Item 8.01. Other Events

In November 2015, Northern States Power Company Minnesota (NSP-Minnesota) a Minnesota corporation, and a wholly owned subsidiary of Xcel Energy Inc., filed a three-year electric rate case with the Minnesota Public Utilities Commission (MPUC). The rate case is based on a requested return on equity (ROE) of 10.0 percent and a 52.50 percent equity ratio. The request is detailed in the table below:

Request (Millions of Dollars)	2016	2017	2018
Rate request	\$194.6	\$52.1	\$50.4
Increase percentage	6.4	% 1.7	% 1.7
Interim request	\$163.7	\$44.9	N/A
Rate base	\$7,800	\$7,700	\$7,700

In December 2015, the MPUC approved interim rates for 2016.

Intervenor Testimony:

In June 2016, intervening parties filed direct testimony proposing modifications to NSP-Minnesota's rate request. The Minnesota Department of Commerce (DOC) subsequently filed revised testimony recommending an increase of approximately \$45.6 million in 2016, a step increase of \$53.8 million for 2017, and a step decrease of \$5.0 million for 2018, based on a recommended ROE of 9.06 percent and an equity ratio of 52.50 percent.

Based on NSP-Minnesota's interpretation of the DOC's testimony, certain recommended adjustments of approximately \$72.7 million would not be expected to impact earnings, assuming MPUC approval. The following table summarizes NSP-Minnesota's estimate of the DOC's recommendations:

(Millions of Dollars)	2016	2017	2018	Total
Filed rate request	\$194.6	\$52.1	\$50.4	\$297.1

The DOC also presented several nuclear recommendations related to capital recovery for spent fuel storage investments and Prairie Island life cycle management projects.

The use of certificate of need estimates as a recovery cap, and/or provisionally exclude recovery of amounts in excess of the cap unless the costs are deemed reasonable by the DOC's nuclear consultant and/or the MPUC.

No recovery of a portion of capital costs associated with Monticello fuel storage Cask 16, representing the amount beyond the originally anticipated project cost, or approximately \$15 million. The additional costs incurred were for testing of cask lid welds to demonstrate compliance with Nuclear Regulatory Commission requirements.

Settlement Agreement

In August 2016, NSP-Minnesota reached a settlement with the DOC, Xcel Large Industrials, the Minnesota Chamber of Commerce, the Commercial Group, the Suburban Rate Authority, the City of Minneapolis, the Industrial, Commercial, and Institutional Group, and the Energy CENTS Coalition, which resolves all revenue requirement issues in dispute. The settlement agreement requires the approval of the MPUC.

Key terms of the settlement are listed below:

- The agreement reflects a four-year period covering 2016-2019;
- The stated revenue increases in the table below, based on the DOC's sales forecast;
- Annual sales true-up to weather-normalized actuals all years, all classes:
 - 2016 weather-normalized actuals used to set final 2016 rates, no cap;
 - 2016-2019 full decoupling for decoupled classes (residential, non-demand metered commercial) with 3 percent cap; and
 - 2017-2019 annual true-up for non-decoupled classes with 3 percent cap.
- An ROE of 9.2 percent and an equity ratio of 52.5 percent;
- The nuclear related costs in this rate case will not be considered provisional;
- Continued use of all existing riders during the four-year term, however no new riders or legislative additions would be utilized during the four-year term;
- Deferral of incremental 2016 property tax expense above the amount currently recovered in rates to 2018 and 2019; NSP-Minnesota would be subject to a four-year stay out provision, such that interim rates for a new rate case would not go into effect prior to Jan. 1, 2020;
- A customer bill payment assistance program for medical needs customers; and
- A deferral of LED street lighting capital costs to the next rate case.

^(b) The table reflects the estimated earnings impact of this agreement, using NSP-Minnesota's original sales forecast as filed in the Minnesota rate case. The settlement agreement includes a provision to true-up estimated sales to the actual sales for 2016. NSP-Minnesota has previously disclosed that actual sales through the second quarter of 2016 are below its forecast.

The revised schedule for the Minnesota rate case is listed below:
