company's effective tax rate. The decrease in taxes due to tax credits is partially offset by higher non-interest expense related to the amortization of the investment in tax credits. Credits totaling \$562,000 and \$1.0 million for the three and six months ended June 30, 2011, respectively, were used to reduce the Company's tax expense which resulted in corresponding amortization in non-interest expense of \$352,000 and \$704,000 for the three and six months ended June 30, 2011, respectively, to reduce the investment in these credits. The Company's effective tax rate was 31.1% and 30.6% for the three and six months ended June 30, 2010, respectively, due to the effects of tax-exempt investments and tax-exempt loans which reduced the Company's effective tax rate. In future periods, the Company expects its effective tax rate will be approximately 22%-24%. The Company's effective tax rate may fluctuate as it is impacted by the level and timing of its utilization of tax credits.

Average Balances, Interest Rates and Yields

The following tables present, for the periods indicated, the total dollar amounts of interest income from average interest-earning assets and the resulting yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates, and the net interest margin. Average balances of loans receivable include the average balances of non-accrual loans for each period. Interest income on loans includes interest received on non-accrual loans on a cash basis. Interest income on loans includes the amortization of net loan fees, which were deferred in accordance with accounting standards. Fees included in interest income were \$506,000 and \$483,000 for the three months ended June 30, 2011 and 2010, respectively. Fees included in interest income were \$1.1 million and \$907,000 for the six months ended June 30, 2011 and 2010, respectively. Tax-exempt income was not calculated on a tax equivalent basis. The table does not reflect any effect of income taxes.

(1) Of the total average balances of investment securities, average tax-exempt investment securities were \$97.6 million and \$62.7 million for the three months ended June 30, 2011 and 2010, respectively. In addition, average tax-exempt loans and industrial revenue bonds were \$45.0 million and \$44.9 million for the three months ended June 30, 2011 and 2010, respectively. Interest income on tax-exempt assets included in this table was \$1.7 million and \$1.4 million for the three months ended June 30, 2011 and 2010, respectively. Interest income net of disallowed interest expense related to tax-exempt assets was \$1.5 million and \$1.2 million for the three months ended June 30, 2011 and 2010, respectively.

(2) The yield/rate on loans at June 30, 2011 does not include the impact of the accretible yield (income) on loans acquired in the 2009 FDIC-assisted transactions. See "Net Interest Income" for a discussion of the effect on results of operations for the three months ended June 30, 2011.

- (1) Of the total average balances of investment securities, average tax-exempt investment securities were \$96.1 million and \$63.0 million for the six months ended June 30, 2011 and 2010, respectively. In addition, average tax-exempt loans and industrial revenue bonds were \$44.3 million and \$45.8 million for the six months ended June 30, 2011 and 2010, respectively. Interest income on tax-exempt assets included in this table was \$3.5 million and \$2.7 million for the six months ended June 30, 2011 and 2010, respectively. Interest income net of disallowed interest expense related to tax-exempt assets was \$3.2 million and \$2.4 million for the six months ended June 30, 2011 and 2010, respectively.
- (2) The yield/rate on loans at June 30, 2011 does not include the impact of the accretable yield (income) on loans acquired in the 2009 FDIC-assisted transactions. See "Net Interest Income" for a discussion of the effect on results of operations for the six months ended June 30, 2011.

Rate/Volume Analysis

The following tables present the dollar amounts of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities for the periods shown. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in rate (i.e., changes in rate multiplied by old volume) and (ii) changes in volume (i.e., changes in volume multiplied by old rate). For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately to volume and rate. Tax-exempt income was not calculated on a tax equivalent basis.

Liquidity and Capital Resources

Liquidity is a measure of the Company's ability to generate sufficient cash to meet present and future financial obligations in a timely manner through either the sale or maturity of existing assets or the acquisition of additional funds through liability management. These obligations include the credit needs of customers, funding deposit withdrawals, and the day-to-day operations of the Company. Liquid assets include cash, interest-bearing deposits with financial institutions and certain investment securities and loans. The Company manages its ability to generate liquidity primarily through liability funding in such a way that it believes it maintains overall liquidity sufficient to satisfy its depositors' requirements and meet its customers' credit needs. At June 30, 2011, the Company had commitments of approximately \$398.6 million to fund loan originations, \$62.5 million of unused lines of credit and unadvanced loans, and \$19.1 million of outstanding letters of credit.

Management continuously reviews the capital position of the Company and the Bank to ensure compliance with minimum regulatory requirements, as well as to explore ways to increase capital either by retained earnings or other means.

At June 30, 2011, the Company's total stockholders' equity was \$314.4 million, or 9.2% of total assets. At June 30, 2011, common stockholders' equity was \$257.7 million, or 7.5% of total assets, equivalent to a book value of \$19.14 per common share. Total stockholders' equity at December 31, 2010, was \$304.0 million, or 8.9% of total assets. At December 31, 2010, common stockholders' equity was \$247.5 million, or 7.3% of total assets, equivalent to a book value of \$18.40 per common share.

At June 30, 2011 and December 31, 2010, the Company's tangible common equity to total assets ratio was 7.4% and 7.1%, respectively. The Company's tangible common equity to total risk-weighted assets ratio was 12.6% at June 30, 2011, compared to 12.4% at December 31, 2010.

Banks are required to maintain minimum risk-based capital ratios. These ratios compare capital, as defined by the risk-based regulations, to assets adjusted for their relative risk as defined by the regulations. Guidelines require banks to have a minimum Tier 1 risk-based capital ratio, as defined, of 4.00%, a minimum total risk-based capital ratio of 8.00%, and a minimum 4.00% Tier 1 leverage ratio. To be considered "well capitalized," banks must have a minimum Tier 1 risk-based capital ratio, as defined, of 6.00%, a minimum total risk-based capital ratio of 10.00%, and a minimum Tier 1 leverage ratio of 5.00%. On June 30, 2011, the Bank's Tier 1 risk-based capital ratio was 14.4%, total risk-based capital ratio was 15.6% and the Tier 1 leverage ratio was 8.6%. As of June 30, 2011, the Bank was "well capitalized" as defined by the Federal banking agencies' capital-related regulations. The Federal Reserve Board has established capital regulations for bank holding companies that generally parallel the capital regulations for banks. On June 30, 2011, the Company's Tier 1 risk-based capital ratio was 16.5%, total risk-based capital ratio was 17.7% and the Tier 1 leverage ratio was 9.6%. As of June 30, 2011, the Company was "well capitalized" under the capital ratios described above.

On December 5, 2008, the Company completed a transaction to participate in the U.S. Treasury's voluntary Capital Purchase Program (CPP). The CPP, a part of the Emergency Economic Stabilization Act of 2009, was designed to provide capital to healthy financial institutions, thereby increasing confidence in the banking industry and increasing the flow of financing to businesses and consumers. At the time the Company was approved to participate in the CPP in December 2008, it exceeded all "well-capitalized" regulatory benchmarks and, as indicated above, it continues to exceed these benchmarks. The Company received \$58.0 million from the U.S. Treasury through the sale of 58,000 shares of the Company's newly authorized Fixed Rate Cumulative Perpetual Preferred Stock, Series A. The Company also issued to the U.S. Treasury a warrant to purchase 909,091 shares of common stock at \$9.57 per share. The

amount of preferred shares sold represents approximately 3% of the Company's risk-weighted assets as of September 30, 2008. Through its preferred stock investment, the Treasury will receive a cumulative dividend of 5% per year for the first five years, or \$2.9 million per year, and 9% per year thereafter. The preferred shares are callable by the Company at 100% of the issue price, subject to consultation by the U.S. Treasury with the Company's primary federal regulator. In addition, for a period of the earlier of three years or until these preferred shares have been redeemed by the Company or divested by the Treasury, the Company has certain limitations on dividends that may be declared on its common or preferred stock and is prohibited from repurchasing shares of its common or other capital stock or any trust preferred securities issued by the Company without the Treasury's consent. As noted below, it is expected that the Company's CPP funds will be repaid (and the Series A preferred stock redeemed) in connection with the Company's anticipated participation in the SBLF.

As previously mentioned, the Company submitted an application to possibly participate in the U.S. Treasury's Small Business Lending Fund (SBLF). Enacted into law in 2010 as part of the Small Business Jobs Act, the SBLF is a \$30 billion fund that encourages lending to small businesses by providing Tier 1 capital to qualified community banks and holding companies with assets of less than \$10 billion through the sale of preferred stock to the Treasury. The SBLF provides an option for eligible community banks and holding companies to refinance funds received through the CPP. As noted above, the Company received \$58.0 million in CPP funds from the Treasury in 2008 through the sale of preferred stock. In connection with the SBLF, the preferred stock issued by the Company under the CPP would be repaid and the Company would concurrently issue a new series of preferred stock to the Treasury. The annualized dividend rate on the new preferred stock issued under the SBLF initially would be 5% (which is the rate currently being paid by the Company under CPP), but the rate could be reduced to as low as 1% through April 2016, depending on the level of small business lending, and would be increased to 9% thereafter. The Company's SBLF application has been preliminarily approved by the Treasury for the issuance of \$57.9 million of preferred stock, and the transaction closing (including the concurrent repayment of the \$58.0 million of CPP funds) is expected to occur in the third quarter of 2011. The ten-year warrant issued by the Company to the Treasury in connection with the CPP to purchase 909,091 shares of the Company's common stock at an exercise price of \$9.57 per share would remain outstanding following the closing of the SBLF transaction, provided that the Company may repurchase the warrant following the SBLF closing if it submits a proposed repurchase price to the Treasury within 15 days after the closing and reaches an agreement with the Treasury on that price.

The Company's primary sources of funds are customer deposits, FHLBank advances, other borrowings, loan repayments, unpledged securities, proceeds from sales of loans and available-for-sale securities and funds provided from operations. The Company utilizes particular sources of funds based on the comparative costs and availability at the time. The Company has from time to time chosen not to pay rates on deposits as high as the rates paid by certain of its competitors and, when believed to be appropriate, supplements deposits with less expensive alternative sources of funds.

At June 30, 2011, the Company had these available secured lines and on-balance sheet liquidity:

Federal Home Loan Bank line	\$298.3 million
Federal Reserve Bank line	\$284.8 million
Interest-Bearing and Non-Interest-Bearing Deposits	\$355.4 million
Unpledged Securities	\$100.9 million

Statements of Cash Flows. During the six months ended June 30, 2011 and 2010, respectively, the Company had positive cash flows from operating activities. Cash flows from investing activities were negative for the six months ended June 30, 2011 and were positive for the six months ended June 30, 2010. Cash flows from financing activities were negative for the six months ended June 30, 2011 and 2010, respectively.

Cash flows from operating activities for the periods covered by the Statements of Cash Flows have been primarily related to changes in accrued and deferred assets, credits and other liabilities, the provision for loan losses, depreciation, impairments of investment securities, gains on sales of investment securities and the amortization of deferred loan origination fees and discounts (premiums) on loans and investments, all of which are non-cash or non-operating adjustments to operating cash flows. Net income adjusted for non-cash and non-operating items and the origination and sale of loans held for sale were the primary source of cash flows from operating activities. Operating activities provided cash flows of \$60.2 million and \$56.4 million during the six months ended June 30, 2011 and 2010, respectively.

During the six months ended June 30, 2011, investing activities used cash of \$128.0 million primarily due to the purchases of investment securities and the net increase in loans for the period. During the six months ended June 30, 2010, investing activities provided cash of \$140.6 million primarily due to the net decrease in loans for the period.

Changes in cash flows from financing activities during the periods covered by the Statements of Cash Flows are due to changes in deposits after interest credited, changes in FHLBank advances, changes in short-term borrowings, and changes in structured repurchase agreements, as well as dividend payments to stockholders. Financing activities used cash of \$6.7 million and \$176.5 million during the six months ended June 30, 2011 and 2010, respectively. Financing

activities in the future are expected to primarily include changes in deposits, changes in FHLBank advances, changes in short-term borrowings and dividend payments to stockholders.

Dividends. During the three months ended June 30, 2011, the Company declared a common stock cash dividend of \$0.18 per share, or 49% of net income per common diluted share for that three month period, and paid a common stock cash dividend of \$0.18 per share (which was declared in March 2011). During the three months ended June 30, 2010, the Company declared a common stock cash dividend of \$0.18 per share (which was paid in July 2010), or 51% of net income per common diluted share for that three month period, and paid a common stock cash dividend of \$0.18 per share (which was declared in March 2010). During the six months ended June 30, 2011, the Company declared common stock cash dividends of \$0.36 per share, or 49% of net income per common diluted share for that six month period, and paid common stock cash dividends of \$0.36 per share. During the six months ended June 30, 2010, the Company declared common stock cash dividends of \$0.36 per share, or 52% of net income per common diluted share for that six month period, and paid common stock cash dividends of \$0.36 per share. The Board of Directors meets regularly to consider the level and the timing of dividend payments. The dividend declared but unpaid as of June 30, 2011, was paid to shareholders on July 13, 2011. In addition, the Company paid preferred dividends as described below.

Our participation in the CPP currently precludes us from increasing our common stock cash dividend above \$0.18 per share per quarter without the consent of the Treasury until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. As a result of the issuance of preferred stock to the Treasury pursuant to the CPP in December 2008, during the six months ended June 30, 2011, the Company paid preferred stock cash dividends of \$725,000 on February 15, 2011 and May 16, 2011, respectively. During the six months ended June 30, 2010, the Company paid preferred stock cash dividends of \$725,000 on February 16, 2010 and May 17, 2010, respectively. Quarterly payments of \$725,000 will be due through February 15, 2014, as long as the preferred stock is outstanding. Thereafter, for as long as the preferred stock remains outstanding, the preferred stock quarterly dividend payment will increase to \$1.3 million. It is expected that the Company's CPP funds will be repaid (and the preferred stock issued pursuant to the CPP will be redeemed) in connection with the Company's anticipated participation in the SBLF. The terms of the new preferred stock issued under the SBLF will provide that the Company generally may pay dividends on, and repurchase, its common stock if, after giving effect to the dividend payment or repurchase, the dollar amount of the Company's Tier 1 capital would remain at or above a specified threshold.

Common Stock Repurchases and Issuances. The Company has been in various buy-back programs since May 1990. During the three and six months ended June 30, 2011 and 2010, respectively, the Company did not repurchase any shares of its common stock. During the three and six months ended June 30, 2011, the Company issued 7,125 shares of stock at an average price of \$12.53 per share and 7,614 shares of stock at an average price of \$12.27 per share, respectively, to cover stock option exercises. During the three and six months ended June 30, 2010, the Company issued 5,175 shares of stock at an average price of \$14.11 per share and 27,122 shares of stock at an average price of \$13.80 per share, respectively, to cover stock option exercises.

Our participation in the CPP currently precludes us from purchasing shares of the Company's stock without the Treasury's consent until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. It is expected that the Company's CPP funds will be repaid (and the preferred stock issued pursuant to the CPP will be redeemed) in connection with the Company's anticipated participation in the SBLF. The restrictions under the terms of the SBLF preferred stock on the repurchase of common stock are noted above, under "-Dividends." Management has historically utilized stock buy-back programs from time to time as long as repurchasing the stock contributed to the overall growth of shareholder value. The number of shares of stock repurchased and the price paid is the result of

many factors, several of which are outside of the control of the Company. The primary factors, however, are the number of shares available in the market from sellers at any given time and the price of the stock within the market as determined by the market.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Asset and Liability Management and Market Risk

A principal operating objective of the Company is to produce stable earnings by achieving a favorable interest rate spread that can be sustained during fluctuations in prevailing interest rates. The Company has sought to reduce its exposure to adverse changes in interest rates by attempting to achieve a closer match between the periods in which its interest-bearing liabilities and interest-earning assets can be expected to reprice through the origination of adjustable-rate mortgages and loans with shorter terms to maturity and the purchase of other shorter term interest-earning assets. Since the Company uses laddered brokered deposits and FHLBank advances to fund a portion of its loan growth, the Company's assets tend to reprice more quickly than its liabilities.

Our Risk When Interest Rates Change

The rates of interest we earn on assets and pay on liabilities generally are established contractually for a period of time. Market interest rates change over time. Accordingly, our results of operations, like those of other financial institutions, are impacted by changes in interest rates and the interest rate sensitivity of our assets and liabilities. The risk associated with changes in interest rates and our ability to adapt to these changes is known as interest rate risk and is our most significant market risk.

How We Measure the Risk to Us Associated with Interest Rate Changes

In an attempt to manage our exposure to changes in interest rates and comply with applicable regulations, we monitor Great Southern's interest rate risk. In monitoring interest rate risk we regularly analyze and manage assets and liabilities based on their anticipated payment streams and interest rates, the timing of their maturities and their sensitivity to actual or potential changes in market interest rates.

The ability to maximize net interest income is largely dependent upon the achievement of a positive interest rate spread that can be sustained despite fluctuations in prevailing interest rates. Interest rate sensitivity is a measure of the difference between amounts of interest-earning assets and interest-bearing liabilities which either reprice or mature within a given period of time. The difference, or the interest rate repricing "gap," provides an indication of the extent to which an institution's interest rate spread will be affected by changes in interest rates. A gap is considered positive when the amount of interest-rate sensitive assets exceeds the amount of interest-rate sensitive liabilities repricing during the same period, and is considered negative when the amount of interest-rate sensitive liabilities exceeds the amount of interest-rate sensitive assets during the same period. Generally, during a period of rising interest rates, a negative gap within shorter repricing periods would adversely affect net interest income, while a positive gap within shorter repricing periods would result in an increase in net interest income. During a period of falling interest rates, the opposite would be true. As of June 30, 2011, Great Southern's internal interest rate risk models indicate a one-year interest rate sensitivity gap that is slightly positive. Generally, a rate increase by the FRB would be expected to have an immediate negative impact on Great Southern's net interest income. As the Federal Funds rate is now very low, the Company's interest rate floors have been reached on most of its "prime rate" loans. In addition, Great Southern has elected to leave its "Great Southern Prime Rate" at 5.00% for those loans that are indexed to "Great Southern Prime" rather than "Wall Street Journal Prime." While these interest rate floors and prime rate adjustments have helped keep the rate on our loan portfolio higher in this very low interest rate environment, they will also reduce the positive effect to our loan rates when market interest rates, specifically the "prime rate," begin to increase. The interest rate on these loans will not increase until the loan floors are reached and the "Wall Street Journal Prime" interest rate exceeds 5.00%. If rates remain generally unchanged in the short-term, we expect that our cost of funds will continue to decrease somewhat as we continue to redeem some of our wholesale funds. In addition, a significant portion of our retail

certificates of deposit mature in the next few months and we expect that they will be replaced with new certificates of deposit at somewhat lower interest rates.

Interest rate risk exposure estimates (the sensitivity gap) are not exact measures of an institution's actual interest rate risk. They are only indicators of interest rate risk exposure produced in a simplified modeling environment designed to allow management to gauge the Bank's sensitivity to changes in interest rates. They do not necessarily indicate the impact of general interest rate movements on the Bank's net interest income because the repricing of certain categories of assets and liabilities is subject to competitive and other factors beyond the Bank's control. As a result, certain assets and liabilities indicated as maturing or otherwise repricing within a stated period may in fact mature or reprice at different times and in different amounts and cause a change, which potentially could be material, in the Bank's interest rate risk.

In order to minimize the potential for adverse effects of material and prolonged increases and decreases in interest rates on Great Southern's results of operations, Great Southern has adopted asset and liability management policies to better match the maturities and repricing terms of Great Southern's interest-earning assets and interest-bearing liabilities. Management recommends and the Board of Directors sets the asset and liability policies of Great Southern which are implemented by the asset and liability committee. The asset and liability committee is chaired by the Chief Financial Officer and is comprised of members of Great Southern's senior management. The purpose of the asset and liability committee is to communicate, coordinate and control asset/liability management consistent with Great Southern's business plan and board-approved policies. The asset and liability committee establishes and monitors the volume and mix of assets and funding sources taking into account relative costs and spreads, interest rate sensitivity and liquidity needs. The objectives are to manage assets and funding sources to produce results that are consistent with liquidity, capital adequacy, growth, risk and profitability goals. The asset and liability committee meets on a monthly basis to review, among other things, economic conditions and interest rate outlook, current and projected liquidity needs and capital positions and anticipated changes in the volume and mix of assets and liabilities. At each meeting, the asset and liability committee recommends appropriate strategy changes based on this review. The Chief Financial Officer or his designee is responsible for reviewing and reporting on the effects of the policy implementations and strategies to the Board of Directors at their monthly meetings.

In order to manage its assets and liabilities and achieve the desired liquidity, credit quality, interest rate risk, profitability and capital targets, Great Southern has focused its strategies on originating adjustable rate loans, and managing its deposits and borrowings to establish stable relationships with both retail customers and wholesale funding sources.

At times, depending on the level of general interest rates, the relationship between long- and short-term interest rates, market conditions and competitive factors, we may determine to increase our interest rate risk position somewhat in order to maintain or increase our net interest margin.

The asset and liability committee regularly reviews interest rate risk by forecasting the impact of alternative interest rate environments on net interest income and market value of portfolio equity, which is defined as the net present value of an institution's existing assets, liabilities and off-balance sheet instruments, and evaluating such impacts against the maximum potential changes in net interest income and market value of portfolio equity that are authorized by the Board of Directors of Great Southern.

ITEM 4. CONTROLS AND PROCEDURES

We maintain a system of disclosure controls and procedures (as defined in Rule 13(a)-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) that is designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file under the Exchange Act is recorded, processed, summarized and reported accurately and within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate. An evaluation of our disclosure controls and procedures was carried out as of June 30, 2011, under the supervision and with the participation of our principal executive officer, principal financial officer and several other members of our senior management. Our principal executive officer and principal financial officer concluded that, as of June 30, 2011, our disclosure controls and procedures were effective in ensuring that the information we are required to disclose in the reports we file or submit under the Act is (i) accumulated and communicated to our management (including the principal executive officer and principal financial officer) to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

There were no changes in our internal control over financial reporting (as defined in Rule 13(a)-15(f) under the Act) that occurred during the quarter ended June 30, 2011, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

We do not expect that our internal control over financial reporting will prevent all errors and all fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns in controls or procedures can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

In the normal course of business, the Company and its subsidiaries are subject to pending and threatened legal actions, some for which the relief or damages sought are substantial. After reviewing pending and threatened litigation with counsel, management believes at this time that, except as noted below, the outcome of such litigation will not have a material adverse effect on the results of operations or stockholders' equity. We are not able to predict at this time whether the outcome of such actions may or may not have a material adverse effect on the results of operations in a particular future period as the timing and amount of any resolution of such actions and its relationship to the future results of operations are not known.

On November 22, 2010, a suit was filed against the Bank in Missouri state court in Springfield by a customer alleging that the fees associated with the Bank's automated overdraft program in connection with its debit card and ATM cards constitute unlawful interest in violation of Missouri's usury laws. The suit seeks class-action status for Bank customers who have paid overdraft fees on their checking accounts. The Bank has filed for a motion to dismiss the suit. At this early stage of the litigation, it is not possible for management of the Bank to determine the probability of a material adverse outcome or reasonably estimate the amount of any potential loss.

Item 1A. Risk Factors

There have been no material changes to the risk factors set forth in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2010.

Item 2. Issuer Purchases of Equity Securities

On November 15, 2006, the Company's Board of Directors authorized management to repurchase up to 700,000 shares of the Company's outstanding common stock, under a program of open market purchases or privately negotiated transactions. The plan does not have an expiration date. However, our participation in the CPP currently precludes us from purchasing shares of the Company's stock without the prior consent of the Treasury until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. As noted above, it is expected that the Company's CPP funds will be repaid (and the preferred stock issued pursuant to the CPP will be redeemed) in connection with the Company's anticipated participation in the SBLF. The restrictions under the terms of the SBLF preferred stock on the repurchase of common stock are noted under "Part I. Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources."

As indicated below, no shares were purchased during the three months ended June 30, 2011.

	Total Number of Shares Purchased	Average Price Per Share	Total Number of Shares Purchased As Part of Publicly Announced Plan	Maximum Number of Shares that May Yet Be Purchased Under the Plan(1)
April 1, 2011 – April 30, 2011	---	\$ ----	---	396,562

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

May 1, 2011 –					
May 31, 2011	---	\$	----	---	396,562
June 1, 2011 –					
June 30, 2011	---	\$	----	---	396,562
	---	\$	----	---	

(1) Amount represents the number of shares available to be repurchased under the plan as of the last calendar day of the month shown.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Removed and Reserved

Item 5. Other Information

None.

Item 6. Exhibits and Financial Statement Schedules

a) Exhibits

See Exhibit Index.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

EXHIBIT INDEX

Exhibit No.	Description
(2)	<p>Plan of acquisition, reorganization, arrangement, liquidation, or succession</p> <p>(i) The Purchase and Assumption Agreement, dated as of March 20, 2009, among Federal Deposit Insurance Corporation, Receiver of TeamBank, N.A., Paola, Kansas, Federal Deposit Insurance Corporation and Great Southern Bank, previously filed with the Commission (File no. 000-18082) as Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on March 26, 2010 is incorporated herein by reference as Exhibit 2.1.</p> <p>(ii) The Purchase and Assumption Agreement, dated as of September 4, 2009, among Federal Deposit Insurance Corporation, Receiver of Vantus Bank, Sioux City, Iowa, Federal Deposit Insurance Corporation and Great Southern Bank, previously filed with the Commission (File no. 000-18082) as Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on September 11, 2010 is incorporated herein by reference as Exhibit 2.1.</p>
(3)	<p>Articles of incorporation and Bylaws</p> <p>(i) The Registrant's Charter previously filed with the Commission as Appendix D to the Registrant's Definitive Proxy Statement on Schedule 14A filed on June 30, 2004 (File No. 000-18082), is incorporated herein by reference as Exhibit 3.1.</p> <p>(iA) The Articles Supplementary to the Registrant's Charter setting forth the terms of the Registrant's Fixed Rated Cumulative Perpetual Preferred Stock, Series A, previously filed with the Commission (File no. 000-18082) as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on December 9, 2008, are incorporated herein by reference as Exhibit 3(i).</p> <p>(ii) The Registrant's Bylaws, previously filed with the Commission (File no. 000-18082) as Exhibit 3(ii) to the Registrant's Current Report on Form 8-K filed on October 23, 2007, is incorporated herein by reference as Exhibit 3.2</p>
(4)	<p>Instruments defining the rights of security holders, including indentures</p>

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

The Company hereby agrees to furnish the SEC upon request, copies of the instruments defining the rights of the holders of each issue of the Registrant's long-term debt.

The warrant to purchase shares of the Registrant's common stock dated December 5, 2008, previously filed with the Commission (File no. 000-18082) as Exhibit 4.2 to the Registrant's Current Report on Form 8-K filed on December 9, 2008, is incorporated herein by reference as Exhibit 4(i).

(9) Voting trust agreement

Inapplicable.

(10) Material contracts

The Registrant's 1989 Stock Option and Incentive Plan previously filed with the Commission (File no. 000-18082) as Exhibit 10.2 to the Registrant's Annual Report on Form 10-K for the fiscal year ended June 30, 1990, is incorporated herein by reference as Exhibit 10.1.

The Registrant's 1997 Stock Option and Incentive Plan previously filed with the Commission (File no. 000-18082) as Annex A to the Registrant's Definitive Proxy Statement on Schedule 14A filed on September 18, 1997 is incorporated herein by reference as Exhibit 10.2.

The Registrant's 2003 Stock Option and Incentive Plan previously filed with the Commission (File No. 000-18082) as Annex A to the Registrant's Definitive Proxy Statement on Schedule 14A filed on April 14, 2003, is incorporated herein by reference as Exhibit 10.3.

The employment agreement dated September 18, 2002 between the Registrant and William V. Turner previously filed with the Commission (File no. 000-18082) as Exhibit 10.2 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2003, is incorporated herein by reference as Exhibit 10.4.

The employment agreement dated September 18, 2002 between the Registrant and Joseph W. Turner previously filed with the Commission (File no. 000-18082) as Exhibit 10.4 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2003, is incorporated herein by reference as Exhibit 10.5.

The form of incentive stock option agreement under the Registrant's 2003 Stock Option and Incentive Plan previously filed with the Commission as Exhibit 10.1 to the Registrant's Current Report on Form 8-K (File no. 000-18082) filed on February 24, 2005 is incorporated herein by reference as Exhibit 10.6.

The form of non-qualified stock option agreement under the Registrant's 2003 Stock Option and Incentive Plan previously filed with the Commission as Exhibit 10.2 to the Registrant's Current Report on Form 8-K (File no. 000-18082) filed on February 24, 2005 is incorporated herein by reference as Exhibit 10.7.

A description of the current salary and bonus arrangements for 2011 for the Registrant's named executive officers previously filed with the Commission as Exhibit 10.8 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2010 is incorporated herein by reference as Exhibit 10.8.

A description of the current fee arrangements for the Registrant's directors previously filed with the Commission as Exhibit 10.9 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2010 is incorporated herein by reference as Exhibit 10.9.

The Letter Agreement, including Schedule A, and Securities Purchase Agreement, dated December 5, 2008, between the Registrant and the United States Department of the Treasury, previously filed with the Commission (File no. 000-18082) as Exhibit 10.1 to the Registrant's Current Report on Form 8-K filed on December 8, 2008, is incorporated herein by reference as Exhibit 10.10.

The form of Compensation Modification Agreement and Waiver, executed by each of William V. Turner, Joseph W. Turner, Rex A. Copeland, Steven G. Mitchem, Douglas W. Marrs and Linton J. Thomason, previously filed with the Commission (File no. 000-18082) as Exhibit 10.2 to the Registrant's Current Report on Form 8-K filed on December 8, 2008, is incorporated herein by reference as Exhibit 10.11.

(11) Statement re computation of per share earnings

Included in Note 6 to the Consolidated Financial Statements.

(15) Letter re unaudited interim financial information

Inapplicable.

60

(18) Letter re change in accounting principles

Inapplicable.

(19) Report furnished to securityholders.

Inapplicable.

(22) Published report regarding matters submitted to vote of security holders

Inapplicable.

(23) Consents of experts and counsel

Inapplicable.

(24) Power of attorney

None.

(31.1) Rule 13a-14(a) Certification of Chief Executive Officer

Attached as Exhibit 31.1

(31.2) Rule 13a-14(a) Certification of Treasurer

Attached as Exhibit 31.2

(32) Certification pursuant to Section 906 of Sarbanes-Oxley Act of 2002 (18 U.S.C. Section 1350)

Attached as Exhibit 32.

(99) Additional Exhibits

None.

(101)

Attached as Exhibit 101 are the following financial statements from the Great Southern Bancorp, Inc. Quarterly Report on Form 10-Q for the quarter ended June 30, 2011, formatted in Extensive Business Reporting Language (XBRL): (i) consolidated statements of financial condition, (ii) consolidated statements of income, (iii) consolidated statements of cash flows and (iv) the notes to consolidated financial statements.
